3713. That is exactly the point I wanted to bring out—that is, that you bring in the element of federalism there, and the effect of that is to differentiate it from the Oxford and Cambridge systems?—Certainly, to that extent, but the same objection would apply to making the University of Dublin the supreme University.

3714. Of course it would if there were affiliated Colleges in Cork and Belfast?—Certainly.

3715. But it would not apply as between two Colleges both situate in Dublin?—Oh, I daresay not.

3716. Dr. JACKSON.—When you speak of external examiners, I presume you mean examiners taken from the federation but not from the particular College to which the student belongs?—Either that or absolutely externs.

3717. You do not mean necessarily external to the federation?—Not necessarily, but I presume in certain cases it would be desirable that they should be absolute strangers to the University and the country.

3718. Sir ARTHUR RÜCKER.—With regard to what the Chief Baron said as to Honours Examinations, would you think it desirable or possible to have the Honour Examinations the same for everybody so as to have competition between the students, or to have separate examinations for the different Colleges, and simply leave it to the External Examiner to keep the standard the same?—I think it would be necessary for distinctly University prizes such as Fellowships, Junior Studentships, and things of that kind, to have a joint examination, probably at the seat of the University.

3719. Sir THOMAS RALEIGH.—I should like to ask you what your opinion is on the question of the relation of your proposed teaching University to Theology. Would you exclude Theology altogether, or would you admit the idea of a University recognis-

ing possibly several Schools of Theology belonging to different Churches?—Well, undoubtedly, you have touched on what would be an extremely difficult point to settle in a country like Ireland.

3720. CHAIRMAN.—The Royal has no Faculty of Theology?—No, nor has Queen's College, Belfast.

3721. And I think the Report of 1901 did not propose any?—It did not. Of course I understand that in Manchester they have solved that difficulty.

3722. LORD CHIEF BARON.—And in London?—And in London. I had a very interesting conversation with Principal Hopkinson in Aberdeen in September, in which he spoke with satisfaction of the great success of the Faculty of Theology in Manchester. He told me it had surprised himself.

3723. CHAIRMAN.—I suppose your proposals would be to leave that alone for the time being to see whether it would differ from the present system?—That is so.

3724. LORD CHIEF BARON.—And do you think with your great experience that an institution can answer the true idea of a University without a Faculty of Theology?—I must answer again that the ideal in this world is not always possible, and most certainly in Ireland at times it is absolutely unattainable.

CHAIRMAN.—We are very much obliged to you for your assistance.

The witness withdrew.

B. C. A. WINDLE, Esq., D.Sc., F.R.S., President of Queen's College, Cork, called in and examined.

B. C. A.
Windle, Esq.,
D.Sc., F.R.S.

3725. CHAIRMAN.—I think you come before us to give evidence respecting Queen's College, Cork, of which you are President?—Yes.

3726. You are aware, no doubt, that a number of schemes have been laid before us, some of which are more or less outside our jurisdiction, and some of which are within it. One of the latter class of scheme is Lord Dunraven's project, which involves the conception of the University of Dublin being turned into a National University, the constitution of a new College in Dublin for Roman Catholics, and the affiliation—the bringing into relation with this new University—of Trinity College, Dublin, the proposed new College in Dublin, and the Cork and Belfast Colleges. Could you give us the benefit of your opinion of that scheme?—Certainly. I have prepared a Memorandum addressed to that point—may I read it?

3727. If you please?—I am asked to give an opinion as to the advisability or otherwise of placing Queen's College, Cork, as a College in the University of Dublin, or of connecting it in any way with that University. Such a solution of the question entails the idea of a Federal University, to which I am opposed, and, moreover, it entails the idea of constituting that Federal University out of the University of Dublin, a plan to which I am also opposed. I will briefly state my reasons for these conclusions. (i.) As far as I am aware nowhere has a Federal University been a success. We hear a great deal of talk about a National University. It is strange that no such project has ever been proposed in England or in Germany or in America. The plan of a National University was tried in France, where centralization is in the air, and it was tried by the greatest centralizer that ever lived. The twenty-one Universities which existed in France at the time of the Revolution disappeared, and in their place arose the single University of France with associated Faculties in different parts of the country. What was the result? An almost complete sterilization of learning and of national intellectual life, largely responsible, in the opinion of many, for the catastrophe of 1870. At the very beginning of the Government of July, Guizot proposed to create a number of Universities in France as a remedy for the decay of intellectual life, which he deplored. Later on Cousin made a similar effort, and for similar reasons. Again, at the end of the second Empire, Guizot tried to achieve his object, but his attempt was interrupted by the war and nothing was done until 1896, when fifteen independent Universities were created in France out of the previously existing Faculties. It seems to me that this passage of history is an eloquent lesson as to the inadvisability of tying places of higher education together in a

Federal University. I next call your attention to the attempt in a similar direction made in the case of the Victoria University. The history of that institution is, no doubt, familiar to the members of the Commission, and I need not dwell upon it further than to say that every person who watched its working was aware that it was carried on under difficult conditions, that grave discontent was felt by many connected with it, and that, as far as I am aware, no person who understood the condition of affairs ever expected that it would last for more than a few years. In a sense, of course, there is still a federation between the Colleges of the old Victoria University. I will return to that in a few moments. The case of Wales may be cited in favour of the establishment of a Federal University, but the conditions there are wholly peculiar. The most important even of the three Colleges does not contain a complete Medical School, and the other two Colleges could not possibly, at present, stand alone as Universities, their range being too small. Yet even in Wales one hears the whisper of seapartion, and no one doubts that before long Cardiff will declare for an independent University, and no one doubts that Cardiff will get it, for the Welsh have a knack of securing educational advances which they want. I wish we could learn that knack in Ireland. Lastly, I turn to the condition in Scotland. The Commission will be aware that in 1858 an Act was passed which contained a section stating that if a Charter for the foundation of a National University for Scotland were granted by the Crown, the individual Universities might surrender their privileges of examining for and granting degrees and become merely Colleges of one National University. The plan has never been carried out, nor does it seem likely to be. "Fortunately," says Sir William Turner, "this section (i.e., the section in the Act of 1858) never became operative." ("The Scottish Universities and Recent Legislation, 1903.") "If," says Principal Laurie, when dealing with certain proposals made by Principal Donaldson, "they are intended to mean a return to Mr. Gladstone's motion of 1858, they would be destructive to all future development of the Universities of Scotland as free, self-governing institutions and centres of learning and research." (*University Review*, October, 1906.) Sir William Turner very acutely remarked in 1903 that "the impending break-up of the Federation of Colleges in the Victoria University, within twenty-three years of the conferring of the Charter of Incorporation, is a conclusive comment on the proposed conversion of the four Scottish Universities into Colleges of a new National University for Scotland." Sir William and others have pointed out that the present tie of ordinances which connects the Scotch Universities into a kind of

Federation is a bar to progress and a hindrance in the path of those institutions. The Commission will, no doubt, be familiar with the arrangements of the Scotch Universities, and I will not take up time by dealing further with this point. I will only add that the whole trend of educational opinion, all over the world, is clearly and entirely in favour of the creation of independent Universities. That such is the case in England the events of the past ten years clearly prove. I remember the discussions over the foundation of the University of Birmingham. I remember that it was urged that the offer to federate with certain other Colleges would make the obtaining of a Charter a much easier business, and I also well remember the unanimous decision that, hard or easy, we would stick to independence, and be tied up to no other College in a Midland University. I entirely agree with my late friend, Professor Jebb, who was, I think it may be said, a very conservative educationalist, that "the multiplication of Universities need not, in itself, cause uneasiness, provided that each new University is thoroughly well equipped, is a true University, and is really needed for the service of an adequately large population." (Some Aspects of Modern University Education, 1903.) Hence, if asked whether a place in a Federation is the best thing for Queen's College, Cork, I unhesitatingly reply no, and I claim that the College over which I preside might easily be made a true and thoroughly well-equipped University, and that there is a sufficiently large population around to supply it with a constant stream of students, and, I will add, of students most unusually well endowed with intellectual gifts. I am aware that any such suggestion lies outside the powers of the Commissioners, and I shall not labour this question, but proceed to say that between the creation of a group of separate Universities and the strict form of Federation which I believe to be wholly deadly and destructive, a disaster to education and a disease in the land in which it is created, there is a possible middle term. Before explaining what I conceive might be done in Ireland I should like to cite two instances of a connection between Universities which I conceive might be helpful and advantageous, instead of harmful. (i.) Lord Playfair succeeded in introducing into the Act setting up the Scottish University Commission the following clause: "To establish, after the first day of January, one thousand eight hundred and ninety-two, or such later date as Her Majesty may by Order in Council fix as the time when the powers of the Commissioners shall expire, a General University Court of the four Universities, with a view of taking in review the general interests of the Universities, especially in regard to degrees and examinations, and with the duty of reporting to Her Majesty on new ordinances, or changes in existing ordinances, affecting all or any of the Universities, and with power to report to the Secretary for Scotland on matters connected with the Universities upon which they may deem it to be of importance to represent their views, or upon subjects which may be specially referred to them by the Secretary for Scotland." I think the first part of the clause is too binding. The Court ought not to be obliged to report on ordinances with which it was in agreement. A Court of Appeal is only required where there is difference of opinion as to the merits of a case. (ii.) The Colleges of the former Victoria University are bound together on somewhat the same lines, and here we have an example of such a regulation in force, for the Scotch clause has never been put into effect. The Victoria Clause reads: "Every statute or alteration of a statute, and every ordinance or alteration of an ordinance relating to any of the matters following, that is to say (a) The titles of degrees; (b) The establishment of new degrees; (c) The periods of residence and study in the University or any affiliated or recognised institution required for degrees; (d) The conditions under which degrees higher than the Degree of Bachelor in any Faculty are to be granted; (e) The courses for medical degrees and the subjects of examination, shall, before such statute or alteration of a statute shall be allowed, and before such ordinance or alteration of an ordinance shall become operative and have effect, be communicated to the Universities established in Liverpool and Yorkshire, and if within one month after such communication, notice of objection there shall have been given by the said University or either of them" then the matter must be considered by a Joint Committee of the Universities, and if that cannot agree, the matter must go

to the Privy Council. In my opinion any University or University College has no freedom unless it lays down its own courses, examines its own students and that the University confers locally the degrees gained by the local students, in a word, unless it is a University in fact, if not in name. But I have no objection to a supervising body. On the contrary I can see some substantial advantages in such an arrangement. Nor does such a body really enslave a University. May I cite the case of the General Medical Council? I was a member of that body for five years and Chairman of two of its Committees.

3728. Are you speaking of the General Medical Council in England or in Ireland?—It is the General Medical Council for the United Kingdom. There is one single Council for the whole Kingdom, and it is a statutory body.

3729. Yes, I remember now; I had forgotten for the moment that there was one Council for Great Britain and Ireland?—Yes, it is the only one. When I was representing upon that body the University of Birmingham—which I did for five years—I was Chairman of two Committees of the Council, so that I am quite familiar with its work. That Council exercises a supervision over all bodies granting Medical qualifications, and one of its duties is to see that a certain minimum standard of knowledge is exacted from all those entering the Medical Profession. It inspects examinations and scrutinises curricula and frequently finds fault with and brings about amendment in examinations even in the oldest and most dignified Universities. Yet its only actual power is to report a recalcitrant body to the Privy Council. Once only in nearly fifty years' experience has it had to do this, and the body in question was not a University. The mere knowledge of the power in the background has been sufficient to bring about the most beneficial changes in medical education. Indeed the knowledge of that power has seldom been the compelling influence for most of the qualifying bodies have been grateful to have defects pointed out and have been ready and willing to remove them.

3730. What can the Privy Council do supposing there is a Report made to it?—It can deprive the body in question of the power of granting medical qualifications, in the last resort; it can practically cashier it. If we are to have a Federal University in Ireland, I hope that it will have the powers of supervising courses of study and seeing that they do not fall below a proper standard; that it will have the power of appointing extern Examiners to co-operate with the teachers in its Colleges in examinations for degrees, at all stages, and that it will have the power of suspending a recalcitrant College, subject to an appeal to the Visitors of the University. But I hope that it will have no further powers or privileges; that there will be local freedom for the Colleges, as I have already said, to draw up their own curricula, conduct—with extern Examiners—their own examinations, and have locally conferred the degrees of the University. I also hope that no inter-Collegiate competitions—except in the athletic field—will be permitted to take place at least for a number of years, for such are destructive of true educational progress. Such being my views on the question of Federation, I now address myself to the question of whether it is advisable that such federation should be carried out under the University of Dublin, and I say that, in my opinion, it is not advisable. The following are my reasons:—(i) Trinity College, Dublin, would, I presume—I think I may take it from what your lordship said—be one of the Colleges of the Federation.

3731. That is the suggestion?—That is the suggestion. I am a graduate of that college, and I have no hesitation in saying that such a scheme would be a crowning disaster for her. But on that point it is not my business to speak. I believe it would also be a disaster for the other colleges. It will be allowed that if you are to bring a group of colleges together it is essential that they should be on something like an equal footing. It may fairly be said that there was no very great difference between the Colleges of the Victoria University. They were of somewhat similar age, of the same non-sectarian character, with no very different aims, with some disparity of funds, it is true, but this scarcely marked enough to raise jealousies and difficulties. Yet the experiment was not a success. It would be hard to find a more homogeneous group of bodies than the Scotch Universities. In religion, in education, in every way, they have ideals which are so similar as to be indistinguishable. I examined for a number of years in two of them, and

have, therefore, some knowledge of the views of the teachers, and I do not think I am wrong in saying that they would resist to the uttermost any proposal to bring all their institutions into one National Federal University. But if these things happen in the green tree, what shall happen in the dry? In Ireland a common University would bring together a group of colleges differing in age, in wealth, in religion, and in ideals. What would be the result? In my opinion such a scheme would convert the National University into a cockpit—a cockpit, too, into which all the birds would go spoiling for a fight. Queen's College, Cork, at the time of the last Commission had only 170 students. Things are improving there, and I am told that we shall have 270 this year, which is a considerable increase; but we are a small body side by side with Trinity, and we are a poor body, too, though those who know nothing of the expenses of University education are constantly and ignorantly declaiming about our rich endowments. What chance should we have of ever developing along our own lines, or of ever calling our soul our own? In a strict Federal University, Cork, at least, would occupy the familiar and unpleasant position of the toad under the harrow. Under the system which I have advocated above, it is true that we should be much better off, but even then I look forward to constant friction in the University Assembly when it consists, as it would, of colleges, some of whom, at least, would much rather not have been brought together. Now, absence of friction in the working of the educational machine is, above all things, what is wanted in Ireland as elsewhere, and that absence is only to be gained if there is some kind of consent on the part of the combining bodies to the arrangements by which they are combined. (ii.) Any such scheme would mean the destruction of the Royal University, a crime against which I earnestly protest. It would be a parallel to that other and even worse educational crime by which the Queen's University, which was doing such excellent work and securing for itself so high a reputation, was butchered to meet the political exigencies of the moment, instead of being so altered, as it might easily have been, as to fit it to the needs of the country. The Royal University, in spite of all its shortcomings—and they are obvious—has done a great work in the country. It has 4,000 undergraduates, and the University of Dublin has, I believe, about one-fourth of that number. If either institution has the right to the name of a National University, it is not difficult to decide to which it belongs. And this statement as to the influence of the two Universities in the country is particularly true of the South of Ireland. There I suppose there are twenty graduates of the Queen's and Royal Universities for every one from Trinity, and, if the clergy of the Protestant Episcopal Church are eliminated, there are scarcely any from the latter University. I thought that the Commission might like some figures on this point, and I have taken out the only ones which I could get, namely, those relating to the medical men of Cork. There are eighty medical men in the city, and of these forty-four have degrees; the rest have licenses from different Corporations. Of the forty-four, thirty-nine have degrees from Queen's or Royal University; three have degrees from Trinity College; one has a degree from Cambridge; and one has a degree from Glasgow. I may add that of the Trinity three, one is the present speaker, and a second is one of the Professors (not in practice as a medical man) at my college. He is from Belfast. So that only one of the Trinity graduates belongs, strictly speaking, to the South of Ireland. It may be urged that if a college is to be placed in a Federal University it does not very much matter what that University is. I differ from this view. The Queen's Colleges and the University College, Dublin, which may, I suppose, be looked upon as the nucleus of a new Dublin College acceptable to Catholics, have lived together for a number of years in the Royal University, and with a harmony which is really remarkable under all the circumstances of the country. I must add my testimony to that of others as to the general wish to make concessions and to act fairly to all parties which is to be found in the Senate and Standing Committee of the Royal University. Coming back to Ireland after many years absence in England, I have been enormously struck with this state of affairs. With a little adjustment of matters—as the Robertson Commission reported—the Royal University could be cured of its defects and made a satisfactory institution, and those who have lived in it would go on living in it in

perfect harmony. This is a wholly different thing from breaking up one old institution (Trinity College) and another comparatively new one (the Royal) for the purpose of combining a group of colleges, unwillingly yoked together, which would infallibly have to be again separated after perhaps years of strife and a time of deadly injury to Irish education. The country cannot wait while experiments are made. Trained intellects are required for the local government of the country, and, if we are to believe the political prophets, will be required in still greater numbers before long. Nothing but a rectification of our University system can provide these intellects with their proper training, and to provide this rectification and to do it in such a manner that the educational machine shall work with the least possible friction seems to me to be the desideratum. I cannot think that the plan of a single Federal University for Ireland is the plan which will do what is wanted.

3732. If I follow you rightly, your scheme is rather to follow the lines of the reformed Royal University, and to make the Royal University the supervisor?—I would make it the supervisor, and give it very large powers.

3733. Would you object to having the Matriculation Examination under the control of the University?—Not in the least. That is probably what would happen, and that is what is done with the former Victoria Colleges.

3734. Is it your view that each College should be allowed after the Matriculation to enable its students to develop into the different lines of study appropriate to the pursuits of the locality?—Certainly.

3735. That is to say, the duty of the University would be to see that there was equality, as far as possible, as between the standards of all the Colleges, I suppose?—To see, at any rate, that a uniform minimum standard was guaranteed. With regard to the highest part I do not know that the University should have any right to say that none of the Colleges should teach in a higher way than another; so long as the minimum qualification was maintained I think the University should be satisfied.

3736. LORD CHIEF BARON.—Would you contemplate University Honours as distinguished from College Honours—University Honours for which the students of all the Colleges might compete?—I should prefer not to see anything of the kind.

3737. Sir THOMAS RALEIGH.—You have stated the objections to a single University. I wish to put to you two points, not as advocating myself any particular scheme, but merely to bring your objections within, perhaps, a rather narrower compass. In the first place you represent that a single University would lead to intellectual stagnation. That is so if the University is a controlling one, controlling the curriculum of instruction and the examination in each College, but the objection is much weakened if federalism is to be as you have defined it—each College left a considerable measure of freedom?—I agree, but the federal Universities of which we have experience—Victoria and Wales—were controlling bodies.

3738. That is the kind of supervision to which you object?—To which I object.

3739. Another point. There are many people in Ireland who would not like to contemplate a single University as the final goal, and who hope to see independent Universities at Belfast and Cork, but might not a single University like the University of France which you have mentioned, be extremely useful as a stage in the transition from the system we have now to a better system of independent Universities in the future?—I entirely agree with that, and I believe that would be the outcome, but I think it would be very much more likely to come about through the adoption of the Robertson scheme than through a federal scheme formed through the University of Dublin which had already led to the breaking up of that old University. I quite agree that otherwise it might be a very useful stage in the direction of independent Universities.

3740. You have spoken of the difficulty—and I am not suggesting that you have exaggerated it—of making the University of Dublin the basis of such a scheme of federation as you suggest. But could you not contemplate Dublin being brought in just as it is. Suppose we thought that it was necessary for the sake of Dublin itself, to make a greater distinction than there is now between the Governing Body of the College and the Governing Body of the University,

and that changes of that sort were made, do you not think the problem would then be very much simplified, and that it might be possible—I do not ask you to commit yourself on the point, but that it might be possible to include Dublin?—Well, I am afraid, if you want my candid opinion upon it, that that is an impossibility. I do not think you could so alter an ancient institution of that kind without destroying it.

3741. Do you not think there is something unsatisfactory in strengthening and federating the University Colleges of Ireland, forming them into one University, and putting that University down close beside Dublin University under such circumstances that there must be rivalry between the two?—Well, I do not know that that would necessarily be a bad thing. Of course, the existence of two Universities in a city is, perhaps, not the ideal thing, but it is not wholly unknown. Is it not the case that in Buda-Pesth there are two very flourishing Universities, one German and the other Czech?

Sir THOMAS RALBIGH.—Yes, and I know what the results are.

3742. Sir ARTHUR RÜCKER.—Just to follow up the points upon which Sir Thomas Raleigh has been questioning you, I suppose you would think that if the new College and Trinity College were for the moment satisfactorily put into one University, there would almost certainly be rivalry between them if the new College were established in Dublin?—Undoubtedly; it is obvious.

3743. And you do not think that that rivalry would be accentuated if there were established a separate University?—I think it would be diminished.

Sir ARTHUR RÜCKER.—That is all I wanted to know.

3744. Dr. JACKSON.—It is not quite clear to me what the federal control would be over the several Colleges in regard to their curricula and examinations?—Do you mean under the strict scheme, or under the scheme which I suggest?

3745. Under the scheme which you sketched?—I should contemplate the University having a very similar control over those Colleges to that which the General Medical Council has over all medical bodies now. That body has the power of examining, and does examine, the curricula in the various institutions which are enabled to give medical qualifications, and if it thinks that in any instance the curriculum is below the mark, it can expostulate with that body, and, as I said before, can in the last resort report that body to the Privy Council. As a matter of fact, during the fifty years of its existence it has always by means of its expostulations succeeded in bringing the institution in question to the point which it desired.

3746. Would the federal University itself conduct the College examinations?—What I would suggest with regard to that is that the federal University should appoint the external examiner.

3747. The external examiner being in some cases a completely external examiner?—I should say in every case.

3748. Not taken from one of the other Colleges of the federation?—I beg your pardon. I was rather too hasty in my reply. When I said in every case, I meant that he should not be concerned in the teaching of the particular College, but I can see advantage in his being taken from one of the other Colleges of the federation, because it would tend to strengthen the institutions throughout the country. I should be delighted to see, for instance, an examiner brought from Cork to examine at Belfast, and similarly an examiner from Belfast brought to examine at Cork.

3749. If there were established such a University as you contemplate, do you think there would be much difference in the curricula of the different Colleges composing the University?—No.

3750. In practice, then, there would be a reasonable uniformity of procedure?—In what we may call the standard subjects of University education, certainly; but what I should like to see, and why I desiderate the independence of the Colleges, is that each should develop along special lines of its own, just in the same way as Leeds has developed a great dyeing laboratory; Birmingham, engineering and mining; Glasgow, shipbuilding and naval architecture. Similarly, I think Belfast and Cork, which are quite different places, might develop along their own lines in what may be called the less fundamental subjects of University education. In things like

Medicine, Law, and so on, I do not anticipate that there would be any great difference in the curriculum and in the standard of examination as between one College and another; I do not see why there should be.

3751. As I understand, while you think that the various Colleges included in the Royal University would be able to work together, Trinity College and the old University of Dublin would not so well harmonise with them?—That is my opinion.

3752. Dr. DOUGLAS HYDE.—I suppose you think the federal University proposed by Lord Dunraven would be overridden by the dominating influence of Trinity College?—Yes, that would be the fear; at any rate there would be a great contest, and it is only natural to suppose that a large and old University would gain considerable superiority, in all probability, in the councils of the proposed new body. That is what was found in the Victoria University; one of the difficulties was the preponderating influence of the Owens College—the wealthiest and most influential College.

3753. Dr. Hamilton was saying just now that he contemplated a time when the Queen's College, Belfast, would become a University, but that it would possibly not be in his lifetime. Do you contemplate a time when Queen's College, Cork, will become a University?—Well, we do contemplate it, certainly; and I hope to see my friend, Dr. Hamilton, live very much longer than, apparently, he anticipates.

3754. Do you not think that it would be in some ways calamitous to the country to have the Celtic population of Cork segregated from the rest of Ireland in a University of their own. Would you not rather see them coming to a central University in Dublin, and living the academic life along with the other classes of students there?—Well, I think it would be an unfortunate thing to require a Cork boy to leave his own city, and to be educated in Dublin; and, moreover, from a financial point of view, it would be impossible, owing to the poverty which exists in that part of Ireland. A Cork boy, in many cases, could not possibly obtain a University education unless the University was at his own door. We have had evidence of the extraordinarily cheap terms upon which boys can live at Cork College, and in many cases, men who could not otherwise have risen beyond the lowest means of livelihood, have risen to very good positions by reason of these cheap educational facilities being provided close to their own homes.

3755. I saw a number of letters in the Cork papers about that, and they were very interesting?—I was spoken to the other day by a gentleman who is now occupying a very good position in Cork, who told me that the only sum of money he had ever paid in Queen's College was the first £12 10s., when he came in there—that he had during the remainder of his time supported himself entirely by Scholarships, of which we have a considerable number; and the position he occupies now is one which he never could have occupied but for those educational opportunities. He is a man of very high intellectual abilities, and he has secured for himself a very important position in the South of Ireland. His friends could certainly never have afforded to send him to Dublin.

3756. You said you hoped never to see inter-collegiate contests in these Universities: may I ask what are your reasons for that?—Well, because I think it tends too much to the coaching up of clever boys simply for the purpose of securing these inter-collegiate distinctions. I would rather see a general average of good work in the place than see a few making—for the credit of the institution, as is supposed—very great inter-collegiate successes.

3757. I should like now to ask you a question or two with regard to the relations of the different students in your College in Cork. They are chiefly Catholic students, are they not?—About 75 per cent., I think; there are, I believe, more Catholic students in Cork than in Trinity College, Dublin, Belfast, and Galway put together.

3758. The proportion would be about four to one?—Three or four Catholics to one Protestant.

3759. In practice, do you find that there is any difficulty in their working together?—Not the slightest; in all the societies and clubs they mix together with the most absolute impartiality and success.

3760. Is there any machinery at work in the Cork College looking after the faith and morals of the Catholic students?—Well, of course, under our Charter, we have Deans of Residence, but, as the Commission are probably aware, the Catholic Hierarchy refused to allow any Deans of Residence for Catholics to be appointed, and, therefore, I am sorry to say there is not one at present for the Catholics, although all the other denominations—and there are four or five of them—have Deans of Residence. But, within the last year, the Catholic Bishop has constituted a Confraternity for Catholic students, which, although purely voluntary, does, to a very large extent, look after the Catholic students. The great bulk of the Catholic students belong to this Confraternity; and once or twice a month they meet in one of the churches.

3761. So that that Confraternity practically fulfils the purpose of a Dean of Residence?—Well, it does, and it does not. A Dean of Residence is supposed to have considerable disciplinary powers, and there are provisions in the Charter by which such officials were enabled to give instruction in the Colleges, and that is held by many to have been intended as provision for the students attending services and hearing Mass, but that has never been carried out, so that what this Confraternity does is not so much as a Dean of Residence could do if there were one. But, of course, its influence is in that direction.

3762. You have so very few students in your Arts Classes that I wondered if anything could be done to bring about a larger attendance at your Arts Classes, and in that way make the College more satisfactory?—There has been a very considerable increase this year in the Arts Classes; I do not know why it is so, but the Arts Classes are larger now than for the past twenty-five years.

3763. Dr. DOUGLAS HYDE.—Could you suggest anything to make them more satisfactory?

3764. CHAIRMAN.—Are we not going a little far afield?—I could make suggestions, of course, if the Commission desired me to do so.

3765. It is a very interesting subject; but I am afraid it is rather beyond the scope of our Inquiry?—Very well; I quite understand that.

3766. Dr. CORREY.—Have you many graduates of Trinity College on the teaching staff of your College?—I think I am right in saying that there are six. I can tell you the number accurately, if you wish.

3767. The number is small, I think, anyhow?—The majority are not graduates of Trinity College.

3768. Do you know if that is the case in the other University Colleges outside Trinity?—I should think the same is true of Belfast. I am not quite certain about Galway.

3769. Supposing a federal system in Dublin University should come into existence, would not that be one way in which the influence of Trinity College might be extended to the other University Colleges in Ireland, and, so to say, afford an opportunity for graduates of Trinity College to become teachers in the other Colleges?—I do not quite follow.

3770. If you cut off Trinity College altogether by the foundation of a reformed Royal University, do you not think that what has happened up to the present will largely go on—namely, that there will be not much contact between Trinity College and the other educational institutions in the country?—I think it is quite possible their graduates might—I think they would—still continue to be appointed in other Colleges if they were suitable candidates.

3771. Where would the other Colleges get their staffs, have you considered?—Well, when any vacancy occurs in any of the Queen's Colleges advertisements are inserted in a large number of papers, and applications from suitable candidates are invited. Those candidates need not necessarily come from Ireland, and, as you are well aware, some do not. In my College I have one Professor who is not an Irish Graduate, and certainly in Belfast and in Galway there are some who are not, and there have been in the past in Cork also.

3772. Might not one advantage of a federal system in Dublin University be to strengthen the Irish-trained teacher in the academic life of the country—all working together, all would know one another, and that might tend, might it not, to develop a class of Irish-trained Professors in most of our Colleges?—I do not know that that would be more likely to occur under that system than under the system which I have outlined.

3773. Anyway, would not the question of the appointment of the Professor be a very important matter in the reformed Royal, whether he was to come from within, such as is the case in Trinity, or from without, appointed by the Crown?—Trinity is the only University known to me where Professors are usually taken from within, but that is not always the case.

3774. Is it a desirable thing in Ireland, where there are very small opportunities for academic distinction, that there should be opportunities for training Irishmen of culture to hold academic positions?—Unquestionably.

3775. How might that best be obtained—under a system of independent Universities or under a federal system in one University?—I should say under a system of independent Universities myself.

3776. In regard to that question of independent Universities, I was not quite clear in listening to your remarks whether you preferred that Cork should be an independent University, or that it should be a College in the reformed Royal University?—Well, if I were given the choice, I should of course take the independent University.

3777. In Cork?—In Cork; but if I could not have that I should consider that the next best thing would be to be an autonomous College in a federal University of the type I have outlined.

3778. Do you see no advantage in a federal College in a provincial town getting degrees from a central body?—Not the slightest. I suffered for years, if I may say so, from that system when we in Birmingham had nowhere to go but the University of London; and I saw the difference which took place amongst the teachers, to whom it was a change from slavery to freedom, when we got our independence in Birmingham. My experience is wholly to the contrary of what you suggest.

3779. I do not know that the analogy of Birmingham applies here, but up to the present the Graduates of Queen's College, Cork, have had the advantage of obtaining their degrees from a central body, whether the Royal or Queen's University, and if you now have an independent University in Cork, and abandon a practice which up to the present has done them no harm, at least as regards the title of the degree—is it not rather a plunge in the dark?—But I think it has done harm.

3780. In what way?—Well, I think it has entirely destroyed any initiative in Cork; there there is no consideration about the courses; they are laid down by the Royal University; we have simply to follow, and to do what we are told. Of course I, as a member of the Senate of the University, can exercise my influence there, but as to the rest of the Professors, they are simply like driven sheep—they have got to teach what they are put to teach by the Royal University.

3781. But Belfast does not seem to object to the degree?—I am not responsible for Belfast; I am only giving my own views.

3782. One last point—as to the sources from which the students of the University of Cork might be drawn. Would not they be largely limited to the county of Cork?—We get them from all over Munster.

3783. I noticed from your figures that you get about ten per cent. outside Cork from other counties of Munster?—I think this year it is rather more; the great majority are from Cork, but of course Cork is a very large county, and there is a considerable population both in and immediately around Cork. I have not the figures before me, but the Lord Mayor of Cork, who I believe is to follow me, will doubtless be able to supply them. Speaking roughly, however, I should say that in and immediately around Cork there are not far short of half a million inhabitants—I mean in the City and County of Cork.

3784. Mr. KELLEHER.—About what has been said as to the Colleges in the Royal University, we were told that it is an ideal not yet ready for realisation that Belfast should have University powers; and it is your ideal that Cork should have University powers—in the near future more preferably. Of course, it has been stated that if a College for Catholics were founded in the Royal University and established in Dublin it would be a mere makeshift, and that ultimately it would develop into a University of its own. Do you think it desirable that the new Royal University should have to look forward in the near future to the breaking-up processes, which would be necessary

when those Colleges felt themselves prepared to accept full University powers?—Well, of course, that is a very important question. I think I should put it in this way—finality is undoubtedly to be desired, so far as we can have finality in University affairs; if you cannot have that I would prefer to have such a system as was on the road to a final settlement. I think the Royal University scheme of the Robertson Commission is a scheme which is on the way to a final settlement; I do not think the other is. Of course, I should prefer to see the final settlement made at once if it is possible. I suppose that is impossible, but if not, I should prefer to see it done at once.

3785. But the Robertson Commission scheme will be only a makeshift?—Well, a makeshift is hardly a term I should like to use for it; I should say it would be a very excellent scheme for a time; but how long that time might be it is impossible to say.

3786. In the near future you look forward to the breaking-up process beginning and becoming completed, and Cork and Belfast having their own Universities?—Well, I would say I should hope it would be in the near future.

3787. And the College of Dublin would become a University?—I think by that time things would be ripe for union in Dublin.

3788. But if things were not ripe for union the College would become a University, and Dublin would then be in the same position as Buda-Pesth—there would be two Universities in Dublin?—Yes.

3789. Have you looked at this Irish University question from this point of view—that there are mixed up with the agitation for increased facilities for University education in Ireland religious, political, and social questions?—Clearly.

3790. Do you think it is at all possible to settle this question by providing separately for each of those difficulties. For example, a great number of people who do not go to Trinity College, Dublin, do not go on account of the fees?—Yes.

3791. Would it be, in your opinion, with your great experience of Universities, desirable to have a University at, say, Dublin with one scale of fees, and a University, say, in Cork or elsewhere, with a lower

scale of fees, to which students from all parts of Ireland who so desired could go for the cheaper living that is to be had in Cork?—I see no objection to that. A great many students do not go to Oxford or Cambridge in England, but go to the more local Universities, which naturally are cheaper in every way.

3792. If a College for Catholics were founded in Dublin with a lower scale of fees than the fees of Trinity College, do you think that that would be desirable in the interests of the College itself—do you think it would lead to friction?—In the interests of the Catholic College?

3793. Yes—that the scale of fees should be different from the fees in Trinity College?—I do not know that it would necessarily lead to friction; of course, it is a little difficult, perhaps, having two Colleges in one city with different fees.

3794. It would imply social differences, which are undesirable in one city?—Yes; I agree that it would do that.

3795. I pass from that. You suggested that there is great exaggeration as to the endowments of the Queen's Colleges—can you form any estimate of the amount of the Arts endowment of Queen's College, Cork?—Well, of course, it would be extremely difficult to do that, because certain Professors who are included in the Arts Faculty there devote most of their time to teaching medical students, and when one sees letters in the papers saying that so many thousands of pounds are devoted to Arts, it is never taken into account that part of the money goes to the Professors of Biology, Physics, Chemistry, and so on, who devote a great deal more time to teaching medical students than Arts students. It would be necessary to disentangle them in order to arrive at the true figures. Then, again, you must remember that the other Professors of Latin, Greek, Modern Languages, and English teach for the First Arts Examination which Medical students must take, so that I do not think it is possible to say what amount of money goes to the pure Arts Faculty.

CHAIRMAN.—We are very much obliged to you.

The witness withdrew.

ALEXANDER ANDERSON, Esq., M.A., LL.D., President of Queen's College, Galway, called in and examined.

3796. CHAIRMAN.—You have been kind enough to come before us in your character as President of the Queen's College, Galway?—Yes.

3797. You are aware, no doubt, that a number of schemes have been laid before us with regard to University Education in Ireland, and some of these propose a federation consisting of Trinity College, Dublin, itself, a new College constituted in Dublin for Roman Catholics, and the Queen's Colleges at Belfast and Cork—that they should all be federated, and that Galway should be turned into an Agricultural Institution. That is the suggestion of Lord Dunraven. Will you be good enough to give us your opinion on that question?—I have made out a statement; may I read it?

3798. If you please?—Galway College, like the other Queen's Colleges in Ireland, was established to meet a want, generally felt, of facilities for higher education in institutions, based on comprehensive and tolerant principles. Even if the historical associations of Trinity College had not been such as to hinder it from supplying this want, the expense of residence debarred a large proportion of the youth of Ireland from availing themselves of its privileges. From the beginning the system of education adopted in the Queen's Colleges has been the professorial one, and, in this respect, Galway College differs widely from Trinity College, Dublin, where the professorial and tutorial systems are combined. All students in the Queen's Colleges are obliged to attend at least three-fourths of the lectures delivered by the Professors in the courses prescribed for their Faculty and Standing. This compulsory attendance on lectures may be regarded as the distinguishing characteristic of the Queen's Colleges, and it is well known that excellent results have followed the adoption of this principle in Galway as well as in the other Queen's Colleges. To unite in any way in the same University two colleges of so different types as Trinity College, Dublin, and Queen's College, Galway, would, I submit, be profitable to neither. Galway should be allowed to continue its educational work in the way which has proved so

successful in the past. If the Queen's Colleges were brought into organic connection with Dublin University, there would still remain the obstacle to their advancement—the disapproval of the Roman Catholic Hierarchy; and I believe that unless Dublin University were made acceptable to Roman Catholics by establishing in it a separate college for Catholics—a solution of the Irish University Question which seems highly objectionable—the inclusion of Galway College in the Dublin University would intensify rather than diminish this disapproval. In Galway the percentage of Roman Catholic students has always been much higher than in Trinity College, Dublin. In fact, nearly half of the Galway students are Catholics. Why run the risk of curtailing the supply of Roman Catholic students by doing anything which might have the effect of augmenting the antagonism of the Catholic Hierarchy? Though a small college, Galway has an attractiveness and an individuality which it would probably lose altogether if it were placed under the guardianship of Trinity College, Dublin—a result which would certainly not tend to increase its educational efficiency. Trinity College, Dublin, no doubt, needs to be reformed, but, in my opinion, the needed reforms are internal; and as to what these reforms should be I make no suggestion, as I am not a graduate of Dublin University. The Queen's Colleges should be properly equipped and endowed and made more acceptable to the people of the districts in which they are placed. Galway College has never had a chance of developing. Very few outside its own professors and students have taken any interest in its welfare. It has not been supported by successive Governments, as it ought to have been, and all representations as to the necessity for increased endowment have been uniformly ignored. If I may be permitted to express an opinion on the University Question, I would say that Trinity College should have no other college tacked on to it, but should continue to be the only College in Dublin University; that the Queen's Colleges should receive a large measure of autonomy, and be properly equipped and endowed, so as to give them

Esq., M.A.,
LL.D.

a chance of developing; that a new college adequately equipped and endowed should be established in Dublin to meet the wants of Roman Catholics, and that these four should be, in common possibly with others, constituent Colleges of the Royal University. There would then, as now, be two Universities in Ireland. In the course of time Belfast College might be granted a University Charter, and perhaps also the Catholic College in Dublin. The other colleges would then remain colleges of the Royal University. There would then be four Universities in Ireland—not too many, in view of the fact that Scotland has at present four, and England more than twice that number. These remarks are a summary of the views I intended to put before the Commission.

3799. You are aware in the scheme put forward by Lord Dunraven the suggestion was that Queen's College, Galway, was to be converted into an Agricultural College and a Technical College for Connaught. I gather that does not meet your views?—No. I think the important thing for Galway or any other college is the study of Science and Literature. That should be the basis of all education in any University College, but in Galway we are quite prepared, provided we can get funds from the Government, to put forward any scheme that would have the effect of providing instruction in agriculture or any other applied science in the West of Ireland, in fact, to adapt the College to the needs of the West of Ireland; but I am strongly of opinion that Science and Literature should not be given up. We can do very good work, the highest class of work, in Galway, we have done it in the past, and the only drawback to an increase in the amount of that work is want of men and funds.

3800. How many students have you now in your College?—Last year there were 112.

3801. Have you female students as well as men?—Yes, seventeen females.

3802. Of course you have studied, no doubt, the Report of the last Commission and their recommendations for the reform of the Royal University?—Yes; I gave evidence before that Commission.

3803. And if I follow rightly what you think of the present state of circumstances, you consider that the most practical course would be to follow out the reforms of the Royal University suggested by that Report, and allow the colleges to remain affiliated for a time?—For a time, and then experience would show whether in the future they were deserving of being recognised as separate Universities.

3804. That, you think, would be premature?—I think so.

3805. You think that scheme is the better scheme, whether it should prove ultimately to be permanent or merely a stepping-stone to something else?—I think so.

3806. Sir THOMAS RALEIGH.—You have told us the number of your students: can you tell us, roughly, the amount of income from public money which your College has?—£7,000—that includes salaries of Professors, Scholarships, and prizes, and payment of officers. In addition to this sum there is an annual Parliamentary grant of £1,600.

3807. Your buildings, which I have seen and admired, are equal to the reception of a much larger number of students than you have?—Yes; that is quite true, but I would not like to see myself more than 200 or 300 students, because it would increase the work of the Professors immensely; I could not cope with my own work. I have heard it stated that we might have 600 students, but I think that is too high a number; two or three hundred, I think, would be sufficient for Galway with the present staff.

3808. You would not mind admitting this, that development and the increased endowments you have spoken of is a thing you cannot expect to get unless you can show a certain prospect of a considerable increase in number?—Yes, I admit that.

3809. I say that in quite a friendly spirit?—Yes, and I should like to state that what hinders the increase in the number of students is the objection of the Roman Catholic Hierarchy to Roman Catholic students going to Galway; and another reason is the backward state of education in the provinces—the want of secondary schools. I think those two things must be put right before we can expect a large increase in the number of students in Galway.

3810. Sir ARTHUR RÜCKER.—What proportion of your students are reading for degrees in the Royal

University?—They are all reading for degrees in the Royal University.

3811. And they have all passed the Matriculation Examination?—Yes, certainly.

3812. Would not you admit a student to the College who had not passed the Matriculation Examination?—We have at present two of that kind; we do admit them, but we do not get many, because the great object is to get a degree in the Royal University.

3813. Do the majority of them go in for Arts or Science?—We mean by "Arts" Science and Literature.

3814. I mean for literary or scientific degrees?—The numbers are about equal.

3815. Dr. JACKSON.—You are thoroughly content with the Royal University as an examining body?—Well, I do not think I can say that; I think it would be an advantage if it were converted into a teaching University, giving Queen's College, Galway, a large measure of autonomy in the way of making provision for conducting its examinations by its own Professors—up to a certain examination, say the B.A. degree.

3816. What sort of measure of autonomy would you think necessary for the individual colleges, supposing a teaching college should be added to the Royal University in the way suggested in Lord Robertson's Report?—Well, at present we are to a large extent part of Dublin Castle—an off-shoot of Dublin Castle; and I think in the case of Galway—I am speaking for Galway—the Governing Body might be increased, and in addition to its present Council, consisting of Professors, we might have representatives from the different counties, chosen by the County Councils, and perhaps other representatives. That would be with a view to making the College more popular in the West of Ireland.

3817. Yes, but I was thinking of autonomy in matters of examination. I thought you were insisting upon the importance of the independence of the colleges in the examination of the students?—Yes.

3818. You do not contemplate, then, an examination by the Royal University as such, but rather examinations by each of the constituent colleges?—Up to a certain point I would have all examinations conducted by the Professors of the Colleges. For instance, taking Arts, Professors in Queen's College, Galway, might examine for the first examination in Arts and the second examination in Arts; but the Degree Examination in Arts might be conducted by the Galway Professors together with Professors from other colleges. That would be the University examination.

3819. The nomination of the examiners resting with the University?—With the University.

3820. Dr. DOUGLAS HYDE.—You agree practically with the Report of the Robertson Commission, do you not?—Yes, I do.

3821. You would like to see that carried into execution?—I would.

3822. Are there any changes in that Report which you would like to see made?—I have not the entire Report before my mind at present.

3823. In general terms you sympathise with that Report?—I sympathise with it.

3824. And no alterations in its recommendations suggest themselves to you at present?—No.

3825. Do you draw many of your students from the Province of Connaught?—Last year we had 112 students altogether, of which fifty-five came from the Province of Connaught.

3826. And the bulk of the others came from Ulster, I suppose?—Thirty-five came from Ulster and the rest from Leinster and Munster.

3827. To what do you attribute the fact that you cannot attract more students from the province in which your college is situated?—I have answered that already, I think.

3828. It is practically a Roman Catholic province?—Yes.

3829. You have said you wished to have the college better endowed and made more acceptable to the people. What do you mean by the words "more acceptable to the people"?—In order that we might, if it could be done in any way, meet the wishes of the Roman Catholic Hierarchy, so as to lessen their disapproval of the College.

3830. I thought possibly you meant more acceptable by something you yourselves could do inside the college?—No. I do not think that is possible.

The Witness withdrew.

After a short adjournment.

The Right Hon. JOSEPH BARRETT, J.P., Lord Mayor of Cork, called in and examined.

3831. CHAIRMAN.—You have been good enough to come here on the subject of the relations of Cork College to a possible scheme relating to Trinity College, a College to be established in Dublin for Roman Catholics, Queen's College in Cork and Belfast, in one University. We should like to know your views upon that subject?—Did I understand you to say to be established for Roman Catholics?

3832. You have seen Lord Dunraven's suggestions, I daresay?—I do not think so.

3833. I will read to you the material part of the suggestion for that scheme. It is this: that there should be established within the University of Dublin three additional residential Colleges, of which one shall be Queen's College, Belfast, the second, Queen's College, Cork, the third, a new College suitably equipped to be established in Dublin—that is intended to be one which would be acceptable to the Roman Catholics—and that will make with Trinity College, four. Then it is suggested that Queen's College, Galway, should be converted into an agricultural College and technical institute for Connaught. That is the scheme before us which involves the question of Cork, and, perhaps, you will tell us what you think about it?—If you remove the Cork College to any place, you might put that College in London, as far as its value is concerned.

3834. It is not proposed to remove Cork College, but it is proposed to make it part of the University of Dublin?—Then I say that it would be useless to us in Cork, just as useless as if it were in Manchester or Edinburgh. It would be quite useless.

3835. It would not meet with your approval?—No, and it would not meet our wants in the least.

3836. You have been good enough to prepare a Memorandum which, perhaps, you would like to read to us?—Yes. The claim of Cork is for a University of its own, and this claim has been most clearly and distinctly formulated by the local authorities, both City and County Councils having called for it, being supported in their demand by other popularly elected bodies, Waterford, Mallow, etc. I know that there is not any who would like the University to be established anywhere but in Cork.

3837. We have no power to go into the question of the establishment of a separate University in Cork. The only question is how far any affiliation with another University would be accepted?—A University is desired in order that the local wishes should be carried out and local needs satisfied, which can never be done by a College tied tightly up with others in a Federal University. An autonomous College might do what is wanted, but it must be absolutely autonomous to achieve this end, and if it is to be so why not make a University of it at once in Cork? A University or autonomous College governed in accordance with the wishes of the district and in part by the representatives of the district, would attract a large number of students and would receive pecuniary assistance from local sources. As far as the University of Dublin is concerned, it has never touched the Catholics of Munster—who are ninety per cent. of the population—in any way, nor have they the slightest interest in it nor desire to become connected with it. That I can vouch for. If the choice was given them and if it was certain that Cork could not at present have a University of its own, the people who understand the matter at all would rather have a College in the Royal University than one in the University of Dublin, since there are fifty Royal University students from Munster for every one in Trinity College, Dublin, and scores of Queen's and Royal Graduates where there are ones of Trinity Graduates. In a few years' time, when the students now passing through the Royal University have graduated, the Graduates from Trinity College will be quite a negligible number as compared with them. The idea of telling us that you are providing for the population of Munster by affiliating it with Dublin College we do not understand. It is making no provision at all for the people of Munster, none whatever, and we shall make no use of it.

3838. As between the two you greatly prefer association with the Royal University than association

with Trinity?—I do not want the other unless I have one for Cork.

3839. What you have just read to us expresses a preference, does it not?—Well, it would be that. But what is a man in Cork to do with his sons?

3840. I am sure I cannot tell you?—I will tell you what I had to do with my son, if it will be any information to you. I had a son who was on the literary staff of the *Cork Examiner*, and had a very good salary. He is now a barrister in Dublin. He wanted to take out a degree, but he could not afford the time, as he was employed in Cork. There was a vacancy then on the *Freeman*, or a branch of the *Freeman*, the *Telegraph*, in Dublin, when Alderman Hooper died, and a friend, who was a barrister, wrote to him at Cork and said "If you come now, Bill, we have a position; we have the digs all ready for you." Those are the terms of his letter. My son had to leave Cork and go to big city like Dublin, and from that hour to this he has never slept under my roof, except when down on a visit. I say that my case is the case of every parent in Munster. If he had been able to go to the Queen's College at Cork he would not have been under the necessity of leaving his father's roof. I need not tell you what influence a well-governed house has on a boy that is growing up. It is quite different from going into lodgings in a big city where one may succeed and ten go under, as I know right well. It is a very serious thing for Munster to be without such a thing as this, and they must consider it very serious. Mr. Joseph Chamberlain was able to get £5,000 from the Technical Grant in England. They were complaining about it when I was visiting the Technical Schools. He was able to get £5,000 from the Technical Grant for the up-keep of the new University of Birmingham. If it was necessary to have it there, certainly Cork or Munster ought to have one as well. If you are giving three shillings away, you might as well give a shilling to each of three men as give three shillings to one and tell him to divide it.

3841. I am afraid we cannot get that five thousand pounds?—I am not interested in it because it is English money.

3842. LORD CHIEF BARON.—Of course you are anxious that the Cork people should be educated in a College in the city of Cork?—Yes.

3843. Where they could dwell with their own relatives?—Yes.

3844. And acquire such a degree there as would enable them afterwards to be called to the Bar, as your son has been?—Yes.

3845. There is a Queen's College there, as we all know, and we all know that it is not resorted to by the Roman Catholics generally, because it is not acceptable to Roman Catholics. Is not that so?—That is so.

3846. Supposing there was a College there arranged upon such principles as would be acceptable to Roman Catholics, and to the Hierarchy, are not you of opinion that there are a large number of persons in the city of Cork who would resort to that College but who now do not take advantage of it?—Certainly.

3847. And also a large number of students living in the provinces of Munster generally?—Yes.

3848. Therefore, it would be a great advantage if a College could be established in Cork that would be acceptable to the Roman Catholics and to the Hierarchy?—I consider it would.

3849. But if a College were established in Cork that was acceptable to the Roman Catholics, would it make any great matter to the students whether the body that gave them their degrees was the Royal University, having its seat in Dublin, or the University of Dublin, also having its seat in Dublin?—I think they would much prefer a place that might not at present be looked upon as important as regards a degree as the degree of either of the other bodies now existing, but which if it were established in Cork certainly in ten or twenty years would be looked upon with, perhaps, as much importance as if it were obtained from the Royal or Trinity.

3850. Take me as not differing from you at all in that. I quite appreciate your desire that your University should be a University in Cork?—That is so.

LONDON.

Nov. 9, 1906.

The Right
Hon. Joseph
Barrett, J.P.

LONDON.

Nov. 9, 1906.

The Right
Hon. Joseph
Barrett, J.P.

3851. But that is a matter that depends on the Government of the day. Now, just assume for a moment that the present Government are not prepared to go as far as that. I want to see the alternatives that are left. Supposing that the Cork College, as distinct from the University, were made acceptable to Roman Catholics, would it make any difference to you whether the degree that students would get at that College was one from the Royal University of Dublin or from the University of Dublin?—We in Cork, let me tell you, will just keep as clear of either of the Universities as we are at present. It will remain in the same way unless we get something of our own in Cork. With regard to the Catholic University, I received a post card from a committee that has been in existence for the past two years, and that card was headed "Higher Education for Catholics." When I went into the rooms, I said to the Secretary, in the presence of the committee, "I object to the heading of this post card." He asked me why. I said, "You have headed it 'Higher Education for Catholics,' but our object is higher education for all, and it should have been so stated." He said, "That is only a private circular," and I said, "You should have no private circulars. It could not be private since I got it through the post." That is our object: higher education for all.

3852. I quite understand. I do not know whether you can give me any information on this point. If there were a College or teaching establishment in Cork that would be accessible to Catholics, would you be able to form any estimate of how many students would avail themselves of it?—I should not be able to form an estimate of how many would avail themselves of it.

3853. There would be a large number of them, at all events?—It would be governed according to the wish of the district, and in part by the representatives of the district, that is, by the members of the Corporation.

3854. You are assuming now that the Corporation had a member as its representative on the Governing Body, but I am asking you something different. You are not able to give me any estimate of the number of people who would avail themselves of that College. Would you be able to say there would be a large number?—Yes, I venture to say there would be a large number, because it would be a great deal easier for a young man to come sixty miles from Limerick into Cork, than to go from Limerick into Dublin, which would be over a hundred and five miles.

3855. Are there not a number of people in and about Cork that do not receive any University education?—A great number of them could not afford to go out of the city. In the case of my son, he need not have left the city at all if he could have gone to the College. He might have continued his literary work on the *Examiner* and attended to his college work at the same time.

3856. And there is more talent, I believe, in the young men of Munster than in those of any other part of Ireland?—If they do not travel outside Munster that is their opinion.

3857. Dr. JACKSON.—In the last paragraph but two you say, that as far as the University of Dublin is concerned it has never touched the Catholics of Munster, who are ninety per cent. of the population, in any way. Is that meant to be a statement about recent times, or does it go back to the period when Catholics generally frequented Trinity College Dublin?—I think it is with regard to present conditions.

3858. Then in fact when you say never, you mean never of recent years?—Yes.

3859. You are not thinking of a period some years ago when Catholics resorted to Trinity College, Dublin?—When they had nowhere else to go to.

3860. In fact it is really, I suppose, because the Hierarchy rather forbid attendance at Trinity College, Dublin?—I do not. I think that word is rather strong. They are discouraged; I would not say they are forbidden.

3861. I beg your pardon: because the Hierarchy discourage attendance at Trinity College?—I may tell you that if they had forbidden, my son would not have gone to Trinity. That is where I want to save myself.

3862. If the Hierarchy were to cease to discourage attendance at the University of Dublin, do you not think there would be some change in your statistics?—I think the people of Munster will take very little heed now of what they say about that. They are in favour of this scheme, I know, or one or two of them I know are in favour of this mixed body governing a University or College in Cork, and knowing that, I know that it would attract an immense amount of students from the different parts of Munster to Cork. But if they will not come round at the present time and every time and tell everybody they ought to go to Trinity and be educated at Trinity or at the Royal University, the boy will not go. In the first place, he is not able to go, because his parents cannot afford the money to send him there. A poor young man might not be able to pay his fare up and yet he could become a very clever fellow if he had the University at his door. Unless he was able to walk to it and make his living on the road there is no means of his getting to Dublin.

3863. I should like you to explain your last paragraph but one. You say that if the choice were given them, and if it were certain that Cork could not, at present, have a University of its own, the people who understand the matter at all would rather have a College in the Royal University than one in the University of Dublin. Then you go on to give statistics relating to the present state of affairs. Why should they, in the future, have so decidedly a preference for a College in the Royal University over one in the University of Dublin?—I must give the same answer to that, that we have no more particular fancy for one than the other as far as Munster is concerned.

3864. But that the statistics of the past indicate what the line would be in the future?—It is very hard to say what would happen in the future, but as far as the University of Dublin is concerned, it has never touched the Catholics of Munster, who are ninety per cent. of the population, nor have they the slightest interest in it, nor desire to become connected with it.

3865. They know nothing about it?—They do not want to know anything about it.

3866. Could you tell me why it is that they do not want to know anything about it?—It is no use my going back and telling a man with 18s. a week that London is a very fine place and that he ought to go over and look at it. He will say, "Will you supply me with the funds to get there?"

3867. It is too far away?—And too expensive to get there. The parents in Munster are not able to keep their sons there, pay their fees and pay for their upkeep. But if there was one to which they could walk it would be another matter. Another thing is that the people around Limerick, Waterford, Mallow, and all those places, have more confidence in sending their boys into Cork than in sending them to Dublin.

3868. Then, in fact, the College in the Royal University which you are thinking of is the College at Cork in the Royal University, and not a College at Dublin in the Royal University?—If it is to be a College at all. We are quite opposed to the present state of things. As I said before, if the Government want to settle this question and not have any more agitation about it—because it will be agitated and kept agitated—they must do something for Cork; and I think Galway deserves something at their hands and Belfast deserves something at their hands. They are not to be driven all up to Dublin, making one big shop of it in Dublin, and neglecting other parts of Ireland. How can you expect them to be satisfied?

3869. I think I had misunderstood your last paragraph but one. I thought you were expressing a preference for a College in the Royal University as against a College in the University of Dublin at Dublin; whereas I now understand that you are simply affirming your sense of the importance of the College at Cork as against any College?—As against any College, that is so.

3870. Dr. DOUGLAS HYDE.—You said something that interested me very much. You seem to think that if you had a satisfactory College in Cork and some municipal representation upon it, that the ratepayers would be disposed to assist it out of the rates. Did I understand you correctly when you said that?—Yes.

3871. Do you really think that if the College of Cork was made such as the people of Munster would

like it to be, the citizens of Munster would assist it out of the rates, that you in Cork, your own municipal body, would assist it?—From the unanimity with which these two resolutions were passed I have not the slightest doubt but that the Corporation of Cork would be willing to put themselves under a rate. Before I left Cork I saw on an agenda paper of the County Council that they were to pass a resolution to that effect, so that the Chairman of the County Council, when he is here before you, will be able to answer that question as regards the county as well as the city. We regard it of such importance that both bodies would be willing.

3872. Would you be still willing to assist the College out of local funds supposing it was made satisfactory to you, but was still kept in the Royal University?—If it is kept in Cork we would be satisfied if it was kept to the satisfaction of the people of Munster. I can say that the two bodies would be willing. But if it is put anywhere else we should not—not a penny.

3873. Supposing that the College was still kept in Cork, but that instead of being in the Royal University as one of the four Colleges that are in it at present, it was in what we might call the Dublin University, including Trinity College, Belfast, Galway, a new College, and Cork, would you still be willing to support it out of rates? Keep it in Cork, but let it be one of the five others all embodied in one Dublin University, the College being still kept in Cork as at present?—You know very well that what would suit a Cork College would not suit a Dublin one unless a Cork College was free.

3874. I mean that the College would remain in Cork, and you could send your boys to it as before, but it would be one of five Colleges in Dublin University?—But they would give independent degrees.

3875. If your College was made autonomous would you then support it?—I could not say that unless you give us a free hand in Cork.

3876. I mean to give you a free hand, but it would be one of five Colleges in the Dublin University. You practically could do what you like?—We wish to have something we can call our own.

3877. Dr. COFFEY.—Do you know whether Queen's College, Cork, at present draws many students from the other counties of Munster outside Cork?—Unless it is the Medical School.

3878. Dr. Windle's Report shows a percentage of other Munster men, excluding Cork men, as 10 per cent.?—Dr. Windle would be a better authority on that than I would be.

3879. Supposing you had an independent University giving degrees in Cork might we take it for certain that the Cork students would like to have the degree of the University of Cork?—I daresay they would.

3880. As distinct from the Royal University of Ireland degree or the University of Dublin degree?—Yes.

3881. Do you think that will appeal to the Limerick men or the Tipperary men? Might not they prefer the University with the bigger title?—It is strange that the Limerick people passed a strong resolution in favour of Cork, and so did the people of Waterford and the people of Mallow.

3882. What is your own opinion of the average University-going student from Limerick—would he take a degree from the central body in Dublin or a provincial body in Cork?—I said before that the Cork degree might not be looked upon with too much favour for the next ten or fifteen years; but after that it would be getting more favourable. You must begin somewhere.

3883. Yes; but supposing you had to work on with an autonomous College in Cork, and not a University would Limerick men have the same objection to staying in Cork?—A man would be much more anxious to send his boy to Cork than to Dublin. Dublin is not considered a very nice city.

3884. But, as a matter of fact, at present the Limerick men go to Dublin?—That is so, but they would rather go to Cork.

3885. Why do they not go to Cork? You have 250 students in the College?—If he was going into the Law he would have to go back to Dublin again.

3886. The Law is a special case depending on the Bar, on the arrangements for calling to the Bar, but for getting a B.A. Degree or a Medical Degree or an Engineering Degree, why should not he go to Cork at

present?—There are a number of places round the City of Cork, about fifteen or sixteen, twenty miles round the city, from whence young men come in, and they would be very anxious, much more anxious to go to Cork than to go anywhere else.

3887. I quite appreciate that for Cork men?—They would be much more anxious, and their parents are very anxious, too. I know a young man in Cork who was getting an appointment in Dublin after passing an examination, but his mother would not allow him to go to Dublin. She said he would lose his soul there. I give that as a fact. She said it was such a big city.

3888. Mr. KELLEHER.—You suggested, I think, that the number of students from Cork who can afford to go to live in Dublin and pursue a University career is very small?—Yes.

3889. If a College for Catholics was founded in Dublin it is suggested there is a danger that pressure may be put on the people from Munster to induce them to go to that College in Dublin in order to secure the success of that College by means of your great Southern ability. Do you think the people of the South would resist such pressure?—Certainly.

3890. So that any calculation as to the number of students who are likely to attend a College in Dublin would be fallacious if it counted on a large number of Catholics from Munster?—That is my opinion.

3891. Do you think that Cork is a city in which a man from any part of Ireland might be glad to live?—I do not think he could get into a safer city in the world, and it is a very large world. He can be out at any time of night walking in the city.

3892. Do you think it is a most suitable place for a great democratic University?—For the people of Munster.

3893. And if the University question was settled in such a way that Trinity College was made acceptable to Roman Catholics as Roman Catholics, and was freely availed of by those who can afford its high fees, do you think that Cork would be the most appropriate place for a great University with a lower scale of fees?—It is very natural.

3894. The CHAIRMAN.—I do not think we have anything else to ask you?—Do you wish to ask me anything about the population of the city?

3895. The CHAIRMAN.—I do not think we need trouble you unless you have anything else to add?—I have here the names of the gentlemen who assented to the conclusions arrived at by the Committee in Cork, which I will put in.

The following document was put in and read by the Chairman:—

"The Committee which has been engaged in considering the question of University education in Munster has come to the following conclusions.—(1.) That it is essential that a place of University education for Munster should be provided in Cork. (2.) That such an institution should be placed on such a footing as to make it fully acceptable to all classes of persons resident in Munster. (3.) That for this purpose it is imperative, whatever the position the institution may occupy with regard to the University institutions of the country, that the Governing Body, which now is of a purely academic character, should be reconstructed in such a manner as to bring about the inclusion of persons representative of the province in that Governing Body, so as to bring the College into touch with the different localities. (4.) That the result just indicated as desirable would be brought about by a scheme of Government of the kind recommended by the Robertson Commission, or by a scheme of the same kind having for its object the placing of the government of the College in the hands of a composite Board, partly consisting of the President and some of the Professors, partly of other persons chosen to represent the public of the province—in other words, a body similar to those which now govern the newer English Universities and Colleges, and appointed in a similar manner. (5.) That in order that the College may develop along the lines desired by the people of Munster, it is essential that it should possess a large measure of freedom. (6.) That this freedom might best be secured by the creation of an independent University for Munster. (7.) That if this be found to be impossible, and should it be considered necessary to unite the College with other Colleges in a single University, it is of the utmost importance that these Colleges should have the largest amount of autonomy, and that each

Barrett, J.P.

should, subject to the control and revision of the University, manage its own affairs, draw up its own curriculum, conduct its own examinations, and confer locally its own degrees. Names of gentlemen who assented to the conclusions arrived at by the Committee *re* satisfactory facilities for University education in Munster :—Right Hon. Joseph Barrett, Lord Mayor of Cork (Catholic) ; William M'Donald, Esq., Chairman, Cork County Council (Catholic) ; Sir T. C. O'Brien, Bart. (Catholic) ; Sir Edward Fitzgerald, Bart. (Catholic) ; Montifort Longfield, Esq., High Sheriff, County of Cork (Protestant) ; R. Latchford, Esq., High Sheriff, County of Kerry (Protestant) ; Maurice Healy, Esq., Solicitor (Catholic) ; Alderman H. Dale, J.P. (Protestant) ; W. H. Gill, Esq. (Protestant) ; R. U. F. Townsend, Esq., J.P. (Protestant) ; George Crosbie, Esq., B.L., Editor *Cork Examiner* (Catholic) ; Councillor Lane (Catholic) ; Councillor Curtis (Catholic) ; Councillor Horgan (Catholic) ; Councillor A. Roche, M.P. (Catholic) ;

Alderman Kelleher (Catholic) ; Dr. P. J. Cremon (Catholic) ; Alderman J. C. Forde (Catholic) ; Stanley Harrington, Esq., J.P. (Catholic) ; J. C. M'Namara, Esq. (Catholic) ; Michael Murphy, Esq., Solicitor (Catholic) ; F. W. M'Carthy, Esq., Town Clerk (Catholic) ; Eugene Callanan, Esq., Secretary Cork County Council (Catholic) ; Dr. E. Magner, c.c. (Catholic) ; J. M. Bourke, B.L., M. and c.c. (Catholic) ; E. Fitzgerald, Esq., Solicitor, M. and c.c. (Catholic) ; J. O'Mahony, M. and c.c. (Catholic) ; T. Healy, M. and c.c. (Catholic) ; C. Callaghan, M. and c.c. (Catholic).

3896. They are all educated Catholics or Protestants ?—Yes. William M'Donald is Chairman of the County Council.

3897. That document represents the views, you think, of Munster ?—Yes.

The witness withdrew.

The Commission adjourned until the following morning.

ELEVENTH DAY.

SATURDAY, NOVEMBER 10TH, 1906,

AT 10.45 O'CLOCK, A.M.,

At the Royal Commissions House, 5, Old Palace Yard, Westminster, S.W.

Present:—The Right Hon. Sir EDWARD FRY, P.C., D.C.L., LL.D., F.R.S., F.B.A. (Chairman);
 The Right Hon. C. PALLES, P.C., LL.D., Lord Chief Baron of the Exchequer in Ireland;
 Sir THOMAS RALEIGH, M.A., D.C.L., K.C.S.I.; HENRY JACKSON, Esq., D.LITT., LL.D.; S. H.
 BUTCHER, Esq., M.A., LL.D., D.LITT., M.P.; DOUGLAS HYDE, Esq., LL.D.; DENIS J.
 COFFEY, Esq., M.A., M.B., F.B.U.I.; S. B. KELLEHER, Esq., M.A., F.T.C.D.;

and J. D. DALY, Esq., M.A., Secretary.

The Rev. T. T. GRAY, M.A., S.F.T.C.D., Senior Dean and Catechist, called in and examined

3998. CHAIRMAN.—You have been good enough to come before us, being one of the Senior Fellows of Trinity, and I suppose having a very long experience of life in that College?—I entered in 1850, I got Scholarship in 1852, I got Fellowship in 1862, I was co-opted on the Board in 1898, and I have been a member of it since, so that I have been more than forty-four years now a Fellow.

3999. You have been good enough to furnish us with a paper* which is addressed to the subject generally of fees?—Yes.

3900. I think you have explained with regard to the probable operation of the diminution of the fees. Would you like to say anything on that in addition to what you have already written?—I would wish to say a word or two on the subject of the fees in the College and the establishment of exhibitions, in order to help students of limited means—and I need hardly add that in Ireland the great majority are men of limited means. I have often thought the matter over, and during July two years ago, during the vacation, I thought I should put my ideas on paper. I did so, and printed it, so that all the members of the Board and the Fellows of the College had this paper when the Michaelmas term opened upon the 10th October.

3901. That paper, I suppose, was on the lines of the paper you have been good enough to submit to us?—The paper that I have called a Memorandum is the identical paper.

3902. That contains the calculations of what you think would be the probable result?—The loss to the College by reducing the fees, and the great number of extra students that it would take to recoup both the *Cista-communis*, or common chest, and the tutors, the two parties who are interested in the fees.

3903. In your view would the reduction of fees increase the number of entries to such an extent as to increase the funds?—I do not think there would be any loss, and practically there would be a certainty of increase.

3904. It all depends upon the question whether there would be a sufficient supply to flow in if you lowered the fees?—Certainly. My first proposal was to establish Exhibitions, and I may remark that the Exhibitions are very small Exhibitions—£20 a year and £15 a year. This was for the purpose, instead of reducing the half-yearly fees throughout our course, merely to reduce the entrance fee; but in order that you should not indiscriminately reduce the fees, I wanted to establish a number of small Exhibitions, and this would pick out the deserving men who would come to Trinity College, and enable them practically to pass through at no expense. They are half-yearly fees—eight guineas each half-year, that is, sixteen guineas; and the highest Exhibition I proposed to establish was £20 a year and also a number at £15 a year, and by establishing a considerable number of them I thought I would be doing a good service to the

deserving men. I did not want to reduce the fees for charitable purposes—that is, to bring up men to Trinity College to whom it would be practically an injury, in regard to their future careers, to be lifted out of their present position, whereas perhaps they would succeed better in mercantile life, or other life, than going into professions or into the various lines of life men do go to after passing through a University. I did not succeed to my satisfaction in the matter of Exhibitions.

3905. That is to say, you did not convince your brother members of the Board?—With regard to the other members of the Board I anticipated that I would have got a good deal of support, but one or two men whom I most depended upon were most opposed to me. That sometimes happens in life, no doubt. I do not care to mention names, but perhaps you would be surprised if I did. However, not only did I point out the number of Exhibitions and the amount it would cost the College, but I also pointed out the sources from which the funds would come. I thought there was no use in making the proposition unless I could finance it, and I took advantage of the fact that we had recently come into possession, the long lease having run out, of a considerable portion of our city property.

3906. Westland Row?—The Westland Row property, and, a few years before, Brunswick street. I do not know whether, Sir Edward Fry, you are familiar enough with the geography of the city to be able to follow me. It goes round the College.

3907. We need not, I think, go into the details of the scheme, because that would not be within our competence, but one of the most serious questions seems to me to be whether, even if you have got the money, you have got the students?—Well, I think we would get the students, and I think in another paper I can show you how we shall get them. They are to be had in Ireland—a good many at any rate—at least as many as would fulfil my expectations.

3908. We have had Professor Mahaffy before us, who, as you know, is the Senior Lecturer, and who has had a great experience of the College; and we find that he takes the view that the formation of these Exhibitions would not be likely to increase the number of students, and therefore that the result would be a sheer loss. I daresay you have discussed it with him?—Yes. He was my opponent at the Board. The moment you mentioned his name I concluded that you were aware, perhaps, of that fact.

3909. I was not, but I was aware that he was interested in the matter, and I put the question to him, and he presented us with a paper in which he dealt with the question. What he pointed out was that the experiment had been made with regard to certain Exhibitions which had been offered by Sir John Nutting, and which he said had not attracted any considerable number of persons of any other class than those who

The Rev. T.
T. Gray, M.A.,
S.F.T.C.D.

would have come without the Exhibitions?—I can give reasons for that, too. I may say that though I succeeded only to a small degree, it was my action that induced Sir John Nutting to give his Exhibitions.

3910. So far you were very successful?—My scheme, in the form which it passed the Board, was published on the 14th December, and on the 19th December we got Sir John Nutting's offer; he stated that, seeing that the Board were anxious to help men of limited means, he would not hold back, and would give us £5,000. Therefore indirectly I may claim the credit, if any credit is due, of getting Sir John Nutting's Exhibitions.

3911. I congratulate you on your success?—Well, it is partly successful, to be sure. I made my calculations in 1904, in which year, as the figures show, the entrances went up to the 11th of June, 1904, and at that time the averages were not so very large; but since that we have recovered a good deal, and I gave you the numbers of the entrances; but the entrances ending June, 1905, were 266, and for June 13th, 1906, they were 249, so that so far it was bearing out my anticipation. Of course, in regard to entrances in Trinity College we oscillate up and down, and there is nothing hits us so hard as a war. Whenever there is a war (I suppose you know enough of Irishmen to know that they like to get into a fight) it is impossible to keep students in Trinity College.

3912. LORD CHIEF BARON.—Especially when the fight is for their country?—Well, wherever the fight is. You know very well that among others, and the most melancholy case, was the son of your old colleague, who was killed. I suppose I need hardly go any further into the matter of the Exhibitions.

3913. CHAIRMAN.—I think we have gathered from your paper what your scheme is?—Then my other proposal was to reduce the entrance fee. I knew that I was treading on delicate ground when I meddled with finance—that is, when my meddling interfered either with the receipts of the common chest or with the receipts of the tutors, and therefore I tentatively put forward my scheme. I proposed first to reduce our entrance fee. I gave the figures there of the total cost to a student from the day he entered until he got his Testimonium, and the total cost was £83 4s. 0d. It is stated there, and also the proportion of that £83 4s. 0d. that went to the *Cista-communis* and the proportion of it that went to the tutors. Each student accordingly pays the tutors £39 18s. 0d. during his four years' course, and at the same time he pays the College £43 6s. 0d. I then traced the effects of reducing the entrance fee from £15 to £10, and asked the tutors merely to contribute one guinea of it, and proposed that the *Cista-communis* should bear the rest of it. I then made a calculation as to the number of extra students that would recoup both the *Cista-communis* and the tutors. A very small number would have recouped the tutors. I then calculated (you have it here) to reduce the entrance fee to £7 10s. 0d., and finally on the supposition that the entrance fee was reduced to five guineas.

3914. You have given us three calculations?—Yes—three proposals. I may say that the one I should have gone in for myself was the last—to reduce it to five guineas, but I failed. I could not carry it, and I was satisfied if I could get them to reduce it to £10. I may say that when I first mooted the question there was no Fellow, Senior or Junior, who did not at once express his approval of it; and yet, when the Board sent it to the tutors to consider the question they would not support it.

3915. I am afraid second thoughts were acted upon?—And the Board would not support it either. However, I still entertain the hope that what I propose will be carried. I went into some other matters then in connection with the general view of the question, and in what way the point could be reached to which I, at least, looked forward—that is to say, getting an increase of students, and I also dealt with what I thought was our duty—whether we failed or whether we succeeded. I felt there was a duty that we owed to the people of Ireland as the University of Trinity College, and that it was our duty to fulfil our own part. I have marked here a passage to which I want to refer the Commission; it is the third page,* where I allude to the opportunity that fell to us. I say this—“The late Commission on the Royal University has

left all other educational institutions in Ireland in a state of confusion and uncertainty, and hence a unique opportunity is offered to Trinity College, Dublin, to step forward and take the lead, an opportunity which it should lose no time in seizing and turning to the best advantage.” I then touch upon what will be the core of the matter to a great degree—“The ban of the Roman Catholic Hierarchy, too, is losing its force.” I was considered rather premature in making that statement, but it is the result of my own observation through the country. There is no man in the College who knows the country as well as I do. I belong to one of the central counties, County Westmeath, which at one time had a very bad character, and was looked upon as one of the most wicked counties in the West of Ireland, and I have had dealings with all sorts of people, from the highest gentry down to farmers and so on, and all these men, who I thought would never care to read a letter of mine or a letter of any man connected with College matters, had read a letter of mine published in the papers at the beginning of 1904, in which I stood out stoutly in opposition to the scheme that Mr. Wyndham brought forward. Men whom I never thought of as having turned their attention in the smallest degree to the matter have come up to me, and said—“Mr. Gray, I read a letter of yours in the paper.” “What in the world have you to do with Trinity College?” I would say. “Well,” the answer would be, “I saw your name to it, and I read it, and I quite agree with every word of it.” The Chief Baron perhaps read that letter, and he will know that it was looked upon as a very wicked letter, a very violent letter. I stated my opinions in a way in which there was no misunderstanding them. My letter was an answer to a letter which appeared over the name of “Dunraven.” I went on thus. I said—“The youth of the country are determined to have the best, and only the best, University education that Ireland can give, and this is to be got in Trinity College alone.” I then went into other matters, and in the next paragraph I said—“There is much more in all this than the mere patching up of the Irish University question. The necessity of uniting and combining all creeds and sects of Irishmen was never more pressing than it is at present. Be the destiny of Ireland what it may, the factors shaping the course of future events are, and will be, mainly within the control of Irishmen themselves. A reduced franchise, a Local Government Act which has placed the entire control of local affairs in popularly-elected bodies, a Land Act which has pledged the British Exchequer for the advance of the purchase money of the land of Ireland, thereby putting the tenant-farmer class into the absolute possession of their holdings—all these things have contributed to make Ireland to a very great degree practically independent of British statesmanship and control. Such a position places Irishmen under serious obligations to their country, obligations which, if loyal men, they are bound to discharge for the benefit of the Empire as well as for the benefit of Ireland. The first, the most indispensable and most pressing condition of their success—namely, the uniting of Protestants and Roman Catholics in their youth and in their education, is the special province of the University of Dublin. In these circumstances our course is plain. We cannot, even if we would, shirk our obvious duty. Our College is a fixture in this country. We cannot stir. We cannot migrate to a more congenial, a more peaceful, clime, carrying with us our teaching staff and our buildings. Our place is in Ireland. It is in Ireland that we must flourish or fail. Let us then cheerfully face the task before us, do our part to the best of our ability, and not put it in the power of our successors to say that we of this generation either ignored or evaded our responsibilities.” That is the point of view from which I looked at the whole University question. I then went on, and pointed out more particularly, and put my finger upon various sources of income which were available to carry out my scheme. If I was asked—“Have you any confirmation of this anticipation of yours that the ban is losing its hold?” I would call your attention to this. Perhaps it has already been read to you, but I should like to read a paragraph or two from a letter which appeared in the *Freeman* by Mr. Davitt. I do not, however, particularly care to go into the matter at all.

3916. I think we had better not go into this correspondence?—Very well.

* See page 346.

3917. You are a person of great knowledge in Ireland, and your view is that what you have called the "ban" is losing its force?—It is losing its force.

3918. And therefore you are hopeful that more Roman Catholic scholars will enter the College in future?—More than hopeful.

3919. There is a very important question, you know, with regard to the Governing Body of the College. You are quite familiar with all the schemes put before us, and we should like to hear your general opinion upon that question?—If you would not object I would briefly make a short statement which I have written here, in order still further to show the point of view from which I make my appearance here. I believe I occupy a position somewhat different from that of any other witness you have had before you.

3920. If you please?—And whether I am right or whether I am wrong I think it my duty to give my opinion, for whatever you may think it worth, to the Commission. Here I have a sketch of the point of view from which I would start in the whole matter. In the first place I state: "Trinity College, Dublin, is a Corporation with all the rights and privileges of a Corporation, but the University of Dublin is not a Corporation. The Universities of Oxford and Cambridge are Corporations, and the various Colleges at Oxford and Cambridge are separate Corporations. In Cambridge, for instance, there are eighteen distinct Corporations, the seventeen Colleges and the University, each with its own seal and Corporate property. But in the case of Dublin, on the contrary, Trinity College is the only Corporation, and is itself the University. Hence, a bequest to 'the Corporation of the University of Dublin' vests in Trinity College."

3921. I may say that I think we have more or less studied the question of the relations of the University and the College; perhaps it is hardly necessary to go into the distinction between the two?—If you would so far accede to my peculiarity in the matter I would not keep you more than a minute or so.

3922. Go on as you please?—Thanks, Mr. Chairman. That is, a bequest, as I say, to the Corporation of Dublin vested in Trinity College, and I point to the judgment of the Master of the Rolls. You will find it in the second volume of the Statutes, page 507—you are familiar with it of course, Chief Baron. It thus appears that every University in the United Kingdom, from the earliest foundations down to Birmingham (1900) and Sheffield (1905), with the single exception of the University of Dublin, is a Corporation. A Degree Testimonium with us is signed, not by the Chancellor or Vice-Chancellor, but by the Provost and Senior-Fellows of Trinity College. The Senate or Congregation of the University of Dublin, consisting of the Chancellor or Vice-Chancellor, Doctors and Masters, is a Corporation. It was incorporated in 1857, but this Act was "not the incorporation of the University of Dublin, but of its Senate merely." One consequence arising from the identity of Trinity College, Dublin, with the University of Dublin is instructive, and has, perhaps a special interest for those whose University experience is derived mainly, if not altogether, from Oxford or Cambridge. The burning questions which in these Universities give rise to so much discussion and controversy have no existence in Dublin. I refer to questions affecting (1) the relations of the Colleges to the University, both in finance and in teaching; (2) to the relations of the Colleges to each other in the matter of lecturing and teaching; and (3) to the waste of resources brought about by each College keeping up a separate set of Officers, Bursars, Stewards, etc., for the management of its estates and all other non-educational purposes, such as the maintenance of establishment and buildings, libraries, chapels, etc. Thus the Chapels of the seventeen Colleges at Cambridge are said to cost something like £8,000 a year, and that for about 3,000 undergraduates, of whom a considerable number are Non-conformists. In Dublin, on the contrary, the Government of the College and the University is one and the same; one set of officers manage all. There is one common chest; there is no taxation of Colleges; there is no University capitation tax payable by undergraduates; there is no overlapping of lectures; there is no necessity for inter-Collegiate concessions and private arrangements in the matter of lectures or libraries; there is but one establishment to keep

up, one staff, etc. Whatever may be thought of our system of government, and there is no lack of critics, this is the state of development which Trinity College, Dublin, has arrived at by steady growth and constant progressive reforms, a state which I believe many Cambridge men have long wished to see established in their own University. But the consequence of this unique position of Trinity College, Dublin, which is so important for us here, is this—that any proposal to extend the usefulness of Trinity College or the University of Dublin in the country which in any way interferes with the Charter of Trinity College must begin by proposing to destroy the ancient Corporation of "the Provost, Fellows and Scholars of the Holy and Undivided Trinity, near Dublin." If the promoters of such a scheme succeed in this preliminary undertaking, of course the ground will be clear, and they can proceed to work out their own sweet will as to higher education in Ireland. I may therefore lay it down that one condition at any rate which the solution of the problem which is now before the Commissioners must satisfy, is that it shall either not interfere with the Charter of Trinity College, or else count upon the voluntary or enforced surrender of that Charter. I think I may safely say that the permanent members of the Corporation, that is the Provost and Fellows, will not surrender their Charter, and so an Act of Parliament will be necessary. For no King's Letter can deprive us of our Charter. All the schemes which have been hitherto proposed for "modifying" or "widening" or "reforming" the constitution of Trinity College and the University of Dublin fail to satisfy this condition, with one exception, and that is my own proposal. Again, it is assumed or asserted, and on very high authority—I may mention the authority is Mr. Butcher in the House of Commons—that there is another condition which must also be satisfied by the solution which may be adopted, viz: that the Roman Catholic Archbishops and Bishops of Ireland shall be satisfied with it, or at least accept it. If this condition must be satisfied as well as the former, I submit that the Commission has before it an insoluble problem. In a word, if the Roman Catholic Bishops are masters of the position, and admitted to be masters of the position, Trinity College is out of the case altogether, and there is nothing for it but to go boldly to Parliament and ask for a Catholic University. But in this twentieth century the Roman Catholic Bishops, I submit, are not masters of the position, but the Roman Catholic laity are masters of the position. And hence again it comes about that my solution alone will solve the problem. Let it be tried, and you will find that I am correct. Withdraw the ban from Trinity and the Queen's Colleges and you may await the result with confidence.

3923. Withdraw the ban?—The ban which at present hangs over Queen's Colleges and Trinity College. The ban is the ban of the Roman Catholic Hierarchy.

3924. You say withdraw. To whom are you addressing that: is it addressed to Parliament or to us or to whom?—I have stated here more exactly that if it is insisted upon by the Commission as a *sine qua non* condition of any action in this University question, the condition is that the Roman Catholic Hierarchy shall withdraw the ban which at present exists, prohibiting their co-religionists going to either Trinity College, Dublin, or the Queen's Colleges.

3925. I follow your plan, I think?—As you find in the printed statement which I sent in, I say that there is no principle violated by their doing so. Roman Catholics are allowed to go to Oxford and Cambridge.

3926. We cannot withdraw the ban?—No doubt you cannot withdraw it; but the weight of this Commission bringing in a decision that the Roman Catholics in Ireland shall be treated in the same way as they are treated in England and other countries of the world—

3927. If I follow you rightly, your suggestion is this: that whatever we recommend by way of assisting the Roman Catholic body may be made conditional on their withdrawing their ban from Trinity?—And from Queen's Colleges. I will not desert the Queen's Colleges, because they are a useful body.

3928. The only way we can effect that is by making it a condition which we may recommend?—That is as far as you can go.

3929. I only wanted to follow?—I still further go on with my sketch. In the next part I proceed to

another branch of my subject—the Board, the Council, and the Fellowship system. The Board, as you know, consisting of the Provost and the seven Senior Fellows, has the sole control of the finances of the College, and it and the Council conjointly control the educational arrangements of the College—that is, the appointment of the Professors and the regulation of the courses. Then, as regard the third head, the Fellows are elected by the Provost and Senior Fellows, as the result of a competitive examination. It is sufficient merely to name the three. Now every scheme and every statement, from Statement No. III. down to the evidence of our amiable and respected Vice-Chancellor, has but one word for the Board, the Council, and the Fellowship system—abolish the Board, abolish the Council, abolish the Fellowship system. I think I am right in stating that, Mr. Chairman.

3930. You are not far wrong, I think?—Now, the Commission have had before them samples of the Board; they have had the Provost, Dr. Tarleton, and Dr. Mahaffy. They have had samples of the Fellows before them—Dr. O'Sullivan, Mr. Culverwell, Mr. Edward Gwynn, Mr. Thrift, and—if he will allow me to name him—Mr. Kelleher. They have had samples of the Professors—Dr. Joly, Dr. Andrew Francis Dixon, Professor of Anatomy; Mr. H. H. Dixon, Professor of Botany, and Dr. Bernard. And they have had samples of Professors who are also Fellows. I now put a fair, straight question to the Commissioners—

3931. I am afraid it is for us to ask you questions, not for you to question us?—This is a way of introducing the question.

3932. LORD CHIEF BARON.—An ancient form of oratory?—It may be only an Irish way of doing it. In Ireland we often answer a question by asking another. The Chief Baron is familiar with that practice. This is a fair, straight question. If you, from what you have seen of them, consider all these men to be men of such a manifestly inferior type that you are forced to adopt the conclusion that the system which has found out and placed these men in their present positions must be an essentially rotten system, all that remains for you to do is to carry out the sentence pronounced by the reformers, from our Vice-Chancellor downwards, namely, abolish, abolish, abolish. If this is so—if you think it is so—I need not say anything more, but if, on the contrary, you are not yet prepared to confirm this sentence, I would ask to be allowed to say a few words in defence of the Board, the Council, and the Fellowship system, to criticise some of the proposals made, and to point out that many, if not nearly all the faults alleged, either do not exist, or are trifling in themselves, not important enough to be brought before a Commission like this, or, at any rate, exaggerated, or owe their existence to want of funds, or to the fact that the very men who complain do not utilise the powers and privileges which they already possess, the remedies being in most cases in their own hands. I have to add, too, that these so-called defects of our present system are invariably expressed in such vague and general language, and with such an absence of particular concrete cases, that it is exceedingly difficult, if not impossible, to grapple with them. Hence, I am always glad when I drop upon a concrete example of a defect which has been urged in general terms *usque ad nauseam*; and I shall call attention to these few examples whenever they occur, assuming, as I have a right to assume, in the case of such serious documents, that these are the strongest examples that can be adduced in support of the writer's contention. In fact, to give my own views in a nutshell, after carefully considering the grievances alleged, and the remedies which have been suggested for their removal, I have come to the conclusion that the grievances are "doctrinaire grievances," and the remedies suggested are "doctrinaire remedies." If these would-be reformers wish to indulge themselves in the pleasure of constitution-making, let them seek some other subject to try their 'prentice hands upon, but let them leave Trinity College to pursue its career without needless interruption, and continue to be in the future, what it has been in the past, the centre of light, liberty, and learning in Ireland. That is, I think, all I have to say upon the view with which I look at all the documents put in, with the request, of course, that my view may be accepted by the present Commission. Perhaps the Commission would like to ask me some questions on what I have already said—or shall I go on still?

3933. (Chairman).—Go on, please, if you wish?—Now, with regard to the Council. I take the Council first. You know it is composed of sixteen members, with the Provost as Chairman, pretty much upon the lines of the Council of the Senate at Cambridge, which also consists of sixteen members, and the Vice-Chancellor or Chancellor, and not unlike the Hebdomadal Council at Oxford. The seven Senior Fellows elect four members, the only limitation being that the members elected shall be members of the Senate. The Junior Fellows elect four members, with the same limitation. The Professors elect four with the same limitation. They are perfectly free to elect any man whose name is on the Senate, and the Senate themselves—that is, the members of the Senate other than the Professors—the Junior and Senior Fellows elect four. Our Vice-Chancellor told you that our late Provost, Dr. Salmon, said the Council was his child. He is right in that—Dr. Salmon often told me so—but the real origin of the Council is to be found in the proposal originally made by Mr. Fawcett in 1869 and 1870. I may just give you in a line or two here—it is put perhaps better than I could put it, and it is perfectly accurate—they are the words of the late Dr. Carson, than whom there was no more accurate man inside Trinity College, and very few outside it, he was a man who was thoroughly up to everything connected with Trinity College. I often wish he was alive now and he would give information that no one else is capable of giving. At the time we were debating in 1874 on the establishment of this Council, Dr. Carson said that—"In order to explain fully the origin of the plan of the proposed Academic Council, as well as to reply to some of the objections which had been made to the scheme which had been laid before the Senate, it would be necessary to refer briefly to Mr. Fawcett's original Bill, in which he proposed to deal with the question of Irish University education. At first, in the years 1869 and 1870, Mr. Fawcett confined himself to a resolution for the simple abolition of tests." Of course, those members of the Commission who are intimately acquainted with Oxford and Cambridge will know that it was in 1871 that the Bill was passed which abolished tests in those two Universities, and in the case of Dublin, we would have been included in that Bill but for another reason. When Mr. Gladstone opposed this on the ground that Mr. Fawcett's "measure was incomplete and that a question of this great importance ought to be left in the hands of the Government." I need hardly remind you that we were one of the branches of the upas tree that Mr. Gladstone wished to cut down. It is a good sign we are still alive. Mr. Fawcett was to "bring in a Bill which would deal with both questions—the removal of tests, and the reconstitution of the Academic Body. The measure was introduced in the House of Commons on the 7th of February, 1872. Now," Dr. Carson asks, "what was the constitution which Mr. Fawcett proposed in that Bill to give to the new Council? It was as follows:—'The said Council shall consist of the Provost, the seven Senior Fellows of Trinity College, four Junior Fellows of Trinity College, to be elected by the Junior Fellows of the said College; four Professors of the said University, or of the schools therein, not being Fellows of the said College, to be elected by the Professors of the said University or of the schools therein, and four Doctors or Masters of the said University, not being Fellows of the said College or Professors of the said University, or of the schools therein, to be elected by the Senate of the said University.'" Therefore, by the Bill as proposed there were to be the Provost and seven Senior Fellows, making eight; four Junior Fellows, making twelve, and four Professors and four Masters—so that twenty was the total number. It was on those lines that our Council was constituted.

3934. There is an important distinction, is there not, between an election in the case of the Professors. I think the present scheme only enables a Professor to be elected on to the Council who is a member of the Senate?—He must be a member of the Senate.

3935. That is to say, he cannot be an outsider?—He cannot be an outsider.

3936. Many of the eminent Professors of Trinity College are not members of the College at all?—Certainly.

3937. So that there is a considerable difference in the scheme as regards Professors?—There would be that difference, no doubt, but, on the other hand, that system was considered, of course, when this Bill was before Dr. Salmon and others at the time, and they

limited it to members of the Senate, and, I think, properly so. For my part, I would not put upon the Council a man—not that I should have any objection personally to him—but I should object strongly to outsiders being put upon the Council, because it would mean that you could put anybody on it. If he was not necessarily a member of the Senate and not a graduate of our University at all, then it would be open to the whole world, and some line should be drawn.

3938. Open to the whole world provided they were Professors?—Not necessarily, because a Professor, even though not a member of the Senate, has a vote for the representatives of the Professors upon the Council. There are some of the Professors at the present moment—looking at a list of the four classes—who vote. Their names are printed in italics. Mr. Kelleher here, for instance, was not of standing to be a member of the Senate; he was not a Master, but he was a Fellow, and voted as a Junior Fellow, but he was not a member of the Senate. I will come afterwards to cases of Professors who are not graduates of ours at all, or graduates of any University, but yet are Professors. Well, that was the origin of the Council. Mr. Fawcett then went on that—"The seven Senior Fellows should elect four Senior Fellows as members of the Council." Our present rule is that the seven Senior Fellows may elect any four men to represent them on the Council, provided only they are members of the Senate, and for that reason, taking the seven Senior Fellows, and keeping one's eye upon this question of religion, they have always from the very start elected a Roman Catholic on the Council—always. We have had eminent men. Lately we have had two, that is, Master Pigot, whom you are well acquainted with—a more suitable man could not have been—and also, before Master Pigot resigned, Dr. Starkie, an ex-Fellow, was put upon the Council by the seven Senior Fellows. At the present time, since Master Pigot's death, the only Roman Catholic representative is Dr. Starkie, and he is there by the vote of the seven Senior Fellows, and I may point out, as we have a number of statements here signed by Junior Fellows and by Professors, that it was in the power of the Junior Fellows to put Roman Catholics or members of any other religious denomination on the Council, and they did not do so. They are crying out now to make Roman Catholics, simply because they are Roman Catholics, members of the Governing Body, but they never themselves put them on the Council when it was in their power to do so. The Professors never put a Roman Catholic on the Council—never—and yet they cry out in the same way and sign the same statements, and, stranger still, the whole body of the Senate, outside the seven Senior Fellows, the Fellows and Professors have never put a Roman Catholic on the Council. I have often heard the question asked, "Is the Chief Baron a member of the Council?" The Chief Baron would have been a member of our Council ages ago if he had been a member of our Senate, and to the regret of everyone the answer had to be—"No, he is not a member of the Senate."

3939. LORD CHIEF BARON.—But I am a Doctor of Laws?—An Honorary Degree.

3940. No, not an Honorary Degree. I never took an Honorary Degree in my life?—You never put your name on the Senate.

3941. That is so?—Another eminent judge we were often anxious for also, who took the greatest interest in everything connected with Trinity College, was Judge Murphy.

3942. CHAIRMAN.—Are we not going into the personal question rather a little too much?—We do not, of course want to review the history of the College?—I only wish to point out that those men whose names are put to documents here calling for Roman Catholics to be made members of the Governing Body—they do not mention any other religious denomination—all had it in their power to make Roman Catholics members of the Council and they never did so. That is my point, Mr. Chairman. Now, as regards the powers of the Council, I have mentioned already that the only department which the Provost and Senior Fellows hold solely in their own control are the finances of the place. There are certain Professorships, which I will mention in a moment, which are in their control. But of the twenty-nine Professors, or more—because I may add nine more—that is thirty-eight Professors—there are not more than six or seven of them whom the Board appoint. All the others are nominated by the Council. In this way they have a right of nomination, and

the onus is then thrown upon the Board to accept or reject their nomination. That is, the Council have the right of nomination, and if I mistake not the Body that has a right of nomination is practically the Body that elects the Professor. If the Board refuses to approve of the nomination of the Council they are obliged to state their reasons in writing. No vague notions will do. They must be put in writing and submitted to the Vice-Chancellor. The Vice-Chancellor will decide the question whether those reasons are valid or not, and accordingly will determine whether the nomination is to be rejected or not. I may say, as a matter of practice, which is known to everybody connected with Trinity College, there never has been any collision between the Board and the Council. We all live there in a society by ourselves; every single question is discussed and talked about; if a Professorship becomes vacant, or is likely to become vacant, every man gives his opinion, and the thing is threshed out, and whether it is the Board or whether it is the Council I do not care one straw—the result is practically the voice of the whole Body. Take the case here—of course in the case of the Council I need hardly argue the question—but in the case of Professorships that are elected to by the Board only—that is if the Professorship is settled under Act of Parliament or under private donation, and limited to the Board, the Board alone elects. But if I go back and look at these cases—I take the Professor of Anatomy. We elected, only a couple of years ago (mind, all these Professors I have now alluded to were late appointments) Dr. Andrew Francis Dixon as Professor of Anatomy. I do not think there is a man in College whose opinion is worth anything, or who has ever thought of the thing, who will say that a better appointment could have been made, or that if it was made by the Council they would never have hesitated about appointing Dr. Dixon. I may say there was an exceedingly eminent Cambridge man, who was a candidate—but perhaps I am going away from the point again.

3943. You are going a little too much into detail I think?—I submit at once of course.

3944. It has not been suggested that there is any impropriety in the mode of election. Nobody has ever brought before us a case in which an election has been wrongly made?—That is insinuated all through.

3945. It is suggested that improvements might be made in the Governing Body?—Improvements might be made; and that is one of the points I make here. When men suggest improvements I ask them straight, "Will you give me facts to justify that opinion you have expressed? If you say here the Governing Body should be changed—revolutionized—in order to bring about certain results, let us have the facts put before us; put your finger upon the wrong appointments made by the Governing Body, and then I will consider the question." Not one of the men who have appeared before you, or have written documents to the Commission have dared to put their finger upon an appointment, because they could not. Of course they do what is the common refuge of men under such circumstances—they say it is a matter of common knowledge, and so on; there should be less difficulty in putting a finger upon the mistake. I will follow up, if you will allow me, the case of the Professorship of Anatomy. We lost our Professor of Anatomy, Professor Cunningham. He was with us sixteen or seventeen years. Edinburgh was able to offer him a higher salary. He is a Scotsman himself, and he went to Edinburgh. Before Dr. Cunningham we had Professor M'Allister, and Cambridge paid us the compliment of robbing us of him. It was a friendly robbery I admit—not robbery under arms—but robbery all the same. Those are examples of Professors appointed by the Board. If I am to take another case I will take the Professorship of Astronomy, Dr. Whittaker. The other day, Dr. Whittaker has hardly got into his house—the Board elected Dr. Whittaker, and I believe that every man capable of forming a judgment, at least every man I hear of—says that we made an admirable appointment, and I think every man in Cambridge says that we made an admirable appointment. Lord Rosse, who is a competent man in Astronomy, and who recommended him to us, did not at first mention his name. I wrote back to him to know, and we got a strong recommendation from Cambridge, from Sir Robert Ball, and I wrote again to Lord Rosse and found that it was the same man; Lord Rosse said "this man requires no commendation from anyone," and he was elected by the Board. The previous

Professor was an eminent man, and a man whom nobody could find fault with, Charles Joly, a man who it is the regret of everybody was cut off so early. Prior to him Mr. Rambaut was our Professor and Cambridge paid us the compliment of robbing us of him. Prior to him we had Sir Robert Ball and Cambridge again robbed us of him. To follow up these examples, we do not object to being robbed, and the strange thing perhaps may be that, whenever we lose a Professor we get as good a man—I will not go so far as to say a better, because it would be invidious to say so—we can fill the places in such a way that no man can gainsay the appointment, and we may be prepared any day to see Dr. Whittaker taken from us, or Dr. Francis Dixon or any of the other Professors taken from us. I therefore submit that as far as the Education Department of the College is concerned the appointment of Professors, the arrangement of the curriculum, and everything connected with the courses, books, and everything of that sort—every iota of that is common to the Council and the Board. Any person whatever position he occupies, it is not necessary for him to be a member of the Council, all he has to do is to ask a member of the Council to bring forward any proposition he has. If it is a fad of his let it be brought before the Council; if it is worth anything the Council will adopt it and send it to the Board. But to say that every member of the place is prevented from bringing his grievance before the Board or the Council is—I hardly like to use strong language—but it is a statement that will not bear investigation. There are various matters connected with the arrangement and regulation of the Courses which are commenced by the Council. They are sent up to the Board. The Board go over them and revise them and suggest a few improvements, at any rate what appear to them to be improvements, and send the matter back again to the Council, and the Council nearly always adopt the suggestions of the Board, and the whole thing is better done by passing the two Houses than it would be by passing only one. And *vice versa* when the Board tabulate a change on their part, they send it down to the Council, and the Council send it back to the Board, altered as they think fit, and the Board say, "That is an improvement; we will adopt it," and there is never any suggestion at all made for an improvement that is not adopted. We are not a number of Bodies having nothing in common, and that are always at loggerheads; everything goes on with perfect smoothness. Dr. Salmon, whom I have alluded to, was one of the biggest men in the Kingdom. He was one of the biggest we have had for a considerable time, and he always said, "The Council for a few years will be well attended till every man who has a project for University reform has brought it before the Council, and has either got it adopted or has abandoned it, because he has found the other members too stupid to adopt it." That was his way of looking at it.

3946. You would not agree to that I am sure?—Dr. Salmon was perfectly right. We have had any number of strange propositions made, and when they are trotted out they do not bear daylight. I have wandered a long way now in discussing the case of the Council in particular, and the relation of it to the Board, and I do not think there is any ground whatever for the grievances that are pointed out—a few of them I have mentioned—at least I called attention to them because they are mentioned here in the book—but on the other hand I come to what is the Board's peculiar province—the management of the finances of the College. I challenge anyone who objects to the management of the Board in the matter of finance to put his finger upon any case in which the Board have mismanaged the finances of the College, that is, to spend money upon this particular project that it ought to have spent on something else, or that they have ever lost the money of the College. Of course each man, each Professor in each Department, thinks that more money should be spent upon his particular Department. You may begin with the different Schools. The Engineering School says, "Oh, you are pampering the Divinity School, the Medical School, and the Law School, but you are starving the Engineering School." The Medical School says, "You are pampering all the other Schools; we do more work than all the others put together, and you are starving us." Then go to the different Departments of the Medical School—the Professor of Physiology, the Professor of Pathology, and so on. The Professor of Pathology says, "I want this and I want that; I cannot go on without it; you are wasting money on all the

other departments and starving mine." The Professor of Physiology comes to us in the same way. Any man who has been Bursar knows that. I was Bursar for four years and I know what happens. Of course the real difficulty in the matter is want of money. If the youngest man in the place could show me a method by which I could get 25s. out of a pound I would give him my place on the Board to-morrow. But that is the case all over the world. The Chancellor of the Exchequer and the Treasury looks very sharply at a man who asks for this, that, and the other. The Treasury knows what money they have to spend, fortunately for them, although, perhaps, unfortunately for the rest of the people they can put on taxes. We, in Trinity College, cannot. Our money is limited. We have a certain amount; that is all we have to spend, and we must make the best of it. As regards the management of our estates, I leave that question—the answer to it—to the Report of the Estates Commission, and if you read the Report of the Estates Commission—I did not hear it myself, but it has been repeated to me several times—the members of that Commission have invariably expressed themselves surprised at the good way in which the estates of Trinity College were managed by the Board. You had Lord Justice Fitzgibbon before you. He was chairman of that Commission, and I do not know whether any member of the Commission asked him any question simply on account of his having been chairman of that Estates Commission. The other two members of the Commission were Mr. Trench, a very extensive agent in various parts of the country, particularly Kerry, and the other was Mr. Healy, so that we had representatives of every class on that Commission, and as far as I can read the Report, they were well satisfied with everything they found out. I maintain that seven Seniors are the most competent men to manage the finances of the place. I have been, as I say, Bursar and Auditor, and I am familiar with all the accounts of the College, and I must say that I know of no laxity of such a nature that men would be justified in saying that the finances of the place were mismanaged. There has been a good deal of uncertainty before the Commission here in regard to the Bursar's particular position in the College, and the Auditor's—the internal and the external Auditor—And Mr. Gwynn states distinctly that he is so ignorant of everything connected with the transactions of the Board; that everything is kept secret, and so on. I think, perhaps, if he did not know anything about these matters it would have been more prudent to have held his tongue, but I would challenge him to name any grounds for his statements. His statements are there; there are a few paragraphs of them, and I challenge him in the case of everyone of those statements to prove them or to give any fact to justify his statements there. This "is so patent that it is unnecessary" to go through it. If things are as you say, put your finger on the cases and we are ready to meet you. In the case of the Auditorship, for instance, there seemed to be some difficulty about it. Mr. Gwynn did not seem to know what in the world the Auditor was for. Well, there is a small volume of the Statutes, about the size of this book, handed to every student on the day he enters, and if he would only look at Chapter 19—"De Bursarii Officio"—it is all there, and he would have found everything about the Auditor. Common sense—common knowledge of the way in which business of any kind is done—would tell him what an Auditor meant, and I was amazed when he said he did not know what the duties of the Auditor were. I need hardly tell you that there is hardly a single account in any shape or form which the Bursar pays that has not been gone over, every item of it, by the internal Auditor—not a rental of our estates which has not been gone over by the internal Auditor. I was internal Auditor myself for a year, and went into the case of every single tenant and went through the calculations as to the proper amount to be allowed in the way of income tax and deductions, and so on, to see that we got our proper money. That is the duty of the internal Auditor, and the Bursar will not sign a cheque for any account of any sort—a tradesman or anything else, or for the internal officers of the College unless he has the name of the Auditor at the bottom. That is the duty of the internal Auditor. But what seemed to puzzle Mr. Gwynn was, what in the world was an external Auditor? He said that "he existed," and that was all he could say. He knows nothing more about it. If he had looked into the Calendar he would have found the name of the external Auditor given, and he would have found that he is the Deputy-Accountant-General of the Bank of

Ireland, Mr. Leet. He is our external auditor at present, and before him we had the chief cashier of the Bank of Ireland, and before him another chief cashier of the Bank of Ireland. Well, what are the duties of the external Auditor? The external Auditor comes in whenever he thinks fit, he goes over every single item in our books for the year, checks every entry, and makes the accountant produce the order of the Board for every item of expenditure. He goes through all the details of the capital account, all the investments, and so on; he must have them before him. That is the duty of the external Auditor, and we, of course, naturally consider that an independent outsider, whose profession is that of an accountant, is the man whom we ought to have, and whom we can depend upon to keep us straight, and with regard to whom we can be sure that if there is anything wrong he will point it out. That seems to me to be the common-sense of the matter.

3947. CHAIRMAN.—The accounts of the College were never published until they were published in answer to the inquiries of this Commission, were they?—There were five years' accounts published in or about the time of the University Bill of 1873, and then there were two more that were Parliamentary Papers.

3948. That is a long time ago?—They were published again for two or three years, about 1879.

3949. They are not published annually—only occasionally?—They are not published annually. The only College or University that publishes its accounts in full is the University of Cambridge—they give the most ample accounts. I have them for several years. For my part I often advocated it; it would do us a very great service in Trinity College if we published them. As to the men inside the College having access to the accounts, they can have it now. I can refer you to a particular page in the statutes here—I can put my finger upon it—in which you will see these two little paragraphs, page 188 of the second volume.* This answers another of the grievances brought forward by Mr. Gwynn—page 188, the two last little paragraphs.

3950. What is this?—It is a decree of the Board of Visitors of 1858. Of course there were a number of decrees at this time because the new Act came in—the College Act of the last Commission. There were a number of things proposed to be done and this was the carrying out of their recommendations, and you will find this is a decree involving all kinds of things. Above that is "Scholars' Tuition Fees and Power to alter Tuition Fees," and this is a decree touching upon all the various recommendations made by that Commission. "It is furthermore decreed that as soon as may be after the 20th of November of each year there shall be elected with the consent of the Visitors" (our present Visitors are Lord O'Brien and the Vice-Chancellor, of course), "over and above the usual College Auditor"—that is the internal Auditor—"a second Auditor, not a Fellow, whose business it shall be to re-audit the accounts of the year preceding, and to prepare a balance-sheet showing the income and expenditure before the 20th February next ensuing, and that his salary shall not exceed the sum of £60 per annum. And it is decreed that the annual balance-sheet of the income and expenditure of the College so prepared and audited shall be open at stated times to be fixed by the Provost for the inspection of all Fellows who may desire to examine the same."

3951. Has the Provost fixed stated times?—For a number of years there was a notice posted, but nobody ever availed himself of the privilege.

3952. Is it still posted?—All he has to do is to go—

3953. Has the Provost fixed any stated time?—I do not think the present Provost has. The matter has fallen very much into abeyance, and nobody has ever gone.

3954. The result is that nobody can ever see them?—May I put it in this way? There is not a single iota that passes at the Board or a single penny spent concerning which, if a Fellow inquires, he will not be told.

3955. That is another thing, but apparently that decree provided for fixing a certain time when any Fellow could see it. That apparently has fallen into desuetude, and no time is now fixed, and therefore nobody can now see it?—That is the Fellows' own fault.

3956. I am not saying whose fault it is; I am only trying to get at the fact?—I was for four years Bursar and no Fellow ever came to me to ask to see the

accounts. I would have shown him the whole. I had in my private room a rough copy of the accounts; the Junior Bursar lives next to me, and if he or a Fellow had come to me I would have said, "There are the accounts, and I will give you an explanation of the whole thing—every item in them."

3957. Do you not think it would be an advantage if the accounts of the College were published yearly in some stated form?—I do, and I think so much is due to the outside public. The inside men have no excuse whatever—all they have to do is to ask. Mr. Gwynn said—he laid great stress upon it—that every transaction of the Board is kept secret. The other night we were talking in this way and the present editor of the *Calendar* said nothing has been done in the last few years that I do not know. He is the editor of the *Calendar*, and it would be for him to know any matters requiring a little correction from one year to the other; he goes to the Registrar's Office and he sees there the Register of all the transactions of the Board, and there is no such thing as that secrecy. I only wish Mr. Gwynn was sitting beside me, or before me. I think it is a great misfortune we should not face one another in these matters. I would like to say that we people in College are not so thin-skinned; I do not care a straw—a man need not use vague expressions if he is talking about me; I would rather a man would say, "I do not agree with this," or, "I do not agree with that," because we could put each other straight.

3958. CHAIRMAN.—We cannot indulge you bringing him here now?—But I am replying to what I think is a very unfair statement of Mr. Gwynn—the statement that everything is kept secret, and that he cannot ascertain these matters. I say on the other side there is not a single thing which he cannot get hold of if he chooses. Of course members of the Board would not go to a man and say, "We did so and so to-day," but if a member of the Board meets a man and he is asked he will tell him all about it. There is no such thing as secrecy, and I should be delighted if every member of the public could get our accounts for a few pence, as at Cambridge. The Oxford accounts I do not know about, because I do not know whether they are published in that shape or form. I never saw any of the Oxford accounts, but I know the Cambridge accounts, because I have got them, and I would quite go with that and get rid of a great many things that are said, or of the grounds for saying them. As regards the Board managing the finances, there are other matters here, and I intended to have gone through this first Report and to have touched upon one or two things. I do not know whether I am trespassing too much upon the time of the Commission.

3959. Go on if you please, if there are other points to which you wish to call our attention?—I will make myself as short as I can. As regards the general character of the Board—

3960. I think we should like to hear what you have to say about the mode of electing Fellows?—I am coming to that. The first thing here to which I will refer is Statement No. 1. It is signed by six Senior Fellows, twelve Junior Fellows, and twenty-nine Professors. Well, I have put down twenty of the regular Professors. It is signed by forty-seven altogether and, if you add Lecturers, by sixty-three. That is Statement No. 1†, and Statement No. 2, which form practically one document, and that document is signed practically unanimously. There are, as I say, sixty-three signatures, taking the two together—because No. 2 is only, as it were, the first sentence of No. 1, and the principle is the same. That is to say, it is with regard to the proposition to put in another College along with Trinity College under the University of Dublin. I have already given, in my little sketch as regards the Corporation, what I consider are the difficulties that lie in the way of that, and I have said that it is not a matter than can be settled without going to Parliament. I believe that is so. I merely lay stress upon it because I know pretty well what the feelings of the men inside are, and there are men whose names appear here, and I have heard these very men saying that they will be very slow to surrender their Charter. And I think when a man is cornered, and asked, "Will you sign this document, and surrender your Charter?" he will say "No."

3961. I take it that your opinion is highly hostile to the introduction of another College inside the Dublin University?—Certainly. I remember very well

Mr. Wyndham, who was then Chief Secretary, writing to our Provost, Dr. Salmon, wishing to have an interview with him and the Governing Body on this question, and Dr. Salmon said, "The best way is for me to ask him to dine with us." I was present at the interview; and I sat next to Mr. Wyndham; it was a square table, and Dr. Salmon sat at one side of it, with Mr. Wyndham at his right, and I at the next corner; and Mr. Wyndham that night offered us £10,000 a year if we would adopt this scheme. He said that money was no object, and he offered us £10,000 a year if we would accept the scheme. He said, "We want to combine Trinity College, Dublin, Queen's College, Belfast, and a new Catholic College proposed to be established; we propose to put those three under the University of Dublin," and I asked him, "Would you be satisfied to have Trinity College and the Belfast Queen's College alone under the University of Dublin?" "No," he said, "that would not suit me." "Well," I said, "your object is, then, not the establishment of Queen's College, Belfast, as a College of the University of Dublin, but it is to found this new Catholic College; and if you will pardon my putting it roughly, and in rather strong language, am I right in concluding that you offer us £10,000 a year in order that we may give you our prestige to float the new concern?" "Well," he said, "you may put it that way if you like," and my answer was, "You have just alluded to the point; Trinity College will not sell its birthright for a mess of pottage; prestige is a thing that cannot be sold or bought; and if a man wants to get it he must go the usual way to secure it." You may take me, then, as regards No. 1 and No. 2 as being opposed in the strongest manner to both of them

3962. You are not opposed to those memorials, you agree with those memorials?—Nos. 1 and 2 are practically the same.

3963. You are not opposed to them?—I am opposed to the putting in of the second Colloge, and I advocate strongly Nos. 1 and 2.

3964. Yes. I was afraid it would go on the Minutes that you were opposed to 1 and 2?—Now I come to No. 3,* which is called here "Widening the constitution of Trinity College." It is signed by twelve junior Fellows and eight Professors. Those are the principal names. These names are here and there is no harm in discussing them. My name I daresay has been discussed freely, and they are perfectly welcome to do it. But I submit here that out of the twelve Fellows who have signed it, seven of them are practically the most junior; no senior Fellows signed it. Numbers 1 and 2 are practically unanimous, but of all the other schemes that have been put forward not one of them has a majority of Fellows—none of them had a majority of senior Fellows. They had not a majority of the Junior Fellows or a majority of the Professors; and of the Fellows here, the junior Fellows, the last seven of the twelve are junior men. I do not like to go behind the document here, but if the men were present I would ask them some questions which perhaps they would not like to answer, but which I would insist upon their answering. I would take X and say, "What induced you to sign this document. Will you sign it now?"

3965. But we have not got them here?—I require a great deal of checking I quite confess. Now I take up the Professors who have signed it. There are eight Professors who have signed it, and of those eight four of them are not graduates of ours at all. Dr. Whittaker is not a graduate of ours. I do not want to say a word against Dr. Whittaker, but he is not a graduate of ours and he knows nothing about us. He has only been with us practically a few days or a few weeks, and I wonder at his name being on the document. Then, again, Professor Sidney Young. There could not be a more admirable Professor of Chemistry than Dr. Sidney Young, but he is not a graduate of ours. Professor Werner is not a graduate of ours, or of any University. I believe Professor Young is a graduate of the London University. Professor Werner was only appointed the other day as a professor—he is Professor of Applied Chemistry, and the reason he is called professor is simply because he is an exceedingly good chemist, and we wanted to have in the School of Chemistry, along with Professor Young, another professor to divide

the subject somewhat, and to put in another man to work the Applied Chemistry, and Dr. Werner was put in. We did not know a better man than Dr. Werner, and it was first proposed to make him a lecturer, and then it was considered that if he were made a lecturer he would be looked upon as an underling to the Professor and under the control of the Professor, and it was in order to give him freedom, and to give him a position, that he was called Professor. That was only done the other day.

3966. He was called a Professor because he was a Professor?—He was called a Professor in order to give him a position. The other is Professor Alexander. I hope the Commission will not imagine that I am saying a single syllable against any one of these gentlemen. I do not think better men could be got anywhere, as far as my opinion goes. No better man could be got as the head of the Engineering School than Professor Alexander. He is a Scotchman, who was a considerable time in Japan before he came to us, and he is an admirable man in every way, but he is not a graduate of ours, and I confess—it may be a weakness of mine, but I confess—I do not think that men who are not graduates of ours should lend their assistance to revolutionise our institution.

3967. That is rather an impeachment of this Commission, is it not?—No. You are judges, and present company is always excepted. Now I take the other four Professors. They are merely professional men who have nothing to do with us. Their main business is their own profession. Take Dr. Hart, who is Regius Professor of English Law. I do not say anything against him, but his business is in the Land Court, and he has a high office there, and only lectures an hour in the day with us. I do not consider his name has any weight in backing up a revolution of this kind. Then take Sir Charles Ball. I need not say a word about him; everyone knows who he is. Sir Charles Ball is Regius Professor of Surgery, and is a man who has arrived at the top of his profession in Dublin, and his eminence is recognised, not only in Dublin, but in London and everywhere. But he has nothing to do with the teaching of the place, and never went through the place, and he does not know the ropes in the way that I do. Then there is Sir Arthur Macan, who is King's Professor of Midwifery. He was appointed by the College of Physicians. Trinity College did not appoint him; they do not pay him. He gets fees from the students, but he has nothing to do with the place. Then I will take Robert Galloway Louis Leonard. He is a young chap; only a couple of years ago I examined him for Scholarship.

3968. I daresay he will get over that?—Yes. I am old now, I admit that; Leonard is a barrister. I say that the names of these four professional men who get small salaries from us should not carry any weight in connection with this document to induce the Commission to adopt their suggestions. I submit that to the Commission, and I think that is a fair way of putting it. There is no other matter that I care to go into in connection with this particular document, except one, which is trotted out so commonly, and that is the question of duplicate Professors. Perhaps you do not wish to go into the subject of duplicate Professors, but I have a few notes upon the matter of duplicate Professors. The first question in the case of duplicate Professors is, who is to appoint them. I ask the men who are advocating this scheme, who is to appoint them.

3969. You are speaking of duplication in cases of difference of religion?—Yes; they say, "If the Advisory Committee so desire, second Professors shall be appointed in Mental and Moral Science and in History, subject to the Veto of the Advisory Committee." My general criticism on this document is contained in a statement which I sent in to the Commission, and perhaps there is no occasion for me to go very deeply into it now. But the question I ask is, who is to appoint the second Professor? That is the crux of the whole thing. Of course, if the Board are to appoint him, then the grant is nothing at all. "It is you people still—your Protestant Board—who are appointing the second Professor in a subject which has to do with religion, and in which religion comes in very strongly." On the other hand, if the hierarchy appoint him we bring in an outside body, which is quite contrary to our Statutes.

* Appendix to First Report (Cd., 3176), 1906 page 23.

I would also ask this question:—Have duplicate Chairs, involving, of course, duplicate subjects, been demanded at Oxford and Cambridge as a condition to allowing Roman Catholics to resort to those Universities? I do not think they have. I do not think they have ever been asked for at Oxford or Cambridge. Why should they ask for them in Dublin then? As far as I know, no change was ever made at Oxford or Cambridge for the purpose of making those Universities more acceptable to Roman Catholics, and yet they are allowed to go there. Now, of course, you may ask in what particular subjects are these duplicate Chairs to be established. We are always told history and ethics and metaphysics; but on the same principle, there is not a subject, or a branch of a subject, under the sun that is not liable to the very same objection. The same principle would require duplicate Chairs in Medicine, Astronomy, Physics, in fact in every branch of knowledge wherever scientific investigation may by any possibility lead to results which are at variance with the *a priori* conclusions accepted as true by the Roman Catholic Church. I am not speaking in any terms derogatory to the Roman Catholic Church. Perhaps there are few men who would go further to help Roman Catholics in every way than I would, but we are dealing here with substantial matters that must be gone into, and you must call things by their proper names. I say that the results that would be arrived at—say, in Anatomy—would run counter to the *a priori* conclusions accepted as true by the Roman Catholic Church. I have mentioned other subjects there, and if you wish to follow it up you will find that Professor Hogan, of Maynooth, in a pamphlet of his which he published quite recently, has enumerated every single subject, not only these I have just referred to, but law and every other single subject as liable to be perverted by the lecturer. For my own part, I do not think legislation of any kind should be initiated and carried on on the supposition that every man you are dealing with is a rogue. I am sure—and I am perfectly certain it would be the same with everyone else—that there is not a Professor who is established in Trinity College who would ever dream of interfering with anybody's religion, and if I were pushed to it I would say, "In what way is your religion affected? You have passed through Trinity College, Dublin. It won't do for you to say that your faith and morals are in danger. I want to ask: Were your religious principles affected or interfered with in any shape or form while you were passing through Trinity College, Dublin?" And if I wished to push the thing, I should go back to old times. I have it here that in the first half of last century there was not a stringent order with regard to men coming to Trinity College, and I could enumerate a number of eminent men who got Gold Medals and some of them the first Moderatorships in these very subjects that they now require duplicate Chairs in. No doubt the Chief Baron will have a number occur to his mind. In short, I say the establishment of duplicate Chairs, what they call widening the University, will and must tend to destroy the full liberty of teaching which we claim as our right, and which must exist in any University that is worthy of the name of a University. Nor can the case of duplicate Chairs and duplicate Courses be limited to the studies preliminary to taking a degree only—that is, the ordinary curriculum of the Course—they must be extended to all examinations, and then we get in Scholarships and Fellowships, and so by the innocent proposal of these men we should find Trinity College handed over altogether to the control of the Roman Catholic Hierarchy, and Higher Education, in the real sense of the word, completely destroyed in the country. I am not mincing matters. Now, the ground on which this demand for duplicate Chairs and duplicate Courses is based is that at present our Professional Chairs and Courses are essentially Protestant. This is not true in the sense in which it is designed to be accepted. The teaching in History, Ethics, and Metaphysics, the subjects principally alluded to, is unsectarian, and can only be called Protestant in the sense that it is not essentially Roman Catholic. But the duplicate Chairs and duplicate Courses demanded are to be essentially and in the fullest sense Roman Catholic, thus introducing in an intensified form that sectarian teaching, the alleged existence of which on the Protestant side is so strongly objected to. When this demand is extended, as it is sure to be extended, to

Medicine, Physics, Astronomy, and even Law, as Professor Hogan does, the absurdity of it becomes more apparent. The teaching in these subjects may with equal truth be called Protestant, but still only in the sense that it is not essentially Roman Catholic. The only concession that I think could be made in this matter consistently with commonsense is that only in the courses preliminary to obtaining a degree in Arts should History, Ethics, and Metaphysics be optional subjects, and that any teaching on purely Roman Catholic lines should be left to private enterprise and kept altogether apart from official recognition, its very existence being ignored by the College. This is merely to remove the course in Ethics and Metaphysics from the list of obligatory subjects in the Senior Sophister year and place it amongst the optional ones.

3970. They are obligatory now?—They are obligatory now; the Ethics and Metaphysics are obligatory in the Senior Sophister Class, but History is not obligatory. Astronomy is obligatory, but not the others. I may mention here that up to the present time Roman Catholic students have never, as far as I know, objected to our course in Ethics and Metaphysics. For a great many years I lectured in these subjects myself in the Senior Sophister class, and there was always a considerable number of Roman Catholics; and there were no more attentive students in the class. On the contrary, it has always been a favourite course with them, and the names of many of the most distinguished Roman Catholics appear in the lists of our Senior Moderators and Gold Medallists in this subject. I will take some names from the decade from 1840 to 1850. The first name I came across is in 1840—John Dillon, M.P. for Tipperary, and I think father of the present John Dillon. Then there is John O'Hagan in 1841.

3971. LORD CHIEF BARON.—Afterwards Mr. Justice O'Hagan?—Yes. I am taking them out of the Calendar. Perhaps I may ask you, Chief Baron, to give a more particular definition of them. Then there is Edward Tynan (1841), member for the County of Limerick. Then William Henry Cogan in 1842, who was the first Gold Medallist in Ethics, and who was for a long time member for Co. Kildare; and in 1873, when Mr. Gladstone's Bill was before the House, he, of course, as a member of his Party, voted against us. But all these men who were old graduates of Trinity College—men like Mr. Cogan—always spoke in the kindest and the most affectionate terms of Trinity College, Dublin.

3972. I think you are wrong. I think you will find that Mr. Cogan voted against the Bill on the second reading?—You are quite right. We fought that Bill, and we went over in utter despair. I was one of a deputation which was appointed to go to London. We were in utter despair, but we were determined to fight it, and the man who gave us the first bit of courage was a man who died the other day, Lord Cranbrook. We discussed the whole question with him, and he said: "Gentlemen, I am satisfied, but don't you waste time with me; go and make converts with the enemy." We fought an uphill fight with the enemy—the Chief Baron is right in putting me straight there—and we ultimately carried it; the Roman Catholic Bishops opposing it, but the Government were beaten by a majority of three, and that is what has kept Trinity College alive for, at any rate, these thirty-three years. Mr. Cogan, at any rate, always spoke kindly of us. William P. O'Brien, Vice-President of the Prisons Board, is the next name on my list—I knew him myself; he was a man well known in Ireland in the famine times; he made his mark, and then was made Vice-President of the Prisons Board. I now come in 1846 to Michael Morris, afterwards Lord Morris; he got first Gold Medal in Ethics and Logic, and I don't suppose there was ever a man left the walls of Trinity College who had such an affection for the place as Michael Morris. I never met him that he did not go over his old fight for the Gold Medal. Then I take another man, James Charles Mathew, who was a Gold Medallist in 1849. At the beginning of last century there was a very remarkable case—the case of Michael Slattery; he got his Bachelor Degree in 1804, and took his M.A. in 1832. He was then Professor of Carlow College, and then he was made President of Maynooth, and he finally died as Roman Catholic Archbishop of Cashel. He was a Roman Catholic graduate of the University of Dublin. So that as far as this particular concern of widening the place and

bringing in these changes, it is only of late years—during the last fifty years—when the cords have been tightened in the way of prohibiting these students coming to us, that the Roman Catholic Hierarchy have carried their point. I do not care to go much further into that. I will now take the case, if you will allow me, of Statement No. 4,* submitted by members of the Professoriate. That is nine members out of the twenty-nine, and of those nine, six are Medical School Professors. The point that they make here is that they want to become members of the Corporation and of the Governing Body; they want to have life tenures of their posts and they want pensions. In regard to their becoming members of the Governing Body, which means becoming members of the Corporation, there is only one way by which a man can become a permanent member of the Corporation of Trinity College, Dublin, and that is by getting a Fellowship; you can get in in no other way. There may be a young member of the family who may get in by getting a Scholarship, but he can only remain a member of the Corporation for five years at the most. Of course, he has this privilege—he is a voter and he can vote for members of Parliament for the rest of his life, as an ex-scholar. But to become a permanent member of the Corporation, he must get a Fellowship. And the Professors ask here that they should be made members of the Corporation. You can understand a professor who is a graduate of Trinity College, Dublin, asking for it—you can understand his saying it—but I begin with the case of a man who is not a graduate. I will take the case of Professor Sidney Young. He is not a graduate of Oxford, or Cambridge, or Dublin. If he was made a member of the Corporation, by whose authority would he be made a member? He does not come in by the door that is open to others. He wishes to be put straight in without submitting to the Fellowship examination and to get in in that particular way. For my part I do not know whether it is the case at Oxford or Cambridge—where there are a large number of Fellowships—that a man who is appointed Professor can get a Fellowship in any College, even though he is not a graduate of any University. I am not in a position to say whether he can or not, but my first notion would be that he could not do so. Dr. Jackson will, perhaps, tell me this. Can a stranger who is not a member of Oxford, Cambridge or Dublin, become a Fellow of a College, at Cambridge University?

3973. Dr. JACKSON.—Certainly. I will give you an instance. A couple of years ago we asked a Professor in an American College to come over and take a post as a teacher of History, and we offered him a Fellowship. He came over and has been most successful?—And does the Fellowship make him a member of the Corporation of the College?

3974. Certainly?—And a member of the Corporation of the University?

3975. No, not of the University?—But of the College?

Dr. JACKSON.—It is a College appointment.

Sir THOMAS RALEIGH.—I take it that the University of Cambridge made him a graduate at the same time?

3976. Dr. JACKSON.—Inasmuch as he did not hold under the University but only under the College, he could not be made a full graduate. But the University immediately made him a titular graduate?—What we call in Dublin giving an honorary degree.

Dr. JACKSON.—On the other hand if the University were to import somebody—and I know nothing to prevent the University from doing so—the University, on making him an officer would be able to confer upon him a full degree, with full powers of voting in all respects.

3977. Sir THOMAS RALEIGH.—That is the rule in Oxford as well?—That is a thing that has never happened in Dublin. The honorary degree does not carry any privilege with it more than the honour of it.

3978. Dr. JACKSON.—Our honorary degree would carry no privilege. But it would not be an honorary degree if he were appointed to a University post. I will give you an instance. When Professor Bury came to us, he was at once admitted to the full degree of Master of Arts in the University. He was an officer in the University and therefore admissible to a full degree with all privileges; and if he had not been a member of any University, it

would have been, so far as I can tell, identically the same?—In Professor Bury's case, he is a graduate of ours, and he could take an *ad eundem* degree.

3979. He did not take an *ad eundem* degree; he was admitted because he was holding office with us. Professor Macalister's case is the same?—Dr. Macalister was a graduate of ours. They could have taken *ad eundem* degrees and therefore qualified. But a case such as that of the American Professor you mentioned is a very unusual one, either at Oxford or Cambridge, is it not?

3980. Well, I am not so sure. Within the last few weeks there was an application to us from Emmanuel College to grant a titular degree to an American whom they had imported from Germany to teach law. The titular degree was at once granted. I have tried to think of some clear instance of a University appointment, and I think I shall be able, but I must think about it?—At any rate as far as Dublin is concerned, this has never been so.

3981. CHAIRMAN.—The question is not whether it has been so, but whether it ought to be so?—The question whether it ought to be so depends on the means by which it is carried out, and therefore the point I again come to is that our Charter stops it. Of course if the Charter is gone, any Commission can do what they choose.

3982. As things stand he could not be made a member, but the question is whether some alteration ought not to be made?—I may say here that I am a strong conservative in this matter, but, of course, I have opposed many things, and I have been overborne by others, and I submit in the best of good humour. And here, if I am overborne by the strong hand, I must grin and bear it, but I will not—I speak with all respect—I will not surrender my Charter until I am forced to do it. It must be taken from me by the strong hand. That is my position in the matter, and I think I shall get practically the unanimous support of the Corporation.

3983. Dr. JACKSON.—A few years ago we had a Professor of Arabic, Professor Rieu, who, I feel quite sure, was admitted a Master of Arts as Professor. Of course I cannot give distinct evidence as to that, but I am convinced that it must have been so. Certainly I have no notion that we are in any way limited?—You have quite satisfied me, Dr. Jackson, because I spoke with diffidence; I did not understand it.

3984. CHAIRMAN.—At Oxford there is a very recent case—the case of the Regius Professor of Medicine, who has no English or European Degree at all. Is not that so, Mr. Butcher?

Mr. BUTCHER.—Yes; that is so.

Sir THOMAS RALEIGH.—We give the full Degree at Oxford—the Degree which carries a vote, to anyone engaged in University teaching, whether under the University or not.

Dr. JACKSON.—Whether under the University or not?

Sir THOMAS RALEIGH.—Yes.

Dr. JACKSON.—Anyone who teaches in any College gets a full Degree?

3985. Sir THOMAS RALEIGH.—Yes; a full Degree?—And does he have a Parliamentary vote?

3986. He has a vote in the University bodies which legislate for the University—he is a member of Convocation?—In the case here of the Professor you are alluding to would he be entitled to vote for a member of Parliament?

3987. Yes?—That is not so with us.

3988. Dr. JACKSON.—These are not honorary Degrees?—No, but still they are Degrees of a special kind. But I make this remark, that there is a very common fallacy underlying a great deal of this document, and all the other documents—that a Fellowship in Trinity College, Dublin, is not the same or in any sense to be compared with, or on the same lines, as a Fellowship in Oxford and Cambridge. We have 32 Fellowships, 25 Junior and 7 Senior, and the Provost—that makes the whole permanent members of the Corporation. But although our Fellowships are limited in number, they are Fellowships for life, and no man can take any work up of any sort outside the College unless he has the consent of the Governing Body. He cannot go to anything else. If he were a clergyman he could not take a curacy in the city of Dublin. At Oxford and Cambridge I suppose there are 300 or 400 Fellowships, and they last about six years on an average at a couple of hundred pounds a

* Appendix to First Report (Cd. 8176) 1906, page 25.

year. Our Fellowship is a man's life profession—his whole profession. He is nothing else. I never have done anything else in my life except work at my business at the College. I filled a number of posts, but my whole time is given up to College work as a profession. It is a life appointment, and in that way it differs altogether from the Fellowships at Oxford and Cambridge. You observe men are sometimes conscious of it, but when bringing in their point they slip in a Fellow-Professorship of Oxford and Cambridge, but the Fellow-Professorship there is a totally different Fellowship from the Fellowship in Dublin, and one has always to be watching oneself in order not to make a mistake.

3989. CHAIRMAN.—Professors at Oxford hold in connection with Chairs; they are Fellows of the College so long as they hold the Professorship, and no longer?—That is what these men here would be satisfied with.

3990. Is not that something of a precedent?—Keeping to our constitution as it at present exists, is another matter. I now go into another question here in regard to the tenure. Perhaps I take a different view to anyone else in the matter of Professors. I look upon a Professor as what he is. He is appointed because he is a specialist; he is an expert in a particular department, and you do not ask him whether he knows anything else. If you appoint a Professor of Chemistry you want a specialist in Chemistry. You do not want to know whether he knows anything of Latin, Greek, and so on. Nobody knows and nobody asks. You do not want to know whether he has dived into the differential calculus or any of those sort of subjects; you appoint him simply for the purpose of teaching Chemistry. I look upon him for that reason as a man engaged for a particular duty, and as long as he performs that particular duty, we will keep him. But the Central Body, the body that gives stability to the whole institution, are the permanent members of the Corporation, and they engage any man or any number of men for any department they choose, and pay them well as far as the funds admit. The Professors always commence on a salary far greater than any Junior Fellow commences, simply because we know that he is a man who has made his mark in a particular line. In the first instance, at any rate, he is only likely to have a short tenure of his office. I may be speaking roughly, but I want to convey my meaning in such a way that you will not misunderstand it. If I were head of a large firm, like the shipbuilding concern of Harland and Wolff, of Belfast, for instance, and I wanted a man for a special department in shipbuilding, I would say "I will give you a considerable salary, because you are remarkably expert in this particular line. I will not undertake to employ you for ever; I will employ you as long as it suits me, and as long as you are able to do your work. As soon as you flag in the least or get in the least degree unable to carry out your work, well, I will pension you off, as you have been here a good while; I will treat you fairly, at any rate, to show that there is some little milk of human kindness in me, but I won't keep you. I must keep the establishment going, and if I have not the best man in this particular post my establishment will fall off in that particular department. I must have a good man in it, and however painful it may be to me, from my regard for you, to part with you, you are not a man who is strong enough for me; we must part, and I must get another man in your place, because I must have a strong man at the post." I may be wrong, but that is the way in which I look at Professors as distinguished from other men; they are experts in a particular department, and I engage them to teach that particular department, and I will not tie myself to keep them any number of years, whether they give me satisfaction or not, and whether or not their health remains good, and so on. My first object is the welfare of the institution. I must have the institution well worked, and worked to the best of my knowledge in the way it ought to be worked. The moment that any department becomes badly manned, it falls in the estimation of the public (and the public is very quick to find out any case of that kind), the institution suffers, and it takes years and years before the thing can be rectified. In the case of Professors who have remained too long, and who should have left before, it is said, "That department is not so well manned as it was in my day."

3991. You think Professors may come and go, but the Fellows should go on for ever?—The Fellows

should go on. In other words, the staple part of the institution are the Fellows.

3992. You would not dismiss a Fellow when he ceases to be capable of doing his duties?—We pension them. We always have up to the present. In the case of Professors who remain a considerable time with us we always pension them. These men do not mention that. But if you take a case here, the Regius Professor of Divinity, of course, is provided for specially under Act of Parliament. But Dr. Dowden, who is a well-known man in the literary world, has been with us a number of years. He commenced at a small salary, and worked up, and his salary increased, increased until he has his present salary, which is given here. A great many years ago Professor Dowden's position was changed in this way: he was given a life tenure of his Professorship, and a pension when he became incapacitated, or unfit to go on with his work. He was to get a pension of something like two-thirds of his salary. Well, Professor Dowden is with us still, and I hope it will be many a long day before we have to give him his pension. Dr. Atkinson, in a similar way, commenced at a more moderate salary, and worked on. When he gave satisfaction, the Board of the day converted his Professorship into a life Professorship, with a pension attached to it. Mr. Alexander, whom I have spoken of, our Professor of Engineering, is another similar case. In the case of the man who preceded Professor Alexander his salary was £300 a year. When Professor Alexander came to us we gave him that, and I think his fixed salary is £500, but, altogether, it is about £700. Professor Alexander has a life Professorship, with a pension attached to it. It is always in the power of the Board to do that.

3993. It is one thing for the Board to have the power and another thing to give the Professor the right?—No doubt; but if the Professors have a right to a life tenure I say that is injurious to the teaching, and the College suffers. Their tenure will not be disturbed, and they will never be disturbed, as long as they are able to do their duties.

3994. If I may venture to say so, I quite agree with the suggestion that the condition that it should be till death or fault should be supplemented by "or incapacity"?—Certainly; but every man I may take it, not only in the case of Professors, but in the case of every man connected with the place, down to the servants of the place, when they become incapacitated they invariably get a pension, or if it suits them and their families better they may get a lump sum. When I first became Bursar there was some £1,200 or £1,500 a year being paid in pensions; the man who was Curator of the Botanic Gardens was receiving his £200 a year, and another man connected with a department of the Medical School had his £150 a year, and so on with all these men; and it has never been otherwise. Now with regard to their own ideas of pensions, they propound a scheme for pensions, and say £8 10s. per £100. I do not think that that holds water. I think it will cost anybody to get a pension of £350 a year a great deal more than £8 10s. per £100.

3995. That is an actuarial question?—Yes; but I know what the insurance companies will do it for. If I take the Royal Exchange Insurance Company, one and a half guineas per £10 comes to £15 15s. per £100, and here it is put down at £8 10s. £15 15s. is the charge, on the supposition that no money goes back. Of course you can get an old-age pension, or a pension to commence at sixty-five; suppose they put down their age at thirty-eight to get the pension at sixty-five, in that case the insurance company will give you terms, by which, if in the meantime you die, the money will be refunded, with compound interest at 2½ per cent. That is one table of the Royal Exchange Insurance Company. A pension of that kind, without any return of money, costs one and a half guineas per £10—that is £15 15s. per £100; so if they are right here with their £8 10s. I do not understand how it is. I would not ask any man to do what I would not do myself; if I get a post of £500 or £600 a year, and if £8 10s. will provide for me a pension at that time of life common prudence will tell me it is a good investment. They, of course, wish to have it fixed. They complain here that they have no means of redress should arbitrary dismissal occur. There was a question asked of Dr. Joly by Dr. Hyde whether from his experience he considered it necessary that some bar or barrier

should be placed here such as they claim against arbitrary dismissal. I would ask Dr. Joly—"Will you name a case in which the Board have interfered and arbitrarily dismissed a man, in which he had no power of defence." I consider that that statement of Dr. Joly ought to be condemned in the strongest possible language. He had no right to make that statement unless he could prove that a particular man—Mr. X.—was dealt with in an arbitrary and tyrannical fashion by the then Board of Trinity College. If he can state that I will listen to him, but I do not think it is fair for a man to put down here, and repeat afterwards, in reply to Dr. Hyde, that he did think it was

necessary to have some security given against this arbitrary or tyrannical dismissal. I challenge him to name any case. That is not the way in which things are done with us, and I think it was an unfair statement, as Dr. Hyde knows, to put that in; I think these Professors ought to be ashamed to put their name to this statement, and I take this opportunity of having it publicly recorded that that is my opinion; and I may say, as to a great many of these things I have already expressed my opinion, because I am not in the habit of mincing my language, and I have told them what I thought.

After a short adjournment.

3996. CHAIRMAN.—Will you resume the broken thread of your discourse?—Well, perhaps I have said enough now about the Professors and their grievances. Then, of course, they talk here about being out of touch—they talk of the result of the exclusion of the Professors from participation in the government of the College, which "entails the extraordinary result that the Governing Body are necessarily out of personal touch with a large share of the great interests they control." I may say that as far as regards the Governing Body and the Professors in all the professional schools, the Board, in coming to any decision in regard to any matter concerning them, always consult the Professors in the school in question. There is a regularly-established Medical School Committee in which anything that comes to the Board has generally been through their hands. If a matter is sent direct to the Board the usual course is (that is, a matter which involves a technical opinion) to send it to the Medical School Committee, and to see what they say on a subject of that kind, and on the whole the machine works smoothly. When we want to bring about a considerable change, such, for instance, as that in the Law School, which was practically reconstituted lately, the Board appoint a small Committee, and you can always depend upon getting people, whether they are medical men, lawyers, engineers, or whatever they are, you can always get men enough to help in the particular case. With regard to the Law School, Serjeant Jellett, Lord Justice Fitzgibbon, and, of course, our own Vice-Chancellor, Mr. Justice Madden, were outside members of this Committee, and they sat and deliberated and discussed everything in and out of the place, and at last they brought in a scheme which was placed before the Governing Body, and was adopted. The objections of the Professors were listened to, and everything they had to say was discussed also by this Committee, and I have heard it often stated by those competent to judge (and I am sure that I may refer on this point to the Chief Baron at the present moment) that the Law School in Trinity College, Dublin, can hold its own for teaching Law with any school in the United Kingdom. I do not go into the question beyond that, not being myself a lawyer. That instance shows the way in which we work our institution; we work it on what I may call common-sense principles; if any man wants to get a good Law School let him get men connected with the profession of Law, and I do not care what judge it is, he will only be too delighted to receive an invitation from us, and when we ask him—"Will you give us a help?" (I am sure the Chief Baron will say it is so) they are only too glad to have an opportunity of helping us, and therefore with regard to any friction or difference of views between the Governing Body and the Professorial Body no such thing exists—the whole machinery works quite smoothly. The Professors here have spoken rather—I was going to say bitterly, but they have spoken rather hardly of us, and have exaggerated anything that may possibly have come in their way. But they have given no facts to support these allegations of arbitrary dismissal and so on, and when they themselves come to speak of the Governing Body they are obliged to admit this. They say—"We do not wish to appear to ignore the sympathy with which the members of the Board listen to our representations," and so on. That undoes every single word they have said. That is the fact; they

never meet anything but sympathy, and any man in the College—I do not care who he is or what his position is—if he has any grievance or any suggestion to bring forward for the good of the whole institution his suggestions are listened to and discussed, and if fit to be adopted they will be adopted. Now they want to make the Chairs part of the Corporation, and to get themselves a position on the Board—that is, on the Governing Body—by making the Board elective. I do not agree myself with having an elective Board; I think it is a very great mistake. If you take a Board elected, and consisting simply of experts (they put but a small number on the Board—ten, nine, or whatever the case may be); each of them is a specialist in his own line. Now, I think a number of specialists meeting together to make arrangements for a large institution like Trinity College, Dublin, are about the worst set of men you could get to do so, for this simple reason—they are a number of independent, isolated atoms. One man is put on because he is a Professor of Chemistry; another man is put on because he is good at Law; another man is put on because he is good at Pathology, and so on. Well, these men are experts and specialists in their own particular departments, but when you come to ask them to give general advice as to the management of an institution, and say what should be done under such and such circumstances, or under such and such other circumstances, I do not think their opinion is to be valued as much as that of a Board composed of men elected on the principle to which they object so much—seniority. You get a mixed Board, and you may possibly have some members of the seven or eight who are less capable than others. But the Provost, we may assume, is fit for his position; he is put there by the Crown; we have nothing to do with that; and if you take the seven Seniors, they are not, and never have been, a pack of fools—there are always some men of common-sense among them, and these men of common-sense represent different views; they are not specialists. That is one of the advantages of our Fellowship Examination, that a man who is a pure specialist in one subject cannot succeed for a Fellowship—he is obliged to take up two or three or more subjects, and whatever he takes up it will, at any rate, enlarge his mind, and lead him to the conclusion that there is something else in the world besides the particular subject of which he happens to be fond.

3996A. Do you think that mere seniority is the best mode of choosing Fellows?—I think it is, and I will tell you why. The moment you come to make a Board an elected Body, the men that will get upon that elected Board will be men who have looked for that, and made their arrangements in order to secure the votes of other men to put them on it. Those will be the pushing men—the very men who ought not to be on the Board—and the best men will be the quiet, retiring sort of men who do not care to put themselves forward, while the others will canvass, and intrigue, and so on, to get themselves elected.

3997. You think that Providence selects a better Board by seniority than man can do in any other way?—I think it comes to that. These men are totally independent of everything in the place, with salaries fixed by Statute, and no matter what happens, whatever they do with the money, they are never personally anything the better for it, so that they are perfectly independent in that way. I did not

expect that we should come upon this point so soon, but I have open before me a statement made by Dr. Salmon. I myself, as I have already told you, have such a respect for Dr. Salmon's opinion that I think a man is possessed of a good deal of courage who will venture to go in his teeth. He is a man who said little, but who always saw far ahead; I never knew a man who saw so far ahead as Dr. Salmon. I myself, before I came to know him, often wondered at the conclusions he would blurt out, but I always found ultimately that he was right, and I made it my business afterwards to question him; whenever he made a statement, and I did not see the step that led up to it, I invariably asked him—"Sir, will you tell me some of the steps by which you have come to this conclusion?" and then I was always satisfied. At every meeting of the Board where he was present he was the same. Now, with regard to the Board, in his day and in the present day, I have this statement by me, and it will not take a moment to read it. His first remark was about election in the case of the Board. He himself until he became Provost was not on the Board, although he was the superior man that I have described him to be. He took the Regius Professorship of Divinity in 1866, and then he had to resign his Fellowship; therefore he never had anything to do with that Board, and because he was an ex-Fellow, and not a member of the Corporation, and did not succeed by seniority to be a member of the Board, he was sore about it, and he applied to the Board to know if they could get him a Queen's Letter to enable him to keep his Fellowship along with his Regius Professorship. There was strong opposition amongst the Juniors, amongst whom I was myself, but I would not take any part in it. He was refused leave to get a Queen's Letter, and, as I say, he was sore about it, and, as he says himself—he was talking about the Board—"he had never had a voice in the management of a penny of the College money; and he might say, too—although it was ungrateful to say it—that he never had the smallest official voice in the direction of the courses of study." Of course, he had in the Divinity Course, but not in any other. "It was ungrateful to say so," he went on, "because his suggestions had been always received by the Governing Body with quite as much attention as they deserved. He acknowledged that he had felt somewhat sore about this, and had often used smart sayings on the subject; still he must acknowledge that the present had been an exceedingly good form of government. He spoke with as much knowledge as anyone, and was not an over-partial judge; and he did not think that any public institution had been managed with greater purity than theirs, with more honesty, or with abler men conducting its affairs, acting solely for the good of the institution, and without any jobbery whatever. They were not men behind the age. They had introduced the reforms that had been necessary for the institution. He could say that from the beginning of his College course to the present time the history of Trinity College had been one of constant progressive reforms." That, I say, is the opinion of Dr. Salmon, and he went on then to discuss—

3998. Is it not rather a striking illustration of not having an elective system that such a man as Dr. Salmon had never been on the Governing Body of Trinity College until he became Provost?—Theoretically that is quite true, but as a matter of practice, though he was not on the Governing Body, as he admits himself in that statement, he never made a suggestion which was not adopted.

3999. No doubt; but still there is a man of enormous weight kept out simply because he was not yet old enough to get on?—I beg your pardon; it was because he had resigned his Fellowship. It was open to him to accept the Regius Professorship or to reject it.

4000. But in point of fact he never did get on until he became Provost?—He never did get on until he became Provost, but that was owing to the fact of his accepting the Regius Professorship. The Regius Professorship, of course, is the best paid in the place; it is worth £1,200 a year. He accepted that.

4001. If there had been the power of electing him amongst the Junior Fellows do you not think he would have got on the Board very early?—Of course, it is not at all unlikely that the Junior Fellows might have elected him; but, on the other hand, they might not—they are a very queer body.

4002. LORD CHIEF BARON.—You were a Junior Fellow yourself at one time?—I was, and I know them well.

4003. Mr. KELLEHER.—That is a long time ago?—No, no; I was co-opted in 1898; it is only eight years since I was a Junior Fellow. But the common idea among the Junior Fellows is, that the moment a man is co-opted on the Board, *instantly* his mind becomes a blank, and all his previous history disappears—that his mind becomes a blank as regards knowledge of the place or sympathy with others in it. I do not think that is a fair way of putting things. I was thirty-five years a Junior Fellow, and I had as much of the rough-and-tumble work in my life as any man ever had. I had one of the most troublesome posts; I held it for a large number of years; but I am supposed, the moment I get on the Board (Dr. O'Sullivan states it) to forget everything; as he says, "Reforms advocated by them as Junior Fellows are forgotten and ignored"—in other words, when he gets on the Board it seems as if he had been sailing in a balloon hitherto, and had suddenly touched mother earth. There never was such a mistake.

4004. CHAIRMAN.—What would you think of handing over the government of the Empire to the seven oldest men in it?—It depends upon who they were. I could name a great many men older than myself in whose hands I would be exceedingly safe. However, I was speaking of Dr. Salmon on the conduct of the Board. Another subject on which he proceeded to touch was the election of the Professors—that contained, in his mind, the whole sting of Mr. Gladstone's Bill. He would not have cared whether Mr. Gladstone had abolished Trinity College, or what he had called it, if he had given them an institution in which prizes would have been won by merit alone; but if it had been one in which a young man was to gain his position by canvassing and puffing and jobbery and collecting votes, why there would have been an end of all progress of science and literature in the country. At the moment when the Committee were debating the subject at their first meeting a Professorship became vacant; and what was the machinery then at work to fill it up? (Dr. Salmon was not a member, of course.) A small body of most competent judges, whom they knew, were engaged in examining into the qualifications of the candidates. All of them who were behind the scenes knew that into that examination no personal, political, or private motive would enter, and that the electors had nothing in their minds but the choice of the very best candidate. Two or three personal friends of his own were candidates, and he should no more dream of canvassing any of the electors on their behalf than he should have thought of canvassing any of the judges of the land with respect to the decision of a question to come before him. He knew that there were foreigners, perfectly unknown to the electors, amongst the candidates, and he felt quite satisfied that, although other candidates possessed their esteem and regard, yet, if they convinced themselves that one of those foreigners was more qualified to advance the interests of the College, and fill the Chair creditably, they would do as they had done in the case of Professor Brünnow, and bring him in, without the smallest ceremony or regard to the claims of friendship or personal feeling. That system was a remarkably good system. They might change it. He did not think they could change it for the better; but he was exceedingly anxious that they should not change it for the worse. I do not want to be personal, but that was Dr. Salmon's opinion upon this particular matter, and I consider myself that in regard to a number of men connected with particular Chairs the Board will hold the balance evenly in deciding the way in which money to be spent—which is only a limited sum—can be spent to the best advantage. There is another matter here which is mentioned as to the effect of these disabilities: "Several brilliant men have within recent years resigned their Chairs, and accepted positions of more permanency and dignity elsewhere; and if these withdrawals have not been more numerous, it is to be ascribed—at least in one case—to the feeling towards an *Alma Mater* who has extended to us a home from our earliest undergraduate years." That refers, of course, to our Professors who went to Cambridge, Oxford, and Edinburgh; those were withdrawals for very good reasons, not on account of permanent posts with us; they, as any man of sense would know, as long as they were able to discharge their duties, would never be disturbed; these men left for other reasons—to take places of more dignity. The case Dr. Salmon was alluding to there was the

case of Sir Robert Ball, who, when he was made Royal Astronomer, went to Cambridge. He was very sorry to leave us, and he simply went because it was a place with better pay, a better position, and so on, than we were able to offer. It comes to that. It was not from any want of confidence in the Governing Body of Trinity College, or because his post with us was not permanent. He had a life Professorship—the Professor of Astronomy holds the Professorship for his life. “It is also a matter of knowledge that when vacancies occur many who hold permanent posts elsewhere, and live amidst a more practical recognition of their work and distinctions, refuse to compete.” I say to the writer of that, “Put your finger upon him; do not make a vague statement of that sort without giving the particular instance upon which you found it.” He says it is a matter of knowledge. Well, if it is a matter of knowledge, let him name the man. We do not know where we are; we have nothing but dark insinuations of this kind, that such-and-such a thing is the case—we do not know who the men are to whom he refers, and I defy him, and challenge him, to name them. “Others refuse to compete,” he says; and when pressed upon that point afterwards, he said he knew one case. Well, there is an old rule in logic, “Do not argue from the particular to the universal; exceptional cases prove nothing.” On the other hand, before I admit the exceptional case I should like to know what the case is. It is said, so-and-so is coming forward, but without knowing the reasons put forward—that it was only a five year or a seven year post—I would like to know who the man was, and whether that was his real reason or not. I do not think it fair for men to come before a Commission like this and make these statements without giving facts to justify their assertions. I have mentioned the withdrawals alluded to, such as that of Professor Macalister, Professor Cunningham, and others. Now I have looked into the question of the actuarial part, and I will hurry on. I spoke of the elective Board, and the difficulty in connection with the elective Board.

4005. Go on, if you please?—Now there is a point here in No. 6: “Special accommodation for research and endowment of research—instrumental outfit and plant.”* I would like to say a word about research. I have asked for a long time back, I have always been asking, what the meaning of this very fascinating word “research” is. Who are the persons in Trinity College who are to prosecute this research? My question comes to this: Are they men who have their degrees, graduates, men who are fit to go into their professions, but who would like to stay on in College pursuing some particular line of research that they have a tendency for, whether it is in chemistry or anything else, pathology, or whatever it happens to be, or do you mean research to be what I would call good teaching of undergraduates? Well, the only answer I can get is—and I see Dr. O’Sullivan practically admits it, that it is the assistants in the various laboratories, men who have received their degrees, and qualified to go to their professions—that these are the men who will be allowed to prosecute research.

4006. I do not think it is confined to scientific research?—No; it relates to every kind of research.

4007. To literary as well?—Literary as well.

4008. The idea is that there should be an opportunity given to men of learning to pursue any particular branch of learning towards which they are drawn?—Yes. In this particular case, as it is set out here, endowment of research means the outfit and plant, and that brought me more particularly to the laboratories. Of course it is easy to manage in the case of literary research, because expense does not come in there, and our Professors in all literary subjects—Greek literature or Latin literature, or any subject—can always get a postgraduate or a man with a degree to come to Trinity College and receive every help possible from the Professors. But when you really come to the word research, practically any College at present is confined principally to the laboratories. I maintain that if we had money at our disposal to promote post-graduate studies and post-graduate research—I would of course give them all the help I could—but my own idea is that the expense is so great that research of that kind ought to be done at the expense of the State; that our first business and our first duty is to look after our young men who come to us at eighteen and stay until they are twenty-two or twenty-three, and that the other men, the elder men, if there is room for them, we are glad to see, but we are not bound to do anything for them until

we have first satisfied, as it were, our own family. That is the way I look upon the question of research. And when I have tackled any of our men connected with any of these schools where there are expensive laboratories I argue in that way, and I have never yet been able to get an answer other than that it means post-graduate research and not undergraduate research. Undergraduate research, in my opinion, is nothing but good teaching, good training, teaching a young fellow, no matter what it is, a mere matter of geometry, to show him how to face a problem in geometry, and to solve it. It is new matter to him, completely new. It is research to him; just as much to him as it is to a man who is making the most recondite observations on liquid air, and things of that kind. It is just as new to him as the other is to the post-graduate.

4009. Do not you think it is one of the functions of a University not only to communicate existing knowledge but to extend the boundaries of knowledge?—Certainly; but when we come to deal with a matter in which our funds are limited, and which calls for expenditure, there is no department in the College that costs more money than the laboratories, and our money cannot supply the funds for it. The fact is that if the money that has been spent upon the laboratories and upon buildings had been spent upon a purpose which perhaps it was thought at one time was the proper purpose to spend it upon, namely, in retiring pensions, there would not have been perhaps as much complaint as there is at present. About £5,000 a year, principally the interest on the money we got for our advowsons, we were authorised by Queen’s Letter to spend on retiring pensions; and there has never been for all these years more than an average of about £800 a year spent in retiring pensions. At the present time there is £1,088—that is the case of Dr. Ingram—and for a number of years we never had anything like £1,088. One year we had something like £1,350, but in other years only £320, and in others none. The money that should have been spent on retiring pensions was really spent in the buildings, and in the equipment of the buildings, to enable these men to do what they are enabled to do at present. Take the Medical buildings there. There is a question which I may touch upon now, as it occurs to my mind—that is, that the medical students pay their way. But that principle I would never admit. I would never admit that in the administration of the funds of institutions like Trinity College we should take into account 120 or 150 Divinity students, who pay so much, and say that the Divinity School is entitled to £3,000 a year; that the Medical students pay so much in fees, and that their money must be spent on them. I would not admit that at all for a moment. The Governing Body have the control of the finances, and work the institution on what you may call mercantile principles. If a particular school is run after by the public and the numbers increase, they add to the number of professors and assistants, and things of that kind, quite properly. If, on the other hand, another school diminishes in numbers, we have the right to curtail the expenses of that school; but if the principle I have alluded to is adopted, there are a large number of students who do not go to any professional school, who can turn round and say, “You have admitted the principle of the Divinity students’ money being spent on them, and the medical students’ money being spent on them: here are a number of us—we pay a lot of money, too—why not, after expenses and scholarships are paid for, pay that to us, and we will take it?” I would not allow that principle at all. I consider the whole of the money paid by students is money pooled to be distributed to the best of their ability and judgment by the Governing Body. Then we come to “The Instrumental Outfit and Plant,” and that sort of thing. We know the enormous sums it costs. The very buildings of the Medical School, within my own time, has reached £100,000 or more, for which we never get a penny piece. The College does not benefit by it a penny piece; it all goes to supply laboratories, lecture rooms, dissecting rooms, and so on, for the use of the students, and, of course, the more complete they are, the more students join the school and the better paid are the professors, who are paid partly by pupils. I would hold that we are bound to go as far as our money allows us, but that our first point is to make perfectly sure that the under-graduates, the men up to the age of twenty-two, are looked after in the very best possible way. If there is anything over, put it to this post-graduate research, but post-

* Appendix to First Report (Cd. 3176), page 31.

graduate research, in the full sense of the word, is so expensive that I think it should be a matter for the State and not for any institution such as ours is. Now I must hurry over. I will just draw attention for one moment to Dr. Bernard's remarks on page 43.* I am always glad to drop upon any concrete cases. He says, "The system of tutorial lectures might be improved by making the office of tutor elective," and so on. If he wants the tutorial lectures improved, he knows the place to go to—go to the Council. He is a member of the Council, and he could bring forward a motion under that head, that the teaching is not good enough, or not accurate enough, and so on, and he will get plenty of redress. Dr. Bernard is a member of the Council, and if he were here I would ask him who used the words, "Abolish the Council." I would ask the Secretary, Dr. Dowden, to produce the Minute Books of the Council, and let us see the attendance, and let us see whether Dr. Bernard has been a regular attendant at the Council. If he has, I should like to see whether what he has propounded here, in the matter of tutorial lectures, has been refused by the Council, whether the Council will listen to him. I should say: "Either your proposal was so absurd, or else the other men were stupid and would not adopt it. If you have had the opportunity of ventilating it, and if the Council would not go into it, send it up to the Board, and they will look into it and send the result to the Council." This is an example of where the abuse arises from the men themselves not exercising the powers and privileges they possess. Then it says, "Assistant lecturers in the several faculties should be appointed on the recommendations of the respective syndicates"—this is a doctrinaire way of doing things—"and not as at present, by the Board independently." That is not true; it is not a fact. I want to keep the Commission straight. If Dr. O'Sullivan, or Dr. Dixon, or Dr. Thomson, want assistance, they send in and recommend the assistant to the Board. The Board would not presume to elect an assistant themselves for Dr. O'Sullivan in Pathology, for Dr. Thomson in Physiology, and so on in general: the Divinity Professors, in the same way, when they want an assistant, recommend the men. We know that there is no second opinion about it, that that is the right man to put into the position. There is no difficulty in the matter at all. This grievance put forward here has no existence, because they are not elected independently by the Board. The Board never elect assistants without a strong recommendation of the Professor who wants the assistant. It is the natural thing to do. I am a member of the Governing Board of Sir Patrick Dun's Hospital.

4010. We need not go into anything outside?—It is the same thing. The doctors of the hospital recommend the man that should be appointed.

4011. It is a common practice, but we will not go into the other cases, I think?—Then he goes to the Alexandra College. I will not go into that except to say that Dr. Bernard has made a fundamental mistake about the Alexandra College. He was present when I pointed out this before the ladies were admitted at all. He wanted to give the College special privileges simply because it is the oldest Ladies' College in Dublin. I say that you cannot legislate for a particular College, that whatever you do for that College must be done for every other Ladies' College. Therefore we cannot do it for the Alexandra College. From a financial point of view, I pointed out to him that the moment they proposed to come, they wanted the ladies admitted to Trinity College on precisely the same terms as the men. The obvious thing was to point out that the moment the ladies pay their fees here they get lectures with us and will not pay for lectures on the same subject in the Alexandra College. Therefore the Alexandra College will lose their fees, and that is what has happened. "The number of University examinations is too great," and so on, and he refers to the "post-mortem system." Those are things not fit to bring before a Commission like this. Let him bring them before the Council or the Board, and let us see if the number is too great. I do not accept it that it is. We have three examinations in the year. I hold that the correct way of following up the lectures is to have the examinations following at the beginning of the next term. The men have been lectured and taught in certain subjects, and they make themselves more familiar with them and are examined in them. Nothing tends to help young men in acquiring knowledge more than periodical examina-

tions. If there is nothing but reading, they carry away very little with them. I do not wish to push the post-mortem examinations; that is a matter left to the discretion of the Senior Lecturer.

4012. We have heard the Senior Lecturer upon that point?—In all the Divinity examinations the same thing is done. A man may have eight subjects in the Divinity examination and breaks down; he comes up at the end of the following term. If he breaks down in June, he comes up in December, and passes in the subjects he has broken down in. That is only a post-mortem examination, and there is nothing in it. Now we come to the Modern and Celtic languages. I look to my old acquaintance, Dr. Hyde, in this matter. As regards the language, or the literature, or the archaeology of Ireland, I say "All right"—I have no objection whatever; but I must say that, in establishing a Moderatorship, or spending extra money on this, a man has a right to consider the relative worth of the different kinds of knowledge. There are certain kinds of knowledge the worth of which is greater than the worth of another kind of knowledge. If we lived before the Flood we could learn anything, but unfortunately we do not. At any rate, the time of young men at the present day is too limited; they must look and see what is the best use they can make of the few years that are at their disposal, and I hold that the literature and the archaeology and the history, and so on, all interesting subjects in Ireland, as they are in the case of every country, are not of sufficient value to be entitled to be put into this position. I know Dr. Hyde does not agree with me, but that is the way I look upon any new subject proposed. I will not waste the time of young men, and have them afterwards turn round to me and say: "You forced me into this, and it is no use to me; I have wasted many years of my life, and I have no return whatever." But I must hurry on. I will leave my own statement alone, as you know probably enough about that. There is one point here, an argument commonly used in regard to this general question, what is called the University Question, the argument that is to be found on page 80† in the second paragraph of the Statement of the Catholic Archbishops and Bishops:—"As to the first point, the Bishops are of opinion that there is no room for doubt as to the fact that Trinity College, Dublin, and the University of Dublin, as organs of the higher education, are, to all intents and purposes, restricted to the service of the Episcopalian Protestants of Ireland"—I am not going to raise a point there—"why this is so is another question." That goes back to the ban. They do not give the reason here, but that is the reason, and if, as I say, the ban of the Roman Catholic Church was removed from Trinity and Queen's Colleges, all these things would solve themselves. If we were left in the same position as Oxford and Cambridge, that is all we ask for. We will soon fill our numbers.

4013. That is an appeal which should be addressed to the Hierarchy of the Roman Catholic Church, and not to us?—Of course, but, on the other hand, I should like to have the authority of a Commission like this to point out that this ban does not exist in England. It would do no harm to point that out. Now I come to another part, where it is stated that, "By the Census Returns the number of students on the books of Trinity College of religious denominations were as follows." Then it gives the corresponding figures of the population question. Now, Mr. George Fottrell, a man of whom everyone will speak with the greatest respect, a man who has spent a great deal of time on the University question—his father was a graduate of ours, and I think his son is, although he was not with us himself—but he wishes us well—I will not speak of him in any way but of respect and regard—he in a pamphlet brings out the number of entrances in Trinity College of Roman Catholics, as 24 per annum. The population is about 3½ millions of Catholics and about a million or eight hundred thousand of all others. Therefore, a simple rule of three will bring out that, instead of 24 Roman Catholic entrants, there should be 1,400 each year. That is a very plausible sort of argument. Of course, the way in which a man would answer that is, that, counting heads, the Roman Catholic population is 75 per cent. of the whole, and we others are 25 per cent. But I hold that if we take the University-going part of the population, and invert that—

4014. That argument has been represented to us by two witnesses?—I do not know whether my particular way of looking at it was put to you. I think the fair way to test this population argument is to take the results of the Intermediate Examination. They have the Senior Grade, the Middle Grade, and the Junior Grade, and that is where every single boy in Ireland that can be put in to earn a prize, or to earn money for the school, is put in. An average of £58,000 a year is paid in result fees to the managers of schools, and a boy some years ago was worth £39 in the Senior Grade for his schoolmaster, and if the master had ten Senior Grade boys that passed he had £390. I know how this is worked. I was, myself, Inspector of the Erasmus Smith Schools, and went there generally in April at the Easter recess, and a second time before we resumed work in the Michaelmas term. I came, of course, in a short time to be thoroughly acquainted with the boys in the schools. I remember, on one occasion, two boys struck me as exceedingly brilliant, and I told the Headmaster that those boys would do well, and that he would get Exhibitions with them. They were two brothers, exceptionally brilliant. When I came back in September, I asked where they were, as I missed them, and I was told by the schoolmaster that they had received Exhibitions, and pressure was put upon their parents, and they had been sent to such and such a Roman Catholic College; they were taken from him. In other words, they were worth money. The Roman Catholic clergy had that influence or power, whatever you call it, to induce the parents to take them from the school they were at and send them to the Roman Catholic school. Therefore, the two boys next year were worth £30 each to the master. I am mentioning this to show that every possible pressure is put on these boys to send them to the Intermediate Examinations. Now, I will take a fair test of the number of the entrants that should be expected in Ireland, namely, the number of boys who have passed—I will not say got honours. I can give you that number if you wish. I take the boys who have passed the Senior Intermediate. I have here the list of boys who have passed, and got Exhibitions and Prizes from 1898 to 1904. This is the total number that passed of every religious denomination in the Senior Grade from 1898 to 1904:—215, 279, 226, 332, 277, 284, and 223. At one time Dr. Salmon and Archbishop Walsh were arranging a method of marking for the Intermediate, and they asked me to assist them, and that brought me to look closely into the Intermediate. Dr. Salmon asked me to start a scheme for them. I counted all the boys that passed, and at least one-third or more are not Roman Catholics, that is, judging from the schools. Is that fair? I think it is a fair way of putting it, that a third should be taken off these to get the number of Roman Catholic pupils that should enter Trinity College. If you take any of these figures and knock a third off you will see. I can only go to 1904, because I take them from the figures given in Thom's Directory. I could not get the figures of last year or this year, but I took the figures I could get for these seven years. Take 277, which is not a bad average, and knock off a third of that, 92, and where are the 1,400 when you knock 92 off 277? You have 185. I have the Exhibitions here, if you care to have them. I can give them to you for the seven years.

4015. We hardly need go into that, I think?—No.

4016. The LORD CHIEF BARON.—The Exhibitions are included?—Yes. These are only the passed men. If you want to know the Exhibitioners, the men who are the best in it, there they are. The numbers corresponding are 19, 24, 20, 30, 28, 36, and 31. Now, I should like to see what becomes of the population argument. I think this is a fair way to meet it. About £58,000 per annum is given to the masters of the boys who answer well at these Intermediate Examinations. I have the Middle Grade here with an average of 600.

4017. I think the Middle Grade is important, because we know, as a matter of fact, that a large number of students enter the Royal University from the Middle Grade?—I will give the numbers now, if you wish to have them.

4018. Just as you like?—Very well, here they are: 556, 560, 654, 614, 539, 599, and 737, or an average of a little over 600. We knock off a third, and we have an average of 400. When you put the two grades together, you will not get 1,400. I will not go fur-

ther, but there is one point here I should like to refer to, namely, the Divinity School. I object myself, in the first place, to the method in which the whole Divinity School question has been put here, as to the connection between the Divinity School and the College. I do not think it has been put fairly either by the Dean of St. Patrick's or by Lord Justice FitzGibbon. I think they have inverted the history and not quoted the most important documents. They began by saying "the connection between the Church of Ireland and the University of Dublin has always been most intimate, as one of the main purposes which the founders of the University had in view was that a learned ministry" should be trained. I defy them to prove that. If you will observe, you will see that Lord Justice FitzGibbon—and you will not get in Dublin, or in Ireland, many men to argue a case with him—shirked altogether that particular question; in other words, the first paragraph begs the whole question. I defy him to prove this connection that he assumes between the Divinity School of Trinity College and the ministry of the Church of Ireland. I cannot find anywhere in the Statutes there was any particular school called the Divinity School at all, and I would ask him the question where he meets the name Divinity School in any of the old Statutes. Religion was part of the business of the Fellows of that day. They had to teach religion to all the students, and they taught religion to the students, and I daresay, and am certain, far more carefully than we of more recent times have done. Everything was laid down in the Statutes, and they were followed out. Of course, it is the Protestant religion, because it was the State religion at the time. It is not a question of what the religion was, because it was the State religion, and the national religion then was not to be contrasted with what we call denominational religion. The religion of the monarch, the King or Queen, was the religion taught. Bishops of the Church of Ireland—and, mind, there were far fewer clergymen in the Irish Church then than there are now—availed themselves, naturally and properly, of the teaching of religion in the University, and they ordained them accordingly, but they had no connection, good or bad, with the College. The first connection was in 1790. If you go back to the early Records, you cannot find a word about them until 1790, and that is the first time that we get a connection or any sort of communication or approachment between the Bishops of the Church of Ireland and the Board of Trinity College. But how does Lord Justice FitzGibbon and the lawyers and Dr. Bernard put it. They assume that there was always this close connection, and, as an example of it, say, so close was it, that the Board listened to the recommendations of the Bishops, and the Bishops practically dictated what they were to do. That is not so. It is a total inversion of history.

4019. It would be before the Church Act that the Bishops dictated to them. Do you mean that it was urged by Lord Justice FitzGibbon and the Dean of St. Patrick's that before the Irish Church Act of 1869 the Bishops in any way dictated to Trinity College? I did not gather that?—No. The Statement I put is to be found on page 83*. "So important has it been regarded, both by Church and College, that the Divinity School should be carried on in co-operation," and so on. The first approach of the Bishops to the Board of Trinity College is represented as the climax of a long connection.

4020. That Act is really the first Church Act?—No. This is 1790. "So important has it been regarded both by Church and College that the Divinity School should be carried on in co-operation with the authorities of the Irish Church that so far back as 1790 the Board adopted as text-books works in Divinity recommended to them by the Irish Bishops, and for the last century it has been the general practice of the Bishops to require the production of the Divinity Testimonium from Irish candidates for Holy Orders." That is the first approach—not the last. It is the first approach of the Bishops to the Board of Trinity College, and what I wonder at here is that Lord Justice Fitzgibbon did not give you out of our Register the actual thing that occurred. I will read it to you if you will allow me. This is out of the College Register, April 9, 1790:—

"The following resolution was communicated to the Board:—Resolved—That we who have hereunto sub-

* Appendix to First Report (Cd. 8176) 1906, page 83.

scribed our names will not ordain any person who from his standing in Trinity College, Dublin, might have attended the Divinity Lectures read therein by the Assistant Divinity Lecturer, by the Divinity Lecturer, and by the Professor of Divinity respectively, who shall not produce a Testimonium under the College Seal certifying that he has attended at least one complete course of each of such lectures in Divinity as from his standing he might have attended." That is signed by only eleven out of twenty-two Bishops. That has not been mentioned by anybody. I have here another abstract dated May 24th, 1790. It is headed—"The following letter from his Grace the Archbishop of Cashel to the Provost," and the papers enclosed in it were read at the Board—

Stephen's Green,
21st May, 1790.

DEAR SIR,

Enclosed I have the honour to send to you a resolution of the Archbishops and Bishops, and by their desire I am to request you to be kind enough to use such means as you may think most effectual to have it made known to all persons of your University who shall in future be candidates for Holy Orders.

I am, dear sir,

Your faithful and humble servant,

C. CASHEL.

Right Hon. J. H. Hutchinson.

The following is a copy of the enclosed paper :—

May 1st, 1790.

At a meeting of the Archbishops and Bishops it was this day agreed that from Trinity Sunday, in the year 1791, they will examine all candidates for the respective Orders of Deacons and Priests in the following books :—

For Deacon's Orders.

Commentaries recommended.

For Priest's Orders. An addition to the above books "Ordered—That a copy of the above paper be forwarded to the Professor of Divinity, the Lecturer and his Assistants ; and that it be recommended to them to prepare the students in Divinity who attend their lectures in the books therein mentioned.

"Ordered—That the several Tutors be also furnished with copies of the said paper for the purpose of acquainting their pupils with its contents."

That is the first time that the Bishops ever communicated with Trinity College, Dublin, in regard to anything connected with Divinity teaching in it, and it simply meant here, as I would interpret it, your teaching of religion is so good that we will not ordain anybody that does not produce us a testimonial that he has attended at least one year's lectures. There is no dictation on the part of the Bishops. They did not send that in to the Board as men vested with authority over the Board and over the Divinity teaching.

4021. I did not understand that it was suggested that the Bishops had any autocratic powers over what you call the Divinity School. On the contrary, it was pointed out to us, I think, that the Professor of Divinity appears somewhat suddenly in the early stage of the College history, and from that time downward the appointment has been independent of the Bishops ?—Quite so.

4022. I did not gather there was any suggestion of the domination of the Bishops over the Divinity School ?—Of course, the point that this document is meant to show is, to justify the claim that the Bishops and Synod of the Church of Ireland now make on the funds at present spent on the Divinity School.

4023. The way I understood it was put was rather this, although I may be quite wrong—the Fawcett Act and the subsequent legislation introduced a new set of circumstances into the College. It is conceivable that hereafter the majority of the Fellows or of the Governing Body or of the Electing Board might be members of Churches or members of no Church or members of Churches other than the Irish Church, and it is desirable and reasonable that the Divinity School should be protected from falling into the hands of any other denomination by some arrangement, and that the Synod and Bishops of the Church of Ireland presented a body to whom you might have recourse for that purpose. That is the way I understand it ?—If they had started from Fawcett's Act in

1873 it would have saved any amount of trouble, but that is not what they do. They come to us and say—"We want a voice in the election of the Professors," and so on. We could meet them, and did offer to meet them, but they did not limit themselves to that. They said—"We are entitled to have £3,000 a year handed over to us, and this whole discussion culminated in Lord Belmore's Bill.

4024. That is quite true. Lord Belmore proposed it, and that view was not impressed upon us ?—That is where I do not think the matter has been placed before you.

4025. I do not think anybody has asked us to hand the Divinity School over to the Bishops of the Church of Ireland ?—No ; they have not now, but we should have been free from this troublesome preliminary investigation if they had started at 1873. I have been satisfied to start from that. They wanted to justify their claim to have this £3,000 a year set aside, segregated, as the late Lord Chancellor Ball said, from the funds of the College—that this particular sum should be put aside, and that it should in perpetuity be spent upon the Divinity School. That is what they claim now. But where I join issue with Lord Justice FitzGibbon is where he says they do not claim to have the Divinity School separated, which Lord Belmore's Bill did go for.

4026. I think we might leave Lord Belmore's Bill alone. For practical purposes what is now asked is that we should in some way or other protect the Divinity School and the funds which go to feed it from the contingency of falling into the hands of any other denomination ?—I am quite prepared to meet that.

4027. The Provost and Lord Justice FitzGibbon seemed to be agreed ?—That scheme of the Provost's is his own scheme ; I have nothing to do with it. He never consulted me about it.

4028. Do you object to that scheme ?—I would object to a considerable portion of it.

4029. LORD CHIEF BARON.—Do you wish the Divinity Faculty to be extinguished ?—No, certainly not.

4030. Or do you wish that Trinity College should in point of fact be a school of education for the Irish clergy ?—For the Irish clergy or any other person, whether he takes Orders or not—for any student of ours to be free to go to.

4031. CHAIRMAN.—That is the case now ?—That is the case now, but of course when I took up this particular point the thing was before you, and this was the basis on which they proceeded. They said—"It is no good saying 'Will you do this for us,' but 'We are entitled to it,' but I will pass over that.

4032. The practical question is, is it not, ought we to protect the Divinity School funds, so as to give the benefit of them to the Church that established them ?—Yes.

4033. LORD CHIEF BARON.—One of the witnesses was distinctly asked the question about their claims on these money funds, and the answer to it was—"We do not require that at all, provided that the Divinity School is retained ?"—Yes.

4034. CHAIRMAN.—That is the substance of the thing ?—Then this preliminary argument here on page 83 and so on is no use ? I quite agree with you.

4035. It is no use to test the premises if you agree to the conclusions ?—No. It is said the students pay the money that is spent upon them, but that is a principle I would not admit for a moment. I think it was said that a number of students practically pay the money spent on the Divinity School, but I would not consent to that principle at all, nor would any governing body of any institution submit to it. He says "The government of the School should be transferred," &c., "and that the annual sum at present expended on the Divinity School of Trinity College be secured for the permanent endowment of that School." I would not tie myself to any School. The present number in the School this term was ninety.

4036. But let us assume for a moment that the Roman Catholic body became dominant in the body, would they be electors of the Professors of the Protestant School ?—I do not agree with the Provost. I think I would propose a better Divinity Council than the Provost's.

4037. What is your proposal—that is really the practical question ?—My proposal is this—(1.) That the appointment of the Regius Professor, Archbishop King's Lecturer, the Professor of Biblical Greek, and the Professor of Ecclesiastical History be vested in a

Board of nine, consisting of the seven senior among the Fellows who are members of the Church of Ireland, together with two Bishops selected by the Bench of Bishops—the Provost, if a member of the Church of Ireland, to be one of the seven Fellows.

4038. Supposing there are not seven Fellows?—Of course, that is a contingency.

4039. Or suppose they are all Roman Catholics?—When it comes to that they will have no occasion for a Regius Professor of Divinity; we will be wiped out.

4040. Is that the whole of your scheme?—Oh, no.

4041. Will you just finish it then?—Certainly. (2.) That all the Lecturers be appointed by the Regius Professor and Archbishop King's Lecturer. (3.) That the regulation of the Courses and books remain, as at present at least practically, with the Regius Professor and Archbishop King's Lecturer. (4.) That any dispute in the matter of doctrine be left to the decision of the Archbishop of Dublin. (5.) That the annual sum to be expended on the Divinity School shall, as in the case of all the other Professorial Schools, be determined solely and altogether by the Provost and Senior Fellows, and that no portion of the funds of the College shall be segregated as "a permanent endowment" of this particular School. (6.) That inasmuch as the present salary of the Regius Professor (£1,200 a year) is fixed by Statute of 1814, it is desirable that the Provost and Senior Fellows be given power to vary this amount should circumstances so require it. (For instance, £1,000 a year might be considered sufficient, and £500 a year for Archbishop King's Lecturer.) That is a point I do not care about, but I think the Governing Body ought to have it in their power to do that, if the Divinity School dwindles down. The Regius Professor receives £1,212 a year under Statute, under Act of Parliament, and Archbishop King's Lecturer £700. The £700 a year that is payable to Archbishop King's Lecturer is simply by a decree of the Board in 1833. Archbishop King's Lecturer up to that time received about £46 or £50 a year—namely, the interest on £1,000 given by Archbishop King, but the Board increased that amount to £700; and I say the same power that granted that increase, if circumstances arose, might withdraw that grant of £650, and reduce it from £700 to £300 or £400 or whatever they thought right under the circumstances; but I think there should be freedom given to them to do that.

4042. LORD CHIEF BARON.—They have power to make a decree with the consent of the visitors?—It is a strange thing, but this decree has not the consent of the visitors. The consent of the visitors is not obtained for this decree; it is a decree by the Board simply.

4043. But assuming that there must be a decree, would it not be subject to alteration without prejudice to vested interests by a new decree made by the consent of the visitors?—I am sure it would.

4044. All you want is that that power should remain?—Yes, and that the salary at present fixed by Act of Parliament or the Statute of George III. should leave the Board free to deal with the £1,212.

4045. That is the Regius Professor?—Yes; the Regius Professor as distinguished from the other. One of the reasons why I have put No. (1) here is that I differ from Dr. Traill. I put the seven most Senior of the Fellows who are members of the Church of Ireland together with two Bishops. I do not put, as Dr. Traill does, the Regius Professor and Archbishop King's Lecturer on this Board, nor do I give the Lecturers the power of electing a member of it, and this is my reason. I say it is not desirable that Archbishop King's Lecturer should take part in the election of the Regius Professor, as he may himself naturally be a candidate for that post. This is an obvious thing that might happen. If the Regius Professorship was vacant, Archbishop King's Lecturer would naturally be looked upon as a candidate for the post. For instance, the present Regius Professorship will be vacant next June, because Dr. Gwynn has given us notice that he will retire next June, and the very case I contemplate would arise. It would be especially undesirable that Archbishop King's Lecturer should be one of the Electing Board simply because he will be a candidate, and I think the Electing Board should be perfectly independent of any candidate. With regard to the two Bishops that I have mentioned, I want to tell you what I know would be the feeling of the country, even though some people say

otherwise. I am satisfied after conversation I have had with clergymen and others that even though the seven members of the Divinity Board were laymen they would not object to them. The Bishops cannot object to them in fact. Bishop Crozier, whom you had before you, is a man I know very well, and I have often argued out this question with him. I was at the two Conferences that took place between the Bishops and the Board, and I said to Bishop Crozier—"Do you object to laymen?" He said—"Yes, I object to laymen," and I said to the Bishop in reply—"But who in the world elected you Bishop; you would not be Bishop if it were not for the laymen." The laymen are two to one in the election of Bishops. Even the Diocesan Board for incumbents consists of seven members, and four of them are laymen. Every clergyman in Ireland is appointed by a Board consisting of seven members, four of whom are laymen, and therefore the Bishops cannot object to laymen. We would constantly have a sprinkling of clergymen, too. The other point that was made, or which they suggested, was bringing up a Junior Fellow as member of the Board. That cannot be done under the Statute, and we said it was contrary to the Statute. When any election comes on you cannot say to a Senior Fellow—"Put your name in the Absence Book, and let so and so come up."

4046. I think we understand the proposal you make with regard to the Divinity School?—I would like to push this with regard to the electing of the Regius Professor. Take, for instance, the Regius Professor of Divinity at Cambridge. He is elected by the Council of the Senate.

4047. CHAIRMAN.—By the Council?—Yes; that is, a Council of sixteen and the Vice-Chancellor, and the members of the Council are not limited to men of any particular religion.

4048. I thought he was appointed by the Crown?

4049. DR. JACKSON.—No; I have been myself an elector?—On private foundations they may be elected by whomsoever the donor chooses to name, but speaking with all deference, I say that we are as safe a body as they are at Cambridge, and that we will do our duty.

4050. LORD CHIEF BARON.—I have no doubt you will so long as you are there?—I will.

4051. DR. JACKSON.—You must not assume that the Council of the Senate of Cambridge is admitted to be a good body for electing either the Regius Professor of Divinity or the Regius Professor of Greek?—If you had stopped at the Regius Professor of Divinity I had my answer ready for you, but you have puzzled me by including the Regius Professor of Greek. Limiting myself to the Regius Professor of Divinity, what I have heard from Cambridge men is that the other Boards who had the opportunity of electing Dr. Swete made a mistake in passing him over, and that the Council, who were composed of laymen and men of any religion, made the best selection.

4052. LORD CHIEF BARON.—I have no doubt the best selection was made in the election of the Professor of Greek?—That goes without saying; I would not question that. I was present at the two interviews.

4053. CHAIRMAN.—I think we need not go into this?—It is merely a question as regards the present position of the Board with regard to the election of the Divinity Professor. I asked the Bishops, "Do you object to any appointment of any Professor or any Lecturer, or any book or any course that has been appointed by the present Board?" and they all said "No." Then I asked them the next question, "Certain changes have been made in the course. Book A has been put out, and Book B has been put in its place. Exception has been taken to the putting out of Book A and the putting in of Book B; do you object to that change?" They said, "We do not." I said to them afterwards, at the second interview, "I object strongly to that change; I think it was a most improper change to make. I would leave in the old book and put in the new book, because there happen to be two Schools at present in existence—what was called the old Orthodox School of Divinity and the present Higher Criticism School—and I say our students ought to know both sides of the question; they should not be limited to the modern side and be left in perfect ignorance of the other side." The next point here, in regard to which Lord Justice FitzGibbon took a little shot at us, was that in one of these divisions, the four clergymen on the Board, voted

against the Bishops, and the four laymen voted for the Bishops, and he said that no doubt the clergymen thought they were far better theologians than the Bishops.

4054. Is it any use to argue against a joke?—It brings in a point that was at issue at that time, which was this—that we should consult with the Archbishop or with two or three Bishops; that the Bishops should have a small Committee; and that the Board, before proceeding to the election, should consult them. I would object to that altogether, and I put my views forward. I said, "If you compel us to consult this Committee of Bishops it practically drives us to elect the men they name, and I, as an elector, will not be tied by anybody; I will form my own judgment, and I will leave no stone unturned to arrive at a proper and a right conclusion. I will go to the Archbishop of Dublin, or any other Bishop. But if you say I am bound to consult him it is equivalent to saying I am bound to follow his decision. What I propose is that two Bishops should be elected, with the seven Fellows, and, therefore, they will vote on an equality with us. They would keep us straight if there was anything they objected to, and we would listen to them with the greatest possible respect." They would not have the power then of practically having the whole election in their hands. I consider that is a fairer solution than Dr. Traill's proposal of leaving the whole thing in the hands of the Bishops or the Divinity men. Lord Justice FitzGibbon, shrewd man as he is—he will not look a gift horse in the mouth—sees that he gets a great deal more than ever he expected to get in Dr. Traill's proposal, but I would not agree to that proposal at all.

4055. We quite follow your proposal?—I am afraid I have quite tired the whole Commission out.

4056. Not at all. Have you really said in substance all that you desire to say?—I think I have said most of it.

4057. Dr. JACKSON.—I should like to ask a few questions with regard to the fees. I think you said that £43 6s. go to the *cista communis*, and £39 18s. to the tutors. How is the money paid to the *cista communis*?—It goes into the general funds of the College.

4058. In fact that would correspond to our College dues, in all probability, as opposed to our payment to the Tuition Fund?—Yes, exactly. What goes to the tutors may be called the Tuition Fund, but the other is not; it goes to the General Fund, where the rents go to.

4059. Do many of your students reside for four years?—A great many do.

4060. And a fair number for three years only?—Yes, and several not so long. There was one question which I was very anxious to say a word about, hostels. Dr. Bernard brought it forward. He was very anxious that we should have in Dublin hostels for students. I will not go into the question of hostels for the ladies, but for the men students I should object altogether to hostels being started in Dublin, and I will tell you why. In Oxford and Cambridge, University towns, where the whole place is under their control, it is a different thing. Trinity College, Dublin, is in the middle of a big city, which is not under our control—we have no control except within our walls. If you were to put a number of students into a single large building, or two or three large buildings, somewhat removed from the College, you would do two things. In the first place, you would render it exceedingly difficult to maintain discipline. Everything connected with a row between the College and the people, between gown and town, arises from the students being crowded together. At the present time those sort of things will never arise inside the walls, where we have proper control; but if you put a hundred or two hundred students into hostels, where you practically have no control over them, that would not be so. Therefore, I object to that suggestion. Another point is this. He was very anxious to have a hostel for a certain class of students who are not very well off. I would object to that also. He brought before the Board a proposition that the Divinity students were men of limited means, and that it would be desirable we should have hostels, where they could live cheaply. That would be at once advertising a man's poverty, and I would disapprove altogether of putting a label of any kind upon a student. We are the most democratic people in the world, and so are our students, and I think it would be exceedingly unfair that men, because they

were Divinity students, should be put into a particular residence, and, therefore, advertised as poor men. With regard to the general body of students, owing to the various means of locomotion which now exist between the suburbs and the city, every student can graduate his lodgings according to his means. I should be very sorry to put any pressure on a student; I would not do anything that would in the slightest degree interfere with his freedom of choice.

4061. Your answer is very interesting, but it does not exactly touch upon anything which I was asking you. I understand that it is a parenthesis. Do those who go away in three years pay full tutorial fees in the fourth year?—They pay the same fees; there is no difference made.

4062. Do not you think that it would be a good way of saving money to the poor man, if he were to be excused payment during the fourth year?—That is equivalent to actually reducing our number of years from four to three. I would beg to make this remark as regards poor men. There is a good deal of help given to poor men in a way that the outside public do not know. Every tutor is entitled to remit the tutorial fees to four per cent. of his pupils, and in that way a great many students get through College on non-tuition fees—eight guineas per year instead of sixteen. A very large number get that privilege. It is quite independent of sizarships; it is a thing privately done by the tutors. About £400 is given in help to students annually; that is a thing which is not generally known.

4063. In the next place, I want to ask you a question about University and College. I note that you regard the College as a Corporation and the University as not a Corporation. I wish to suggest to you that the University ought to be a Corporation, although, as I think you clearly showed, it practically is not treated as such. Am I right in thinking that the College was to be the *Mater Universitatis*, and does not that mean that the College Corporation was to originate a University Corporation?—It is a very moot question to know what the meaning of that expression is. Many take that simply to mean that the College, in commencing the world, would commence by teaching students to qualify them for getting degrees. They would have passed through a certain curriculum, and the College itself was empowered to give them their degrees and to name the Vice-Chancellor. But, as you ask me whether I thought we ought to change, and that the University should be a Corporation, I am old-fashioned enough, or Tory enough, to say that I would make no change. I consider it is one of our little oddities that we are bound to keep, and I would not like to lose our touch or connection with antiquity by giving it up.

4064. In the next place, you said something about chapels, and you gave some statistics with regard to the cost of chapels at Cambridge, £8,000 a year?—Yes.

4065. You then went on to say for how many undergraduates these chapels were kept up. What was the number that you mentioned?—Three thousand.

4066. I thought you said three hundred?—No, three thousand.

4067. LORD CHIEF BARON.—He did say three hundred.

4068. Dr. JACKSON.—I thought that it was a slip of the tongue, and I was anxious to get it corrected?—I will tell you where I took that figure from. I did not take the trouble to calculate it out; I took it out of a number of articles signed "Sigma," that appeared in the *Westminster Gazette*.

4069. Sir THOMAS RALEIGH.—I think it would be only fair to bring it out that the Chapel of an ordinary College does not cost so much at Oxford and Cambridge, and that you get your large figure by including certain Chapels where they have large and expensive choirs?—That is so. We maintain a choir similarly here, and our Chapel costs a good deal of money for that reason that we are on a par with the two big Cathedrals in our choir.

4070. My College Chapel costs £120 a year?—Is that so?

4071. Dr. JACKSON.—Are you aware that attendance at our Chapels is sometimes optional?—At Cambridge?

LONDON.

Nov. 10, 1906.

The Rev. T.
T. Gray, M.A.,
S.F.T.C.D.

LONDON.

Nov. 10, 1906.

The Rev. T.
T. Gray, M.A.,
S. J. T. C. D.

4072. Yes ?—I know the question of attending Chapels has been discussed with us for many years back—for instance, ever since Fawcett's Bill. We found it was a very thorny question at Cambridge to know what to do, and that we were going to the very same trouble that they were. I do not know whether we have solved it yet.

4073. I only asked you, Are you aware that at some Colleges attendance at Chapel is optional ?—I was in general aware of that.

4074. Are you aware that the maintenance of our Chapels is compulsory by Act of Parliament ?—No ; I was not aware of that.

4075. I think it is quite clear according to the Test Act of 1671 ?—Yes.

4076. Then you praised your existing Fellowship system on grounds with which I could partly sympathise, and about which I partly had doubts. We at Cambridge have long known the learning, and the width of attainment, and the force, of your great College, and you appeal, and rightly, to the excellence of the existing Society. I am not saying one word against it ; but as it not possible that you ought to have, within the limits of your Society, persons representing studies which at present cannot be represented in the Corporation ? I mean that you elect your Fellows by examination only, and that the subjects of the examination are limited. You cannot then possibly have in the College-family representatives of certain new studies which are not included in your list ?—I would meet that by extending the number of subjects. Let the best experts possible lay down the relative worth of these various subjects. We have ourselves made a rough approximation to it, and I would leave all those subjects there, and let the best men win.

4077. On the examination system ?—Yes ; on the examination system.

4078. You would not care to see your Corporation have the power of electing representatives of these subjects on performance as opposed to competitive examinations ?—As we are at present circumstanced I would not. Of course, if we had a large number of Fellowships, as you have at Cambridge, it would be another matter ; but the Fellowship with us is a life Fellowship, and makes the man a member of the Corporation, and we cannot have everything one would wish for. Those men would get Professorships, and I would be very glad to see a Professor after a number of years, such as a man like Dr. Dowden, made Honorary Fellows, but I would draw the line. I would stand strong on the present lines of the Corporation.

4079. You mentioned two distinguished Professors of yours of whom we at Cambridge have robbed you, and you mentioned one of your Professors of whom Edinburgh has robbed you ; do not you think that you might have kept those distinguished people, if you had had the power of electing them to the Corporation ? Perhaps I ought not to press that, because it becomes personal ; but I want to suggest that we at Cambridge were able to get two distinguished men of science from you, largely because we had the power of making them Fellows of Colleges as well as Professors in the University ?—Of course, when you run the thing home it becomes a matter of pounds, shillings, and pence. Dr. Cunningham went to Edinburgh at £1,700 or £1,800 a year, and we could not have given him anything like that. There is no man in our University gets a salary like that, except the Provost.

4080. One word about finance. You consider that there is a great advantage in putting finance into the hands of the Senior men. I should have thought that finance, like other things, wanted aptitude and experience ; I should have thought that in finance, above everything, you wanted a trained imagination, and that if you could get a good man to be Bursar, it would be worth your while to keep him, and that a man who has been spending his life until he is sixty or upwards in study would probably not be a good man to take up the financial control of the property of a great College ?—Wherever we come across a man such as you describe, a man whose whole delight was in finance, he will generally hold the office of Bursar for a considerable time. Dr. Carson was such a man.

4081. He would only become Bursar when he was quite old ?—He became Bursar in 1866. His age would be about 46 at that time.

4082. But at the present time attainment of the grade of Senior Fellow comes a great deal later than it did then ?—No doubt ; but taking Dr. Carson's case, I think he was Bursar for twelve years altogether. First of all he was Bursar for four years, and afterwards he was Bursar for eight years. Dr. Stubbs was Bursar for eleven years.

4083. You are quoting from an earlier time—when people became Senior Fellows much sooner than they do nowadays ?—Yes. Mr. Barlow became a Senior Fellow in 1892 or 1893, and he was five years Bursar. I became a Senior Fellow in 1898, and I was four years Bursar, and after my four years Dr. Traill, the present Provost, became Bursar. Mr. Barlow is a man who was trained in accounts originally, and he was quite at home in regard to them ; and the reason they chose me was because I had a knowledge of the country, and how to deal with lands and tenants, and things of that sort.

4084. I should like to get down one or two hard facts in regard to the audit and the duties of the Board. May I ask whether, within your knowledge of the College, there has ever been any declaration of secrecy about the doings of the Board ?—No.

4085. I ask that question because I believe that before the year 1858, at the Cambridge College the Seniors took an oath of secrecy ?—There never has been anything of that kind here. I know that a great number of years ago there was a sort of suggestion that what took place at the Board was not to be talked of in public, but not for the last forty or fifty years at any rate. There was never anything like an oath or anything of that kind.

4086. May I ask you whether the minutes of the Board are circulated to the Society as a whole ?—No.

4087. I asked that question because at the Cambridge College at the present time the minutes of the Council are typed, and sent round to any of the Fellows who care to have them, and most of the Fellows in residence do care to have them ?—The minutes of our Board are not typed ; they are simply entered in the Register, and then signed the following week when they are read over. They are not sent round to anybody, but if there is any Fellow who is concerned about anything, or is interested in some matter, he can see all that happens.

4088. Am I right in understanding that the accounts are not published, and that the Fellows are not told that they are entitled to see the accounts, but that if, as a matter of fact, any Fellow were, out of curiosity, to volunteer the question, the answer would be—"Oh, certainly" ?—Certainly ; he knows he is entitled to that.

4089. Does he know that ?—He does. It is in the Statute, page 183 of the Second Volume. He is entitled to know.

4090. Then you spoke about the duplication of posts on religious grounds. I perceive that when you are speaking about the Divinity School you recognise the importance of keeping it in connection with the existing Trinity College. Might not posts which represented the religious teaching of a particular denomination be associated with the other College ? If there were to be a second College of the University of Dublin, would not it be natural that the Roman Catholic authority should be represented, not in the University, but in connection with the other College, in the same way in which you are suggesting that the Divinity School of the Church of Ireland should remain connected with Trinity College ?—If you would excuse me saying it, I have not gone into the question of what would be done in the case of a second College.

4091. In regard to what you said about the Fellowships at Oxford and Cambridge, I quite recognise that the analogy must not be pressed too far, because with us the elections come early, and the election is, in the first instance, to a prize tenure which does not carry duties ; but may I suggest to you that, after the end of the six years' prize tenure, the analogy between the Fellowship at Oxford and Cambridge and the Fellowship here is quite real ? When once the Cambridge Fellowship ceases to be held as a prize, and is held really as part-payment for work done, together with a stipend, does it not resemble the Fellowship as it is with you ?—I would have to look closely into that question to see the bearing of it.

4092. I do not want to found any argument upon it—I only want to suggest that you are taking the prize tenure of our Fellowship, and setting it against

the professional tenure of yours. I suggest that there is a professional tenure of our Fellowship which comes afterwards, and that you are thinking only of our prize tenure. Perhaps the question is too complicated?—Yes. One should be very familiar with such a question before answering it.

4093. You see you have plunged into my province, and I thought that you might make some reply to such a question?—Yes, but I only touched the surface, though.

4094. Now, a word about the Professors. I think I understand that you regard them as harmless necessary officials who are not entitled to fixity of tenure, who are to be consulted on suffrance, but who are to have no rights in deliberation?—They have rights in deliberation in connection with any particular point that arises. For instance, if there is a case connected, say, with the Law School, the Committee of the Board would meet the Professors of Law and discuss the question with them; and the same in the Medical School. We have never had any difficulty or friction whatever.

4095. I do not want to suggest that. It seems to me that there could not be any friction between the Professors and the Board, because the Professors have no power?—I should hardly give that as the reason. The Professors—and I have been acquainted with them for a great many years—never take that view about it, that they would, as it were, resent, and withhold their opinion.

4096. Would it be possible for them to resent, if they wanted to?—There is nothing to prevent them. We are a perfectly free body.

4097. You think that the relations between the Board and the Professors have been harmonious and good in the past?—I do.

4098. For instance, I thought that MacCartney, the anatomist, had serious differences with the Board, but that is going back?—People who lived a century ago did not act as we do now.

4099. Mr. KELLEHER.—They were a young Board then?—Yes, and more inclined for fighting.

4100. Dr. JACKSON.—You think that the relations are thoroughly good at present?—Yes, even though they appear sore and express themselves strongly.

4101. They do speak strongly?—Yes.

4102. And it is quite plain from that statement that they feel that they have no status and no rights?—No doubt.

4103. You think, I understand, that that is the right position for the Professors?—Constituted as Trinity College is, there can be no other position.

4104. But what we are considering is whether the present constitution of Trinity College is exactly what it ought to be in view of the requirements of the modern time; and I want to suggest to you that, in consequence of the growth of knowledge and the diversity of studies, an arrangement which may have been perfectly good in the past may not be as good now-a-days. Trinity College appears to me to have represented admirably the old studies which, when I first knew Cambridge, were almost alone in being represented there; but with the growth of knowledge and the increasing diversity of study, is it not necessary that the Professors should hold a more prominent place in the College?—In that case, that is giving them some status and making them members of the Corporation. I would bring them in by extending the subjects for the Fellowship examination, and let them win their places.

4105. You think that the subjects should be represented in the examination way, and in the examination way only?—I think so.

4106. You would not care to see the Board enjoy the power of electing persons whom they desire to make Professors, or persons who were already Professors?—There is always a difficulty in electing on any other system, certainly with us, than competitive examination, such, for instance as what Dr. Salmon said,—that there is an amount of canvassing, vote collecting, and influence brought to bear, and so on. I would resist in every possible way the possibility of any undue influence being brought to bear. We may, perhaps, not gain everything by the competitive system, but we certainly, I think, gain the most important points.

4107. I should like to ask you just one more question. Commenting on the evidence of Dean Bernard, you suggested that his criticism of the tutorial lectures might have been brought by him before the Council?—Yes.

4108. And I think that in regard to his statement about the number of examinations, you thought, in like manner, that the Council would be the proper body for him to address himself to?—Either the Council or the Board.

4109. The Council is, then, in your opinion, an exceedingly valuable and important body in all matters educational?—It is.

4110. I am asking this question because it certainly seems to me that, in some respects, your Council might, with advantage, have more substantial powers, and that it might be in some respects independent of the Governing Body of the College, the Governing Body taking matters which were not educational. Has it ever occurred to you that there might be a division of labour in that way, and that it would thus be possible for the Professors to be represented on the Council and to get a better status, a better representation of their studies, than they can have now, when they have practically to apply through the Council to the Governing Body?—That is in regard to matters connected with the education of the different schools?

4111. I am thinking only of matters educational?—In anything connected with education the Professors have fully as much power on the Council as I, for instance, have on the Board.

4112. Dr. DOUGLAS HYDE.—You explained to us very succinctly the difference between the internal and the external auditor, but I do not understand how the external auditor, who is an officer of the Bank of Ireland, could do that enormous amount of auditing, £70,000 worth, for, I think £60 per year as a salary?—That is the salary, but you must remember he does it in after hours. These men are experts in the matter of accounts. I often thought myself it was a small salary because they take an immense amount of trouble, but the amount was fixed by decree.

4113. The Board is quite satisfied with the auditing, is it?—Yes, quite satisfied. Even down to small matters, such as for instance the script of money invested in any particular stock the auditor asks for it. He goes through every account.

4114. Do you agree with the Provost that the Synod of the Church body should pay over a sum of money to Trinity College provided they get certain representation in the appointment of the Divinity Professors?—No, I do not go in for that at all. The Provost was always anxious for what he called himself a pound for a pound principle—that “If we give you £1, you will give us £1.” I do not agree with that system.

4115. You would make no such claim?—I would make no such claim upon the Church body. I may mention this fact with regard to the Church body, that some twenty-five years ago when this discussion between the Synod and us was pretty warm they did put aside a sum of £50,000 to accumulate for the purpose of founding a Divinity School outside Trinity College. Neither Dr. Bernard nor Lord Justice FitzGibbon mentioned that sum of £50,000, which is at present in existence.

4116. CHAIRMAN.—I do not think we need go into that?—That is what the Provost was driving at in wanting to get £1 for a £1.

4117. Dr. DOUGLAS HYDE.—Do you agree with the Vice-Provost when he said in the evidence that was handed in that the most important function of the University of Dublin is the higher education of the upper and middle classes? That was his idea of the function of Trinity College or the University of Dublin. You, I see, would like to broaden it by lowering fees so as to take in a larger percentage of the population?—I would. We have established a school for agriculture now. That is coming, I suppose, to what you have in your mind. I would extend it so far as the money would allow us to go.

4118. You think Trinity College ought to fulfil a different function from that of merely educating the sons of the upper and middle classes?—The style of education in Trinity College must be kept up to what we call higher education, than what you appear to me to be driving at. You are talking, are you not, rather broadly about education—education in what we call a large industrial school, that is, where men are taught trades and things of that kind.

The Rev. T.
T. Gray, M.A.,
S.F.T.C.D.

4119. To a certain extent I think the Vice-Provost meant that Trinity College gave a good education in the Arts to the children of the upper and higher classes, but you would like to extend the functions of Trinity College so as to draw into the Art schools a number of people, probably from a class lower than it at present draws its students from?—Provided that class were capable of entering on our present entrance course. I do not care what the class is or who they are, provided they are able to answer and satisfy us that they are fit to enter and go on and get their degree according to our present curriculum.

4120. How do you account for the fact that the upper classes are not frequenting Trinity College at present?—There are a great many reasons for that. A great many people have begun to think that everything in England is very much superior to everything in Ireland. They like to say that they have been educated in England instead of in Ireland. But that was not so in my father's time, but of course the facilities for travel at the present moment are greater than they were then. You can get to England and London in a few hours, whereas I have heard my father say that he was a fortnight at sea in crossing from Ireland to England in a sailing vessel.

4121. Supposing that the ban were removed altogether, and that Roman Catholics entered into Trinity College as freely as Protestants, you would probably double the numbers of students, would you not, and in a year or two how would you accommodate such a number. Could you accommodate them?—As soon as they come we will make room for them.

4122. Can the College expand inside as a resident College?—We have plenty of ground still in our possession.

4123. You think you could expand?—I do, I am not in the least afraid of that. Let them come and try us, and never you fear we will welcome them.

4124. You do not think there is any ground for asking for an additional University in Ireland?—I do not think you want another University in Ireland except a University that will train farming classes in their own particular class of farming, but if you are only dealing with University teaching, I do not think there should be another University. If you have observed, my evidence comes to this, that Protestants and Catholics should be mixed together while they are young, and knock off the corners. We find, when they come to us, that they say, "This is not the sort of place I thought it was." They don't care whether a man is a Roman Catholic or not. What they ask is, "Will that fellow be in the fifteen at football, or will he be in the cricket eleven, or will he be in the boats?" That is what they think of. They never think once as to whether he goes to Church or Chapel on Sunday.

4125. But, supposing for some reason or other we cannot get the Roman Catholics to enter Trinity College, would you object to seeing them provided with a University?—I decline to answer any question that would go to upset what I believe is the right solution of the University question, and that tends not only to the good of education, but to the welfare, peace, and comfort of the country. What I suggest in that printed paper that you last got from me is as much meant to promote the prosperity of Ireland as anything else.

4126. Dr. Coffey.—You made a comment on Dean Bernard's paper in connection with the Moderatorship in Celtic Literature, but you said nothing in regard to the words which follow, that "the entire separation of the Professorship of Irish from the Divinity School are measures which ought to be taken in hand." Do you approve of that suggestion of Dean Bernard's?—I do not consider that the Professorship of Irish at the present moment is attached to the Divinity School.

4127. I wondered that you did not draw attention to it?—I was hurrying my evidence, but I am glad you called attention to it. I do not consider that the Professorship of Irish is attached to the Divinity School. There are certain Professorships that were founded specially; these are private endowments.

4128. CHAIRMAN.—We had the deed before us the other day?—That would show you it. I would widen it as far as possible.

4129. Dr. Coffey.—In reference to some of the figures you gave from the Intermediate returns, you pointed out that the numbers in the Senior Grade would average 277 in one year, and cal-

culating the proportion of Protestants in the schools as one-third, I think you drew the inference then that the remainder, 186, presumably Catholics, was a standard by which one could judge of the number of Catholics who were prepared to enter the University. Am I right in thinking that was your inference?—No. The reason I produced that was in order to answer the population argument which is put forward by Cardinal Logue and also by Mr. Fottrell, in which Mr. Fottrell said that instead of twenty-four Roman Catholics entering each year there ought to be 1,400. I say: where are the 1,400 to come from? That is all I used it for, to answer this sort of population argument, which most people swallow at once the moment it is mentioned.

4130. You utilised the number of Catholics who passed in the Senior Grade as a point in reference to the numbers who are available for University education?—He thought it was important to take the number of the Middle Grade, which I gave you also.

4131. If you take the number of Protestants in the Senior Grade, 90, and you compare that with the number who enter Trinity College for the same year, the average number of the latter would be 200?—How do you make it 200?

4132. You have given us the number of entries into Trinity College for one year as 249, and for the previous year as 266. Calculating the percentage of Episcopalians in the 249 or 266, it would be something like 200?—That is in the Senior Grade. I took 277, and I took a third of that.

4133. That would be something near 90?—Yes.

4134. If you base the argument from the Catholic point of view on the numbers who pass the Senior Grade and the Intermediate, should not it also apply as regards the Protestant?—Not necessarily.

4135. Why?—Because if you take the population, that is, 3,400,000, of Roman Catholics in the country, then those men are all in the country. Most of our Irishmen, those who have been at school in England, for instance, would probably not have been in for the Intermediate at all. Mine is an argument *ad hominem*.

4136. So that the Intermediate is a test with regard to the Catholics but is not a test with regard to the Protestants?—I do not care with regard to the Protestants, but I say it is a full test with regard to the Roman Catholics. Of course, there are Roman Catholics who go to Oxford and Cambridge who would come to us if the ban was not on us.

4137. You spoke of 1,400 students entering the University every year—where did you get that figure from?—That is in Mr. Fottrell's pamphlet. I took these figures from Mr. Fottrell. He said: Here is the population, non-Catholic and Catholic, and the numbers entering Trinity College, and it is a rule-of-three.

4138. But a safer guide would be, would it not, the actual numbers who are going through the Royal University?—No; I do not think the Royal University is the same standard as ours.

4139. But as to the number of Catholics seeking a degree at present, whatever their object?—Seeking a degree in the Royal, but not in Trinity.

4140. Taking those who come to the Royal University as a test of the number of Catholics who seek a degree, that would be a surer guide to work upon than the 1,400 suggested by Mr. Fottrell?—He only took it as a rule-of-three.

4141. In the statement of the Catholic Bishops, they point to the numbers going through Royal University in 1905 as 3,774 students; that means for the three or four years which have to be spent?—You have to take one thing into consideration—that the man in the Royal University gets his degree for £3.

4142. But even that number, extending over three or four years, includes 50 per cent. of Protestants?—I daresay there are a great many Protestants among them; but the distinction between the numbers of the Royal University compared with us is a distinction based not upon education, but upon the cheapness of the two institutions. A Trinity College degree costs £83 4s., and the degree of the Royal costs about £3 4s. There is £80 difference between them, and that is what makes the distinction.

4143. So far as we can rely upon numbers, which are known by Returns, the actual number of Catholics who seek any kind of University degree is nothing like 1,400 per year?—I am only taking Mr. Fottrell's figure.

4144. With reference to the question of fees, you concluded your paper with a very strong appeal to the sentiment that Trinity College must have regard

to Ireland. Has it occurred to you, in the case of the capital city of the country, that a standard which we might look to for University fees, and of what we might expect in the matter of University education, is to be found, say, in the case of the University of Edinburgh or the University of Glasgow, in towns very much bigger and with populations at least as wealthy as our populations?—I decline to make a comparison between Scotch Colleges and us. There is a number of conditions that have to be taken into account when you come to compare the Scotch Universities and the Scotch with Irish Universities and the Irish. You cannot isolate one particular place and make a comparison.

4145. But is there no reason for the existence of such Universities in the Scotch capitals?—The education there costs practically only a trifle.

4146. Do you think it objectionable then that, on the part of many Irish people, whether Catholics or not, they look for a less expensive education than is offered at Trinity College?—No doubt a great number of Protestants go to the Royal for that reason to qualify for posts. They take the Medical Schools, and so on, because they are accepted as qualifications;

and those Protestants who cannot afford the other will go there.

4147. Do you think that the small reduction in the entrance fee you have suggested, with the foundation of certain exhibitions for clever boys, would in any way compensate for the cheaper system of University education which is available in other large towns of the Empire?—Of course it would be but a small reduction, and it would not approach the cheapness of Glasgow or Edinburgh, or the Royal, but it would be a move in the right direction. Supposing we reduced the entrance fee from £15 to £10, and found it to succeed in such a way that you could have no doubt but that it was the reduction of the fee that brought the men to you, I would reduce the fee then to £5, or even lower still, if we got the men in. I do not say that that simple reduction would do everything, but you would get the pick of the men, men who were just able to enter, but to whom it was a great pinch to pay the entrance fee, and if you relieved them there a great many would come if you made that difference. If they were smart young fellows they might get an exhibition, which would pay all their fees.

The Witness withdrew.

LONDON.

Nov. 10, 1906.

The Rev. T. T. Gray, M.A., S.P.T.C.D.

Miss H. M. WHITE, LL.D., Lady Principal, Alexandra College, Dublin, called in and examined.

4148. CHAIRMAN.—You have been good enough to lay before us two papers,* both dealing practically with the same subject?—Yes.

4149. We should like to hear from you further anything you wish to address to us upon the points?—Might I just make a short statement?

4150. If you please. First, of course, we all know that you are the Principal of Alexandra College, Dublin?—Yes.

4151. You have been so for many years?—For about sixteen years.

4152. Before that I believe you were at Cambridge?—Yes, at Newnham. I should like to emphasise the claims of Alexandra College to recognition. It is in no sense a school, as is shown by the fact that under no circumstances can a girl be admitted to Alexandra College under fifteen, and that girls up to sixteen are educated at Alexandra School, which is under the same Governing Body, but whose buildings are entirely separate from those of the College. I should like to lay before the Commission the following statistics of the ages of students of Alexandra College. There are at present in the College only five students under sixteen years, between sixteen and eighteen, thirty-six per cent., and over eighteen years, sixty-four per cent.. Alexandra College has always carried on for women a work parallel to that done for men by Trinity College, and its age limits are, for practical purposes, similar to those which obtain in Trinity College. Students have been prepared at Alexandra College for the highest examinations (without instruction from any outside source), including the M.A. Degree, Royal University, Ireland, at which examination studentships have been gained several times by our students. Even in Mathematics, a field in which women do not usually excel, several students, prepared entirely at Alexandra College, have won high honours and exhibitions in the Royal University, Ireland, Degree Course. Five of our students have been at different times appointed examiners in the Royal University, Ireland (Mrs. Dixon, Mrs. Thompson, Miss Story, Miss Scott, Miss Hayden). A considerable amount of work done by Alexandra College is carried out on University extension lines, such as the Hermione lectures on Art, which are held each autumn in College. They are at present being given by Professor Hubert Von Herkomer, and among the Hermione lecturers I may mention Sir W. B. Richmond, Dr. Flinders Petrie, Mr. Roger Fry, Miss Jane Harrison, Mr. D. S. McCall and Mr. George Clausen, and many other distinguished artists and art critics. The Margaret Stokes Lectures are given on Irish Archaeology each Lent Term. The courses of additional lectures arranged for the current session are:—"Some Modern Views on the Nature of Mind," by Miss Oldham; "History of Civilisation," by Miss Oldham; "Geology," by Professor J. Joly; "Socialism," by Professor Bastable; "Hygiene," by Dr. K. Maguire. Our ordinary courses of lectures include these on German Literature by Professor Selss; Eng-

lish Literature, by Mr. Price; European History, by Professor Wardell; French Literature, by Miss Story, M.A., and Miss Shillington, B.A. Each autumn, courses of lectures on educational subjects have been held and have been attended by educationists from all parts of Ireland. I may mention among the lecturers, Professor M'Kinder, Head of the London School of Economics; Professor Adams, Principal of the London Day Training College; Mr. M. W. Keating, Reader in Education in Oxford; Mr. Von Glehn. A special Science Conference was held in 1902, in which Professor H. A. Armstrong, F.R.S.; Dr. Kimmins, Professor J. Emerson Reynolds, Professor C. B. Howes, F.R.S.; Professor Joly, Monsignor Molloy, and Mr. R. Blair took part. In connection with the College there is a Literary Society, whose object is to provide a further means of culture and study for past students. This Society organised a Shakespeare Class, established and presided over for many years by the late Lady Ferguson; a History of Art Class, Church History Class, Social Science Class, Modern English Poetry Class, Browning Class, and Irish Archaeology Class. I have brought a Report of the Literary Society in case the Commission may care to see it. Several courses of lectures by eminent men have been given under the auspices of the Society. The Guild—a body of past students, now numbering over 700 members—founded in 1897, has for its aim the formation of a bond between past and present students, and to encourage the undertaking of social and philanthropic work by them. The Guild now owns seven tenement houses, which are worked on Miss Octavia Hill's lines and in connection with which play rooms, libraries, and various clubs have been established for the bettering of the tenants' lives. The scheme of annuities for old ladies has also been inaugurated by the Guild, and fourteen annuities are now given. A Club for Factory Girls is also worked by the Guild. From the foundation of the College the aim of its founders has ever been that it should take University rank, see statement sent by the Rev. R. P. Graves, Vice-Warden of Alexandra College, to the Commissioners of Educational Endowments, 1886. Dr. Graves was the brother of the Bishop of Limerick and author of the *Life of Rowan Hamilton*. Dr. Graves wrote as follows:—"I must refer to the root-notion, the *idée mère*, of Alexandra College, what was in the minds of its originators, was, not to found a superior school for young ladies, but to give to the women of the upper and middle classes the means of prosecuting after the ordinary school years, studies in various departments, of science and literature, by which their talents might receive full development, and by which they might be fitted to impart to others instruction of a higher and better tested description than had been previously attainable. To raise the intellectual status of the sex in Ireland was the prime object of the Institution." See also pamphlet from Dr. R. P. Graves, entitled "Suggestions on the subject of University Degrees for Women," page 7, in which he strongly urges the affiliation of Alexandra College and deprecates the holding of mixed classes in Trinity

Miss H. M. White, LL.D.

* See page 403; also Appendix to First Report (Cd. 8176), 1906, page 134.

LONDON.
 Nov. 10, 1906.
 Miss H. M.
 White, LL.D.

College. Dr. Graves was from its earliest days Vice-Principal of Alexandra College, and had special opportunities for being acquainted with the character of the work done by the College, as he devoted a large part of his time and thought to its interests. These facts surely establish, beyond dispute, the view that all along its career Alexandra College has been not merely an educational establishment, but has also been a centre of culture and widespread influence. These points prove beyond contention the character and standing of Alexandra College, and the admirable work done in the past, and show how unjust it would be if a movement to advance the higher education of women should injure the position of the College which has done the pioneer work. Such injury could not fail to react on the whole cause of women's education in Ireland.

4153. I suppose the way in which the recent movement in Trinity College has affected you has been by drawing off a number of students from attending your lectures to attending lectures in Trinity College?—Precisely.

4154. I rather gather that the way you wish to counteract the injurious effect on Alexandra College is by asking for recognition of at least some of the lectures in your College?—Yes. We hold that it might perhaps be possible for us to be put in a position somewhat analogous to Bedford College in the University of London, or King's College. Those Colleges are recognised as schools of the University of London, and we hope some similar kind of recognition might be extended to us.

4155. Do you think there are many people in Dublin who would prefer to have the education of girls confined to women's Colleges?—I think there are a good number. I have appended to my Statement a letter from Mrs. G. F. Fitzgerald giving expression to this opinion, and I have also with me a letter from a mother whose daughter was one of the distinguished earlier students, in Trinity College. In this letter the lady says:—"Being the mother of one of the first girls who entered Trinity College, Dublin, I have had some opportunity of comparing the life of a girl there and in Alexandra College, Dublin, where my daughter had previously been, and in which she was so successfully prepared for the examinations in the Royal University, Ireland, and in Trinity College, Dublin. I have no hesitation in saying that in my opinion the life for girls at Alexandra College, Dublin, is infinitely to be preferred if one has their best interests at heart, and wishes them to be noble and attractive women, not poor copies of men. The tone of the two places is so different, and though Trinity has tried to improve matters since women were admitted, there is not sufficient accommodation available to give girls the advantages they can have at Alexandra College, Dublin. The late Provost Jellett tried for many years to get women admitted into Trinity, and I have frequently conversed with him on the subject. He never contemplated, however, its being done as at present, but on the lines of women's Colleges in England, such as Girton, etc., with the difference that women should receive degrees. I cannot speak too highly of Alexandra College, Dublin, and of the ennobling influence exercised on the girls there. If a girl does not leave it a better and higher being for the time she has spent there, it is her own fault. The teaching is of the highest order also, and my daughter's (like many others) very successful and distinguished College career is entirely due to the instruction she received at Alexandra College and as a child at Alexandra School. As regards a girl's life in Trinity College, Dublin, we found that for parents who were particular about their daughters, there were so many difficulties we had regretted we had sent ours. I entirely agree with Miss White's and Dean Bernard's evidence on this matter." When my Statement appeared I received letters from fathers who were about to send their daughters to Trinity College, men whom I do not know, saying that they felt the public would agree with me, and that they hoped some satisfactory arrangement might be made for the Pass lectures. One is from the Rev. Dr. Thomas Jordan, the Rector of Magherafelt, who says: "I trust you will allow me to congratulate you on your paper presented to Trinity College Commission. I was very glad to see it. The public, I think, will be generally with your views. It is very important to get suitable arrangements made for attendance at 'Pass' lectures." I have seen the paper

that has been sent round asking for signatures against the views expressed by Dean Bernard and myself, and although it has been signed by a considerable number of parents, I notice by no means all the parents have done so. Forty-five parents have signed it, but I miss from the list of signatures those of very important men in Dublin. The Recorder of Dublin has a daughter at Trinity College, and I miss his signature. I also miss the signature of Col. Renny Tailyour, whose daughter is at Trinity College. I have only seen the signatures to this paper since I came into the room, and therefore cannot give a complete list of the names that are not attached to it, but I can name a considerable number straight away whose signatures are not there. I was surprised to see the signatures of two parents whose daughters only matriculated in June, as the Trinity College lectures do not begin until November they can hardly have had the opportunity of attending more than one, even if they attended that.

4156. I suppose your position is this, that, however, some may be willing to send their girls to Trinity College others do not wish to do so, and, therefore, it is necessary to make some provision for them?—Yes.

4157. And that that provision might be made by recognising the lectures in Alexandra College?—Yes.

4158. I suppose you would go on to say in other similar Colleges if such exist?—Yes, I should certainly say so, any College that possesses similar qualifications.

4159. Do you suppose you could supply lecturers who would receive the approval of Trinity College?—Some of our lecturers are already lecturers in the same subjects at Trinity College.

4160. I am aware of that, but we had heard of a difficulty in supplying lecturers who were engaged in Trinity College to lecture also at Alexandra College?—It strikes me that it would be a good thing in connection with a movement like this for the advancement of the higher education of women for Trinity College to recognise some suitably qualified lady lecturers. It is done at Bedford College. In the prospectus of that College the names of several lady lecturers are given, who are recognised by the University of London. I do not know whether the question of religious denominations of the College would interest the Commission.

4161. I do not think it would, directly?—I have the statistics with me if you would care to hear them.

4162. I think the most important point is the relation between you and Trinity College?—Yes, it is.

4163. There is another point I should like to ask you about. It has been suggested that a Hostel should be established for students in connection with Trinity College, but I suppose that would hardly meet with your approval?—I think we should have something to do with the management, decidedly. It should be jointly worked with us. We have done the pioneer work for all these years in connection with the higher education of women, when Trinity College was doing nothing, or very little, and I think it would seem rather hard now after forty years that there should be no recognition at all of our work. I am not quite certain myself of how large the demand would be for the Hostel. As long as Trinity allows lady students to live with their brothers in rooms I fancy there would not be a very great demand for a Hostel, unless the Board make it obligatory that any girl students who do not live with their parents or guardians must live in the Hostel. That would be the only way to provide residents for the Hostel.

4164. How many of those who reside under your roof go to Trinity College?—At the present time, one, a medical student, but we have had three.

4165. Is that all?—Yes. Do you mean living with us? A great many of our girls go to Trinity College.

4166. I was rather thinking of how many students connected with the Alexandra College attend Trinity College?—A very large proportion of the girls who attend Trinity College have gone from us. Quite a large proportion, I think 66 per cent. of their women students have attended Alexandra College.

4167. They have left you and gone to Trinity?—They have left us to a certain extent. When they are able to afford to pay for it they frequently come back for the additional teaching. In my supplementary evidence I mentioned that they have come back as Junior Freshmen or Senior Freshmen each year. We

have a considerable number who come back. Of the eight girl students who matriculated with us last year six are now attending Junior Freshmen Classes, and working with us. Then the question of double fees comes in. It is hard to have to pay Trinity College and pay us, and it is only when the girls are fairly well off that they can manage it.

4168. Therefore if any scheme of recognition of teachers was worked out it must involve as one of its conditions the remission of part of the fees by Trinity College?—Certainly; otherwise it could not be contemplated. Then we should be doing the work, and Trinity College would be receiving the money.

4169. Supposing that Trinity College was not able to assist you by furnishing lecturers to Alexandra College, do you think you could supply yourselves with lecturers who would be entitled to receive the recognition of the College?—I am quite certain we could if Trinity College would recognise women with the same class of qualifications as men.

4170. Men teachers?—It would be difficult. Our men teachers we draw chiefly from Trinity College. We might try, but I am not sure of it.

4171. I do not know whether you have seen a joint statement submitted by certain Junior Fellows with regard to this question?—Yes; I am afraid the financial reasons entirely underlie that. The tutors receive a share of the fees of the students who enter under them, and I think if the tutorial system was abolished we should hear very little of these objections.

4172. Is there any other observation you would like to make on that paper?—I think not. I think that is what struck me chiefly when I read the paper.

4173. Mr. BUTCHER.—What about the time-table difficulty? The practical difficulty is generally put in that form, that you cannot construct a time-table which would admit of students attending partly at Trinity College and partly at Alexandra College?—I do not see any insuperable difficulty. The difficulty has been overcome elsewhere. If we submitted our time-table to Trinity College and Trinity College submitted their time-table to us I cannot see why it could not be done. I do not think there would be any real difficulty.

4174. CHAIRMAN.—I rather think you would require a separate set of lecturers?—Probably.

4175. LORD CHIEF BARON.—You, I understand, would be quite satisfied with Trinity College recognising a number of lecturers as distinct from recognising Alexandra College, that is, that the recognition would be the lectures of particular persons in Alexandra College and perhaps some other Colleges?—I do not know that I should like to say I should be quite satisfied. I should be very glad to have so much done.

4176. CHAIRMAN.—Something on account?—Yes; I should be pleased to get that recognition.

4177. LORD CHIEF BARON.—I say that because a similar suggestion was put to Mr. Justice Madden or to Dean Bernard, and it seemed to be a *via media* by which some arrangement could be made?—Yes.

4178. I should like to ask you a little more particularly about the number of your students for the purpose of seeing to what extent your students proceed to Trinity College. We will take the year immediately previous to your students matriculating in Trinity College. How many students had you in that year?—I have only the exact figures for this year since the 1st of January, 1906, to November.

4179. I should prefer the figures for the previous year, because I want to bring you on to the next year when they were in Trinity College. I want to see how many have been taken away from you by Trinity?—The total number of our students this year was 345.

4180. In the College?—Yes.

4181. As distinct from the School?—Yes. The School has a larger number of students than we have. There are a great number of students who come to us for outside lectures. They come for any subject they choose to take up—Greek, Mathematics, Political Economy, European History, Art. We have a great number of what are called bye-students at other places.

4182. Perhaps you will tell me in the first instance how many resident students you have that actually

live and sleep in the College?—Thirty, who live in the Residence Hall attached to the College.

4183. About how many students of that class some two years ago left you, and went to Trinity College?—A good many. Our loss is about fifteen a year, or something like that, which is serious to us, because that means a loss for four years of their fees. Twenty-nine students went from us to Trinity, who had entered the Royal University.

4184. I suppose you are not altogether enamoured of young ladies going to a men's College and attending the lectures in common with the men?—I am opposed to it, particularly in the junior classes. I think large mixed classes of young men and young women are very unsuitable, and of course, the tendency at Trinity College is to try and bring students as young as possible. Scholarships have been offered to girls of the Middle Grade which means that a girl must be under seventeen, and may be under sixteen. I cannot look favourably on girls of that age going into mixed classes with young men.

4185. CHAIRMAN.—Have you ever seen any mischief arising from it?—I cannot say that I have.

4186. LORD CHIEF BARON.—Of course you are naturally acquainted with the opinions of parents of the young ladies that frequent your College?—Yes.

4187. Am I right in saying that there is a large proportion of the parents that would prefer their children remaining in Alexandra College and being lectured there for Pass Lectures instead of going to Trinity College and attending those lectures in common with men students?—I think I should prefer to put it that there is a considerable proportion, but with a great many of the parents the question never arises of going to Trinity College at all.

4188. But a considerable number of those whose children go to Trinity College would prefer the children to continue to attend Alexandra College although they matriculate at Trinity College?—I think that many would be satisfied with and prefer Alexandra College. I notice, as I said, considerable omissions from the signatures to the papers sent round to elicit opinion on the subject from what was naturally a very small and biassed section of the community, the parents who had sent their daughters to Trinity College. I was discussing it with one of the students and I gathered it was felt it would be rather invidious for a Trinity girl not to get her parents to sign, because it would be disloyal to Trinity. I can quite understand the feeling. Therefore I do not think it can be taken as a fair test of opinion.

4189. CHAIRMAN.—It has to be borne in mind that the people who send their daughters to Trinity are those who approve of it, and, therefore, it is no wonder they sign the document?—This is, of course, so.

4190. LORD CHIEF BARON.—Now we will come to the students who attend the Honour classes. I suppose different considerations would apply to the young ladies attending the Honour classes?—I should think so, because, to begin with, they would be always a very much smaller number.

4191. And it would be almost impossible to duplicate?—That is so, and they would be certain to be serious students, which would make a very great difference.

4192. Dr. DOUGLAS HYDE.—I understand that several of the students from Alexandra College, who were attending lectures in Trinity College, were not satisfied with attending the lectures there, but came back and attended lectures in Alexandra as well?—There are a large number doing so. Of the eight students who matriculated at Trinity College in June, six are coming back and taking junior Freshmen classes with us now, and four senior Freshmen have come and asked us to organise lectures for them.

4193. Those students are doing double work?—To begin with, Trinity College does not open its lectures until the beginning of November. A girl taking a Pass Course in a language only gets fifteen lectures in the term, and does not find it sufficient. They came to me in September and said "Will you organise these lectures for us?" and we did so. Ever since Trinity has been open it has been like that. The trouble is the finance, which is a great consideration

 Miss H. M.
 White, LL.D.

with many students, and they cannot come back and pay us when they have paid sixteen guineas to Trinity.

4194. What lectures delivered in Alexandra would you like to see recognised by the authorities in Trinity College, English literature?—I should like certainly to see English literature and Latin and Pass mathematics. In my supplementary evidence I ask that we might take even Honours lectures in such subjects as modern literature, because I think we could deal with that better than is done in Trinity College. I think for mathematics and classics in the Pass lectures the girls would be much better with us. They would be able to do their work under less distracting conditions.

4195. You are not asking for Honours lectures in Alexandra?—I am not, except in such subjects as modern literature.

4196. You would include that?—Yes, I ask for that in my supplementary Statement. I think that could be advantageously arranged with us. We have very brilliant and distinguished lecturers in Modern Literature and English.

4197. I heard it stated that Alexandra College was under the Government of a Board of Governors or Guardians who must be members of the Irish Church, and if that is the case and you are asking for Number 6 Earlsfort-terrace, to be made into a Hostel for girls attending Trinity College, would you see any difficulty in that?—I can see absolutely none, because in connection with our staff there is no religious test whatever, or with our students. That is one reason why I proposed to read the religious denominations of our students and our staff. My Secretary is a Methodist, my assistant is a Presbyterian, and on the staff there are four Roman Catholics, five Methodists, two Presbyterians, one Congregationalist, one denomination not known as the staff is now constituted. Any one who had anything to do with the College would feel that the place was worked entirely on non-sectarian lines.

4198. Then it is only the Governing Body which must belong to the Church of Ireland?—Yes.

The Witness withdrew.

Miss O'Farrelly, M.A., and Miss HANAN, B.A. (Representatives of the Irish Association of Women Graduates and Candidate Graduates) called in and examined.

Miss
 O'Farrelly,
 M.A., and Miss
 Hanan, B.A.

4199. CHAIRMAN.—You, Miss O'Farrelly, have set forth in your paper which you were good enough to lay before us a copy of the correspondence with the authorities of University College, Dublin. I may say at once that we cannot go into that very well as we have nothing to do with the University College directly. We are concerned with the University of Dublin and Trinity College, Dublin, and not with anything that has taken place between you and University College. I do not think we can go into that?—(Miss O'Farrelly).—You will not go into the question of the Royal University students at all?

4200. No, we have nothing to do with the Royal University students?—The position of our Association is this, that only a certain number of women can go to Trinity, and we want to lay before the Commission the fact that a very large class of women, representing the majority of the women of Ireland cannot go to Trinity.

4201. What is it you wish?—What we wanted to emphasise is this. That you in your Recommendation would urge that no Charter or Endowment should be given to any University or College which would not give to women students the same teaching, degrees, honours, and prizes as are open to men students.

4202. CHAIRMAN.—We have nothing to do with other Universities or Colleges except Trinity College and the University of Dublin.

4203. LORD CHIEF BARON.—If we were inclined to recommend the creation of a new College in the University of Dublin?—That is our point.

4204. Then there might be the clause in the constitution of the new College. That is the only way we can go into it?—I see.

4205. CHAIRMAN.—Perhaps you will state shortly what you wish to say to us on that point. Of course we have your paper before us?—We wish to point out in the first instance that about one-third of the Royal University Graduates are women, and our Association consists very largely of Royal University Graduates. Up to the present of course we have not had Trinity College Graduates, but we are now including them. You do not wish us to point out our position with regard to University College, but our point is that the Royal University by its Charter is supposed to be open equally to men and women.

4206. We are not going into the Royal University. We are not sitting upon that; we are sitting upon the University of Dublin?—But we thought in case you should recommend the foundation of another College within the University of Dublin, our views would be taken into consideration in connection therewith.

4207. We will hear what you wish to say to us?—We respectfully ask you to recommend that no Charter be given to such an institution nor to any other College or University established in Ireland if it does not open up all its advantages to women as well as to men.

4208. There is a statement in your paper I should like to call your attention to. You say:—"We desire to point out that these Irishwomen are the only class of

women in the United Kingdom thus shut out from University teaching in Arts, every College in England, Scotland, and Wales, having with the best results, thrown open its advantages to women." That strikes me as a statement that is not borne out by the facts?—It is perhaps a little bit sweeping, but it is in the main true.

4209. I was not aware that Colleges of Oxford and Cambridge had opened their doors to women?—They have opened the teaching to women, which is very much better than the degrees. Newnham and Girton students have more advantages than we have in the Royal University.

4210. You do not suggest that the Colleges of Cambridge have thrown open all their advantages to women?—No, not all. They have not thrown open the giving of a degree nor the prizes, but they give the University training and the culture.

4211. Not in the Colleges?—The women attend the lectures with the men.

4212. I am speaking of the Colleges. You say that "Every College in England, Scotland, and Wales" has thrown open its doors?—We should have said every University. The statement in its present form is a little too general, and should read this way: "The Irishwomen who cannot attend Trinity College are the only class of women in Great Britain or Ireland shut out from University teaching in Arts, every University in England, Scotland and Wales having, with the best results, thrown open their advantages to women."

4213. But even the Universities do not give degrees at Oxford and Cambridge to women?—All the Universities, with the exception of Oxford and Cambridge, which are conservative in all things, have opened their doors fully to women. And within Oxford and Cambridge the lectures in nearly all the Colleges are open to women. The women from Newnham and Girton Colleges attend the lectures with the men students of these various Colleges within Oxford and Cambridge University. Taking it on the whole they have a great many more advantages in England, Scotland, and Wales than we have in Ireland, except for the number of women who can enter Trinity College.

4214. Have you anything more to add to your remarks?—If you do not wish me to go into the question of University College, and will not allow me to draw it in directly, I do not think I can say very much more. Our point is this, that there are a number of Fellows—fifteen Fellows, attached to a certain College by a Charter of the Royal University, and these Fellows teach a number of undergraduates, excluding women. Women are allowed to attend a certain number of lectures such as are open to the general public. There are about 120 lectures a week which women are not allowed to attend, so that they cannot do a full course in Arts in the College to which the Fellows are attached.* If the women want to get the teaching of the Fellows they must pay extra for it outside College, and even so that is not guaranteed, and there are certain Fellows whose lectures they

* Note by Witness.—We understand that occasionally exceptions are made, and since this statement was made we learn that a woman student has just been admitted to the physics course.

† See page 406.

cannot have at all. Yet these women are allowed to go in for the same examinations and the degree is conferred upon them. They have not the same advantages as the men students, but they have to compete at the examinations with men students who have the full teaching of the Fellows and Examiners.

4215. Have you anything to say, Miss Hanan? I think the main point of your statement is the observation with regard to Trinity College. You say "In Trinity College this has been the system adopted since the admission of women, and after two years' experience we are authorised to state that the authorities, Fellows, and Professors at Trinity College and the women students themselves and their parents consider that this is quite satisfactory. No difficulties or evils have arisen. The women students have done admirable work as evidenced by the Honours. They have won, and are happy and satisfied with the present arrangement in the College. We have no desire for any alteration. . . . most concerned in the matter." I gather from that that you are extremely well satisfied with what has taken place in Trinity, and are not desirous of seeing anything done in the way of recognition of lectures in the Alexandra College. Is that so?—Certainly; that is the chief point.

4216. If you are satisfied with Trinity, why should you object to other lectures in Alexandra College?—Because I think they would not have the same standing as the University lectures nor give the same benefit. They would hardly be recognised as University teaching.

4217. Supposing there were a large class of parents who preferred that their girls should be educated in women's Colleges rather than in mixed Colleges, would you object to their having the benefit of the lectures?—I think the cleavage would be most unfortunate.

4218. Assume for one moment that the recognition is extended only to lecturers who satisfy the College that they were adequate, that their equipment was adequate, and that their standard was as high as was required: if such lecturers were found, what would be the evil of allowing such lectures to be given in the Alexandra College?—I think that there would be a decided cleavage between the students, and the social life which is so important a part of College life would be broken up. I think the assumption, that as high a standard in teaching as that of the Trinity College Fellows is obtainable elsewhere, is hardly justifiable; these Fellows would find themselves prevented by conditions of time and space from duplicating their lectures. No other lecturers of equal standard could be found to carry on such teaching in Alexandra College.

4219. But is not the social life in Alexandra College closer than it can be in the mixed College?—My point is that I do not think the tone of Alexandra College would ever be that of a University.

4220. LORD CHIEF BARON.—Is that on account of the age of the young ladies?—On account of having the Middle and Senior grade Intermediate girls, that this large majority are not University students at all.

4221. Do not you think an option might be given to parents? If it were found that the teaching in Alexandra and other such Colleges was inferior, would not the natural result be that students would not go there, but would attend the lectures with the men at Trinity College?—Probably the great majority, or in fact almost all, would go to Trinity College, and the few left at Alexandra College would be isolated from University life, they being educated on different lines could scarcely be regarded as Trinity students at all.

4222. That is, if they adopted that option they would not perhaps acquire as much benefit as those who went to Trinity College; but you want to deprive them of the option altogether?—I think the class of parents who object has scarcely arisen; so far there has not been evidence of them.

4223. CHAIRMAN.—I do not quite see how you ascertain that, because those who object, I suppose, do not send their children; how can you say there are not a large number who do object? The fact that a number of parents send their girls does not show there is not another class of parents who do not send their girls?—I should think that if such a class existed it would have made its voice heard on this occasion, which it has not done. If they refuse to send their girls, I suppose they object to University life altogether.

4224. Are you aware that in London three considerable Colleges are established and flourishing devoted exclusively to the education of girls?—I know that Bedford College has been established.

4225. And Queen's College and Westfield College. Do not you think if a class of parents in London support three Colleges, there must be a similar class of parents in Dublin who would support a College?—I have tried to ascertain some facts about Bedford College, but I was not able to do so, as the Lady Superintendent was away. I think that the University of London and Trinity College, Dublin, are hardly comparable, for London University recognises as sufficient certain schools not on a level with Trinity College, Dublin, and Trinity does not recognise such schools. The Women's Colleges recognised by London University are solely for adult students, those who seek a University education, and are not for school children studying for such school examinations as those of the Intermediate Board. A Women's College, for the benefit of University women alone, would be financially impossible in Ireland, even admitting that it would be advisable, which this Association is not prepared to admit. Moreover, the large number of women in London University (as compared to the few in Trinity College, Dublin), makes their separation into groups less hurtful than it would be in the case of Trinity students.

4226. LORD CHIEF BARON.—I wish to ask Miss O'Farrelly a question, so that I can see whether I quite understand what she wishes. At present the Royal University is only an examining body?—(Miss O'Farrelly)—Yes.

4227. It teaches only through the Colleges to which it appoints Fellows?—Yes.

4228. And in one of those Colleges they do not allow young ladies to attend all the lectures?—That is so.

4229. Then this Commission is to determine whether a change is to be made, and amongst other matters to determine whether a second College is to be constituted in the University of Dublin?—So we understand.

4230. Do I understand that your claim is that if we come to the conclusion that a second College should be constituted in the University of Dublin, then it should be made a provision in the Charter of that new institution that women students shall have the same teaching, degrees, honours, and prizes that are open to men students?—Yes, and we ask further that this be made a provision in the Charter of any new University or University College whatever which may be established in any form which the settlement of the Irish University question may take.

4231. That is the entire of your claim?—That is the entire of our claim. I might point out that four years ago we approached the President of University College on behalf of the women graduates to petition for the entrance of women at that time into University College to the lectures of the Fellows. We were told by the President then that if Trinity opened to women University College might open.

4232. In my view you are rather weakening your case, because University College was not bound to do that. You are asking that any new College that may be founded shall be founded under such conditions that it shall be bound to do it?—That is exactly our point. I wanted to point out our grievances up to the present.

4233. It is not the grievances with University College that we have to deal with, we have to see what we shall recommend for the future?—It is a grievance of the majority of the women of Ireland with regard to University education, that when Trinity opens its advantages to women we are told, as you can see in the reply to our memorial from University College, that as they have not the same endowments as Trinity they cannot provide accommodation. Of course we recognise that they are labouring under difficulties, but at the same time we have asked that the advantages which they receive, such as they are, should be open to us; and then we go on to ask you here to recommend that no Charter or Endowment should be given to any University or University College which does not provide specifically for the inclusion of women.

4234. Dr. DOUGLAS HYDE.—Miss White stated that most of the ladies who went into Trinity College went in with the view of teaching afterwards. You, Miss O'Farrelly, represent the Catholic lady graduates; do you think if there was a new College established to which women could go on the same lines as men, that most of those who went to that College would go with the view of qualifying themselves to become teachers later on?—Not necessarily. We deprecate the view that people go into a University not so much for mental culture as to equip themselves with the means of earning a livelihood. We think the advantages of University education

LONDON:

Miss
O'Farrelly,
M.A., and Miss
Hanan, M.A.

should be placed within the reach of all who wish to avail themselves of the means of earning their livelihood, but we would give first thought to the development of the individual mind and the foundation of character. We believe it to be of the utmost importance to the nation that the women of Ireland should be highly trained and cultured, and that they should be given every opportunity to broaden their outlook on life.

4235. I think Miss Hanan has studied in Trinity College?—(Miss Hanan).—Yes.

4236. Could you suggest any alteration in the present system which would make it more agreeable to women?—I think the proposed Residential Hostel would be a good move, otherwise the present arrangement is perfectly satisfactory.

4237. I wanted to find out exactly what rooms you have in College. Can the girls meet each other and talk over things?—We have a Debating Club, a Games Club, and a Social Club. The Board has provided us with two rooms, and besides these we have the ordinary waiting-room, the reading room and a cloak-room.

4238. I think you are very well off, indeed. When I was a member of the College Historical Society, we had a splendid flourishing Society, but only two miserable rooms. I think you have those same two rooms for your cloak rooms?—For the waiting room and cloak room we have the old Historical rooms.

4239. Mr. KELLEHER.—It has been suggested you are a graduate of ours. Are you an Honours Graduate?—I am.

4240. You are a Senior Moderator?—I am.

4241. You have had experience of life in College. Do you think it deserves the reproaches that have been uttered against it?—I never saw anything to lead me to think there could be a reproach.

4242. You are aware of the arrangements made for lecturing women in the Freshman years; is it within your knowledge that the women of Junior Freshman standing have been lectured separately in Science?—Yes, so far it has been so arranged when the numbers have permitted it, and as the number of women students is increasing it will be possible to carry this arrangement still further.

4243. It is one of the things we do not hear of. Women of the Freshman class are lectured separately, at least in Science, and in Literature they mainly take French and Latin, and the lecturer has to take women in one class for one half the time and men in the other class. Practically in the Freshman years the principle of separation is carried out, and in the Senior Freshman as far as possible. What is your attitude towards the proposal as to Alexandra College? May I take it to be this, that what those who are in favour of University education for women ask us is that the same facilities should be given to women as to men?—Exactly so. If a group of men students of Trinity College, Dublin, were segregated, and sent to some school in Dublin such as St. Andrew's College, what assumption could be drawn but that these men were considered unfit to benefit by University teaching, therefore, why should women be so

segregated when they have shown themselves to be capable of admirable work.

4244. This is asking for something additional, that the University of Dublin should recognise lectures given by people not on the staff of Trinity College, Dublin?—That is so.

4245. Is it your belief that that would lower the dignity of University education in the University of Dublin?—I think it would, decidedly. It would be also a slur on those women who had entered, and look as if the admission of women to Trinity College, Dublin, had been a failure, whereas we are authorised to state it has been a complete success.

4246. You spoke about a cleavage that might arise. Do you wish to elaborate your words about the possibility of cleavage? What was the nature of the cleavage you intended to suggest?—I think the social importance of the College would be entirely destroyed by the numbers. I think also there would be always some friction between the two different bodies.

4247. Suggestions have been made that girls are allowed to live in town with their brothers. Do you think as a rule that is permitted?—I know it is not. Miss Gwynn, the Lady Registrar, settles all matters as regards lodging. I think in reality there was only one case of a girl who, at the request of her parents, lived with her brother who was delicate in order to look after him. As far as I can make out, that is the only case that has occurred. The boy is quite a young boy.

4248. So that it is not fair to say that the women are allowed to live with their brothers?—No, certainly not.

4249. With regard to the girl students who go in for Honours in Trinity College, are they more numerous than the girls who attend Pass Lectures?—Decidedly. I think at present all of the girls attend Honours lectures except two who are living in the country and cannot attend any lectures. In fact, I know every one of the others is attending the Honours lectures and aims at taking Honours Degrees. The minimum number of lectures mentioned to this Commission is thus in practice never taken.

(Miss O'Farrelly).—Might I mention that a great deal of capital has been made out of the fact that the University of Chicago have changed the regulations for mixed classes recently; but I have been talking within the last few days to a lady Graduate of Chicago University, and she tells me that was in accordance with the wishes of the founder. It is a private, and not a State endowed University, and up to the present they have not had funds enough to carry out the wishes of the founder. They had not sufficient buildings. But now they have sufficient funds they have provided for separate classes. I might also point out that the Royal University Commission was altogether favourable to the claims of the women students, and recommended that in any settlement of the University question they should be admitted to equal privileges with men.

The Witnesses withdrew.

The Commission adjourned until the following Monday.

TWELFTH DAY.

MONDAY, NOVEMBER, 12TH, 1906,

AT 10.45 O'CLOCK A.M.,

At Royal Commissions House, 5, Old Palace, Yard, Westminster, London, S.W.

Present:—The Right Hon. Sir EDWARD FRY, P.C., D.C.L., LL.D., F.R.S., F.B.A. (Chairman);

Sir THOMAS RALEIGH, M.A., D.C.L., K.C.S.I.; Sir ARTHUR RÜCKER, M.A., D.SC., LL.D.,
F.R.S.; HENRY JACKSON, Esq., D.LITT., LL.D.; S. H. BUTCHER, Esq., M.A., LL.D., D.LITT.,
M.P.; DOUGLAS HYDE, Esq., LL.D.; DENIS J. COFFEY, Esq., M.A., M.B., F.R.U.I.; S. B.
KELLEHER, Esq., M.A., F.T.C.D.;

and J. D. DALY, Esq., M.A., Secretary.

Rev. WILLIAM DELANY, S.J., LL.D., President of University College, Dublin, called in and examined.

4250. CHAIRMAN.—You are good enough to come before us, I think, in your character of President of the University College, Dublin?—Yes.

4251. You have been President, I believe, for a good many years?—I was appointed twenty-three years ago, but there was an interval of some nine years in which I was engaged in missionary work; then, I returned again to the College, and therefore I have been practically fourteen or fifteen years Governor of the College. It was handed over to me by the Bishops of Ireland in 1883.

4252. How many Professors are there in that College?—There are fifteen Fellows who are regular Professors, and seven or eight engaged, some permanently, and some temporarily, for tutorial work.

4253. About twenty-two altogether?—About twenty-two Professors permanently engaged in the College.

4254. Are they all Roman Catholics?—They never have been all Roman Catholics; from the beginning there have been non-Catholics among the Professors.

4255. A preponderance of Roman Catholics?—Yes, a preponderance.

4256. In order to make it satisfactory to the Roman Catholic Hierarchy?—Yes. It was with the knowledge of the Episcopacy that non-Catholics were employed. When we were starting, they asked me on what policy I should proceed, and I explained to them how I should proceed, both as to students and Professors.

4257. I suppose we may assume that it would only remain satisfactory as long as the predominance of adherents of the Roman Catholic faith continued?—Quite.

4258. You are, of course, perfectly aware of the positions taken up by the Episcopate now, and for a great many years, and the way they have expressed that to us in the documents they have furnished us with, and in which they conclude by saying that on no account would they accept any scheme which would involve your being included in Trinity College, Dublin. That is still their position, I assume?—That is still their position.

4259. No change has occurred in their position—I did not suppose that they had changed. In the paper* you have been good enough to furnish us with, you say you are “unable to conceive any such change in the constitution, mode of government, and system of education of Trinity College, which would make it acceptable to the Catholic body in Ireland as well as the Protestants of Ireland, for whose benefit it has existed hitherto?—Yes, I put the two bodies together.

4260. Therefore, I rather gather that you would not suggest any radical change in Trinity College?—No; I do not see why such a change should be introduced at all, seeing that it is doing the work fairly to the satisfaction of those for whom it was started.

4261. And if it was altered, you think it would put an end to one grievance by the creation of another?—Of two.

4262. Then, I was going to ask one or two questions with regard to what would satisfy the Episcopacy—

so far as you can speak to their views. Would they prefer to have a College or a University?—They would, I think, much prefer a University.

4263. But failing a University?—Failing a University, they would prefer a College in a University, properly mounted, and provided, as described, with Catholic government—that is to say, a government without tests, but so constituted that it would ensure the confidence of the Catholic body that the faith of the students would be protected.

4264. How would that be arrived at—what security is required?—Security, to begin with, that the body first appointed should be appointed, of course, in communication with the Catholic Bishops.

4265. That is to say, the body should be entirely Catholic, I suppose?—Not necessarily.

4266. But with dominance?—Yes, with dominance, but not necessarily all Catholic.

4267. And that dominance would be required to be continued and assured?—Assured for a certain length of time, and then, we trust, in the process of time, by having the government representative, that, inasmuch as the great bulk of the people of Ireland are Catholic—the graduates would be Catholic, the Professors Catholic—then, a representative body, properly constituted, would *ipso facto* be always predominantly Catholic.

4268. Such a scheme as that renders it conceivable—I do not say probable, but conceivable—that the body might become Protestant, does it not?—I do not think it could be; it is possible, of course, but it is such a mere possibility that, I think, it can be discounted.

4269. You think it is negligible?—Practically negligible.

4270. Therefore, all you ask is to be started with a Catholic atmosphere?—For a certain length of time.

4271. And that must be maintained, I suppose, by providing that the Governing Body should be constituted of a certain given number of persons who would be Roman Catholics?—Yes, certainly.

4272. Have you seen the letter† which Archbishop Walsh wrote to Sir Antony MacDonnell, with the intimation that it might be furnished to us?—No.

4273. In that letter he says:—“With reference to this we have to say that with some modifications in the Act in the sense of the English Acts of 1871 and the Oxford and Cambridge Act of 1877, we have no objection to the opening up the *Degrees, Honours, and emoluments of the University*” (that is the contemplated University) “to all comers.” I should like to ask you what you understand by that statement as to “degrees, honours, and emoluments”; would that include Professorships?—I do not think necessarily so.

4274. Would you require any test with regard to Professors?—No. I have no test myself at University College. I do not ask any man to sign anything, or to make any promise of any kind. But the Governing Body should exercise their judgment in the selection of a Protestant in such a manner as to give confidence that the Professor would not interfere with the faith

 I.L.D.

of his pupils; and, of course, also the atmosphere of the College would be such that it would be predominantly Catholic in its tone, and thereby give the security which otherwise would not be had.

4275. The security for that consists entirely in giving the Governing Body for a certain number of years a certain number of Catholics?—Of course, a great deal would depend on the mode of selection of Professors. I should be totally opposed to selecting Professors by mere examination on mere academical distinctions, and excluding all other grounds.

4276. I do not think any of us would be likely to think otherwise?—It is the system in Trinity College.

4277. You would require no tests from Professors?—No.

4278. You would leave that entirely to the Governing Body?—Entirely to the Governing Body. Not merely would I not require a test, but I should be very sorry to see it introduced, for it would often shut out the best men.

4279. As I understand, the suggestion in that passage I read to you is that Fawcett's Act should be applied to the new College, with certain modifications. Have you any idea what those modifications would be?—They were never explained to me—I do not know what they are.

4280. I did not know whether you might know. Now, with regard to the Governing Body, would you stipulate that a certain proportion should be Bishops of the Roman Catholic faith, or would you be prepared to admit laymen?—Oh, there would be a large predominance of laymen, I take it as a matter of course—a considerable predominance of laymen—and although before the Robertson Commission the Bishops asked that *ex officio* a certain number of Bishops should be appointed, I have been given to understand that they more or less formally withdrew that stipulation, and left it entirely to the judgment and in the discretion of the Government.

4281. I do not think we have any evidence of the withdrawal of that stipulation, but you think that would be withdrawn?—I think that has actually been done; I think a communication has been made—I do not know in what form, but some communication, I have been told, was made that they were quite prepared to take the chances they have, as eminent persons, of having representation. I may, perhaps, add, for the information of the Commission, that when I myself was asked by the Bishops of Ireland—by the Cardinal, and by some Bishops who were sitting in Committee, to draft for them the scheme of a representative Governing Body for University College, which I had been urgently recommending to their lordships on two or three occasions, I began by suggesting four Bishops. "Oh, no," said one of the Bishops, "two would be quite enough out of twenty-four."

4282. One-twelfth?—One-twelfth. I was not speaking of a future public College, but merely of the machinery to be instituted by themselves for the government of University College. I thought it would be conducive to public trust in the College that a representative body of Catholics should have supreme control of it; that there should be a representative body of Irishmen established, and even in such a body, going on as it is now, they were quite satisfied that two bishops would be enough.

4283. Going back to the point which you mentioned, you say that the Episcopate and, I suppose, the Roman Catholics generally, would prefer a separate University?—Oh, very much—I mean the great majority.

4284. Are there not considerable difficulties in the way of a denominational University?—There are difficulties which have to be faced, I think in any scheme.

4285. I quite agree with you there?—The difficulty in any scheme is to solve the problem:—Will you give anything to Catholics? And if you face that difficulty, I do not see why it would not be wise to face it in the best form, to face it as the Emperor of Austria faced a somewhat similar one in Prague—and I venture to say there is a valuable lesson given in Prague. In Prague there was a German University doing good work. The Czechs had not trust in that University; their national aspirations and feelings had no echo in its teaching and its Professors. Therefore they went reluctantly to it, and only in small numbers. The Emperor of Austria faced the situation, and established a Czech University in the city of Prague, beside the German University. It did not kill the German University; on the contrary, the German University

has continued to do very well. I propose to give just a few figures, which, I think, will be very instructive. It has only been established something like twenty years. In 1894—I take the figures from the "Encyclopædia Britannica"—we read:—"Education is in an advanced state, being promoted not merely by the industrial progress and prosperity of the town and province, but by the rivalry of the two races. The boast of the Germans that they represent not merely the capital, but also the culture of the city is being steadily deprived of its justification, not through German decline, but through Czech progress." I may mention that the population is about exactly the population of Dublin—that averages about 350,000, and that the difference of race was not accentuated by any difference of religion, for the bulk of the citizens are Catholics; it was a national rather than a religious difference.

4286. Still; a bitter difference?—In the German University in 1894 there were 1,287; in the Czech University there were already 2,410—that is to say over 3,600 University students in a town of the size of Dublin. In 1901 the German University had held its own—it had a few more—it had 1,314; but the Czech University had increased to 3,188. And I think the history of what we see wherever Universities are established would bear out that contention of mine. It appeals at once to the enthusiasm of the local people. It will not depend any longer merely upon State help; the people who have the means will willingly identify themselves with an institution of which they are proud, which echoes their traditions, is in harmony with their feelings, and reproduces those feelings in the people themselves, and nurtures them in those feelings; hence, I believe that a true, final and ultimate settlement would be a University, Catholic and Irish. I put Irish too—not merely Catholic—because the people, along with being strongly Catholic, are also strongly Irish. There is a strong, enthusiastic feeling growing day by day in the people that they want an education which will be in harmony with their traditions, and with their history as a nation, and I think the only institution that will appeal ultimately to the people will be a University possessing that characteristic.

4287. Do you think they will make a substantial contribution to such a University?—Not at first, but ultimately they would, as they did when appealed to on religious grounds forty or fifty years ago.

4288. One cannot help seeing that the tendency of University legislation of late years has been antagonistic to denominational Universities?—I fail to see that; every University that I know is denominational in this sense, that the Governing Bodies are representative of the locality in which they are placed; in Protestant places they are Protestant; in Presbyterian places they are Presbyterian, and so on. Of course the word "denominationalism" does not come in; they are not selected because of their religion, but because they are representative of the people of the locality—they are eminent people in their locality; and if a Governing Body of Irishmen is selected for the University of which I speak they would be selected, not because they are Catholic, but because they are representative Irishmen, and necessarily therefore the majority of them would be predominantly Catholic *ipso facto*. And therefore when it is said the Government do not establish denominational Universities, it is quite true that they do not put in a clause that such and such a person shall be of this, that, or the other religion, but they prudently and wisely select the prominent and foremost persons in the place where the University is to be established, and *ipso facto* those prominent and foremost persons are the people who have the confidence of their fellow-citizens, having the same religion, the same character, and being homogeneous in every respect; and if the Government made no question at all of the religious side of the Irish educational problem, they would treat it as a local question, and deal with it as such in Ireland, as they do everywhere else, in England and Scotland, in Canada, in India, and in Khartoum. And if in Ireland a body was elected on which every section was fairly represented, that body would be (seeing that the great bulk of Irishmen are Catholic), *ipso facto* predominantly Catholic. There is one thing which I feel very strongly. We are told about Ireland, "We cannot give you and your Catholic religion any such pri-

“privilege;” and yet at the present moment by Act of Parliament a particular form of Presbyterianism in Scotland has that privilege—it exists at this moment. At this very moment there is in Scotland a Test Act. At this very moment every Professor in the four Universities of Scotland is bound to make a solemn declaration:—“I, A. B., do solemnly and sincerely in the presence of God” (this is said before the *Senatus Academicus*, and I think it very important), “profess, testify, and declare that, as Professor of, and in discharge of the said office, I will never endeavour, directly or indirectly, to teach or inculcate any opinions opposed to the Divine authority of the Holy Scriptures”—and it goes further still—“or to the Westminster Confession of Faith, as ratified by law in the year 1690; and that I will not exercise the functions of the said office to the prejudice or subversion of the Church of Scotland as by Law established, or to the doctrines and privileges thereof.” And I say that is a stronger—much stronger test as applied to Scotland, than any condition which we ask for in Ireland.

4289. Is not the history of that declaration something to this effect—that originally all University Professors were bound to be members of the Established Church of Scotland?—Certainly.

4290. When that was abolished this negative clause was introduced to save their antagonism?—Certainly; we do not suggest anything going so far as that, but I say that it goes further, not merely in itself; but also for this reason, that all the four Universities in Scotland are tied by that test, whereas in Ireland, if this College were given the moderate guarantees we ask, there would still be other Colleges, such as the University of Dublin, not subject to them.

4291. Now, supposing it proved that the scheme for a Catholic University or University for Catholics in Ireland were not feasible, which of the two other schemes would you prefer—a College connected with the University of Dublin, or a College connected with the Royal University?—I should very much prefer a College connected with the Royal University.

4292. You would prefer it very much?—Very much, for many reasons.

4293. You have seen, no doubt, Dr. Molloy's letter which he wrote shortly before his death?—I am thoroughly in agreement with that letter.

4294. Would you like to state the reasons why you prefer the Royal University?—Perfectly ready. I may say that at a recent meeting of the Senate of the Royal University—I do not know whether it has come to the notice of the Commission that a certain resolution* of my own was passed unanimously.

4295. In this last month?—Yes. And in the discussion the Archbishop of Tuam, who seconded my motion, said that he might tell the Senate that he represented in those views the views of substantially the whole of the Episcopate of Ireland with just one possible doubtful exception.

4296. You take it that the Roman Catholic Church as a whole in Ireland would prefer affiliation to the Royal rather than to Dublin?—Speaking of the Catholic body generally—yes, very much.

4297. I should like to hear your reasons for that?—My reasons are partly religious, but still more educational. Partly religious, in that in connection with the University of Dublin we come into contact with a University, all of whose traditions and whose whole existence has been an act—well, I was going to say, of war, but certainly of hostility to the Catholic Church; it was founded to subvert the Catholic Church in Ireland expressly.

4298. Expressly?—Expressly. It was to teach the youth of Ireland the principles of the Protestant religion.

4299. But when you say “expressly” you do not find that in the Charter of Elizabeth, do you?—The word “expressly,” no, but it was founded to teach them the principles of the Protestant religion. I take the statement from the petition of Trinity College itself; it was so described in their petition.

4300. We do not doubt it is a Protestant institution; I was only surprised to hear you say it was expressly founded with that object?—Well, not the word “expressly”—no. If a landowner's son was left a minor, he was taken by the Government and sent to Trinity College.

4301. We do not doubt for a moment it is a Protestant institution by foundation?—I do not think it is desirable that we should be, as Catholics, connected with an institution to which the feelings of the people at large are hostile, where there are strong feelings amongst the people at large against the institution itself as being identified with things they dislike. On the contrary, with regard to the Royal University, they have no such feelings, because it is of recent origin, started for the express purpose of doing something for Catholics—to lead to something more. It was intended by the Government which established it, that the provision which they made for the Catholic College should be temporary, because they counted within seven years on giving a direct endowment to the Catholic College. From the beginning the College has worked harmoniously with the Queen's Colleges, with which it is associated. There has never been, I think, from the very beginning until now a single division, which could be called a division, on religious lines—I cannot remember one in the whole history of it.

4302. Of course you are a member of the Senate of that body?—I have been a member for twenty-one years. I am a member of the Standing Committee also, which has practically the government of it. That is the first point. The scheme of education, then, is more suited to the wants of the country. In Trinity College the education is mainly classical or mathematical; it began as a mathematical College, an offshoot from Cambridge, and mathematics have predominated always in its studies. It is chiefly by mathematics more than anything else that its eminent men have attained distinction; the men known through Europe were chiefly the mathematical men of Trinity College. We want in Ireland not merely the ancient learning. Mathematics and classics will, I hope, always hold an honoured place in the cultivation of the intellect—but we want also an education suited to the economic needs of the people. We want for our young men—the country is full of talent—education, for instance, in modern languages, which is very much neglected in Trinity College. We want education in the applied sciences—education in agriculture, education in commerce—not the technical education which is given in a technical school, but the higher training in technics and in applied science which would be given in teaching the principles in a University. We are freer in the Royal University to do that; we are not tied by traditions. The persons governing have not grown old in the ways of one institution; we are open to suggestions, hence we have made our course very elastic. At the end of the first Arts—that is the first examination of the first year—it is open to students to select amongst a great number of courses. A variety of courses is open to them, and according to their tastes, their needs, and their future they may elect. For that reason I prefer the Royal University as it stands now—but mainly because it would involve no radical change in our condition. The first question that would arise if we were connected with Trinity College would be: “On what lines are we going? Are you to come in and adopt our system?” I say, “No, we do not like your system.” “Are we the old institution, to come in and take your institutions of yesterday?” I say, “No; stay out. I would leave you free to enjoy it; I have no hostility to you at all as long as you stay in your own place, but I do object to your saying that my proper place is to come and sit at your feet.” I am only saying what I feel strongly on the matter from long experience.

But I very much prefer the scheme of the Royal University, for another reason, too—that I feel certain that the Robertson Commission scheme, drawn up as it was, would end, and end speedily, in what the Commission itself felt to be the proper solution—three Universities. Belfast has reason to grow dissatisfied with its position as things are now. In the beginning Belfast held the lead in the Royal University, and its citizens were proud of it, and the College was proud of its own position; but year by year as our schools have had better trained Professors in Stephen's Green—young Professors growing up under us, and clever boys year by year coming to us—we have won our way to the head, so that now Belfast is in a very secondary place. Belfast is a growing city, and the people are proud of Belfast, as shown by their giving £70,000 recently to the College. It

ought to have a University, and if a University were established to-morrow in Belfast, the Irish University question would be to a large extent *ipso facto* settled. Why? Because the men who now represent Belfast College on the Royal University would go home to represent their own University. There are a number of them properly on the Senate representing the interests of that institution. They would no longer have any *raison d'être*, because the Presbyterians of the North would go to their own University, of which they would be proud, and hence there would be a number of representative vacancies on the Senate of the Royal University, and if the Government filled a large proportion of those vacancies with Catholics there would be a predominance of Catholic government on the Royal University. You would therefore have no Act of Parliament except the one that removed a grievance—namely, the grievance of which Belfast and the North are constantly complaining—the abolition of the Queen's University—removed that grievance by recreating the Queen's University out of the present Queen's College. No one would object to it, and along with the University I should like to see them have a suitably increased endowment. I should very much like to see a great College and a great University in Belfast, because we want in Ireland a University of that type—namely, a mechanical, chemical, and industrial University. Create that University in Belfast by a stroke of the pen, with a College or two Colleges in the University, and immediately *ipso facto* you have solved a great part of the question. The representatives of the North on the Senate of the Royal University go away from Dublin to Belfast—they do not need to be interfered with constantly in their development by people like myself; they develop on their own lines; and then there would be three Universities—the Royal University modified on the academic lines suggested by the Robertson Commission, with proper provision of Collegiate buildings and endowment for Catholics, the Queen's University in Belfast, and Dublin University.

I make no suggestion to remove all the non-Catholic Senators. I should be very glad to have the co-operation of such men as Lord Rosse, Lord Justice Holmes, the Protestant Bishop of Cork, and others; but the Senate would be predominantly Catholic. It could draw up its own line of studies and education, not as now by a compromise, but then it could be Catholic and Irish; it could have the two characteristics that we desire. Without trespassing on other people's feelings, we could make it predominantly Catholic, predominantly Irish; it would have the confidence of the people of the country, and I believe from what I know that it would become a great University.*

4303. If I rightly summarise your view, it is this—that the affiliation or connection with the Royal University is better than that with the University of Dublin, even if that continues?—Certainly.

4304. But in all probability that would ultimately lead to a further division which you think would be healthy?—Certainly; much more easily than any connection with the University of Dublin.

4305. And you adopt very largely the suggestions of the Robertson Commission with regard to the Royal University. When you speak of the Royal you mean a reformed Royal?—A reformed Royal on academic lines.

4306. Substantially on these lines suggested by the Royal Commission?—Yes, and I may add that from the beginning I have always spoken with warm admiration of the work it has done in the country. The decrying which took place arose from that sort of spirit which people have who want more, and are rather disposed to say, "It really does not satisfy us; let us run it down."

4307. Sir THOMAS RALEIGH.—You would, I suppose, affiliate Cork and Galway to the Royal University?—They are at present. I would hope, however, that Cork would develop into something of its own. Galway, I think, cannot ever become in the full sense a University College. I think the means of having it are wanted. It might be made an Agricultural College, or a College for the teaching of some branch of technical instruction, but I do not think it can ever be strictly a University College in the high sense of the word.

4308. You have given us the resolution passed by the Senate of the Royal University. In the discussion which led up to that resolution, was not great

stress laid on the argument that a single University for Ireland must of necessity be one which would bring all the Colleges, however unlike in type and ideals, into one uniform system of teaching and examination?—That was my argument. I argued the question mainly on that line.

4309. Have you considered how it would be if you had a single University, but leaving the utmost possible autonomy to the Colleges, in respect of their teaching and examinations, the University being there simply for the purpose of seeing that a proper standard was maintained?—That would be the recommendation of the Robertson Commission, with the addition of Trinity College—with the three elements which existed under the Royal Commission. Then of course the introduction of a new College, not working on the same lines and having totally different traditions, would intensify the difficulties which might exist, even with autonomy. And for another reason too—if you have the Colleges autonomous there would necessarily be different standards. There cannot be the same standard in Cork or Galway that there would be in a great Metropolitan College in Dublin, and yet *ipso facto* the market value of the degree would be that of the lowest College, because it would be no longer the degree of the University of Dublin, which, I presume, would be the new degree; it would not be the University of Dublin, as hitherto a Graduate of the University of Dublin has rarely called himself that; he has called himself a B.A., T.C.D.

4310. But why need you have this difference of standard. I have seen Galway, and my impression about it is this—that the little it is allowed to do it does exceedingly well?—Certainly.

4311. Then why have a difference of standard between the small College and the large one?—There must be a difference of standard. In Galway, where you have a very small number of students, some of them are able to do very good work—as, being few, they can have a great deal of the attention of the Professors; but necessarily, where you have a great number of very clever men competing under good teaching, you are bound to get a different and a higher standard; for instance, in Cork there have hardly ever been, say, forty Arts students, although there are thirty-seven Arts Scholarships, and very often they have only thirty-seven Arts students for the thirty-seven Arts Scholarships. At the present moment you can see the standard in Cork is this—that although they have thirty-seven Arts Scholarships, and sometimes thirty Arts students, only three of those students passed the first Arts Examination of the Royal University. That shows what the standard at present is in Cork, although they have an excellent staff and a brilliant President.

4312. Sir ARTHUR RÜCKER.—I suppose your view would be that if these Colleges were made autonomous in the sense that they conducted College examinations leading to a degree, as a matter of fact, examiners could not be found who will apply that severity which would be requisite in order to keep up the standard of the College?—That is one of the reasons I have objected to Trinity College—that its standard of admission is absolutely null. One of the reasons that so many Catholics are on its books is simply that, having tried to pass the standard of the Royal University over and over again, and failed, they have gone in triumphantly to Trinity College.

4313. But, coming back to the question of a small College in the country and one in Dublin, you might have a different standard if the examiners knew who the students were, but if you go to the new College in Dublin and examine the students on certain subjects the students and not the Examiners set the standard?—That is not so in Cork.

4314. We have not in the least made up our minds—you will understand that, of course—but I just want to try and follow out a little the possibility of your College working together with Trinity College. Do you think there would be grave objections from your point of view to the mingling of the students in the same laboratories and lecture rooms—to that part of the scheme?—I think there are. I think, on the question of science—many branches of science especially—there would be the very gravest objection, and hence I believe there will be the very gravest ob-

*NOTE BY WITNESS.—But beyond all things else I believe it to be essential for the success—whether of a new College or a new University for Catholics—that its Governing Body should be constituted on a thoroughly representative and popular basis; and I confess my own ideal would be that of a University so constituted, entirely independent of State aid or of State control, and maintained directly by Irish Catholics themselves, just as Louvain is by the Catholics of Belgium.

jection to the development, which is threatened, of the Royal College of Science on the same grounds. I am speaking of my personal knowledge of the effect on some students.

4315. Do you think any system of University Professors, as distinguished from College tutorships or Professors teaching in the two Colleges, would be unworkable?—I think there would be very great difficulty in working it properly—first, the difficulty as to the appointment of Professors, and, secondly, the difficulty as to the control of the teaching of the Professors, direct or indirect.

4316. Would that affect only a few subjects, or would it affect many. May I take the case of Science—would it affect the Professor of Chemistry, for instance, to the same extent as it would affect the Professor of Biology?—Well, as to Chemistry, I have often heard very strange theories adopted with regard to Chemistry—probably not with Physics.

4317. But Chemistry and Biology, you think, it would affect?—Biology, most decidedly. I have known students who have taken up Haeckel's books, because Haeckel is supposed to be an authority in Biology, and not a few have given up all belief in Christian revelation. And forgive me for saying just one word on that—that I know no difficulty we Catholics make with regard to Biology which all believers in Christ are not bound to make. We have no special tenet of the Catholic Church which is contradicted by the teaching of Biology which is not common to all Christians.

4318. Then, leaving the point I was going to mention for the moment, one of the great difficulties with regard to the establishment of a new University, or a new College, would be that of expense. Do you think that if the two Colleges were in one University all that expense would have to be faced?—I think so. I think we require a College of our own, complete and equal to that which is practically existing at Trinity College now. You would want some development in Trinity College, too, but what we require is equality.

4319. Now, to go back to the other point I was going to mention, supposing an independent body were established in Dublin, an independent University, or College in the Royal University, and that it were possible, as far as the constitution were concerned, for it and Trinity College to co-operate at their own will?—Oh, decidedly; everything that could be done then in that way we should only be too delighted to do.

4320. If they were given common power of recognising each other's teachers, and so on, you would be prepared to welcome that?—Certainly, and I would encourage the greatest freedom in every respect—inter-College Debating Society, inter-College games, and every thing of that kind. I would have the fullest freedom when once we were placed, as we ought to be placed, as representing the majority of the people, on conditions of perfect equality.

4321. Do you think that would be a real working arrangement as apart from theory. Do you think the students would mingle?—Certainly. What makes the thing difficult now is the sense of gross injustice. Our men see every day the men whom they have beaten in the Intermediate examinations—and beaten badly sometimes—because they go through Trinity College and have certain advantages from the influence which Trinity College possesses—they see them advanced to public positions. Again and again the Chief Secretaries tell us "We would very much like to appoint Catholics, but we have no educated Catholics," and the result is that the highest Government appointments are filled by men who are not Catholics, although in the fair test of the Intermediate examination, and in the test, when we come higher, of the University examination, so far as they are common, the Catholics hold their own, as I shall prove.

4322. You do not think the ordinary objections to mixed education would, as a matter of fact, be brought to bear on the two Universities, and that there would not be a large amount of mingling together?—No, because both Universities would have their own cachet, both would have their own interior atmosphere, and they would meet just as we Senators do at the Royal University, and work most harmoniously together for a common end.

4323. Supposing for a moment you had got what you want in the new University, or new College in the Royal University; do you suppose that arrangements could

be made now for the beautiful physical laboratories which have been built to be used in common; do you think such arrangements would be made before long?—I do not know. If the accommodations and the arrangements were such that our Professor could go in at his own time—if all the new laboratories could be worked on a common plan, and if one institution took one laboratory on certain days in the week and the other on certain other days, and let each institution provide for its own teaching, I think there ought to be no difficulty about that.

4324. But you do not think any such voluntary common arrangements would extend to the two institutions having common Professors?—Not at the present time. I would like to think it out. It depends very largely upon individuals, but at the present moment I think the chances are that there would be disagreement and friction.

4325. And that really comes to saying that no system of common professorial teaching is at present possible?—I think it is not possible at present.

4326. Dr. JACKSON.—I should like to ask you one or two questions about the examinations. I am afraid I am not quite clear either about the method in use at the Royal University or about your own views. In the first place, in the Royal University at present, is it a joint examination for all the constituent Colleges?—Quite. Each examination paper is signed by a Professor of the University College and a Professor of Queen's College. There are twenty-eight Fellows, of whom I have fifteen, because there was an extra Fellow given in Irish. There are fifteen with me and thirteen in the Queen's Colleges. Every paper is prepared and signed by a Fellow or Examiner from University College, and a Fellow or Examiner from a Queen's College; and they sit together at the Oral examination and the papers are examined, sometimes by two Examiners, sometimes by four, but always jointly, and they are marked jointly. If they differ, they meet on a Board, and come to a final agreement.

4327. That is to say, in all cases there is a Protestant Examiner and a Roman Catholic Examiner? Not necessarily; they may both be Protestant, because, for instance, my Professor of Physics is one; he sits with a Queen's College man, and the Queen's College man might be a Catholic. But it is rather the Institutions that are jointly concerned—there is one of mine and one of theirs, whether Protestant or Catholic, judging the paper and drawing up the paper.

4328. So that there is identity of curriculum?—Absolute identity of curriculum, because the curriculum is imposed by the University. There is no such thing at the present moment at all as autonomy in the Colleges.

4329. Do I understand that you yourself think that unsatisfactory?—Certainly.

4330. And you desire that each College should have its own curriculum?—Certainly.

4331. And its own papers?—Certainly.

4332. Well, then, would there be any supervision on the part of the association?—Oh, yes, there would be; that is provided for in the Robertson scheme. That scheme provided that there should be a Board of Studies, comprised of the Examiners and the teachers and Professors, and the scheme of the Studies would be submitted to them, the scheme of each particular College, and they would report to the Senate as to its sufficiency—as to its standard—and though the Senate could not change it they could send it back to any College as insufficient in certain specified respects.

4333. Then, as regards the examination papers?—As regards the examination papers there would be a Professor appointed by the Senate, who would take part in the examination, and his vote would act as a veto, so that the Senate would have the controlling power to see that the standard was maintained.

4334. I think I gather that there would be, in practice, different standards at the different Colleges?—I think there would be.

4335. The Assessor, then, would be there to see that the standard did not fall too low?—To secure a minimum standard, yes.

4336. Thank you; I think that makes that clear to me. Just one other question. I understand that you very much prefer the scheme of Lord Robertson's Commission to the inclusion of a second college in the University of Dublin?—Yes.

4337. When you express that preference do you go on to express a real approval of the scheme of Lord Robertson's Commission?—I do express a real approval of that scheme.

4338. Mr. BUTCHER.—First one or two questions about the religious difficulty and the conditions that you would consider necessary to guard faith and morals in any College or University for Catholics. You say, I think, that you do not wish to impose any test whatsoever at the time of appointment?—No.

4339. And you would trust, I imagine, for the religious safeguards rather to the power of the Visitor in connection with the dismissal of a teacher?—Well, I was not thinking so much of that. I was thinking chiefly of the Governing Body.

4340. The selection?—The selection by the Governing Body, and then the care the Governing Body would take in regard to the working of the College, so as to preserve the teaching of the College from being such as to offend the religious convictions of any of the students—not merely Catholics.

4341. I think we found out clearly before the last Commission that the ultimate safeguard would consist in the Board of Visitors and the position occupied on that Board by two Bishops of the Roman Catholic Church?—Speaking only for myself, I confess that I never saw the necessity of pressing that.

4342. Really?—I am speaking personally. My own conviction was that in order that there might be confidence in the Governing Body, the Governing Body should be a representative Governing Body, and as they have the right of appointment, they ought to have the right of dismissal.

4343. That is a most interesting answer to me, because I daresay you are aware, as I am, that that particular proposal on the part of our Commission was one of the things that was fastened upon as making it exceedingly difficult to get it accepted in England?—Yes, and I confess I felt that myself, and I privately represented my views as not running to that extent.

4344. If you had a Governing Body you could trust, you would not think it necessary to reserve that power?—Certainly; to those who have the power of appointment I would give also the power of dismissal.

4345. In connection with that there is another point. At present in the Queen's Colleges?—Understand, I am speaking here personally. I do not come here to speak authoritatively for anybody, but I know my feeling is widely shared, and, I think, by some of the Bishops, too.

4346. In the Queen's Colleges at present the Professor makes the declaration in these words:—"I will carefully abstain from teaching or advancing any doctrine, or making any statement derogatory to the truths of revealed religion, or injurious or disrespectful to the religious convictions of any portion of my class or audience." So that what is there protected is not the doctrine of the Catholic Church, but the truth of revealed religion and the religious convictions of all students in the audience?—Yes, but that clause would, of course, contain all that was required for a Catholic audience, clearly.

4347. Would the word "revealed" religion sufficiently cover what you require?—Quite sufficiently. I take it that if a man was brought before a judge, if he questioned the right of the Governing Body, and it was clearly proved that, having made that declaration, or any analogous declaration, he had publicly taught what was contrary to the doctrine received in the Catholic Church, he would have violated his promise, and would be liable to dismissal.

4348. You would be inclined to agree with me, from the view of practical politics, that such a declaration, guarding the religious conscience of any individual, whatever his religion, would be more easily carried than one which simply seemed to guard Catholic students only?—Yes, and especially because it would appeal at the present moment to all who are aware of what exists in Scotland, which is on the same lines.

4349. There is this other question, which you have already alluded to—the representation of the Bishops *ex-officio* on the Governing Body. You told us what some of us have heard privately rumoured, at least—that the Bishops do not now insist upon *ex-officio* representation?—I do not know to what extent that may have been connected with a part of a scheme or in what circumstances it was offered, but I have reason to believe, as a matter of fact, either in conversation or otherwise, it was said, "Well, if you deal with the question and find a difficulty in that we shall not press it." I have been given to understand that that did take place.

4350. It would be of the utmost public importance if that declaration were made openly, for before the

last Commission it was strongly insisted on that this claim could not possibly be withdrawn. Now, we have not yet had it from the Bishops that the claim is withdrawn, and for those who wish to bring about a practical solution of the question, I venture to suggest that it is a matter that ought not to be allowed to be passed over or conveyed in private letters or conversations. Now as to the proposed solutions, there are two different solutions in connection with Trinity College itself. One suggestion has been merely the constitution of a new College, one new College inside the University of Dublin, the College for Catholics in Dublin itself; and the other solution is the reconstitution of the University of Dublin, so as to embrace three additional Colleges—the Colleges in Dublin, Belfast, and Cork—Galway to disappear. You disapprove of both those solutions?—Oh, much more strongly of the second than of the first—far and away. They do not run in pairs at all. I do not look upon them as in the slightest degree running in pairs. You increase and intensify all the difficulties.

4351. The more Colleges there are and the more distant they are and the more unequal they are?—If homogeneous Colleges, like those at Manchester, Liverpool, and Leeds, cannot work together, *a fortiori*, the four various and heterogeneous ones cannot.

4352. CHAIRMAN.—You think that is the worst solution possible?—The worst solution that I can imagine would be that one. The word "embrace" would be very odd. I should like to know how we could embrace. Dr. Traill and I are friends, but we certainly should not embrace over that.

4353. Mr. BUTCHER.—Just one other possibility which has always been mentioned in the documents of the Catholic Bishops—a single College by the side of Trinity. Have you considered this—that if the University of Dublin consisted of these two Colleges only, it would be almost impossible in the same city and with two Colleges side by side to demand for each College the kind of autonomy which would make a federal University on the larger scale possible?—Quite. I do not see how they could have that degree of autonomy which would be preserved in the other.

4354. That seems a serious difficulty in the way, does it not?—Quite.

* 4355. I notice in some of the papers which support that solution—for instance, Father Finlay's paper,* if I recollect rightly—it is assumed that the second college by the side of Trinity would enjoy precisely the kind of autonomy which was recommended by the Robertson Commission for the reconstituted Royal Colleges?—Oh, clearly no one could suggest that anything could possibly be approved, which would suggest a lower degree of autonomy than that given by the Robertson Commission; one of the chief points of attraction in the Robertson scheme was the minimising of the difficulty.

4356. Do you think you could get that degree of autonomy in the case of two Colleges alone?—I do not think we could at all. It would be two Universities. I mean there would be in reality two Universities.

4357. Then there is a further question which arises. It has been suggested in connection with the larger federal University that there should be powers (this is in a paper which has been sent in to us under Lord Dunraven's name) to affiliate with any College of the University the Arts faculties of St. Patrick's College, Maynooth, and the Magee College, Londonderry, and the College of Science in Dublin. Have you any clear views as to this question of affiliation of other Colleges?—I should very much like the Arts College of Maynooth to be introduced, and I should like it to be introduced even in the scheme of the University which I myself suggest—that is, an independent University. I regard nothing as of so much importance to Ireland as the thorough education of the clergy of Ireland, and the co-education, as far as feasible, of clergy and laity. I am strongly in favour of co-education as far as possible consistent with giving them at the same time the special training which belongs to their profession. And I may mention that the Bishops have ordered all their students to go through the Royal University, and that at the examination this year there were eighty-three students from Maynooth College at the first Arts examination. That is nearly twice as many as the whole three Queen's Colleges together passed in that one class, and henceforward they will require the men if they fail,

* Appendix to First Report (Cd 3176), 1906, page 123.

to re-present themselves for examination, and to follow the University Course until they obtain its Degrees.

4358. That would be very important?—And the result would be that the position of the Royal University would be changed in the eyes of the country largely by that one fact, that it is adopted by the clergy of the country. Then they go back and teach in the seminaries according to their own training. The seminaries will prepare their pupils to come up to this new University, so that University influence will be extending all over Ireland. The College of Maynooth is a two-fold College; it is an Arts College for the first three years of its course, and then a Theological College for four years, and the students are in separate buildings. They very rarely have much to do with each other. The training in one place is Arts training, and in the other Divinity, Scripture, and Canon Law. Hence I think it very important that Maynooth should be brought into the University, and I have no doubt that if there were—what I hope may come—a great teaching College in Dublin, or a University, which I should prefer, the Bishops of Ireland would see their way at once to establishing a Hostel or College in Dublin itself where a large number of their more distinguished men would come up and have the wider training which would be given there, because there they would be attending in the same classes as they are at Louvain, with the laity; they would go back trained teachers and preachers and enlighteners into the country, not only in religion, but also in promoting the material interests of their people. Especially I would hope to see Professorships of Agriculture in the new College or University where, as at Louvain, many of the priests would bring back to their seminaries and to their parishes the knowledge gained there, with similar improvement in agricultural methods and similar increase of prosperity to what we see in Belgium.

4359. You remember our hopes were rather dashed at the last Commission as to the theological students at Maynooth being allowed to attend the College in Dublin. Have you any reason to think those views are modified?—It is purely a question of money.

4360. I think the ground on which it was put before our Commission was different?—I think a great number of the leading Bishops would strongly like it, but some would probably adhere to the old ideas of Maynooth men, and say, "Oh, yes; what was good enough in the old times is good enough now."

4361. Rather special grounds were mentioned—that being brought into the society of laymen and in contact with city life they may lose their vocation. These were the kind of arguments that were advanced?—Yes, but at the same time the Catholic Bishops send some of their students to Germany, where the dangers are greater, and they send them to Louvain. A considerable number of distinguished students go to Louvain, so I do not think that would be pressed very much by the Bishops.

4362. I suppose you would be inclined to say, holding the views you do, that affiliation is important, but that it would make an additional difficulty to connect Maynooth with Universities so heterogeneous as one which embraced Trinity College, Dublin, Belfast, Cork, and the new College in Dublin?—Oh, very much. The fewer elements that are associated the smaller the difficulties.

4363. You may remember that the question of the affiliation of Maynooth caused some difference in the last Commission?—Yes.

4364. And there are and there would be, I think, people who feel it is rather a strong order to affiliate a seminary to a University, and to allow attendance at lectures in the seminary to count as attendance at the lectures at the University?—Well, a great deal would depend on the condition of the seminary. If the seminary is taught by University men, trained in the University, and the students are passed through the examinations, I hardly see a solid difficulty then. The meaning of affiliation would be that the lectures would be recognised as qualifying for University requirements (competency of course on the part of the teachers would be required), and sending a representative on the Governing Body. These are the only two elements.

4365. Quite, but that latter point I was just coming to—the question of representation on the Governing Body has hardly had due attention yet. In the case

of Maynooth, the Arts faculty of Maynooth would in numbers greatly outnumber any Arts faculty?—Oh, very largely—more than three Queen's Colleges.

4366. And probably the claim for representation on the Governing Body might be based to some extent upon the numbers in the faculty?—To some extent. For instance, at the last vacancy on the Senate, I made bold to submit respectfully to the Lord Lieutenant my view that the President was the proper person to appoint, and my main argument on that occasion was that Maynooth in sending such a large number of students to the University had far and away more than anybody else, a direct personal interest in the Governing Body, and the Lord Lieutenant put the President on the Commission.

4367. How far does the Arts course at Maynooth correspond generally with the Arts course pursued at other Universities?—At present it is made identical; the course of the Royal University has been adopted as the course of Maynooth.

4368. There are no special options or alternatives?—There are the special options which all other students have, namely, that the first Arts examination is identical for all students, but after the first Arts the second Arts, and the Degree, specialisation is possible. The Maynooth students will all take in the second Arts mathematical and classical subjects and logic, and a certain portion of metaphysics which comes in, and then probably many of them will go up in Philosophy. They will take their philosophical course, which, as you are aware, in the Royal University is two-fold. We have solved the question about Philosophy, because we adopt two schemes. The Catholics draw up a complete scheme according to the doctrines of St. Thomas; those who teach the Modern German, Scotch, or other Philosophies prepare their own scheme. The History part is common to both; the examiners meet and compare their papers so as to make the papers of equal difficulty and equal standard, and then the students compete on them, and then the examiners representing both parties sit together, and it has worked harmoniously.

4369. I am aware of that, and it is your experience that the system has worked?—Has worked for twenty-three years, so that the difficulty which Mr. Gladstone thought insoluble we solved—*solvitur ambulando*.

4370. Dr. DOUGLAS HYDE.—With regard to the affiliation with Maynooth, do you think there would be any objection to sending up a number of the Maynooth students to a hostel in Dublin, who would reside and mix, to a certain extent, with the lay students, whatever type the University happens to be—would mix with them, and go in for examinations with the other students?—Mix like the Louvain students, you mean? That of course they could not do, because they require a certain training which goes outside the lines of the Secular University teaching. They would meet in the class rooms, meet in the debating societies, meet in the common playgrounds, and all that—social intercourse would be going on, but at the same time they would live in a hostel of their own. I see no difficulty whatever about that, and I know that some of the Bishops would like to do it as soon as it becomes feasible financially.

4371. Do you think that would be a better scheme than affiliating with Maynooth direct and segregating that large class of students?—What I mean by affiliating Maynooth is this: Maynooth goes in for the examinations. We are not going to curtail that, and I think it would be a pity to say, "You must not get degrees." I think it is very important when a clergyman goes down to his district that he should have the *cachet* which will show the people "I am as good a man as you are. You are a B.A. or an M.A. of something. I have the same degree myself." Because there is a tendency amongst solicitors, doctors, and others, in the country, to look down on the priest because he is not a University man, meaning by University man the man who has passed a certain examination, and therefore anything which would shut them out from the privilege of passing examinations and getting a B.A. degree I should deplore very strongly. I should be quite prepared to advocate that there should be such a co-mingling of such a number of the Maynooth men with the laymen in education as to make them get acquainted with each other and put them on friendly terms, and hence I would hope that a certain number—especially those going to be Professors—would come up either during their course, or in a post-graduate course, which would be

easier, because they would have more freedom in research and have reached a further stage in development than is possible in the mere graduate course. That I should very much like to see.

4372. And with regard to the other students, would you like to have the Arts course of Maynooth count up to the second Arts?—Oh, the whole thing as far as the degree, because I do not see how otherwise they could come up to Dublin for honours.

4373. And these examinations would be carried out by Maynooth Professors in conjunction with external examiners?—They would be carried out by the Maynooth Professors along with Professors appointed by the University.

4374. Along with them?—Along with them, because I think no examination is good in which the teachers have no part. I believe the main function of the examination ought to be as a sanction to the teachers teaching, otherwise it is a discouragement to the teaching. One of my reasons for detesting the present competitive examination system is that I think it is actually destructive of true education. It helps mere instruction, this examination system. It stimulates students to work no doubt, and it helps the development of memory, but it destroys original power, because neither will the teacher teach nor the student listen to anything except that which pays for examination, and if the teacher begins, because he is an original man, to go outside the lines marked in the programme, the students become careless. They have come to me again and again, and said, "I do not like the lectures of so-and-so, because they do not tell for the examinations."

4375. I have seen an objection that may be urged against the affiliation of Maynooth, and it is this: Maynooth has there a large body of about 700 students—a compact body—and if a new College were established the Bishops, as you say, would probably make it compulsory upon every student to take out the Arts degree?—They do now.

4376. Then you would have a compact body of 700 students starting in the new College of Ecclesiastics, and do you not think that that, being so preponderant a body, would dominate this new College which would be established?—In the first place, if they remained at Maynooth they could not dominate it at all. Then you use the number 700. The 700 would consist of four classes, of which about 320 are theological students proper—nothing to do with the Arts course. The Arts course is the three preparatory years, they do not run in common.

4377. I know that, but would not the Bishops make them all take out a degree in Arts if facilities were given?—They will have taken them out first, and then continued in Maynooth their theological course; after taking out their Arts course they will go on with theology.

4378. What I mean is this—that you have a very large body of students to start a new University with?—Certainly.

4379. And so large a body are they that—I do not say I fear, but I have heard it stated as possible that with such a large body of ecclesiastical students, first of all, attending the College, influencing the Senate, and afterwards, when they get their degrees appointing to the Senate, you would impose an ecclesiastical character, more or less, upon this new College or University; and the courses of this new University would be run more or less in accordance with the necessities of the ecclesiastical training in Maynooth. I am only saying there is the possibility?—It is rather amusing, but I do not see any possibility of its being done at all. In the first place, the students in Maynooth could not possibly dominate the College in Dublin; secondly, the College in Dublin would be a very much bigger thing than anything of the kind. I anticipate that if we have anything like a proper settlement of the University question we shall have at least 700 or 800 very soon, and shortly afterwards 1,200 or 1,500. I do not see why we should not see the same result as in Prague, where the number of Czech students increased from 2,410 in 1894, to 3,188 in 1901, as I have already stated. The clerical students could not possibly dominate the University, because whatever the number passing through the University, the number of laymen would always be very considerably larger. What makes it seem to predominate now is, we have nothing else so large as Maynooth is at the present moment, but given a proper solution of the question, given a proper endowment to enable us to have scholarships and sizarships and helps for poor

students, and to co-ordinate the scheme with the primary and intermediate schools, and we shall have a number of students that Maynooth could not possibly dominate. Besides, it could be provided in the constitution of the University that no such pre-dominance should be given to any Institution. I do not see why that should not be provided.

4380. But I was rather thinking that after a time this new University would have probably an academic Senate, and the academic Senate would be very largely appointed by ecclesiastics, who had got their degrees, because they would start before anybody else?—I presume that every College would only have a fixed proportion, and they never could have the dominant College. The dominant College would always be the College in Dublin, which would be a lay College; and besides that, I really do not know any particular line of study I have ever known to be an ecclesiastical line more than any other line. I do not know at the present moment any single line of which I would say, "That is a line the priests take." It has never occurred before to me.

4381. I only thought it well to throw out these suggestions which have been made?—I believe it to be an absolute fancy. I believe the ordinary classical, mathematical, and other standards of Maynooth were very considerably higher than anything at Trinity College, or even than at the Royal, which is a good deal higher than Trinity College. They are not raising the standard, because their men are coming to us; their standards were higher before.

4382. Then there was another question about this new College of Science. You see the great difficulties of duplicating the two sets of apparatus. In Trinity College there is one expensive set of apparatus, and the new College wants the same. I think you told us that you saw an objection to students attending the laboratories in the new College of Science, which is to be established—mixing together in the new laboratories—but that would not apply to every part of the education that would be given in the College of Science?—I think if the expenditure which is contemplated on the College of Science was sub-divided it would provide amply for both the University of Dublin and the new University, and still easily leave a margin for other subjects, which might not possibly occur. I do not see at all the necessity of providing £800,000, which, I am told, is contemplated for that College. It would give both Trinity College and the new University ample means for doing a great deal of good work.

4383. Do you not think there is a crying want for a University or College which would bring Ireland into touch with the productive agencies?—Certainly; it is one of the greatest wants we have at this particular moment; and I may say that my Professors are very, very strong against anything like a recognition of the College of Science as on University level, for the simple reason that the College of Science is dealing with students of a totally different character, for totally different purposes. It is really a sort of higher technical school, and the training is the training of a higher technical school rather than for the teaching of principles and the development of faculties, which is the function of a University.

4384. But higher technical school training seems to me the very thing we want?—Quite; and I think they should have a higher technical establishment, and at the same time a well-provided University, with that higher training which they require. I think the teachers in the technical schools ought all to be University men, not rule-of-thumb men.

4385. You would not object to students mixing, for instance, in the School of Electrical Engineering or Mechanical Engineering—not to speak of Civil Engineering—but the Mechanical Engineering and the Electrical Engineering could be done at the College of Science, all the students meeting together?—Certainly.

4386. For instance, a school with fermentative apparatus, such as they have at Louvain—could not that be carried out in the College of Science?—Yes. At the same time certain questions come in about the cell, which is the foundation of brewing, and you really do not know what a man will say when he gets talking of the cell, and the powers of the cell.

4387. Agriculture, for instance?—Yes.

4388. And dyeing? Quite a number of branches There would be many departments in the School of Science which you would allow students to attend?

—Yes, but you come at once to a point we have to consider, and that is, that if all the appointments there were in the hands of a body in whom Irishmen as a whole had trust, it would be all right, but very often they are not in the hands of a body in whom Irishmen can trust, and very often the Irishman has no chance in these appointments, and men are brought in there who sneer at everything Irish and sneer at the Irishman, and make the students sometimes wroth with indignation at the way they are spoken of. That is one of the difficulties which comes back to what I said to Mr. Butcher—that is to say, that with a Governing Body in whom the people have confidence you can do anything you like anywhere you like. As soon as the Governing Body enjoys the people's confidence, you may be sure they will take care of anything of that kind.

4399. CHAIRMAN.—Do you not think it possible that some arrangement could be made by which the College of Science might be made available for a new College or new University?—Some of its lectures probably, but the University itself should have a complete apparatus for a University Course. I believe that is completely indispensable.

4390. That is the difficulty which we have been trying to deal with. I confess I am sorry to hear you say that. I should have thought that the triplication of very expensive equipment in one city like Dublin was unnecessary?—But the triplication does not arise from us; the triplication arises from those who choose to add to the two Universities something else; otherwise I see no difficulty about opening those classes to people who are not University students. I believe in brewing and other schools of that kind; there is no difficulty about adopting it and doing as Trinity College does at present—admitting students who are not going through the regular courses.

4391. You would require that the whole physical laboratories and the other laboratories should be under the control of the College or University?—That the University should be completely equipped for the whole University Course. That does not mean necessarily that only University students should go there—I mean in the ordinary sense of the word—and hence the triplication does not come from the University proposals at all. The triplication comes from a recently-established body in Ireland called the Agricultural Board, which to a large extent gets control of the education of Ireland.

4392. I am looking at it from this point of view—There is a laboratory already furnished at considerable expense in Trinity College, and another in the College of Science. If the new College were established would you ask for a third?—I would. Then people ask, why have the College of Science?

4393. I am only speaking of things as they are; not as they ought to be?—The money is not spent yet, and therefore the question ought to arise—Shall we satisfy this great crying want? shall we try first giving two Universities, and then let us fill any vacant ground that may be left by providing for it in the College of Science. Economise if it be necessary; but not in favour of what is after all only a Higher Technical School at the expense of the University, and to the detriment of its teaching.

4394. Dr. DOUGLAS HYDE.—In point of fact, I think that Catholic students do frequent the College of Science in considerable numbers now?—Well, not considerable numbers now; they do frequent it.

4395. Fifty per cent., I was informed?—The whole number is small compared with the outlay, but some do.

4396. I think there are eight Professors of the College of Science, who are all Protestants; seven of them are Scotchmen and Englishmen, and still no objection has ever been raised to the students of different denominations mingling there?—I can only tell you as a fact that one of my distinguished students came to me, and said—"I was living in the same lodgings with a fellow-student, and he says he was not going to Mass any more—that Christianity is all a fiction." That is an actual fact, occurring with me only last year.

4397. But supposing that the Dunraven scheme should be adopted, and we had in the University of Dublin five Colleges?—Four.

4398. Four Colleges. I did not quite follow your argument about the lower standard of examination in the outlying Colleges, if I may so call them. Do you

not think if Cork College, for instance, were made acceptable to the people of the South of Ireland, so far from their having a low standard, their standard would be quite as high as any standard in Arts?—Yes. They have manifested that. They develop on their own lines altogether, although they may not be satisfactory to Dublin. The Cork people are strongly wanting to have an individuality of their own, and to develop along their own lines.

4399. They would be allowed to develop along their own lines as far as possible—given almost complete autonomy, I understand—and I do not think their Arts Degree would be in the least degree interfered with?—Then why tie them up to these other people? If you are going to give them that, why not let them govern themselves altogether, having a State body, which would see that the proper standards were kept up as they might be if you even had separate Universities. I do not see why they should be tied up with a whole lot of other people.

4400. Will you secure that?—The government of the Senate would be able to secure that.

4401. If you had a University at Cork it could set its own standard?—Certainly.

4402. And that standard you are inclined to think would be a low standard?—It might be for a little at the beginning; but I think there would be no difficulty whatever after a certain length of time in reaching a satisfactory standard; they have such excellent secondary schools. Anything which would secure proper standards would have my hearty co-operation.

4403. Dr. COFFEY.—If a properly organised University College for Catholics were once founded in Dublin in which culture would be obtainable in sympathetic association with the Catholic outlook on life, and its own discipline, would its rules be very strict with regard to the attendance of the students of that College at the classes of other Institutions, in such questions as Biology and Chemistry, or those departments in which there might be, as you suggested, a danger *to faith?—Of course, rules, in the full sense of the word "rules," do not exist; the Catholic Church has made no prohibition at present. We are often spoken of as if we had issued a prohibition against our students going to Trinity College, but I have never known of any boys who wanted to go to Trinity College being prohibited from going. There is no such prohibition. There is a strong discouragement, for which we see reasons with our own eyes—reasons such as those which Liddon spoke of in Oxford, where they lost their faith, and reasons such as Mr. Lewis Campbell refers to as having existed in the old Universities of Oxford and Cambridge, where Nonconformist students went, and where they lost their faith as Christians. But there is no strict prohibition.

4404. Under such circumstances would there be greater freedom of access—I mean not in the sense of any College restriction—but would individual students, or, for that matter, the body of students, feel themselves freer under the knowledge that they had acquired in the Catholic system—would they find themselves freer to attend the lectures and the teaching of institutions which were wholly non-Catholic?—I do not know to what extent I should realise the theory. If they were satisfied with their own Professor, I daresay they would stay with him; if they were not satisfied they would do what some students do at the present moment—they would go to some institution where they could get better teaching. Quite recently some students of Trinity College came to my lectures because they think they are better, although they are on the books of the College, and holding Scholarships there, they come to us for teaching.

4405. On the question of the equipment of the scientific departments, is it not very much a question of degree? The claim made for equipment on the Catholic side—does it mean that in every department of that equipment there should be equality?—Substantially; that on the whole we should be fairly provided for. That is the meaning of it. Of course, it does not mean that in every line they must give us absolute equality, equal buildings, equal ground, equal lookout, and everything of that kind.

4406. Supposing you have already very full equipment in some of the existing institutions, might there not be compensation to this degree—that if the State was unwilling to provide equal endowment all round,

LONDON.

the endowment might be more full in another department of work in the Catholic College?—Certainly.

4407. And more limited in those in which full endowment was provided already?—Quite.

4408. Do you see no advantage, from the public or national point of view, in introducing Trinity College into a federal system, if a federal system is at all to exist in Ireland?—I do not see any advantage in bringing anybody against their will into any system. As a rule, if you bring men into a system against their will, you put their backs up to go the other way, and you alienate outside feeling in the country. It is not merely Trinity College that is concerned, as I see it is nearly always assumed in the papers now. It is not merely Trinity College who are concerned, but there are the vast body of Episcopalians who are greatly concerned in the institution which has trained their forefathers and themselves, and which is training their children. It is not the Professors of Trinity College who have the only interest in Trinity College, but it is that great body outside. We ought not to say—"Well, now, the Protestants in Trinity College take one view of Irish sentiments; let us take Trinity College, and transform it and make it Irish." I say—"Let them alone; let them grow up beside you; let them see you are not narrow, and that you can love all Irishmen, even though they may differ from you in many respects." I would not turn the most bigoted Orangeman out of the country, although some of them would like to turn me out; I would try and let the different parties grow up side by side, and then, after a time, their eyes might be opened, and they might learn to tolerate each other.

4409. Under the federal system might not that be promoted even if there was a great deal of dislike at the start?—I do not think it would. I believe all the people would be alienated, and that they would look upon it as an act of tyranny to force them together in that way. I do not see that it would lead to their liking one another afterwards; on the contrary, I am led to believe from recent information which I have received from several of my students in Germany, that there, far from having brought together Protestants and Catholics, there is a deeper antagonism between Protestant and Catholic students attending the same University than has ever been found in Ireland.

4410. But the experience of the Royal University Senate has been that the representatives of very different interests have worked together?—But we came willingly; it was not imposed upon us against our will. What you say is quite true—perfectly true.

4411. Mr. KELLEHER.—Have you any idea of the scale of fees in such a College or University as you contemplate?—The lower the better. I should like to have none at all, if it were possible, as in Freiburg. At present we charge £10 10s., and very often students say to us that that is too high; and we say—"Very well; we do not mind that." On the contrary, we try to help them.

4412. You believe in a University to which a very poor man might be free to go?—Certainly—a popular University.

4413. Would you discourage members of other religious bodies from coming to it?—On the contrary, I would welcome them. Some of our most distinguished students have been non-Catholics. The master of one of the leading schools in England was one of our distinguished pupils, and we had the son of the Deputy Grand Master of Freemasons, Sir James Meredith; he sent his son and his nephew; and we had also the son of the Chief Rabbi, and in fact members of all denominations have attended the College.

4414. Supposing a number of non-Catholics did go to the College, attracted there by the low fees, which are considerably lower than in Trinity College, and attracted by the prizes, would you if so requested by their authorities provide Chapels for the people of different religious denominations?—No, because they live in a city where they can have Chapels of their own.

4415. Would you provide Catechetical lectures and Deans of Residence?—No. I do not invite them to come; if they come they come for the teaching. We are living in a large city where all these means exist.

4416. Would you have separate courses in Philosophy if they did not desire to pursue the Thomistic system?—No, inasmuch as there is another University in the city to which they may go if they like.

4417. But in that other University the fees may be too high?—They have their own choice; they know just what they are getting with us as they do in Trinity College. Trinity College does not provide an alternative course in Philosophy. Trinity College provides the German or Kantian system.

4418. If a great number of non-Catholic students came to the University, and joined the University Debating Societies, would the Theological students from Maynooth be encouraged or discouraged from joining those Societies?—Maynooth is sixteen miles away, and they could not very well join.

4419. I refer to those living in the Halls of Residence?—Oh, I should certainly encourage them; I encourage the young Jesuits who are not yet ordained to take part in all the social work of the College.

4420. But would you have any objection to doing that if the College contained a number of non-Catholics?—None whatever. I should like them, on the contrary, to have the fullest intercourse with their fellow-students as a preparation for their after-life in the world.

4421. So that the mixing of the students in that way is not objected to?—Not in the least by me.

4422. As to the Professors of the University, I think you suggested that you would not impose upon them a test, so that Professorships would be open to all comers from the start?—Certainly, but not by examination.

4423. But in the examination the best man would be appointed without reference to his religion?—Yes.

4424. Is it not possible, owing to the great number of young men who are turned out yearly in Oxford and Cambridge, the number of men in Trinity College, the number of men in Queen's College, Belfast, and the number of men in the Scotch Universities, that the number of candidates for these Professorships at first—the number of candidates who were non-Catholics—would be very much larger than the number who were Catholics?—Possibly.

4425. And other things being equal, it might be that to begin with the staff would be non-Catholic?—No. I take it for granted that the Governing Body would elect suitable men in that respect. It is not always the best man in Academical attainments is the best man all round. I take it the Governing Body would elect a man who was competent, of course, but they would elect a man who was thought better to teach Catholics rather than another man who was a better man in other respects, and not a Catholic.

4426. Therefore really the absence of tests would scarcely be a reality—it would be taken into account what a man's religion was?—The absence of tests would be a reality in this sense—that if there was a man in certain subjects—especially an Irishman—I hope they would largely prefer Irishmen, unless, of course, the man was not competent—but if they are Irishmen, and thoroughly competent to teach in particular subjects in which religion and other questions which were debateable did not come in, they would prefer such a man. They could do that without a test, whereas if there was a test they could not do it.

4427. CHAIRMAN.—They should take knowledge, skill in teaching, nationality and religion, all in relation to each other?—Yes; fitness for an academic post in certain circumstances.

4428. You would consider both nationality and religion as well as knowledge?—Certainly; but neither nationality nor religion should ever be such qualifications as would enable an unfit man to be appointed.

4429. Mr. KELLEHER.—Then, it is clear that the Professorships would not be open to all, on equal terms, from the start?—Yes; in that sense.

4430. And therefore that you would not get the best men in the narrow sense—I do not mean the men who are best from the point of view of their religion and nationality, but the men who are best in their own narrow subjects?—Yes; that may be.

4431. So that your College, or University, would start with a certain stain on its academic character?—I do not know that it would be a stain at all, because I really think when you are dealing with students a great point to think of all along is that—in addition to the mere powers of teaching of a Professor—there is the importance of his personal relation to the students—to what extent he has their confidence, to what extent they would feel that he takes a personal interest in them, and to what extent they are likely to go to him and ask him for advice, and make

him a friend. I believe from my own experience that it is not at all necessarily the best teachers from a mere academic point of view who do most good to the students. Often and often it has happened in my experience that I would take a man with a most brilliant record, and with the same power of teaching as another who was less brilliant, and the first man I would find was not the best man, because he had not the influence which commended him to the confidence, friendship, and trust of the students. And it is the same with Trinity College, Dublin, I need not tell you.

4432. I do not know whether you would say that such a College or such a University would be in reality a denominational College or a denominational University?—It would be substantially a denominational College without tests. It is quite true that it would be a denominational College in the sense that it was controlled by a denomination, just as Trinity College, Dublin, has been for a very long time absolutely a denominational institution controlled by a denomination.

4433. The appointments at the beginning to the Chairs in this University would be appointments on denominational grounds?—Oh, certainly—that is to say, partly on denominational grounds; that is the very essence of the claim.

4434. I shall now pass away from that part of the subject, and go to another. From what part of Ireland do you think the students would be drawn to the College or the University?—If I may judge from the present experience, from every part of Ireland.

4435. Of course, you know that the people of Cork are very anxious that they should have a University of their own?—Certainly.

4436. I asked the Lord Mayor of Cork whether many students would come from Munster to a Catholic College if such were formed in Dublin; and his answer was to the effect that they would amount to very few owing to the expense of living in Dublin?—Well, I do not know that that is the fact, because we have a considerable number at the present moment—I mean in proportion to our own numbers—coming from the county and city of Cork.

4437. That is owing to the fact of the Queen's College in Cork at the present moment being under a certain ecclesiastical cloud?—Quite so.

4438. And Queen's College, Cork, might be brought into harmony with the wishes of the people?—Yes.

4439. And therefore those students who now come to you, because they are not permitted to go to Cork, would in that case remain at home?—Probably a considerable proportion would remain at home.

4440. And as to Catholics in Dublin and the neighbourhood, could you count on all the Catholics in Leinster who are desirous of University education—could you count on their going to your new College or University?—Oh, no; I think some of them would go, as their fathers did, to Trinity College.

4441. But they have gone to some extent against the wishes of the Roman Catholic Hierarchy?—There was no prohibition. They have not been encouraged to go—they have been discouraged from going as a whole, but there has been no active prohibition and no interference of any kind.

4442. But it is known that a certain kind of pressure is used on Catholics?—I know a number of fathers, and I do not know that any one has ever brought to bear the slightest pressure. I know the parents and I know the children; they were educated by my body, and I do not know of any pressure. If asked for advice, they say, "Try the Catholic institution in Dublin"; but if the students are living with their families at home, and their fathers have been to Trinity College themselves, they, living with their families, would be less liable to be under the disadvantages which might otherwise result from their surroundings, and therefore they have gone where their fathers had gone before them, and I believe they would continue to do so in the future.

4443. In the new circumstances, do you contemplate that the prohibition of Trinity College might be made more severe on account of the way in which Catholic demands might be satisfied elsewhere?—I do not know that there is any danger of that kind; I think what would be left would be the fair play of forces. I think after a time they will find they get as good a value, and now the new College would be more in harmony with the wishes of the country; and the country is learning to govern itself, and

therefore the line of advance no longer at all rests with Trinity College. But I do not anticipate in the slightest degree any ecclesiastical pronouncement.

4444. Do you think there is any hope that if a Catholic College were founded in Dublin the ecclesiastical position towards Trinity College would be modified?—I do not see any reason more than at the present moment.

4445. Do you think there is any possibility that Trinity College would be tolerated?—Well, they would always say, "You had better not go to Trinity College," and I will tell you the reason why. The feeling about Trinity College is worse now than it ever was, for this reason—because in former days, when people went into Trinity College, they went into a strong Protestant atmosphere, where there was a strong Protestant feeling, often openly expressed, and a Catholic would get his back up at once, and, as it were, be strengthened in his faith by the opposition he encountered—it was Protestant against Catholic. Now, the danger at Trinity College is not in the least in the direction of proselytising, but it is in the direction of the young men becoming sceptical and losing faith altogether in Christianity—which we Catholics regard as a much greater and more serious danger than the other. That is an increasing danger in Trinity College, and it exists also, as I need hardly say to this Commission, in the Universities of England and elsewhere.

4446. It is said that a certain number of Catholics go to Trinity College because they think they cannot get a suitable education in the Royal University, for example, and they are permitted, perhaps, by their ecclesiastical authorities to go to Trinity College on that account. If a College were founded in Dublin which claimed to give as good a University education as the education given in Trinity College, do you think Catholics such as those who now go to Trinity College would be prevented from going there?—I do not think the action of the Bishops would be intensified in the least; I think the Bishops, who are sensible men, would say, "Let the new College make its own reputation"; and people would open their eyes, and would say, "We can do as well in our own institution; why should we go to the other?"

4447. Might not the Bishops say that on account of this new grave danger which exists?—They know at this moment, and one of the main reasons why they discourage it is that, and that danger exists also at the English Universities. I have here a pamphlet written by a great advocate of sending Catholics to the English Universities, and he says, "Let this be my last word—it is the right sort" (those two words are in italics) "of boy, and no other, whom Catholic parents and guardians and schoolmasters must choose to go on from school to University. That choice has not always been wise in the past, and it has been followed before now by disaster and downfall." The writer is himself a University man, who is an advocate of sending Catholics to the English Universities, and who is living himself in one of the English Universities—I refer to Sir D. O. Hunter-Blair.

4448. But the policy as regards Oxford and Cambridge at present is that, although there is a danger, the student is permitted to go because his future standing in the country requires that he should get a University education?—Certainly.

4449. And it is upon that ground, perhaps, that Catholics at present are permitted to go to Trinity College?—Certainly.

4450. But if there is established a College or University which would be considered to be giving a genuine University education, can you not conceive it possible that Trinity College might be likely then to be permanently prohibited to Catholics?—I do not think so. The Bishops as a body are not in the least likely to take that view, for the simple reason that they would say, "Let things alone; we have now a properly managed University to which our men are coming, and by degrees the people will open their eyes and see that they are, with all the proper surroundings of University life, getting their education in a Catholic College." They would let it alone, and I myself would certainly deprecate any attempt to make any new prohibition.

4451. Do you think there is any probability that the condition which I have suggested would arise?—I do not think that there is.

 Rev. Wm.
 Delany, S.J.,
 LL.D.

4452. I have now to pass on, and deal with the College of Science. You referred to the College of Science, and I think you stated that your Professors do not consider the College of Science as of University rank?—Ought not to be, as I understood them; and when they spoke to me they told me Trinity College men also shared that view.

4453. That is not the point of view at all, but you suggest it is not of University rank?—The teaching is not. I speak now purely on the verdict given by really brilliant men like McClelland and others who have not really got Irish training—men who have gone to English Universities and got degrees there.

4454. You suggested that either the buildings or the work might be taken over by the new University which is contemplated?—What I should suggest rather would be this—that there is a very large expenditure contemplated, and if there was a friendly communication made, such as this: “Now we are going to establish a College for Catholics in Dublin; Trinity College also should have something more; let us try to establish these two on a thoroughly good basis, not spending the money on mere buildings and ornamentation, but on things of really practical work, and then if there is anything over” (as I think there would be out of £800,000), “let us take over those departments which do not belong to University training so-called, and let us have the College of Science”—if that were done then we could have the University going on and students going out into the country with true educational equipment, technical education of a higher average. I do not believe that you would very much improve technical education by having the sort of technical education which is given in the College of Science.

4455. I was thinking of another point. You said that the kind of teaching given in the College of Science might be very valuable, though not University teaching?—The kind of subjects they teach are valuable, but of the actual teaching at the present moment I cannot say very much; therefore, I will say nothing about it at the present moment. They have comparatively very few students, and they are not turning out enough to encourage such an enormous expenditure as £800,000, which would go a long way towards settling the University question.

4456. But it gives high technical education, does it not, in trades and things of that sort?—I would be going out of my line if I ventured to give you anything like a bold answer to that question.

4457. I probably misunderstood your point, so I will pass away from that?—What I laid down was this—that my own Professors—and others agreed with them—are of opinion that the training given in the College of Science was not University training; a University deals with principles, and it is the proper function of a University to train the teacher, and of the College of Science to train technical men.

After a short adjournment,

4468. LORD CHIEF BARON.—On looking over the *précis* of your evidence, I see there are some matters to which your attention has not been directed—principally paragraphs 2 and 3. In paragraph 2 you refer to the relative proportion of the Catholic and non-Catholic students who won distinctions in the examinations of 1906?—Yes.

4469. Now I would be glad to have, if you could give it to me, the number of the Catholic students, for this purpose—I want to ascertain as accurately as I can the probable number of students who would be in the contemplated College?—Well, I have brought, in order to leave with the Commission, some tables, one of which shows in the first place the growth of the Royal University as a whole, then afterwards the growth of the Catholic element in the Royal University. The growth of the Royal University as a whole is shown between 1895 and 1900, and from 1905 to 1906. In 1895 the total who entered were 2,600; in 1906, the total who entered were 3,733. The number who passed in 1895 was 1,647; the number who passed some examination in the Royal University in 1906 was 2,393, showing a steady growth between 1895 and 1906; and that is very, very much more rapid in the last five years. In the year the Royal Commission sat the number of entries was 2,681, and that has now increased to 3,733 in this past year; while the number of students who passed in the same time has increased from 1,779 to 2,393—that is to say, considerably more than

4458. But the point I wish to bring out is with reference to the institution of a third set of apparatus?—Quite right. There are a number of most valuable things, such as brewing and things of that kind; certainly a number of those things would be most valuable, and I should very much like to see those well developed.

4459. May I suggest that you think that these are not properly the work of a University, but that at the same time they represent work which must be done somewhere?—Certainly, and the University will have to do these things if they are not done somewhere else.

4460. They may as well be done in the College of Science?—I agree.

4461. The new University could not possibly make use of the present College of Science—may I assume that?—I think so.*

4462. And so you would have the triple plant?—Not necessarily all covering the same ground.

4463. But you would have a triple plant?—I should say a double plant, except in these purely technical subjects; I would have a double plant, and then both Universities open to non-University students in the department which suited them.

4464. Very well; I pass away from that. You suggested that loss of faith had occurred in the College of Science?—Quite recently a student came and told me that; of course I do not say in any way that that is a general thing at all.

4465. But you use that as an argument against the College of Science. I have been at the College of Science, as you know, and I would ask you, does that kind of thing not occur everywhere, and under all circumstances?—Oh, certainly, to some extent.

4466. CHAIRMAN.—There is just one more question which I should like to ask you. Your attention has been called to the scheme, which we know as Lord Dunraven's scheme, a scheme for a federal University, involving four Colleges, and you expressed a strong opinion with regard to it. I should like to know whether you think the Catholic Episcopacy would agree with you in that opinion?—I think so. In condemnation of it, Dr. Healy said he spoke the view of the whole Episcopacy, with one doubtful exception; and, as I understand, Dr. Walsh, the Archbishop of Dublin, who advocated, and I think still advocates, the scheme of a College in the University of Dublin, I have never known him to advocate or support the four-College scheme.

4467. Do you think the opinion you expressed expresses also the judgment of the Catholic laity of Ireland?—The laity never had an opportunity of being consulted; but, as far as I know, the laity largely, taking the whole laity of Ireland, very much prefer having nothing whatever to do with Trinity College.

twice as many as are altogether on the list of Trinity College. The tables show the results of the examinations. There are three examinations in the year—an examination in May, which is chiefly a medical examination; an examination in July, which is principally in the lower classes; and an examination in October, in the higher classes.

4470. Is it possible to form any estimate as to the number of the students in the Royal University who are Catholic?—What I have done for the purpose of this Commission was to go over the returns. Here are the official returns for 1906—the official lists of all the Arts examinations, and of some of the others. I am concerned chiefly in these tables with the Arts examinations. What I have done is this: I have gone over the lists, marking off the students who come from known Catholic institutions on one side, and those who have come from elsewhere on the other side. That, of course, will not include all the Catholics. In the Catholic institutions there are hardly ever, except in my own College, any Protestants—I mean in the schools and seminaries throughout the country, whilst in the Colleges of Cork and Galway there are a larger number of Catholics to balance their growth. I took the July examinations—the examinations in Matriculation, First Arts, and Second Arts—and we see the growth in that respect. In the year 1890 there passed 966 students in the three examinations.

4471. From Catholic institutions?—No; altogether. There passed, in 1906, 1,448, showing a very large

* See further Statement of Rev. Dr. Delany received subsequently, printed at page 407.

increase, and the increase that has taken place is mainly within the last five years—that is to say, since 1900. In the year 1900 there were only 1,093, which was very little of an increase; but between 1900 and 1906 the number has gone up to 1,448. Now for the division of them, according to religion. Whereas in 1900, of 558, for instance, who passed in Matriculation, 191 came from non-Catholic Colleges; 293 from Catholic Colleges; in July, 1906, the numbers were as follows:—187 from non-Catholic, and 461 from Catholic institutions—that is, considerably more than twice as many. And taking the whole three classes together, of 1,448 who passed, 374 came from non-Catholic institutions, and 865 from Catholic institutions.

4472. What year was that?—This year; that is to say, considerably more than twice as many came from Catholic as from non-Catholic institutions, and that is understating, as I pointed out, the number of Catholics. And the same proportion, which holds as regards the numbers, is still more intensified if we regard the distinctions. The figures can be had.

4473. Dr. JACKSON.—Would you mind telling us what the examination is which you are speaking of?—I am taking the examinations for the Matriculation, First Arts, and Second Arts each year for a certain number of years. They are the first examinations the students pass when they come in, and what I think worth notice is the very large proportion who go on beyond the First Arts course. People say sometimes, "After all, Matriculation is not a University examination at all; it is merely an ending-school examination." How did they go on afterwards? I see, for instance, in the First Arts, in 1905, 507 candidates presented themselves for examination. The following year 421 presented themselves for Second Arts; that is to say, a considerably larger number than passed at the mere July examination in the First Arts came up for Second Arts, showing that although there are large rejections—the ordinary rejections amount to 30 per cent. of all examinations—the bulk of those who passed present themselves again. I have here also a table showing the distribution of the honours and prizes, and you can see how the balance gradually changed. In 1890, at Matriculation, the non-Catholics obtain 166 prizes, and the Catholics, 74. In the First Arts non-Catholics obtain 78, and Catholics 37. In the Second Arts, the non-Catholics obtain 60, and the Catholics 27. That is in 1890, and it is slightly changed, but not much, in 1895. In 1900 the balance is changed somewhat—69 non-Catholics, and 97 Catholics; 69 non-Catholics, and 58 Catholics; 49 non-Catholics, and 46 Catholics, respectively. But when we come to 1906, we find in the First Arts, non-Catholics 27, Catholics 102; in Second Arts, non-Catholics 31, Catholics, 93; that is to say, that the proportion of passes is more than preserved as regards the honours. And the reason of that is this: that a very large number of boys who would not formerly have gone into a University are helped now by the prizes of the Intermediate Board and by such scholarships as are to be obtained. Recently the Bishops of Ireland gave scholarships for boys who had distinguished themselves in the Intermediate Examinations, and a considerable number of boys have come to my College who could not possibly have hoped otherwise to get a University training. You will be pleased to know that I have taken the trouble to ascertain how many of these students have come from private study, because that is an important element; and I find that the percentage taught in institutions varies from 80 to 35 per cent.—leaving about an average of 15 per cent. who come up on private study or private education, and I need not say that in Trinity College there is a considerable average of students who receive no Collegiate education.

Then I have another table, which bears on one point of my argument, and that is on the Catholic claim. The Catholics claim, that for students who have shown themselves fit intellectually for higher education, that higher education ought to be provided; and the Intermediate results year by year show a very large proportion of Catholic students in Ireland who are thoroughly qualified for higher education, if it is placed within their means, both as regards the nature of the institutions and as regards also the question of cheapness. I have here an analysis of the results of six years' Intermediate prize lists up to 1906. The Intermediate scheme was modified in recent years—modified, I

think, justly, although I dislike many of its technical rules, which seem to be foolish, but modified in the sense of specialisation—that is to say, in giving of prizes, not alone on mathematical and classical lines, but opening up its very best prizes on literary and scientific lines, so that there are four groups—the Classical group, the Mathematical group, the Literary group, and the Scientific group. I prepared then here a table showing how the exhibitions and prizes have been awarded in all those groups as between Catholic schools and non-Catholic schools—that is, not taking individuals, but taking schools known to be Catholic and schools known to be non-Catholic. And they work out in this way—that in the three groups and in the three grades, Junior, Middle, and Senior—in the Classical group the Catholics win 30 exhibitions to 18, and 29 prizes to 7. In the Mathematical group, where they fall short, for reasons which I will explain afterwards in a moment, they only obtain 20 exhibitions to 23, and 19 prizes to 20. I shall come back afterwards to that in order to explain how that comes about, as compared to the others. In the Literary group, on the other hand, they win 87 exhibitions to 8, and of prizes 81 to 6. In the Scientific group they win 71 to 22 exhibitions, and 44 prizes to 27. So that on the total they win 208 exhibitions to 71, and 173 prizes to 60—or, grouping them together, they win 381, gross total, to 131; that is close on three to one. The Intermediate Board also give prizes in Composition, in Greek, Latin, English, French, Irish, German, and they work out in this way:—In the Senior Grade, Catholic schools, 20 to 7; in the Middle Grade, 25 to 3; in the Junior Grade, 46 to 12—or a gross total of 91 to 22; which is practically more or less the proportion of the population. I base on that the argument which I advanced—that they are entitled, therefore, having shown this preparatory qualification, to have higher education suitable to them, both as regards their economic and social conditions, and also as regards their religion.

4474. You said that you would make some explanation of the apparent deficiency in Mathematics?—Yes—thank you very much for that suggestion. I am afraid there are many things which I may have overlooked, as I had not time, unfortunately, to write them down. We are getting a little better in Mathematics, but the reason why we are behind—and we were hopelessly behind some few years ago—is this: in the Catholic Church there is no special reason why the Catholic priests, who are mainly the teachers in our seminaries and secondary schools, should devote themselves to any advanced study of Mathematics. Some of them hardly go in for Mathematics at all—it does not come within the scope of their professional education as clergymen. They are educated in Classics; many of them go abroad, and learn modern languages, and in Classics and modern languages they hold their own, and have done so from the beginning. In Mathematics, on the contrary, Protestant schools are well provided for. Trinity College offers Mathematical Scholarships and Fellowships to be competed for—the prizes are for a lifetime. A Fellowship is a prize for a lifetime—a man has a dignified position, and is well off, and therefore the clever men in Ireland see before them an opportunity of getting that position by winning a Mathematical Fellowship. There is a Fellowship given every year, and they go alternately, I think, on Mathematical subjects. For one man who wins it there are six or seven who hope to win it, and who therefore go into Trinity College, and win Sizarships or Scholarships in Mathematics, and finally compete for, and some win, that great distinction—a Fellowship in Mathematics. And those who are disappointed either remain in Trinity College as grinders or tutors, or go out to Protestant schools, where they teach, and the teaching of those distinguished men—candidates for scholarships, sizarships, and Fellowships—naturally very much outweighs the teaching in the other seminaries. Therefore one of the things we want higher education for is to have the means of getting men of great ability in the various branches to take up these branches, and then you will have not only the teacher in the University, but also a great number of men qualified to be teachers. In the sense that we have not got them now. At the very beginning of the Intermediate Examinations hardly a Catholic won a gold medal; now they are being provided with better teachers, partly from University College; year by year we are turning out some men, so that we are stealing up, but we are still behind.

4475. Would you be able to form an estimate of the

probable number of students there would be in a new College, provided one were established to the satisfaction of the Catholic Hierarchy and clergy?—I think we would start with between 700 and 800. At the present moment we have between 200 and 250, and it is simply because I have not room that we have not more. I do not increase the number, because I cannot accommodate more; but out of my poverty I am going to try and build some temporary structure if I can. The Medical School has about 400, and we would have the two together, of course, because the Medical College would be the Medical Faculty of the Catholic College.

4476. What is the gross number there?—I should say about 400—perhaps Dr. Coffey could assist me there?

4477. DR. COFFEY.—Not quite so much—about 350, taking seventy as the average of entries each year?—350, yes.

4478. LORD CHIEF BARON.—How many in University College?—About 250. We start, therefore, with about 600, and then, if we were to offer the prizes which an endowment would enable us to offer, it would give us a very large increase. For instance, this year twenty very brilliant students came to me because of the temporary scholarships founded a year ago, and if we had a provision for scholarships on a larger basis—such as the Queen's Colleges have—we would have three times that number coming in each year.

4479. Is that number exclusive of the students coming from Maynooth?—Oh, yes; at present there are no students coming from Maynooth.

4480. I am asking you for an estimate of the probable number in the future College?—Oh, yes; that is quite exclusive of the Maynooth students.

4481. You would commence then, you think, with 600 from your own College?—Certainly. May I say a word also which that brings in, which I had forgotten—that is, that we are under a grave grievance, which we and our students feel very seriously—namely, that our students, no matter how distinguished they are, if they want to study for Law are obliged to go and take courses at Trinity College. That, we hold, is unworthy of any University; and we sent in a unanimous vote to the Government from the Senate that we did not consider it consonant with our dignity to be obliged to follow courses of Law in another University, and that we were ready to provide lectureships of our own out of our own funds. We sent a representation to that effect, and it was put into the waste-paper basket in the Castle.

4482. SIR THOMAS RALEIGH.—Why have two Law Schools in Dublin?—Let it be a Law School attached to no University, and we have no objection at all, if all the law teaching is done at King's Inns. We have no objection to that, but why we should go from one University, which is supposed to have all the privileges of any University, to another University is what we have a strong objection to. But we should have no objection if the benchers of King's Inns had the whole thing in their own hands.

4483. LORD CHIEF BARON.—I want to proceed with the calculation of the probable number of students. There would probably be some students from Maynooth—what number would you put them at to be added to your 600?—Do you mean how many students in Maynooth following the course provided would come up to Dublin?

4484. How many students would there be say this time ten years from Maynooth in the new College if it were established?—In Dublin?

4485. In Dublin?—That I could not state.

4486. How many entered the Royal University this year from Maynooth?—About seventy every year will graduate from Maynooth.

4487. That will represent an average of more than 200 in the College at the same time?—An average of close on 250.

4488. Now of course you are aware that there are a number of teachers of secondary and primary schools in Ireland who teach without having any University qualification and without their capacity to teach having been tested in any way?—Yes.

4489. I suppose you do not consider that desirable?—No, I consider that is one of the great wants we have.

4490. Do you think that any considerable number of those teachers would in time resort to the University, and seek a University degree?—Oh, yes; as a matter of fact it happens now; we have members of several religious bodies going through the course regularly at the present moment.

4491. Taking that into consideration, what figure would you be inclined to add to that which you have mentioned as the probable number of students in the new University?—I think if the new University were properly endowed, and with proper buildings, the numbers would amount, in ten years, to at least 1,000 students on the rolls of the University.

4492. That is all I have to ask you in reference to that; is there anything you wish to add to this second head of your *précis* before I come to number 3?—In my first statement I think I dealt with the nature of the grievance—the grievance of the Catholic students competing in public examinations, and seeing the competitors whom they have beaten promoted to nearly all the public offices.

4493. I see in number 3 you propose “to deal with some of the objections advanced against the establishment of a University College” (I have left out the words “or Universities”) controlled by Catholics in the same degree that Trinity College and Belfast Queen's College are controlled by Protestants: (a.) Episcopal domination and undue clerical control; (b.) increase of sectarian spirit; (c.) limitation of thought and narrowness of teaching.” I should be glad to have your views under these heads?—“Episcopal domination and undue clerical control.” I see in the papers that this objection is insisted upon as one of the greatest difficulties. I will first give you the fact that the buildings in which I am teaching belong to the Catholic Bishops. I am merely a tenant at will. In those twenty-three years they never once have made a suggestion, they have never once offered a criticism of our mode of teaching, or any criticism on our administration. They knew from the beginning that the College was open to students of all denominations; they knew from the beginning, expressly in my own words, that I would have Professors selected by myself, and would have no test for them, that I would take wherever I could the best teacher I could get, of course with due consideration to the religious feelings of my students, but from the beginning I have had non-Catholics. Then, in every way that the Bishops could do it, they have clearly expressed, over and over and over again, their readiness—and, more than that, their desire—to have a Governing Body on which there would be a very small number of clerics indeed. They are quite ready to accept, in a body of twenty-four, two priests and two bishops, and all the rest laymen. It has been most emphatically stated again and again by the Roman Catholic Bishops that there was to be no clerical control; they accepted the position which I took upon myself to lay down for myself, and that is that all the posts should be given to the best men, whether laymen or priests. There is no post reserved for a priest—no post whatever. All the posts should be given as between laymen and priests—the Professorships and other posts—so that a foundation for that charge, in my opinion, absolutely does not exist. Speaking from long experience, and having been in close relation, necessarily, with the Bishops, I say that from the beginning there has never been the slightest interference, and the Robertson Commission has official information on this point of very great value, because there is a University absolutely controlled by the Bishops—absolutely and entirely denominational and Catholic—the University of Louvain; and there the bishops have not interfered; they do not interfere with the domestic treatment of the College; that is in the hands of the local governing body. Our College is supposed to be the opposite of that—seeing that I am a Jesuit, and that several of my colleagues in the teaching are Jesuits, we are supposed to represent the extreme form of that hateful thing called Ultramontanism, and I never once heard a whisper that anyone said an unkind thing or an unkind word to anyone of a different denomination, though in our debating societies, classes, everywhere—we have an average of about twelve per cent. who do not belong to the Roman Catholic faith, and not once a whisper has ever come to me from any Protestant student that so and so joked or said an unkind word to him. I do not see the slightest chance, therefore, for things so to improve that we shall not have, as we have now, a grievance which makes people in their speeches and debates outside, and in writing to the Press, say bitter things because they feel bitterly on account of the grievance. I think that once we have equality of conditions and fair play, we should have, on the contrary, very friendly feelings all round.

And now for the subject of "limitation of thought" and narrowness of teaching. In the twenty-three years that I have been head of the College I never once gave an instruction to any man about his teaching; I never once found fault with any man about his teaching; I never once heard a complaint about any man's teaching—not once. No directions do I give to them, and I may refer to my evidence before the Robertson Commission as to our teaching in the subject that would be supposed to be most strictly watched—Philosophy. In the subject of Philosophy our students are taught first, of course, our own system, the Catholic Philosophy.

4494. That is according to St. Thomas?—According to St. Thomas, yes; but not necessarily limited to St. Thomas; inasmuch as there have been other great Catholic philosophers besides St. Thomas—but the teaching may be described as on the lines of St. Thomas. But in order that the students may be truly instructed in Philosophy, we think it necessary that those who take up that study should know the whole history of Philosophy, and also the various schools of Philosophy, in order to protect them against the very deadly danger of becoming sceptics. It is not the danger of proselytisation at all that is the danger to-day; the danger to-day is that of abandoning the Christian faith altogether, and of even denying altogether the existence of truth. In order to show them the danger of those false systems, and to give the training enabling them to see the want of logic and the fallacy underlying them, we first give them a solid logical training in Catholic Scholastic Philosophy, and then set before them for refutation the fallacies of these sceptical schemes of Philosophy out of the books of the authors themselves—not out of compendiums prepared to suit our own views. And more than that, where they can do it, we have sent some of them abroad. This very year one of our men who obtained a studentship of the Royal University went abroad for two years to study in the German Universities for a Junior Fellowship, and the Bishops have sent some of their best students to the German Universities to study the German philosophy in order to train their men to meet, on their own ground, infidel, socialistic, and other dangerous philosophies. So that we have had no limitation at all in the teaching. One subject is often spoken of—Biology. The only Fellowships ever given in Biology we won at University College. We are in competition with the Queen's Colleges, where, I presume, there is no limitation of teaching and our students were sufficiently widely taught to win these chief prizes. There is one thing we should not tolerate. We should not tolerate the teaching of Haeckel in biology, but we should not tolerate it merely on the ground of its being against the Christian faith, but because we hold it to be absolutely and totally unscientific, and on the ground that such training would be bad for the man—not merely because it would undermine his faith, but because it would give him a looseness of reasoning which would injure his intellectual capacity in other respects. I believe it to be demonstrably unscientific. There is no more grounds for a charge of limitation of thought or narrowness of teaching in such a prohibition, than there would be in my refusing decidedly to give a man a licence to teach rebellion against the King. In the same way I would not allow a man to teach immoral doctrines, not because I am a Catholic, but because I am a man. I would not allow him to do it. These are the identical limitations which occur wherever there is the Christian faith, wherever there is a true sense, to my notion, of morality, quite independent of any faith. That is the only limitation I know of. I know of no limitation of teaching in any other respect. I should be very glad to answer any question to bring it out more clearly.

4495. I have one other question to ask you in reference to something you said to Dr. Douglas Hyde. You said something in relation to a tribunal above all the Universities of the country, which tribunal would regulate the University courses?—Not regulate.

4496. I did not exactly hear what you said about that, and I should like to hear your opinion. Perhaps I should say control, not regulate?—Yes, would control to a certain extent, but negatively control.

4497. Will you develop that statement a little; I was not aware of the existence of such a tribunal?—At the present moment there is not such a tribunal. It was proposed for Scotland, and it was resented very strongly there because they wanted complete Univer-

sity control. If we had, as I should much desire, separate Universities I should make no objection—and in some respects I should like—to see established a University Board. I should like to see a University, and I should like to see the permanent establishment of such an institution.

4498. You would keep the University in a tutelage state?—Not precisely. I see no objection to do for Universities what you propose to do for University Colleges which had autonomy. It was proposed, I think, that the Colleges which had autonomy granted for a certain definite purpose should have a regulating Senate above them, which would see that their standards were properly kept, which would appoint an examiner to take part in all examinations, to see that they were being kept up to the proper standard. That was regarded, and is regarded by any reasonable person, as not unduly interfering with the autonomy of the College. So long as that body could not itself prescribe the course, could not interfere with the subjects, or the manner of teaching of the course, but merely express an opinion upon the subjects, such as, for instance, "It does not come up sufficiently high; you will have to raise the standard"—then I say that a body of that kind serves a useful purpose. Transfer that, which is still consistent with the largest autonomy, to the Universities. That is all I meant, that there might be a University Board, representing the Universities; elected by the Universities themselves, with one or two University men from outside appointed by the Crown. Before that Board would go the programme of each individual University to be examined merely on the point, whether it came up to a proper University standard. The Scotch Universities, I believe, have adopted a common matriculation standard, regulated by such a Board. At the same time, even that I would only propose for a limited period—say, at most, ten years—when the institutions had satisfied the world that they were really doing good work—the same kind of institution, the very same sort of powers that are supposed to co-exist with autonomy of Colleges in one University, to do that for the two or three different Universities in the country.

4499. May I ask you to eliminate the word University and University College, and talk about a teaching institution. Assume that there are four teaching institutions in Ireland, teaching academically, that is giving instruction of a University type; you would not see any objection to provision being made by which another body would ascertain whether their standards from time to time were equal to the standard which the State considered right?—I see no objection to that.

4500. May I ask you for a moment to try and distinguish in your own mind between the University of Dublin and Trinity College. Are you aware of the constitution of the University of Dublin, and the constitution of Trinity College?—Yes.

4501. You understand that they are separate entities?—No, I am afraid I do not understand that. I have given a great deal of study to the question, and I was forced to the conclusion that the "University of Dublin" is identical with, and merely a shorter name for the full name which is found in many formal documents, namely, "The University of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin."*

4502. Supposing you put a second College in the University of Dublin, would you still consider that the University of Dublin was identical with Trinity College?—Quite, and I believe it could not be done without an Act of Parliament, and hence Mr. Gladstone in the third clause of his Bill in 1873, abolished all the privileges of Trinity College, which was then the only University existing in Dublin.

4503. Mr. BUTCHER.—To go back to the question of the Maynooth students, which I think is one of some moment, you are aware that there is apparently a considerable difference of opinion upon this point among the Bishops?—Yes. There are some Bishops who would like to have them completely kept apart.

4504. And if you remember, Dr. O'Dwyer, when he first gave evidence, expressed a hope, a rather confident hope, that there would be probably at least two hundred who would follow the Arts courses of the University. He was asked, "Would they reside in Dublin?" and he said, "I should hope so." A little later another Bishop, Dr. Clancy, questioned upon this point, said, "If such a provision were made for their education at an early stage of their course, I

Rev. Wm. Delany, S.J.,
LL.D.

*NOTE BY WITNESS.—In all my answers regarding a College in the University of Dublin, I wish it to be clearly understood that I adhere to the position described in my statement—That if the only feasible solution of the Irish University Question was held to be the establishment of such a College—properly constituted, equipped, endowed, and autonomous—in the University of Dublin, I, in common with a large body of Irish Catholics, am quite prepared to accept, frankly and loyally, such a solution, though I would much prefer another, much easier one.

Rev. Wm.
Delany, S.J.,
LL.D.

think it would work very badly, but if such a provision were made for their training after they had become priests it would work well"—Yes.

4505 The prevailing view as it finally came out seemed to be this, that some picked students from Maynooth, perhaps eight or ten in the year, after receiving priests' orders, might come up to study in Dublin?—I think there is no objection from our point of view to that part, but Dr. O'Dea also has been before you, and he inclined very strongly to having as many students as possible brought up to Dublin to go through the course. You have that in evidence.

4506. We have?—And he gave evidence as the President of Maynooth at the time, and, between ourselves, I very much prefer Dr. O'Dea's authority to Mr. Gladstone's.

4507. But I feel pretty sure of this, that Dr. O'Dea also considered that Maynooth would probably send up only a small number of men, those who were intended to become teachers or professors?—In the beginning. One reason, of course, is the absence of suitable provision, because it would mean buildings and grounds, and the means do not exist for them.

4508. Do not you think the real objection went much deeper, as I ventured to suggest before in asking the question?—Oh, yes, the other speaker spoke of the danger of the training.

4509. Did Dr. O'Dea?—He did not share that view to the same extent.

4510. Perhaps I have not read his evidence quite recently, but my impression was that the deeper objection was urged also by him. What I really wanted to ask you was, as we have not had the opportunity of asking the Bishops directly, whether you think there has been any kind of agreement, or approximation to agreement between them, since that time?—I think there has been a development in that line, shown at once by the cordiality with which all the Bishops came in who formerly were opposed to having anything to do with the University. Now the students must go through the University, pass the Matriculation, and go through the whole course. That is a large step in that direction, and hence I believe that that is the line of thought amongst the Bishops.

4511. I have no doubt that that is the line of thought, that they should all go through a University course?—More than that, I think they would be quite willing, seeing the willingness with which they now send their men abroad to the dangers of the German cities—they do that with several of their distinguished students—I think they are quite ready to see that training on wider lines, although it may involve some dangers, has more corresponding advantages. And that is brought home to them by a number of most distinguished men in the Church of Ireland, who have been students in Louvain where that is the case.

4512. They have not at present publicly spoken in favour of anything more than a University training which may be carried on at Maynooth?—Yes.

4513. Dr. JACKSON.—I understand that amongst your students you have a small percentage who are not Catholics?—About 12 per cent.

4514. When your College is established in Dublin in the neighbourhood of Trinity College, how is it that you have that small percentage. It may be that there is no particular answer, but still probably you have thought about it?—I have to some extent. It comes from the fact that our teaching is cheaper, and also that our scheme is more elastic, especially as regards women. Numbers of women at Alexandra College and other Colleges find that our scheme leaves a considerable option in the choice of subjects, and hence we have a very large number of distinguished female students in modern languages, and some of our best prizes were won by women in open competition with men.

4515. And your fees are distinctly lower?—They are. In the first place the charges of the University are nominal. Only £1 an examination, £2 or £3 for a degree, and then ten guineas a year for tuition is all we have, and we give full teaching, so that a person does not require, as he does in Trinity College, to pay for grinders.

4516. One other question, which is not perhaps very important. You mentioned that a number of your students went to German Universities. Are there certain Universities which they specially frequent?—They go to Bonne, Hiedelberg, and Berlin. Those are the three most frequented.

4517. Mr. BUTCHER.—I see from the evidence that Dr. O'Dea says he thinks it likely that eight or ten of the best students would take up a post-graduate course in Arts every year—eight or ten is all that he holds out to us there?—Is that the post-graduate? I have not read the whole evidence; I am speaking of my conversation with him, and my conversation with him led me to think that he quite agreed with me about some undergraduates coming up.

4518. I understood that we should hardly get any undergraduates?—No.

4519. LORD CHIEF BARON.—It was formerly said you might not get any; you do not apply that to the present time. Supposing that a College was satisfactorily started, you would now get ecclesiastical students from Maynooth?—The proper accommodation does not exist for them at present.

4520. But assuming there was accommodation for them?—If there was accommodation I am quite sure we should. Dr. O'Dea, I think, and Dr. Foley, and more than one of the other Bishops, were inclined to take that view.

The witness withdrew.

WILLIAM M'DONALD, Esq., J.P., Chairman of the

Cork County Council, called in and examined.

William
M'Donald,
Esq., J.P.

4521. CHAIRMAN.—You are the Chairman of the Cork County Council, I think?—Yes.

4522. I suppose you are aware of the objects of this Commission?—I think so.

4523. We are not concerned with the institution of any College in Cork, unless so far as it affects the University of Dublin or Trinity College, Dublin?—Then I was not quite aware of the scope of the Commission, but I will take your instructions. I have a short written statement, and if you will kindly let me read it it would be a great advantage to me, and probably it would relieve you of delay.

4524. We are only concerned with the Cork College so far as it may be brought into relation or not brought into relation with Trinity College. I dare say you are aware of the scheme which has been propounded of forming a University in which there shall be four Colleges, Trinity College itself, a new College to be formed in Dublin for the benefit of Roman Catholics, a College at Cork, and a College at Belfast. What do you say to that?—The scheme was never submitted to us in any way, so far as I know, and therefore, of course, I know nothing of it. I have heard you state that such a scheme has been proposed, but beyond that I know nothing of it. As far as Cork is concerned, if we get what we are looking forward to—

4525. What is it you are looking forward to?—We are looking for a University, but you say that is outside your scope.

4526. Yes?—Then failing that we want an autonomous College.

4527. That, I am afraid, is outside our scope also, unless it be an autonomous College in association with the University of Dublin?—An autonomous College in association with the Royal University was what we looked for.

4528. You prefer an autonomous College in connection with the Royal rather than an autonomous College in connection with Dublin?—Certainly.

4529. Do you wish to read your statement to us?—If you will permit me to do so.

4530. I am afraid a good deal of it is entirely outside our scope, but perhaps you had better begin it, and we will see how far we can go on with it?—As you have been supplied with a copy of the document I need not, I suppose, read the returns as to the population.

4531. No, perhaps that is not necessary?—And also the area of the county.

4532. We know that Cork is a large and important county?—Just so, but it is because of the area and extent of the county that we are basing our claims for a University,—that it is a long distance away

from anywhere else. That is the reason we submit our claim to you, and also bearing in mind that Scotland has four Universities, while it only has a similar population to the population of Ireland including Cork.

4533. That is an important consideration for those who have to settle the question of founding a University in Cork?—I think you have also had copies of the resolutions that have been submitted to you.

4534. Yes?—Then I need not read those, because you have had copies of them supplied to you; but if you would like me to read them I will.

4535. We have had them already. If you like to say anything in support of them we should be glad to hear you?—The statement says:—"The Council that I represent feels, therefore, the great responsibility that rests on them in this matter of higher education, and being elected by all classes of the people are determined to do their part towards providing a system of University education that will be acceptable to their constituents without exception, and I have no doubt that if a satisfactory settlement of this question is arrived at, they will contribute to the expenses by means of an education rate. A rate of one penny in the pound in the County of Cork realizes over £4,600 per annum, not of course including the City of Cork, but to secure this rate in aid I am perfectly convinced that it is absolutely essential that the place of University education for Munster should be established in Cork. The claim of the people is for a University in Cork, and this claim has been already put forward by the Cork County Council. The people may accept an autonomous College, but it must be understood that this College should be perfectly, fully, and absolutely autonomous, with a governing body in touch with all classes of the people."

4536. What do you mean by "autonomous" there? Do you mean that the examinations shall be in the hands of the College?—I take an autonomous College to mean this:—Such College to decide its own courses and subjects, arrange what degrees it would give, and make such regulations with regard to the conduct of its courses and the discipline and guidance of its students as seemed good to its governing body; that it should conduct its own examinations on its own premises, to accommodate and save expense to those of limited means; that its degrees should also be conferred in the College for the same reason, also affording an opportunity to the residents of the county and city, and parents of the students to be present on the conferring of degrees, which would be the means of promoting local interest and pride in their own College. Such College to be governed by a Council, as in England, formed of the teaching staff, members of the County and City Council, and those representing other important interests, clerical or lay. Such would bring it into harmony with its surroundings. If the Royal University were re-constructed, and some of its objectionable features removed, I would favour giving it control, power of inspection, etc., over the College or Colleges, cognisance of all courses laid down for degrees, with power to express an opinion on them, and power of objection where any College was lowering the general standard of degrees.

4537. The duty of the University would be to keep up the standard?—Yes; of the Royal University.

4538. I wanted to understand what you meant by "autonomous" in your resolution. Would you like to continue now?—Yes. "The University is preferred, but it is only in the event of this demand being refused that an autonomous College might be substituted, but the latter is the very least that the people would accept. In support of this statement permit my quoting the resolutions of the Cork County Council passed unanimously after due notice to every member at the quarterly meeting held on the 6th September last." Shall I read the resolutions?

4539. I think we have had them all?—Yes; they have been forwarded to you. I do not care to waste your time by reading them.

4540. They are not very short, are they?—No; there is quite a page full of a resolution proposed by myself which was carried unanimously, and another resolution proposed by another member of the Council, which is a short one, but I will not read those unless you specially desire me to do so.

4541. They are already printed in our records?—I know they have been forwarded to you. The statement continues—"I am aware that in addition to the Cork County Council, other public bodies popularly elected have passed somewhat similar resolutions, for instance, the Cork Borough Council, the Waterford Borough Council, and the Mallow Urban Council, and I am convinced at least in the County of Cork there is practically an unanimity of opinion that the creation of a University in Cork by the reconstitution of the present Queen's College on such a basis as to make it acceptable to all classes in the province, would be conducive to the very best results. Having had many opportunities of hearing the views of representative men of all classes, and discussing this question, I can state that the creation of a federal system of University education meets with no favour with the Southern people. What is wanted is simply a University or an autonomous College subject to a University, but invested with the management of its own affairs, with authority to draw up its own curriculum, conduct its own examinations, and confer locally its own Degrees. Kindly permit me to refer to the third paragraph of the County Council's resolution, and in connection therewith to point out that there are a large number of persons in this county who could and would avail themselves of the Cork College if made acceptable to them for the education of their sons, who could not under any circumstances bear the expense of sending them to Dublin, and there would be an immense increase in the number of students in the Cork College if once this question was satisfactorily settled. It would take a life-time, in my opinion, to eradicate the people's prejudices to Trinity College, no matter what reforms are carried out, and, therefore, if a local University, which is what we desire, is not attainable, let us have at least an autonomous College as part of the Royal University as the alternative; any amalgamation with Trinity College will be a disastrous failure. I am of opinion that there would be no difficulty in constituting a Board of Governors for a local University acceptable to the people of Munster. The plan that has met with success in England in the management of the new Universities might certainly get a trial in Ireland."

4542. Dr. JACKSON.—I should like to ask you one or two questions. I think you spoke of removing some of the objectionable features of the Royal University. What do you mean by the objectionable features of the Royal University?—Not being an expert witness on University management and Universities generally, I prefer not to answer that question, because I do not know exactly what the objectionable features are; but it has been stated to us that the University has objectionable features.

4543. That being so, I need not ask my further question, which would have been: What are the particular objectionable features which you think should be removed, whilst the others possibly might remain. I suppose that that question naturally falls to the ground?—Yes.

4544. Dr. DOUGLAS HYDE.—The Lord Mayor of Cork, Mr. Barrett, who recently gave evidence before us, said that supposing Cork were provided with a University that was satisfactory to itself, the people of Cork would be willing to help that University out of the rates; are you of that opinion, too?—I am of that opinion. The matter has been mentioned, and there was no objection raised to it. We discussed the whole matter; in fact, there was a notice of motion handed in to the County Council with regard to that particular matter, and it was put down to be proposed at the last meeting. Unfortunately the gentleman who gave notice of it is a medical gentleman with a very large practice, and he was called away to a case, and when he came back again to the meeting we did not have a quorum, so it dropped through. I would not allow any other gentleman to propose it.

4545. You are of opinion that the people of Cork would help a University out of the rates?—The Committee that met before the Council were perfectly agreeable to tax themselves if they got anything in the shape of a University or a College.

4546. If you get an autonomous College suitable to your needs in the Royal University as it is at pre-

McDonald,
Esq., J.P.

sent, would you help that out of the rates, too?—I think so; but the measure of our concession would be the measure of our rate.

4547. I only mean would you help it?—Oh, yes.

4548. Supposing you had a practically autonomous College which would meet your wants, and to which all classes could go freely, that is to say, one joined on with Belfast, with a fresh College in Dublin, and Trinity College, all being joined in one University, your own College being practically autonomous, would you help it out of the rates then?—I have no doubt we should if we got it. What we are looking for is an autonomous College. It does not matter to my mind what would be joined to the University so long as we were placed in a proper position. Then I have no doubt we would subscribe towards the upkeep of it.

4549. Dr. CORREY.—Have you considered who would appoint the Professors in the autonomous College?—The Professors would be appointed, I daresay, by selection from the Royal University or as the controlling authorities might agree. I do not understand that the representatives of the districts on the Governing Body would have anything to do, or should have anything to do, with the appointment of Professors, because I do not think they would be qualified to make the selection.

4550. But do you not think when they tax themselves to support the College that they should have recognition in the appointment of Professors?—I would not favour such a claim.

The witness withdrew.

The Commission adjourned till the following morning.

THIRTEENTH DAY.

TUESDAY, NOVEMBER 13TH, 1906.

AT 10.45 O'CLOCK, A.M.

At the Royal Commissions House, 5 Old Palace Yard, Westminster, London, S.W.

Present:—The Right Hon. Sir EDWARD FRY, P.C., D.C.L., LL.D., F.R.S., F.B.A. (Chairman);
The Right Hon. C. PALLES, P.C., LL.D., Lord Chief Baron of the Exchequer in Ireland;
Sir THOMAS RALEIGH, M.A., D.C.L., K.C.S.I.; Sir ARTHUR RÜCKER, M.A., D.S.C., LL.D.,
F.R.S.; HENRY JACKSON, Esq., D.LITT., LL.D.; S. H. BUTCHER, Esq., M.A., LL.D., D.LITT.,
M.P.; DOUGLAS HYDE, Esq., LL.D.; DENIS J. COFFEY, Esq., M.A., M.B., F.R.U.I.; S. B.
KELLEHER, Esq., M.A., F.T.C.D.;

and J. D. DALY, Esq., M.A., Secretary.

The Right Hon. The EARL OF DUNRAVEN, K.P., C.M.G., P.C., called in and examined.

4551. *Witness*.—I have prepared some notes. I do not know whether it would be convenient to the Commission for me to read them before I answer any questions.

4552. CHAIRMAN.—If you please—take whatever course is most convenient to yourself?—I think it might save time. It is unnecessary, I think, to argue that in the matter of higher education the Roman Catholics of Ireland—that is to say, 74 per cent. of the population—labour under serious disadvantages as compared with their Protestant fellow-countrymen. The only institution at present existing which is worthy of the name of University is the University of Dublin; and of that University, consisting as it does solely of Trinity College, Roman Catholics practically make no use. The functions of the Royal University are merely those of an examining body, and are confined to the granting of degrees which are by no means equal in value to the degrees conferred by Dublin University or other Universities throughout Great Britain. That Roman Catholics desire to avail themselves of facilities for higher education is proved by the numbers that come up to the Royal University although its degrees are, as I have said, of comparatively little value, and by the numbers that pass through Intermediate schools, and perforce stop short at University education. The limiting effect upon the opportunities and careers of Roman Catholic youths resulting from the educational disadvantage under which they suffer need not be pointed out, but I would call attention to an effect which is not perhaps sufficiently recognised. Complaints are frequent, and are justified by the facts, that the number of Roman Catholics who obtain positions of emolument in their native country under the Government, are disproportionately small to the number of Protestants who secure such positions. The reason is that for these positions and for many other positions not under the control of the Government, the best available material is to be found among Protestants, on account of the superior education they have received; but the ignorant naturally attribute it to partiality and favouritism, and a certain amount of jealousy and friction is thus engendered, detrimental to the well-being of the whole community. It cannot be denied that Roman Catholics suffer under disabilities, and feel that their religion places them in a position of inferiority. I therefore take it for granted that in theory at any rate the necessity for such reform as will remove those disabilities is universally conceded. I do not approach the subject as an educational expert. I make no claim to be one, nor with the desire to formulate a theoretically ideal scheme; but with the endeavour to look at it from the point of view which a statesman would take in considering what measure of reform is within the area of practical politics. I take public opinion, ecclesiastical

opinion, political exigencies, and all other such matters, into consideration, and have attempted only to devise a scheme which would have a reasonable chance of passing through Parliament, of being acceptable to the people of Ireland, and of proving beneficial to them. Various plans for University reform in Ireland have been from time to time placed before the public. In reviewing them, I have kept before me certain conditions which, in my opinion, must be satisfied in order to give any scheme a reasonable chance of success. In the first place, the scheme must be acceptable to the Roman Catholic Hierarchy. I do not mean to say that it must be fully satisfactory to them, but that it should be of such a nature as they are able to accept. Secondly, the scheme must be generally acceptable to the Protestant people of the United Kingdom. I do not mean that it must necessarily be entirely free from objections, but it must be of such a nature as to do no violence to their religious scruples or political convictions. Thirdly, the scheme must be of such a character and of such dimensions that any Government would have a reasonable chance of adopting its principles and carrying it through Parliament. Almost on the same plane, of necessity, is the requirement that there should be only one National University for Ireland. Reform must be of such a character as to tend to bring creeds, classes, and localities together in a larger conception of a common interest in one National institution. I deprecate anything which would accentuate the differences at present existing. To these tests I have subjected various schemes that have been put forward from time to time. First, there is the suggested transformation of Trinity College in a National University. Trinity is willing to make concessions, but the development of Trinity as a solution of the problem is neither desirable nor possible. It is not desirable because if changes could be made which rendered Trinity acceptable to the Roman Catholic Hierarchy it must become in the course of time predominantly Roman Catholic, and consequently the position which now exists would be completely reversed, with the result that another educational problem the converse of that which now exists would generally arise. It is not possible, because the Roman Catholic Hierarchy have distinctly and unequivocally stated that no change or development of Trinity could be accepted by them. I accept the fact as a fact which must be recognised as final. Development of Trinity will not be acceptable to the Hierarchy; any scheme to be successful must be acceptable to the Hierarchy. The development of Trinity does not, therefore, satisfy the first condition I have laid down. Secondly, there is the creation of a Roman Catholic University. For similar reasons I regard this to be impracticable as a solution. A Roman Catholic University with State endowment would not be tolerated by Protestant opinion. I accept the fact as inconsistent with the second condition

I have laid down, and I eliminate a Roman Catholic University. Thirdly, there is the scheme elaborated in the recommendations of the Robertson Commission. The objections to that scheme are that it did not command the assent of all the members of the Commission; that it is of the nature of a compromise, which does not satisfy public opinion in Ireland; that it is too elaborate, and would not fulfil my third condition, namely—acceptability by Parliament. It involves in its inception two Universities, and it contains, as it seems to me, a centrifugal force which is bound to result in the establishment of several Universities. It, therefore, conflicts with the ideal of one national institution, and would tend to accentuate rather than diminish the differences between creeds and classes, which now, unfortunately, exist. Moreover, it is doubtful whether by any means and any effort the Royal University could be raised to such a position as to give the degrees conferred by it an equal value to those conferred by other Universities. The Royal University is not a good foundation to work upon. Proposals have been made involving a multiplicity of Universities, by the great enlargement of the Queen's Colleges in Cork, Belfast, and possibly Galway, and for the creation of a new institution in Dublin. There would be four or five Colleges and four or five Universities. All the objections which apply to the recommendation of the Robertson Commission apply with equal or greater force to these schemes. The population does not warrant such a multiplicity of Universities, or institutions of the character of a University, and the expenses involved in suitably endowing and equipping all these institutions, of raising them up to a University status and keeping them there, would render the realization of such a scheme impracticable. The degrees also of these separate institutions would be of comparatively little value. I, therefore, come down by process of elimination to a scheme which I adumbrated nearly three years ago, and which I have had the honour to submit in a more definite shape in a Memorandum to this Commission*:—namely, the Development of Dublin University into a great National University, a live, teaching University with suitably equipped Colleges within it. The opinion I believe exists that a system of one University with several constituent Colleges would create an amount of friction from which a system of several independent Universities would be free. I cannot see any validity in that argument. A University for Ulster, Munster, and Connaught, and two for Leinster would surely tend to segregate the people of those provinces into their several Universities. They would never meet. It would stereotype their Provincialism, and, in so far as provinces represent differences of race and of religion, would stereotype racial and religious differences. Provincial Colleges would stimulate local ambition and rivalry quite sufficiently, and would satisfy all local peculiarities and needs. Surely the fact that students, though members of separate Colleges, and eager for the honour of their Colleges, were also members of one Irish University and concerned for the honour of Ireland as represented by that University would tend to soften, rather than harden, any sense of antagonism between race or religion that may now exist. Between two or more Universities there would be rivalry and no inter-communion; between the constituent Colleges of one University, there would be healthy rivalry but inter-communion. Separate Universities would confine patriotism and sentiment to locality; one University would enlarge patriotism and sentiment by giving all Irishmen a living interest in one great Irish institution. There are already indications among young men of different creeds and different classes of a desire to draw closer together. It may not be easy to do very much towards encouraging that desirable tendency, but at least it is possible to avoid doing anything which would have the effect of discouraging it by forcing men apart and practically shutting up the youth of Ireland so far as education is concerned in religion-tight compartments. It would be a vast mistake to overburden Ireland with Universities. The main thing is to offer such University education as is naturally and normally required, not to stimulate the people to a degree or description of education which they cannot utilise. The field for profitable employment of highly-educated men in Ireland is small. It will expand, but it can never be very large. The field is large in Great Britain, the demand great; but the supply is great also. Cases,

and not infrequent cases, must, I think, be known to all of us where men of great attainment, highly educated in many faculties, in medicine, and applied science of every kind, are compelled to accept positions bringing in as remuneration an annual sum that represents a very small interest on the money invested in their education. It is the opinion of not a few educationists in Scotland that the output from the Scottish Universities, particularly on the Science side, already far exceeds the demand, and in England this tendency is likely to be more marked in future as the new Universities which have been set up in the great English provincial capitals get into full working order, and will become yet more marked when London University has associated with it the new Scientific College which is to be created at South Kensington, an establishment more or less corresponding to Berlin's "Charlottenberg." Private benefactors have already provided about half a million sterling for equipping London's Charlottenberg, and it will receive grants from the Imperial Government and from the London County Council. The movement for a more widely-diffused system of higher education is making great headway in England. The result of a system involving the creation of a fully-equipped, thoroughly-endowed University for each province, with an additional one in Dublin, would mean a vast waste of money unless they received sufficient popular support in students, and if they did receive sufficient support to justify the expenditure it would mean disappointment to the students. I would venture to impress upon the Commission the virtue of moderation. To embark upon a great enterprise requiring very large grants would be, I think, to court disaster; and it is not needed to satisfy the present circumstances of the country. I would prefer to begin quietly, but on true principles, to raise on a sound foundation a modest structure capable of expansion should the future requirements of the community justify it. For historical and other reasons, Dublin University appears to me the proper basis for a scheme for University education in Ireland. It is in a sense only by the accident of omission that Dublin University has become practically Trinity College, or to take it the other way, Trinity College has, through default, become practically Dublin University. Trinity College was founded in the reign of Queen Elizabeth, and the scheme originally contemplated the foundation of other Colleges. The Charter of James I. conferring on Trinity College the status of a University, foreshadowed the establishment of other Colleges or Halls within that University, an idea repeated in more recent legislation. That is going a long way back in history; but there is virtue in historical sequence, and it is advisable, in my opinion, to make a clean sweep of the various attempts which have since been made to deal with the problem of University education and to revert to the original intentions of the founders of Dublin University. Dublin University is—if I may be allowed a commercial expression—"a going concern"; its status is known and recognised; its degrees are highly regarded. It offers a strong nucleus of academic lay opinion round which the Senate of a remodelled University may form itself. It is in every way a suitable foundation to build upon. As I understand the position taken up by some members of Trinity College, they are nervous lest, by co-operating in a scheme for a national University, the high standard of Trinity degrees would be degraded. This argument being founded merely on prophetic fears, is not susceptible of disproof. I should have thought that Trinity College would aspire to take the lead in educational renaissance in Ireland. Be that as it may, I can see no valid reason for supposing that a University such as I propose would be negligent in keeping the degrees up to the highest standard, and if Trinity has misgivings, she need not abandon the time-honoured and famous letters, "T.C.D." Such a scheme as I advocate could not really damage the deservedly high reputation of Trinity, and would, I think, satisfy the three conditions I have laid down, namely, it would be acceptable to the Roman Catholic Hierarchy; it would not be considered objectionable by Protestant opinion; and it would not arouse political opposition. It would also result in the creation of one University for Ireland. To come to the scheme which I have had the honour to submit in the form of a Memorandum* to this Commission, the main features of it are

* See page 422.

the establishment within the University of Dublin of three additional Colleges, namely, Queen's College, Belfast; Queen's College, Cork; and a new College to be established and suitably equipped in Dublin. I stipulate that the University and its constituent Colleges should be free from all religious tests, and from religious disabilities of any kind. The University is to determine the faculties to be maintained, with the exception that no theological faculty is to be created. Attendance at the lectures of the University Professors would, of course, be obligatory; but I assume that, whereas in Dublin those lectures would be given in the University buildings if so desired, in Colleges not situated in Dublin the lectures would be given in those Colleges. The Senate, I propose, would consist of the Chancellor and Vice-Chancellor of the University, the heads of the constituent Colleges, and the Doctors and Masters of Arts. The University Governing Body would be constituted solely with reference to academic considerations. I propose that it should be composed of the Vice-Chancellor and twenty-four persons appointed in the first instance by the Crown, half of them to be representative of the constituent Colleges. The nominated element would gradually be lessened without interfering in any degree with the representation of the Colleges. The Governing Body is to fulfil all the usual functions of such bodies; to establish Chairs, Scholarships, etc.; appoint Professors; allocate Fellowships, and so on; fix the courses for examinations, and appoint Boards of Examiners; but I stipulate that the teaching staff of the Colleges shall be represented on the Boards of Examiners. The Governing Body of the Colleges, except Trinity College, I propose, shall be in the first instance nominated by the Crown, and shall be filled as vacancies occur by election by the Councils of the Colleges from among the Fellows and members of the Professorial or teaching staff of the College, or from other persons if they think them desirable on account of their exceptional knowledge of educational matters; but I limit that exception so that the teaching staffs of the Colleges shall be properly represented on the Council. The Governing Bodies should be bodies corporate. The Councils of the Colleges would have all the ordinary functions and powers given them. I have considered the advisability of a broader electoral basis, and of a larger measure of autonomy for the Colleges. I am not opposed to a larger electorate, and I am of opinion that the Colleges should have as much self-governing power as is consistent with their position as constituent Colleges of one University, and with the status and solidarity of that University. But my object is to get the system started, to see the University created, and the resources of the Colleges enhanced, and for that purpose I think the system I recommend is advisable. The powers and functions under that system will automatically become enlarged, and I give power to the Caput of the University and the Councils of the Colleges to alter the statutes, subject to the consent of the King in Council, so as to make possible any development that experience and the needs of the future may justify. I do not propose to interfere with the Divinity School of Trinity College, because I would desire to interfere as little as possible with the historical position which Trinity has won or with its future; but I am bound to admit that, in abstract justice, objection may, possibly be made to this proposal. I propose to attach the Cecilia Street School of Medicine to the new College to be created in Dublin, but I would not object to its becoming the Faculty of Medicine of the University. I propose that the Arts Faculties of St. Patrick's College, Maynooth, of the Magee College, Londonderry, and the College of Science, Dublin, shall be affiliated with the Colleges of the University, and I give power to the University to affiliate, or recognise in any way they think fit, any educational institutions external to the University. I exempt from any interference the endowments of Trinity College, private endowments, endowments impressed with denominational trusts, and endowments of theological institutions, unless the Governing Body of any such endowment should desire that the Commissioners should deal with such endowment. As regards the Board of Visitors. As the Board of Visitors may have to enquire into and decide upon questions involving faith and morals, or of teaching offensive to the religious faith of the students, the Board must either consist of or contain what I may term theological

experts, or it must be empowered to call in the assistance of such experts. For, I think, obvious reasons I prefer the latter alternative, and suggest that the Board of Visitors for the University and its constituent Colleges should be appointed by the Crown, and have liberty to appoint assessors. The function of the Board of Visitors in such cases as I have mentioned would be of a judicial character; the assessors would, of course, be appointed in reference to their capacity to deal with the theological or religious points at issue, they would advise and practically decide upon them. As regards finance, I am, of course, unable to form any opinion as to the amount that would be required for the transformation of Dublin University into a great and live University for Ireland; to satisfy the requirements of the existing Queen's Colleges at Belfast and Cork; and to create and suitably equip a new College in Dublin; but I have thought it well to mention that, for the last thirty-five years, the sum of £60,000 a year, which had previously been annually voted by Parliament for Maynooth and the *Regium Donum*, has been struck off the Votes. These are, I think, the principal points in my proposals. The results I hope to obtain, and which I think would be obtained, would be a living National University consisting of four constituent Colleges. They would all be free from religious tests of any shape or kind. The University and its constituent Colleges would be open to everybody. As a matter of fact, the new College to be created would be predominantly Roman Catholic in its atmosphere; Trinity College would remain as it is, mainly Episcopalian; Belfast College, mainly Presbyterian; and Cork mainly Roman Catholic. I suggest the conversion of the Queen's College, Galway, into an Agricultural College and Technical Institute. It is not to be implied that I think that the Queen's College, Galway, can possibly serve all Ireland for technical education of a higher kind. Ireland is mainly agricultural, but its other industries are capable of considerable revival and development; technical education of a suitable character is greatly needed, and will, I doubt not, receive adequate attention on the part of the Colleges. But I do not wish to overburden the scheme. The great thing is to make a beginning, and I think we may safely trust that the University and its constituent Colleges would adapt themselves to the requirements of the country and of the localities in which the Colleges are situated.

4553. I listened with great interest to the paper you have been good enough to read to us. Might I ask you a few questions? In the first place, would you consider it vital to the success of any such scheme that there should be a willingness on the part of the Colleges to be gathered together under one University?—Yes; most desirable.

4554. Now, then, if we take Trinity College, I suppose it is plain that they do not wish to be brought into the scheme?—Trinity College does not wish it?

4555. Yes; that is the evidence before us as far as it has gone?—Then the question would be whether, if Trinity was recalcitrant, it should be allowed to stand in the way.

4556. Quite so. Then take Belfast. We have had the President of the Belfast College before us, and he very strongly objects to be brought into this scheme. We have had also the President of the Cork College; he, too, strongly objects. In the case of Belfast, I think a meeting of the Professors has been held to consider it. Galway has come before us, and it does not wish to be extinguished nor to come into the scheme. Is not that a very serious difficulty?—Yes, but the president of a college might have a particular reason for objecting. Of course, I do not know what reasons they gave, or what alternative they would put forward; but I presume the alternative would be that they should be practically converted into separate Universities.

4557. A different suggestion has been made, but I think what most of them suggest is that they should remain affiliated to the Royal at present, with the possibility of developing into other Universities. But to put four bodies together, none of which wish to be joined, seems to suggest great difficulties, does it not?—It does not sound very advisable, but I assume the objections are raised on the part of Governing Bodies, and that the scheme is not necessarily equally objectionable to the students or to the people of the country.

4558. To take the Roman Catholic Hierarchy we had before us yesterday, not one of the Bishops, but one of the very influential teachers of the University College, Dublin, Dr. Delany, and he says that not only he, but he believes the whole Episcopacy would object to this scheme?—They would object to a scheme of this kind?

Mr. BUTCHER.—With one doubtful exception, he added.

4559. LORD CHIEF BARON.—The Archbishop of Dublin says the contrary?—I have not it before me, but I thought the Archbishop of Dublin was rather in favour than the reverse.

4560. CHAIRMAN.—Dr. Delany gave that as one doubtful exception, but said that with that exception the whole body were opposed to it, and certainly he himself was extremely opposed to it—in fact, he said that of all possible schemes that was the worst?—I think Archbishop Walsh gave evidence on the Commission of 1903?

4561. Yes. I was going to put another question to you. In the year 1904 you wrote a letter which foreshadowed the scheme which you now put in detailed form. Now, is there any evidence down to this time of that plan receiving the assent of any class of people or of any College?—I am not sure that my letter attracted very much attention.

4562. I think it attracted a great deal of attention?—Speaking very vaguely, from my impression only, I think the lines indicated in that letter would have met with the approval of the Roman Catholic Bishop of Limerick, with whom I had some conversation; but of course that is only my opinion.

4563. But there was no public assent or approval of that scheme?—Perhaps not, but I do not think there was any public disapproval either.

4564. Now, I will call your attention to a resolution passed by the Governing Body of the Royal University last month after full discussion condemning the idea of a single University for Ireland—has your attention been called to it?—No. On what grounds do they base their resolution?

4565. They do not state their grounds for the resolution, and I daresay they voted on different grounds perhaps. I should rather like to ask why do you think one University is so essential for Ireland? Is not the tendency now in the direction of the multiplication of Universities rather than the developing of a single University?—I do not know as to Ireland, but certainly in England the tendency is towards amplification.

4566. And in France?—Yes. If Ireland was as rich as England or France, and there was the smallest possibility of funds being found locally, I should have not the same objection; but as there is not the least prospect of the fund being found locally, I do not think it is desirable to ask the Government for that amount of money. That is only one reason—there are others which I have mentioned—why I think one single University preferable.

4567. You suggested also that it would be an advantage to bring the Graduates from the other Colleges to give them the opportunity of taking a Degree in that University. Would that be quite straightforward? I mean the present Degree is a Degree of an old institution, the value of which is known, and if you introduce into that Graduates from Cork and Belfast, they would belong to different systems altogether, and you would apparently be giving the same trade-mark to goods of a different description?—The Degree would be the Dublin University Degree.

4568. But would it be quite fair to attach that old name to the new Degree?—I think so, if the University kept its standard as high. If the standard was allowed to drop it might be called something in the nature of a fraud.

4569. But would it not almost inevitably drop if the standard of the students was lower?—I do not see why it should be allowed to drop.

4570. Generally is it not found impossible to keep up the standard of a Degree unless the average student is capable of grappling with it?—You say the average student would not be up to the average student of Trinity College?

4571. That is what I suggest?—I do not see why not.

4572. LORD CHIEF BARON.—You do not see any rea-

* See page 476.

† "What is a National University," a pamphlet by Mr. George Fottrell (Hodges Figgis & Co., Dublin, 1905), page 31.

son why the average student in that College should not be equal to the average student of Trinity College?—None whatever.

4573. It is a mere assumption, I would suggest, without the slightest evidence to support it. Wherever the two classes up to this have been allowed to compete the class that would probably be represented in the new College seems to have been the most successful. I refer to the returns of the Intermediate Board and the Royal University. Just one question I intended to ask you. This Commission has been furnished with a letter from the Archbishop of Dublin to the Under-Secretary, in which these passages occur:—"Since then we" (that is the Bishops) "have, as you know, been consulted on one occasion. It was in reference to the scheme known as Lord Dunraven's, which was published by him in the Dublin newspapers of the 4th January, 1904."* That is practically the scheme that you have now developed before us?—Yes.

4574. "Consulted by Mr. Wyndham as to whether, in their opinion, the University question could be settled on this basis, the Bishops, as you know, answered in the affirmative." Had you an impression that that was the state of affairs?—I was not aware of it.

4575. Were you under the impression that some of the Bishops were in favour of it?—I was under the impression that Dr. O'Dwyer, the Bishop of Limerick, to whom I talked about it, was in favour of it.

4576. Now, with regard to the general opinion in reference to this letter when it was published, do you remember whether, a very short time after the publication of that letter, it was stated in Parliament that the Government had no intention of bringing in a Bill themselves?—No; I do not remember that.

4577. I wish to read you a passage from the book published by Mr. Fottrell, one of the witnesses examined before us, to see if it will bring some of these matters to your recollection. "Petitions approving of it" (that is, the scheme foreshadowed in your letter) "were signed. Meetings were held throughout the country, at which resolutions in favour of the scheme were passed by acclamation. It was an open secret that the Catholic Hierarchy were prepared to sanction it. The great meeting in Dublin held in the Round Room of the Mansion House was attended by clergymen and laymen in about equal numbers; and at it His Grace the Most Rev. Dr. Walsh, Archbishop of Dublin, presided. Neither at this, nor so far as I can learn, at any other meeting of Catholics in Ireland held to support the Dunraven-Wyndham scheme was there a dissentient voice."† Do you remember any opinion of that class when your scheme was first promulgated?—My impression is that I thought the scheme had not met with any great approval, but that, on the other hand, it had not met with any great disapproval—in fact that it fell rather flat.

4578. You thought that, being a moderate scheme amongst a number of more extreme schemes, it did not find much favour?—I do not think the people generally thought it was a live issue at that moment.

4579. Sir THOMAS RALEIGH.—You will understand one is not expressing any opinion upon your scheme as a whole, but I should like, if you will allow me, to assume that it is a good scheme, and only wants working out, and from that point of view to call your attention to one or two points of detail. First, as to your proposal with regard to Galway, I should like to put to you this question, whether by keeping Galway as it is—a University College, but with appliances to develop itself in a technical direction—you cannot get all the results you hope from this proposal, and in a less invidious way?—And leave Galway?

4580. Leave Galway a University College, and give it special resources for developing its technical side?—I should see no objection to that, except the general one of expenditure. I mean I am under the impression that Queen's College, Galway, has been so little availed of—so little use has been made of it that probably there has not been much demand for higher education in Arts, and so on, there. My objection is on the ground of utility and expense.

4581. The whole object of any changes introduced now would be to conciliate local opinion to such an extent that the number of students at Galway would be greatly increased—in fact, unless you anticipate

that it is really hardly worth discussing the future of the College?—No.

4582. Then, my next point is the exclusion of Theology. Now, you are aware, of course, that a large proportion of the students in a National University would be preparing for the priesthood of the Roman Catholic Church or for the ministry of some other religious denomination. They go into schools of Theology, and we are glad to know that the teaching in many of these schools is exceedingly good, and that where Degrees are given considerable value attaches to them. Do you think these are matters which a National University can entirely ignore?—You mean it ought to have a Theological Faculty.

4583. I am not putting anything definite at this moment, but supposing I put it on principle—that in Ireland the University will recognise any school of Theology where the teaching is scholarly and sound, and will see that the standard of Degrees will be maintained—do you see any objection in principle to that?—I see no objection in principle, but I do not see how it can be carried out.

4584. I am not proposing to bring the schools together in any way, or to make distinctions, but merely putting it that the University will have a general supervision of this as of other branches of education?—Not providing for religious instruction in the Colleges.

4585. I am speaking more of the professional study. I observe that in constituting your Senate, you propose to include all the Doctors and Masters of Arts, and if all the Colleges are brought together the Doctors and Masters of Arts would be a very large body?—Yes.

4586. And a varied body—a body not at all accustomed to act together. Do you think the time has yet come to establish a Senate of that kind?—Of course, it will be very numerous; it will be a very numerous body—I suppose perhaps two or three thousand.

4587. Yes. Do not you think there will be a danger of the debate being rather heated?—No; I do not think so, because the functions of the Senate would be of an indefinite character. I have not gone into the question of whether the University should have Parliamentary representation, but I suppose if it had the Senate would be the elector; otherwise it would act as the elector for the Governing Body.

4588. Then, we come to your Council. You propose a body of twenty-five, and you propose amongst other things that this body should appoint University Professors to allocate Fellowships, and so on. Do you not think that in a body so large, and representing different denominations, the basis of the whole action of the Council might come to be an understanding as to the division of these appointments, and that there would be a great pressure by the different interests to get their fair share of the appointments for their own men?—You mean a sort of system of so many Roman Catholics and so many Protestants?

4589. Yes?—No; I think not.

4590. Has not that been to some extent the history of the Royal University?—Yes; of course, it might arise unquestionably, and it would be very undesirable if it did arise.

4591. I only put it as a matter of detail, because you might consider whether the appointment of Professors should not be provided for in some way by small electoral Boards, as at Oxford, for instance?—I think so.

4592. Sir ARTHUR RÜCKER.—I think some of us would be very glad if you could make one point clear. In England, as you know, the Victoria University consisted of three Colleges of similar types, and after about twenty-three years it broke up. You used a phrase which struck me very much—that you hoped to be able to bring the localities together. Now, I should like to know whether in Ireland you are likely to bring localities together, and to bring together Colleges very diverse from each other. Why should it be easier to bring them together under one system than it was in England?—I do not know about easier, but certainly it would be much more desirable in Ireland than in England.

4593. Could you give us any reasons for your hope that the scheme would succeed?—I see no reason why it should not succeed; my object, of course, is to

avoid separating the different localities, and the different creeds, and the different classes into completely separated water-tight compartments; I think they ought to have one common ground of meeting, which could only be afforded by the one University.

4594. That being your general view, may we follow it up on one point to see how it would work?—You have spoken of the appointment of University Professors. Now, suppose Cork and Trinity were united in one University, would you have the Professors of Cork appointed by the central body of the University?—No; I would have the University Professors lecture when necessary in Cork.

4595. Do you mean you would have a man sent down from Dublin to lecture at intervals?—He would have to be more or less peripatetic.

4596. That is absolutely impossible in science?—You could not expect the students in Cork to come up to Dublin to attend, of necessity, the University lectures. I do not pretend to be very well up on all the technical points of University education, but I do not see any difficulty or objection to a University Professor lecturing, we will say, in Cork or in Belfast?

4597. Well, I think everyone would agree that the educational influence of the teacher depends very much upon his mixing with his students outside the lecture room, seeing them individually, looking over their exercises, and teaching them in detail, as well as merely giving a formal lecture. Now, how would a man, going round in turn to three or four Colleges in Ireland, be able to get that personal contact with the students, which is so essential to the success of the teacher?—That would involve that all the Professors were University Professors. That is not my intention at all.

4598. Then your University Professors would really come in, as a distinguished foreigner does at some of the English Colleges, when invited to give a course of four up to ten lectures, and they would play a part very little more intimately connected with the life of the College than that of the foreigner whom I have just spoken of. How would you in that way secure that the teaching of the various Colleges—the detailed teaching by the College authorities—should be brought up to the level of the teaching, say, in Dublin?—You mean the University authority would not have sufficient control over the appointment of Professors in the Colleges?

4599. I put it to you, would they?—I should think so.

4600. Would you give them any control?—There are the examinations, of course.

4601. Though the most important teaching would be given by somebody else—the University Professors?—Yes.

4602. I think I may say that the one cry of nearly all the Colleges is, "Let us be autonomous; let us manage these things fairly ourselves"?—I can understand it is the desire to do so.

4603. Then the great difficulty is to keep up the standard of teaching if there is to be no supervision?—Yes.

4604. Do you see any way out of that?—It seems to me that if the University body settles the curriculum, arranges the course of studies, and conducts the examinations and controls them, and appoints a Board of Examiners, they have quite sufficient power to ensure that the course of studies are sufficiently good in these various Colleges.

4605. It is very difficult to secure that. Let us take another point. I think you admit there are difficulties in this matter; assuming there are these difficulties, why is this new body better able to deal with them than the Royal University, which has already, to a certain extent, been dealing with questions of a similar kind?—The Royal University does not teach.

4606. But when we talk of the Royal University, we, of course, always mean a reformed Royal University, something on the lines of the Robertson Commission. Why should a body which has already had considerable experience all over the country be a worse body to undertake this task than a brand new body?—I do not say that in that particular respect it would be worse.

4607. The experience which the officials of the Royal University have had might be useful, you think?—Yes.

4608. Dr. JACKSON.—I should like to ask you one or two questions on matters of detail. I observe that it is a characteristic of your scheme that you would have four constituent Colleges, and not two only. I think one of your reasons for preferring a four-Colleges scheme to a two-Colleges scheme is that there would be less friction with four constituent Colleges than with two only?—Two constituent Colleges?

4609. Well, you, I think, assume that there would be Trinity College and another College in Dublin, and also Cork and Galway?—And Belfast.

4610. I beg your pardon—Cork and Belfast. Do you prefer that arrangement to a University in Dublin with two Colleges, partly, because, if there were four constituents, there would be more give-and-take over examinations and things of that sort?—Yes.

4611. I desired, also, to hear something about your reasons for saying that the scheme of Lord Robertson's Commission would not be acceptable to Parliament. You thought Lord Robertson's scheme would not be acceptable to Parliament?—I thought so, because it is much too ambitious—too expensive. It seems to me that it must develop into at least four Universities.

4612. In fact, you are thinking of the ultimate schemes, and not of the immediate future?—Yes; it would require very large grants. I may be quite wrong, but my impression is that Parliament would not be disposed to make very large grants to Ireland just at present.

4613. After what you said to Sir Arthur Rücker, I still do not understand why you think the Royal would not be a good foundation?—The Royal University?

4614. Yes?—Chiefly on the ground that I mentioned—that its degrees do not command a very high value. In the one case you start with a University whose degrees are well-known, and highly valuable; and in the other case you have got to bring it up to that standard, which would be very difficult.

4615. There would be, when you had established the new College, a doubt as to whether the value of degrees would be raised—whether, instead of that being so, the value of degrees would not be lowered?—That is on the assumption that the University would not keep up the character of the degrees—that is pure assumption.

4616. But still, there would be a doubt whether the University would be able to live up to the high standard of a great historic College?—I do not myself think that there would be any doubt about it, though it is of course possible. But, in any case, the fact that a student came up from Trinity College would be perfectly well known. Even on the assumption that the education in Trinity College would be superior to the education in Cork or Belfast. It would be perfectly well known by the certificate that the student had come up from Trinity College.

4617. The examination, I suppose, would be with you a joint examination of the students of the Colleges, not separate examinations on the part of the Colleges?—No.

4618. I myself, I confess, think that that is of the very first importance. As to the fear which has been expressed, that the attainments in the subordinate Colleges might be smaller than those in the old, historic College, is it conceivable, on the other part, that there would be a greater number of quite serious students in the new Colleges than in the old one? I am thinking of English University experience in asking the question. One knows that in the older Universities of England there are some pure idlers, and I do not think that there are so many pure idlers in the newer ones. Do you think that would be so in Ireland also?—Yes. There might be idlers to some extent, but not to the same extent as in England.

4619. You think that the Trinity College students in Dublin are quite serious students?—I should think so; yes.

Dr. JACKSON.—I am glad to hear it. I am sorry that the average at Oxford and Cambridge is not so high.

4620. You used a phrase about exempting from interference the endowments of Trinity College;

but do you think it would be unjust, if your scheme were carried out, for Trinity College to be called upon to contribute something towards the expenses of the University?—No; speaking for myself, I do not think it would involve an injustice; but I want to avoid all possible ground of friction in regard to Trinity College.

4621. That I understand?—In other words, if Trinity College raised no objection, of course there would be no objection, and the thing would be intrinsically right, I think—just.

4622. It seems to me that Trinity College had imposed upon it, in the first instance, the duty of creating a new University; hitherto it has avoided the duty of creating a University by making a University of itself; consequently, I would ask you whether you agree with me that it would not be unfair, if academic functions were distinguished from collegiate functions, that some contribution should be made by Trinity College to academic expenditure?—I do not think it would be unfair.

4623. And do you agree with me that even if no such scheme were to be adopted, at the present time in consequence of scientific advance, it would be necessary for Trinity College to be at considerable expenditure anyhow? Even if the situation remains as it is, would it not be necessary for Trinity College to do more for modern studies than it has done in the past?—Well, that is a question that I do not think I could answer.

4624. I should have gone on to ask you whether that expenditure would not be just the expenditure which is wanted for starting the University; whether, in fact, the separation of University from College would not create additional expenditure, but expenditure which would in any case be inevitable. As to the Senate: the Senate, I presume, would be a large body, not a body concerned with the detail of administration?—Quite so.

4625. I think you call the administrative body the *Caput*?—Yes.

4626. Mr. BUTCHER.—Have you observed—considered—the working difficulties of a Federal University?—Not in regard to the details; no.

4627. Well, take the cases of Federal Universities in this country. Of course, you know generally the history of the Victoria University, which began as a Federal University, and whose Colleges have now developed into separate Universities?—Quite.

4628. There is now, you are aware, a Federal University also in Wales. Is not this the case, looking to experience, that even where the Colleges are homogeneous, and even where they are pretty nearly equal in respect to the number of their students, and further, where they are equal in age and in prestige, that even so it has been found very difficult to hold together a Federal University consisting of such constituent Colleges?—It seems to me that in those cases the centrifugal force is very strong, and, it may be, is capable of acting—that is to say, that the several Universities are possible on account of the population, and the demands of the population, and the support that would be given—the financial support that can be obtained—from private sources; but when you consider that the whole population of Ireland is less than the population of London, and that there is no possibility of any such private assistance being given, it seems to me that the circumstances are not at all on all fours, and you cannot argue from one to the other.

4629. I quite admit you cannot argue fully from one to the other. On the other hand, Scotland has four Universities, and is approximately equal to Ireland in population?—Yes.

4630. Then there is the Welsh University, in Wales. I do not know whether you have looked at the evidence that was given before the Robertson Commission as regards the University of Wales?—No, I have not.

4631. And the difficulties that occur even there. In Principal Reichel's evidence he says, "That experience of the Welsh University shows that the federal system is workable where the constituent Colleges are homogeneous in character and united by a strong underlying unity of sentiment, and where their number prevents the line of cleavage in University policy becoming one of College against College." And further evidence was given to show that mere consideration of distance

—the distances between College and College—makes it extremely difficult, administratively, to work. Do not you think those objections would be as strong in Ireland?—As strong as in Wales?

4632. Stronger even?—No, I do not think stronger; certainly there is more difference between North and South Wales than between the North and South of Ireland.

4633. In Wales there is not, is there, any distinct line of religious difference, such as that which complicates the University question in Ireland?—I am afraid I could not agree to that.

4634. So far as I have understood the matter in the Welsh Colleges the religious question has never come in at all?—I do not know; I do not pretend to know much about the working of the system in Wales; but as regards religious difficulties, they are rather strongly accentuated in Wales.

4635. In primary education, yes; but is not it true that the religious question in Ireland enters in a sense in which it never did in the Victoria University in England, and in which, as far as I know, it never has done in Wales?—Possibly.

4636. And is not the further difficulty that in Ireland the distances are greater than in the case of the Colleges which constituted the Victoria University, or in the case of the Welsh Colleges constituting the Welsh University?—Would they be greater than the Welsh Colleges? I do not know, but I should have thought not.

4637. Dublin, Belfast, Cork—I think that would be so. Anyhow, experience seems to show, does it not, that a Federal University may be useful as a stage in the development of Colleges into Universities—that is hitherto our sole experience of Federal Universities, I think. One cannot point, I mean, to a Federal University of a permanent kind?—Under certain circumstances, as I understand it, Federal Universities do tend to break up—they tend to become separate Universities. That may be so under certain conditions, but I do not see that it follows that it would be so under totally different conditions, such as exist in Ireland.

4638. Is there anything in Ireland tending to make the probability of the cohesion of widely separated Colleges greater than we know of elsewhere?—Yes, I think so.

4639. I should like to know what that is?—The general sentiment of nationality—the desire for an essentially Irish institution.

4640. I see. In spite of marked differences of religion?—The marked differences of religion, so far as University education is concerned, is a difficulty; but the difficulty does not, as it appears to me, consist so much in the differences of religion as in the attitude which the Roman Catholic Church takes up on the matter.

4641. In spite, then, I will say, of the very divergent ideals of University education?—Of course, there are different ideals entertained by different people. What I mean with regard to religion is, I do not suppose the Roman Catholic laity would entertain the strong objections they do to Trinity College if it were not for the fact that the Church practically prohibits them from making use of Trinity College.

4642. But that points again to a different ideal, does it not? No one denies that, I think; there is a different ideal—that there are two ideals of education which I should have thought would make complete unity more difficult in Ireland than in any other countries which I know. And I would put it to you, do you not think that there would be a very strong probability, if this University were constituted, of the Colleges breaking up, and becoming each of them separate Universities? Would not Trinity College probably attempt—endeavour—again to become a University, and would not the Catholic College also attempt to become a University?—I do not myself see that; I can understand that Trinity College might possibly desire to constitute herself a University—that is possible; but I cannot see what possible object either Belfast, Cork, or the new College in Dublin would have to choose this course.

4643. You would admit, however, that the opinion of the Catholic Bishops and Archbishops, and of those who control the higher education, and in particular University education, in Ireland, has always centred itself on an independent University?—I do not think

so—you mean that would be a separate Roman Catholic University?

4644. Yes?—I think they have abandoned that; at least, that may be their ideal, but they do not insist upon that ideal.

4645. Still, in the papers before us, that is, as you admit, the ideal at which they aim?—Yes.

4646. And is it likely that they will entirely abandon the ideal?—I think they practically have, as far as one can judge by their public utterances. It is an ideal, at any rate, which is impossible of accomplishment unless the Protestants in England will accept it.

4647. On the other hand, we must take into account, I suppose, the fact, now apparent, that they do regard the Federal University as a scheme which is to be condemned, in short?—Who?

4648. The Bishops of the Roman Catholic Church?—Well, of course, I do not know—not to my knowledge.

4649. Assume that they do for a moment—merely assume it—do you think there would be any use in setting up in Ireland a system which was condemned by the Roman Catholic Bishops?—There would not be the slightest use in setting up in Ireland a system of Universities, or Colleges if the Roman Catholic Hierarchy distinctly said it was so objectionable that they could not allow the Roman Catholic laity to avail themselves of it; of course it would be useless.

4650. I would ask this further question as regards the Federal system. Your four Colleges which are to be constituent Colleges of the University are to be supplemented by certain affiliated Colleges?—Yes.

4651. And the greater the number of the Colleges you add to the Federal system the more you will probably add to the difficulties of working the system—or do you not think so?—No, I do not think so; you refer to—

4652. Affiliation of the Arts Faculty of St. Patrick's College, Maynooth, the Arts Faculty of the Magee College, Londonderry, and the College of Science, Dublin?—That is three—I do not think so; I have added: "Power to affiliate or grant such recognition as may be desirable to other institutions external to the University."

4653. "Other institutions"—yes?—Probably that word might need some definition.

4654. May I ask what meaning you would attach to "affiliation"—it is capable of many meanings?—What I mean is the affiliation of the Arts Faculty of St. Patrick's College, Maynooth, to a University.

4655. What are the privileges which affiliation carries with it?—I presume that the Maynooth students would go through the third year of their course in that University if they desired to take it up to B.A. or M.A.

4656. In the first instance, I suppose, then, a certain portion of the time spent in residence at one of these Colleges would count as University residence, would it not?—Yes.

4657. Would that be the sole privilege, or would you also, in the case of an affiliated College, give some representation on the Governing Body?—On the Governing Body of the College?

4658. Of the University?—Well, the affiliation would be with the College—what I propose is affiliation with any College of the University, of the Arts Faculties of Maynooth and of Magee College—that would be a question of what representation the affiliated body would have on the College.

4659. I see; but you do not think that the affiliated body ought directly to be represented on the University Governing Body?—No, I don't think so; but I had not considered that point.

4660. In the case of a very large College, a large Arts Faculty like Maynooth, would it be possible to resist the demand that such a College should receive some representation on the Governing Body of the University?—On the University Body?

4661. Yes. It would out-number, you see, all the other Faculties, and out-number the Arts Faculty, possibly, in all the other constituent Colleges. That is one of the difficulties—that you are dealing with an affiliated College so big that its claims would need some special consideration, how it should come in, would it not?—I had not considered that point—that is to say, whether in an affiliation of that kind they would have more direct representation?

4662. Yes, on the Governing Body of the University?—No, I had not considered it.

LONDON.

The Right Hon. The Earl of Dunraven, K.P., C.M.G., P.C.

LONDON,
Nov. 18, 1906.
The Right
Hon. The
Earl of
Dunraven,
K.P., C.M.G.,
P.O.

4663. In your University Governing Body the Colleges all receive equal representation, do they not?—Yes.

4664. That is to say, Trinity College, Dublin, so far as its representation goes, is on an exactly equal footing with Cork?—Yes.

4665. There is a good deal to be said, I see, for that; but there are besides some obvious objections that might be made, are there not—to bodies so unequal in character, in numbers, in history, and in prestige being put upon terms of equality?—It would be very difficult to assess the value of historical prestige and numbers, would it not?

4666. Mere prestige perhaps—although of course Mr. Gladstone did attempt it, as you no doubt remember, in his Bill of 1873, which rather resembles your scheme in certain respects.

Sir ARTHUR RÜCKER.—It was provided in the Charter of the Victoria University that the Colleges should not necessarily be equally represented.

4667. Mr. BUTCHER.—It was provided for in Mr. Gladstone's Bill, and it made a very complicated system. I did not know whether you had considered the objection that may arise. There is only one other small point—it is towards the end of your paper, and is only a matter of detail. You provide that after the Royal University is dissolved, the Graduates of the Royal University shall be attached to the reconstructed University of Dublin, that the Graduates who have been at Magee College Londonderry, or at Queen's College, Belfast, shall be attached to Queen's College, Belfast, that the Graduates who have proceeded from Queen's College, Cork, shall be attached to that College, and so forth. You do not there say what is to become of those Graduates who have never been at any College, but have simply taken their degrees without attending lectures at any institution?—I say, "the Graduates who proceeded to the Royal University Examinations from the undermentioned group of Colleges" and so on; you wish to know what I would do with the men who had taken out degrees from other institutions.

4668. Not from an institution at all—it may be from home study. They are to be attached to some College, are they not?—Yes.

4669. Would you give them their choice?—I had not considered that point.

Dr. JACKSON.—Might I ask you a question on this point—would it be necessary that they should be attached to a College? The essential thing is that they should be attached to a University, and they might become members of the University without being attached to any particular College.

Mr. BUTCHER.—There is that possible way out of it, no doubt, but their case ought to be considered, I think.

4670. Dr. DOUGLAS HYDE.—I take it you have brought forward your claim for a revised Dublin University, consisting of four Colleges, as an attempt to settle the very vexed question of University education in Dublin University?—Quite so.

4671. And you think that if the question were settled in a way which would give substantial remedy to the grievance under which our Roman Catholic fellow-citizens have suffered—you think, I say, if that were satisfied—not perhaps wholly satisfied, but partially satisfied—for instance, we had the Presidents of the Queen's Colleges here, and none of them seemed very pleased with your scheme—but you think that if on general principles the whole University question was to be settled in a way in which Roman Catholics could take advantage of it, the prejudices of those who are against it ought not to be given undue weight?—I think not.

4672. And you would extend the same thing to the prejudices of Trinity College?—Yes.

4673. So that it is your view to over-ride any apprehensions of corporate bodies now existing?—Quite so.

4674. I suppose when you were first induced to submit this scheme, or to think about it, you were largely actuated by the fact that Trinity College, the only real University in Dublin, seemed to have got more or less out of touch with the people of the country?—Yes.

4675. And you thought, I daresay, that by bringing together Trinity College and three other Colleges in a single University you would be broadening, if I may say so, the sympathies, the views, the minds of all the people who would be coming together in that

University, including Trinity College itself?—Quite so.

4676. And in your view the scheme for a Senate, with doctors and M.A.'s meeting together, would be of actual service to the country, because they would be brought together for the first time?—That is so.

4677. We have had some evidence brought before us as to the admirably harmonious way in which the Senate of the Royal University, consisting of Catholics, Episcopalians Presbyterians, and members of other denominations has worked. Do you see any reason why, under your scheme, the same thing would not happen?—No reason whatever.

4678. Your original scheme, as I understand, was for a second College within Dublin University?—Yes.

4679. You have broadened out that scheme to include four Colleges. I take it the reason you have done that is that whilst, if there were only two Colleges, they might be at daggers drawn with each other, the other two might see fair play, as it were, and produce more stability?—They would produce more stability.

4680. Is that the idea underlying your changed scheme?—You mean as compared with my original letter?

4681. Yes?—In the original letter I left Trinity out of consideration?

4682. LORD CHIEF BARON.—No, you had Trinity in it. You left Cork out?—Yes, that is what I mean.

4683. Dr. DOUGLAS HYDE.—I quite understand your point of view. Then it has been alleged—in fact Father Delany urged it yesterday—that in a scheme of affiliated Colleges the degree of the outlying Colleges would not carry the same weight, that, in fact, the examination would not be as hard as an examination inside Trinity College. Do you see any reason for that?—None whatever.

4684. Dr. DOUGLAS HYDE.—I take it there would be no difficulty—even if the examination were not the same, and the course was different, and the various Colleges constituting your University each developed upon lines of their own—you do not see that it would be at all impossible for a central body to inspect the scheme of examinations and to report to the Senate as to whether one was as difficult as the other. Do you think that is possible—for some central body to report to the Senate as to the courses in the various Colleges, and to secure that one course should be as difficult as another?—To the central body?

4685. Well, your *Caput* or your Senate?—Oh, yes. I did not quite clearly understand the point.

4686. You would like, no doubt, to see the various Colleges of your Federal University allowed to develop along the lines that suited their own localities?—Yes.

4687. Do you not think there is considerable difference in the racial peculiarities of the people of Ireland, and that the Colleges ought to be left with as much autonomy as possible, to answer to the racial instincts of local students?—Yes.

4688. That being so, I take it there would be always more or less differences in the courses of the Colleges?—Yes.

4689. What you want to provide for is that one course shall be as difficult as another course—that is, that the University degree, no matter which College it is taken out in, shall be one of equal value?—Quite.

4690. You do not see any difficulty in providing for that, do you?—None whatever.

4691. Have you ever observed in Ireland that when Irishmen come together or are brought together, they are more prone to quarrel than people of other nations?—I think on the contrary.

4692. I think on the contrary, too. Has there been any instance in Ireland where bodies representing different creeds, and I might also say different races—different classes—have come together and have failed to do their duty harmoniously?—My personal opinion is, if you ask me, that the religious question has, perhaps, less to do in Ireland than in any other country I know of with causing difficulties between individuals who meet for any other purpose.

4693. That is when they are once brought together—the thing is to bring them together?—Yes, to bring them together.

4694. And your scheme is one for bringing them together?—Yes.

4695. And supposing that under your federal scheme the Colleges should in process of time, if Ireland become more wealthy and more populous, drop off like

ripe apples from your parent University, do you see any objection to that?—No; if it was due to the natural course of development required in the country it would be unobjectionable.

4696. And in point of fact you think that even should your scheme give rise to friction at the start, and give rise to a good deal of apprehension, and should it not be generally accepted by the people of the various Colleges at present, still with a view to settling the question in Ireland it is better worth trying than not trying?—Quite so.

4697. Dr. COFFEY.—The great majority of the under-graduates of Trinity College belong to the Episcopalian Protestant population—about seventy-five or seventy-six per cent.?—Yes.

4698. And the population of that religious community of Ireland is something like 400,000, I think. Your scheme, then, contrasts with the scheme of the Robertson Commission, of a federal Royal University with reformation of the Colleges, to this degree—that it takes into the federal University system the University-going students of that population?—I do not quite understand.

4699. Lord Robertson's Commission recommended a reformed Royal University in which there would be a new College established in Dublin?—Yes.

4700. And in that University you would have all the Colleges of the country included, except Trinity College? Yes.

4701. One result of that is that it excludes, or cuts off, a section of the population from the University likely to become the University of Ireland. It cuts them off from the rest of the country—the Robertson Commission scheme does—and your scheme proposes to include that section?—Certainly, it does.

4702. You think there would be a greater bond between the different sections of the people by a federated Dublin University than by the federated Royal?—Quite so.

4703. If the Robertson Commission proposal had been carried out, do you think that in the long run Dublin University, left to itself, would gain or lose against the other University in the country?—Personally, I should think so, the latter; I think that it would be a disadvantage to Trinity.

4704. And from an Irish point of view—if the different sections of the Irish people could be drawn together in their University education it would be desirable?—Certainly.

4705. Now, one outstanding feature of your scheme is this—no College in the scheme is made officially denominational?—Quite.

4706. In the Robertson Commission scheme one was made officially denominational?—Yes.

4707. That was the Catholic College?—Yes.

4708. From the point of view of academic character, relation of one to another, it is desirable that all Colleges should be on the same footing, and that one should not have a particular official character?—Quite so.

4709. From the point of view of public acceptability it seems also more practical that no College should have an official denominational recognition?—Quite so.

4710. With reference to such Chairs as would be University Chairs, as distinct from Chairs in the Colleges, might the body of University Professors, as distinguished from the Collegiate teachers, be at first small?—I provide that Collegiate teachers and tutors may be appointed to be Professors of the University, provided they are not Theological.

4711. Might they not at first be small in number—might it not be the case that at first the Chairs would be few in number, but that they might be a feature which would grow in accordance with the progress of the University, and the needs of the country?—Quite so.

4712. It might be possible, in such an elastic system as that, if a particular province of Ireland were developing in a particular technical line, to create in one of the Colleges certain University Chairs. If in Cork or Belfast, for instance a particular industry were being taken up for which special scientific knowledge was required, it might be possible to have such a Professorial Chair of the University there?—A Pro-

fessorial Chair of the University permanently situated in one of the Colleges?

4713. Permanently situated in one of the Colleges to meet the need for the kind of knowledge which had come in after the foundation of the University, and to fit the special environment?—I should not think that desirable myself.

4714. If that were to occur might it not be free from objection in this sense—that the other University Colleges would not necessarily feel aggrieved by the possession by the one College of that particular Chair, inasmuch as the particular objects of that Chair were best applied locally?—Yes.

4715. Then, in reference to the affiliation of Maynooth College, I think you said that you would have the College in Dublin accept the first two years instruction of the Arts Faculty in Maynooth as equivalent to the Collegiate teaching?—Yes. I was assuming that probably the third year's course of the Maynooth student would be taken in Dublin University.

4716. And you have a provision by which the Governing Body of the College is open to accept two members from the outside?—Yes.

4717. If a large number of students were coming to Dublin from Maynooth in their third year (you told us their third year would be taken in University College), it might be possible, might it not, to have that College represented in the two external members that would be accepted on the Governing Body?—Certainly, it would.

4718. CHAIRMAN.—One question before we part. I should like to draw your attention to two schemes—your own scheme, which involves a reconstruction and alteration in the University of Dublin—Trinity College—and the scheme of the Royal, to put it shortly. Now, Trinity College is an ancient institution which has given satisfaction to a certain class, while the Royal is a modern institution of recent date, which in its present condition gives satisfaction to nobody. Now, speaking as a legislator, is it not wiser to try the experiment, which is contemplated here, with a modern institution giving satisfaction to nobody in its present condition, rather than with an ancient institution which is giving satisfaction at any rate to a certain number of people?—You prefer to try the experiment with an institution satisfactory to nobody, then. I, on the other hand, look at it just in the other way—I should prefer to work with the other institution, which does give satisfaction to somebody.

4719. Although you destroy the institution?—I would not destroy the institution at all.

4720. Dr. JACKSON.—Just one point of detail. At the bottom of your second column on the first page, in the last sentence, you say:—"The assignment of £..... for the provision of University buildings, and for the maintenance of the University, its Fellowships, Chairs, and Prizes"?—Yes.

4721. The Fellowships surely are Fellowships in the College rather than in the University?—Yes.

4722. Would it not be clearer and more correct to say "for the maintenance of the University and its Chairs and Prizes, and for Fellowships and Prizes in the proposed new College." That was what I imagine you meant?—That was my meaning.

Dr. JACKSON.—It is a small point, but I think a Fellowship is always in a College, not in a University, and I think it important that the distinction should be maintained here.

Mr. BUTCHER.—Of course, in the Royal a Fellow is Fellow of a University and not of a College, so that the phrase has an accepted meaning.

Dr. JACKSON.—But I think in a reconsidered scheme, such as is proposed here, we might be more accurate in the use of a phrase. It is, perhaps, pedantic to take the point, but it tends to clear the air.

Mr. BUTCHER.—But I imagine that when Lord Dunraven says "Prizes" he means University Prizes.

Dr. JACKSON.—I am not proposing to strike out "Prizes," I said "for the maintenance of the University and its Chairs, and Prizes, and for Fellowships and Prizes in the proposed new College."

Mr. BUTCHER.—I see "Prizes" twice.

Dr. JACKSON.—Yes, I think the Colleges would want to give prizes as well as the University.

Dr. DOUGLAS HYDE.—Does it not seem absolutely necessary, for the purpose of working out your scheme

that Queen's College, Cork, should be made acceptable to the population. If you provide any scheme, should it not be such as to make it acceptable to the populations surrounding it?

4723. CHAIRMAN.—Surely, the Queen's College scheme should be exactly the same in that respect as the Dunraven scheme; is not that so?—Quite so.

The Witness withdrew.

J. I. BEARE, Esq., M.A., F.T.C.D., Regius Professor of Greek, called in and examined.

J. I. Beare,
Esq., M.A.,
F.T.C.D.

4726. CHAIRMAN.—You have been good enough, in conjunction with Mr. Smyly, to furnish us with a statement* on the subject of the Classical School, Trinity College, Dublin?—Yes.

4726. You are Greek Professor, I think?—Yes.

4727. That joint statement we will consider as read. Then you have also been good enough to suggest several points to which you wish to speak. The first subject is Trinity College, Dublin?—A mere reference to it is all I wish to make as the basis of what I mean to say further—not more than a few words. May I ask you, as you have spoken of the Classical School, whether you have received a statement from Mr. Starkie corroborative of mine, and contradicting a previous witness?

CHAIRMAN.—Yes; it has only reached us this morning. I had better read it before we begin. He says this—"My attention has just been called to a paragraph on page 63 of the Appendix to the First Report of the Royal Commission on Trinity College, Dublin, and the University of Dublin. The paragraph runs as follows:—'As to my criticisms of the Classical School, having graduated at Cambridge, as well as in Trinity College, I have had special opportunities of comparing the two systems'"—this is from the statement of Dr. Leech—"and I may mention that the only other official or ex-official of Trinity College—the Resident Commissioner of Education—who has had the same experience, has arrived, as I believe, at the same conclusion." I wish to say that I did not authorise the writer, Dr. Leech, to represent me as sympathising with the criticisms of the Classical School, which he has elaborated on page 60 of the same Appendix, and I disassociate myself from them, especially from the following remark:—"As regards Classics . . . its (viz., Trinity College's) reputation has never stood, and does not now stand high." The Classical School of Trinity College needs no tribute from me; but I cannot refrain from saying that I believe Dr. Leech's views as to its position to be completely at variance with the opinion of those best qualified to judge, both in England and elsewhere. My appreciation of the distinguished scholars with whom it has been my privilege to associate since I entered Trinity College, Dublin, and from whom I have learned most of what I value, is well known to my friends; and it is perhaps unnecessary for me to provide against being identified with an estimate of their work with which I profoundly disagree. I would ask you to read this letter to the Commission, and to include it in the next volume of evidence." That, I think, ought to go in.

Dr. JACKSON.—There are some of us here who know how unjust the remark is. At Cambridge we have a very profound respect for the Classical Scholarship of Trinity College; but that is not all—we have received from it again and again numbers of excellently trained students—Dr. Brougham Leech for one.

4728. CHAIRMAN.—I think, therefore, that after that it is hardly necessary for you to enter upon a defence of the Classical School?—I did not intend to do any such thing.

4729. Please proceed?—It has been asked: Why, if Trinity College, Dublin, and the University of Dublin are one, should not the Principal Professors of Dublin University be Fellows of Trinity College? And the practice at Oxford and Cambridge has been quoted to support this proposal. But even in Oxford and Cambridge, a Professor of the University has no right to a Fellowship in a College, unless the Corporation of the latter desire to have him, and to pay a portion of his stipend. Besides, though for certain purposes, e.g., ownership of pro-

4724. Dr. DOUGLAS HYDE.—With regard to the Library of Trinity College, I suppose you thought that as it was the only library in Ireland which was worth anything, and as the buildings had been provided by public money, the whole population should get some benefit out of that library?—Quite so.

party, Trinity College and Dublin University are one, yet the former is a corporation with certain rights, in which (a) the Fellowships are for life; (b) carry large salaries; and (c) imply the sole right of accession to the Governing Body. Also, there is no University chest in Dublin University apart from the College chest, which pays all the expenses of both the University and the College. Therefore, to carry out the proposal suggested in the above question, a revolution would be required in the system by which Fellowships are held in Trinity College—such a revolution, perhaps as took place thirty years ago, in Oxford and Cambridge, by which the Fellowship system should take a subordinate place, and the Fellows' salary be lowered to something like that of our present University Studentships. Now, the question is: would this be good for Dublin University, and for Trinity College, Dublin, as organs of higher education in Ireland? If so, of course it should be done. In what follows I crave leave to criticise at least the proposals which have (so far as I know) been made tending to or involving such a change in Trinity College, Dublin. I think that the proposals of Document V. of Blue Book I. (Appendix to the First Report of this Royal Commission) would not, if carried out, be beneficial, but would be highly injurious to Trinity College, Dublin, and Dublin University as organs of higher education in Ireland, or rather higher education in general. With Document V., I will criticise Document IV. also. The latter, though, is rather of personal than public importance. In these two documents the signatories declare themselves in favour of certain changes, in order: (a) to render the College and University more efficient as educational institutions; and (b) to improve the position of the Professors, who are now (it is alleged) at a disadvantage as compared with the Fellows, their tenures being precarious, and their rank being invidiously lower than that of the Fellows of the College.

4730. CHAIRMAN.—I presume you are a Fellow?—I am a Fellow, and, therefore, I am treading on rather delicate ground, and I would ask the Commission to excuse me for entering into these very delicate personal matters which I have to go into. I feel it rather a painful duty, and, of course, I propose to mention no names. The former of the two objects mentioned above being the more important, I will deal with it first, and consider how far the change proposed would have the desirable effect claimed for it. With the second object I will deal more fully afterwards. But I may say, at once, that I regard invidious distinctions among men who have to work together in our University as *per se* deplorable; and that I have the fullest sympathy with those who suffer from them. If they can be removed with advantage to the College and University they ought to be removed. Also, I wish to say that, in the criticisms which I shall make of the Professoriate as compared with the Fellowship system, I shall speak with the deepest respect of all concerned; my sole purpose being to determine, by comparison of both, the question which of them better deserves to conduct the government of the College and University; that is to say, under which of the two the highest and best interests of the College and University would be better secured.

The line of demarcation between Fellow and Professor may be invidious, but it has the merit of being clear and sharp: moreover, it is based upon the distinction between College and University; and it is vindicated, in each case, by the fact that the Fellow has passed—and has always had to pass—an examination, which entitles him to his Fellowship; while the non-Fellow Professor, for whatever reason, has not passed this examination, though open to all graduates of the University. Now, suppose for a moment that this

* See page 350.

distinction were abolished: the Professors' proposal (for though signed also by seven Junior Fellows, it really originates from a few Professors) claims that thereby invidious distinctions would cease among us. But would they. On the contrary, the distinctions which divide the Professors themselves would then become prominent, and would be not less invidious than the one complained of, which now obscures them all. Of the Professors, some lecture only in professional work, *e.g.*, Medicine; others only in Arts work, *e.g.*, Languages or Literature; others in both, *e.g.*, Natural Science. Some have large, others small, salaries. Some usually devote all their time to their academic work, others regularly have their principal occupations, with large fixed salaries or professional incomes, in spheres quite outside the University. But the scheme proposed in Document V. (that is to say, the one I am criticising) makes only one grand distinction—that between Principal Professors and non-principal. The term principal Professor is explained to mean "whole-time" Professor. In itself "Principal Professor" is a complete misnomer; for its definition would exclude some of our most distinguished and indispensable Professors, especially in the Medical School; men of whom we have particular reason to be proud. Yet the term "whole-time" Professor, though preferable, does not effect its purpose of classification; for there is nothing necessary or permanent in the character it defines. The man who is this year a whole-time Professor was, or may have been (I am not referring to any particular man), a couple of years ago, attached to external bodies and in receipt of a salary, whether as lecturer or an examiner from these bodies; and there is nothing to prevent him, if he chooses, from being similarly attached hereafter. The one truly common and peculiar characteristic of the non-Fellow Professors as a class is, that they each teach one single branch of Professional or Arts work—they are all specialists; and this distinguishes them substantially, as they are distinguished formally, from the Fellows.

I must now consider the question—who are the Professors? I begin by dividing them into two classes, those who are *alumni* of our own, and those who are not. Some are *alumni* of our own—close and valued friends of ours; but they are men whose undergraduate courses of study left them without the qualifications required by competitors for Fellowship. They fill, nevertheless, important positions—such as they are fitted to adorn—in their University. Others of the Professors are not our own *alumni* but imported men, of whom the very fact that we have chosen them to fill our Chairs, though not this alone, compels us to speak with high respect. But some of them may have had no University Degrees in Arts or Science, until we confer honorary degrees upon them. They are chosen, "on their credentials and published work," as Specialists, to teach in special subjects; and they do it to the profit of the University. Some of the latter class—the imported Professors—come to us from England, some from other parts of Ireland. Some join our staff when they have reached a mature age; at first, and for some time, they know little of the University as a whole; nothing at all of the College; their knowledge is confined to the working of their own classes. Each of them is too apt to consider the interest of the whole—the College and University—in the light of the one part alone of which he has himself any real knowledge. The former division of Professors are comparatively free from this error, but even they are to some degree affected by it occasionally.

Now, who are the Fellows? They are, generally speaking, men who, before getting Fellowship, have lived in College between the ages of eighteen and twenty-eight; taking part in its life—at lectures, examinations, in the great societies, in the playing fields, and so on. After the usual struggle with competitors, they pass the Fellowship Examination, and become members of the Body from which the Board is recruited. From their youth they have been part of the College. The subjects in several of which all of them competed for Fellowship are:—Mathematics (pure and applied), Experimental Science, Classics, Hebrew, and (until a few years ago) Cognate languages (Syriac and Chaldee), Mental and Moral Science (ancient and modern). I suppose the Commission does not wish me to go into that particularly.

4731. Take whatever course you think desirable?—I mean to criticise the existing Fellowship Course later on. If the above list be regarded not only in itself, but in its implications, it will be seen that a candidate who

has answered successfully in two or three of the subjects must be possessed of a considerable fund of academic knowledge—especially, bearing in mind the high standard of the examination, and the usual severity of the competition for Fellowship. The secondary subjects involved in these—or at least in the Classics, Mathematics, and Philosophy—are studied by candidates with no less effect than the primary. Classics involves, of course, Ancient History, and Comparative Etymology, and the Classical Fellow often adopts one of these for special study after his election. It was in History that Mr. Bury, for example, did his special work after getting Fellowship. The Fellowship course, too, helped to train Sir Robert Ball (who, unfortunately for us, did not succeed in winning a Fellowship), and others who have obtained distinguished consideration elsewhere. In fact, the course of study required for this examination has indirect results, which are often no less good than its direct results, in educating candidates for the development of important special work, both literary and scientific. While, therefore, it is perfectly true that it would be absurd now (though it was once the custom) to choose men for Professorial Chairs by competitive examination, inasmuch as for these Chairs we desire men in the full maturity of their powers, and with a reputation already made, it is by no means absurd to choose our Fellows in this way. For the men who are elected Fellows should be young; they should be our own *alumni*; and they should be men of high promise, being adequately equipped with knowledge of several leading subjects, as a basis from which they may afterwards specialise in particular directions. Those we obtain in this way as Fellows are well able to teach our Honour Classes, and to raise their pupils and successors to their own standards of attainment. We do not choose Fellows by the criterion of good school-masters.

The Fellows are our principal examiners and lecturers for the eight Honour Examinations by which Honour Degrees in Arts are obtained here. In Mathematics, Classics, Philosophy, only Fellows examine and lecture. In the Examination for Moderatorship in Experimental Science, three out of the four examiners are Fellows. In those for the Degree in History and Political Science, Modern Literature (whether in French and German, or in English with one of these), and Legal and Political Science, Fellows as well as Professors are employed regularly. In many cases the same Fellow is capable of lecturing and examining for two or three of these Honour subjects. Much the greater part of the teaching and examining in Arts is done by the Fellows. Of the present Junior Fellows thirteen took up three subjects in their competition for Fellowship. All the others (with one exception, about which I am not sure) took up two subjects. Of the Professors who are not Fellows—twenty-nine of whom are named in the first Blue Book (I am not sure whether the term Blue Book is formally correct)—none is employed to lecture or examine in any subject but his own; and but few of them (five or six) have, so far as I know, academic certificates in any other. Compare them, therefore, with the fellows in their usefulness, *i.e.*, in the extent of their employment in the College as lecturers and examiners in Arts, and it will be found that man for man on the average the Fellow stands very much higher than the Professor. I know the attainments of each Fellow, not only as having been formerly secretary of the Tutors' Committee, when it was my duty to select the lecturers for the various classes, but also as having been for sixteen years myself a Fellowship Examiner. Besides, I am intimately acquainted with their careers in College in other ways; I know their College history, and I know the men intimately, as we all know one another in the College, and my opinion of their comparative degree of usefulness to Trinity College—a usefulness depending entirely on Academic attainments—is as I have stated. In any sort of Academic distinction; for example, in successful authorship, the Fellows compare favourably with the great majority of the Professors. Of the eight Seniors who compose the present Board, five or six have published many works of value in their special subjects, and two at least are well known to Classical scholars in England and elsewhere as well as in Ireland. I need not say anything more about that. Thus in certificated academic attainment, in daily usefulness as lecturers and examiners, and in literary or scientific productiveness, the Fellows, as compared with the Professors, seem to me to deserve still to hold the premier position which they have always held in Trinity College, Dublin. and

in the University of Dublin. If, therefore (as one of the witnesses before the Commission has well said, in conversation, to me) "knowledge should govern," what is the practical inference? But here, as elsewhere, those who know most are usually the least ambitious of governing.

I pass to another aspect of the question. The work of the Board of Trinity College is very varied and exacting, demanding the constant attention of its members.

4732. LORD CHIEF BARON.—This is all as to the constitution of the Governing Body?—Yes. At present these members, being *emeriti*, discharged from the duty of lecturing and examining, can devote all their time to this work, while their juniors carry on the business of the schools. If, however, the Board came to consist wholly or largely of those who themselves were still lecturers and examiners, for instance, of the "Principal Professors"—some duties would certainly suffer. We should too often see a "Principal Professor," instead of devoting his best energies to the welfare of his classes, busied day after day with the burning questions that come before the Board, and leaving his classes to his assistants in the meantime. Moreover, such absorption in administrative work is hardly consistent in ordinary men, with due performance of another duty no less incumbent on Professors and Junior Fellows alike—that of applying themselves to research in their proper departments; and, by their publications, advancing and extending the scope of their subjects, and the credit of themselves and their University. But a Board constituted of six Principal Professors (with two or three others not so easily conjectured), would have other defects besides those thus indicated. These Professors being specialists, each of them would be apt to think little of other subjects in comparison with his own. When money came to be wanted, much contention would arise from this; and much dissatisfaction, if the man in power used his power to gratify his predilections for his own at the expense of some other Faculty or interest. Arts would probably have a member to represent it on the Board—whether a Classical or a Mathematical or a Science man. But knowing as I do how many of the Science men, even when not professional men, but devotees of research in some scientific subject, think poorly of branches of Arts other than their own, I shudder to think how Classics, for instance, would fare at the hands of such a Body. Conflicts between the Professional schools and the Arts School are everywhere going on—here not less than elsewhere. To place the decision in the power of a Board chiefly, if not wholly, regardless of the interests of special science, or even special branches of professional work, would have fatal consequences for this University as a home of culture. The newer Medical Professors would probably soon decide that a medical doctor has no need whatever of a knowledge of Classics, or even of a degree in Arts, and so on. To decide such questions fairly, not only breadth of view, which knowledge and academic experience give, would be required, but also impartiality in the Body which undertook to decide. Such qualities, however, could scarcely be expected in the Board proposed by Document V.

I now turn to some other aspects of the case in order to show how much the College, and perhaps the country, owe to the Fellowship system here, and to the Fellowship examination on which it is based. Thanks to these it is (a) that this College is still, after 300 years of life, staffed and governed by its own *alumni*; and is, therefore, in the true sense, autonomous; (b) that (in accordance with the special intention of its Charter (Car. I., 13, Coll. Stat.* Vol. I., p. 40), the men who officer and govern it are Irishmen, or men who went to school among us, and have been in the College from their youth; and (c) that every position of dignity and emolument (to use a phrase we are tired of) in the College is, on conditions of absolute and undoubted fairness, open to all whose moral character and academic attainments are sufficiently good, irrespectively of their religious or political opinions. By the proposal of Document V. we should run the risk of losing these advantages. For, if the positions of Fellow and "Principal Professor" were, as is proposed, to be given by the new Board on the strength of the "credentials and published work" of candidates, and if the stiff examination were swept away, our future Governing Body would, in my opinion—although I know it is dangerous to prophesy—gradually be filled with imported Fellows, who might, of course, receive our Honorary Degrees after coming to us, but

would not be *alumni* of ours at all. If "credentials and published work" (i.e., testimonials, together with, perhaps, a set of papers submitted to the Royal Society or some book of note) were sufficient to admit, we should beyond all question have, for each advertised vacancy of importance, a host of applicants from among the crowd of expectants who now hang on the skirts of Oxford and Cambridge. These excellently qualified gentlemen would fill most of our best appointments here in future. Our new Fellows and Principal Professors would not necessarily be our own *alumni*, or as a rule Irishmen.

Nor is it to be expected that a Board so constituted would hold the balance fairly at elections between rival candidates of opposite religion or politics. Any candidate can now "go in" on his merits for Fellowship, in the full assurance that the examination is conducted in such a way as on the whole to select the best man. But if he had to submit himself for election, on the strength of "credentials and published work," to a Board consisting of members with strong religious or political views, he might well fear that this election would be, like too many of those already in Ireland, determined by influences over which he had no control. As for the door left open in the scheme for examination-Fellowships, it need not be considered seriously. If, as the Professorial scheme says, the subject or subjects of examination were announced only a year in advance, and if the Board could, at any time, and for any time, suspend such examinations entirely, our best students would probably go into professions or read for the Civil Service; and, although advertisement might bring over brilliant candidates for such examinations from England or elsewhere, we should for ever give up the idea of confining even our Examination Fellowships to our own *alumni*; since, under the new conditions, we could not expect that they would always be good enough, and good men it is, of course, that we most desire. The signatories of Document V. say with complacency that "only Fellows would under their scheme still govern." But what Fellows? Imported men, made Fellows by adoption. For then any man from Manchester or Birmingham (not a graduate of ours at all) might become a Fellow, if only he could find some one on the Board to back his application; and all men of sense and experience know how such things are done.

During the centuries in which Englishmen were regularly (despite the Irish Church of that day) thrust into Irish bishoprics, etc., Trinity College kept its Fellowships uninvaded, and so preserved its autonomy and nationality. This was because to get Fellowship a stiff examination had to be passed; and by its charter at this examination *ceteris paribus* Irish candidates were always to be preferred. (See Coll. Stat.* Vol. I. p. 40). The same applied to a Scholar. This Clause of Laud's was only abolished in the eighteenth year of Queen Victoria, by a Queen's Letter of 1855 (Coll. Stat.* Vol. II., p. 66). Thus it is that Trinity College, though open to the world, is yet in a valuable sense Irish, and a real, though insufficiently realised, asset of the Irish people. But under the proposed scheme—despite the intention of its Charter—it would be possible for it in no long time to pass out of Irish hands as completely as an industry—a railway—which had come to be managed by an English company. Such, indeed, is the real and constant drift of things in Ireland, though concealed under surface movements for reform and nationality.

But there is also another result to be dreaded if such a scheme were carried out; viz., that with the future staff of teachers we could not train men of broad general culture, from among whom the best specialists are derived. During the last thirty or forty years, thanks to our present teaching system, we have supplied a considerable number of men to fill Chairs in England, and have been indebted for comparatively few in return. But with "Principal Professors" as Fellows—mere specialists, many, perhaps, totally ignorant of the humanities—with the Fellowship Examination no longer confined to our graduates, and so arranged as to discourage our best students from competing, and with our Arts Classes largely in the hands of Readers (the term proposed by the Professors, that is to say, raw graduates, themselves specialists), there seems little reason to hope that our future Arts School would be managed by the class of men who have hitherto been Fellows—men of wide culture, not mere specialists from the

* *Chartae et Statuta Collegii Sacrosanctae et Individuae Trinitatis Reginae Elizabethae juxta Dublin, in two volumes* (Dublin, 1844 and 1898).

beginning; for though the Fellows tend to specialise, they are not only specialists—not mere specialists. Thus we should probably lose (1) our autonomy (in the genuine sense); (2) our Irish character (some people do not admit that we have it, but nevertheless we have); and (3) our credit as a teaching institution, the mother of scholars.

I now turn to the consideration of the case made by the Professoriate in Document IV., Blue Book* I., for certain improvements in their position. The invidiousness of the distinction between Professor and Fellow, however deplorable, is not one for which the Fellows can be held to blame; and its removal in the way proposed by the Professorial scheme would be unwise for the reasons given above—for it is a Professorial scheme, though it is backed up by a few Fellows who, in my humble opinion, have not sufficiently considered what they are about. But I think that no Professor should be liable to be deprived of a Chair, which he had filled for five or seven years, without a right of appeal to the Visitors. Such a thing might conceivably happen (though it has not, I think, happened) under the present system of things. Further, if the salaries of any Professors are too low, they should be raised. The Professors do work of immense importance to the University, and their services should be justly recompensed. If, again, a Professor had (as is the case with some of our present Professors, men whom we venerate), served the University and College for a length of time, and had obtained a high reputation, reflecting credit upon himself and his University, I would propose that he should be elected as an Honorary Fellow, with life-tenure and increase of salary. At present the latter—the increase of salary with life-tenure—is the only recognition which the College bestows on such gentlemen from time to time. Lastly, the Professors in each Faculty should be formed into an advisory group, with certain rights of approaching the Board on questions connected with their Faculty, but without any determinative powers. Of course, every individual Professor and Fellow has at present such right of approach, but it would be more effective if vested in the collective body of men representing each Faculty, especially if the duty of regularly reporting progress in their schools, from time to time, were imposed upon them.

As regards our present system of government, it is not satisfactory, though far better than that which would be substituted by the proposal of Document V.† The chief defects in it arise from the fact that of the members of the Board there may, from time to time, be—indeed must occasionally be—some who (though not incapacitated by bodily ill-health) are (owing to age) less actively interested in promoting the welfare of the College and University than they had been and should be. This state of things is chiefly due to the stoppage of the outlets provided in former times—before the Irish Church Act—when Fellows, being mostly clergymen, went out on livings; and when the average age of the Seniors was therefore much less than at present. To remedy this defect, there ought to be some scheme by which inefficient members of the Board should be allowed or induced to retire on pension; and a pension fund should be provided—by insurance and by economical retrenchment, perhaps, of part of the Fellows' salaries—so that the money thus gained, added to the annual interest now accruing from the capital sum paid to the College in compensation for loss of advowsons, should enable such members to be relieved of their duties, and afford the College the benefit of the services of more competent officers. If this could be done the present mode of government by the Provost and seven Senior Fellows might continue; but it would perhaps be better if the Governing Body were constituted by election from the whole body of Fellows. In arranging such a scheme of election, however, due regard should be had to seniority; for *ceteris paribus* men are more content—if they must be governed—to be governed by their seniors (men who have gone through the mill) than by others; especially if they have the hope that their own turn to govern will come by and by. This conduces to tranquility, without which there may be much expenditure of energy, but efficient work of the kind we all most respect in the departments of the College and University is practically impossible. I think the elected members of a Board so constituted should not get salaries as members of the Board, but should rather be penalised for non-attendance.

With regard to the Fellowship examination, or the mode of appointment to Fellowship, certain changes seem desirable. Owing to the great recent advances in the development and practical value of Science, this subject requires to be more fully represented than it is now in our under-graduate course; and perhaps a degree in Science—a B.Sc., not merely a D.Sc.—should be instituted by us. Science, in its various forms, should therefore also occupy a larger and more prominent part than at present in the Fellowship examination, and in the training of Fellowship candidates. So also should French and German, and perhaps other modern languages; of which a fluent and correct-speaking knowledge—not merely a reading and literary knowledge—should be required of Fellowship candidates. These, too, should form part—though not a leading part—of the course for Fellowship. This being so, the method of examination should be altered, by dividing the subjects of competition into groups; so that only those candidates who took the same subjects should compete against each other. Some subjects, however, such as Philosophy (or say, Modern Philosophy), might be common to different groups of competitors, for an obvious reason. Other changes will be thus entailed; but the arrangement of the Fellowship examination in some such way as this would be best effected by a committee, consisting of men acquainted with its objects and importance, and adequately representing each of the subjects in which Fellowship candidates should be examined. As the Fellowship examination should lead to the introduction of young men (not men of mature years) into the Body, there should be a limit of age fixed at or before which graduates should first compete, *i.e.*, after which no one should be allowed to compete for the first time at this examination. But a candidate who had thus competed once might be allowed and encouraged by prizes to compete afterwards at succeeding examinations, if he had done sufficiently well at his first competition. What is chiefly required is to get our good men to compete early. Many good men now hang back too long, owing to a certain shyness. Yet they ought not to be forced to compete too soon after graduating; because, owing to several causes (especially the scarcity of good Irish secondary schools), even our best men are, at the time when they get Moderatorship, still far from qualified to undertake the duties of Fellowship. The three or four years of enforced reading, which enable them to succeed in the Fellowship competition, are necessary for the purpose of raising them to the degree of attainment which is required of our Honor Lecturers and Examiners. The struggle for Fellowship is very stiff; but it has the effect of compelling candidates to improve their knowledge, and the College is thereby benefited clearly in a most vital way.

Some say that the struggle is too severe; and that the successful candidates are often so worn out by it that they do little good afterwards. This, however, is not so. The examination owes its severity to two things; (a) the competition; (b) the standard of marking and the range of subjects to be made up. But if the competition were not stiff, or if there were but one candidate, any graduate unfortunately might, as things stand, become a Fellow. Stiff competition is the mainspring of the usefulness of the examination to the College. The great danger is of the cessation of such competition, owing to such uncertainty of candidates as to the future of Fellowship in Trinity College as a position, and as to the regularity and nature of future examinations. When I speak of competition, I may say that whereas there used to be twelve or thirteen men up for the examination, now we have to be content with five or six. Further, the standard must be high, and the range of subjects wide, if competent men are to be chosen. But the conditions of the examination are not, to judge by a comparison of the papers set, more severe than those examinations for triposes at Cambridge: and here I commit myself to the judgment of men listening to me who know more of what I am talking about than I do myself. It does not last a longer time for candidates in any main department than does the Classical Tripos examination. A Classical candidate sits for five days in Classics and one in Philosophy, and there is a half-day besides of Oral examination. These days, moreover, are not consecutive, but spread over a whole fortnight. It is untrue that the examination wears

out the candidates. Among the Junior Fellows who have formerly and recently proved themselves most useful and even brilliant scholars, are some who have been among those oftenest "in" for the Fellowship examination. I could give names, but, of course, do not. Three attempts before success is what has been most usual.

The real grounds of complaint, so far as there are any, in this direction are rather moral than physical. The series of examinations does not wear out a healthy man of strong and sane intellect, but there is at present nothing to enforce upon a newly elected Fellow a full and adequate sense of the duties and responsibilities of his new position. It is too easy for him to glide into the notion that he has done all that he ought to do by simply passing the examination, and by lecturing and

examining in the ordinary routine. There is no regulation which compels a due feeling of responsibility for the way in which he disposes of his leisure time. It seems, however, that some conditions—I cannot say off-hand what—should be attached to the initial tenure of Fellowship, by which it should be made clearly apparent that more is to be expected of every Fellow than perfunctory or routine work. What these conditions should be might be left to a committee to decide. Perhaps salaries might be graduated, on a scale commensurate (not as now, with seniority of grade, but also) with work of some definite kind done by each Fellow within a given period since his election to Fellowship; and submitted (as work for certain degrees is submitted) to the judgment of a competent and impartial tribunal, chosen for the purpose of estimating its value.

After a short adjournment.

4733. CHAIRMAN.—You have been good enough to give us some information about the relations of Fellowships and Professorships; I should now like to ask you whether the importance of the Professor element has not been on the increase while the Fellow element has been stationary. For instance, I think I am not wrong in stating that in the last fifty years the College has established something like ten or twelve Professorships?—Yes, on the whole that seems to be true, but I should like to explain a little. While the Professor element has been increasing in its influence originally the branches to be taught professionally and otherwise in the College were comparatively few, and they were all taught by Fellows up to somewhere in the 16th century. There were Professors appointed in 1761—a batch of Regius Professors—but they were generally Fellows still, and even the medical work used at one time to be taught by Fellows, until the time came when that could not be done any longer.

4734. Is it not a very important thing that a University and a College should have the very best Professors possible?—Quite so, but the influence of the Fellows has not been stationary, because they, too, have been widening in scope, and have adapted themselves to modern requirements, as well as the Professors.

4735. I was not exactly referring to that point, as to the scope; I rather meant the number. The number has been standing still, has it not?—Well, hardly, I think.

4736. At any rate it has not been on the increase?—I cannot say what it was fifty years ago, but there were eight new Fellows added between 1840 and 1850.

4737. Since then the number has been practically stationary?—Practically stationary.

4738. Is it not very important that the Professorial element should receive new additions—is not that very important to the University system?—It is certainly important. If their present number was less than it ought to be, then of course their number ought to receive a new addition.

4739. But what I rather meant to bring out was this—perhaps it is intelligible—why, though fifty years ago you got all your Professors from the inside, now you receive additions from the outside?—Yes, they came to be wanted, and they were got, and I suppose we shall have to get more.

4740. And I suppose it goes without saying that you get the best Professors you can?—The best Professors we can who will come to Ireland for the salaries offered.

4741. Would it not improve their position if you gave them more power?—It would gratify a certain propensity amongst active-minded men who like to be employed in the thick of affairs.

4742. It would increase the attractiveness of it to outsiders, would it not?—I doubt whether it would be an unmixed good—whether it would be an improvement from the point of view of the University itself. The men who do some of the best work in the advancement of the cause of science are often the least heard within the place—they do not want to be in power—men like Professor Bury, for instance.

4743. Dr. JACKSON.—He was a Fellow, was he not?—Oh, yes; everything he wanted to be; but his hands were so full of work, that he seemed to care little for such power.

4744. He was a research student?—He was a research student, but he did not habitually talk about it.

4745. He was, in point of fact, permitted to lay aside his tutorial work that he might have leisure?—No person in his position could do that.

4746. Mr. KELLEHER.—He was exempted from lectures, I think?—I beg your pardon; he was allowed to have deputies, whom he himself had to pay, when he went to Greece.

4747. CHAIRMAN.—Do you not think the attractiveness would be increased as a whole if the Professors had more influence in the University?—The attractiveness of the position for good men?

4748. Yes?—It would, for the class of men I have referred to—certain men who are less devoted to research, but who have their use in promoting popular displays in the University—in that sense they are very valuable men, and in that respect the increased influence you speak of would be very attractive, no doubt, because it would be, perhaps, a relief to such men not to have to prosecute research continually.

4749. The present power of the Professors is to elect four members on the Council?—Yes.

4750. And those members, if I am not wrong in my recollection, must be chosen from the Senate?—No; I think that is not so. The electors are defined, but with regard to the men whom they elect, these are not defined. For example, the Junior Fellows are entitled to elect four men on the Council, but these men may be four policemen out of the street.

LORD CHIEF BARON.—I am under the impression that that is wrong.

4751. Mr. KELLEHER.—The elector need not be a member of the Senate; the man elected must be?—I had a question in my mind about that.

4752. CHAIRMAN.—I want to confine your attention to the class of Professors?—The question took me by surprise, but it is not necessary that the member on the Council representing a certain class should be himself of that class.

4753. My point is this—is not the choice of the Professors confined to members of the Senate?—I did not think so.

4754. Mr. KELLEHER.—It is in the Calendar. The Council is a kind of Committee of the Senate?—It is a Committee of the Senate, yes, I suppose it is quite true that the person elected to the Council must be a member of the Senate, but I did not know it.

4755. CHAIRMAN.—Is that not rather an unreasonable limitation on the power of the Professors. May not they reasonably desire an extension of power?—I think it is eminently reasonable on their part, but I did not know that there were any Professors who were not entitled to be elected themselves.

4756. Now, you have said that you prefer the election to take place from the *alumni* of the College, and from Irishmen?—I was then referring not to Professorships, but to Fellowships. As far as is consistent with getting good men to be Professors, those who are also Irishmen should be preferred; but on the other hand, if we want suddenly to fill a Chair, we must, of course, get the best man into it—the man who will make it a success.

4757. Whether he be a Trinity man or an Englishman?—Certainly. I should prefer an Irishman if I could get him, but the interest of the Chair must be considered first.

4758. I think, upon the whole, if I follow you rightly, you consider that the government of the seven Senior Fellows is satisfactory, provided some greater freedom were allowed for retirement?—Nothing in the world is perfectly satisfactory, but if there were some means of getting rid, when necessary, of inefficient members—I wish I could speak without *invidia* of any sort—if you could get rid of inefficient men, I think it would be most valuable. The present class of governors are all really devoted to their work—they have tried, all their lives, to benefit the College, and they are all very impartial, and, in many respects, very good; but it is a trouble to us that there might be men on the Board who might, for instance, go to sleep during a debate.

4759. Can you suggest any mode of getting rid of such Professors?—The members of the Board are not Professors, but many modes have been suggested.

4760. I can understand not electing them, but I should think it would be very difficult to exclude them when once they are elected?—I will tell you the way in which such a man was dealt with by the late Provost Salmon, who was himself a very strong man. He said to an old friend, in such circumstances, "My dear So-and-so, old friend, it is time for you to retire." This other man was a social intimate of Dr. Salmon's, and in every sense a dear friend of his; he only replied (I believe): "That is very hard upon me, but I will not differ from you"; and so he took his retiring pension. That is one way. I think the Provost, or perhaps the Provost with the assistance of a couple of assessors of the proper sort, might be trusted to retire unfit members without cruelty.

4761. The average age at which a man becomes a Senior Fellow now is something like sixty-five, I gather?—I think so—about that.

4762. And previously to his becoming a Senior Fellow, he has been engaged in tuition?—He would have ceased to be a tutor in the special sense of taking pupils.

4763. He would have been a Lecturer or Professor?—He might have been a Professor up to within seven or eight years of that; or, during the last couple of years of his Juniority, while near the head of the Junior Fellows' body, he would probably be Junior Bursar or Senior Tutor.

4764. Up to the time of his becoming, by seniority, Senior Fellow, he had taken no part in administration?—That is often said, but it is not quite true to say that he has no part in administration. There is a sense in which it is true—a sense which just gives those who make the statement a background of truth, as it were.

4765. I am, of course, not using any argument; I am only trying to draw your observation?—I quite understand; your question is, he would have no part in administration up to that time?

4766. That is the suggestion?—In our little community there is not a man who once gets Fellowship but feels himself from that time to be a wheel in the machine; no man but may feel himself to be an influence for good, and unfortunately also for evil. Junior Fellows have lots of power, and although that power is not defined by any constitution it is nevertheless real; many of the greatest changes I have known to take place in the last fourteen or fifteen years were brought about either at the suggestion or initiation of the Board, but I should say that in at least an equal number of cases they have been the result of suggestions made by Junior Fellows to the Board. The great difference is that there is in the case of the Junior Fellows no defined constitutional right or responsibility; nevertheless their power is a real one, and that is the great distinction in this respect between a Senior and a Junior Fellow. We are all one family—at least we used to be—and although the Junior Fellow has no constitutional right, if a Junior Fellow has ideas of the right kind to introduce, he will get them taken up. I do not want to be egotistical—it is the unpardonable offence—but I could recount a number of measures that have been taken up and passed at the suggestion of Junior Fellows. The late Dr. FitzGerald, for instance, got a great number of things done in the College—Physical equipment, electrical engineering, and things of that kind. Many such things have been done on the initiative of Junior Fellows, but they have not the right to go to the Board and demand that money shall be spent in certain ways. They have, however, a very real influence upon the Board,

and what is more, they have means of acquiring experience to fit them for their responsible duties when their turn comes to fill places on the Board.

4767. But until they become Senior Fellows they have taken no active part in the administration; they may have made suggestions, but nothing more?—There are many Junior offices which they may fill before they come on the Board, and in this way the Board and the Junior Fellows have to be in touch with one another. Many of the things they have to do bring them necessarily into contact with such business as, for example, that of the Senior Bursar, the man at the head of the estates of the College, and so on. There is no Junior Fellow, for example, who has not the right to look into certain things; we have all the right to look into the College accounts at a certain time.

4768. At what time?—I cannot say how the time is actually fixed. I can tell you how it happens.

4769. The Statutes require that the Provost shall appoint a time when the Junior Fellows may see them?—It has been done, and I have done it; but upon such things we are usually rather apathetic, and we leave them to the Board.

4770. I think I may go back to my question. I think you still approve of the government of the Senior Fellows, subject to their being moved on more rapidly?—I cannot absolutely say I do, but my hesitation arises partly from deference to what is called the *Zeitgeist*. At the present day you can hardly explain to people how men of over sixty-five can be efficient, but it nevertheless is perfectly possible, if you take men of the sort they ought to be—the very best kind of men. Therefore, while I do not absolutely approve or disapprove of the change, it is very hard to swim against the tide of public opinion, and I think you would not have a very bad Board if the members were elected: provided the new constitution were framed with sufficient care, and the Board were filled by men of a certain class I would not make a difficulty about the change.

4771. I am glad to observe that you propose to have some form of Board of Studies. Would you require the Board to consult Boards of Studies before they did certain actions in relation to those Faculties?—I would do that, but it would only mean regularising what is already in force, if I may put it so.

4772. It would be no wrench to the constitution if such Boards were formed—in fact it would only be regularising and legalising what is done already?—It would merely be imposing as a duty on the members of the Faculties what is now done by them voluntarily. It is left too much to individual initiative, and now, when a man does inaugurate some good idea he is apt to be very proud of it, indeed, but I would make it their duty to come collectively from time to time with a report.

4773. Would you not think it desirable that the Faculties should meet together and discuss and consider many matters before going to the Governing Body. Each Faculty would probably be inclined to promote its own study, and there would be a difficulty in balancing the conflicting claims of the respective Faculties; would not that best be done by a Board consisting of all the Faculties meeting together?—That would be practically taking out of the hands of the present Board one of its main functions.

4774. I only suppose that such Board would be an Advisory Board—a Board without whose assistance the Governing Board could not act?—Could not act? Then that Board would be more than Advisory.

4775. Suppose it is a case of creating a new Professorship?—At the present time the existing Board cannot create a new Professorship—the Council might prevent it.

4776. But it ultimately rests with the Board, does it not?—No, the Board has the pleasing duty of paying, but the Council could prevent the Board from creating an appointment. I have in other matters seen the Council thwart the Board's desires.

4777. LORD CHIEF BARON.—Have you thought out the question of the suggested election of the members of the Board?—I have thought it out, but not to my satisfaction. I have had certain thoughts about it.

4778. Are you in a position to tell us the lines upon which you think it ought to proceed?—The first condition which I referred to a while ago was this, that the Board if elected should be elected from among the Fellows, and that, in the next place, in the Constitution of the new Board, that would replace the pre-

sent one, due attention should be paid to the principle of seniority.

4779. How would you propose to work that out practically? Would you propose that before a Fellow should be capable of being elected to the Board he should have a certain standing as a Fellow?—I think it would certainly come to that.

4780. What standing would you say he should have, ten years seniority as a Fellow, or what? We want to get some help from you?—I only wish I could give it. You might graduate the Fellows into different classes, each with perhaps an increased amount of representation on the Board in proportion to seniority. You would give each class a certain right to representation. Suppose, for instance, the Fellows were divided into classes A, B, and C, as there are at present three grades of Tutors for purposes of income. Supposing the junior grade, A, were to have the right of returning a certain number of members of the Board, and the next grade, B, once and a half that number, and the third grade, C, twice the number returned by A, or something like that, so that each grade should have its members represented adequately in proportion to their degree of seniority, I think it would work smoothly.

4781. It is a matter that would require to be very carefully worked out?—Yes. I believe I have said already that a committee of good men might arrange it.

4782. There is just one other question I desire to ask you. We have the division into senior Fellows and junior Fellows, and in former states of the College a man could become senior Fellow at a very early age?—Yes.

4783. In the history of the College that age has gradually increased?—Yes.

4784. Formerly there were a number of livings available for acceptance by Fellows?—About ten years ago there was a war (i.e., high excitement over a burning question) going on in the College, as there usually is such a war every ten years. At that time I was rather a partisan, and I went into the question, and I found that in the early part of the last century the average interval between what we call election and co-option was about twenty years.

4785. Between the dates of one becoming a Junior and a Senior Fellow?—Yes. It was just possible to become a senior Fellow in fifteen years.

4786. That leads up to the question I wished to ask you. When a junior Fellow becomes a senior Fellow he ceases to lecture or to teach, does he not?—Yes, in the ordinary sense.

4787. Although he is a Professor?—Yes, he cannot then be paid for doing it.

4788. No matter what his ability may be, he ceases to be a Professor?—As soon as he gets on to the Board, you mean.

4789. I do?—Yes.

4790. For instance, such a man as the late George Francis Fitzgerald, whom you referred to, would cease to hold his Professorship when he came on the Board?—He would.

4791. Do you think that that ought to be an invariable rule, that it is for the benefit of the College that there should be a strict and invariable rule to that effect?—There are some men whom we should be very sorry to see leave their Chairs, because they are the very teachers we want, and of course there might also be some men whom we should like to see leave their Chairs; you have to strike a balance. But, on the whole, I think it is better there should be a general rule to the effect that on acceding to the Board a Professor should give up his Chair, even though you do lose men occasionally. Even such a man as Dr. Fitzgerald was of more good in the way of excogitating ideas, initiating good plans and fighting them through than in teaching a class; and even at the risk of losing good men occasionally I think it is better that a time should come when a good man should stop. I think it is better there should be a general rule, such as now exists. In case of a change of constitution there should be also such a rule, tempered only by one condition, namely, that of the united request of the man's colleagues that he should be kept.

4792. You mean that an exception should be made in such a case?—Yes, when his colleagues who know him well request that that should be so. It is not too much to expect that they would make such a request under certain circumstances. For example, when Dr.

Salmon was made Provost it was rather a blow to those who expected promotion by the appointment of a man from within the body, but we all liked him so much that we sent a request that he should be made Provost. We sent a request that any consideration of our interests should be altogether laid aside, and that what was best for the College should be done. He was not a Fellow at the time. In a case of that sort, I think it is perfectly conceivable that a self-abnegating spirit might be found among the colleagues of the man, and they would request that a person might be retained if it was for the good of the College that he should be retained.

4793. CHAIRMAN.—In order to clear up the question about the constitution of the Council, I see that the Act provides for the Provost being a member, four members to be elected by the senior Fellows of the said College out of the members of the Senate, four members to be elected out of the Senate by the junior Fellows, four members to be elected out of the Senate by the Professors who are not members, and four members to be elected by those members of the Senate who have not otherwise voted or been entitled to vote?—I was ignorant of the fact that members of the Council must all be members of the Senate.

4794. Sir THOMAS RALEIGH.—Have you had any opportunity of comparing the practice of Trinity College with the practice of other Universities?—Not very much.

4795. Can you tell me of any teaching University in which Professors as such have no share in the government of the place?—No, I acknowledge the anomaly.

4796. You justify the anomaly?—I do not say I justify it, but I acknowledge it to begin with.

4797. On two grounds. In the first place you say the Fellows are all your own men, and that some of the Professors are imported men. Now, suppose your imported man comes from Edinburgh, or Berlin, or Harvard, in any of these cases you will admit perhaps that he has passed his own University tests, which are as high as the tests which he would have to pass in Trinity College?—In many cases, yes, and perhaps higher.

4798. Then the imported man is not exactly inferior?—On the contrary, I should never think of insinuating such a thing. I am glad you have raised the question, because it must not go down that I said that was the case. Far from it. We do everything in order to get the best men. If we had as good men ourselves, for the particular purpose of each appointment, we should not import.

4799. I was quite sure you would make that admission. There is another point on this question about the imported men which I cannot help making. Has it occurred to you to enquire how many Trinity College men are imported by other Universities?—My own memory is all I have to help me at present. A good many have been imported into institutions in England in the last thirty years. Some have gone to Oxford and some to Cambridge. While, of course, we take that as a great compliment, we consider at the same time we have suffered a severe loss.

4800. Of course that is so. There is, for instance, Professor Bury at Cambridge. Suppose Cambridge were to say, not only will we keep Professor Bury out of our Governing Body, but the whole order to which he belongs shall also be kept out, because some of them are not Cambridge men?—Let me explain that. The spirit in which I said what I did a while ago is not that of narrow exclusiveness. To me, personally, an English Professor is as welcome as an Irish Professor. In the meantime I think all countries do keep that matter before them when they are face to face with University questions—that there is a certain amount of particularism, and they insist upon the right of managing their own business as far as they can. Their character is really the most important thing they possess, and I fancy that this consideration of character extends even to national character. I do not object to Englishmen coming to Ireland when they are wanted, we are glad to have them, and we take it as a very great credit to us that our men also should be employed in England. We consider it a compliment.

4802. Your second reason for the Trinity College practice is that the Professor is more of a specialist than a Fellow?—He is employed as such at all events.

4803. But, suppose I express it in this way, that every educated man has first a certain range of general knowledge, and, secondly, a more special knowledge of some subject or subjects which he has had a special reason to study; is that true?—That is true.

4804. Both Fellows and Professors are general scholars and specialists as well?—There is such a thing as a mere specialist, and there is also such a thing as a specialist. A mere specialist is one who has never practically taken a wide course in science, literature and art at all, but who has gone, for the purpose of the special study of some particular subject, to graduate in some University which gives such a degree, and who has never been a man of wide culture. On the other hand, other men have specialised afterwards, after making a thorough study of various subjects, and these are the better sort of specialists.

4805. As between a Fellow and a Professor it is really, is it not, a question of degree; they are both presumably educated men?—The Professors are generally mere specialists, and the Fellows are not. What I mean is this. The Professors are only employed here to teach one subject. I am not speaking now of men who are in any bad sense uneducated. I am speaking of men whose education has run from the first upon definite and special lines, and who need have no other Academic certificates than they possess in connection with the particular line of teaching they have undertaken.

4806. And you wish us to understand that the difference is so marked that it would justify the Fellows in Trinity in excluding the Professors from any substantial share in the government of the College?—If it stood alone it would not be sufficiently marked for that, but it is only one of a number of circumstances. I hope I have not said anything that would seem to reflect disrespectfully on the Professors. Nobody would be more sorry if I have done that than I myself. When I say they are mere specialists, what I mean is that they need have only Academic certificates in one subject, and that they are only employed to teach one subject. Of course there are some of our own present non-Fellow Professors who are men of the very widest culture.

4807. I do not wish to suggest that you insinuate anything of the kind; I was only discussing with you the question of whether it justified you in making a selection?—Not by itself; but it is only one of many considerations.

4808. Dr. JACKSON.—I should like to begin by asking you a question about what you said in reply to the Lord Chief Baron about representation, on the Board, of different parts of the Society. If there were to be a representative or elective Board, do you think it desirable that there should be an assignment of so many places to each particular part of the Society?—By the Society you mean the Fellows?

4809. Yes. I think it was suggested that you might have so many members of the Board to represent the upper part of the Junior Fellows, so many to represent the middle part, and so many to represent the lower part of the Junior Fellows. There was that suggestion, was not there?—Yes.

4810. Do you think it desirable to have quite so elaborate a representation of particular parts of the Society should the elective Board be created? Would not, in the ordinary course of preparation for the formal election, sufficient account be taken of the fair rights of different parts of the Society?—I am not very much inclined to think it would.

4811. I like to aim at simplification in such matters, and my experience is that, where you are choosing representatives from the whole of a Society, the informal method is better than any definite assignment to different sections?—I think it would have the tendency to create rather a sore effect. I think that, what with mutual jealousies, it would have the effect of giving all the representation to the senior men.

4812. You think it would?—I think that would be the tendency, the drift of things—to put in the seniors. Such elections as we have are very often decided by seniority, so far as I know.

4813. Then, if that is so, you are probably right in legislating?—I am not at all certain.

4814. May I tell you why it was that I suggested the less formal method? Until 1862, the Trinity to which I belong was governed by the master and eight seniors, and we substituted at that time a

Council, partly *ex-officio* and partly elective. Certainly we are most careful not to take just the juniors, because they are people whose position in the Society is not assured; but we always take pains to bring in some of the men who are just not at the very bottom of the Society, and the rights of the juniors are most carefully respected in the informal nominations. I merely make that remark, because I think it is worth your while to consider it?—It is a conservative remark, and it would satisfy my instincts rather, but I am afraid some of the junior men among us might well fear that they would be overlooked. The draw is in favour of the seniors.

4815. It seemed to me that the basis of your principal argument was a certain assumption about the subjects which ought to be represented in the Fellowship examination. May I ask you whether I am right in understanding that the subjects in the Fellowship examination are mathematics, classics, experimental philosophy, ethics and logics, and, as I understand from you, although it is the first time I have heard it, Oriental languages?—Hebrew and (until a short time ago) cognate languages; and of course Hebrew naturally runs into other Semitic languages like Arabic, but this last is not required. For the purpose of the examination, Hebrew and cognate languages have meant, at least they meant when I was a candidate for Fellowship, Chaldee and Syriac.

4816. How do you distinguish between primary and secondary subjects in the Fellowship examination?—The primary subjects are those which are called so. The primary subjects mean classics, mathematics, by which is meant pure mathematics, and philosophy. Those were called primary subjects at one time.

4817. And the secondary subjects are?—The secondary subjects are the others. Experimental science used to be considered a secondary subject, but it is now far from occupying that position; I am afraid it is not in the position it deserves to be in the Fellowship and other examinations even yet. Experimental science is one of the ancillary subjects; Hebrew is the other. Hebrew is ancillary to classics, as experimental science is ancillary to mathematics.

4818. Is the Oriental section habitually taken by the candidates for the Fellowship?—By classical men, yes. It is very regularly taken. Ten or eleven have taken Hebrew in our time.

4819. Can you conceive anybody standing for a Fellowship who was neither a classical man nor a mathematician?—No, not successfully under present circumstances. That is a defect in the examination.

4820. What do you mean by Experimental Science?—I am not in any sense an expert on that question.

4821. I will put my question in another form—does Experimental Science include Biology?—I was not thinking of Natural Science.

4821A. I want to know whether the Sciences which are generally represented in the English Universities are represented in the examination at Trinity College, Dublin?

4822. Mr. BUTCHER.—Physics and Chemistry?—Medical men take certain groups which fall under Natural or Experimental Science.

4823. Dr. DOUGLAS HYDE.—Physics?—If it is asked whether Natural Science forms part of the Fellowship examination, I will answer that question in the negative.

Sir ARTHUR RÜCKER.—Experimental Science is a word that has not any absolutely certain meaning. It means any Science in which experiment plays a large part, but it was at one time used in the rather narrow sense for Physics and Chemistry. It is quite another question as to what you mean by it?—If it means Physics and Chemistry, the examination includes that.

4824. Dr. JACKSON.—May I take it that Biology is not represented in the Fellowship examination?—I think not.

4825. What I want to bring out is that there are a number of subjects which nowadays are of extreme importance but are not represented in the Fellowship examination habitually, and, as I believe, cannot be exceptionally represented. You have no sort of arrangement by which there can be an exceptional representation of a subject when you think you have a good man?—These Sciences are taught in the University, though they are not part of the Fellowship examination, that is to say, in this respect, the University has outrun the College.

4826. In fact a man has a chance of getting a Fellowship provided that he takes one of the favoured subjects, and can add to that favoured subject some other subject which is also on the list; but if his

strength is, for instance, in Biology, he will have no opportunity of competing for a Fellowship, even though he be a man of considerable culture, with strength, we will say, of a secondary sort in Mathematics?—That is so.

4827. I want to suggest that the system which you have now is the system which we had at Cambridge forty years ago, when Classics and Mathematics were the two subjects in which we, at Trinity College, Cambridge, examined those who competed for Fellowships. Other subjects were not represented. But we are now habitually electing to Fellowships, by what I may call the juvenile competition, in a vast number of subjects, in Biology, in Physics, in History, and in Oriental languages. By the way, I should like to interpolate the remark that we have not thought that the talking of modern languages would be a good subject in which to give away a Fellowship. I am afraid of that sort of practicality. Then, although you a little qualified your remarks afterwards, you spoke of "mere specialists." May there not be a specialist who, in his line, is so great that he is something more than a "mere specialist," and might be worth putting into a great College?—Most assuredly. I am with you there, and should be very sorry to differ from you on that point. I said a "mere" specialist, but that word, I am afraid, is unfortunate. I should have said "pure" or something of that kind. I do not suppose any man could become great in one line if he were not fortified in it by some researches involving knowledge in a great many other ways. When I said a mere specialist I only meant a man who might have applied himself to one thing, say Chemistry, and who, for all the purposes of his appointment, need have no eminent or certificated qualification in any other subject. Such a man might be highly qualified in many ways not officially known.

4828. How do you know that the Professors from whom you elect for their special knowledge may not be just as capable as your own men of taking another subject, if the distinction between specialist and non-specialist is that one is employed in doing one thing and the other is employed in doing two?—The difference comes in this way, that the specialist whom we appoint as a Professor is generally a man of mature life. We may take it for granted that if a man is highly thought of, e.g., in London, he must be a man who knows a great many other things, but our Fellow is a man whom we have trained ourselves, and for whom we have taken the responsibility of seeing that he really has that wider sort of knowledge. We know his qualifications.

4829. Then your point is that the Professor will generally be a man of senior standing, trained elsewhere, a good man in one subject, whereas a Fellow is trained at home in a wider way?—He is qualified, and promises from the width of his knowledge to become a good specialist, and that is why we want him.

4830. Just one word about the use of marks in your Fellowship Examination. I do not know that you quite definitely spoke on that subject?—I did not speak on it definitely.

4831. I have heard things said which implied that mark results were valuable just because they give definite results, and because you have a complete answer to any outsider that you were not using your judgment on the examination, but that you had a definite mark result on which you were prepared to act. Do you approve of that system?—It is not quite so, and I should not approve of it. In the first place the function of marking at the examination is not defective in the sense of being absolute at all. It is constitutionally in the power of the Board to elect contrary to the marks, but the system of marking has been so satisfactorily constructed—I do not say absolutely satisfactorily constructed—that we have gained good results with it for many years in the final election. In certain undergraduate examinations for exhibitors, &c., the prizes are given for the answering in a number of heterogeneous subjects, Classics, English Literature, and so on; and there the marks, supposed to be homogeneous units for the purpose of the examination, are totted up and the men that get the highest marks are successful. That principle was followed in College for a very long time at other examinations. Of course it is not necessary to say that at a certain point in examinations of difficulty and complexity that rule becomes absurd, for the marks cannot really consist of homogeneous units. It

is very hard to make the marks you get in Mathematics, Classics, and Experimental Science tot against one another. It is only by men of experience comparing the subjects in point of difficulty and coming to an approximate estimation that you can do so. But it has always been understood that the marks did not absolutely determine the comparative merits of candidates, and consequently the Fellowship appointments are called elections. It is seldom that the Board has elected contrary to the marks, but they have by Statute the right to do so. The existing system of marking at the Fellowship examination has been very carefully arranged by giving to each subject a certain amount of representation out of the total. It is hard to score in Mathematics. The great mathematician may run up a score more easily, but the average mathematical man will score the same percentage if he is marked out of a thousand as the average classical man if marked out of 800. And so on in fixing the weight of marks given for other competing subjects. Many things have been considered. But I believe your question was whether that is determinative and whether I should approve of it. I should not if it were absolutely so, but it is not.

4832. You would not make the result given by marks decisive?—There is a great difficulty with us. A violent departure from the system of election by marks obtained at the examination might influence the public mind to distrust, at the time. It is not satisfactorily decisive in any case; but if it is ever departed from there is such an amount of questioning raised about it that it at once appears as if some law of nature had been broken.

4833. I am glad that you have made those explanations, but certainly hitherto I have heard the system justified on somewhat different lines. I was going to ask you the question whether you did not realise that even though there has been elaboration of the standards, you might have unsatisfactory results, and that a good deal depends upon the marks that you give to the subject?—So much depends upon it that the thing would be absurd if that were not carefully considered. There must be a careful arrangement.

4834. And also what is more, the different examiners will inevitably use different parts of the scale, and in consequence it may make a difference to a man whether A examines him or B examines him. I want to discredit mark examinations as much as ever I can, because I had had to fight against the tyranny of marks myself in my own University?—I quite feel with you, but what is one to do under the circumstances? Look how widely things would wander if you left the appointments subject to mere election. There would at once be a complaint of prejudice.

4835. As to your Fellowship Examination system, there is just one more question I want to ask. Have you ever thought about the use of dissertations to encourage initiative, and as a test of initiative?—Yes.

4836. But I think you have not used dissertations at all at present?—Are you confining yourself to the Fellowship Examination?

4837. I am?—No. For the Fellowship Examination, as far as I know, there is nothing more than what is called the writing of an English essay.

4838. By dissertations I mean something different from that?—No, we do not have the dissertation.

4839. In the sixties, when I was a candidate for the Fellowship at Trinity, we had no such thing. We had an examination very much like yours in all respects, but in the seventies we instituted the dissertation system. The Mathematician, or the Classical man, or whoever the candidate is, can name his own subject and send in his piece of work, and I am glad to tell you that the system has worked well, and that nowadays we elect for the most part on the dissertation, although the examination is useful to us as giving us another view of the men?—You examine too?

4840. We examine too, but on different lines in different subjects. In Classics we keep up something very like the old examinations. In Mathematics the examination has for the most part been dropped. But we expect all the candidates to take papers of a philosophical character, and also a paper of English essays. You would not, I gather, be opposed to the use of dissertations of a test of merit of this sort?—Certainly not.

4841. I suppose you would value the dissertation not necessarily for its definite accomplishment and as a piece of scientific work, but rather as showing promise?—Yes, I am inclined to think that we should

not insist too much on originality, because sometimes the most original papers and the very best papers are those which are liable to be rejected by the examiners, who are not always prepared to meet originality.

4842. Do you think it desirable to keep people competing for Fellowships by examination for a great number of years? Would it not be well to have some sort of limitation, either of age or of standing?—I spoke of wishing to have a limit of age in this sense, because I have seen men over a reasonable age at their first competition. I called that for brevity the minor limit. You spoke of us as keeping people competing year after year, but that is for the good of the republic. They are not forced to compete, and if there cease to be competition the College would suffer. We are in this dilemma. If candidates come up in numbers and compete one against another, some maintaining the struggle for five or six years, we are told that the examination is too severe and crushes young men of promise. On the other hand, supposing there were a falling off and only one graduate went up for the competition, we are bound under the circumstances to elect that man, however bad, which would be disastrous.

4843. But it would be easy to meet the last difficulty by having the power to suspend?—I will tell you the difficulty that arises. If you suspend examinations, then young men who are fit, not, perhaps, to get Fellowship at once, but to succeed soon—

4844. I mean suspend after the examinations—suspend the appointment?—

4845. If you are not content with the candidates, ought you not to have the power of suspension?—That is to say to retain the men? I do not quite understand.

4846. To say that the man is not good enough. It is part of your argument that you are bound to elect. You could say that the candidate has not shown sufficient merit?—We have no such power.

4847. But could you not have it?—We should have to get it. At the present time we are living under an arrangement of about twenty-five years' existence, which says that you have to elect one man every year. That has not produced bad results. It has created competition. When it started, the competition was almost nil. We have a prize called the Madden Prize, which is given to the second highest, but which can only be given if there are three candidates; it cannot be given when there are only two candidates. When there are three, one man gets the first place and Fellowship, and the next gets the Madden Prize. One year the competition had fallen so low, owing to the uncertainty of things connected with the University, that the Madden Prize would not have been given but for some charitable person—I was told this, I am not speaking from absolute knowledge—some charitable person who engaged to compete in order to make a third man. Such was the state of things at the time when the law was enacted that there should be a regular vacancy every year. If we cannot have regular appointments, candidates will fall away.

4848. I am assuming that you must have regular candidature; I am not saying one word against that, but I think that you ought to have the power of suspension?—I quite agree, in so far as I want to be protected against the bad man.

4849. I am the more careful to raise this point because we had to get a new Statute at the Cambridge Trinity a very few years ago in order to provide for this case. Just one question more. You think that the position of the Professor should be improved, but you think that he is not in general to be made a Fellow. May I suggest to you that there is a way in which the position of the Professor would be considerably improved without your making him a Fellow. If the College were to consist in future, not of a Provost, Fellows, and Scholars, but of a Provost, Fellows, Professors, and Scholars, so as to put them on the foundation of the College, and make them at home without giving them the status of a Fellow, would you see any objection to that?—*A priori*, I see nothing to object to in it. As for status, I should like to see them with all the status in the world. I should like to make them Fellows, too, if I thought they would carry on the government of the College as well as the Fellows of the past have done. I have no objection whatever to the proposal you have just mentioned, personally. Of course, I have not sufficiently considered it.

4850. May I add that it would not necessarily follow that they had a share in the government of the

College in consequence of their being on the foundation? It may rather get over one sentimental difficulty if I mention there is a precedent for it?—I have no sentimental objection to it.

4851. In Trinity College, Cambridge, there are Professors who are on the foundation but are not necessarily actual Fellows, and if they chance not to be, are Honorary Fellows. The Regius Professors are on the foundation whether they are Fellows of the College or not, so that there is an analogous case?—I, too, have actually proposed that a distinguished Professor might become an Honorary Fellow amongst us. I have mentioned that in my opening statement. An Honorary Fellowship, however, may not be a thing which our Professors would value.

4852. But still it is something, and it, of course, is wholly irrespective of any question about the stipend of the Professors?—Quite so. With regard to the stipend, none of us knew what the stipends were until we saw them stated in the Blue Book. It appears to me that the Professors' salaries are perhaps too low, and the Fellows' too high. This should be rectified if it is so.

4853. Mr. BUTCHER.—I want to ask you a question first of all with regard to the Governing Body. Suppose there is an elective element introduced into the Governing Body, would you prefer that the Faculties as such should be represented, that is to say, that each Faculty should furnish a member to the Governing Body, or that the Fellows should be free to elect from their whole number, quite apart from the division into Faculties?—Who would be the electors by your question?

4854. I am assuming for the moment that, in the first case, the Faculties should each elect a member of their own?—To the Governing Body?

4855. To the Governing Body. That is one proposal that has been put before us. In the other case, it would be that the body of Fellows, as a whole, should elect so many members without any reference to the separate Faculties?—You would elect so many members to the Governing Body?

4856. Yes, the Fellows would elect among the Fellows so many members of their own body to the Governing Body?—In the second event, the question you put is whether the Fellows should elect from among their own body or elect persons out of the Faculties to represent the Faculties?

4857. Whether the Faculties should necessarily be represented as such, or whether you would allow a freer choice. It is a similar question to Dr. Jackson's question?—Yes, I recognise it. The more freedom the better. The Fellows themselves would, on the given hypothesis, elect from among their own body, perhaps, the best representatives in some cases, and in a great many cases adequate representatives, but there are some academic subjects which, unfortunately, owing to the present defective nature of the Fellowship training, none of the Fellows understand, and I think that ought to be amended. In the meantime, if such subjects are to be adequately represented in the Governing Body, it must be either by electing Professors or by the Fellows taking advice and considering suggestions in particular cases. Such subjects, as far as Arts is concerned, are comparatively few, and not enough to found a revolution of the whole system upon. But in the case supposed, if you have an elected body, would these persons represent the subject on the Governing Body?

4858. In one case you may say that the subjects represented are departments of study. In the other case you would be selecting men who, for their business and administrative capacity, you thought best fitted to govern, quite apart from their special qualification or subject?—There would be a great difficulty there, due to a kind of antinomy between the specialists and the other men who would govern. The special man is very narrow and very ardent. Perhaps, the condition of things would be better satisfied if a man of merely wide general knowledge, sympathy, and common sense were put on to represent the Faculty.

4859. Not as a member of the Faculty?—Yes, for otherwise there are several difficulties in the way. For instance, if you take the younger men of from forty-five to, say sixty, those men ought to be all hard at work teaching classes the whole week round.

4860. You would not represent the Faculties as such?—I am inclined to think it is very much like the Army and War Office in relation to the Cabinet. I should not like to take men from the business they

LONDON.

are the best fitted for and put them to administrative business.

4861. Now, I want to ask you a question on quite another branch of the subject. I took a very special interest in reading the paper that is signed by yourself and the Professor of Latin on the Classical School of Trinity College, Dublin, which, I think, is a most interesting vindication of the school, though those who know the Classics done in Dublin perhaps hardly need the vindication. Among other things, I notice at the end of your paper that you say steps have been taken for the founding of an organised society of which old students of Classics in Trinity College may be members. I should be very glad to hear from you what has already been done in that respect?—I will tell you about it. Professor Smyly and I had discussed this on and off since last summer twelvemonths. About three weeks ago a letter was sent round by us in the first instance to all the Classical Junior Fellows. We have happily a certain number still of Classical Junior Fellows, and they all agreed to give what help they could in founding a society which should be called the Classical Society. A meeting was held, and certain resolutions were passed. Professor Tyrrell was in the chair. It was resolved that the most junior of us, the last elected Classical Fellows, and the senior students, who were also experienced in the working of other societies, should start the new society, and the idea took on very fast. There are about 150 men, undergraduates who have got honours time after time in Classics, that is, got honours of some rank, besides those who are Scholars. There are also senior Classical graduates, and we thought that all these ought to form a very strong body as a nucleus for this society. But it is not confined to honour men; it extends to all students. After this the students met and had a succession of meetings; they appointed committees and sub-committees, and arranged a general meeting three or four days ago, at which they did me the honour of asking me to take the chair. It lasted from eight o'clock to eleven o'clock one night. The Rules of the new Society were propounded and discussed, and its constitution, which occupied eight or nine pages of print, was read out. All this was arranged by the students themselves. They chose a Council to consist of men from every College year, together with some senior men. This Council is to be assisted by an advisory body, consisting of certain Junior Fellows, who are bound collectively and individually to be at their service and to give advice, when asked, as to the programmes of the meetings. The reading out and the passing of these various provisions occupied one-and-a-half hours. It was a very successful meeting. The new society will meet every Friday evening during lecture term. There are to be private meetings and public meetings, that is, meetings to which the public are to be invited will alternate with the other meetings. The society is now actually working; at the meeting at which I was present there were fifty students, many of whom I know to be distinguished students, and most enthusiastic. Everything was carried unanimously, except one, and that was the motion that ladies should be admissible to the ordinary meetings, and we had some difference of opinion about that. An arrangement was come to by which ladies should get the advantages of the society without coming to the meetings, because the meetings are held at night.

4862. Mr. BUTCHER.—And you propose at those meetings to read papers on different subjects?—Yes, and to exhibit things. For instance, Mr. Smyly will bring up some papyri. His rooms are filled with mummy-coffins, papyri stuff, and so on. We shall deal with archaeology and other subjects. But it is the students themselves that are to determine the programmes of work, and their Council will arrange such matters.

4863. It occurred to me in reading about this whether the very existence of this society might not itself make the introduction into the Fellowship examination of a dissertation an easy and useful reform?—I hope it may.

4864. There would be many subjects here discussed which would be a good preparation for the kind of original work I refer to. Personally, I think that societies of this kind are probably the very best proof of the intellectual vitality of a Collegiate Undergraduate Society, and if you could, in a few words, tell us what other societies there are, I think it would be interesting?—We have two great societies, the Historical Society and the Philosophical Society. We call them great societies, but that word is, of course,

relative to us. The Philosophical Society was founded about 1842—sixty-four years ago—and it has continued ever since then. It has on its books, I do not know exactly how many, but a good many hundreds of students, and it also has, of course, associate members. The Historical Society is much older than that. It first came to life, if I am not mistaken, in the student days of Burke, and then was suspended for a while. It took its permanent form in 1759, I believe, and it has had a very great and varied career.

4865. LORD CHIEF BARON.—It was suppressed for a time, and recommenced about 1842 or 1843?—I know it had its vicissitudes at the beginning of the century.

4866. Dr. DOUGLAS HYDE.—I think it met out of the College when it was suppressed?—I think they went out in the year 1815. Some regulation which was passed by the Board had the effect of putting them out of the College, but they did not cease to meet. They kept themselves alive, and came back into the College subsequently. What sustained the society in the meantime was the connection it still had with the College close by. These societies are, perhaps, the part of College life which benefits the student most. They are supplementary to the lectures, and, at all events, both are indispensable. We are proud of our societies. Not only are those two societies full of life, but we have a Biological Society and an Experimental Science Association. We have also a Theological Society of great vitality, and we have, I believe, other societies also. I did not expect to have the pleasure of being asked this question, otherwise I would have obtained full particulars. I am sorry I have not them with me.

Mr. BUTCHER.—Your answer gives me really all I desire to know.

4867. Dr. DOUGLAS HYDE.—I understand the chief objection to an election of Fellows to the Board is that it would give rise to all kinds of insinuations, and, perhaps, to some unpleasantness, and that the election would not be reliable as to the real value of the man, because backstairs influence would supervene?—I do not know how it would be done—I should not like to draw any inference as to what would happen.

4868. Then, the disadvantage of the present system of electing the Board is that you get the seven oldest men in the College managing the affairs?—I do not think that is the chief objection. I will put it in this way. As for their being the oldest men, I discount that altogether. In the name of common sense and fair play, it has nothing to do with it. That is not the principal objection. It is that you are liable now and again to get a man who is not only old but inefficient. That is where the trouble comes in.

4869. You have answered me in advance, because I was going to propose a scheme which it is not worth while proposing to you now. You have thirty-two Fellows, of which the oldest is number thirty-two and the youngest number one. Your oldest seven are members of the Board. I was wondering whether it would not advance matters supposing you had the seven oldest men, beginning from twenty and going to twenty-seven, as the constituents of the Board?—How could you pay these men? Who would give you money to pension the others, and how could the country stand spending such an amount of money in pensions?

Dr. JACKSON.—You could separate the money question from the power question altogether.

4870. Dr. DOUGLAS HYDE.—I simply throw out the suggestion?—It is, in some respects, a very good suggestion.

CHAIRMAN.—I am afraid I did not hear what the suggestion was. Will you kindly repeat it?

4871. Dr. DOUGLAS HYDE.—There are at present thirty-two Fellows, of which the oldest is number thirty-two, and the youngest number one. At present you have the Fellows from number twenty-five to number thirty-two governing. I asked how it would do if, instead of having the Fellows from twenty-five to thirty-two, they had the Fellows from number twenty to twenty-seven, the Governing Body?—Yes, but the penultimate seven might be regarded as far worse men than the men at the top. I know that ten years ago people used to prophesy that, although they admitted that the then existing Board was very good because it had men like Dr. Salmon and others to leave it, the Board that was to come next would be a very bad Board. Now, the present Board, the very Board that it was predicted would be a bad one, is considered to be a paragon Board: while, again, the

prephets say the one that is coming on will be an awful Board. You would take the penultimate Board, but that Board is, by a certain class of grumblers always condemned.

4872. The Professors, in the paper they sent to us, have pointed out the number of new schemes that they themselves have brought forward in College, for instance, post graduate School of Medicine, lectures, etc. Have the junior Fellows ever interested themselves in this to the same extent as the Professors?—Please do not ask me to enlarge upon that topic, because I might say hard things, and I do not want to do so. There is no scheme brought forward in the College that is really worth mentioning, but has at least some Junior Fellows advocating it. I remember when the School of Commerce was being arranged for. The idea of it first came from Professor Bastable, but it was, I think, a Junior Fellow that encouraged him to lay it before the Board, who at once took it up. Under present circumstances, as a popular suggestion, it was a good thing enough; whether from the higher University man's point of view it was a good thing is another matter.

4873. I understand you object altogether to the Readership scheme put forward?—That Readership scheme appears to me to be the most workable part of the Professors' document, but it is quite spoilt by the way in which it is circumstanced. Its context, in connection with the other arrangements would deprive it of all its good effect. They give a Reader £150 a year, and make his post tenable for three years; that is to say, readerships would be given instead of the prizes which are given to good men now, and intended to enable them to read for higher things. The Readers would not be Fellows, nor likely to become Fellows; they would not be Professors. They would occupy a position like that of private teachers in the University, and very probably would have to remain in that position. We are told that they might be encouraged to go on to read for a Fellowship. That is a very strange expression. You do not encourage people to read for a Fellowship; it is left to their own initiative, being first made worth their while.

4874. They are supposed to help the Fellows also?—In fact they are to be maids of all work. Under this scheme the Professors would seem to want a lot of assistants.

4875. Mr. KELLEHER.—I have some questions to ask you, more particularly to make explicit some things that have been said. Is it your belief that the modification of our Fellowship course, as suggested by Dr. Jackson, that is by introducing an enormous number of subjects, would involve the abandonment of our Arts degree in the old subjects for professional students? Would we be able to give teaching in Latin and Greek and moral philosophy?—I think so.

4876. Would we have Fellows enough to do that work in those subjects?—We should have Fellows enough to give teaching in a certain number of subjects, but there are some in which we should not have Fellows as teachers, until the Fellowship examination had been widened, because several subjects should be added to it, in which, at present, we could not find Fellows adequate to give teaching. You would have to get other teaching during the period of transition. While we were in the process of getting such Fellows we should have to get such teaching done by Professors.

4877. Would it not also involve the widening of the course for the Degree in Arts? That is, if you elect a Fellow in subject A, giving up the Fellowship in B, you would have to introduce A into the Arts course and abandon B?—Yes, so far as the Fellowship examination is supposed to represent the Arts course.

4878. And those Fellows are the men who have to do the teaching in Arts?—Yes.

4879. Is it your opinion that Dublin University is not a modern University, but an ancient University with a modern side?—I think it is an ancient University which has kept pace with the times with wonderful vitality and elasticity. It is both ancient and modern. We keep the old and we do not neglect the new—we try not to. We keep as spry and watchful of what is going on as an old academic body can.

4880. What is the position of the Professors who have not our degrees when they come to us?—There are not many such.

4881. Is it not usual to give them honorary degrees?—It is rather usual I think; in fact it is universal, I believe.

4882. I want to ask you a question in regard to the statement you have made about mere specialists. Would this be an illustration, that Dr. Salmon, for example, was a great mathematician, but he was also a Professor of Divinity?—He was the Donegal lecturer, which is another name for Professor in mathematics.

4883. And is it the case that the present Professor of Greek was formerly Professor in moral philosophy?—Yes. Talking about specialisation, that illustrates what I mean by specialisation. Of course when a man is a specialist he must narrow himself in his study to some extent.

4884. But these men were specialists, and they were still able to act as Professors in subjects widely different?—Yes.

4885. Are you satisfied with the men that the Fellowship system has given?—For what purpose?

4886. The Fellows in the University?—Those that I know myself I am satisfied with.

4887. And with the history of the University for the last 100 years?—Certainly I am satisfied.

4888. Do you think we have lost many of our best men by the present system, many of our best undergraduates?—Of course we have lost a few men, whose loss we deplore. We have lost some, but it is not the Fellowship system that loses them to us. What loses us such men as, for instance, an old friend and competitor of mine, Dr. Bury, I should say, though I have no authority for interpreting his motives, that he wanted to be in England, near the British Museum, and in a far greater University than ours can pretend to be.

4889. Is there any reason for believing that the best under-graduates have not gone for the Fellowship on account of our Fellowship system?—I do not see any reason for saying that. The main thing that prevents our graduates going up is their uncertainty now as to the prospects of Fellowship. I have had letters from some of them asking me whether I think it is likely that the present system of examination for Fellowship will go on. When a man is casting about to see whether he should stay at home an assured prospect is the sort of thing that is most likely to keep him at home.

4890. The point I want to get at is, is it your opinion that our best men have been given to us as Fellows by our present system?—That is a hard question. I think we have got under this as many good men as we could have got under any other system.

4891. Is it your conviction that the examination system for the Fellowship, with some modifications, is the best for us?—I am as certain of it as that I am sitting here that the examination system of appointment to Fellowships is the best for us.

4892. Dr. JACKSON.—You are satisfied about that?—Yes. I do not imply any superstitious respect for examinations. If we were speaking of an institution in England it is quite possible that I might have a different opinion. But certainly the examination system is not the best system on which to get the best Professors.

4893. Mr. KELLEHER.—I want now to ask you something on a point you have not referred to at all in your evidence, in connection with the Statement No. III.,* submitted by the Junior Fellows, which you signed?—That is a thing of two months ago?

4894. That is a scheme signed by twelve Junior Fellows, one retired Fellow, and eight Professors, for widening the constitution?—Yes, I signed that.

4895. It has been stated that a second College in Dublin University would cause less friction than the modification of Trinity College proposed in Statement No. III.?—Yes, less friction in a certain sense, as there is little or no friction between the common soldiers of two armies opposed to one another, but kept apart. They seldom see one another until the day of battle comes. If students were allowed to mix with one another in one College they would fraternise, just as the soldiers of two armies can fraternise when left to themselves, according to all the old stories of warfare. When Catholics have come to Trinity College—and I speak from greater experience than many people, because I had more Catholic pupils perhaps when I was a Tutor than any Tutor of the time—they made friends with their non-Catholic fellow-students. Friendships were formed then which were never broken, not only friendships with their Tutor, but friendships with their fellow-students. You will find such men continually about College now, and they are proud of their old College. Whenever Catholics come in that way into the College they do

not go out without making many friendships. The question for us is, whether we wish to increase the number of such men, men who are our friends because they know us, or whether we shall by laws like those of the Medes and Persians, part our men from them and them from our men, so that they shall never know us, but in a University like an ill-organised body be near enough to us to quarrel with us with tremendous effect occasionally, but never to become our friends. Owing to the nature of the circumstances under which such a foundation was made within our University, it would be almost impossible that the members of the two Colleges should become friends, not that there would be perhaps anything to blame on either side—I impute nothing, and we should not think of imputing anything—but there are circumstances over which moral causes have scarcely any control, and that state of circumstances, I think, would occur here.

4896. Dr. JACKSON.—I should like to ask one or two questions suggested by Mr. Kelleher's examination. Do I understand that the Fellowship Examination purports to represent the Arts Course and nothing more?—That, I think, is substantially correct; that is its constitutional position, I believe. It is not worth while making a difference about the points in which it is not correct. It is an important question, and I should not at all like to answer it hastily. What do you mean by Arts? Not merely Classics and Mathematics, but also Experimental Science and Physics, because they now come within the term Arts. We now give Arts Degrees in Legal and Political Science, Experimental Science, History, Legal and Political History. There are now eight such subjects, many of which do not come under the old definition of Arts. Taking the Arts as represented by those eight subjects of Moderatorship, the Fellowship Examination, though intended to procure for our system men who should fulfil the idea of Arts, is not adequate for its purpose at present, and ought to be made so. Then, as its intention would be to represent the Arts, so it would actually fulfil its intention.

4897. I now understand that it represents nothing outside the Arts Course, and that it does not represent the whole of the Arts Course. I understand that you think that it had better confine itself to representing the Arts Course?—I think so.

4898. But that it ought to be enlarged to the proper representation of the Arts Course?—A large and liberal Arts Course fit to understand and sympathise with the needs of the professional schools.

4899. You do not think it desirable to take the power which would enable you to represent from time to time subjects outside the Arts Course?—I do not think it is good to mix professional with Arts work.

4900. I understand that you think that if you get people properly trained in the Arts those persons will ultimately become specialists outside that region?—Outside the region of Arts?

4901. I will give you an instance. Old Adam Sedgwick, the Geologist, began as a Mathematician, reading Mathematics in the old-fashioned Arts way. He was little more than an amateur in Geology when he became a Professor of Geology, and he became a really great and effective Geologist. That is, I imagine, the sort of idea that you have of the working of your system?—Yes, there was something like that in the case of Dr. Salmon, who was a Fellow of the Royal Society and had several learned distinctions. I think

—though I am not sure—he got the Copley Medal before he had done anything great in Theology. He had been a clergyman, and the Board appointed him Regius Professor of Divinity from his general ability and known power, and he became a distinguished Theologian after a while. I have known other such cases.

4902. Could you give me approximately the date of Dr. Salmon's Degree?—He got Fellowship, I think, in 1842.

4903. Was he a Mathematician first or a Theologian first?—A Mathematician first. He became a Theologian afterwards.

4904. The LORD CHIEF BARON.—He was not a clergyman when he was elected a Fellow?—I do not know. He must have become a clergyman within a year afterwards. He was a man who knew his Classics in a splendid way. He had read nearly everything in Classics, not critically, but with great power.

4906. Dr. JACKSON.—Do you think it possible nowadays for a man to be distinguished in two subjects as different as Mathematics and Theology? Is not specialisation an unfortunate necessity of the time?—Dr. Salmon by the time he became distinguished in Theology had laid aside his laurels in the other subject. No man could be so actively employed, and with such success, in both at once. Dr. Salmon, I believe, practically gave up Mathematics when he turned to Theology.

4906. It is nearly sixty years since that, and I am asking whether there has not been a change in the direction of specialism, an unfortunate change if you like, but a necessary one?—The change is not so very great, and it affects different men differently.

4907. Dr. JACKSON.—Just one more question. Has the College any livings to which it has the presentation?—At present it has none.

4908. The CHAIRMAN.—I think I understand from what you said that the University gives no Degree in Science, neither Bachelor nor Doctor?—Yes, it gives the Degree of Doctor in Science.

4909. But not Bachelor?—No. The B.Sc. implies something different. It gives the Degree of Doctor of Science on the strength of other work. Suppose a man who is a Graduate of ours, or one who comes from Oxford or Cambridge and pays the replacement fee and submits for examination a book he has written on a scientific subject which seems a good book, then our University gives him the Degree of Doctor of Science.

4910. But there is no Degree of Bachelor of Science?—No, that implies teaching. We are continually thinking of that and some of us wishing to see it instituted, and for the last twelve months I have thought the Board might have seen their way to founding it.

Dr. JACKSON.—It is the same as with us at Cambridge. We have Doctors of Science but not Bachelors.

4911. Mr. BUTCHER.—Can the Board institute a new Degree as Bachelor of Science?—The Board can, but only with the consent of the Council. They must get the consent of the Council.

4912. Dr. DOUGLAS HYDE.—I suppose the Degree that you give to the Professors does not enable them to go on the Council?—It enables them to become members of the Senate.

The witness withdrew.

The Commission adjourned until the following morning.

FOURTEENTH DAY.

WEDNESDAY, NOVEMBER 14TH, 1906.

AT 10.45 O'CLOCK A.M.,

At the Royal Commissions House, 5, Old Palace Yard, Westminster.

Present:—The Right Hon. Sir EDWARD FRY, P.C., D.C.L., LL.D., F.R.S., F.B.A. (Chairman);
 The Right Hon. C. PALLES, P.C., LL.D., Lord Chief Baron of the Exchequer in Ireland;
 Sir THOMAS RALEIGH, M.A., D.C.L., K.C.S.I.; Sir ARTHUR RÜCKER, M.A., D.SC., LL.D.,
 F.R.S.; HENRY JACKSON, Esq., D.LITT., LL.D.; S. H. BUTCHER, Esq., M.A., LL.D., D.LITT.,
 M.P.; DOUGLAS HYDE, Esq., LL.D.; DENIS J. COFFEY, Esq., M.A., M.B., F.R.U.I.; S. B.
 KELLEHER, Esq., M.A., F.T.C.D.;

and J. D. DALY, Esq., M.A., Secretary.

DANIEL F. BROWNE, Esq., K.C., called in and examined.

LONDON.

Nov. 14, 1906.

Daniel F.
Browne, Esq.,
K.C.

4913. CHAIRMAN.—You have been good enough to come here as representing some Association of the Roman Catholic laity?—No, I don't represent any Association of Catholic laity, but I think, perhaps, I might first shortly state the position in which I come here.

4914. If you please?—I am a King's Counsel, and a member of the Irish Bar, and I am a graduate of the University of Dublin. I have, for a number of years, taken a large interest in the question of University education in Ireland. I was one of the secretaries of the movement which resulted in the Declaration of the Catholic laity being signed in 1896, the Declaration which was afterwards ordered to be printed in the House of Commons, and which is to be found in the Appendix to the Royal Commission's Report on University Education (Ireland) in 1901. I am also one of the signatories to the "Statement of certain Catholic Laymen with reference to University education in Ireland" which was submitted to the same Royal Commission in 1902, and which has been printed in the Appendix to the Third Report. It is Document LV.

4915. You will bear in mind that these documents are all before us?—Yes, but I have just to refer to one particular statement in it; I do not intend to go into it more than is absolutely necessary. In the first paragraph of the Statement of 1902 is the strong expression of opinion of those who signed the Statement "That of the various proposals submitted to the Royal Commission the best is to be found in the establishment and endowment of a Catholic College in Dublin for Catholic students, affiliated to the University of Dublin, which should be equally with Trinity College a constitutional College of the University, with adequate representation on the Governing Body of the University." I desire to repeat before this Commission the expression of opinion contained in that Statement. Being a graduate of the University of Dublin I have had some experience of the position of Catholics in Trinity College. When I entered the University we were a very small minority—I believe not more than one-tenth of the entire number of students, and I understand at the present time there is practically little difference in the number of Catholic students in Trinity College. And though we were treated with courtesy and consideration it was felt that we were something like strangers and were out of touch with our surroundings. When I was at the University I knew of young Catholics about to begin their professional studies who were deprived of the advantages of University education by reason of the objection which their fathers and those who were entrusted with the care of their education conscientiously entertained to their entering Trinity College; and since then I have known similar cases. Some quite recently have come to my knowledge. Now, by the foundation within the University of Dublin of a College for Catholic students which should be equally with Trinity College a constitutional College of the University, the University of Dublin would be really, and not in a mere technical sense, opened to the large body of Catholics in Ire-

land who are fit for, and who desire a University education. The difficulties created by the admittedly Protestant conditions of Trinity College, which now exclude the great majority of Catholics would no longer exist, and Catholics would be enabled to obtain University degrees whose value has been so long established and universally recognised. If such a College were established in Dublin University lectures in several subjects, some in the Arts courses, delivered by University Professors, would be attended by students of the two Colleges. Professional lectures, such as lectures in Law and Engineering, would be similarly attended, and the students of the two Colleges would thus know and learn to appreciate each other through working together in common pursuits. There would probably be a Union similar to the Oxford Union, in which the Debating and Literary Societies of the Colleges meet. The students of each College would probably join in athletic games and amusements, and would thus frequently be brought together, and become acquainted with those whom they would afterwards meet in professional life. They would learn to know and respect each other, and the widest divergence in religious convictions would not prevent the formation of enduring College friendships. The importance of such results cannot be overlooked. The establishment of such a College would, I think, be regarded as a satisfactory solution of the University question. When established, the College should be subject to academic government, and developed on academic lines. It is with the intention of putting those views before the Commission that I have attended here.

4916. Now, what do you propose with regard to the Professorships of Trinity College. According to your view, are they to be made University Professorships, and the appointment to them, and the government of them, to be vested in the Governing Body of the new University—I call it a new University, because substantially it would be a new University?—It would be substantially a new University, but there would be College Professors in each College.

4917. The Professorships of Trinity you would leave to Trinity—You would not touch them?—Well, to some extent it might be that some of the Professors in Trinity would become University Professors. Take the School of Law—it might be that the Professor of Law in Trinity College might become a University Professor.

4918. But you would not take them away from the College against its will? I mean, of course, now, the Professorships of Law are under the control of the Governing Body of the College—the Board—and what I want to know is, do you propose that those Professorships, after your scheme is carried into effect, shall be governed, not by the Board of the College, but by the Governing Body of the University?—Well, some of the Professorships would certainly have to be controlled by the Governing Body of the University.

4919. Do you think that it would be fair to Trinity College to take away Professorships founded either by its own funds or by friends of the College—private

LONDON.

Nov. 14, 1906.

Daniel F.
Browne, Esq.,
K.C.

endowments?—I do not see that private endowments should be touched.

4920. Supposing the endowment has been, by the College itself, would you take that away?—If the endowment of a Professorship is from the College funds, which College funds we do not propose to touch, the endowment would not be taken away.

4921. I suppose all Professorships are either endowments by private individuals—friends of the College—or come out of the funds of the College; would you leave all those to Trinity College or would you make any of them University Professorships?—Whether the University Professorships would be endowed in the same way as the College Professorships are at present I do not say, but there would certainly have to be, I think University Professorships, which would not be simply appointed by the Board of Trinity College.

4922. I am not calling attention to whether you think there should be University Professorships, but whether you propose that the existing Trinity College Professorships should become University Professorships—any of them?—I really have not considered that, and I do not think an unconsidered view of the subject would be of any value.

4923. With regard to the Governing Body, if you sever the Governing Body from Trinity College you must constitute a new Governing Body for the University?—Yes.

4924. That, according to your view, would be constituted partly of representatives of Trinity College and partly of representatives of the new College? Yes.

4925. But are they to be in equal numbers?—I think they should be in equal numbers, for this reason: that the purpose of the reform which we seek is to give equality in educational matters, and I think that there should be equality.

4926. Now, as to the appointment to University Professorships, and so on; if there is to be equality, will not that equality apply as much to appointments among Roman Catholics on the one side as to appointments among Protestants on the other?—I do not think that would necessarily follow.

4927. Not necessarily, but is it not probable?—Well, I do not know. If a Catholic College is established and developed on academic lines, I should certainly think its academic instinct would be sufficient to enable the representatives of that College on the Governing Body to appoint Professors on academic lines.

4928. But is there any security for academic merit being exclusively regarded when there is a diversity of religious views in the same body. Does not the experience of Ireland show that the habit comes in of dealing, turn and turn about, so that instead of choosing the best men for the Professorship you choose the best Roman Catholic or the best Protestant, as the case may be?—I would not apprehend that there would be so much danger that considerations of that kind would apply to the appointment of a University Professor.

4929. Now, you have considered the question of the comparative merits of a scheme of a new College in the University of Dublin and a new College in the Royal University, and I daresay you are aware that witnesses have expressed a strong preference for the latter of the two schemes?—Yes; I have considered that, and I certainly have a strong opinion that a new College in the University of Dublin would be regarded as a satisfactory solution, and I think that by very many, perhaps the majority, a College in the Royal University would not. I do not know whether it is necessary for me to give some of the reasons on which I base that opinion.

4930. LORD CHIEF BARON.—It certainly is?—In the first place, by the establishment of a College in the University of Dublin the students obtain degrees in the University—a University with a long established prestige and universally recognised.

4931. CHAIRMAN.—Is it reasonable to give the prestige of Trinity to a new College?—Trinity happens to be the one College in the University; the students of the University of Dublin heretofore no doubt have been of Trinity College, but they have taken the degrees of the University of Dublin, and if you establish another College in the University of Dublin of course the students obtain that degree.

4932. But the University of Dublin is now governed by the Board of Trinity College and the University of Dublin would be governed by the new Board which

you have indicated, so that they would be two essentially different bodies. Would it be fair to give to the graduates of the new body the same degree as to the old?—I do not think it is at all unfair because I am quite sure that the requirement of the University, when it becomes constituted of more Colleges than one, will be equally exacting—that the standard of the degree will be equally high.

4933. But then a degree implies not merely a standard of examination but social association and association with the past, and so on?—We look forward to the establishment of a College in the University of Dublin as bringing with it the advantages of such association, because, in my few observations at the outset, I endeavoured to urge that association is one of the great benefits that will be derived. As far as the educational advantages go, I think that the value of the degree will be as high; if this College be established the students of the two Colleges will be constantly brought together and have all the benefits of association, and I think that is one great and important feature of the scheme.

4934. Did you happen to see a letter from Monsignor Molloy upon the question which of the two is the better?—No; I cannot say I remember his letter.

4935. LORD CHIEF BARON.—When did you get your degree in Trinity College—at what date?—I got my degree in 1882.

4936. Now, since what time have you been interested in this question of University education as a lay Catholic?—Well for more than ten years I have been taking an interest in the question—more than ten years ago I acted as secretary, or as one of the secretaries, in the movement that resulted in the re-signing of the Declaration of 1870 by the Catholic laity in Ireland in 1896.

4937. There was a Declaration (We have it in the Blue Book) signed within a year after the passing of the Church Act by upwards of 800 Catholics, urging their rights to justice in educational matters?—Yes.

4938. I do not suppose you were born then, but you have been interested in that movement, shall we say, from 1896—that is ten years?—Certainly.

4939. And you have taken an active part in it?—I have.

4940. And I suppose that you are acquainted with the opinion of the general body of lay Catholics—of Dublin at least?—Well, I have had an opportunity of becoming acquainted with it; I am acquainted with it.

4941. Am I right in saying that the general opinion amongst lay Catholics in Ireland is very decided as between a College in this Royal University and in Dublin University?—As far as my knowledge goes it is.

4942. And the claim of the Catholics, to your knowledge, is put forward as a claim of right?—Certainly.

4943. As a claim of right to Dublin University as a National University?—Yes.

4944. Modified, so far as is incident to the abolition of the State Church in 1869?—That is so.

4945. And claiming for every citizen his birthright of education in the University of Dublin irrespective of his religious opinions?—That is so.

4946. And do you think that it is consistent with the true principles of civil and religious liberty that a large body of students should, for upwards of thirty years, have been deprived of that birthright by reason of political considerations and difficulties in passing Acts of Parliament?—I certainly do not.

4947. At all events, as far as you are aware, that has been one consistent claim, based on what the Catholics conceive to be their right?—As far as I am acquainted with it, it has.

4948. Now, I will come to the documents that have been signed by Catholics. The document of 1896 was a renewal of the Declaration of 1870, and simply claimed equality without going into the mode in which that was to be attained?—That is so.

4949. Am I right in saying that later on, especially during the Robertson Commission, their views took a more particular direction, and that they claimed as the only remedy an additional College in the University of Dublin? I will refer you now to some documents in reference to that. There is one that has been put in by the Robertson Commission—it is not necessary to put it in again—but there was a Committee appointed

upon the 6th March, 1902, at a meeting of the Catholic laymen, Sir Gerald Dease being in the chair, when it was proposed by Mr. Ambrose More O'Farrell, and seconded by Mr. Commissioner Lynch, that a number of gentlemen should be appointed a Committee to make known to the Royal Commission the views of Catholic laymen who supported a solution of the Dublin University question on the lines of Collegiate education within the University of Dublin?—Yes.

4950. You took part in that?—I was one of the signatories to the Declaration.

4951. Was the essential element in that representation the distinction between the Royal University and the University of Dublin?—Before I answer that it is right to say that I am not one, and never was one, of the Committee, but I am one of the signatories to the document, and I say that as one of the signatories to the document I certainly thought that that was—

4952. A solution of the University question on the lines of Collegiate education within the University of Dublin?—"Within the University of Dublin" was the essential feature.

4953. That had been excluded from the former Commission—"The University of Dublin,"—at least it was held to be excluded?—The University of Dublin was held to be excluded.

4954. And therefore the essential element in this Committee of 1902 was Collegiate education in the University of Dublin as distinguished from any other institution?—Yes.

4955. Now, let me come please to the document that was prepared by that Committee—I do not intend to allude to it at length—"We are strongly of opinion that of the various proposals submitted to the Royal Commission the best is to be found in the establishment and endowment of a College in Dublin for Catholic students, affiliated to the University of Dublin." Can you say whether, in 1902, when that was sent in, that practically represented the opinion of lay Catholics?—It did.

4956. And that they were opposed to any new College not in the University of Dublin?—It represented that the best solution was to be found in the establishment of such a College within the University of Dublin.

4957. Now, I will bring you to a document that was not before the Robertson Commission, and is now of great importance. You are aware of Lord Dunraven's letter* that was dated the 1st January, 1904?—Yes. I am aware of that letter.

4958. Are you aware of a document† of approval of that which was prepared?—Yes.

4959. And you have signed it—"Daniel F. Browne, 28, Upper Mount-street, Dublin, B.A., K.C."?—I did sign that.

4960. "We consider that a satisfactory solution of the Irish University question can be arrived at on the lines indicated by Lord Dunraven's letter of 1st January, 1904"?—Yes.

4961. Can you say whether that represented the general opinion of lay Catholics at the time?—I think it did.

4962. And that it still represents them?—I have no reason to think it does not represent them still.

4963. Now, I wish to bring you to another matter. Are you aware of this remarkable action of Mr. Synnott and some of the gentlemen who were on that Committee, in altogether exceeding their jurisdiction and coming forward in support of other matters and stating themselves to represent the lay Catholics of Ireland?—Yes. As I regard the Committee of Catholic Laymen their function was defined practically by the resolution which you have read—that their function was to submit to Lord Robertson's Commission at that time the strong expression of the opinion of the Catholic layman who signed the statement—that the best solution of the University question was to be found in the establishment of a College in Dublin University. That was the function they had to discharge. Their duty, according to the resolution, was "To take steps to make known to the Royal Commission the views of the Catholic laymen, to support the solution of the University question on the lines of Collegiate education within the University of Dublin, and to take all necessary steps to induce Parliament and the Government to adopt the above solution and for that purpose to consider and report to the Association of Catholic laymen on this question." And then

it was proposed "That we approve of this Statement on this question which has been already extensively signed, and we authorise the Committee to take further steps to bring our views before the Royal Commission."

4964. Those were their powers and no more?—Those were their powers and no more. They were so defined.

4965. To your knowledge did that Committee ever get any other power?—I am not aware that they ever got any other powers.

4966. Are you aware that pending this Commission, and immediately before the last day for sending in Statements, there was some movement by Mr. Fottrell for the purpose of inducing signatures to a paper advocating a change in the College as distinct from the University?—I am aware of that.

4967. Was that ever, to your knowledge, submitted to the body of lay Catholics that appointed that Committee?—No.

4968. I am speaking now, not of the Committee, but of the body that the Committee represented?—No.

4969. Are you aware that there were a number of the Committee themselves that strongly objected to any such movement, largely upon the ground of its impracticability?—I am aware that some members of the Committee objected to that, and I think I am at liberty to state so.

4970. At all events, the Committee were not unanimous?—No.

4971. Are you of opinion that such a scheme as that is absolutely impracticable?—I am convinced that it is impracticable.

4972. Putting out of consideration that scheme for an alteration in the College, as distinct from an alteration in the University, is the opinion of lay Catholics practically unanimous in favour of the College being in the University of Dublin and not in the Royal University?—As far as my knowledge goes, the opinion of Catholics is distinctly in favour—strongly in favour—of the College being in the University of Dublin as distinct from being in the Royal University.

4973. I will now bring you to some questions that were asked you by the learned Chairman. Your object in coming forward here is to state what your view is of that general lay opinion?—Yes, and I have not gone into the details of the scheme to any great extent; I have to some extent.

4974. Is the general lay opinion of Catholics in Ireland that they do not want to take anything away from Trinity College?—Certainly.

4975. To leave it there, and its endowments, and not to interfere with the property of any institution?—They do not wish to interfere with the property of an endowed institution.

4976. And do they think it is the duty of the Government to whom they pay their taxes to provide the funds for anything that in common justice the Government is bound to do?—Yes.

4977. Therefore, you decline to go into the question of the allocation of any funds of Trinity College and the Dublin University?—Certainly.

4978. If this Commission like to do it, well and good, you take no part in it?—And I did not wish to convey that it was ever my idea that any part of Trinity College endowments, whether endowments of Professorships or otherwise, should be expropriated or taken from Trinity College for a moment. The question Sir Edward Fry asked me, I thought, was rather a question of the mode of selection of the Trinity Professors, but no question of taking away from Trinity College any part of its endowments occurred to my mind.

4978A. And you are aware that the Catholic view is not in the slightest degree to the effect that the work that has been done by Trinity College is not admirable for those who take advantage of it?—Certainly.

4979. No charge is made against the College directly or indirectly, or the slightest attempt made to interfere with its funds?—Certainly not.

4980. Just one or two questions in consequence of what you said to Sir Edward Fry about the new University. Of course, you look upon the University as one entity, and the College as another entity?—Certainly.

4981. I am not going into the legal question—that will be for others—but, of course, if there was a second

College it would be necessary that the new Governing Body of the University would be composed of representatives elected by both Colleges?—Yes.

4982. And, as you say, of course, in equal proportions?—Yes.

4983. Now, are you of opinion that the view of the lay Catholics is as strong in favour of academic education of the highest class as that of any other body of people in the United Kingdom?—It is.

4984. They do not seek to depreciate University education?—Certainly not.

4985. They desire education of the highest class?—That is so.

4986. And they are ready and willing to prove their ability to profit by that education, and, by competition with members of other bodies, to show that they are worthy of it. Is not that so?—Yes, that is so.

4987. Is there a view amongst lay Catholics that there is too much separation at present between the Catholic youth and the Protestant youth?—There is, strongly.

4988. Is there a strong and unanimous opinion amongst the lay Catholics that everything should be done to draw as closely together, and at as early an age as possible, the youth of both religions?—Yes.

4989. Is that one of the grounds upon which they are so anxious that this shall be in the University of Dublin and not in the Royal University?—It is.

4990. Are you of opinion that if there were a new College in the University of Dublin, the youth of both religions would fraternize together and fraternize with advantage?—I am. I am confident of that.

4991. I take that expression from the document that has the unanimous approval of the Hierarchy—"would fraternize, and fraternize with advantage." Now, as to this Governing Body, are you of opinion that, because a person is a Roman Catholic, therefore, he is less competent than a person of another religion to act according to his duty in honestly making appointments on academic lines?—I am certainly of opinion that a Roman Catholic is as competent as anyone else to act in such a way.

4992. I suppose we all think that we are. Are you of opinion that upon a body that would consist in equal proportions of Protestants and Catholics, whose duty it would be to make appointments on academic lines, and without regard to religion, those gentlemen would violate their duty, and take religion into consideration?—I do not believe that they would violate their duty.

4993. I am not now talking of a College obsessed by clericalism, but of a College upon the lines of Lord Dunraven's Resolution?—Yes.

4994. You believe they would honestly do their duty in the same way as we are thoroughly convinced that our Protestant brethren would do theirs?—I believe that they would honestly do their duty.

4995. You, I suppose, have had some experience of the mingling together of students in College society?—Certainly, I have.

4996. And you have been in the College societies yourself?—I have been in the College Historical Society, and I certainly formed at College friendships with those who differed from me in religious matters, which have endured since and have grown stronger.

4997. Are you aware that all of us who have been in Trinity College have formed friendships with persons of other persuasions that have been lifelong, and that we have never thought of the differences of religion?—Certainly. That has certainly been my experience.

4998. Do you think that this mingling together of fellow-students in College Society is one of the very best modes of bringing them together the moment that they leave school and enter on their University career?—I think it is, certainly; I can conceive nothing better.

4999. You know how Catholics and Protestants get on at the Bar, when they are called there at twenty-one or twenty-two years of age?—We do not advert to the differences of religion.

5000. Have you any doubt that the feeling between the young men I have mentioned towards one another would be identically the same if they were in these two Colleges, and mingling in College Societies, and competing with each other in College examinations, as is the case with young men at the Bar, meeting together as friends, and struggling with each other as advocates on opposite sides of cases?—I am convinced that it would.

5001. Now, I have to ask you this question. You know the condition in which Ireland is now. Are you of opinion that the relations between Catholic and Protestant members of the population are unfortunately becoming more strained?—I think so.

5002. In your own time, I suppose, you have observed that?—I think that.

5003. Do you think that that would be to any substantial extent obviated by an additional College in the University?—I think it would be very largely obviated, because those who would be in a way the leaders, the thinking part, on each side, the leaders of public opinion, would meet on each side at a time when they would learn early to appreciate and know each other.

5004. When their sentiments were fresh and generous, and the influence that they then acquired would actuate them during the whole of their lives?—During the whole of their lives, certainly.

5005. There is another matter I want to call your attention to. Are you aware that amongst the secondary teachers in Ireland there is a sad want of academic knowledge—Intermediate teachers?—Well, really, I have no knowledge as to that.

5006. Then, I pass from that. If the teachers of Ireland in Intermediate schools were educated in a University, as undoubtedly they must be, are you of opinion that they would carry with them the feelings of generous rivalry and respect for persons of other denominations that they had acquired in their University, and that when they themselves began to be the teachers of youths in Intermediate schools, those schools would become permeated with the same generous feeling that we seek to create by means of a University?—I certainly think they would. I certainly think the teachers would carry with them from the University to the schools, wherever they taught, the feelings engendered at the University.

5007. Sir ARTHUR RÜCKER.—I will only ask one or two questions. The idea of bringing students together in the way you have been describing is one which must commend itself to everybody, but I confess that that view has been largely put forward by those who have not had much practical experience in the actual working of a University, and the difficulties I want to put to you are put in order that I may ask you whether you will give any opinion upon questions which, when it comes to the actual carrying out of the scheme, must take a very foremost place. Now, in the first place, you said you did not wish to take any Professors from Trinity College?—No.

5008. They are to remain Trinity College Professors?—We do not wish to take any endowments from Trinity College. As I said, how Trinity College may deal with its own endowments is a matter I have not considered. I think that its endowments should not be taken away.

5009. You would not by force take a Chair from Trinity, even supposing you endowed it afresh, and you had a University Professorship.

LORD CHIEF BARON.—You would not have any objection to Professors who would teach the students of all Colleges—

5010. Sir ARTHUR RÜCKER.—I think I must explain the difficulty. We have had a great deal of evidence before us that the Catholic students and Catholic Colleges would not be, at all events, encouraged to go to teachers appointed by Trinity College. We have been told things such as this—that if there were a common laboratory they would not be allowed to mix there with the other students—that they would have to have the use of the laboratory on alternate days. That is a point that has been put to us. We have had that from very high educational authorities. How, then, do you propose such difficulties would be got over—by giving each College a complete endowment, so that it could work absolutely independently of all the others, or by establishing the Colleges only partially with such equipment, having a number of University Professors to complete that equipment?—I think, for instance, that there might be Professors—University Professors—who would lecture in Honours. The Arts lectures might be given by lecturers of each College, but the Honours course and Professional lectures, such as Law and Engineering, might be given by University Professors.

5011. Are they to be new endowments?—I think that they should be elected by the University. As to endowment, I have not considered that.

5012. But the lecture rooms where these Professors lecture—where are they to be. I mean are the students of one College to go down frequently to hear

lectures in the other?—I do not see any objection to University lectures being delivered in the lecture rooms of the other College.

5013. LORD CHIEF BARON.—Wherever the apparatus was?—Yes; the mere *locus in quo* does not matter, in my opinion. If, for instance, the lecture was to be given in some particular scientific subject, the apparatus for which happened to be in Trinity College and not in the new College to be founded, the University lecture would naturally be delivered where the apparatus was.

5014. SIR ARTHUR RÜCKER.—Even though we have been told that in the case of a laboratory, the students would not be allowed to work together?—I do not accept that at all.

5015. A very high educational authority?—I do not know what evidence has been given before you.

5016. CHAIRMAN.—Dr. Delany says it would not be safe, in his judgment, for the students in the College, Roman Catholics, to get their scientific experimental teaching in the College of Science?—I am quite unskilled in these matters, but as to the safety of it, there does not appear to me to be any danger.

5017. SIR ARTHUR RÜCKER.—You really have not thought out the details of the scheme—to be quite frank?—No, I have not, but I do not see any difficulty in University lectures being delivered in either College.

5018. DR. JACKSON.—I should like to put one or two questions to you on similar subjects, but I do not want to dwell upon them at length. I notice that you spoke of Professorships becoming Professorships under the University. Are you sure that the existing Professorships are not already under the University?—I beg your pardon?

5019. Is it quite correct to assume that the existing Professorships are part of Trinity College, and not part of the University of Dublin?—Well, I do not really know; that is a question of the constitution of the College that I have not gone into. I could not say that.

5020. LORD CHIEF BARON.—The University never got a grant of public funds?—Of course, for some time, some confusion was created by the idea that the University and the College were practically the same legal entity. It was only comparatively recently that people's minds were disabused of that idea.

5021. DR. JACKSON.—Then, perhaps, I had better not ask any further questions on that subject. I think you assumed that if there were to be a University with two Colleges, the new College would gain prestige?—No, I say that students attending the new College would get the degree of the University of Dublin, which degree, of course, is of value, it having been so long established and widely recognised.

5022. You recognise, do you not, that the students who got the degrees of the University of Dublin from the new College would not get as much prestige as the students who got the degrees of the University of Dublin from Trinity College?—I do not think that that follows, if the educational standard is as high.

5023. If the educational standard was as high, and was known to be as high; but it would take time for that to be discovered, would it not?—I do not think so; I think that if the College were established, and the degrees were given from the University of Dublin, unless there had been—which I do not at all anticipate—a falling off of the educational standards of the College, the degrees would rank as high as before.

5024. The prestige of the degree would be as good, but how about the prestige of College life?—Is it not the fact that the old College, in virtue of its antiquity and its splendid past, must have a certain superior prestige, and is it not just that it should have a superior prestige in that way?—But we do not seek to touch the prestige of Trinity College at all.

5025. In fact, if you did seek it, you could not do it. I want to suggest that you could not possibly get any unfair prestige in that way, but that, on the other hand, it would be an advantage to the new College to be associated with an institution so ancient and so splendid: and that prestige seems to me to be a perfectly fair prestige for a new College to have, if it can get it. I wanted to ask whether that was the sort of prestige that you were contemplating?—The students of the new College would, as I have already

said, have the degrees of the University; there would be this intercommunication between the students of the new College and the students of Trinity College.

5026. Yes; and it would be fair, in your opinion, that public opinion should take account of those great advantages in estimating the position of the new College?—Yes.

5027. DR. DOUGLAS HYDE.—The objection that you have to the establishment of a fresh College in the Royal University, I take to be, for the reason that you do not appreciate very highly at present the degree given by the Royal?—Well, I do not think the degree of the Royal University is at all so widely recognised as Trinity, but that is not the only reason that I would deprecate the adoption of a scheme of a College in the Royal University, as against a College in the University of Dublin.

5028. But that would be your principal objection?—Another objection would be that the College in the Royal University would not bring with it the advantages of association that would certainly follow from the establishment of a College in the University of Dublin. For instance, if a College in the University of Dublin, which would be largely attended by Catholics, were founded, those Catholics would meet with the students of Trinity College, as I have already pointed out, and the advantages—as my Lord Chief Baron has said—of their fraternizing would be secured; but if you established a College in the Royal University, there is no reason why they should fraternize with the students of Trinity College.

5029. And, I suppose, you think that a College in the Royal University would be a kind of levelling down, while a College in the University of Dublin would be a levelling up?—Quite apart from levelling up or levelling down, the tendency of the establishing of a College in the University of Dublin would be to bring together, and weld together, people who are widely sundered, and whose tendency to diverge would naturally increase.

5030. And because Trinity College, Dublin, has for 250 years successfully resisted the inclusion with itself of any other College, do you think that is a reason why it should always exclude it?—I certainly think it is no reason why it should always exclude it.

5031. And with regard to the teaching in this new College, do you know anything of the B.A. given in the Royal University?—Well, the Royal University was established after my own time, and I have not followed the development of the Royal University attentively.

5032. LORD CHIEF BARON.—It is a mere examining body?—It is a mere examining body; but as to the value of its degrees in Arts, I have no accurate knowledge.

5033. DR. DOUGLAS HYDE.—Do you think that the prestige to which such an immense amount of importance is attached would, in this four-College scheme, be preserved by adding the letters "T.C.D." to the name of the student who took out his degree as a student in Trinity College?—I think so.

5034. And the name that the new College was called by could be indicated by letters, too?—That is done now in the case of Oxford degrees very often; the name of the College is put.

5035. So that the prestige would be preserved for the men who pass in Trinity?—It would.

5036. DR. COFFEY.—For those who would go into Trinity College under a reformed Dublin University, all the prestige of Trinity College would remain—the prestige of the College would remain?—Yes.

5037. What do you think might be the influence of a new examination scheme—because that is apparently what the reformed University would come to—what would be the influence of a new examination scheme upon the educational life of Trinity College? It would depend, would it not, upon the forces which came into contact?—I think so.

5038. Would it benefit Trinity, do you think, to have its students brought into competition with the students of the other University Colleges in their examination system?—I certainly think it would.

5039. The influence might be a very good one?—I think, as far as I can form an opinion, that it would be a very healthy one.

5040. Then, with reference to the question of the introduction to the degrees of the University of Dublin of bodies of students who had not received the local associations of Trinity College—students who had not

LONDON.

Brown, Esq.,
&c.

lived there, had not kept their residence and all that—is there not practically something like that in existence at present?—I know, of course, it is open for students to get degrees in Trinity who have never resided in the College.

5041. And who keep all the Terms by examination?—Take all the Terms by examination—I believe that is so.

5042. And that the proportion of that body of students is at present a considerable one, though, of course, not larger than the resident students?—I have not gone into that; I am afraid I cannot answer that question.

5043. Mr. KELLEHER.—I am going to ask you a number of disconnected questions; I hope you will not object to the fact that there is no association between them. You stated the position as regards a College in Dublin University and a College in the Royal University. Do I understand you to say that the majority of lay Catholics in Ireland who are competent to form an opinion upon the subject are in favour of a College in Dublin University?—As far as my knowledge goes, the majority are in favour of a College in Dublin University.

5044. Of those who are competent to form an opinion?—As far as my knowledge goes. Of course, I can only speak of my knowledge.

5045. CHAIRMAN.—I suppose no step has been taken to ascertain the general opinion of the Roman Catholic laity of Dublin on that particular point?—I think the Commission has before it evidence in the form of statements, but as far as my knowledge goes, I believe it to be in favour of a College in Dublin University.

5046. Mr. KELLEHER.—You are aware that the Bishops prefer a College in the Royal University to a College in Dublin University?—I am not aware of that; I think they suggest that any of the three lines would be satisfactory. I think they have expressed no preference for one line over any other.

5047. Have you seen a paper containing a statement by Mr. Charles O'Connor on this question?—I know he has made a statement.

5048. Are you aware that he says people want something which they can call their own, and which will be governed by Irishmen with Irish ideas and sentiments; how can that be obtained by means of a College in Dublin University, if the College in Dublin University is only to have a half-share in the Governing Body of Dublin University?—I do not think one-half will be foreign and the other Irish; I certainly would be very slow to think it.

5049. Mr. O'Connor has also suggested that the lectures in certain schools, such as the Engineering, Physics, Science, and Law Schools, might be common to the students of both Colleges; you suggest only lectures in the Law Schools and in the Engineering Schools?—I did not go into any details.

5050. But you made no reference to the Physics and Science Schools?—I did not consider that—I am taking the questions over which there can be no possible controversy at all—I do not see how the question of religion can enter into Law and Engineering.

5051. I think from Dr. Delany's statement one might infer that Catholic students will not be permitted to attend lectures given in the schools of Physics and Science by non-Catholic Professors?—

5052. LORD CHIEF BARON.—There are Catholic students attending those classes at University College, Dublin, where the Professors are Protestant.

5053. Mr. KELLEHER.—Do you think that if that were the view of the ecclesiastical authorities, the laymen would be strong enough to maintain their position against ecclesiastical pressure?—I beg your pardon.

5054. If it were the view of the ecclesiastical authorities that Catholics must not attend Lectures in Science given by non-Catholic lecturers, do you think that the Catholic laity would be strong enough to maintain their opinion against the ecclesiastical authorities?—You are asking me to assume an hypothesis which is practically unassumable. I do not think it would be the view of the Catholic Bishops that Catholics could not attend lectures given by those differing from them in religion. Catholics, without any objection, so far as I know, on the part of the ecclesiastical authorities, attend lectures in the College of Science that are given by non-Catholic Professors.

5055. Well, I shall pass from that. The second College which you contemplate in Dublin University would be staffed mainly by Catholics, I assume?—

There certainly would be a number of Catholic Professors in it; but the Catholic laity, so far as they have expressed an opinion at all, wish their College to be developed on academic lines.

5056. But is this attitude that you are representing the spontaneous attitude of the Catholic laity, or is it a compromise?—I think it is a spontaneous attitude; I do not think there is a suggestion of compromise about it at all.

5057. As to the staff, the staff would consist mainly of Catholics?—Possibly it would.

5058. Otherwise this College would not have that Catholic atmosphere which is demanded of it. Do you think it possible that there is a supply of Catholic Professors in Ireland sufficient to start the College in such a way that it would not be inferior to Trinity College?—Really you want a specialist in educational matters to give you that information.

5059. These are matters of the utmost importance in connection with things of this kind?—I certainly think there is a very good supply of Catholic Professors to be got in Ireland.

5060. Can you point to any great work done in Literature and Science by Catholic Professors of recent times?—I do not know that I can.

5061. Are you aware that there is any large export of Catholic students to fill positions in Universities in England and Scotland?—Really, I am not acquainted with these matters, and there is no use in my giving views to the Commission about matters which I really do not know anything about.

5062. Have you seen the scheme which has been submitted by certain Fellows and Professors of Trinity College for the widening of Trinity College so as to make it acceptable to Roman Catholics?—Yes.

5063. Are you opposed to that scheme?—Yes.

5064. Do you think it does not give the Roman Catholics the opportunities they desire?—I do not think it does; but I am opposed to it not merely on that ground, although that is quite sufficient ground—it is a scheme that would not be acceptable as giving Catholics all that they are entitled to.

5065. Assuming that a second College in Dublin University is impossible, as involving the destruction of the University, which would you prefer, a College within the reformed Royal University or the scheme of widening Trinity College?—Assuming that the establishment of a second College was an impossibility?

5066. Yes, assuming that, are you prepared to choose between a College in the Royal University and a scheme for widening Trinity College?—I have never considered the relative merits of the two—both appeared to me so unsatisfactory that I saw no use in comparing the two things, neither of which was a solution of the question.

5067. CHAIRMAN.—One question before we part. You are, of course, quite familiar with what has been called Lord Dunraven's scheme?—I know the general features of it.

5068. What I wanted to ask was this. Which of the two do you prefer—a scheme for a single College being added to the Dublin University, or a scheme for adding not only this new College in Dublin, but also the Colleges of Cork and Belfast?—Well, the scheme for the single College in Dublin would give the students attending the College in Dublin the full benefit that we say would be derived—or rather I should put it in this way: the students in Dublin would reap a larger benefit from the scheme than the students in Belfast and Cork would, because they have the peculiar advantages of intercourse and communication with their fellow-students in Trinity College.

5069. I do not know whether that quite answers the question which of the two schemes you would prefer?—I would prefer the scheme with a second College in the University of Dublin.

5070. A single second College?—A single second College. I prefer that, but I can quite recognise that Lord Dunraven's scheme would be a workable scheme which would secure advantages.

5071. Has it not all the difficulties of the first scheme—I mean the single College scheme—plus the difficulties which attach to a federal University?—It has some of the difficulties attaching to a federal University. The scheme of a single College would be the one I would prefer, though that does not mean that I would reject the other.

5072. And is that opinion of yours, do you know, the opinion also of the general Catholic laity of Ireland?—So far as I can say.

5073. Have you any means of knowledge with regard to that. You have been very accurate in your statements as far as you know, but what I rather want to get at is, how far do you know. Have any steps been taken to ascertain, as between the three schemes—that is to say, a single College in Dublin, a College of the Royal, or the Dunraven Scheme, which would be most acceptable to the Irish Catholic laity?—Yes, in this way. When these schemes were practically all before the public, the expression of Catholic opinion went out for the establishment of a second College within the University of Dublin—the declaration of March. Lord Dunraven's scheme was not then before us, but there is no doubt that as against the College of the Royal University, our declaration went out in March, 1902, when the scheme was before us, therefore, as between the second College in the University of Dublin and the second College in the Royal, that I think is an expression of Catholic opinion in favour of the second College in the University of Dublin.

5074. That is 1902?—That is 1902.

5075. Now, how many persons signed that—a considerable number, I believe?—In a case of this kind you must take the character of the signatories. A number of those who sign documents of this kind have really no opinions, and the signatures of such persons are practically valueless.

5076. No opinion of the Catholic laity as between those schemes has been deliberately considered, has it. I am only asking you?—I do not know that there was any debate over the relative merits, at a public meeting.

5077. I do not say a public meeting, but a deliberative meeting?—I am not aware of any.

5078. Dr. JACKSON.—I suppose you are of opinion that there is a feeling amongst the lay Catholics that the treatment they have received is such that they would accept practically anything they could get from the Government as an instalment—is that so?—Yes, but they desire a final solution now.

5079. LORD CHIEF BARON.—Well, now, in 1902, when there was a proposition about the Royal University, I take it that all lay Catholic opinion went forth to protest against a College in the Royal, and to obtain what they were entitled to—a College in the grand old Dublin University?—Yes.

5080. Those who agitated in 1902 came and laid before the Royal Commission that remarkable declaration?—Yes.

5081. You know that that was not acted upon?—No.

5082. There is no use in a Commission unless the Government act upon what it recommends by bringing in an Act of Parliament. Then, on the 4th January, 1904, was published Lord Dunraven's scheme?—Yes.

5083. Was that publicly known by the name of the Dunraven-Wyndham Scheme?—It was.

5084. That could not be carried out without the help of Parliament?—No.

5085. Do you remember that some short time after that was published as the Dunraven-Wyndham Scheme, there was a declaration from the Irish Secretary in Parliament that the Government could not bring in a University Bill?—Yes.

5086. In the interval between those two periods—that is, the publication of the Dunraven-Wyndham Scheme, and the making of that declaration in Parliament, are you aware that the lay Catholics were enthusiastic in favour of that scheme?—They were certainly in favour of that.

5087. I read a passage from Mr. Fottrell's book yesterday in reference to it—perhaps your recollection may go with it:—"Petitions approving of it were signed. Meetings were held throughout the country, at which resolutions in favour of the scheme were passed by acclamation. It was an open secret that the Catholic Hierarchy were prepared to sanction it. The great meeting in Dublin, held in the Round Room of the Mansion House, was attended by clergymen and laymen in about equal numbers; and at it his Grace the Most Rev. Dr. Walsh, Archbishop of Dublin, presided. Neither at this nor, so far as I can learn, at any other meeting of Catholics in Ireland held to support the Dunraven-Wyndham Scheme

was there a dissentient voice. Plainly, the Government could count upon Catholic Ireland as solid in support of the proposed University Scheme. Within a few weeks after this support had been assured to them, the Government announced that they had no intention of bringing forward any measure of University reform in Ireland, and so the Dunraven-Wyndham Scheme was dead." Does that substantially accord with your recollection?—Yes, it does. I was Secretary to that meeting that is mentioned by Mr. Fottrell there, and though, as well as I recollect, the resolutions of that meeting did not formulate any proposals in the words of the Dunraven Scheme, still that meeting was held immediately after the Dunraven Scheme came out, and certainly it was an enthusiastic meeting in support of educational reform.

5088. Now, as I understand, the Bishops are willing to consider schemes on one of any three bases—first, a Roman Catholic University; secondly, a College in the Royal; thirdly, a College in the University of Dublin?—Yes.

5089. Or, perhaps I might say four—the fourth being the Dunraven scheme?—Yes.

5090. Now, are you able to tell me at all the opinion of lay Catholics in favour of a University. It has been rejected, I know, by the Robertson Commission, and it is not now before us, but I should like to know from you what is the lay opinion in reference to it?—So far as I know of lay opinion in Ireland, I think that the lay Catholics would prefer—

5091. Prefer the College in the University of Dublin?—They would prefer it, and anyone who has been through Trinity, and appreciates the enormous advantages that would come from the second College—would consider it preferable.

5092. In fact anyone competent to form an opinion?—That is so.

5093. Do I understand, then, that the opinion of the lay Catholics of Ireland in reference to one College or three Colleges additional in the University amounts to this—that they would accept either?—They would.

5094. And if an objection is made to one, they would take the other?—I think so.

5095. But you see the mode is, first make an objection to one, so as to throw it on the other, which is unlikely to be accepted, which the Government would not be prepared to take up. But your opinion is that the Catholics would take either?—Either.

5096. Dr. JACKSON.—I want to be quite clear as to your opinion about the addition to Trinity College of one College or three Colleges. I understand you to say that you would rather that one College in Dublin was added to Trinity College, than that a College in Dublin, a College at Cork, and a College at Belfast were added to Trinity College?—Yes.

5097. And in explanation you pointed out that the students at Belfast and Cork would not get the same advantages from the alliance as the students in the second Dublin College?—I think not.

5098. I think that that is true. It seems to me obvious that in the opinion of those who value the association with the old College, the advantage could not be as great to the two provincial Colleges. But, do you say, that in consequence of the addition of the two provincial Colleges, the second College in Dublin would get less advantage from the alliance than it would if it were the only addition? Do you see my point? You have not made clear to me how the students in the second Dublin College would suffer in consequence of the two provincial Colleges being added also?—I must have misconveyed myself.

5099. You seemed to imply there would be a loss to the additional College in consequence of the addition of a third and a fourth, and I want you to say if that is so?—What I wanted to convey is this—that the students of the third and fourth Colleges would not derive the same benefits from the scheme as the students in the College in Dublin would.

5100. That is plain, and you did not want to suggest that the students in the second college would lose?—No; their position would be identically the same.

5101. You are not suggesting that there is any serious inferiority in the four-colleges scheme as com-

Browne, Esq.,
K.C.

pared with the two-colleges scheme?—Of course, there is a disadvantage connected with it—that it is a federal university. I would prefer myself a scheme in which there would be a second college, but if that would be regarded as impracticable, and for any reason would not commend itself to the Commissioners, then I would be prepared to take the other scheme.

5102. Is your preference based on sentimental grounds, or in respect of a certain dispersion of interest in the four-colleges scheme?—There would be a certain dispersion of interest.

5103. LORD CHIEF BARON.—One question. You are a Munster man?—I am.

5104. You know that Cork College has practically proved a gross failure as regards Arts education?—I think so.

5105. Is not that in consequence of what is called the Roman Catholic grievance?—It is.

5106. Do you not think it would be a great advantage to your own province of Munster if that grievance were removed from Cork College, and that, though

the students would not, perhaps, get identical advantages with those of the Dublin College, they would get at any rate a great boon?—It would re-create Cork College.

5107. And if it were necessary for a special class to go up to Dublin, arrangements might possibly be made for that?—Oh, yes; it would save the old Queen's College of Cork.

5108. It would settle the University question?—It would.

5109. Whereas the other—the single college—will leave unsettled the University question and the Catholic grievance—will leave an open sore?—Oh, certainly.

5110. CHAIRMAN.—But the Cork people told us nothing would satisfy them except a separate University of their own. What do you say to that?

CHAIRMAN.—We are much obliged to you for the advantage which we have had from your presence.

The Witness withdrew.

Rev. HENRY EVANS, D.D., Commissioner of National Education, called and examined.

Rev. Henry
Evans, D.D.

5111. CHAIRMAN.—You were good enough to lay before us a paper, * and you also communicated with us. We thought, perhaps, you would have been able to prepare a statement which would lay before us all that was necessary, but you did not do that. Now you are here, we shall be glad to hear all you have to say upon the special points which you refer to in your letter as not having been hitherto attended to. I do not invite you to go into the whole question, but we should like to hear what you have to say as to these special elements?—Am I to understand, sir, that it is the wish of the Commission that I should omit altogether reference to the reconstruction of Trinity College and Dublin University with a view towards meeting the requirements of the Catholic Church?

5112. I should think you might leave that; that has been laid before us a great deal. I do not know what you refer to in your letter, as to these special elements; perhaps you will deal with them first, at any rate?—I have intimated here—although it is very briefly done—that Trinity College and Dublin University should be so modified as to render them acceptable to all classes of the community in this country—Catholic and non-Catholic, Protestant, or by whatever name they may be called. The policy which I advocate is one National University, with one College as a teaching College in connection with that University so fully equipped as to be all-comprehensive, to provide for teaching in all modern subjects as well as in the older subjects of University instruction; and that whatever is necessary should be done to so modify Trinity College and the Senate of Dublin University as to bring the College and the University, either to other, into such relations as will be rational and understandable and calculated to give due effect to all the requirements of the different denominations of people whose members will go to Dublin University and Trinity College for their University instruction. I do not wish to occupy the time of the Commission further in regard to that, in view of certain pronouncements which have been made since the Commission I think was appointed—at all events, recently made. If I could believe that it were possible to get universal approval for such a proposal, I would cling to it with the tenacity of life; but I fear from what I have read that there is no hope of a proposal of this sort ultimately prevailing, or so prevailing as to be acceptable, and I do not want, therefore, to urge, or to occupy the time of the Commission in urging, changes to be made which would not be acceptable, and would not settle this University question. If it is the wish of the Commission that I should point out what in my view would be the nature of the changes that should render it acceptable to everybody, I have no objection to do so; but I do not want to urge it upon anyone.

5113. We need not trouble you, I think, on that point; we rather wanted to hear what are the special points you refer to?—I have stated here that it is an all-round necessity—practically an all-round necessity if the State would deal equally and fairly with all

classes of the community—that we should have one college wide enough for all, and that all University students should matriculate there, graduate there, and receive, as they specialise in the several schools, the qualifications which would bear a stamp of equal value in every part of this Empire. If that be not done, and we have several Universities, their degrees will not be of equal value; the stamp will not be the same—we may call a man B.A., or describe him as M.A. or D.Sc. or LL.D., there is a different value according to the place in which these persons respectively study, and the training, intellectual and social, through which they have been brought. I do not want any member of the community to have a mark—a hall mark—upon him that is not open to me. I want to be able to have as good a hall-mark as any other man can have—and, therefore, I say it is an all-round necessity of equality and fairness to everyone that there should be the one all-embracing national University with a thoroughly national College. I do not want to go further unless told to do so by the Commission.

5114. Go on, please?—The other matter of main importance, so far as I could presume to give it voice, is in regard to the Methodist Church. I have said in my statement that there should be a Methodist Faculty of Theology in connection with Trinity College. I am not sure that the sense in which I use the word "faculty" is that in which everyone may understand it who uses it, probably, with a different meaning in his mind. I understand by "faculty," and used it so in my statement, an academic body smaller or larger as the case may be, duly qualified to lay down a programme or curriculum of study in a particular subject in connection with which it is a Faculty—that, if it be a Faculty of Theology, it should be an academic body so constituted as to lay down and provide for instruction in a programme of Theology sufficiently comprehensive to be worthy of a University School of the highest standing, and possessing authority to confer degrees in Divinity. I do not feel that the Methodist Church in these islands is in its right place so long as there is not such a Faculty of Theology in connection with, or that would be suitable to prepare students for the ministry in, that Church, in this entire country. In Great Britain and Ireland there is not in connection with any University such a Methodist Faculty. They have their own Theological Colleges, to be sure—they are very efficient, and they are very ably staffed; but there is no Faculty that can put a University stamp upon the attainments of the men who are trained there. And I would mention for the information of the Commission on this particular point, that there are 3,242 ministers in the service of the two Wesleyan Conferences in England and Ireland. There are two distinct Conferences, but one undivided Church. There are 2,982 ministers in the service of the English Wesleyan Conference; there are 260 ministers in the service of the Wesleyan Conference in Ireland. The whole of the 3,242 ministers whose names are on

* Appendix to First Report (Cd. 3176), 1906, page 144.

the minutes of these Conferences have not access to any University Divinity School or Chartered Faculty of Theology controlled by their own Church, in which their attainments could be stamped, in which they could obtain that which would be a certificate to the world that they were men of thorough attainments and culture in these particular subjects of study, and for the particular work to which they are called. Hitherto these ministers have gone wherever they found an open door to a suitable University, and there are Graduates of Oxford and Cambridge, of Durham, of Edinburgh, of Glasgow, of Aberdeen, and of Trinity in Dublin. There stand on the Minutes of the Conferences in which these men serve twenty-four Graduates of Dublin University. Of these twenty-four, twelve proceeded no further than B.A., one is a D.Sc., two are Doctors of Law, two are Bachelors in Divinity, and there is one D.D. These twenty-four are persons who have studied in connection with Trinity College. But that is a small number compared with the entire body that I have mentioned—considerably over 3,000 persons—3,242. It is in order that Trinity College should be so constituted and provided with a Methodist Faculty of Divinity that I mention to the Commission that there are so many ministers, of whom many would be disposed to go there. Dublin is now as accessible practically to students of that class as any other part of these islands, and there is a means of recruiting—if that is of any value—the students of Trinity College from this source; and if that institution is intended to go on and flourish, and have a brighter and nobler future than its noble past, here is a means of very materially helping it. And I know from a very intimate friend who desired that I should see—as I desired—his evidence given at this Commission before I made my statements to you to-day, that nothing is more pleasing to him, and he has cherished the hope for many years, than that there should be a Methodist Faculty of Theology in Trinity College, and that they should import into it the energy of Methodist students. I do not know, sir, that there is anything more that I specially wish to say, but I am very ready to answer anything that may be asked of me.

5115. LORD CHIEF BARON.—Just one or two questions. We have a Statement here drawn up by a Committee that was appointed by the Conference of the Methodist Church in Ireland*?—Yes.

5116. And that, I take it, must be taken to officially represent the views of that body?—Yes.

5117. I do not find anything in reference to the foundation of a Faculty for Theology specially for Methodists in their paper. How are the young men for the ministry at present trained in Ireland?—You would desire me to explain the matter of that official document not asking for a Faculty of Theology in Trinity College—is that what I should explain?

5118. Yes?—Then just notice what I put into the Statement: "A separate Theological Faculty should be constituted for the Methodist Church. This Faculty should organise studies in Divinity, and lectures and courses in Divinity."

5119. With great respect, I am not asking you for that, but I am asking for an explanation of the fact that this demand for a Faculty of Theology is not included in the official demand of the Methodist Church?—As helping me towards that, I wanted to get out this sentence: "That this Faculty should have authority to examine students in a Theological

College other than such a one as might be in Trinity College, and admit them to degrees." Now that points to a provision for teaching Theology in connection with the institution known as the Methodist College in Belfast. That is provision intended to serve but a comparatively small portion of the community, and was not equipped for Methodist theological students outside Ireland. It is a small organisation, but is very efficient so far as it goes. If there were a Faculty of Theology such as I speak of in Trinity College, the candidates for the ministry would come to Trinity; they would come to this Divinity School, and get their instruction there, and get their degrees there.

5120. May I take it that your views, although they do not represent the Conference at Belfast, substantially represent the views of the Methodist Church?—I will put it in this way, if you will allow me; I represent the Methodist Church as the thermometer represents temperature.

5121. Would you be satisfied with a Faculty of Scientific Theology in the University of Dublin—such a Faculty, for instance, as there is in the University of London, and then, special teaching in reference to your own particular creed would be given by your own body outside the University?—I believe there is a very considerable portion of the curriculum of studies in the existing Divinity School in Trinity College that would be entirely acceptable, not only to Methodist students, but to the Methodist Conference as a whole, which safeguards the interests of these students.

5122. You would be satisfied, then, if an arrangement was made in reference to that. Of course, students in Trinity College are at liberty to attend the Theological Lectures whether they are members of the Church of Ireland or not, and to attend some parts of the Lectures, and not attend other parts. Would you be satisfied with an arrangement being made by the authorities of Trinity College, by which the Lectures should be so arranged that those of your students who would be anxious to attend would form a separate party?—I would be quite satisfied—and in this I believe I state the mind of the universal Methodist Church—with a large portion of the curriculum and the teaching of that curriculum as at present in Trinity College. There are certain subjects additional that the Methodist Church requires, and which should only be taught by itself, or by those who were in its full and unqualified confidence; and if I were to summarise these in a word, that word would be Pastoral Theology. They would, I think, require that Pastoral Theology should be taught by themselves, and taught by theological professors of their own, whose rank and standing should be equal to any others in the Divinity School, whether the present one or a future one. That, I think, is a matter that might be easily arranged, and with a little good feeling on the part of the existing Board of Trinity College, and the Committee of the Methodist Church, I think it could be arranged, and it would be a very happy arrangement and tend in every way to the benefit of this country and to the welfare of the University, and it would draw, because it would command the confidence of the students from England that I have been referring to.

CHAIRMAN.—We are very much obliged to you for your evidence.

ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN,
AND THE UNIVERSITY OF DUBLIN.

APPENDIX TO THE FINAL REPORT.—DOCUMENTS.

SECTION A.

Charter granted by Queen Elizabeth, Letters Patent, Decrees, and other
Official Documents.

I.

Charta sive Literae Patentes Reginae Elizabethae.*

(34 Eliz., A.D., 1592.)

[Reprinted from Vol. I. of the *Chartae et Statuta Collegii Sacrosanctae et Individuae Trinitatis Reginae Elizabethae Juxta Dublin* (Dublinii, M. H. Gill, 1844).]

ELIZABETHA Dei Gratia Angliae, Franciae, et Hiberniae Regina, Fidei Defensor, &c. Omnibus ad quos praesentes literae pervenerint, salutem. Cum dilectus subditus noster Henricus Ussher Archidiaconus Dubliniensis nobis humiliter supplicavit, nomine civitatis Dubliniensis, pro eo quod nullum Collegium pro Scholaribus in bonis literis et artibus erudiendis infra regnum nostrum Hiberniae adhuc existit; ut unum Collegium matrem Universitatis juxta civitatem Dubliniensem ad meliorem educationem, institutionem, et instructionem Scholarium et studentium in regno nostro praedicto erigere, fundare, et stabilire dignemur; ac etiam ut aliquo modo commode provideretur pro relevamine et sustentatione Praepositi, Sociorum, et Scholarium quorundam: Sciatis quod nos pro ea cura, quam de juventute regni nostri Hiberniae pie et liberaliter instituenda singularem habemus, ac pro benevolentia qua studia, studiososque prosequimur (ut eo melius ad bonas artes percipiendas, colendamque virtutem et religionem adjuventur) huic pie petitioni gratose annuentes, de gratia nostra speciali, ac ex certa scientia, et mero motu nostris volumus, concedimus, et ordinamus, pro nobis, haeredibus, et successoribus nostris; quod de caetero sit, et erit, unum Collegium mater Universitatis in quodam loco vocato Alhallowes juxta Dublin praedictum, pro educatione, institutione, et instructione juvenum, et studentium in artibus et facultatibus, perpetuis futuris temporibus duraturum, et quod erit, et vocabitur COLLEGIUM SANCTAE ET INDIVIDUAE TRINITATIS JUXTA DUBLIN A SERENISSIMA REGINA ELIZABETHA FUNDATUM. Ac illud Collegium de uno Praeposito, et de tribus Sociis nomine plurium, et tribus(a) Scholaribus nomine plurium, in perpetuum continuaturum erigimus, ordinamus, creamus, fundamus, et stabilimus firmiter per praesentes.

Ac ulterius primum et modernum Praepositum praedicti Collegii sanctae et individuae Trinitatis Elizabethae Reginae juxta Dublin praedictum facimus, ordinamus, constituimus et licenciamus, Adamum Loftus sacrae theologiae Doctorem, Archiepiscopum Dubliniensem, regni nostri Hiberniae Cancellarium. Et primos et modernos Socios ibidem facimus, licenciamus, constituimus, et ordinamus, Henricum Ussher in artibus Magistrum, Lucam Challoner in artibus Magistrum, et Lancelot Mcnie(b) in artibus Baccalaureum, per presentes Nomine plurium. Et primos et modernos Scholares Henricum Lee, Wilhelmum Daniell, et Stephanum White, nomine plurium ibidem facimus, licenciamus, constituimus, et ordinamus per praesentes.

Et ulterius de ampliori gratia nostra speciali, et ex certa scientia, et mero motu nostris, volumus, ordinamus, concedimus, et stabilimus, per praesentes pro nobis, haeredibus, et successoribus nostris, quod praedictus Praepositus, Socii, et Scholares Collegii Trinitatis praedicti et eorum successores in re, facto, et nomine, de caetero, sunt, et erunt, unum corpus incorporatum et politicum, de, ac in, perpetuum,

incorporatum et erectum, per nomen Praepositi, SOCIORUM ET SCHOLARUM COLLEGII SANCTAE TRINITATIS ELIZABETHAE REGINAE JUXTA DUBLIN, quodque per idem nomen perpetuis futuris temporibus cognoscatur, vocabuntur, appellabuntur et nominabuntur, habeantque successionem perpetuam, ac ipsum Praepositum, Socios, Scholares, et successores, sive Praepositos, Socios, Scholares Collegii sanctae et individuae Trinitatis Elizabethae Reginae juxta Dublin incorporamus, ac unum corpus incorporatum et politicum, per idem nomen in perpetuum duraturum, realiter et ad plenum creamus, erigimus, ordinamus, facimus, constituimus, et stabilimus firmiter per praesentes.

Et ut intentio nostra praedicta meliorem obtineat effectum, ac ut bona, catalla, terras, tenementa, haereditamenta, redditus, renditiones, servitia, et omnia alia, et singula proficua, ad sustentationem et relevamen Praepositi, Sociorum, et Scholarium ejusdem Collegii, in perpetuum possideant, et ut melius gubernentur et pro continuatione ejusdem Collegii, volumus, concedimus, ordinamus, et decernimus, pro nobis, haeredibus, et successoribus nostris, per praesentes; quod quocumque, et quotiescumque contingeret aliquem Praepositum ullo modo amoveri vel deesse, morte, decessu, resignatione, deprivatione, vel alio alio modo, quod tunc et deinceps liceat et licebit praedictis Sociis, et eorum successoribus, ad tunc superviventibus, vel majori parti eorundem, Praepositum idoneum aliquem eligere, et nominare, infra tres menses tunc proxime sequentes(c). Et eodem modo, si contingerit praedictorum Sociorum et Scholarium aliquem ullo modo deesse aut amoveri, morte, decessu, resignatione, deprivatione, vel alio quovis modo, quod tunc et deinceps bene liceat, et licebit Praeposito ceterisque Sociis, vel eorum successoribus ad tunc superviventibus, vel majori parti eorundem, aliam idoneam personam, vel alias idoneas personas, in locum vel locos, praedicti Socii vel Scholaris, Sociorum vel Scholarium, eligere, nominare, et constituere infra duos menses proxime post sequentes, et sic, de tempore in tempus(d), toties quoties mors, decessus, resignatio, vel deprivatio, contingerit. Quodque eorum quilibet, sic de tempore in tempus electus, habeat et gaudeat, et habere et gaudere valeat, et possit, adeo plenam et liberam potestatem et auctoritatem in omnibus, et per omnia, et ad omnia, et singula, agenda, perimplenda, et exigenda, prout aliquis alius Sociorum, praedicti Collegii, quovis modo, habere, seu gaudere debeat, aut possit. Et quod ipsi, et successores sui, per nomen Praepositi, Sociorum, et Scholarium, Collegii sanctae et individuae Trinitatis Elizabethae Reginae juxta Dublin, sint, et erunt, personae habiles, aptae, et in lege capaces, ad perquirendum, habendum, percipiendum, recipiendum, et possidendum maneria, terras, tenementa, et haereditamenta quaecumque, sibi, et successoribus suis in perpetuum, (ita quod non teneantur de nobis, haeredibus, et successoribus nostris, immediate in capite, in dominico, vel servitio) tam de nobis haeredibus, et successoribus nostris,

Decembe: 29, 1592. By the Queene.

ELIZABETH, R.

Trustee and right well beloved we greet you well, where by your Lres, and the rest of our Councell joyned with you, directed to our Councell here, wee perceive that the Major and the Cittizens of Dublin are very well disposed to grant the scite of the Abbey of Allhallowes belonging to the said City to the yearly value of Twenty pounds to serve for a Colledge for learning, whereby knowledge and Civility might be increased by the instruction of our people there, whereof many have usually heretofore used to travaile into France Italy and Spaine to gett learning in such forreigne universities, whereby they have been infected with poperie and other ill qualities, and soe became

evill subjects, and that allsoe wee perceive the said Major and Cittizens and divers others there are well inclyned to give some maintenance of livelyhood in ppetuity for the maintenance of readers and scholars in the said Colledge, as is used in our Universities here in England. And that it is required of us to graunt License to them for the foundacon and erecting of such a Colledge by way of Corporacon, and to accept such Lands and Contributions for the maintenance thereof as any our subjects there shall be charitably moved to bestow; Which their offer and suite you have very earnestly recomended unto us, a matter of it self to be well allowed of us and favourably interpreted. For which causes wee require you to give knowledge to the said Major and Cittizens that we do very gratioously accept of these their offers and mocons, and are well pleased to grant unto them our royall assent for the erecting such a Colledge, and to

licence them and any other our good subjects there to endowe the said Colledge with competent revenues; and therefore wee doe by these our Lettrs warrant and authorize you our Deputy and our Chancellors of that our realme in our name to erect and make a foundacon and Corporacon of a Colledge for learning in the said place afore menconed, taking order that the said Colledge may be erected and established in such manner and with such good orders and statutes as some other of our Colledges here in England in our Universities are, whereof we will That you our Chancellors and you the Bishopp of Meath have regard, according to the experience you have of the good order of the Colledge where you have been brought upp, or of any others which by long experience are found to be well established. And further we are pleased That Licence of Mortmaine be granted for the purchasing or receiving of any Lands and hereditaments and other contributions, within that our realme of Ireland, So as, no part of such Ld be held of us in Capite or in Knights service, and that the same Licence may extend to the yearly value of four hundred pounds; and alsoe wee will That whatsoever other act to passe from us for the erecting of the said Colledge and endowing thereof in this sorte be requisite, you our Deputy and Chancellor there and other our officers shall, by warrant hereof, see the same executed with all favour and speed; furthermore whereby your Letters of the eleventh of this month it appeareth, upon the survey of our Lands escheated in Monaghan by the attainer of the late M'Mahon, there are certain other Lands called Termon, to the value of seventy-one pound by the year, which were not of right appertaining to the said M'Mahon, but have been waste and duly belonging unto us, and

that by our former warrant granted unto you for the parting of the lands of M'Mahon there is no sufficient warrant to divide these Lands; and that you think it beneficial for our service to have the same granted and divided to sundry psons being of English birth That may thereby plant habitations and buildings on the same, whereof you have sent a certificate of the names of Eleaven persons amongst whom the said Termon Lands may be distributed. We allowing of your opinion and advise given to us do authorize you by these our Lres to make the grants to the said psons so named in your schedule (or if any of them shall refuse to accept the same with the condicons to plant, people and to build thereupon), then to make choice of others of like condition so as the rents may be reserved of them and their heires and to be held of us by the said rents and such other services as you shall think convenient. And for so doing these shall be your sufficient warrant. Given under our signet at our palace of Westmr the 29th day of December in the 34 yeare of our raigne.

To our right trustee and well beloved Sr William fitz Williams Knight our Deputy of our realme of Ireland, and to our Chancellor of our said realme for the time being, and to the rest of our Councell there.

III.

Consuetudines seu Regulae Universitatis Dublinensis pro sollemiori Graduum Collatione.*

DOCU-
MENTS.
SECTION A.
III.

[Reprinted from Vol. I. of the *Chartae et Statuta Collegii Sacrosanctae et Individuae Trinitatis Reginae Elizabethae Juxta Dublin (Dublinii, M. H. Gill, 1844, p. 162.)*]

CAPUT I.

DE AUTHORITY ET OFFICIO VICE-CANCELLARI.

Vice-Chancellor's duties.

VICE-CANCELLARIUS esto, indicare et habere conventus academicos, quoties opus videbitur; absentes a domo congregationis (modo in Collegio commorentur) et discedentes inde sine venia, mulctare; illos duobus solidis; hos duodecim denariis.

Power in conferring degrees.

In gradibus conferendis eam potestatem Vice-cancellarius obtinet, ut nemini fas sit gradum consequi qui illius judicio indignus censeatur; et proinde nullam gratiam recitabit Procurator nisi quam ipse approbaverit.

Vicecancellarii insuper esto, providere ut exercitia scholastica pro gradibus debite peragantur; et ut nemo ad gradum promoveatur, nisi prius suscepto suprematis regii juramento.

To regulate the duties of the proctors and professors.

Ad ipsum praeterea spectet, publicos academice officarios ad munera diligenter praestanda adigere. Curet igitur ut hini Procuratores officia sua solerter obeant, cessantes vero pro arbitrio puniat. Curet porro, ut publicus sacrae theologiae professor disputationes pro gradibus theologicis sedulo moderetur, easque, determinatione in alteram questionem facta, concludat; praeterea, ut alternis septimanis, in unoquoque termino, praelectionem theologicam habeat; quam si neglexerit, quinque solidis, pro unaquaque vice omissa, ab ipso Vicecancellario mulctetur. Quod etiam de professore in utroque jure intelligi volumus.

CAPUT II.

DE CAPITULO SENATUS ACADEMICI.

Head of the academic senate.

CAPUT senatus academici, ex Vicecancellario, et Collegii Praeposito, aut, in ejus absentia, Vicepraeposito constet; una cum Magistro seniore non Regente, qui in Collegio degat.

Its powers.

Capitis autem auctoritas sit hujusmodi. Si quae petitio ad gradum offeratur, esto in potestate tum Vicecancellarii tum Praepositi, tum Magistri senioris non Regentis, qui in Collegio degat, impedire, quominus reliquo Senatui proponatur.

Senior non Regens annuatim eligatur, Vicecancellario et Praeposito proponentibus domo congregationis.

CAPUT III.

DE PROCURATORUM OFFICIO.

PROCURATORES, ad officia sua sub juramento coram Vicecancellario suscepto admissi, provideant imprimis, ut omnes candidati pro gradibus exercitiis suae classis intersint: qui secus fecerint sex denariis mulctentur: neminem deinde praesentent senatui academico, ad gradum capessendum, nisi quem, fide sua, dignum commendabunt. Ad ipsos praeterea spectet, in domo congregationis supplicationis pro gradibus ad senatum academicum referre, et suffragia singulorum exquirere. Denique quicquid in stipendium academice ministris pendit solet, ipsi Procuratores exigant; iisque, quibus debetur, persolvent. Eorum insuper esto disputationes philosophicas pro gradibus moderari.

The Proctor's duties.

CAPUT IV.

DE GRATIIS CONCEDENDIS PER ACADEMIAM.

NEMINI publica Senatûs academici gratia concedatur, nisi privata gratia Praepositi et majoris partis Sociorum seniorum, antea commendato.

In concessione autem gratiae in domo congregationis, pars major semper habeat rationem totius; ac proinde quicquid majori parti placeat, omnino ratum esto.

Quod si quis in supplicatione pro gratia tribus vicibus non praevaluerit; ulterior pro illo supplicatio ad proxima comitia deferatur.

Nemo per specialem gratiam, sive sine exercitiis haud male praestitis, ad gradum promoveatur, nisi Regi a secretis consiliis fuerit, aut episcopus, aut nobilis, filiusve nobilis. Denique nemo exterae alicujus academice, ad eundem gradum admittatur in nostra academia, quem in sua habet; nisi eodem gradu prius apud Cantabrigienses suscepto: qui eadem statuta habent, idemque tempus nobiscum observant in gradibus capessendis.

The grace of the house, how granted.

When refused.

When given specially.

CAPUT V.

DE ORDINE OBSERVANDO IN DOMO CONGREGATIONIS.

QUILIBET verba facturus in domo congregationis Latino utatur sermone. Dum aliquis loquitur, caeteri silentium praestent; nec quisquam de loco in locum

Rules to be observed in addressing the house.

* Note by Secretary.—These rules in the form here printed do not appear in the College Statutes until 1778, but they are supposed to have been originally drawn up about the year 1615. They have been modified in several important particulars by a Decree of the Board and Senate "De Statutis Universitatis Dublinensis emendandis," December 11th, 1858 (*Chartae et Statuta*, Vol. II, p. 163).

migret, aut loquendi vices seniori præcipiat, aut sæpius de eadem materiâ interstrepit; aut minimum contumeliosum vocabulum adversus quemlibet effutiat; sed quamprimum sententiam suam protulerit, aliorum iudicio ponderandum relinquat: quod si quis in præmissis deliquerit, a domo Congregationis, ex arbitrio Vicecancellarii, pro illo die, aut si videbitur, pro longiori tempore excludatur.

In admissione ad singulos gradus certâ verborum formulâ utatur Vicecancellarius.

CAPUT VI.

DE EXERCITIIS PRÆSTANDIS PRO GRADU BACCALAUREATUS
IN ARTIBUS.

Exercises required for the degree of A.B.

CANDIDATUS pro gradû Baccalaureatûs in artibus, bis respondeat, et quater opponat: bis etiam declamet; semel Græcè, semel Latine: necnon tribus diebus in aulâ se sistat ab horâ octavâ antemeridianâ, a Præposito et quolibet Socio seniori, et totidem diebus, in domo Regentium, a quolibet Magistro artium,

examinandum: quinetiam teneatur ad præstandâ exercitia, quæ PRIORUM vocantur, sub reali cautione viginti solidorum; ut quoque ad regendas sophistarum disputationes in aulâ, per spatium decem dierum, tempore Quadragesimali.

DOCUMENTA
SECTION A.
III

CAPUT VII.

DE EXERCITIIS PRÆSTANDIS PRO GRADU MAGISTERII
IN ARTIBUS.

Exercises required for the degree of A.M.

CANDIDATUS pro gradu Magisterii in artibus semel respondeat et opponat; bis autem declamet, semel Græcè, semel Latine: tres etiam prælectiones publicè præstet. Præleget vero liberalium artium eas partes, quæ illi præscribentur a Vicecancellario aut Procuratore seniori; programme ac argumento prælegendo, Collegii foribus affixo, ante diem prælectionis. Sistat etiam in domo Regentium per unum diem ab horâ octavâ antemeridianâ, ad decimam, et ab horâ secundâ pomeridianâ ad quartam, a quolibet Magistro artium examinandum. Antequam vero Magisterii gradum obtinuerit, realem cautionem quadraginta solidorum deponat, de questione philosophicâ publicè disputandâ, ante annum, a suscepto Magisterii gradu, elapsam; idque respondente tertii anni Baccalaureo.

CAPUT VIII.

DE EXERCITIIS PRÆSTANDIS PRO GRADU BACCALAUREATUS ET DOCTORATUS IN THEOLOGIA; DEQUE ALIIS AD EOSDEM GRADUS REQUISITIS.

Exercises requisite for the degree of D.B.

Nemo Baccalaureatum in theologicâ facultate suscipiat, nisi post expletum septennium a suscepto in artibus magisterio: priusquam et gratia illius proponatur, semel respondeat, et semel opponentis munere perfungatur. Duas conciones habeat, unam Latine ad clerum, ad populum alteram.

Requisites for the degree of D.D.

Nemo ad doctoratum admittatur, nisi post expletum quinquennium a suscepto Baccalaureatu theologico. Neque aliquis utrumque gradum simul ambiat; aut ad Doctoratum admittatur, omisso Baccalaureatu etsi tempus requisitum ad eundem gradum compleverit, nisi omnia exercitia, ad utrumque gradum respectivè requisita, prius præstiterit, summas etiam pecuniæ pro utroque gradû debitas, aliaque munera, pro more, unicuique sigillatim persolverit.

Antequam aliquis ad incipiendum in theologiâ fuerit admissus, Latine ter solenniter legat, et quodcunque velit subjectum accuratius tractet. Duas habeat conciones, unam Latine ad clerum; anglicè alteram. Semel respondeat alicui Doctori vel professori publico, semel opponat (nisi quod insuper in publicis comitiis pro academici dignitate disputare teneatur), demum, intra annum a gradu suscepto, questionem publicè determinet, sub poena quadraginta solidorum academici solvendorum; quâ de solutione ante inaugurationem suam, hypothecam dabit Procuratori seniori: Doctoratum ambiat nemo, qui non prius sacrum presbyteratûs ordinem fuerit adeptus. Nemo vel ad Baccalaureatûs vel Doctoratûs gradum admittatur, qui non coram domino Procancellario, aut ejus deputato, tribus articulis, viz. Regii primatûs, liturgiæ Anglicanæ, et triginta novem articulorum religionis, de quibus convenerunt archiepiscopi et episcopi Londini, A.D. 1562, propriâ manu prius subscriperit.

Declaration required for both degrees.

CAPUT IX.

DE GRADIBUS IN UTROQUE JURE CAPESSENDIS.

NULLUS Baccalaureatum in utroque jure consequatur, nisi post expletum sexennium ab adventu ad academiam. Si quis Magister artium ad Baccalaureatum in utroque jure promoveri cupit, per duos Baccalaureus in artibus Baccalaureatum in utroque jure ambit, per tres annos eidem studio operam det. Qui Baccalaureatum in utroque jure vult consequi, priusquam pro gratiâ supplicet, respondentis et opponentis officio in disputationibus juridicis perfungatur. Porro professoris examen subeat, quales in utriusque jurisprudentiæ studio fecerit progressus.

Requisites for the degree of LL.B.

Qui ad Doctoratum in utroque jure promoveri cupit, si Baccalaureatû in utroque jure insignitus fuerit, postquam in artibus incepit, quatuor annos annos juris utriusque studio operam dabit; si quis integros in utroque jure studio ponat; alioquin si Baccalaureus in utroque jure, antequam Magister in artibus fuerit, sex annos integros in studio juris utriusque ponat, priusquam ad incipiendum in eadem facultate admittatur.

Requisites for the degree of LL.D.

DOCUMENTS.
SECTION A.
III.
Requisites for the degree of M.B.

Idem duas utriusvis juris leges a professore accipiat duabus lectionibus interpretandas, et commentationibus exornandas, et sibi eligat quamcunque juris civilis vel canonici partem duabus aliis lectionibus explicandam.

Respondentis et opponentis vices semel subeat.

CAPUT X.

DE GRADIBUS IN MEDICINA CAPESSENDIS.

AD Baccalaureatum in medicinâ nullus admittatur qui prius Baccalaurei in artibus gradum non susceperit; quique triennium integrum (innumerando a die admissionis suæ ad Baccalaureatum in artibus) non compleverit. Qui Baccalaureatus in medicinâ ambit, priusquam gratiam proponat, in duabus questionibus medicis ab horâ primâ pomeridianâ usque ad horam tertiam in aulâ publicâ solenniter pro formâ semel respondeat, et semel opponat: duas insuper solennes lectiones totidem diebus publicè legat. Qui Doctoratum in medicinâ suscepturus est, post gradum Baccalaurei in medicinâ susceptum, quinque annos integros in studio medicinæ ponat, priusquam ad incipiendum in eadem in facultate admittatur: et quatuor solennes lectiones, ab horâ primâ pomeridianâ usque ad secundam, totidem diebus publice legat. In quibus quamcunque velit Hippocratis vel Galeni partem explicet; quin etiam in duabus questionibus medicis, ab horâ primâ pomeridianâ usque ad horam tertiam, in aulâ publicâ solenniter pro formâ semel respondeat, et semel opponat.

CAPUT XI.

DE DIE CELEBRANDI COMITIA.

PUBLICA Comitia celebranda volumus die Martis proximo post octavum diem Julii: quolibet professore, tempore matutino in suâ facultate prælectionem habente; nisi tunc temporis sit disputatio in ejus facultate, quam ipse moderari, unam que ex questionibus solenniter determinare, teneatur.

Tempore pomeridiano sit publica disputatio philosophica in aulâ, cujus senior Procurator sit moderator; primique anni Magister respondeat. Quâ finitâ Vicecancellarius, unâ cum reliquo senatû academico, domum congregationis pro more adeat ad gradus proferendos: iisque peractis, sit deinde ad noctem publicum convivium comitiale.

SUPPLICATIONUM FORMULÆ.

FORMULA SUPPLICANDI PRO GRADU MAGISTERII IN ARTIBUS.

SUPPLICAT reverentiis vestris N. N. ut tres anni a suscepto Baccalaureatû gradu, una cum omnibus oppositionibus, responsionibus, cæterisque exercitiis per statuta Collegii et academice consuetudinem requisitis, sufficiant ei ad incipiendum in artibus.

PRO GRADU DOCTORATUS IN THEOLOGIA.

SUPPLICAT reverentiis vestris N. N. ut viginti anni in studio theologiæ positi, una cum omnibus responsionibus, oppositionibus, cæterisque exercitiis per statuta Collegii et academice consuetudinem requisitis, sufficiant ei ad incipiendum in eadem theologiâ.

SUPPLICATIONUM FORMULÆ, ALIO MODO.

FORMULA SUPPLICANDI PRO GRADU BACCALAUREATUS IN ARTIBUS.

R. R. Vicecancellarie, totaque universitas, supplicat reverentiis vestris N. N. ut duodecim termini a matriculatione completi in artium studio, unâ cum omnibus exercitiis per leges et consuetudines academice requisitis, sufficiant ei ad respondendum questionibus in artibus.

PRO GRADU MAGISTERII IN ARTIBUS.

R. R. Vicecancellarie, totaque universitas, supplicat reverentiis vestris N. N. ut tres anni a suscepto Baccalaureatû in artibus gradu completi in artium studio, una cum omnibus exercitiis per leges et consuetudines academice requisitis, sufficiant ei ad incipiendum in artibus.

PRO GRADU BACCALAUREATUS IN SANCTA THEOLOGIA.

R. R. Vicecancellarie, totaque universitas, supplicat reverentiis vestris N. N. ut septem anni suscepto Magisterii in artibus gradû, completi in studio theologiæ, unâ cum omnibus exercitiis per leges et consuetudines academice requisitis, sufficiant ei ad respondendum questionibus in theologiâ.

Supplication for degree of D.B.

PRO GRADU DOCTORATUS IN SANCTA THEOLOGIA.

R. R. Vicecancellarie, totaque universitas, supplicat reverentiis vestris N. N. ut quinque anni, a suscepto Baccalaureatû in sanctâ theologiâ gradu, completi in studio theologiæ, una cum omnibus exercitiis per leges et consuetudines academice requisitis, sufficiant ei ad incipiendum in theologiâ.

Supplication for degree of D.D.

PRO GRADU BACCALAUREATUS IN MEDICINA.

Trifariam hic gradus peti potest.

I. Si studium quis inchoaverit, statim ab admissione in matriculam academice; tum post viginti et quatuor terminos completos, petendus erit.

II. Si a Baccalaureatû in artibus inchoaverit, tum post tres annos.

III. Si a Magisterii in artibus gradû, tum post biennium.

Requisites for degree of M.B.

FORMULA PRO PRIMO MODO.

R. R. Vicecancellarie, totaque universitas, supplicat reverentiis vestris N. N. ut viginti et quatuor termini a matriculatione completi in studio medicinæ, unâ cum omnibus exercitiis per leges et consuetudines academice requisitis, sufficiant ei ad respondendum questionibus in medicinâ.

Forms of supplication for degree of M.D.

PRO SECUNDO MODO.

Ut tres anni a Baccalaureatû in artibus completi in studio medicinæ, &c. ut supra.

PRO TERTIO MODO.

Ut biennium, a Magisterii in artibus gradû, completi in studio medicinæ, &c. ut supra.

PRO DOCTORATU IN MEDICINA.

Trifariam quoque gradus Doctoratûs in medicinâ peti potest, pro triplici ratione et modo quo Baccalaureatus petitur.

Requisites for degree of M.D.

I. Sex annis completis a Baccalaureatû in eadem facultate, qui susceptus erat post viginti et quatuor terminos, sive sexennium a matriculatione exactum.

II. Completis quinque annis a Baccalaureatû, qui susceptus erat præeunte Baccalaureatû, in artibus.

III. Quatuor annis completis a Baccalaureatû, qui susceptus erat præeunte Magisterii in artibus gradu.

FORMULA PRO PRIMO MODO.

R. R. Vicecancellarie, totaque universitas, supplicat reverentiis vestris N. N. ut sex anni completi a Baccalaureatû in studio medicinæ, qui susceptus erat post viginti et quatuor terminos, sive sexennium a Matriculatione exactum, una cum omnibus exercitiis per leges et consuetudines academice requisitis, sufficiant ei ad incipiendum in medicinâ.

Forms of supplication.

PRO SECUNDO MODO.

Ut completi quinque anni a Baccalaureatû in studio medicinæ, qui susceptus erat præeunte Baccalaureatû in artibus, &c.

PRO TERTIO MODO.

Ut quatuor anni completi, a suscepto Baccalaureatû in medicinæ gradû, qui susceptus erat præeunte Magisterii in artibus gradû, &c.

Time of Commencement.

Commencement dinner.

In nomine Dei, Amen. Ego Procurator, &c. absolvo te ab omni leviori negligentia et a suspensione nuper illatâ. In nomine Patris, et Filii, et Spiritûs sancti.

PRÆSENTATIONIS FORMULA.

Form of presenta-tion.

R. R. Vicecancella rie totaque universitas, præsentio vobis hosce meos filios, quos scio tam moribus, quam doctrinâ habiles et idoneos esse, ut admittantur ad gradum Magisterii in artibus; idque tibi, fide meâ testor, ac spondeo, totique academiæ.

JURAMENTA ET DECLARATIO SUSCIPIENDA A QUOLIBET CANDIDATO PRIUSQUAM ADMITTATUR AD GRADUM CAPESSENDUM.

Oath required from every Graduate

Ego, A. B. sincere PROMITTO ET JURO me fide-lem futurum, et veram allegientiam regiæ majestati præstiturum.

Ita me Deus adjuvet, &c.

Oath.

Ego, A. B. JURO me ex corde meo abhorre-re, et abjurare, tanquam impiam et hæreticam, dam-nandam illam doctrinam et assertionem, quod prin-cipes per Pontificem, aut auctoritatem quamlibet sedis Romanæ, excommunicati aut deprivati, possint per subditos suos vel quosvis alios deponi, aut trucidari.

Declaro etiam quod nullus extraneus princeps, per-sona, prelatus, status, aut potentatus habet aut habere debet ullam jurisdictionem, potestatem, superiorita-tem, præminentiam vel auctoritatem, ecclesiasticam sive spirituale, infra hoc regnum.

Ita me Deus adjuvet, &c.

[Juramenta suprascripta totidem verbis ab Anglicis translata sunt, Vicecancellario, totâque academiâ ap-probante, Feb. 8, 1691.]

Ego, A. B. solenniter et sincere coram Deo PROFITEOR, TESTOR, et DECLARO me credere nullam esse in sacra-mento cœnæ Dominicæ, in vel post ejus consecrationem per quancunque personam, elementorum panis et vini in corpus et sanguinem Christi Transubstantiationem; et invocationem et adorationem virginis Mariæ, aut alterius cujusvis Sancti, necnon sacrificium Missæ, prout hodie in ecclesiâ Romanâ usurpantur, super-stitiosa esse et idololatrica. Item solenniter coram Deo profiteor testor et declaro me declarationem hanc, et quamlibet ejus partem facere in simplici et ordi-nario verborum mihi prælectorum sensu, prout com-munitè a Protestantibus intelliguntur, sine omni evasione, æquivocatione, aut mentali reservatione, aut sine omni dispensatione a Pontifice aut aliâ quâvis auctoritate, aut personâ mihi in hanc rem jam con-cessâ; aut sine dispensatione ab ullâ personâ aut auc-toritate, quæcunque ea sit; aut sine persuasione, quod sim liberatus, aut possim liberari aut absolvi, in con-spectu Dei vel hominum, ab hac declaratione, aut ullâ ejus parte, quamvis pontifex, aut alia quævis per-sonæ, aut potestas cum eâ dispensaret, aut irri-tam redderet, aut irritam ac nullam ab initio fuisse declararet.

IV.

Letters Patent concerning the Chancellor, Doctors, and Masters of the University of Dublin.
(21 Vic. July 24, 1857.)

[Reprinted from Vol. II. of the *Chartæ et Statuta Collegii Sacrosanctæ et Individuæ Trinitatis Reginæ Elizabethæ Juxta Dublin*, pp. 134-147 (Dublin, G. Weldrick, 1898).]

DOCU-MENTS SECTION A. IV.

Recitals

Victoria, by the grace of God of the United King-dom of Great Britain and Ireland Queen, Defender of the Faith, and soforth:—To all unto whom these presents shall come, greeting.

Whereas we are informed that the senate or con-gregation of the University of Dublin, consisting of the Chancellor or Vice-Chancellor, Doctors in the several faculties, and Masters of Arts of the said University, has heretofore, for the last two hundred years and upwards, been governed by certain rules or statutes, entitled, "Regulæ seu Consuetudines Uni-versitatis Dubliniensis pro solenniore graduum col-latione." And whereas our right trusty and right entirely beloved councillor, John George, Archbishop of Armagh, Primate of all Ireland, Chancellor of the said University; our right trusty and well-beloved councillor, Francis Blackburne, Doctor of Laws, Vice-Chancellor of the said University; and our trusty and well-beloved the Provost and senior Fellows of the College of the holy and undivided Trinity, near Dublin, have humbly represented unto us that the said rules or statutes have, by lapse of time, become in many respects obsolete, and unsuited to the present state of the said University and College, and doubts have been raised as to whether the Provost and senior Fellows of the said College have power to alter

and amend the same; and the said Chancellor, Vice-Chancellor, Provost, and senior Fellows have there-fore humbly supplicated us to remove the said doubts, and to grant unto the said Provost and senior Fel-lows of the said College, and also unto the senate or congregation of the said University, such further powers as will enable them to revise, alter, or repeal the said rules and usages relating to the conferring of degrees by the said University, and to enact other rules or regulations for the same purpose, to be bind-ing and obligatory on all members of the University: We are graciously pleased to accede to their request; Know ye, therefore, that we, of our special grace, certain knowledge, and mere motion, by and with the advice and consent of our right trusty and well-beloved cousin and councillor George William Frederick, Earl of Carlisle, our Lieutenant-General and General Governor of Ireland, do, by these pre-sents, for us, our heirs and successors, enact and confirm to the Provost and senior Fellows of the College of the holy and undivided Trinity aforesaid, and unto the Chancellor or Vice-Chancellor, Doctors and Masters of the said University, all such powers, rights, and privileges as by the charters and statutes of our royal predecessors to the Provost, Fellows, and Scholars of the College of the holy and undivided

Former powers, usages, and privileges confirmed.

The old laws have become unsuitable,

Doubts as to power of making amend-ments.

IV.

Board to amend and make laws concerning the conferring of degrees.

Such amendments and laws to be ratified by the senate.

No law to be proposed except by the Board.

The Chancellor to have a veto.

Vice Chancellor at liberty to appoint a Pro-Vice-Chancellor.

The senate to consist of the Chancellor, Doctors, and Masters. Names to be on College books, as Board may direct.

The caput senatus.

The Chancellor to convene, adjourn, and dissolve.

To convene on requisition of Board.

The casting vote.

Board willing to modify their power of electing the Chancellor.

The Board to propose three names to senate.

Trinity aforesaid, or to the University of Dublin aforesaid, have heretofore been given, granted, or by usage and prescription possessed, without any alteration or diminution whatsoever, save as herein provided.

And it is our will and pleasure that the Provost and senior Fellows of our said College of the holy and undivided Trinity shall have power, if they shall think fit, to alter, amend, and repeal all laws, rules, or bye-laws heretofore existing, for the more solemn conferring of degrees by the senate of the University aforesaid, and to make, enact, and enforce, from time to time, such additional laws, rules, and bye-laws, and to alter or vary the same for the like purpose, as to them shall seem fit. Provided always, that no such new laws, rules, or bye-laws, or emendations or alterations of such existing laws, rules, or bye-laws, shall be of force or binding upon the said University until they shall have received the sanction of the senate of the same in congregation lawfully assembled.

And our further will and pleasure is, that no law, rule, or bye-law, or grace whatsoever, for the conferring of degrees, or any other purpose, shall be proposed to the senate, which has not been first proposed to and adopted by the said Provost and senior Fellows of our said College. Provided, however, that it shall be in the power of the Chancellor, or, in his absence, the Vice-Chancellor or Pro-Vice-Chancellor (to be appointed as hereinafter mentioned) of the University to prohibit any such intended law, rule, bye-law, or grace, from being proposed to the senate.

And our further will and pleasure is, that in case the Vice-Chancellor of the University shall be unable, from any cause, to attend any meeting of the senate, he shall have power, by any writing under his hand and seal, to appoint a person to act as Pro-Vice-Chancellor for the time being; and such person so appointed shall, for such time, possess all the authority of the Vice-Chancellor.

And our further will and pleasure is, that the senate of the said University shall, as heretofore, be constituted and consist of the Chancellor, or, in his absence, of the Vice-Chancellor, or Pro-Vice-Chancellor for the time being, and such Doctors and Masters of the University as shall have and keep their names on the books of the College of the holy and undivided Trinity, in accordance with such regulations and conditions as the Provost and senior Fellows of the said College shall enact.

And our further will and pleasure is, that the caput of the said senate shall consist, as heretofore, of the Chancellor, or, in his absence, of the Vice-Chancellor, or Pro-Vice-Chancellor as aforesaid, the Provost of the said College, or, in his absence, the Vice-Provost, and the senior Master non-regent elected by the senate.

And our further will and pleasure is, that the said senate shall be convened only by the Chancellor of the said University, or, in his absence, by the Vice-Chancellor, or Pro-Vice-Chancellor as aforesaid, each of whom, when presiding therein, shall have power also, at his pleasure, to adjourn or dissolve all meetings of the senate. Provided only that on a requisition presented to him by the Provost and senior Fellows, the Chancellor, or, in his absence, the Vice-Chancellor, or Pro-Vice-Chancellor as aforesaid, shall be bound to convene the senate, to meet at such time, and for such purpose, as shall be stated in such requisition, and said Chancellor, Vice-Chancellor, or Pro-Vice-Chancellor, as the case may be, shall preside therein. And in case, at any meeting whatsoever of the senate, there shall be an equality of lawful votes upon any question proposed therein, such Chancellor, Vice-Chancellor, or Pro-Vice-Chancellor, so presiding therein shall have a casting vote, and the side to which such casting vote shall be given shall be deemed to have the majority of votes.

And whereas the Provost and senior Fellows of the said College have heretofore, under and by virtue of the statutes of our royal predecessors, possessed the exclusive right and power of electing the Chancellor of the said University, but said Provost and senior Fellows are willing that said power should in future be under the control of the senate of the said University, as hereinafter provided: We therefore, by and with the consent of the said Provost and senior Fellows, for ourselves, our heirs and successors, enact, that in the event of a vacancy in the office of Chancellor of said University by death, resignation,

or deprivation, it shall be lawful for the said Provost and senior Fellows, and they are hereby directed, within one calendar month after such vacancy, to propose to the senate of the said University the names of three persons from amongst whom the said senate are to elect a successor to the office of Chancellor; and the said Senate shall, within one calendar month from the day of such proposal, and at such time and place within said period, and in the said College, as shall be appointed by the said Provost and senior Fellows, proceed to elect a Chancellor from amongst the persons so proposed to them as aforesaid, and such of said persons as, upon a scrutiny, shall have the majority of lawful votes of the members of the senate then present shall be declared to be the Chancellor of the said University. Provided, however, that in computing any of said periods the interval between the 1st of July and 1st of October shall not be reckoned or taken into account, nor shall any name be proposed as aforesaid, or any such election take place or be held during said interval. And in the event of the senate of the said University declining or omitting to elect a Chancellor within such period as aforesaid, then our will and pleasure is, that the election and nomination of the Chancellor of the University shall, for that time only, devolve upon us, our heirs and successors. And our further will and pleasure is, that during the vacancy of the office of Chancellor the Vice-Chancellor shall continue to hold his office, and shall have power to convene the senate for the purpose of electing a Chancellor, and shall, by himself, or the Pro-Vice-Chancellor as aforesaid, preside at the election, and shall have authority to exercise all the functions and duties of the Chancellor, until the election of the Chancellor. And immediately after such election the office of Vice-Chancellor shall become *ipso facto* void until a fit and proper person be appointed thereto by the Chancellor.

And our will and pleasure further is, that the senate of the said University shall be, and continue to be, a body corporate, and have a common seal, and shall have power under the said seal to do all such acts as may be lawful for them to do (in conformity with the laws and statutes of the realm, and with the charter and statutes of the College of the holy and undivided Trinity, and with the statutes, laws, and bye-laws made or to be made in pursuance of these our Royal Letters), under the name, style, and title of the Chancellor, Doctors, and Masters of the University of Dublin.

It shall be further lawful for the said Chancellor, Doctors, and Masters to apply the funds which may or shall belong to the said University senate, for the promotion of useful learning in the said University, subject to such regulations as the Provost and senior Fellows of our said College shall approve of or prescribe.

And it shall be lawful for the said Chancellor, Doctors, and Masters of the said University, in their corporate capacity as aforesaid, to have, hold, acquire, and receive such lands, manors, tenements, or other property, real or personal, as may, from the date of these presents, be given or bequeathed unto them, by any person whatsoever, for the encouragement of learning in the said University. Provided also, that such gift or bequest does not impose any condition or obligation inconsistent with the statutes of the University in force at the time of such gift or bequest, or inconsistent with the charters and statutes of the College of the holy and undivided Trinity, near Dublin.

And we do hereby, for us, our heirs and successors, grant and declare that these our Letters Patent, or the enrolment or exemplification hereof, shall be in all things good, firm, valid, and effectual in the law, according to the true intent and meaning of the same, and shall be taken, construed, and adjudged in all our courts or elsewhere in the most favourable and beneficial sense, and for the best advantage of the said College, any mis-recital, non-recital, omission, defect, imperfection, matter or thing whatsoever, to the contrary thereof in anywise notwithstanding. Provided always that these our Letters Patent be enrolled in the rolls of our High Court of Chancery in that part of our said United Kingdom called Ireland, within the space of six months next ensuing the date of these presents. In witness whereof we have caused these our Letters to be made Patent.

The senate to choose the Chancellor from the three names proposed by Board.

Vacancy not to be counted in computing times of election.

In default, the Crown to nominate.

The Vice-Chancellor to act till appointment of Chancellor.

The senate to be a body corporate.

Title.

Application of funds.

Power to hold property.

For purposes consistent with the University laws.

Conclusion.

Witness, George William Frederick, Earl of Carlisle, our Lieutenant-General and General-Governor of Ireland, at Dublin, the twenty-fourth day of July, in the twenty-first year of our reign.

[Locus Sigilli.]

JOHN O'CONNELL,
Clerk of the Crown and Hanaper.

Enrolled in the office of the rolls of her Majesty's High Court of Chancery in Ireland, the eighth day of August, one thousand eight hundred and fifty-seven.

TRINITY COLLEGE, DUBLIN.

(1.)

DECREE of the PROVOST and SENIOR FELLOWS of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin, with the approval of the Council and the consent of the Visitors, November 28th, 1902.

[Dividing the Professorship of Civil Law, Jurisprudence, and International Law into two Professorships.]

WHEREAS, by Letters Patent, granted by Her Majesty Queen Victoria, in the 18th year of her reign, power is given to the Provost and Senior Fellows, with the consent of the Visitors, to found new Professorships, and to fix and assign the salaries of the Professorships, as well ancient as new, and to prescribe the duties thereof:

And whereas, by Letters Patent, granted in the 38th year of her reign, it is enacted among other things, that no new Professorship shall be created or founded by the Provost and Senior Fellows without the consent of the Council; and it is also enacted that, except in certain cases therein reserved, any proposed new Rules or Regulations respecting the qualifications, duties, and tenure of office of any Professor hereafter to be appointed, shall require the approval of the Council:

And whereas, in the year 1877, a Professorship of Jurisprudence and International Law was established, tenable for five years, with power reserved to the Provost and Senior Fellows, with the approval of the Council, to continue the said Professorship for successive terms of five years, so long as it should be considered expedient:

And whereas, in the year 1888, it was deemed to be no longer expedient to continue the said Professorship, and by a Decree of the Provost and Senior Fellows, with the approval of the Council and the consent of the Visitors, the duties of the said Professorship were transferred to the Regius Professor of Laws, whose duty it was henceforth to treat the entire subject of Civil Law, Jurisprudence, and International Law, and whose salary was thereupon increased to the sum of £330 per annum:

And whereas, by the aforesaid Letters Patent of 38 Vict. (1874), powers were conferred upon the Provost and Senior Fellows and the Council to alter any existing Rules or Regulations respecting Studies, Lectures, and Examinations; and in the exercise of such powers, a new Course of Legal Studies, including Honor Lectures and Examinations and a Moderatorship, was prescribed and adopted by the Provost and Senior Fellows and the Council in Trinity Term of the year 1902; and whereas such new Rules and Regulations entail an increase in the duties of the Professors in the Law School of Trinity College, and it is expedient that such increased duties shall be provided for:

And whereas, the present Regius Professor of Laws, Dr. Leech, prior to his election in the Trinity Term of the said year, 1902, consented to the condition that the duties of the Chair may, if the Board and Council so desire be divided between two Professors, with a distribution of the salary between the two:

And whereas, by agreement between the Honorable Society of King's Inns and the Provost and Senior Fellows of Trinity College, it is arranged that, in consideration of Lectures in certain prescribed subjects in the Law School of Trinity College being open to Students of the said King's Inns, attendance at the same being accepted by the Benchers as part qualification for admission to the Bar, a certain proportion of the fees of such Students is paid to the Professors of the School of Law in Trinity College:

It is therefore decreed by the Provost and Senior Fellows, with the approval of the Council and the consent of Visitors:

I. That the Regius Professor of Laws shall be the Professor of Civil Law and General Jurisprudence.

II. That there shall be appointed a Professor of Jurisprudence and International Law, and that the Professor shall be elected on the following conditions:

III. That he shall undertake the duties of Teaching and Examining in International Law, which duties shall be transferred to him from the Regius Professor of Laws, who shall be no longer liable for the same, and that he shall further undertake the duty of Lecturing and Examining in Law in the Courses prescribed to candidates for Honors and for Moderatorship in Legal and Political Science; and that his duties shall be defined from time to time by the Provost and Senior Fellows and the Council, and that he shall be liable to deprivation for the wilful neglect of the same.

IV. That he shall hold his Professorship until the next vacancy shall occur in the Regius Professorship of Laws, at which time it shall be in the power of the Provost and Senior Fellows, with the approval of the Council, to rearrange the duties of the Regius Professor of Laws, and of the Professor of Jurisprudence and International Law, respectively, and to define the periods of their tenure and their titles and salaries in such manner as may be found most conducive to the interests of the College, and the success of the Law School.

DOCUMENTS.
SECTION A.
V.

It is further decreed by the Provost and Senior Fellows, with the consent of the Visitors:

(1) That the salary of the Regius Professor of Laws during the present tenure of the office shall be £180 a-year.*

(2) That the salary of the Professor of Jurisprudence and International Law shall be £250 a-year.

(3) That if either Professor shall engage in any occupation, in or out of College, which the Provost and Senior Fellows shall pronounce to be incompatible with the proper discharge of his Professorial duties, and shall not immediately abandon the same when required by them so to do, he shall be liable to deprivation.

(4.) That in case either Professor shall become incapacitated for the due discharge of his duties, it shall be in the power of the Provost and Senior Fellows to appoint a Deputy to discharge his duties

during the remainder of his term of office, and to assign to such Deputy such a portion of the salary and other emoluments of the Professor as they shall think fit.

By order of the Provost and Senior Fellows,
BENJAMIN WILLIAMSON,
Registrar.

By order of the Council,
EDWARD DOWDEN,
Secretary.

We consent to the foregoing Decree.

DODGSON HAMILTON MADDEN,
Vice-Chancellor, }
O'BRIEN, C.J., } Visitors.

(2.)

DECREE of the PROVOST and SENIOR FELLOWS of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin, with the approval of the Council and the consent of the Visitors, November 19, 1904.

Whereas, by a Decree of the Provost and Senior Fellows, dated 26th June, 1841, a Professorship of Chemistry and Geology applied to the Arts of Construction was founded: And whereas, by another Decree of the Provost and Senior Fellows, dated May 14th, 1881, the said Professorship was discontinued, and separate provision was therein made for a Professorship of Geology and Mineralogy: And whereas it is expedient that in lieu thereof a new Professorship should be established under the title of "Professorship of Applied Chemistry," and that Emil Alphonse Werner, in recognition of his long and meritorious services as Assistant to the Professor of Chemistry, should be appointed to the said Professorship; And whereas, by Letters Patent, granted by her Most Gracious Majesty Queen Victoria in the 38th year of her reign, it is enacted, among other things, that "no new Professorship shall be created or founded by the Provost and Senior Fellows without the consent of the Council"; and also, that "any proposed new rules or regulations respecting the qualifications, duties, and tenure of office of any Professor—hereafter to be constituted (save as excepted)—shall require the approval both of the Provost and Senior Fellows and of the Council": It is accordingly hereby DECREED by the Provost and Senior Fellows, with the consent of the Visitors, and with the consent and approval of the Council:—

I. That a Professorship of Applied Chemistry be hereby created and founded.

II. That the said Emil Alphonse Werner be appointed to the said Professorship, and that he hold it on the following conditions, viz.:—

(a) His duties shall be defined from time to time by the Provost and Senior Fellows and the Council; and he shall be liable to deprivation for the wilful neglect of the same.

(b) If he shall engage in any occupation, in or out of College, which the Provost and Senior Fellows shall pronounce to be incompatible with the proper discharge of his duties as Professor, and shall not immediately abandon the same when required by them to do so, he shall be liable to deprivation.

III. That the said Professorship shall be held for the period of five years from the date of these presents; and that, at the expiration of the term of five years, it shall be in the power of the Provost and Senior Fellows, with the approval of the Council, to continue the said Professorship for successive terms of five years each, so long as it shall be deemed expedient; and that it shall also be in their power to discontinue it when it shall cease to be held by the said Emil Alphonse Werner.

(c) That the salary of the said Emil Alphonse Werner shall be £350, and that the salary of any future holder of the Professorship shall be fixed by the Provost and Senior Fellows for the time being.

By order of the Board,
R. Y. TYRRELL, Registrar.

By order of the Council,
EDWARD DOWDEN, Secretary.

We approve of the above Decree, and consent thereto.

ROSSE, }
O'BRIEN, } Visitors.

(3.)

DECREE of the PROVOST and SENIOR FELLOWS of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin, with the approval of the Council and the consent of the Visitors, December 12th, 1904.

WHEREAS, by Letters Patent, granted by Her Most Gracious Majesty Queen Victoria, in the 38th year of her reign, power is given to the Provost and Senior Fellows, with the approval of the Council, to make "New Rules or Regulations respecting Studies, Lectures, and Examinations": And whereas, it is in the power of the Provost and Senior Fellows to found

Prizes, from time to time, for the advancement of learning: And whereas the Foundation Scholarships in Trinity College are tenable only by men: And whereas, it is desirable, in the interests of learning and education, that Scholarships should be established for women in extension of the privileges already granted to them:

* This sum is in addition to the fees paid to him from the King's Inns.

It is accordingly hereby DECREED by the Provost and Senior Fellows, with the consent of the Visitors:

- I. That Scholarships shall be established for women.
- II. That, with the approval of the Council, the subjects of Examination for such Scholarships shall be the same as for the Foundation Scholarships hereinbefore mentioned, and that the Examinations for both shall be held at the same time and place.
- III. That such Scholarships shall not be awarded to any woman unless her marks shall have been at least equal to those of the lowest successful Foundation Scholar in the same subject in the same year.
- IV. That the value of such Scholarships shall be £30 a year, with exemption from ordinary College Fees, save the Tuition Fees of one guinea per quarter for which the Foundation Scholars are at present liable.

V. That the period of tenure of such Scholarships, and the period during which the Tuition Fees shall continue to be payable, shall be the same as in the case of the Foundation Scholarships.

(4.)

DECREE of the PROVOST and SENIOR FELLOWS of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin, with the approval of the Council and the consent of the Visitors (10 May, 1905).

WHEREAS, by Letters Patent, granted by Her Most Gracious Majesty Queen Victoria, in the eighteenth year of Her reign, power is given to the Provost and Senior Fellows, with the consent of the Visitors, to found new Professorships, and to fix and assign the salaries of the said Professorships, and to prescribe the duties thereof:

And whereas, in Letters Patent, granted by Her Most Gracious Majesty Queen Victoria, in the thirty-eighth year of Her reign, it is among other things enacted that no new Professorship shall be created or founded by the Provost and Senior Fellows without the consent of the Council: and it is also enacted that [except in certain cases reserved and therein stated] any proposed new Rules or Regulations respecting the qualifications, duties, and tenure of office of any Professor hereafter to be constituted shall require the approval both of the Provost and Senior Fellows and of the Council:

And whereas it is expedient that a new Professorship should be established under the title of "Professorship of Education," and that Edward Parnall Culverwell should be appointed to the said Professorship:

It is hereby decreed by the Provost and Senior Fellows, with the approval of the Council, and with the consent of the Visitors:—

- I. That a Professorship of Education be hereby created and founded.
- II. That the said Edward Parnall Culverwell be appointed to the said Professorship, and that he hold it on the following conditions, viz.:—

(a) His duties shall be defined from time to time by the Provost and Senior Fellows and the Council; and he shall be liable to deprivation for the wilful neglect of the same.

(b) If he shall engage in any occupation, in or out of College, which the Provost and Senior Fellows shall pronounce to be incompatible with the proper discharge of his duties as Professor, and shall not immediately abandon the same when required by them to do so, he shall be liable to deprivation.

III. That the said Professorship shall be held for the period of five years from the date of these presents; and that, at the expiration of the term of five years, it shall be in the power of the Provost and Senior Fellows, with the approval of the Council, to continue the said Professorship for successive terms of five years each, so long as it shall be deemed expedient; and that it shall also be in their power to discontinue it when it shall cease to be held by the said Edward Parnall Culverwell.

And it is decreed by the Provost and Senior Fellows, with the consent of the Visitors:—

(c) That the salary of the said Edward Parnall Culverwell shall be £100 per annum, and that the salary of any future holder of the Professorship shall be fixed by the Provost and Senior Fellows for the time being.

By order of the Board,

R. Y. TYRRELL, *Registrar*.

By order of the Council,

EDWARD DOWDEN, *Secretary*.

We approve of the above Decree, and consent thereto.

(5.)

DECREE of the PROVOST and SENIOR FELLOWS of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin, with the approval of the Council and the consent of the Visitors (5 May, 1906).

WHEREAS, by Letters Patent, granted by Her Most Gracious Majesty Queen Victoria, in the eighteenth year of Her reign, power is given to the Provost and Senior Fellows, with the consent of the Visitors, to found new Professorships, and to fix and assign the salaries of the said Professorships, and to prescribe the duties thereof:

And whereas, in Letters Patent, granted by Her Most Gracious Majesty Queen Victoria, in the thirty-eighth year of Her reign, it is among other things enacted that no new Professorship shall be created or founded by the Provost and Senior Fellows with-

out the consent of the Council: and it is also enacted that [except in certain cases reserved and therein stated] any proposed new Rules or Regulations respecting the qualifications, duties, and tenure of office of any Professor hereafter to be constituted shall require the approval both of the Provost and Senior Fellows and of the Council:

And whereas it is expedient that a new Professorship should be established under the title of "Professorship of Agriculture," and that William Arthur Barnes, B.A., should be appointed to the said Professorship:

DOCUMENTS.
SECTION A
V.

It is hereby decreed by the Provost and Senior Fellows, with the approval of the Council, and with the consent of the Visitors:—

- I. That a Professorship of Agriculture be hereby created and founded.
- II. That the said William Arthur Barnes be appointed to the said Professorship, and that he holds it on the following conditions, viz.:—
 - (a) His duties shall be defined from time to time by the Provost and Senior Fellows and the Council; and he shall be liable to deprivation for the wilful neglect of the same.
 - (b) If he shall engage in any occupation, in or out of College, which the Provost and Senior Fellows shall pronounce to be incompatible with the proper discharge of his duties as Professor, and shall not immediately abandon the same when required by them to do so, he shall be liable to deprivation.
- III. That the said Professorship shall be held for the period of three years from the date of these presents; and that, at the expiration of the term of three years, it shall be in the power of the Provost and Senior Fellows, with the approval of the Council, to continue the said Professorship for successive terms of three or five years each, so long as it shall be deemed expedient; and

that it shall also be in their power to discontinue it when it shall cease to be held by the said William Arthur Barnes.

And it is decreed by the Provost and Senior Fellows, with the consent of the Visitors:—

- (c) That the salary of the said William Arthur Barnes shall be £100 per annum, or the fees payable by students for his particular Course of Agriculture, any balance required to make up £100 being defrayed from the funds of the College; and that the salary of any future holder of the Professorship shall be fixed by the Provost and Senior Fellows for the time being.

By order of the Board,

R. Y. TYRRELL, *Registrar.*

By order of the Council,

EDWARD DOWDEN, *Secretary.*

We approve of the above Decree, and consent thereto.

ROSSE, }
O'BRIEN. } *Visitors.*

DECREE of the PROVOST and SENIOR FELLOWS, with the approval of the Visitors.

[December 5, 1906.]

WHEREAS, on October 27th, 1718, a sum of Five Hundred Pounds was granted to Trinity College by the Most Reverend Doctor William King, then Archbishop of Dublin, towards founding a Divinity Lectureship in the College, which donation was subsequently increased in the year 1729 by a further sum of like amount:

And whereas, by a Decree of the Provost and senior Fellows, of March 30th, 1833, it was resolved that the salary of Archbishop King's Lecturer should be raised to £700 per annum, to be charged upon the Decretments, such increase being contingent upon the Lectureship being filled by a junior Fellow.

And whereas, by a Decree of the Provost and senior Fellows, with the consent of the Visitors, of June 21st, 1883, the restriction to a junior Fellow was removed, and the office was made tenable by any member of the Church of Ireland in Holy Orders and of the Degree of Bachelor of Divinity in the University of Dublin, and in said Decree it was further provided that the salary should remain as fixed by the Decree of March 30th, 1833:

And whereas it is expedient that the title of the holder of the said office shall be changed, and that he shall no longer be called "Lecturer":

It is accordingly decreed by the Provost and senior Fellows, with the consent of the Visitors, that for the future his title shall be

"Archbishop King's Professor of Divinity."

By order of the Board,

R. Y. TYRRELL, *Registrar.*

We approve of the above Decree, and consent thereto.

O'BRIEN, } *Visitors.*

VI.

Decree of the Provost and Senior Fellows of Trinity College, Dublin, and Deed of Agreement with reference to the Professorship of Irish in the University of Dublin.

DOCUMENTS.
SECTION A.
VI.

DECREE OF THE PROVOST AND SENIOR FELLOWS.

[July 5, 1838.]

RESOLVED—

"That a Professor of the Irish Language be appointed on the following conditions:—

"The Trustees of the fund raised for founding said Professorship to vest in Government securities in the name of the Provost, Fellows, and Scholars of Trinity College all the sums that they have collected or may hereafter for the purpose specified—

"That the Trustees shall nominate to the Board the person whom they think fit to be the Professor, and that the Board shall have the full power of accepting or rejecting such nomination. In the case of a rejection that the Trustees shall nominate again and successively until an appointment be made—

"That the Board shall have full control and power over the Professor so nominated and elected as they have over other Professors—

"That the Trustees pledge themselves to vest a sum that will yield seventy pounds sterling per annum interest for the Professor, to which the College shall add thirty pounds a year, with rooms and twenty pounds annually for premiums."

Deed of Agreement establishing a Professorship of the Irish Language in the University of Dublin.

THIS Indenture made the Fourth day of March in the year of our Lord one thousand eight hundred and forty-three between the Provost Fellows and Scholars of the College of the Holy and Undivided Trinity of Queen Elizabeth near Dublin of the first part and the Right Honorable Robert Earl of Roden The Right Reverend Robert Lord Bishop of Cashel Emly Waterford and Lismore The Right Honorable Frederick Shaw and George Alexander Hamilton Esquire Representatives in Parliament for the University of Dublin and Henry Joseph Monck Mason of the City of Dublin Esquire Barrister-at-Law of the second part Whereas it has been thought expedient to establish a Professorship of the Native Irish or Erse Language in the University of Dublin and a sum of money has been collected and raised and invested in the purchase of Eight Hundred and Seventy-five pounds of Stock of the Governor and Company of the Bank of Ireland for the purpose of assisting in the Endowment of such Professorship and the several parties of the second part to these presents have applied to the Provost Fellows and Scholars of the said College to establish such Professorship and have proposed that the fund so raised and any further fund to be raised shall be vested in Government or other good securities in the names of the said Provost Fellows and Scholars of the said College for that purpose to which proposal the said Provost Fellows and Scholars have assented and for the purpose of augmenting the said fund have agreed to add a sum of Fifty pounds a year to be paid out of the funds of said College. And Whereas the said sum of Eight hundred and seventy-five pounds Bank of Ireland Stock has been transferred to the names of the said Provost Fellows and Scholars for the purpose aforesaid Now this indenture witnesseth and it is hereby covenanted concluded and agreed upon by and between all the parties to these presents that a Professorship of the Native Irish or Erse Language shall be established in the University of Dublin to commence and take place from the first day of January last and that the said Right Honorable Robert Earl of Roden the said Right Reverend Robert Lord Bishop of Cashel and the said Right Honorable Frederick Shaw George Alexander Hamilton and Henry Joseph

Monck Mason Esquire parties hereto shall be the first Trustees of such Professorship and that the Provost of the said College for the time being and the Representatives in Parliament for the said University for the time being together with such other person or persons as shall from time to time so long as the said Professorship shall continue be elected in manner hereinafter mentioned as a new trustee or new trustees in the room or stead of the said Earl of Roden Robert Lord Bishop of Cashel and Henry Joseph Monck Mason or any of their successors dying resigning or refusing or declining to act shall be the continuing trustees of the said Professorship And it is hereby further covenanted concluded and agreed upon by and between the several parties to these presents that the said Trustees for the time being or the major part of them shall from time to time and at all times hereafter during the continuance of such Professorship in the said University have full power and authority to nominate to the Provost and Senior Fellows of the said College a fit and proper person to fill the place and office of Professor of the Irish Language in the said University and that the said Provost and Senior Fellows and their successors or the major part of them shall have the like power and authority to enquire into the fitness and qualifications of such person so nominated to fill the said office and upon such enquiry and examination to accept or reject such nomination as in their judgment or in the judgment of the major part of them shall be considered expedient and for the benefit of such Professorship and so from time to time until a fit and properly qualified person shall be found to fill the said Professorship and that the said Provost and Senior Fellows of the said College shall from time to time and at all times during the continuance of such Professorship have all such and the like direction control power and authority over such Professor as they now have or hereafter may have over all or any of the other Professors in the said University And it is further covenanted concluded and agreed upon by and between all the parties to these presents that upon the death of the said Robert Earl of Roden the said Robert Lord Bishop of Cashel and the said Henry Joseph Monck Mason or of either or any of them or upon their or either or any of their resigning their office of Trustee or Trustees or declining or refusing to act in the Trusts hereby in them reposed that then and in every such case the vacancy so occasioned shall within twelve months from the day of such death resignation or declining or refusing to act be filled up by election of a new Trustee or new Trustees by the surviving and continuing Trustees of the said Professorship at which election three at the least of the surviving Trustees must be present and that for every election either of a Professor or of a new Trustee or new Trustees the said Trustees shall be called together by advertisement a fortnight at least before the day of meeting and that the Trustee highest in rank when the election commences shall be the chairman thereof and shall when there shall be an Equality of Votes have a casting vote in addition to his Vote as such Trustee so from time to time as often as a vacancy or vacancies shall occur it being the true intent and meaning of all the parties to these presents that in addition to the Provost of the said College for the time being and the representatives of the University for the time being there shall be at all times during the continuance of said Professorship in said University three Trustees for the purpose of nominating to the said Provost and Senior Fellows of the said College a fit and proper person to fill the said Professorship when and as often as a vacancy therein shall occur subject nevertheless to the admission or rejection of such person or persons so to be nominated by the said Provost and Senior Fellows as aforesaid And it is hereby further declared and agreed by and between all the parties to these presents and it is the true intent and meaning thereof that if it shall happen that the said Place or Office of Professor of the Irish or Erse

Their Successors.

Nomination of Professor.

Provost and Senior Fellows to have power to accept or reject.

And to have control over the Professor.

Election of Trustees to fill vacancy.

Chairman to have casting vote

There shall be always three Trustees.

The parties to the Agreement.

Amount collected and invested.

SECTION A.

VI.

If the Professorship is vacant for six months the Provost and Senior Fellows to elect.

If not filled up within one year the Professorship is to cease.

Disposal of the funds in that case.

The College to contribute thirty pounds to the salary annually of the Professor and twenty pounds for Premiums.

Language in the said University shall become and be suffered to remain vacant for the space of six months at any one time in consequence of the said Trustees for the time being or the major part of them neglecting or declining to nominate to the said Provost and Senior Fellows a fit and proper person to fill such vacancy it shall and may be lawful to and for the said Provost and Senior Fellows of the said College if they shall so think fit to fill the same but in the event of the said Professorship not being filled in manner aforesaid within the period of one year from such vacancy occurring that then and in such case It is hereby declared and agreed by and between all the parties to these presents that the said Professorship shall from thence forward cease and be utterly at an end and that they the said Provost Fellows and Scholars and their successors shall and will immediately thereupon transfer and make over all such stocks and funds and any dividends or increase that may be made or payable thereon as may be standing in their names in the Books of the Governor and Company of the Bank of Ireland as a fund for the endowment of such Professorship to the Trustees for the time being of the Society for promoting the Education of the Poor of Ireland through the medium of their native language to forward the objects of that Society And it is hereby further covenanted concluded and agreed upon by and between all the parties to these presents that so long as the said Funds so transferred to the said Provost Fellows and Scholars shall be suffered to stand and remain in their names in the Books of the Governor and Company of the Bank of Ireland and that they shall be permitted to receive the annual interest or dividends arising therefrom that they the said Provost Fellows and Scholars and their successors shall and will in addition to the said annual interest or dividends yearly and every year pay out of the Funds of the said College the sum of Fifty pounds to be applied in manner following that is to say Thirty pounds part thereof to go to and

be in augmentation of the annual salary of the said Professor who is to receive and be paid annually the sum of One hundred pounds and the remaining sum of Twenty pounds to go and be distributed annually by the said Provost and Senior Fellows and their successors in premiums to such person and persons and in such shares and proportions as the said Professor shall from time to time nominate to the said Provost and Senior Fellows as best entitled thereto and lastly that they the said Provost Fellows and Scholars of the said College and their successors shall and will from time to time and at all times during the continuance of the said Professorship in the said University set out unto the said Professor proper and convenient chambers in the said College for his residence which chambers shall and may be held and enjoyed by such Professor during such time as he shall hold his Professorship but subject nevertheless to all such and the like rules regulations and restrictions as the several other University professors are and shall be subject and liable to Provided always that it shall and may be lawful for the said Provost Fellows and Scholars to sell out the said Bank Stock or any part thereof and to invest the produce thereof in Government securities upon the same trust Provided always that nothing herein contained shall be deemed or construed to bind in any manner the said parties hereto or any of them in their individual capacities to contribute or pay anything towards the support of the said Professorship In witness whereof the said Provost Fellows and Scholars have caused the common seal of the said College to be hereunto affixed and the said Robert Earl of Roden and Robert Lord Bishop of Cashel have hereunto subscribed their Titles of Honour and affixed their seals and the said Frederick Shaw George Alexander Hamilton and Henry Joseph Monck Mason have hereunto subscribed their names and affixed their seals the day and year first above written.

Professor to have chambers in the College.

APPENDIX TO FINAL REPORT.—DOCUMENTS.

SECTION B.

Supplementary Documents and Returns Submitted by the Provost of Trinity College, Dublin.

VII.

Supplementary Returns relating to the property, funds, and revenues of Trinity College, Dublin.

(For Returns previously furnished, see Appendix to First Report (Cd. 3176) 1906, page 5, et seq.)

(1.)—Letter from the Secretary of the Commission to the Provost of Trinity College, Dublin:—

ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, AND THE UNIVERSITY OF DUBLIN.

OFFICES: 16, ELY PLACE, DUBLIN,
12th September, 1906.

SIR,

I am directed by the Royal Commission on Trinity College, Dublin, and the University of Dublin, to inform you that they have had under consideration the returns which you were so kind as to forward to them in response to the requests contained in their letters of the 22nd June and 6th July; and I am to convey to you their thanks for the information that you have supplied.

In connection with the financial returns, the following additional information with reference to the property and funds of the College, would be appreciated by the Commissioners:—

- (1.) "*Old Crown Estates.*"—The counties in which these estates are situate, their acreage, the sources from which they have been derived; the present College rent in respect of each estate, and the purposes to which the revenues therefrom are applicable.
- (2.) "*Old Private Estate.*"—Similar information to that specified under (1) above.
- (3.) "*Baldwin Estate.*"—Similar information to that specified under (1) above.
- (4.) "*City Estate.*"—Similar information to that specified under (1) above.
- (5.) "*Investments.*"—Particulars with regard to the College investments, the sources from which they have been derived, and the purposes to which they are applicable.
- (6.) "*Funds held under Special Trusts.*"—Particulars with regard to the funds held by the College upon special trusts, including information as to the sources from which such funds have been derived, and the purposes to which they are applicable.

With regard to the returns relating to the salaries and emoluments of the Provost, Fellows, Professors, and other officers of the University and College, the Commission desire to know whether any portion of these emoluments must be applied to purposes connected with the College. If so, they would be glad to receive particulars.

It would also be of assistance to the Commissioners if they could be supplied with information regarding scholarships and exhibitions attached to external schools and tenable in Trinity College, Dublin.

The Commission have been supplied with copies of the Report of the Trinity College, Dublin, Estates Commission (1905) and the Appendix thereto, and they are aware that these documents contain a large amount of detailed information regarding the College estates. At the same time, they consider that it would be useful for the special purposes of their inquiry, if they could be furnished with a supplementary table setting forth concisely the particulars referred to in the paragraphs numbered (1) to (4) at the beginning of this letter.

I have the honour to be,

Sir,

Your obedient servant,

JAMES DERMOT DALY,

Secretary.

Anthony Traill, Esq., LL.D., M.D., M.CH.,

Provost of Trinity College, Dublin,

Ballylough House,

Bushmills,

Co. Antrim

[*Note by Secretary.*—The Returns furnished by the Provost in reply to the above letter are contained in the following pages. When transmitting these Returns, the Provost intimated, in reply to a question, that the Provost, Fellows, Professors, and other officers are under no compulsion to apply any portion of their salaries and emoluments to purposes connected with the College, though many of them do so.]

(3)

Memorandum with reference to the sources from which the Trinity College Estates were derived. —

(1) OLD CROWN ESTATES.

The old Crown Estates consist of—

1. Head-rent County Roscommon.

Granted direct by the Crown by Letters Patent 28th June of 39th year of Queen Elizabeth.

This Grant contained a number of other lands in the Counties of Kerry, Cork, Waterford, Tipperary, and Limerick, the title of the Crown to a considerable portion of which proved defective and such of the lands as title could be proved to other than this head-rent were re-granted to the College by Letters Patent dated 10th November, 1666. See below, No. 3.

Granted direct to the College by the Crown by Letters Patent dated 29th August, of 8th year of the reign of King James I.

Granted direct to the College by Letters Patent dated 10th November, 1666.

Granted direct to the College by the Crown by Letters Patent dated 13th October in the 5th year of the reign of William and Mary.

2. Estates in the County of Armagh, County Fermanagh, and County Donegal.

3. Estates in County Kerry, County Limerick, County Tipperary, and County Cork.

4. Tithes in County Meath.

(2) OLD PRIVATE ESTATES.

1. Tithes of Moyanna and Stradbally, Queen's County.

Sir James Fullerton granted these Tithes to the College by deed dated 23rd November, 1617.

2. Estates in County Longford.

John Richardson by his will dated 9th August, 1654, bequeathed this estate to the College, and said property was conveyed to the College by Testator's Executors by deed dated 18th August, 1670.

3. Estates in County Louth

Mrs. Anne Echlin granted the lands held by the College in this county in the year 1698.

(3) THE BALDWIN ESTATE.

The Baldwin Estate.

Was bequeathed to the College by Mr. Baldwin's will dated 21st September, 1758, and consists of lands in the King's County and in the Counties of Wicklow, Kildare, Meath, and Down.

(4) CITY ESTATE.

City Estate.

The College was built by Royal Command on the site of Hogg's Monastery, granted by the Corporation of Dublin to the College, and the College Estate in the city consists of part of the lands so granted.

VIII.

Supplementary Returns relating to Students of Trinity College, Dublin.

(For Returns previously furnished, see Appendix to First Report (Cd. 3176) 1906, page 20.)

(1) Letter from the Provost of Trinity College, Dublin.

PROVOST'S HOUSE,

DUBLIN, 25th October, 1906.

DEAR SIR,

I enclose two returns of the students on the books of Trinity College, Dublin, on 1st May, 1906. The first is according to the Professional Schools, and Pure Arts. The second is according to their religious denominations—1,250 in all.

Yours truly,

ANTHONY TRAILL.

To J. Dermot Daly, Esq.

(2) Returns referred to in foregoing Letter.

RETURN (1.)

RETURN OF STUDENTS ON THE BOOKS OF TRINITY COLLEGE, DUBLIN, MAY 1ST, 1905.

1. Divinity School, ...	69
2. Law School, ...	39
3. Medical School—Men, ...	207
Medical School—Women, ...	7
	214*+3 Externs.
4. Engineering School, ...	69†
5. In Arts Solely—Men, ...	789
In Arts Solely—Women, ...	70
	859
Total Arts Students, ...	1,250

* Besides these there are a number still in the School, but not on the books at the above date, but taking part of the course elsewhere, who will return to take the Medical Degrees. This number may be estimated as between 30 and 40.

† Besides these there are three others, not on the books at the above date, but at some practical work, who will return to take their Engineering Degrees.

RETURN (2.)

Sizar,.	22	1	2	—	2	27
	929	140	88	33	60	1,250

‡ One woman—Non-foundation scholar.

N.B.—It is to be observed that the Degree of B.A. must be obtained before any of the Professional Degrees are conferred. This is unique, and explains why all the Professional students are entered above as Arts students.

25th October, 1906.

ANTHONY TRAILL,

Provost.

IX.

Students of Celtic Philology in Trinity College, Dublin.

COPY of LETTER received from the PROVOST of TRINITY COLLEGE, DUBLIN, in reply to an Inquiry from the SECRETARY of the COMMISSION.

From the Provost of Trinity College,

Provost's House, Dublin.

15th November, 1906.

DEAR SIR,

I enclose Dr. Atkinson's reply to my enquiry, through the Senior Lecturer, as to the Celtic Students.

Yours truly,

ANTHONY TRAILL.

(Copy of Letter from Dr. Atkinson to the Senior Lecturer, referred to in the foregoing Letter.)

CLAREVILLE, UPPER RATHMINES,

DUBLIN, November 15th, 1906.

DEAR SENIOR LECTURER,

In reply to your query, I never had more than one or two, and that intermittently.

But for the last three years no student has come for lectures or instruction in any branch of Celtic Philology.

Yours faithfully,

R. ATKINSON.

DOCUMENTS.

SECTION B.

X.

X.

Memorandum submitted by the Provost of Trinity College, Dublin, at the request of the Commission

(1) Letter from the Secretary of the Commission.

ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, AND
THE UNIVERSITY OF DUBLIN.

OFFICES: 16, ELY-PLACE, DUBLIN,
11th September, 1906.

SIR,

I am directed by the Royal Commission on Trinity College, Dublin, and the University of Dublin, to forward to you the accompanying Memorandum of some points on which they are anxious to obtain further information. If the information desired can be conveniently supplied, the Commission would esteem it a favour if it could be furnished prior to 16th October.

I am, sir,

Your obedient servant,

JAMES DERMOT DALY,
Secretary.

Anthony Traill, Esq., LL.D., M.D.,
Provost of Trinity College.

MEMORANDUM OF MATTERS ON WHICH FURTHER INFORMATION IS DESIRED BY THE COMMISSION.

A.—Revenues.

With reference to the tables showing income and expenditure, the following questions arise:—

1. Is the balance added to the investments so that the accumulated capital may be available to meet a deficit?
2. If not, how is a balance on hand disposed of? How is a deficit met?
3. Are the Board in any way limited in regard to the disposal of accumulated capital?
4. Is the balance habitually on the right side?
5. Has there been, in the last twenty-five years, any notable diminution of the income of the College?

B.—Residence of Students.

It appears that in order to qualify for a degree, an undergraduate, if he does not attend lectures, must pass nine terminal examinations, but that for four of these examinations he may substitute attendances at lectures during terms.

1. If he declares for the substitution, is he obliged to substitute for all the four terms, or may he substitute for one, two, or three, so escaping the like number of examinations?
2. Do any, many, or most students, frequent the College during their five examination terms?

3. Do they in general, during those five terms attend lectures?
4. If they do not frequent the College, are they still living in Dublin?
5. How do they, during those terms, pursue their studies?

C.—The Teachers.

1. What amount of work is normally expected *per diem* and in the course of the year
 - (a) from Professors (whether Fellows or not);
 - (b) from Tutors; and
 - (c) generally from members of the educational staff?
2. How far does such work consist in formal lectures of an expository kind?
3. How far does the work consist in the informal instruction of individuals?
4. How far does it consist in direction of studies?

(It will be desirable to distinguish between honour teaching and pass teaching, and also between different branches of study).

D.—The Teaching.

- 1 Does the teaching provided by the College suffice for
 - (a) the Honour Student, first, second, or third rate?
 - (b) the Pass Student?
2. Are many men dependent upon unofficial teachers or "grinders"?
3. Do the best students require such outside help?

E.—The Students.

According to the Calendar 1905-6 "Students may graduate in Honours at the B.A. Examination in eight subjects."

1. What is the average number of students who
 - (a) present themselves for examination in each of these subjects;
 - (b) are adjudged worthy of honours;
 - (c) obtain distinction?
2. What is the average number of students who graduate
 - (a) in Honours;
 - (b) in the Pass Examinations?

(2) Memorandum from the Provost.

ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, 1906.

MEMORANDUM OF MATTERS ON WHICH FURTHER INFORMATION IS DESIRED BY THE COMMISSIONERS.

A.—REVENUE.

QUERIES.

1. Is balance of revenue added to investments?
2. If not, how is it disposed of?

ANSWERS.

The disposal of the revenue of the College which has not been spent is settled by the Board. An excess of Income over Expenditure in one year may be required to meet the deficiency of a former year, or to provide for some new expense, which, in the opinion of the Board, ought to be incurred. When there is a considerable balance in hand, which is more than is likely to be required within the next three months, it is added to Capital and invested. Temporary investments are sometimes made to provide funds for special emergencies.

QUERIES.

ANSWERS.

DOCUMENTS.
SECTION B.
X

- How is a deficit met? By borrowing money from the Bank of Ireland which is repaid when the balance in hand is sufficient.
3. Are the Board in any way limited in the disposal of accumulated capital? Not except by the terms of the original Charter of Elizabeth. It has, however, been the invariable custom never to spend Capital once invested, unless it was a mere temporary investment expressly made for a special purpose.
4. Is the balance habitually on the right side? On the average, yes, so that a deficiency has always been met by a preceding or succeeding surplus in the income for the year.
5. Has there been, in the last twenty-five years, any notable diminution of income? No.

ANTHONY TRAILL, *Provost.*
8th October, 1906.

B.—RESIDENCE OF STUDENTS.

It appears that in order to qualify for a degree, an undergraduate, if he does not attend lectures, must pass nine terminal examinations, but that for four of these examinations he may substitute attendances at lectures during terms.

QUERIES.

ANSWERS.

1. If he declares for the substitution, is he obliged to substitute for all the four terms, or may he substitute for one, two, or three, so escaping the like number of examinations? No student makes any declaration of choice, but takes terms as he pleases, and often after already passing at lectures keeps the examination.
2. Do any, many, or most students frequent the College during their five examination terms? All those who are not absent teaching in a school, or in some office as clerks, do frequent the College, and the latter are the majority. We have no figures to answer this.
3. Do they, in general, during those five terms, attend lectures? Very commonly. Many are at professional lectures, others at honour lectures outside the ordinary work of the class.
4. If they do not frequent the College, are they still living in Dublin? Many of them, probably the majority; but we have no returns to give figures.
5. How do they, during those terms, pursue their studies? Some go to grinders; some are reading for honors and scholarships, some are devoted to games and spend their time thus.

C.—THE TEACHERS.

1. What amount of work is normally expected per diem and in the course of the year—
(a) from Professors (whether Fellows or not),
(b) from tutors, and
(c) Generally from members of the educational staff?
2. How far does such work consist in formal lectures of an expository kind?
3. How far does the work consist in the informal instruction of individuals?
4. How far does it consist in direction of studies?

(It will be desirable to distinguish between honour teaching and pass teaching, and also between different branches of study.)

[*Note by the Secretary.*—With reference to these queries, the Senior Lecturer stated "Regarding C. and D., most of which cannot be answered in figures, I am ready to give answers before the Commission." The Senior Lecturer's oral evidence, given subsequently, will be found at pages 171-177.]

D.—THE TEACHING.

1. Does the teaching provided by the College suffice for—
(a) the Honour student, first, second or third rate?
(b) the pass student?
2. Are many men dependent upon unofficial teachers or "grinders"?
3. Do the best students require such outside help?

E.—THE STUDENTS.

QUERIES.

ANSWERS.

(According to the Calendar 1905-6, students may graduate in Honours at the B.A. examination in eight subjects.)

1. What is the average number of students who—
(a) present themselves for examination in each of these subjects,
(b) are adjudged worthy of honours,
(c) obtain distinction?
2. What is the average number of students who graduate (a) in Honours, (b) in the Pass examinations?

DOCUMENTS.
SECTION B.
XI

Documents furnished by the Provost of Trinity College for the information of the Commission.

(1.) Description of Buildings erected since 1856.

(Taken from the Dublin University Calendar.)

[For Cost, see Document (2) on page 342.]

MUSEUM BUILDING.

This Building was erected by the Provost and Senior Fellows in 1857.

It contains the Museums of Natural Philosophy, Geology and Mineralogy, and of Engineering Models, the Drawing Room of the Engineering School, the Room of the Lending Library, a Physical Lecture Room and Laboratory, the Lecture Room of the Schools of Divinity and Law, and a number of other Lecture Rooms. It contains also a Clock in electric connexion with the Observatory clock at Dunsink.

MEDICAL SCHOOL BUILDINGS.

These comprise three blocks.

In the middle one are:—

I. The Anatomical Department, which includes a large Dissecting Room with electric light; a Bone Room, in which are Sections of the frozen body, and various preparations and models illustrating the Development and the Topography of the Brain; a Lecture Theatre, with a powerful projecting Lantern; the Professors' rooms.

II. The Chemical Science School, including four general Laboratories, as well as special Laboratories for Quantitative and Gas Analysis; a Balance Room; a Chemical Museum, in which are a number of the rarer Chemical substances; a large Lecture Theatre; the Professors' rooms and Laboratory.

III. A spacious Pathological Museum, with rooms for the Professor of Surgery.

IV. The Department of Materia Medica and Therapeutics, including a Laboratory, a Museum, and the Professors' rooms.

V. Two Lecture Theatres, Professors' rooms, the Office of the Registrar of the School, a Tutorial Class Room and a Students' Luncheon Room.

This part of the block was completed in 1887.

VI. The Museum of Anatomy and Zoology, completed in 1876.

At the north end of the Zoological Museum is the block containing the Department of Institutes of Medicine, which includes a large Laboratory for Histology, a Theatre in which the Lectures in Physiology are given, and the Professors' rooms. This block was finished in 1878; and subsequently enlarged in 1901.

On the south of the middle block is the School of Pathology, which contains a large Laboratory, a Theatre, the Lecturer's room, and a number of work and preparation rooms. In this building also accommodation is at present provided for the Department of Röntgen photography.

This building was completed in 1904.

All the Theatres have their seats numbered consecutively, one being assigned to each Student on entering for the corresponding course of Lectures.

Dissecting Room for Women, a small room for advanced practical work in Anatomy, and a Reading Room for Women.

GRADUATES' MEMORIAL, OPENED IN 1903.

The north side of the Library Square, which contained the old houses numbered 28 to 31 was demolished in 1899.

The Graduates' Memorial occupies the centre of the new building which has been erected in the space thus vacated, and contains a theatre, a library, a reading room, recreation rooms, rooms for the use of the College Societies, cloak rooms, &c.

The wings of the new building contain forty sets of single students' chambers, and the entrances are at the east and west ends.

LABORATORIES IN CONNECTION WITH THE SCHOOL OF ENGINEERING.

(From the Dublin University Calendar.)

I. ELECTRICAL ENGINEERING, 1903.

A Laboratory and workshop has been constructed, which contains a gas engine of 8 H. P. for driving the dynamos, a storage battery, rotary converter, continuous current dynamo, a potentiometer, oscillograph, and outfit of modern electrical measuring instruments.

A supply of three-phase alternating current is available.

II. MECHANICAL ENGINEERING, 1903.

The Mechanical Engineering Laboratory is under the superintendence of the Lecturer in Mechanical Engineering. Its equipment includes a 10-ton Wicksteed Testing-machine, a Locomotive Boiler and Compound Condensing Engine of 30 H. P., a 8 H. P. Crossley Gas Engine, and a 4 H. P. Tangye Oil Engine. The Mechanical Workshop is fitted with Lathes, Shaping and Drilling-machines, and other Machine-tools for the preparation of specimens for testing and other mechanical work. A part of the Laboratory is fitted up for the testing of Cements: its equipment includes a tensile Testing-machine and other apparatus used in the preparation of samples for testing.

NEW BUILDINGS OF THE SCHOOL OF EXPERIMENTAL PHYSICS, 1906.

(Extract from Statement of Professor Thrift to the Royal Commission.)

The new buildings are, both in design and fittings, in every respect up to date. The cost for building and permanent fittings will amount to nearly £16,000 of the £16,500 given for the building by the Right Hon. Viscount Iveagh. The Laboratory will afford some special rooms for research in addition to such accommodation for teaching as will meet the requirements of the University for many years, unless some considerable increase in the numbers of students takes place. The Lecture Theatre will seat about 130 students. There is a large class-room for practical elementary instruction capable of receiving about 50 students. There are also special rooms for advanced studies in Electricity, Magnetism, Heat, and Optics. In these a certain amount of research could be carried out by students, as well as in the special rooms provided for the purpose.

Medical School.

Post-Graduate Classes in preparation for the Royal Army Medical Corps, the Royal Naval Medical Service, and the Indian Medical Service.

Just three years ago the Board of Trinity College approved the formation of, and subsidised classes for, qualified Medical men wishing to enter the Royal Army Medical Corps, the Royal Navy, and the Indian Medical Services. The courses of instruction are held twice yearly, and are given by Graduates of the University. The Lectures and practical classes are held in the Departments of the Medical School, Trinity College, and the Clinical instruction is given in the Royal City of Dublin Hospital.

The classes have been well attended, not only by our own Graduates, but also by young Medical men from other schools in Ireland and Great Britain. The results are shown to be most excellent.

The numbers attending these classes have been as follows:—

1904 (first session)	7
1904 (second session)	11
1905 (first session)	14
1905 (second session)	24
1906 (first session)	27

Post-Graduate Classes in Medicine.

Some three years ago the Board of Trinity College sanctioned a scheme, put forward by the Medical School Committee, for post-graduate instruction for Medical Practitioners. The scheme, which has been carried out in each of the last three years, included instruction in the following subjects?—Surgery, Clinical Surgery, Operations, Medicine, Clinical Medicine, Ophthalmology, Diseases of the Skin, Ear, Nose, and Throat, Pathology, Anatomy, X-Ray work, Gynaecology, and Cystoscopy.

Distinguished practitioners in Dublin, most of them Graduates of the University, have generously given their services in carrying out the scheme, which, without their help, would have been impossible. Trinity College has gained by enlisting the services of these gentlemen for its teaching work. The success which has attended the courses has been very marked, and the results obtained very gratifying. In many cases Medical men gave up their hard-earned summer holiday to attend the classes, and came to Dublin from long distances. Each year our numbers have increased; and we have realised that we have come more fully into contact and sympathy, more especially with the practitioners from the country districts of Ireland. Educationally, we believe the courses have been a distinct success.

The numbers attending the courses were as follows:—

1904	17
1905	21
1906	22

1904—Army School established.

1904—Licence and Degrees in Dental Science.

1905—Diploma in Economics and Commercial Knowledge.

1904—Diploma in Education.

XII.

Statement submitted by the Right Hon. The Earl of Rosse, K.P., Chancellor of the University of Dublin.

Of the revenues of the College I am unable to speak with any detail. The "Board" can give far more information than I can, but, owing to the changes which have taken place in land tenures, it is generally assumed that there has been a considerable shrinkage of the income of the College from their estates, as of those of other landowners. I have no doubt that this is the case, and unfortunately, too, at a time when the requirements of higher education are more exacting as to expenditure.

I am not sure whether certain considerable economies are not possible, however. The incomes of the various members of the staff do not appear duly proportioned. It seems quite right that a young man on entering upon his duties should, beginning with a modest salary, receive additions to it, gradually, up to middle age; but it does not seem in accordance with precedent that at a time of life when he is no longer capable of rendering as efficient service, and his expenses should probably be diminished owing to his family being provided for, he should, by seniority, step into a position of comparative affluence. The position of a Senior Fellow is said to be worth nearly double of that of the senior group of the Junior Fellows, and that of the Provost about double again. There is reason for an augmentation of income on appointment as Head of a large college. The expenses which the position entails are greater, but I do not conceive that expenses are increased on promotion from the position of a Junior to that of a Senior Fellow.

The result of this augmentation of income may be expected to be an unwillingness to accept voluntary retirement, and the retirement must be expensive to the College funds, as it will be based upon the scale of an augmented income.

Probably the salaries of the juniors may be scarcely sufficient to repay at once the delay and labour entailed in seeking the position.

It is needless to say that suggested changes should be made with due regard to vested interests.

Beyond what may be gained by the readjustment of incomes, suggested above, in two departments, viz.: the Observatory and the Botanic Garden, perhaps retrenchment may be possible.

The former, situated, as it is, some seven miles from the College, loses thereby much of its educational value, though for original work the staff are freer from interruptions and the climatic conditions are, I have no doubt, better than if a site nearer to the College, or not so far inland, had been selected.

Under these circumstances, it would appear reasonable that the Observatory be treated more as a State institution, like that at Edinburgh, and that the College be relieved from some part of the burden of its upkeep and running expenses.

The Botanic Garden has been considered by many as not yielding advantages to the College commensurate with the expenditure upon it; some considerable reductions in the expenses have, however, been recently effected on the occurrence of a vacancy in the curatorship.

It is naturally felt that the giving up of either of these two most usual adjuncts to a University, which concern two essential subjects of a University course, would detract much from its completeness and lower the prestige of the University. I would further point out that in the past the post at the Observatory, and indeed that at the Botanic Garden also, have been

held by persons of some eminence, and useful work not directly connected with the establishments has been given to the world.

There is no doubt that the present system of election to Fellowships, by examination alone, or nearly so, in a course, the more important part of which and one essential for success is either the Latin and Greek Classics, or Mathematics Pure and Applied, no longer meets all the varied requirements of a University, and the teaching staff has to be largely added to by professorships in important special subjects, but generally of more uncertain tenure and with inferior pecuniary prospects.

The difficulty in the way of appointment to Fellowships by any form of selection, as opposed to examination, is, of course, the possible imputation of party bias in a country where political party spirit runs so high, but it has been suggested, and I think very fairly, that selection on the merit of published work for the Fellowships, or at least some of them, on the plan which seems to work well for the professional chairs, might meet the case.

There seems no doubt that the present examination system involves too long and severe a strain on the candidates, causing in some cases a permanent injury to their health, and in most cases an indisposition for scientific or literary work for the rest of their days. The system, too, gives the advantage to men of exceptionally great powers of memory rather than of original genius.

There appears to be no adequate provision at present for the separate teaching of honour and pass men by persons best fitted for each of two very different standards of work.

To one matter of detail of some importance I would further wish to draw attention. It is the relative position in which resident and non-resident undergraduates find themselves in Honour Examinations.

In Trinity College students may either reside and attend pass or honour lectures, getting credit thus for some of their terms, or they may keep all their terms by examination, live in the country, and probably undertake scholastic or other work for their support.

If the non-resident student is a candidate for honours, in any case he is probably under a disadvantage from non-attendance at lectures, but he is so to a greater degree if the lecturer be placed upon the Board of Examiners. The practice has been defended by the college authorities on the plea that the lecturer would not receive proper attention from his pupils if they did not expect him afterwards to examine. On the other hand, it is claimed on behalf of the non-resident student that, notwithstanding all efforts, by consulting the published examination papers of previous years, and perhaps notes of the lecturer's lectures of previous years, obtained from other students, he is unable to cope with the difficulty. He does not get equal credit for his knowledge of the subject with that secured by the resident student, owing to the practice of appointing the lecturer to examine.

The matter was the subject of a correspondence between my father, when Chancellor, and the then Provost, Dr. Humphrey Lloyd, of which part may be available.

I am not aware that the Board have since departed from their established practice.

On subject of inquiry No. xii., the steps proper to be taken to increase [or make more general] the usefulness of Trinity College and the University of Dublin to the country—it is exceedingly difficult to know

what to say. While sympathising much with the efforts of members of the staff of the University still further to meet objections which may be raised by Roman Catholics against their present position in it, as also with the various suggestions made from outside with the same object, I think that great care should be taken lest an institution which has for centuries done good work should have its usefulness impaired for those classes who now take advantage of her in futile attempts to draw in others who refuse to take advantage of what is known as the system of mixed education.

For many years the University has been worked on the principle of taking no account of sectarian ques-

tions in the granting of degrees, in the award of honours and passes, and in the appointments to offices of profit. I feel strongly that this principle should be in nowise departed from, even temporarily, as has been suggested. I have always desired to see the principle of "mixed education" adopted as far as is possible, as, apart from other reasons, Ireland is a poor country, and can ill afford to support organisations in duplicate; but I see no reason to think that arrangements which succeed elsewhere can be worked in Ireland.

All my experience has been *most sadly* disappointing.

ROSSE.

Supplementary Statement submitted by the Rev. T. T. GRAY, M.A., Senior Fellow of Trinity College, Dublin.*

MEMORANDUM SENT BY MR. GRAY TO THE PROVOST AND FELLOWS ON OCTOBER 10TH, 1904.

The average number of Students who entered Trinity College during the last fifteen years—from the year ending June 12th, 1890, to June 11th, 1904—is 229;† in round numbers, say, 230, the highest number being 285 in 1892, and the lowest 185 in 1903. For the last seven years the average number is exactly 208. This is not an encouraging state of affairs: and, therefore, I think that an effort should be made to induce, if possible, a larger number of our countrymen to take advantage of the education which we offer.

The class from which we draw our Students is not a wealthy class—wealthy Irishmen, as a rule, give Trinity, Dublin, the go-by, and send their sons to Oxford or Cambridge. A man of moderate means, and especially if he has a large family to push on in the world, is obliged to calculate carefully whether he can afford to send a son to Trinity, paying at the same time the fees in Arts and the fees in one of the Professional Schools. Hence, any relief we can give him, no matter how small, either by a reduction of fees, or by an Exhibition of some kind, to help him to pay his way, would tend to make him decide the question in our favour, and send us his son. For, we know that a very large number of the class I am considering look upon our Degree as the highest object of their ambition, and would make any sacrifice in their power to obtain it.

My first proposal, therefore, is to establish twelve more Junior Exhibitions and twelve more Senior Exhibitions of £20 a year, either on precisely the same lines as the present Exhibitions, or partly on these lines and partly on such other lines as may be suggested when the scheme shall have been discussed in all its bearings. These Exhibitions would cost the College £960 per annum. The fund from which I propose to draw this amount is the increase of revenue accruing in the College from the new letting of its Westland-row property. I think it is our duty (as well as our interest) to give the public a share of this addition to our income. This is the very least that we should do. But I would go further, and propose that we should spend the whole of it in helping students during their Undergraduate course, and by making a saving in some other departments establish in addition twelve Junior and twelve Senior Exhibitions of £15 a year. These latter would cost the College £720 a year more. Thus we would be able, at a cost of £1,680 a year to the College, to give forty-eight additional Exhibitions each year; twenty-four Junior and twenty-four Senior. Some of these Exhibitions I would assign to the Medical School, some to the Engineering School, and some exclusively to Students educated at, and entering from, Irish Schools.

It is calculated that we shall derive some £1,520 a year additional income from Westland-row: and of the departments alluded to above from which a saving may be effected, I will only mention the Library, on which an average of £3,200 per annum has been expended for the last four years. From this source alone a saving of from £500 to £700 a year might easily be made, without in the smallest degree interfering with its efficient working. For the nine years preceding—i.e., from November 20th, 1891, to November 20th, 1899, the average expenditure was only

£2,230, and yet no one complained. Therefore, from these two sources alone, not to mention others, we could easily get funds for the expenditure I propose.

My second proposal is to reduce, by a very small sum, the amount of fees payable by a Student in Arts.

I know I must move delicately when I propose a reduction of fees; but my scheme is a very modest one, and it has the following advantages to recommend it:—(1) The amount of reduction is very small; (2) it applies to one payment only, and that the payment which bears most heavily on the Student, and, more than any other, deters men from entering, and thus keeps down our numbers; (3) the payment affected is open to more plausible objections than any other payment, and consequently is the hardest to defend when attacked; (4) the Cista Communis and those members of the College whose pecuniary interests are affected by the reduction will be more than recouped for any temporary loss by a very small addition to our numbers; and (5) should my first proposal be adopted, in whole or in part, and bring in, as it is sure to do, an increased number of Students, the loss caused by the reduction will at once disappear, and a very considerable gain be the final result.

My proposal is, to reduce the Entrance fee from £15 to £10.

The total cost of the A.B. Degree at present is £83 4s., made up of an Entrance fee of £15, eight half-yearly payments of £8 8s., and £1 for the Degree and Testimonium.

Of the Entrance fee £6 6s. goes to the Tutorial Fund, £4 10s. to "Fees to College," and £4 4s. to Decrements. Of the eight half-yearly payments half goes to the Tutorial Fund, and half to Decrements. Therefore each Student during his course pays the Tutors £39 18s., and the College £43 6s.

My suggestion is, that the £5, by which I propose to reduce the Entrance fee, should be made up of £1 1s. taken from the Tutors' share of that fee, and £3 19s. taken from "Fees to College." Thus the Tutors would receive in future from each Student £38 17s., and the Cista Communis £39 7s.

Let us now trace the consequences of this change. Supposing the number of Entrances in future equals the average number of Entrances for the last fifteen years, viz., 230, the Tutors would lose 230 guineas, or £241 10s.; but if the effect of the change brought in only seven additional Entrances, the Tutors would gain £38 17s. × 7, or £271 19s.; in other words, they would have a net gain of £30 9s. per annum. Again, if the number of entrances still continued at the average of 230, the Cista Communis would lose £3 19s. × 230, or £908 10s.; but by twenty-four additional Entrances it would gain £39 7s. × 24, or £944 8s., thus getting a net gain of £35 18s. per annum. Hence seven additional Entrances would recoup the Tutors for the loss they would sustain by reducing the Entrance fee to £10, and twenty-four additional entrances would recoup the Cista Communis for the loss it would sustain.

Suppose, now, that my two proposals are adopted, and by their joint effect increased the average number of entrances by fifty, thus raising the average

number to 280, the result would be (1) to the Tutors a gain of £1,701 per annum, and (2) to the Cista Communis a gain of £1,059 per annum. For an increase of seventy in the average number of Entrances, the result would be (1) to the Tutors a gain of £2,478 per annum, and (2) to the Cista Communis a gain of £1,846 per annum. And with a lower Entrance fee, and the offer of forty-eight additional Exhibitions every year (twenty-four Junior and twenty-four Senior), I think we might fairly expect this increase, and so have an average of 300 Entrances; and if this expectation were realised, both Tutors and Cista Communis would be more than recouped for the whole expenditure which they would have undertaken by adopting my two proposals.

The foregoing calculations are based upon the assumption that the average number of Entrances at present is 230, this being the average of the last fifteen years. But a considerable drop, of 50, took place in the year ending June 20th, 1898, which we have not yet recovered, reducing the average to 208 for the last seven years. The actual numbers are—203, 208, 236, 201, 213, 185, 210; while the number who entered during the year ending June 9th, 1897, was 253, the average for eight years to this date being 248.

If, then, we start with the average of 208 Entrances, all the former results will be still more striking. In this case the Tutors will begin with a loss of £218 8s., which an addition of only six Entrances per annum, or an average of 214, will turn into a net gain of £14 14s. The Cista Communis will begin with a loss of £821 12s., which an addition of twenty-one Entrances, or an average of 229 per annum, will turn into a net gain of £4 15s.

If the average number of Entrances rise to 258, an increase of fifty, the result will be (1) to the Tutors a gain of £1,724 2s. per annum, and (2) to the Cista Communis a gain of £1,145 18s. Again, if the average number of Entrances rise to 278, an increase of seventy, the result will be (1) to the Tutors a gain of £2,501 2s. per annum, and (2) to the Cista Communis a gain of £1,932 18s. And, finally, if we succeed in securing an average number of 300 Entrances each year, the result will be (1) to the Tutors a gain of £3,355 16s. per annum, and (2) to the Cista Communis a gain of £2,798 12s. per annum.

If the Entrance Fee were reduced to £7 10s. the half of what it is at present, the amount by which it is reduced (£7 10s.) being made up of £1 1s. taken from the Tutorial Fund as before, and £6 9s. from the Cista Communis, the results of the change would be as follows.—As the Tutors would contribute the same amount as before to the reduction, all previous calculations as to their position would remain the same. But in the case of the Cista Communis, the £43 6s. which it now receives from each Student would be reduced to £36 17s. Hence, starting with 230 Entrances, the average of the last fifteen years, the initial loss to the Cista Communis would be £6 9s. \times 230 = £1,483 10s. But forty additional Entrances, or an average of 270 Entrances per annum, would give an increased revenue of £36 17s. \times 40 = £1,474, a sum practically equivalent to the initial loss. Seventy additional Entrances, or an average of 300 Entrances per annum, would give a net gain of £1,096 per annum (= £36 17s. \times 70 less £1,483 10s. = £2,579 10s. less £1,483 10s.).

If we had started with 208 Entrances, the average of the last seven years, the initial loss to the Cista Communis would be £6 9s. \times 208 = £1,341 12s.; and an increase of thirty-seven Entrances, or an average of 245 Entrances per annum, would give an increased revenue of £36 17s. \times 37 = £1,363 9s.; in other words, a net gain of £21 17s. But if the average number of Entrances rises to 278, an increase of seventy, the net gain to the Cista Communis will be £1,237 18s. (= £36 17s. \times 70 less £1,341 12s. = £2,579 10s. less £1,341 12s.). And finally, if the average reaches 300, an increase of ninety-two, the net gain to the Cista Communis will be £2,048 12s.

If, as a further application of this principle, the Entrance Fee were reduced to £5 5s., and the whole of it went to the Tutorial Fund, the Cista Communis

would lose £8 14s. on each Entrance Fee, and consequently the £43 6s. which it at present receives from each Student would be reduced to £34 12s.

As the Tutors would still contribute £1 1s. towards the reduction of the Entrance Fee, all previous calculations as to their position remain the same as before. The case of the Cista Communis would be as follows:—On an average of 230 Entrances the initial loss would be £8 14s. \times 230 = £2,001. Fifty-eight additional Entrances—i.e., an average of 288 Entrances each year, would give the Cista Communis an increased income of £2,006 16s. per annum (= to £34 12s. \times 58), or a net gain of £5 16s. Any number over this would be altogether a gain to the Cista Communis. Seventy additional Entrances—i.e., an average of 300 Entrances each year, would give an increased income of £2,422 per annum (= £34 12s. \times 70), or a net gain of £421.

If we start with the average of 208 Entrances, that of the last seven years, the Cista Communis will begin with a loss of £8 14s. \times 208, or £1,809 12s., which an average of fifty-three additional Entrances, or an average of 261 each year, will turn into a net gain of £24 4s. (£34 12s. \times 53 = £1,833 16s.). If the average number of Entrances rises to 280, the net gain would be £681 12s. And, finally, if the average number reaches 300, the net gain would be £1,373 12s. per annum.

I need hardly point out how greatly such a move, as I have now given an outline of, would strengthen our position in the present crisis of the University question. The more we do to place our educational advantages within the reach of every man of moderate means in the country, the more unassailable our position becomes. For some years past the expenditure of the College has been more in the line of providing and equipping Lecture Rooms and Laboratories, and great and important improvements have been made. Now, we should make an effort to fill those Lecture Rooms and Laboratories with students; and these additional students can only come from a less wealthy class than that which has hitherto supplied us. The late Commission on the Royal University has left all other Educational Institutions in Ireland in a state of confusion, and uncertainty as to their future; and hence an unique opportunity is afforded to Trinity College, Dublin, to step forward and take the lead, an opportunity which it should lose no time in seizing and turning to the best advantage. The ban of the Roman Catholic Hierarchy, too, is losing its force. The youth of the country are determined to have the best, and only the best, University education which Ireland can give, and this is to be got in Trinity College alone. Our offers to the Presbyterian and Roman Catholic Churches have settled the question of religion, and if we could now give the further inducements of lower fees and numerous Exhibitions, we would take the ground from under the demand for a Roman Catholic University or a Roman Catholic College. Should we succeed in doing so, and draw the Roman Catholic youth of Ireland to Trinity, we shall have solved a troublesome political question, and, by mixing creeds and classes in friendly intercourse during their Undergraduate years with us, have promoted in no small degree the loyalty and peace of the whole country.

But, indeed, there is much more in all this than the mere patching up of the Irish University question. The necessity of uniting and combining all creeds and sects of Irishmen was never more pressing than it is at present. Be the destiny of Ireland what it may, the factors shaping the course of future events are, and will be, mainly within the control of Irishmen themselves. A reduced Franchise, a Local Government Act which has placed the entire control of local affairs in popularly elected bodies, a Land Act which has pledged the British Exchequer for the advance of the purchase money of the land of Ireland, thereby putting the tenant-farmer class into the absolute possession of their holdings—all these things have contributed to make Ireland, to a very great degree, practically independent of British statesmanship and control. Such a position places Irishmen under serious obligations to their country, obligations which, if loyal men, they are bound to discharge for the benefit of the Empire as well as for the benefit of Ireland.

The first, the most indispensable and most pressing condition of their success, namely, the uniting of Protestants and Roman Catholics in their youth and in their education, is the special province of the University of Dublin. In these circumstances our course is plain. We cannot, even if we would, shirk our obvious duty. Our College is a fixture in this country. We cannot stir. We cannot migrate to a more congenial, a more peaceful, clime, carrying with us our teaching staff and our buildings. Our place is Ireland. It is in Ireland that we must flourish or

fail. Let us then cheerfully face the task before us, do our part to the best of our ability, and not put it in the power of our successors to say that we of this generation either ignored or evaded our responsibilities.

DOCUMENTS.
SECTION C.
XIII.

NOTE 1. For the seven years ending October 31st, 1897, "Receipts from Students," i.e., Entrances, Half-yearly Payments, and Replacements, averaged £10,004 per annum. In 1898 this item fell to £9,120, and for the last three years, 1901, 1902, 1903, it was £8,176, £8,022, and £8,049, a drop of nearly £2,000 a year.

2. During the last eight years, ending October 31st, 1903, the total sum expended upon new buildings was £44,432, an average of £5,554 per annum, and all paid out of income.

3. During these same eight years expenditure twice exceeded income—viz., in the year ending October 31st, 1897, by £5,167 8s. 5d., and in the year ending October 31st, 1903, by £1,959 16s. 5d., equal together

to £7,127 4s. 10d. During the remaining six years of this period income exceeded expenditure by sums amounting in all to £8,329 0s. 10d. So that we arrive at this remarkable result, that for the last eight years we have saved only £1,201 16s., an average of £150 per annum.

4. I have already alluded to the increased expenditure, about £1,000 a year, upon the Library during the last four years.

5. Under the Local Government Act of 1898 we are gaining about £2,000 a year from the Agricultural Grant.

Statement submitted by the Rev. J. P. Mahaffy, D.D., D.C.L., Senior Fellow of Trinity College, Dublin; Senior Lecturer.*

COLLEGE FEES.

Several witnesses, who have written without informing themselves of the facts, have urged that the initial fee of £15 (of which £8 8s. is the first half-year's fee, the rest Matriculation fee) acts as a deterrent to poor boys, and that its reduction would increase the number of our students.

Since I became Senior Lecturer, I have taken this question in hand, and devised various easements of the initial outlay, viz., the College authorities have allowed candidates to compete for the Junior Exhibitions (£25 per annum for two years), at the cost of £1, as a mere guarantee of serious intention. Any student who obtains an Exhibition is allowed to pay the first half-year (£12 10s.) towards the liquidation of the remaining £14. Those that fail are only at the loss of £1. Since that time, in accordance with my persistent efforts to bring the College into relation with the Intermediate system, Sir J. Nutting founded (for five years) ten two-year Exhibitions of £50 per annum, and the Board have added twelve more of £20 and £15 per annum, for students distinguished at the Intermediate Examinations, without further test. Moreover, I promoted a complete revolution in the Sizarship examination, which had become so difficult that only the best schools could compete, and, moreover, there was actually no limit of age, or even of College standing. Thus Honormen on the books had been allowed to compete against boys fresh from poor schools, for whom these 30 places were originally intended. This examination has now become a higher Entrance Exhibition. As about eight to ten are awarded yearly, it follows that there are yearly 12 + 22 + 8 places, practically free places, for boys above the average who choose to enter Trinity College. Anyone might have expected that these reforms would have at least doubled the competition for the prizes so modified. Experience has shown that the expectation is vain. There is little increase (mostly that of girls) in the initial competitions, and the applications

for the valuable prizes depending on the Intermediate Examinations have not been numerous, and few of them from the schools we had hoped to reach.

It seems to follow from this, that Trinity College has secured the complete support of a small number of the best schools in Ireland, but that to the rest the College and its advantages are unknown, whether from mere ignorance, or from deliberate policy on the part of the managers. Of the 30 Sizarships intended for clever boys of very limited means, 29 are held by Protestants—a fact which speaks for itself, and the great body of these come from a very few schools, which in past years have made this particular competition their speciality. The new system of easier examination and limit of age (to 19) has hardly been in existence long enough to afford certain conclusions, but I am only speaking the opinion of most experienced tutors in the College, when I say that a reduction of the College fees would mean a grave loss of income without any compensating increase in the roll of students. In fact, if the expense of educating a student in Trinity College be not less than £400 in all, the Matriculation fee of £6 12s. may justly be deemed a negligible quantity.

Let me add that the Board resolved to permit students who obtained two first prizes in the Michaelmas term (formerly £4 each in books), to receive them in money, and also permit them to be allocated to the payment of half-yearly fees. Thus a clever student can pay half his yearly fees by these prizes, quite apart from all the other sources of profit open to him. I have computed that in regard of all the prizes, remissions by the College and the tutors, and other endowments, at least one in every six students on the books escapes paying fees, either wholly or in part. There is, therefore, no reason to think that the reduction of fees could have any but mischievous effects.

* The oral evidence given by the Senior Lecturer will be found at pages 171-177.

Joint Statement submitted by fourteen Junior Fellows of Trinity College, Dublin.

We, the undersigned Junior Fellows, while heartily agreeing to any proposal for real reform in the system of government of Trinity College, are opposed to schemes of change which may upset our constitution without doing any equivalent good; and particularly object to many of the features embodied in the scheme proposed in Document No. 5, Blue Book 2 (Appendix to the First Report*).

Statement submitted by John I. Beare, Esq., M.A., F.T.C.D., Regius Professor of Greek in the University of Dublin.†

TO THE MEMBERS OF THE ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, AND THE UNIVERSITY OF DUBLIN.

GENTLEMEN,

I beg leave to submit the following statement of my opinions and feelings on some of the subjects which have been referred to you for investigation. I will here use the terms "Trinity College" and the "University of Dublin" as convertible, and will confine myself to points V., VI., XI., XII., as these, which are organically connected, are also of the highest importance; while the others, however important, are, in comparison with these, matter of detail.

Make the government of Trinity College what existing circumstances seem to require; make the place which the College holds in the Higher Education of Ireland what it ought to be; and all else shall be added unto us.

A.

The system of government by a Board consisting of the Provost and seven Senior Fellows has been attacked bitterly and long. It is a close oligarchy, and therefore strong for its immediate purpose—that of governing. Nor is it in accordance with the analogy of human nature that it should have escaped such attacks. In themselves they avail nothing against it, unless they succeed in showing that under this system the Governing Body tends to be inefficient, e.g., that it tends to be—

- (a) Unprogressive, and out of touch with the academic spirit of the age;
- (b) Out of sympathy with, and unfit to represent, the staff of the College;
- (c) Uneconomical;
- (d) Corrupt;
- (e) Composed of members the majority of whom are too old.

Testing the system by its results during the last thirty years, I beg to say that, in my opinion, none of these charges against it can be sustained.

(a) Under the administration of the Board, during this period, Trinity College has taken so many really progressive steps as an Educational Institution, that those who have its interest most at heart have much reason to be satisfied. I need not enumerate the particular steps to which I refer: they will occur to the minds of all who know the recent history of the College. The term "academic spirit of the age," being hard to define, is liable to rhetorical abuse; but so far as the charge involving it has any practical meaning, it seems easily met by pointing to the alertness of the Board in recent years in recognising and providing for the newer educational needs of University-going students.

(b) The previous training of the members of the Board, while they are Fellow-Professors or Tutors,

* Appendix to First Report (Cd. 3176), 1906, p. 27.

bringing them, as it does, into constant and intimate connection for twenty or thirty years, with the schools and faculties, in the prosperity of which their own pecuniary interests have been during those years involved, has been such that they are, of necessity, peculiarly well qualified, both in knowledge and in disposition, to represent those schools and faculties, and to provide for their efficient working. A system of election, by which members of the staff should choose their representatives on the Governing Body, while better calculated, perhaps, to gratify personal ambitions, would not provide more genuinely representative or more sympathetic governors of the departments of University or College business; and members of the staffs so elected would not have the same length and breadth of experience, qualifying them for general administration, the same impartiality, or the leisure and disinterestedness which, under the present system, their position as *emeriti* gives the members of the Board for supervising, controlling, and promoting the interests of all the faculties and schools co-ordinately. It is, moreover, the duty of the lecturing Professors and Tutors to report to the Board on the needs of their respective faculties and schools. Such reports are always duly attended to; though not always with the result of satisfying those who, with exaggerated or partial views, expect that their own immediate concerns should receive first attention. The practical mean between what is sought for by individuals and what is, on the whole, wisest is best secured by the management of an experienced and impartial body, such as the present system provides in Trinity College.

(c) No one asserts, and there is no ground for asserting, that the Board fails in its economic duty of improving or safeguarding the financial position of the College.

(d) Far from being corrupt, the financial administration of the Board has been honourable in a high degree. When the College received, in lieu of advowsons, £120,000, a sum which was supposed to be intended for pensioning Senior Fellows, this was so dealt with by the Board as to promote the interest of the University as much, and that of individuals as little, as possible. The granting of pensions was so strictly conditioned, that not only has no abuse in this respect taken place, but even the use of the money for that legitimate object has, as some think, been unduly hampered.

(e) The average age of the members of the Board is, doubtless, higher than we should wish; but there are obvious considerations—among them, those derived from the analogies of the public service—which invalidate the mere charge of age. This charge is, in fact, nothing unless joined with that of inefficiency. Old age is not always senility. Impartial and competent judges will, moreover, when they hear the charge of age urged, discriminate between this and weakness;

† Mr. Beare's oral evidence will be found at pages 296, *et seq.*

and, in estimating its weight, will deduct whatever is derived from the energetic desire of the younger men, who make the charge, to step into the shoes of their seniors. The rules which apply to a comparatively mechanical Civil Service should not be allowed to govern the question at what age a person ceases to be fit to fill the position of member of a College Board with profit to his College. Apart from his value as a counsellor, the reputation of a great scholar, even when his period of productive scientific or literary work is past, is an asset of his College while he remains a member of it; and this may be more precious than the activity of a dozen intellectually smaller, though younger, men, in whom what is called "business capacity" is too often but a poor substitute for the higher qualities that constitute the true life of a University.

B.

Nevertheless, I am content that the government by the Provost and seven Senior Fellows should be converted into a government by an Elected Body (in accordance with the scheme of Statement III.* to which I have placed my name), in order to remove, so far as in us lies, every reasonable obstacle to the education, not only of the Protestant, but also of the Roman Catholic University-going youth of Ireland within the walls of Trinity College, under such conditions as to satisfy the moral and religious scruples of their natural guardians.

(a) It is, therefore, for no small consideration that I would consent to the proposed revolution. But if this should have—as I firmly believe it would, if recommended and adopted, ultimately have—the effect of uniting the most intelligent of the youth of Ireland generally within our College, and there teaching or accustoming them to regard one another as friends, and, while acknowledging and respecting differences on transcendental matters, to work together for the material good of their common country, I am willing, on that condition and on that only, to acquiesce in it.

(b) Here, however, I wish to make one point very clear. In the words with which the document (III.) to which I have referred concludes: my "support of any scheme for the alteration of the constitution of Trinity College on the above or similar lines will entirely depend on the adoption of the principle, that while each electoral body shall be free to choose its own representatives on the Governing Body, the profession of any particular form of religious belief shall not be a necessary qualification for membership of the Governing Body, our aim being to provide a constitution which shall be based solely on academic merit." To this also tend the emphatic words of (d) (1) of that document, viz., that "at the end of twenty-five years this body (i.e., the electoral body designed for the satisfaction of Roman Catholics *as such*) shall cease to exist." The temporary arrangement which the signatories of that document offer in a spirit of liberality (in order to procure real effect for Fawcett's Act, by providing that, during the time in which Roman Catholics were securing their academic footing in Trinity College, they might have all the religious and moral security they could wish for) involves the danger that, under a changed political régime, it might by an abuse be maintained as a permanent condition. In the interests of the University, we desire all possible security against this. We do not fear or distrust our Roman Catholic fellow-countrymen, as we know them; but we do not know what new men in a new era might attempt.

(c) We desire that Trinity College should be the National University of Ireland. But we do not wish that it should dwindle into a petty or provincial institution. Its duty must continue to be in the future, as in the past, to focus and distribute the best results of all human thought. Its first business is with Ireland. But, to educate Ireland, it must be itself open to all educating influences. In other words, its eyes must not be always fixed on Ireland.

If it is to provide for the instruction of Irish youth in that which is materially and spiritually good for Ireland—in all Arts, Sciences, and branches of culture generally, it must keep in touch with the work of the great thinkers and Universities of the world. It should not, indeed, neglect or slight the national sentiment of this country. All that Ireland has to teach—her language, literature, and history—should be learned and treasured and taught in Trinity College; which should endeavour, with loving care, to preserve what is vital in them, and to inspire fresh life where it can. But no University could be worthy of Ireland which narrowed itself to Ireland only.

(d) In the past, although Trinity College has done little for Irish history, it has not neglected the study of the Irish language; and even in recent times distinguished Irish scholars have received their education in Irish within the walls of Trinity College. But such studies have, all the same, been on an unhappy footing here. This should be changed. I have never been in sympathy with those who wished to discourage the study of the Irish language. From the first, it was a mistaken policy; the objects which such persons had in view could have been better achieved by utilizing that language. The sense of national insult implied in such a policy has grown with the growing energy of the Irish people, and resentment has followed quickly on the perception of it. The Irish language should have been fostered from the beginning. But nations, like individuals, learn wisdom by experience; and on this subject there is little likelihood of difference of opinion in future.

(e) It may be said that, considering the dead weight of opposition to it that is offered or threatened, the scheme proposed in Document III. is bound to fail of its intended or of any good effect. But it seems, nevertheless, intrinsically sane and practicable; and what is so must prevail in the long run. Given a fair chance, and a fair time to operate in, this scheme should alter the aspect of the University Question entirely and permanently for the better. It aims at meeting the educational needs of the country as a whole; not of any one party or Church. Those who subscribe to it have sufficient confidence in the people of the United Kingdom, and, more particularly, in the people of Ireland, to believe that in doing so their motives at least will be justly appreciated.

(f) As for other schemes: that of a Roman Catholic University is not directly before us; and with regard to a "two-College" scheme for Dublin University, while raising no technical objection to this, I feel that it would have in practice results disastrous to Irish Education.

This statement of mine is chiefly the declaration of a faith which I share with many others in Trinity College. Wishing to be brief, I do not go into all heads of the general subject, or into details under any head.

Re-arrangements in the schools and faculties, if recommended, should be left to be determined by special committees to be appointed hereafter.

Much has been said as to the position of the Professors compared with that of the Fellows, and as to the mode of electing to Fellowships; and on these matters I, too, could say much; but I prefer here to leave the former of them untouched, and to regard the latter, though exceedingly important, as also one which should be dealt with by a special committee.

XVII.

XVII.

Statement with reference to the Classical School in Trinity College, Dublin, submitted by John I. Beare,* Esq., M.A., F.T.C.D., Regius Professor of Greek, and J. Gilbert Smyly, Esq., M.A., F.T.C.D., Professor of Latin.

TO THE MEMBERS OF THE ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, AND THE UNIVERSITY OF DUBLIN.

THE CLASSICAL SCHOOL IN TRINITY COLLEGE, DUBLIN.

GENTLEMEN,

We understand that our Classical School has been made the subject of disparaging criticism by one of those who have sent statements to the Commission. We do not think that this calls for any reply on our part; but it seems desirable to lay before the Commission, in a compendious form, the main facts as to the aims pursued, and the methods adopted, in the management of the School.†

The Pass work, in which French or German may be substituted for Greek, need not be noticed here.

At any time the Classical Honor School is under the immediate management of the Professors of Greek and Latin, together with the Term Honor Examiners. The Term Honor Examiners are liable to be changed by the appointment of different men for the duty every two or three years. Thus the Professors and these Honor Examiners constitute what is equivalent to a "Board of Studies" in Classics. If a particular change in the curriculum or teaching-methods of the School seems desirable, any member of this Board can bring the matter before his colleagues; it is talked over, and if there is agreement, in cases of importance requiring, *e.g.*, an alteration in the courses appointed, a motion to this effect is brought before the Academic Council, since no change can be introduced into any part of the undergraduate curriculum without the consent of this body; if the matter be less important, it is settled by private arrangement. The Classical Term Honor Examiners, without the Professors, arrange for and conduct the Term Honor Examinations, and report to the Senior Lecturer the results of such examinations. What is said here of the Board of Classical Studies applies equally to all the other Boards of Studies, *e.g.*, in Philosophy, History, Mathematics, etc., each of which consists of the Professor, or Professors, of each subject, with the Term Honor Examiners in the same subject for the time being. The members of each such Board, while fully responsible, are left with a great deal of freedom, and are not governed by a definite written code. They are not, for example, bound to confer with one another at any particular times, or to report periodically to the Council on the matters under their control; but they have to meet regularly in order to arrange and conduct the examinations of the year.

It has been necessary to give these details, and to dwell on them, because some assert that we have no Boards of Studies. It is true that we have not this name; but we have the thing, and though our Calendar does not contain a paragraph defining the duties of the various organising groups which we have described, yet these duties are well understood and discharged by the members of those groups themselves.

The Honor work consists of, or has reference to, the following, viz. :—

1. Honor Lectures and Examinations (each term).
2. The Examination for Scholarship (annual).
3. The Examination for Moderatorship (annual).
4. The Vice-Chancellor's Prizes for Greek and Latin Composition in prose and in verse (annual).

5. The Vice-Chancellor's Latin Medals (annual).
6. Bishop Berkeley's Gold Medals (annual).
7. The Mullins Classical Exhibition (triennial).
8. The Tyrrell Memorial Prize (biennial).
9. The Ferrar Memorial Prize in Comparative Etymology (annual).
10. The William Roberts Prize (annual).
11. The Marshall Porter Memorial Prize (annual).

The teaching of Classics in Secondary Schools is encouraged by Prizes offered at entrance for Composition in Greek and Latin Prose and Verse, and by the Examinations for Classical Scholarships and for Junior and School Exhibitions.

We give no Entrance Scholarships in Classics; there are now but few Irish schools accustomed to prepare boys in Classics up to a point which would justify us in awarding such Entrance Scholarships.

We have, therefore, to give students reading for Classical Scholarship the requisite teaching after they have matriculated.

The Honor teaching and Examinations for the first two years are intended to lead up to the Examination for Classical Scholarship, the best preparation for which consists in following the curriculum prescribed in Honor Classics for each Term, up to the Trinity Term of the Junior Sophister year. The subsequent Honor teaching and Examinations of the Sophister years lead up to the Examination for Moderatorship (with gold or silver medal), on which the Honor B.A. in Classics is given. These elements in the Classical course can be viewed separately or together. Each Honor course—the Honor course of any Term—may be considered as having a sort of completeness in itself; but the truest and best way of judging our Honor Classical arrangements is to consider all the courses together as parts of a whole; the idea of which is to introduce students to the best Greek and Latin Classics from Homer to Telemachus, and from Plautus to Juvenal and Tacitus, and fulfil itself in three and a half or four years. The Examinations for Scholarship and Moderatorship, as well as each Term Honor Examination, require on the student's part not only accurate knowledge of stated Classical books, and of a specified course in Ancient History or Literature, but also unprescribed translation, and composition in Greek and Latin prose and verse.

At each Term Honor Examination 20 marks out of 110 are given for *visa voce* translation; at the Scholarship Examination, 60 out of 250; and at the Moderatorship Examination, 60 out of 300. The requirement of oral translation, when thus limited, appears to us to have some very good effects. It tends to cultivate in the students the faculty of construing with grammatical accuracy, to produce readiness of expression, and thus to improve their knowledge of both Classics and English.

The courses for all these Examinations are detailed in the College Calendar. There are eight Examiners for Scholarship, six for Moderatorship, and three Term Honor Examiners.

* Mr. Beare's oral evidence will be found at page 296, *et seq.*

† 'School' as used here includes the teachers as well as the taught; all members of the University actively engaged within our walls in the pursuit of a branch of study.

Board of
Classical
Studies.

Entrance
Prizes and
Exhibitions.

Honor,
Scholar-
ship, and
Moderator-
ship Exa-
minations.

Prizes are given at the Michaelmas Honor Examinations to all students who obtain Honors. In the Senior Freshmen Class the student who comes first of the candidates for Honors in Michaelmas Term receives the William Roberts Prize.

The Marshall Porter Prize is awarded to the candidate for Classical Scholarship, who, having failed to obtain a Scholarship, has obtained the highest marks among the unsuccessful candidates, preference being given to those who have obtained the highest marks in Classical Composition.

Honor
Lectures.

There are three Term Honor Lecturers appointed by the Board of Trinity College, usually for two years. These Honor Lecturers are not necessarily identical with the Honor Examiners. Lectures are delivered by the Honor Lecturers in each term; they give instruction in a prescribed course, in more or less close connexion with the work for the Honor Examination of the succeeding term; but active and independent study on the part of the student himself is encouraged.

A separate Lecturer lectures all students in the various branches of Classical Honor Composition.

Lectures are delivered each Term for Classical Students by the Professor of Ancient History.

The attendance at all these lectures is usually good; at the lectures in Classical Composition it is very good.

Moderator-
ships.

The idea which underlies the Course for Moderatorships is that a student who takes a First Class Honor Degree in Classics should not only have a competent literary and grammatical knowledge of the principal works of the Greek and Latin Classical authors, and the power of writing Greek and Latin prose and verse; but should also have a sound knowledge of Greek and Latin Political and Literary History. This idea is expressed in the programme and conduct of the Moderatorship Examinations and Lectures.

Moderator-
ship
Lectures.

The lectures for Moderatorship Candidates are delivered by the Professors of Greek and Latin, who aim rather at imparting knowledge of the higher Classics generally, than at instructing the candidates in a few books. Many subjects are dealt with which could not be fully treated in lectures delivered to Junior students. The lecturer usually sets himself to deal with a period or subject, rather than a work or author. Last year the Regius Professor of Greek took for his subject the literature of the early Alexandrian period, and, with Callimachus (on whom he had to compile a series of introductory lectures) as his immediate text, tried to interest his class in the literary and scientific life of the early part of the third century B.C. at Alexandria; and the Professor of Latin delivered Lectures on Quintilian as a Literary Critic, and on the Fragments of Early Latin Poetry.

Scholarship candidates are introduced by the Professors to an acquaintance with the simpler forms of Palaeography; are taught, for example, to read with a fair amount of ease Greek minuscule hands of the ninth and tenth centuries, e.g., that of the Codex Clarkianus of Plato, phototype specimens of which are set before them. The Professors' moderatorship lectures aim at providing Moderatorship Candidates with the means of acquiring further knowledge of such things, and at encouraging them to cultivate this knowledge. The Professor of Greek exhibits to his class facsimiles such as that of the Bacchylides papyrus; the Professor of Latin exhibits original fragments of inscribed papyrus; and they endeavour to awaken the minds of those attending their lectures to an intelligent interest in matters of this kind.

The difficulty is to excite such interest in a subject for its own sake; to raise the student's mind above mere speculation as to what will 'pay' at the examination. This difficulty, as well as the necessity of giving instruction in the prescribed work (so as to save students the need and expense of having recourse to coaches), is found to hamper more or less the attempt to reach one's ideal of lecturing. Experience seems to show that, without the prescription of a certain amount of work, it is very difficult to produce accurate scholarship. The amount of prescribed translation, however, bears only a small proportion (20 per

cent.) to the whole work of Candidates for Moderatorship.

At each of our three most important Classical Examinations—those for Scholarship, Moderatorship, and Fellowship—the writing of an English essay, generally on a subject connected with Classics, forms an important item, for which high marks are given. At all examinations, in marking papers of translation from Classics into English, attention is paid to style.

The Fellowship Examination in Classics, for which no authors are prescribed, aims at the selection, as far as possible, of Classical men who, besides a competent power of writing Greek and Latin prose and verse, have an accurate and complete literary and grammatical knowledge of all the Greek and Latin writers of the Classical periods; and also a competent acquaintance with many important authors lying outside those limits. The Classical Fellow is expected to have a thorough knowledge of all the Classical authors, because he may be called on to deliver Honor Lectures on, or in reference to, any of the Classical Courses set, and these Courses are subject to alteration from time to time. Classical Fellowship candidates usually take up, together with Classics, Ancient and Modern Philosophy, and Ancient History. The knowledge thus acquired is intended to be a basis for future development in particular directions, e.g. in Pure Classics, History, Philosophy, etc.

Original work on the part of Students in the Classical School (apart from the stimulus given by particular lecturers and by the annual publication of *Hermathena*) is encouraged chiefly by—

The
Fellowship
Examination
in
Classics.

Encourage-
ment of
original
work in
Classics.

The Vice-Chancellor's Prizes for the best original Greek and Latin Essays and Poems sent in annually on specified subjects, of which six months' public notice is given. The Examiners for these prizes are the Professors of Greek, Latin, and English Literature.

The Mullins Classical Exhibition, awarded triennially on the answering in a prescribed Course of Greek and Latin authors not included in the general University Curriculum (Julian and Ammianus Marcellinus at present), together with a dissertation (which is an essential part of the examination) on any subject of historical importance belonging to a given period (at present the fourth century A.D.). Both these examinations have the effect of stimulating men to do good work.

The Tyrrell Memorial Prize, offered biennially for the best translations of set passages into Greek and Latin Prose and Verse.

The Berkeley and Vice-Chancellor's Medals, given for minute and critical knowledge of special authors, or portions of authors, Greek and Latin respectively. Sophocles was specified as the subject for the former, and Quintilian, *Institutio*, for the latter, in the present year. These Medals have the good effect of securing on the part of every student who obtains them (for they are not awarded unless positive merit of a high order be shown) really sound knowledge of some important classical work. The best men compete for them, and they are highly esteemed.

All these prizes are generally competed for by senior students, including graduates, though all competitors must be under M.A. standing. The work prescribed for them—the courses of study, subjects for essays, or pieces for prize translations—not being part of the work required for graduation, is under the control, not of the Council, but of the Professors, whose duty it is to arrange it each year, or from time to time as required.

The annual publication of *Hermathena* (the expense of which is borne chiefly by the *Cista Communis*) has a stimulating effect upon the members of our Classical School, to which its principal contributors belong. It usually contains original articles on classical subjects. For example, in the present number, to appear this month, there are, among others, papers with the following titles:—"On the Historia Augusta," "On Attic Prose Rhythm," "Notes on Apuleius' *Metamorphoses*," "The Revenue Years of Philadelphus, Euergetes I, and Philopator," "Medial Vowel-Syncope

"Hermathena."

Duties and occupations of Professors apart from lectures and examinations.

Lectureship in Archaeology.

Trinity College Classical Society.

in Latin," "Mr. Archer-Hind's Translations into Greek Verse and Prose," "Isaeus and Attic Law." Except the two first, all these are written by members of our School.

Each of the Classical Professors, besides lecturing and examining, assists students with advice and encouragement as far as it is in his power; and each in his own department is regularly engaged in the production of work intended for publication.

The Board of Trinity College have passed a resolution founding a Lectureship in Archaeology; and it is hoped that in a very short time this subject will be developed in proportion to its importance; and that it will here, as elsewhere, help to increase the sum of human interest attaching to the higher Classical studies.

The first steps have also been taken, for the founding of an organised Society of which all Students of Classics in Trinity College shall be members. This Society will be managed entirely by a President, Officers, and Council chosen by the members them-

selves. At its periodical meetings (to be arranged according to Programme by the Council of the Society) the subjects of interest to be brought forward, by reading of papers or otherwise, will embrace:—

- (a) Pure Classics with Criticism and Translation;
- (b) Archaeology, Epigraphy, Palaeography, Study of Papyri;
- (c) Classical History and Literature;
- (d) Classical Art and Science;
- (e) Classical Philosophy;
- (f) Classical Drama—its modern staging and representation.

Supplementary Statement submitted by E. J. Gwynn, Esq., M.A., F.T.C.D.*

(See Mr. Gwynn's evidence, page 66.)

ON THE TEACHING OF ARTS SUBJECTS IN TRINITY COLLEGE.

I have been asked by Dr. Coffey to make a return showing "how the courses which comprise the instruction in the Faculty of Arts are conducted": and he further divided his question into three heads, namely:

- (1) How these subjects are taught;
- (2) by whom they are taught and lectured on;
- (3) their relation to the B.A. Degree.

Before supplying answers to these questions in tabular form I desire to make some general remarks.

There is no separate "Faculty of Arts" in the University of Dublin, and though we habitually speak of "Arts lectures," it is difficult to obtain a satisfactory definition of this expression. The term "Arts" is generally understood to denote those subjects which form part of a general education as distinguished from those which make up the training required for some special profession. Thus, Logic is universally regarded as an Arts subject, and Surgery as a professional subject. But it is not so easy to decide in which category such subjects as Physiology, Geology, or Political Science should be placed. These studies may have been introduced into the University in connection with some particular professional school, and yet may be well adapted to form part of a general education. Nor can a satisfactory division be obtained by distinguishing the subjects which enter into the curriculum for an Arts Degree from those which are required for a professional degree, since many subjects which are recognised as part of the Arts Course are also necessary parts of some professional course; while other subjects which can only be reckoned as belonging to Arts do not form part of any of the courses for an Arts degree—such are Spanish and Hebrew.

For the purpose of the present Statement "Arts" is regarded as a term including all subjects which are not confined to the curriculum of a single professional school.

These subjects are taught partly by the Fellows, partly by Professors. In earlier days all the Arts teaching was given by the Fellows, each of whom was expected to be able to teach any of the branches of the *trivium*. Then, as the growth of scientific knowledge rendered specialisation necessary a distinction grew up between classical and scientific (or mathematical) Fellows. This distinction, however, is merely

customary, and there are still some Fellows qualified to teach both Classics and Mathematics.

Although the Arts Course has been gradually widened, the subjects of the Fellowship Examination have remained unaltered for more than fifty years.

The consequence of the gradual and unsystematic growth of the Professoriate was that its teaching functions are inextricably entangled with those of the Fellows. Some Professorships (as the Chairs of Greek and Latin), can, by statute, be held only by Fellows. Others to which a very small stipend is attached, are practically confined to the Fellows. It would, for instance, be impossible to procure an outsider competent to discharge the functions of the Professors of Hebrew and Ancient History for the salaries annexed to their Chairs. Again, in several cases it happens that a subject is taught partly by Fellows, partly by Professors or Lecturers who are not Fellows. In the annexed Table (A) I have noted the cases in which a Professor or Lecturer is also a Fellow.

It would be difficult to compute exactly the number of hours' teaching given by each teacher in each subject; but the main part of our Arts teaching is certainly given by the Junior Fellows. Apart from such Professorships, Lectureships, etc., as they may happen to hold, it is the regular duty of Tutor Fellows to lecture during term two hours daily in one or more Arts subjects, which include Mathematics, Classics, Logics and Ethics, Experimental Physics, French, and English Composition. These are the chief, though by no means the only subjects which enter into the course for an Arts Degree. The other subjects (as German, Chemistry, etc.), are taught by the Professors and their assistants. All compulsory subjects in the ordinary B.A. Degree Course are taught exclusively by Fellows; and these are, of course, the subjects in which most teaching is required.

As I have elsewhere joined in recommending extensive changes in our Fellowship system, I should like here to point out that the system as it stands has one great practical merit which it would be a pity to lose. The all-round training required from candidates for Fellowship secures for the College a body of teachers each of whom is able to give instruction in more than one subject. This gives our teaching arrangements an elasticity which a thoroughly specialised system could hardly achieve except at a much greater cost. It should be remembered also that besides the regular "tutorial" teaching the Tutor-Fellows do a great deal of work in the professional Schools. The annexed table (A) takes account only of such teaching as may be considered to belong to the Arts course, and excludes all that is intended for professional students only.

* Mr. Gwynn also furnished a Statement printed in the Appendix to the First Report (Cd. 3176), 1906, page 42.

In the annexed Table (A) I have distinguished Prelections by which I understand set and continuous lectures, from class teaching, which is carried on by a more conversational method, usually by question and answer.

Only the more general divisions of subjects are given: Experimental Physics, for instance, includes many sub-divisions, such as Heat, Magnetism, etc.

A.

Subject.	How Taught.	By whom Taught.
Mathematics (Pure and Applied).	Class Lectures (Honor and Pass.)	Erasmus Smith's Professor of Mathematics; Donegal Lecturer; Professor of Natural Philosophy (all these are Junior Fellows); the Royal Astronomer; the Tutorial Staff.
Experimental Physics.	Prelections; Class Lectures for Honor Students; Demonstrations, and practical work.	Professor of Experimental Physics (a Junior Fellow), with two Assistants.
Chemistry.	Prelections; Class Lectures for Honor Students; Demonstrations, and practical work.	Professor of Chemistry; the Professor of Applied Chemistry; one Assistant; one Demonstrator.
Zoology.	Prelections; Class Lectures, and Demonstrations, and practical work.	Professor of Zoology and Comparative Anatomy, with one Assistant.
Botany.	Prelections; Class Lectures, and Demonstrations, and practical work.	Professor of Botany; one Assistant, and Demonstrators.
Geology.	Prelections and Demonstrations, and practical work.	Professor of Geology.
Classics.	Class Lectures (Honor and Pass) and Lectures in Composition.	Professor of Greek; Professor of Latin (both Junior Fellows) the Tutorial Staff.
French.	Class Lectures (Honor and Pass).	Professor of Romance Languages; Assistant Lecturer in French; the Tutorial Staff.
German.	Class Lectures (Honor and Pass).	Professor of German.
English Literature.	Prelections. . . .	Professor of English Literature.
English Composition.	Class Lectures. . . .	The Tutorial Staff.
Celtic Languages.	Class Lectures. . . .	Professor of Irish; Lecturer in Celtic.
Dutch. . . .	Class Lectures. . . .	Lecturer in Dutch.
Sanskrit and Indian Languages.	Class Lectures. . . .	Professor of Sanskrit; Reader in Tamil and Telugu; Professor of Arabic, Persian, and Hindustani.
Hebrew.	Class Lectures. . . .	Professor of Hebrew (a Junior Fellow); three Lecturers in Hebrew (two are Junior Fellows).
Syriac.	Class Lectures. . . .	Professor of Hebrew.
Arabic and Persian.	Class Lectures. . . .	Professor of Arabic, Persian, and Hindustani.
History.	Class Lectures and Prelections.	Professor of Modern History, with one Assistant; Professor of Ancient History (a Junior Fellow).
Comparative Grammar.	Class Lectures. . . .	Professor of Sanskrit.
Political Economy, and Political Science.	Class Lectures. . . .	Professor of Political Economy.
Mental and Moral Science.	Prelections; Class Lectures (Honor and Pass).	Professor of Moral Philosophy (a Junior Fellow); the Tutorial Staff.
Theory of Education.	Prelections and Class Lectures.	Professor of Education (a Junior Fellow).
Music. . . .	Prelections. . . .	Professor of Music.

B.

The relation of each subject to the course for the ordinary B.A. Degree is best exhibited in the following syllabus:—

Junior Freshman Year.

Geometry, Arithmetic, Algebra, Trigonometry. Latin, and either Greek, French, or German. English Composition (the subjects being chosen from prescribed books).

Senior Freshman Year.

Geometry, Arithmetic, Algebra, Trigonometry, Mechanics. Formal Logic. Latin, and either Greek, French, or German. English Composition (as above).

Junior Sophister Year.

Mechanics, Hydrostatics, Optics, Astronomy. Logics (i.e., Formal Logic and Psychology). English Composition (as above). And one of the following optional subjects:

1. Languages (any two of these, viz; Greek, Latin, French, German).
2. Experimental Science.
3. Natural Science.
4. History.

Senior Sophister Year and Degree Examination.

Astronomy.

Ethics and Logics.

English Composition (as above).

And two of the following optional subjects:

1. Languages (as in Junior Sophister Year).
2. Mathematical Physics (Mechanics, Hydrostatics, and Optics).
3. Experimental Science.
4. Natural Science.
5. History and Political Science.

The Tutorial lectures deal with the new business of each term in Science (i.e., Mathematics, or Logics and Ethics) and with the set courses in Languages.

Professional students are excused the optional subject in the Junior Sophister Year, and are only required to take one optional subject in the Senior Sophister Year.

A special Arts Course has lately been arranged for Medical Students, which is somewhat lighter than that which other professional students have to take.

Honor Degrees are given in nine different courses, viz.—Mathematics, Classics, Logics and Ethics, Experimental Science, Natural Science, History and Political Science, Legal and Political Science, Modern Literature, and Engineering Science.

But candidates for Honor Degrees must have taken out the ordinary Pass Course up to the Degree Examination.

SECTION C.

XIX.

Supplementary Statement submitted by the Rev. W. R. Westropp Roberts, B.D., F.T.C.D.*

To the Members of the Royal Commission on Trinity College, Dublin, and the University of Dublin.

GENTLEMEN,

As the evidence which has lately been laid before you by some Fellows and Professors of Trinity College appears to indicate a spirit of hostility to the Board as well as a desire for drastic changes in the Constitution of the Governing Body, I beg to submit the following statement of my views on this and on some other matters of importance.

The attacks which have been made, from time to time, upon the system of Government by a Board consisting of the Provost and seven Senior Fellows, are of old standing and have culminated in the evidence submitted to you some few months ago.

In estimating the value of such evidence, I have little doubt that the Commissioners will bear in mind the fact that no specific instance has been adduced in which the present Board has failed in the performance of its duty or neglected to promote the interests of Higher Education in Ireland.

In proof of what I assert, you have only to consult the Calendar for 1906-7, and compare it with that of 1896-7, to learn what progressive steps have been made under the present Board, or under the influence of its members, before they had a voice in the government of the College.

When we consider the present condition of our Schools, the instruction now given in our Army Classes, the changes which have been introduced into our Sizarship Examinations, the wider sphere of the influence of our University, we feel it is idle to assert that the Board is without initiative or unprogressive.

Again, when we contemplate the Chairs which have been founded by the Board at the suggestion of Junior Fellows and Professors, and the valuable Exhibitions awarded to students from South Africa, we learn how ready the present Board has been to adopt any scheme which has for its object the advancement of Education and the interests of the University.

But, it is urged, the Board is composed of men of advanced age, who take no part in teaching, and are not in contact with the students.

Well, I reply, at no period of life is a man better fitted to govern than between the ages of sixty and seventy.

Human nature and human capacity for action are to-day very much what they have always been in the civilised world.

Aristotle says, somewhere, that wealth must be possessed before leisure can be obtained; and until leisure be obtained, office ought not to be courted, since he who is oppressed by private concerns cannot be expected to manage public affairs either wisely or faithfully; while Cicero points out that old age is the time for great achievements, and that experience and wisdom are of greater value than bodily vigour:—

"Non viribus aut velocitatibus aut celeritate corporum res magnae geruntur, sed consilio, auctoritate, sententia; quibus non modo non orbari, sed etiam augeri senectus solet."

The wit of man can devise no system which does not admit of some adverse criticism; but the present system of election to the Board appears to me to be open to fewer objections than any other scheme which has been laid before you. For the process by which a Junior Fellow becomes a member of the Board is practically an automatic one, and possesses the great advantage that no religious or personal element is involved in his election. Further, the elected member takes his seat on the Board with a full and intimate knowledge of the work he may be called upon to perform as Senior Lecturer, Registrar, or Senior Dean, and, if he be in Holy Orders, as Catechist.

With regard to the office of Bursar, the financial administration has been conducted in such a manner, in nearly every case, as to reflect both honour and credit upon that officer.

One of the chief advantages of the system is that the Senior Fellows are not called upon to lecture, and, in consequence, they have that leisure which enables them to devote themselves to questions of Administration and of Higher Education.

Consider but one of the many evils which would result from an elective Board and officers. We should have a Senior Lecturer of junior standing on the College books giving orders to his seniors, who should

obtain the permission of their junior to absent themselves in case they found it inconvenient to examine at the time stated on their notice paper.

Again, it is the invariable rule that the senior in Hall shall be consulted on all points of discipline which may arise.

Is this rule to be abrogated in the case of an elected Senior Lecturer, and if abrogated in one case, what will be the effect on College discipline?

Suppose it was agreed that one of His Majesty's regiments should be commanded by an officer elected by his fellows, and that a popular subaltern was selected for the post, what, we may ask, would be the state of discipline in that regiment in a week's time?

In reviewing the various schemes for reformation which have been laid before the Commission, I find that the greater number of them contain a mass of hostile and destructive criticism on existing systems; and although they supply many valuable suggestions, yet they fail to show how the changes therein contemplated are financially possible.

To those who cry out for an elective Board and the retirement of Fellows at the age of sixty-five, I ask but one question, "How do you propose to finance your scheme?"

The cost of the retirement of a Senior Fellow is about £1,100 per annum, and from what source this expenditure is to come, when the number of Fellows retired exceeds four, I fail to see, unless it comes out of the pockets of the Junior Fellows who advocate such a scheme.

One scheme stands out conspicuously from the rest, as financially perfect and equitable in all its bearings, for in it the vested and prospective interests of all whom it may concern are provided for and carefully guarded. Any measure which did not protect these interests would seriously affect the future welfare of the College. Surely any young man of ability who now contemplates reading for Fellowship, would reconsider his decision if he saw vested interests disregarded and changes introduced which were calculated to affect adversely the prospects of the present Fellows.

In all probability he would seek another field for the exercise of his talents, such as the Indian Civil Service or the Bar, in both of which professions the prizes to be obtained are far superior to those which Trinity College has to offer, and the tenure of which is secure.

I am strongly of opinion that the scheme of Dr. Tarleton, to which I refer, can be so modified by adopting some of the suggestions of my colleagues, as to furnish no reasonable ground for complaint on the part of either Junior Fellows or Professors.

The modifications I suggest are as follows:—

The Constitution of the Senate shall remain as at present; and it shall occupy the same relations to the new Board as it does to the existing Board, save that it shall elect one representative from among the Fellows to sit on the new Board or General Governing Body.

The Board of Trinity College shall consist of—

A.

The Provost and seven Senior Fellows, who shall constitute a central body, having control over all the finances of the College, and performing all the duties now performed by the present Board, save so far as herein expressly stated.

B.

The Junior Fellow elected by the Senate. A representative of each of the Faculties of Arts, Science, Law, Medicine, and Engineering. The Regius Professor of Divinity.

The General Governing Body shall appoint the Provisional Fellows, the Junior Fellows, and all Professors save the Professors in the School of Divinity, who shall be appointed by a Committee, consisting of the Provost, the seven senior of the Fellows who are members of the Church of Ireland, the Archbishop of Dublin, and three Bishops of the Church of Ireland, elected by the General Synod. It shall also deal with all modifications of the Courses prescribed by the various Faculties which may, from time to time, become necessary.

* The Rev. W. R. Westropp Roberts also furnished a Statement, printed in the Appendix to the First Report (Cd. 3176), page 63.
† Appendix to First Report (Cd. 3176), 1906, page 63.

The General Board shall elect an official, who shall not be a Senior Fellow, to act as Registrar, at a salary of £400 per annum. In the event of a Junior Fellow being elected, he shall receive a salary of £200 per annum.

A new office shall be created, to be held only by a Senior Fellow, of Secretary to the Board, the salary attached to which shall be £100 per annum.

The Senior Fellow elected to the office of Secretary to the Board, shall be compensated for by the loss of income arising from the smaller salary attached to the new office.

The Junior Fellow elected by the Senate and each representative of the Faculties of Arts, Science, Law, Medicine, and Engineering shall receive an *honorarium* of £25 per annum.

The Provost and seven Senior Fellows shall meet on Saturdays for the transaction of business, as at present, and at all other times when convened by the Provost.

The General Board shall be convened by the Provost, or by the Secretary to the Board, on receipt of a written requisition signed by any three Members of the General Board.

The proposed alterations in Dr. Tarleton's scheme offer no financial difficulties. In Dr. Tarleton's scheme £400 per annum is allowed for salaries of elected members of the Board, while I suggest that the above-mentioned Elected Members shall together

receive a sum of £150 per annum, thus leaving a yearly gain to the Cista Communis of £250 per annum.

In the event of a Junior Fellow being selected as Registrar, £200 per annum of this yearly gain shall be paid to him as salary, thus leaving a yearly gain of £50 per annum to the Cista Communis. Of the £300 per annum now paid to the Senior Fellow who acts as Registrar, £100 per annum shall be paid to him as Secretary to the Board, and £200 per annum as compensation for loss.

In the final state of affairs, the yearly gain to the Cista Communis will consequently be £250.

I have drawn attention only to such modifications of Dr. Tarleton's scheme as seem to me to be desirable; in all other respects I hold that the scheme should be accepted as it stands.

In conclusion, I earnestly ask the Commission to modify but not to destroy the existing system of government; for I am convinced that the plan of an elective Board, any member of which was entitled to an office as such, would lead to corruption, and be subversive of all discipline.

I am, Gentlemen,

Your obedient Servant,

W. R. WESTROPP ROBERTS, F.T.C.D.

Statement submitted by J. Joly, Esq., Sc.D., F.R.S., Professor of Geology and Mineralogy in the University of Dublin,*

DOCUMENTS.
SECTION C.
XX

On the place which TRINITY COLLEGE, DUBLIN, and the UNIVERSITY OF DUBLIN, hold as organs of the HIGHER EDUCATION in IRELAND, and the steps proper to be taken to increase their usefulness to the country.

(1) I would gladly have put forward my ideas on the above matters solely from the constructive side, and without criticising the views of colleagues whom I greatly respect. But this is impossible. I, therefore, have to consider a proposition which has been put forward (Document III.†) to widen the constitution of the University and the College, so that both Protestants and Roman Catholics may govern these institutions, and both may feel them to be theirs. The constructive suggestions I have to offer come later. They deal with an aspect of the University question which, in my opinion, has been too much lost sight of: the duality of the requirements of the Roman Catholic laity so far as higher education is concerned.

(2) My argument is mainly directed to the following considerations:—

I place our freedom of opinion and thought in the forefront of our possessions, regarding it as an heirloom of which we in our generation are but the custodians. This inheritance, which can hardly be defined, is yet the soul of all our work for progress. Take it away, and there is nothing left worth fighting about. In sharp contrast is the ideal which the Roman Church recognises. Reconciliation between these opposed ideals is impossible.

A certain scheme of "widening" the constitution of Trinity College (Doc. III.) is not consistent with the safety of our educational ideals, and must therefore be rejected if for this reason only. Even if the old spirit of freedom ultimately prevailed, this scheme must almost certainly result in the introduction of contention on the Governing Body. It, furthermore, suggests an element as part electorate of this body, which at the best is incompetent.

If the University of Dublin is to be made available for the bulk of the Roman Catholic laity not only must the spirit of its education be radically altered, but also its scope and type. In a word, the only University in Ireland available for the higher professional classes, both Protestant and Roman Catholic, must be swept away.

These premises alone lead to a conclusion which has to take into account three elements, two of which are the Protestant and Roman Catholic professional classes, and the third is the great majority of the Roman Catholic laity. The first two should find their

wants supplied in Trinity College; the last appeals to the State on just and sufficient grounds for the type of University education adapted to its needs.

What follows is mainly concerned with these heads in the order in which I have stated them.

(3.) Since the period immediately succeeding the Reformation two theories of education, becoming more strongly differentiated as time went on, have striven for mastery in Northern and Western Europe. There is no doubt that the most liberal of these was early associated with Protestantism. This in many parts of the world has continued to be the case, at the voluntary desire of the Roman Catholic Church. Liberal education—based on the right to think for oneself—is, on the Roman Catholic theory, "dangerous to faith and morals." Protestants do not generally think so.

In Trinity College—a Protestant foundation—independence of judgment is at the basis of our education. We do not expect men of research to work under a control which will not listen to evidence, but silences by rule of dogma. We consider that to hamper honest enquiry in this way is both injurious and immoral. We believe that to teach the students the facts of Science, and at the same time train him to close his eyes to obvious deductions is a sort of education which is fatal to the development of independence and rationality—the most important faculties concerned in research. From our point of view, such an education is deficient. We freely admit, indeed, the honesty of those who, brought up on different ideals, hold that the dogma which they believe alone protects faith and morals must be placed in the supreme position, and must defend itself at all costs.

In the event of our freedom being taken from us, then will our degrees denote a new thing; our tradition will be broken; our prestige, which cannot descend to unlawful heirs, will become but a memory. The principle at stake is no more nor less than that which brought almost the entire staff of the University and the College to make protest against a sister college being introduced into the University wherein admission to the Governing Body might in theory or in practice be by any other road save that of academic merit only.

This is the *status quo* so far as the existing University of Dublin is concerned.

* Professor Joly's oral evidence will be found at page 50 *et seq.*

DOCUMENTS.
SECTION C.
XX

(4.) At the sittings of the last University Commission several questions were directed to ascertain how far the education given in a University of the type asked for by the Roman Catholic laity and clergy would be free from clerical control. In my opinion, the substance of the answers indicate views on the matter quite incompatible with the existing ideals of Trinity College.

The learned and reverend President of the Catholic University is asked—"Would you allow him (the Professor) to teach as a scientific possibility, to say nothing more, that the human species was developed in that way (Darwin's Theory of Natural Selection) from lower organisms—in the same way as the development of other species can be traced?" The answer is—"If he advanced as a mere speculative theory that there appeared to be a considerable body of evidence to suppose that the human body may have been developed from some simious animal, I should say he was trenching on dangerous ground; but I should see before condemning him that his teaching was not merely in discord with my own general opinion, but condemned by the Catholic Church in that particular form."

In other words, it is not a question of the right of evolution to rank as a credible generalisation on the support of facts of Palæontology, Embryology, and Comparative Anatomy. It is not a question of the weight of scientific authority in its favour. The question is whether or not, in the judgment of theologians, it is contrary to their reading of Scripture. I ask with the greatest personal respect for the learned and reverend gentleman who answered these questions:—How far is this an advance on the days of Galileo? Was he not convicted "of believing and holding the doctrines—false and contrary to the Divine Scriptures—that the sun is the centre of the world, and that it does not move from east to west, and that the earth does move, and is not the centre of the world." (Berry, *Hist. of Astronomy*, 1898.)

The evidence of the Bishop of Limerick is quite consistent with this position, and fully supports it. "I would let him (Huxley) go on as long as his science did not come in contact with Revelation." And again—"It is only when scientific men begin to philosophise, when they give up science and become philosophers, that a difficulty exists." (754.) They are, in short, not to think!

Of course, from the point of view of one holding the faith of the Roman Catholic Church the position of Dr. Delany towards evolution is quite logical. The Congregation of the Index is still sitting. The Church alone can pronounce on these things. I do not assail the faith held by the reverend gentlemen. But I say that in not one of the great Universities of England, Germany, or America, would such a restriction on the teaching of a scientific man be tolerated. Even were the student of Biology destined to be but a spectator of its triumphs all his days, his mental attitude would be considered lamentably deficient without full and clear understanding of the evidence for Evolution—evidence not directed towards the "antidote," but calm, judicial, scientific evidence.

I ask now if in a future Trinity College, subject to such ideals of higher education, we might welcome to our halls a Darwin or a Mathew Arnold, a Kant or a Hallam. Would such men find a home where their greatness would meet honour—their work recognition? Kant, Hallam, Herbert Spencer, are on the Index. Our poor, unwise Oliver Goldsmith is in the Index. Would Lecky sit at our Library door to uplift our hearts to higher things under a regime which may not teach from Kant or Hallam save with the antidote at hand?

The answers to such questions must negative all hope of reconciliation between the Roman Catholic ideal and ours.

(5.) I have now to consider how far a particular scheme for "widening the Constitution of Trinity College, Dublin" (Document III.*), would be likely to result in the radical alteration of our prevailing freedom of education.

I will assume that the scheme is accepted both by Bishops and laity of the Roman Catholic Church. From its intrinsic nature it is intended so to be. Its full and adequate realisation is obviously impossible without the acceptance of both bodies. My remarks then apply, and apply only, to the conditions attending present or future acceptance by both divisions of the educated Roman Catholics of Ireland.

The Memorial proposes that a part—five out of twenty, for instance—of the Governing Body is to be elected by an outside body of fifty electors. The qualifications of these electors are not named, but ten may be ecclesiastics. The difficulty of picking this body, in Ireland, will be considerable—almost as great as confronted Mr. Gladstone in 1873 when asked to name the Council of his projected "widened" University. But whoever may be chosen, or may accept office upon it, the functions assigned to it, its *raison d'être*, involve that it be mainly Roman Catholic, and that the Roman Catholics be, of course, orthodox; otherwise grave dissatisfaction must be created among the body it is most desired to conciliate. The elected Ecclesiastics will, of course, include Roman Catholic Bishops and, logically, these should constitute a majority of the Ecclesiastical element. These predictions will not, I think, be disputed.

The next question is who will they select to serve on the Governing Body? If the Hierarchy desire that some of their number should sit on the Governing Body could the Roman Catholic lay members of the electorate object—would they be justified in objecting? I think when these matters are carefully considered the conclusion we arrive at, as most probable, is that the representatives of the fifty would be Roman Catholic laymen approved of by the Bishops, along with, perhaps, two of the Bishops or other Ecclesiastics at present associated with educational matters. I consider that this section of the future Governing Body of Trinity College cannot be reckoned upon to uphold our existing freedom of teaching, but on the contrary must accept office in a spirit of duty towards the faith that was in them to make the University acceptable to Roman Catholic ideals. I speak both of the elected laity and of the elected Ecclesiastics. Thus, the Most Rev. Dr. O'Dwyer at the last Commission is asked (571)—"You admit that you desire the laity to be on the Governing Body?" Ans.—"Decidedly."

(572) "You also admit that probably they would follow the Bishops in questions of faith and morals?" Ans.—"It is extremely likely."

Those who do not wilfully close their eyes must recognise that the whole question of this or that sort of education is, in the eyes of a devout Roman Catholic, one of "faith and morals."

This body is to exist for twenty-five years only. On this shadowy and evanescent protection, it would appear, support was in many cases given to a proposal which certainly both "in theory and practice," admits those upon the Governing Body who may or may not have a claim to academic distinction. I say evanescent, for supposing that Roman Catholic students did not come in according to anticipations, would it not be urged that the spirit of the concessions of 1906 certainly justified a renewal of the safeguards to Roman Catholic influence?—One generation is not tied by the promises of the preceding, and, moreover, it would be a just and adequate contention and fairly based on the spirit of the concessions.

But this is not to be the only avenue of access to the Governing Body. Even the laity object that this would not be nearly enough. The means of obtaining a *pro rata* representation upon the Governing Body must be provided, and one which will come into force so fast as the basis of representation—the number and merit of Roman Catholic students—broadens in the University—i.e., it is to be "according to number and academic merit."

The only suggestion put forward to attain this condition is that a Guild of Moderators should be formed who, as their numbers increase, are to obtain an increased franchise till ultimately when the external electorate of fifty shall have been dissolved six out of the twenty are to be elected by them.

The Moderator has been four years in College. He has distinguished himself at his final examination, but the distinction need by no means be of high order. In many cases—in most cases, I think—he is still in a professional school. I lecture Moderators every year. It is not definitely stated from what body they elect, but my class will certainly have votes to elect my masters, possibly to support my own candidature or the reverse; and they will necessarily possess influence to use against me if I am not popular. But this is not the most serious aspect of the proposal. It must be borne in mind that there has been careful supervision of the religious education of these students all along. Their religious monitors and guides are round about them, and live with them. The dependence of

youth has not given place to the self-reliance of later years. How much independent judgment must we expect from such an electorate?

This is no exaggeration of the conditions attending this remarkable "illustration" of what is intended. The older Moderators will have scattered far and wide, as they do at present. Of these still within reach of Dublin but a few could be reckoned upon as caring to interfere. The Moderators of at most two or three years' standing, many of whom, as I say, will be in the professional schools, will control the election. On existing data they will be from 70 to 90 in number. Is there any need of criticising further? Where in the world is there a University which places an issue so grave in so juvenile an electorate? Many will be barely twenty-two years of age. They will elect nearly one-third of the Governing Body perhaps from their own number! What will they know of the larger questions of University education? What can they know of the views of the adult world as we hear them at our academiés and our Royal Societies, or read of them in our journals and reviews—young men struggling to establish themselves in professional life. Nay, it is a particularly dangerous electorate, for there is a considerable body of students who, in our Debating Societies, talk themselves and each other into the belief that they know a great deal about these things, and many other things, too. In any country such influence placed in such a body would be perilous on account of its youth and inexperience; but in a country where religious and political differences are heated as they are in Ireland, and have been for generations, even the element of independent judgment and impartiality might be wanting. I believe that if the ascendancy of this or that party in the University was a matter of contention, the most injurious consequences to discipline and the proper relations of student and teacher must arise. It may be said this was only an "illustration." Then why put forward one so unfortunate if better was forthcoming?

Lastly, a junior body of the teachers are to elect seven of the twenty when the twenty-five years are expired. As by that time twenty-five new Fellows will have been appointed, and not less than nine out of the existing eleven whole-time Chairs will have been vacated, this junior body will be entirely new. If it is largely Roman Catholic then the possibility of seven more seats in denominational interests is to be considered. It is, again, not definitely stated who is to be elected. But let us assume that it is intended that representatives as well as electorate are to be of the staff. Then we have to consider what interests and ideals will sway the electors and elected some twenty-five years hence.

Those who advocate a widened Trinity College possess in their minds a certain ideal of a Roman Catholic colleague. They endow him with all the aspirations and views they would wish him to have on educational matters. They think that the circumstances, chiefly the modifying and harmonising influences of social life in Trinity College, must develop the sort of competitor for Fellowship or Professorship they would approve of. I fully agree that in the keeping of such men our freedom, our liberty of thought, would be perfectly safe. The question is will we, under the altered circumstances, get these men?—I do not think so.

For the training of Roman Catholic students into these ideals is just what the ecclesiastical influence will naturally—and, from its point of view, rightly—set itself to counteract. When, therefore, in all good faith the advocates of this mode of widening Trinity College make offers which they do not represent to themselves as working out in the orthodox Roman Catholic way, do they not reckon without their host? They entirely forget that hitherto there has been no inducement for the kind and degree of interference with the University life of young Roman Catholics which must prevail in the future. Do they imagine that, with the means put into their hands, the Roman Catholic Bishops are going to so far lay aside the doctrines of their Church, their age-long attitude towards education, as to permit, if they can prevent it, a staff of men of this sort springing up in the National University—men who will ultimately largely control the destinies of their Church so far as educated Ireland is concerned? If the Hierarchy accept the concessions now suggested it will certainly not be with such an end

in view. In the future Trinity College there will be the Advisory Board, the Roman Catholic Catechists (presumably), and the Clerical Staff of the Faculty of Theology to attend to the safeguards of the Roman Catholic student. Will the zealous men who take part in this work suffer the student coming up from the Roman Catholic School to go adrift? Would they be acting conscientiously in doing so? Guilds or societies will be formed wherein these young men will meet each other, and hostels for residence will unite their lives. Meanwhile, the growing Roman Catholic influence on the Governing Body will surely befriend the efforts in defence of "faith and morals."

Whether the Hierarchy accepted the widening proposals willingly or unwillingly the course of action I have sketched is incumbent upon them. They at present have their fears for the future, as, I believe, we may well have ours. That the acceptance by the Hierarchy must involve a struggle between the advocates of the two ideals of education I am convinced. I am also convinced that we would die hard. The result ultimately arrived at would turn largely upon how many Roman Catholic students came in. Will it be Dr. O'Dwyer's 2,000? Or at the first the 1,000 or 700 he thinks a University for Roman Catholics would start with. Such numbers would rapidly dissipate the Protestant atmosphere, and, I believe, substitute a very different one. A few Roman Catholics would be assimilated easily enough. But my argument is not directed to the conditions attending rejection, but to *energetic acceptance*, be this willing or unwilling.

I do not mean there would be a Donnybrook Fair in Trinity College. The struggle would go on beneath a surface of the utmost urbanity. But if a Professor of Education referred to the history of education in the middle ages and ventured a little into the life and times of Melancthon, from the Protestant point of view, there would be a whisper that really it was desirable that there should be a second Professor of Education; and, indeed, it would be quite as justifiable a demand as for dual Chairs of Modern History and of Mental and Moral Philosophy. Then, when a Chair in Natural Science became vacant it would be said that as the last man held views in favour of giving fair hearing to evolution, it was only proper now to get someone with different ideas who would not discuss it. Changes of this sort would steal in at a rate which would be accelerated as broad-minded people betook themselves elsewhere. At first the "accommodating Protestant" (the type described by Mr. F. H. O'Donnell), would greatly assist the outsiders on the Governing Body, but afterwards (and in fourteen or fifteen years there might be a majority of Roman Catholics on the Governing Body) the crutch would be unnecessary. Of course, a gentleman of the "Hands off Trinity" type would not succeed our present respected Provost. It might be an "accommodating Protestant," to preserve the tradition for a little longer. I must not be misunderstood. I do not mean to impute blame to those who, fighting, as they believe, for their faith and morals, deem every other consideration trifling.

(6.) I have heard it said that the proposed admission of outsiders upon the Governing Body would resemble the practice at Liverpool, where the Council of the University is in part composed of outsiders. The argument being that what can be done safely in Liverpool can be done in Dublin. Most of us who know Ireland will see the danger of this conclusion at first sight. A few words will make the fallaciousness of the argument manifest.

The Court of Liverpool University is the supreme Governing Body. The Council is an executive body, and is subject to the Court. The Court is a very large body, indeed, and composed of leading men in various educational, commercial, and academic institutions, as well as munificent patrons of the young University. This body elects fifteen members of the Council. Five Councillors are appointed by the Municipal Council of Liverpool, one by the Senate and one by each of the Faculties, one by Convocation and the remainder, making in all thirty-one, are the *ex-officio* heads of the University.

Now, let it be remembered that there is not the shadow of a question of religion or politics involved in the action of the bodies which contribute to this Council. There is only one desire—to forward the interests of a University which is strictly secular. The state of things in Liverpool is sufficiently shown by the fact that the Corporation of the City of Liverpool now subscribe £10,000 annually to the University, and the

DOCUMENTS.

DOCUMENTS.
SECTION C.
XX.

Borough and County Council give £1,800 more. I have never heard a word of complaint against the rates which afford these sums.

(7.) It is instructive to compare the "widening" scheme which is before the Commissioners with a feature of Mr. Gladstone's proposals of 1873, which did more to wreck those proposals than anything else in the Bill. Mr. Gladstone had to name a Council of twenty-eight persons to govern the new University. He could not do it. The pressure put upon him in the House of Commons was great, but he could not do it. The House very rightly took up the position that they would not pass the measure till they knew what sort of Council was intended. Mr. Gladstone retorted that no respectable man would have himself named as a Councillor till he knew what sort of Act he was to administer. The House would not accept this plea, and this *impasse* became a leading feature of the celebrated debate which ended in the defeat of Mr. Gladstone's Government. Now, here is Mr. Gladstone's admission early in the debate—"It is said, however—and I quite agree with the observations of those critics of the Bill—that a great deal of the success of this measure will depend upon the choice made of the persons who are to form the Council. Indeed, I might truly say that so much, I think, will depend upon the selection of those members that, even supposing the Bill were a thoroughly good and satisfactory one, and that its provisions were universally approved of, if there were a bad list of names inserted as Councillors, if names of incompetent men, or names of mere partisans, sectarian or political, were inserted in the Bill, it would defeat the whole beneficial effect of the wisest provisions of the Legislature."

It is under an uncertainty not less perilous that the University is now to launch out on a new career during a period of special storm and stress in Irish politics, for there are, in the political aspects of this question, perils which surely require no pointing out! And, worst of all, the influences which we dread are allied against us.

(8.) Let it not be said that I have wilfully dipped my pencil in the hues of earthquake and eclipse. Far more might have been said—far more quoted to support my views. Convinced as I am of the reality of the fears I have expressed, I must freely admit that from one point of view—like certain curious objects in Nature—this scheme of "widening" lights up with a glamour almost overpowering, and appeals to one's deepest sympathies. To close the old feuds, to bring Protestant and Roman Catholic youth together in friendship—who would not work for such issues. I neither blame, nor am I ashamed of, impetuous action under such incentives. Perhaps I may even appeal to my first vote upon this question—when, as a member of the Committee the initial step of Roman Catholic representation came before me—as evidence of every desire on my part for such laudable results. But more careful consideration convinces me that the two ideals of education cannot flourish together upon equal terms in the one College; that one or other must submit to a subordinate place or to extinction; and that this is more especially true of the circumstances and conditions attending the present case. Something may, and should be done, towards meeting the wishes of the higher class of Roman Catholic laity. I think those laymen have a case and grievance of their own. Before coming to this and to suggestions of a constructive nature a few words must be said on another aspect of this difficult University question.

(9.) If Trinity College was to become the National University of Ireland it would be, of course, immediately urged that to charge between £80 and £90 for a degree in the National University of a poor country like Ireland was out of all reason. The fees would certainly fall to half or less than half. Dr. O'Dwyer's 2,000 students or 1,000 students will then come in. Apart from any class prejudices, we must ask if Trinity College is the proper place for these boys. They will be admittedly drawn from a class lower in the social scale than the existing professional Roman Catholic and Protestant classes. "We have had in Ireland hitherto two extremes—the gentry and a nation almost of paupers; but I think there is growing up now a great middle class, the farmer class, the mercantile class, and the professions; and for these there is a growing need of higher education; but not higher education of the type that has been given, or under the conditions under which it has been given,

at Oxford or Cambridge, and Trinity College, Dublin, up to this; but a much cheaper, and, I would say, a much more practical scientific education." These are the words of Dr. O'Dwyer at the last Commission (641). His lordship is elsewhere again (506) perfectly clear that the new students would be "poor country boys," and that "the people who go to Oxford would be of a better social standing than the body of our people for whom a University education is wanted." (506.)

Thus it would appear that Dublin University as it is is not the sort of University required by the larger number of Irish Roman Catholics. Dr. O'Dwyer knows what he is talking about, and I am sure he is right. Many of us have grave doubts about the wisdom of tempting into the higher professional walks, already overcrowded, boys from this station in life. The new-comers have neither the money nor the family influence possessed by the others. It would be more humane and far wiser to let them seek those paths where influence counts for less.

(10.) But if Trinity College is not the place for these boys, and its higher education not of the type which they require, then are we logically bound to conclude that the type of education which is to prevail in the new Roman Catholic University will not be suitable to the higher class of Roman Catholic laity—a class of laity which even now sends its sons to Trinity College, and is in every way of the status of the professional classes of England who enter Oxford and Cambridge. The conclusion is justified on his lordship's own statement:—"The people who go to Oxford would be of better social standing than the body of our people for whom a University education is wanted." It is evident that the Bishop has in his mind a very different class of institution from Trinity College—one like the Provincial University of England or some of the Scottish Universities. "The body of the Roman Catholic people require a much more practical scientific education than is given in Oxford, Cambridge, or Trinity College, Dublin."

This leads us to what is apparently an insufficiently considered side of this complex problem—the special requirements of the professional and upper classes of the Roman Catholic laity. Are they to accept, whether suitable or not, the University designed to meet the wants of the many hundreds of poor country boys who are looking forward to very different careers?—Everybody will agree that the two types of education could not be combined in the one institution. We cannot mix the University of Leeds with the University of Oxford, nor can we, for those who hold to class distinctions, divide the University into first and second class compartments. The Arts courses, a leading feature in the one type, is a subordinate feature in the other type; while the practical teaching of science in relation to technology is a prevailing feature of the latter class of institution.

The average professional Roman Catholic gentleman is in every respect the social equal of his Protestant neighbour. We Professors only learn by accident the religion of the students we lecture, and, in my experience, as often as not it turns out that some particularly able and attractive pupil of ours is a Roman Catholic. A few weeks ago I met, on my way from Dublin to London, one of my students. Our talk turned upon the future of Trinity College. He told me he was a Catholic, and added—"Trinity is a very nice place—no one ever asks if you are a Catholic or Protestant, or says anything to hurt." I think that practically everyone who has lived in Trinity College will endorse my pupil's words. I may add that the only case of a change of religion during College days which has come to my knowledge in over twenty-three years' teaching, was that of a Protestant young man who entered the Roman Catholic Church while an undergraduate and residing in College.

I interject these remarks, for I think it should be clearly understood that Trinity College is just as fitting a place for the professional student of Roman Catholic persuasion as are Oxford and Cambridge.

(11.) The parallel between the Roman Catholics of England and the professional classes of Irish Roman Catholics in this matter of University education appears to me to be complete in every respect. Both are small in number compared with the Protestants of similar standing in the country. Both are by education and character sufficiently enlightened and independent to adopt what safeguards may be requisite for their sons during University life. "In the better

class Catholics of England, the Catholic gentry, as a body they are keen upon the question of their religion, and their sons grow up with that feeling, and in the Catholic School of England, as far as I know, there is very great and very careful attention paid to the religious education of the youth. The young man then, of these, who goes to the University, is less liable to be influenced by unfavourable religious associations than a poor country boy who has never been in any society such as he would meet there, and has got a very limited mental equipment." (The Most Rev. Dr. O'Dwyer, Q. 506.)

Every statement which the Bishop of Limerick so ably laid before the Commission, explanatory of the position of the English Roman Catholic layman, applies to the Irish Roman Catholic layman with equal force. Taking the Catholic question in its wide bearing, Dr. O'Dwyer explains that "In England you have to deal with individuals of a very limited number, for whom precautions may be devised; in Ireland there was the question of accepting for a whole nation a system that in itself was inherently dangerous, and that in a Catholic nation." Would there be any greater difficulties in taking precautions in Trinity College? The total number of the Irish gentry concerned appears to be about 1,100. This is the number who sign the Memorial printed in the Blue Books of the last Commission, and which Dr. O'Dwyer refers to as signed by the "whole mass of the Irish laity" (Q. 320). If it is considered that from the entire number of Episcopalian Protestants in Ireland, Trinity College receives but from 170 to 200 students annually, it is apparent that no large number of Roman Catholic students of this class is to be expected.

Such men send their sons to Oxford and Cambridge with the consent of their clergy and without requiring the subversion of the constitutions of the Universities and representation upon the Governing Bodies. Dual Chairs or Advisory Boards. Surely, so drastic and confiscatory a measure as I have been criticising is not now required of Trinity College!

(12.) We have arrived at one important conclusion clearly and directly based on the evidence given at the last Commission—that of the people in Ireland who require a University such as Trinity College now is, the Protestants are in the great majority. It is a plain numerical statement. So far as the University question, then, affects Trinity College, as it is, there should be an end of the talk about the three-and-a-half millions of Roman Catholics; a body of some eleven hundred represents the whole mass of that part of the Irish Roman Catholic laity who require the type of education we can offer.

(13.) Before summing up my remarks I would like to add a word in reference to the two-College scheme. Mr. Gwynn has dealt with the matter so thoroughly that but little remains to say. However, in connection with the evidence I have been citing, it perhaps remains to point out that the proposal assumes an aspect which borders on the grotesque. If the body of the Irish Roman Catholic laity require a University education not of the type given in Trinity College—and Dr. O'Dwyer is very clear on this point—then how can the same University profitably or fairly include the two types? Imagine Leeds incorporated as a constituent College of Oxford! Even if we passed over the very just objections of Oxford men and of Leeds men, the confusion created would be sufficient objection to such a scheme. The degrees would lose all significance. The Dunraven scheme sets out to accomplish a precisely similar thing.

This is the merely secular aspect of the scheme. For those who look deeper into what this or that University degree connotes, the denominational difference awakens even more serious objections. I venture to think that Oxford or Cambridge men would very strongly object—and legitimately object—to one of their Colleges being set apart for government on the ideals so candidly defined by Dr. O'Dwyer and the Rev. Dr. Delany.

(14.) The final conclusion appears to me perfectly clear, and led to from every side of the question.

If Trinity College is nationalised it must cease to be a home of the upper Protestant classes. Religious, political, and social conditions will conspire to estrange them. Their educational ideal will be replaced by one repugnant to them. The act of nationalising Trinity College would prove nothing short of confiscation. The union of hearts would be more remote than ever.

And then there is the other aspect of the matter—the standpoint of Dr. O'Dwyer. The great bulk of Roman Catholics likely to seek University education do not want Trinity College. They want neither the task of contending with our educational system from its religious aspect nor from its secular aspect.

Both these aspects of the question lead to the one conclusion—Leave us our University and our College; the Trinity College we and those who think with us have built up. Give, and give without stint, to those who best know the wants of the great bulk of Roman Catholic schoolboys, the sort of College they require. Lastly, give us powers to effect such changes in Trinity College that the cultured Roman Catholic laity may compete with more hope of success for influence on its Governing Body, and thus with more ease of conscience come in.

(15.) A large body of opinion, representing the views of some of the most distinguished and vigorous men in Trinity College, has been put forward in favours of reforms within the College (Document V.*) These in the first place, if they lead to the changes desired in the mode of electing the Governing Body, will go a considerable way towards removing a Roman Catholic grievance. There will no longer be a delay of forty years or thereabouts between the day of winning Fellowship and coming on the Board. Furthermore, in the reforms suggested in Document V. the Professor who gives his whole time to the College is to be open to election upon the Governing Body. Here is another road to the government of the College which may legitimately be taken by talented Roman Catholics.

Then, again, it is proposed to elect Readers on the results of the Moderatorship examinations. It is anticipated that the Readers will often fill the posts of Assistants to the Chairs; and in every case they will be teaching posts. In so far as Roman Catholics distinguish themselves, here is another road, and a very direct one, to influence in the teaching staff.

Again, the system of election to Fellowship proposed is such as to abolish the long years of preparation. The Fellow will in general obtain the provisional status before he is of M.A. standing. This will also shorten the road to educational influence.

The elements of increasing influence are here. Let our Roman Catholic young men win Fellowships, Professorships, and Readerships, and they will earn, and rapidly earn, the influence they seek to obtain. To the sense of fairness of the electing staff, without childish restrictions as to percentages and years, I would confidently entrust the duty of securing Roman Catholic representation on the Governing Body. There would be some representation even from the first.

As regards the conditions set forth by the memorial signed by some 500 Roman Catholic laymen, and now before the Commission, it would appear that the co-operation of the Hierarchy is necessary for the realisation of most of them. We in Trinity should promote that co-operation as far as is in our power. The existing offers of the Board regarding a place of worship and a Roman Catholic Faculty should remain open.

I cannot, under the conditions, admit that any Advisory Council or Board is necessary. The existing statutes safeguard the student against any attack upon his creed. All its duties would be better discharged by Roman Catholic catechists, whose advice would be sought by the Governing Body if questions concerning dogma arose.

The reforms of Document V.* embody, in my opinion, all the elements of "widening" in the truest and fairest sense, outside those concessions which I have referred to as dependent on the Hierarchy. They confer more direct avenues to the influence of academic merit than exist in either Oxford or Cambridge.

(16.) For the rest I would urge, as being more to the interests of all and just in itself, that the wishes of the Roman Catholic Bishops for a Roman Catholic College should be acceded to. A considerable and valuable body of intermediate educational work is already being done in Roman Catholic schools. The higher education by the help of the State of the boys who leave these schools is in a sense a matter of duty. The continued influence of denominationalism in an education initiated by it, should not be regarded as retrogressive.

The wholesale conferring of degrees by the Royal University I regard as injurious. It was condemned in the Report of the last Commission. I take it that

* Appendix to First Report (Cd. 3176), 1906, page 27 *et seq.*

DOCUMENTS.
SECTION C.
XX.

if a portion of its funds be diverted to assist in the endowment of a Roman Catholic College this function of the Royal University would cease. This, of course, would be after a term of years. When that period had expired it should be understood that examination degrees could not be obtained in Ireland.

I believe a College in the Royal University, well endowed and equipped, could discharge all the important functions outlined by Dr. O'Dwyer.

(17.) The leading elements which should, in my opinion, be borne in mind in the consideration of the whole problem are, firstly, that Trinity College cannot be made to harbour two opposed ideals of education. The prevailing tone must be taken from one or the other. We who now possess Trinity College are the enormous majority in Ireland of those for whom such a high class of education is desirable. Moreover, we have made it what it is, and have all the rights of possession.

In the next place it is a fact that a large body within the University desire internal reforms (Document V.) which would greatly assist the Roman Catholic gentry to share the advantages of our education.

Lastly, there remains the great body of Catholic laity which now is largely being educated in Roman Catholic schools, and whose wants in life are far better known to those associated with them the Roman Catholic Bishops and others than to any other custodians the Government could possibly appoint.

(18.) I turn to a different subject—the relations of Trinity College to Alexandra College and the attitude of the University of Dublin towards the higher education of women. I wish, in the first place, to associate myself with what the Very Rev. the Dean of St. Patrick's has so well said upon this subject. I

am convinced that the existing relations between the older and the newer institution are gravely unfair to the latter, whose work for the higher education of women in Ireland is beyond praise.

If a hostel for the use of women students attending Trinity College was in contemplation I believe much would be gained by instituting this in connection with the Alexandra College, a measure which is, I think, suggested in the Report of the last University Commission. The relations of Alexandra College to the University of Dublin would then be in part at least on the lines of Newnham or Girton to Cambridge. The Alexandra College, while pursuing its own teaching functions, would be a most suitable place for residents, and would add an element of social life which mere attendance at the lectures in Trinity College does not really offer. All the machinery is already there for the safe and wise organisation of such an institution.

(19.) Under the same clauses of the Terms of Reference I may, perhaps, be permitted to refer to another matter of not inconsiderable importance—I refer to the case of men students who do not live within the College, but for one reason or another have to reside in lodginghouses in the city. In Oxford and Cambridge, as everyone knows, the sanitation and suitability of such lodgings receive careful attention. I think it is most desirable that lodginghouses for College students should be under license in Dublin, and be supervised by the College authorities. A recommendation to this effect was made by the University Royal Commission of 1851. I would respectfully suggest that the renewal of this recommendation would give the matter the prominence it deserves.

Letter from W. E. Ormsby, Esq., M.A., LL.D., Reader in Indian Law in Trinity College, Dublin.

HAMILTON,

AILESBUARY ROAD,

DUBLIN, 30th October, 1906.

SIR,—In reply to the Trinity College Commissioners' invitation for brief statements, I would say—

That I entirely approve the case set forth by the Board (Joint Statement I.*) and the arguments by which that case is supported.

That I consider the proposal to replace the Board (Joint Statement III.†) by a new Governing Body, composed partly (it would appear) of their juniors and partly of outsiders selected by a new religious test, as the very worst which could possibly be conceived.

I have the honour to be, Sir,

Your most obedient servant,

W. E. ORMSBY, M.A., LL.D.,

Reader in Indian Law.

James D. Daly, Esq.,

Secretary, Royal Commission on Trinity College.

Statement submitted on behalf of the Scholars on the Foundation of Trinity College, Dublin.

6, Trinity College, Dublin,
28th November, 1906.

DEAR SIR,—I beg to enclose a statement signed by a majority of the Scholars of Trinity College. Owing to the short time which I had to collect signatures, the list is not so complete as it would otherwise have been, and, further, there are at least fourteen Scholars at present abroad.

The signatories desire to apologise for the lateness of the period at which this statement is sent forward, and to add in excuse of the delay that no one of them received the invitation to offer suggestions, which, as they understand, was sent individually to the other members of the Corporation.

Yours very faithfully,

J. H. MONROE.

* Appendix to First Report, page 22.

† *Ibidem*, pages 23-24.

STATEMENT ON BEHALF OF THE SCHOLARS ON THE FOUNDATION OF TRINITY
COLLEGE, DUBLIN, SUBMITTED TO THE ROYAL COMMISSION.

GENTLEMEN,—We, the undersigned Scholars on the Foundation of Trinity College, Dublin, desire to submit the following statement to you concerning—

- (1) the status of the Scholars on the Foundation of the College;
- (2) (a) their salaries,
(b) fees, etc., payable by them;
- (3) the tenure of their Scholarships.

(1) The Corporation is thus defined in the Charter of Queen Elizabeth:—

"Praepositus, Socii, et Scholares Collegii Trinitatis et eorum successores in re, facto, et nomine, de cætero, sunt, et erunt, unum corpus corporatum et politicum, de, ac in, perpetuum, incorporatum et erectum, per nomen Praepositi, Sociorum, et Scholarium Collegii Sanctæ Trinitatis Elizabethæ Reginae juxta Dublin."

And in the Letters Patent of Charles I.:—

"Corpus Collegii constare volumus ex Praeposito tanquam capite, et ex Sociis, et Scholaribus, tanquam nobilioribus hujus corporis membris. . . . Scholares Collegii sumptibus alendi, sint numero septuaginta."

It is clear from this that, with the exception of the Provost, the status of all the members of the Corporation described as the "membra nobiliora" was intended to be the same.

(2a) By Chapter 21 of the Letters Patent of Charles I., the salaries of the Junior Fellows and Scholars were fixed at £3 per annum each; and provision for increase is made in the following words:—

"Si autem reditus Collegii posthac eo usque creverint, ut ratio de augendis salaris iniri possit, volumus, et statuimus, ut, *habita proportionem ad ea quæ jam posita sunt*, augmentum fiat per Praepositum, et majorem partem Sociorum seniorum," etc.

By this authority a general increase was made in 1722, the salaries of the Junior Fellows and Scholars being then fixed at £15 per annum each.

In 1758 the salaries were again increased; but the direction of the Letters Patent as to proportionate increase was not observed; for that of a Junior Fellow was fixed at £40, and that of a Scholar at £20, their present nominal values; the actual value of a Scholar's salary is £18 9s. 3d. Further, the Scholar of to-day is, in three respects, in a much worse position than the Scholar of 1758, for (a) the purchasing power of money has decreased (we have the authority of Professor C. F. Bastable for the statement that "broadly £1 in the middle of the eighteenth century would go as far as £2 now"); (b) the fees payable by Scholars have been increased since then; (c) the standard of living is considerably higher.

If it be argued that the salaries of the Junior Fellows in virtue of their Fellowship have also remained stationary, the answer is that the sums received by them under other heads have increased so largely that the present average income from the College of a Junior Fellow is £817 17s., so that they have had no reason since 1759 to apply to have aug-

mented that portion of their salaries which they receive as Fellows.

(2b) Prior to 1846 the tuition fees in Arts payable by Scholars were fixed by the Letters Patent of Charles I. at not more than twenty shillings ("non solvant ultra viginti solidos"). In this year they were increased to £4 4s. by a decree of the Board and Visitors,* though, in view of the fact that they received no tuition in Arts, all tuition fees in Arts were remitted for those who had taken the degree of B.A.

Attention may also be drawn to the fact that, while the other members of the Corporation have their chambers entirely free of charge, the Scholars in every case are compelled to pay more than half the ordinary rent charged to students. It may further be pointed out that the free accommodation allotted to Fellows is more than liberal.

Owing to these deductions, the average net income of the Undergraduate Scholar from scholarship is between £8 and £9 per annum. It is not surprising, then, that many Scholars have been compelled to resort to teaching and other employment, and have thus been seriously handicapped in their academic career.

(3) The tenure of Scholarship was fixed by the Letters Patent of Charles I. to last from the date of election till Master's standing. In 1889 this was modified, so that a Scholarship is now held for a period of five years, or until the June quarter after the Scholar becomes of M.A. standing, whichever period terminates first. There is no supervision of the work carried on by Scholars after the B.A. Degree has been taken, nor are Graduate Scholars compelled to maintain their connexion in any way with the College. The result of this system is that some persons who are below M.A. standing, and are working for Fellowship or in one of the Professional Schools, have been compelled to vacate their Scholarships under the five years' rule, through having obtained them in their first or second years.

We therefore submit—

(1) That, in view of the statements concerning the status of Scholars quoted above, the present position of the Scholars relative to the other members of the Corporation is inequitable;

(2) That, on matters which vitally concern themselves and their fellow-students, the Scholars have at least a right to be consulted, and that, therefore, some provision, on the same lines as has for some time existed in the case of the Junior Fellows, should be made to secure them a hearing;

(3) That a Scholar should be put in a position to support himself without being compelled to seek temporary appointments outside the College during his academic career; that, therefore, all Scholars should be exempted from tutorial fees in Arts; should have free chambers, and that their salaries should be increased;

(4) That the rule regulating the tenure of Scholarship should be altered, and that the previous rule as stated in the Letters Patent of Charles I. should be revised.

(Signed),

A. J. KENNY.
S. J. M'CONNELL.
T. W. BRIDGE, B.A.
G. J. W. STEPHENS, B.A.
WM. H. PORTER, B.A.
M. T. SMILEY, B.A.
J. H. MONROE, B.A.
R. M'COMBE.
W. H. LLOYD, B.A.

Percentages of All Clergy, RETURN A.											93	94
Increased Percentage of Higher Clergy, RETURN B.											93	97

NOTE.—Since the passing of the Irish Church Act, 1869, there have been 32 appointments of Archbishops and Bishops (including Translations). With the single exception of the Translation of the Bishop of Derry to the Primacy, the Prelate appointed was, in every case, a Graduate of Trinity College, Dublin.

ALL the existing Deans and Archdeacons are Students or Graduates of Trinity College, Dublin.

The following are the Dates of Ordination of the 38 "Non-University Liberates," now serving in the Church of Ireland:—1869-70 3; 1871-5 12; 1876-80 4; 1881-5 9; 1886-93 4. NONE of them, therefore, has been Ordained within the 12 YEARS last past.

268 of 1,411 Trinity College, Dublin Clergy, have attained "Higher Office," while only 15 of 151 Clergy from other Universities; 1 of 76 "Collegiates," and 7 of 38 "Non-University Liberates" have done so.

RETURN C. THE EXISTING CLERGY OF THE CHURCH OF ENGLAND AND OF THE EPISCOPAL CHURCH OF SCOTLAND, 1905-6, serving in Great Britain, India, the Colonies, and Foreign Countries, being Students or Graduates of **Trinity College, Dublin**; with the Numbers of Scholars, Moderators, Bishops, Deans, and Archdeacons, included in the Return.

4	FOREIGN COUNTRIES, RETURN C.	51	5	6	1	1	—
	TOTALS,	3,140	189	298	22	38	40

NOTE.—It is not possible to ascertain *precisely* how many of the above 3,140 Existing Clergy—all educated wholly or partly at Trinity College—attended the Divinity School; but at least 1,630 appear from "Crockford" to have taken Degrees in Arts, and also to have taken Degrees in Divinity, or obtained the "Divinity Testimonium"; at least 30 more completed the Divinity Course; and at least 1,290 others took Degrees in Arts. The remainder, not more than 190, were all Matriculated Students of Trinity College, Dublin, but whether they were Students in Arts, or in Divinity, or in both, cannot be ascertained. The Total Number of Clerical Electors on the Parliamentary Register is 2,077, of whom only 767 are included in RETURN A.

DOCUMENTS.
SECTION D.
XXIV.

XXIV.

Documents put in by the Very Rev. J. H. Bernard, D.D., D.O.L., Dean of St. Patrick's, and Archbishop King's Lecturer in Divinity.

(See evidence of Dean Bernard, p. 134 and p. 138.)

(1.)—RETURN showing the Number of DIVINITY STUDENTS in the University of Dublin who have kept the MICHAELMAS TERM from 1870–1906 inclusive.

YEAR.	Junior.	Senior.	Total.	YEAR.	Junior.	Senior.	Total.
1870, . .	64	33	96	1889, . .	52	42	94
1871, . .	37	30	67 Min.	1890, . .	62	48	110
1872, . .	49	31	80	1891, . .	56	47	103
1873, . .	49	23	72	1892, . .	62	50	112
1874, . .	60	27	87	1893, . .	74	51	125
1875, . .	54	32	86	1894, . .	73	69	142
1876, . .	62	39	101	1895, . .	86	60	146 Max.
1877, . .	57	38	95	1896, . .	62	67	129
1878, . .	60	31	91	1897, . .	56	57	113
1879, . .	52	30	82	1898, . .	85	50	135
1880, . .	39	25	64	1899, . .	64	59	123
1881, . .	52	29	81	1900, . .	40	61	101
1882, . .	56	29	85	1901, . .	57	37	94
1883, . .	55	49	104	1902, . .	44	53	97
1884, . .	52	52	104	1903, . .	49	45	94
1885, . .	56	47	103	1904, . .	46	42	88
1886, . .	71	47	118	1905, . .	39	34	73
1887, . .	73	50	123	1906, . .	—	—	88
1888, . .	66	61	127				

In addition to these figures should be reckoned the number of men who have failed to keep their term, and also the number of those who, while not attending Divinity lectures in that particular term, are reading for Divinity examinations. These numbers cannot be exactly obtained, but they would probably increase the above totals by about thirty in each year.

Furthermore, it is to be remembered that, as men do not enter the Divinity School as a rule until their Freshman years are over, many prospective Divinity students are always to be found on the books of Trinity College—the number at present being, presumably, not less than eighty.

Rev. J. T. Mitchell, Wavertree Rectory.

Object.

The object of the Board shall be to provide in Liverpool teaching in the Semitic Languages and Literature, in Hellenistic Greek, and in Ecclesiastical History. Lectures will also be given on some of the Greek and Latin authors of the post-Augustan period.

Fundamental Principle.

It is a fundamental principle of the Board that there shall be no theological tests for either teachers or students, and that no question shall be asked in any examination under the control of the Board in such a form as to require any expression of personal religious belief on the part of the students.

Methods.

As a security that the teaching will be thorough and systematic, it will be directed to preparing students for a degree examination, and, as no post-graduate examination in such branches of learning is conducted by the Liverpool University, the examination chosen is that for the B.D. degree of Dublin University.

This examination is open to graduates of Dublin University, and to graduates of Oxford and Cambridge who take the *ad eundem* B.A. of Dublin.

The lectures will be open to all serious students, whether reading with a view to a degree or not.

Some of the lectures would be of use to those reading for the B.D. of London and some other Universities.

It is proposed that two concurrent courses of lectures should be given each term. Each course would deal with one of the prescribed subjects, and thus, in the three terms of the session, thirty lectures would be delivered on that subject. In this way, five of the seven subjects required for the B.D. of Dublin would be taught in the course of three years, and the examination might be taken in divisions yearly, or all at once at the end of three years.

The fee for each Course will be a Guinea, and the proceeds will be devoted to—

1. Expenses of Room, &c.
2. Payment of Lecturers.

Both lectures will be given on the same morning of the week, one beginning at 9.30 and the other at 11.15, and each will be followed by a class, at which difficulties will be explained, special guidance in study given, questions asked and answered, and papers set.

Seven subjects are required for the Dublin B.D. :—

- I.—Old Testament in the Authorized Version; special book, English and Septuagint.
- II.—A few chapters of Hebrew.
- III.—The New Testament in Greek, with a special book.
- [IV.—History of Doctrine.]
- V.—Ecclesiastical History.
- VI.—Short Treatise by a Greek and a Latin Father.
- [VII.—Some Apologetic books.]

The full Syllabus, with subjects and recommended books, may be obtained from the Hon. Secretary, Rev. J. T. Mitchell.

The Board will not give any assistance to students in divisions IV. and VII., which lie outside its scope. Other bodies, of course, may, if they choose, arrange for lectures on these subjects, or students may simply read the required books by themselves.

FIRST SESSION.

An Inaugural Lecture will be delivered by the Right Rev. Charles Gore, D.D., Lord Bishop of Birmingham, in the Arts Theatre of the University, on Monday, 1st October, at 4 p.m.

The following Courses of Ten Lectures each will be delivered :—

Michaelmas Term, 1906 (Thursdays).

New Testament (General) I.—Acts of the Apostles and S. Paul's Epistles.

Rev. M. Linton Smith, M.A.

Beginning 11th October, at 11.15.

Special Book I.—Second Epistle of S. Paul to the Corinthians.

Rev. A. J. Tait, M.A.

Beginning 11th October, at 9.30.

Lent Term, 1907 (Mondays).

New Testament (General) II.—Hebrews, Catholic Epistles, Apocalypse.

Professor Peake.

Beginning 14th January, at 11.15.

Special Book II.—Galatians.

Rev. W. Fiddian Moulton, M.A.

Beginning 14th January, at 9.30.

Summer Term, 1907 (Thursdays).

New Testament (General) III.—The Gospels.

Canon Kempthorne, M.A.

Beginning 17th April, at 11.15.

Elementary Hebrew.

Rev. S. Friedeberg, B.A.

Beginning 17th April, at 9.30.

During the following Session, Courses of Lectures will be given by the Rev. G. Harford, the Rev. W. Watson, and the Rev. C. Grüneisen, on the Old Testament; by the Rev. S. Friedeberg, on Hebrew; and by the Rev. Dr. Nickson, on the Special Hebrew Book.

DOCUMENTS.

SECTION D.

XXV.

Memorandum forwarded by R. Kyle Knox, Esq., J.P., LL.D., with reference to the Statement submitted by a Special Committee appointed by the General Synod of the Church of Ireland.

(For the Committee's Statement see Appendix to First Report, p. 82).

I beg respectfully to submit to the Commissioners the following statement:—

I regret extremely that I must dissociate myself in an important particular from the statement put forward by the Committee of the General Synod, of which I am a member.

On page 8 of the printed copy of that statement and on page 10 it is asserted that in case the Divinity School be severed from Trinity College it "must be endowed out of public funds" and that "compensation must be made to the Church from public sources."

I dissent from these statements. They appear to me to have been made in the interest of the Board of Trinity College, Dublin, not of the Church—they appear to me intended to exonerate the funds of the Divinity School from any claim upon them on the part of the Church.

These expressions are not authorised by the terms of our appointment—we are "to take steps to bring before the Commissioners both the present position of the Divinity School and the claims upon it of the Church of Ireland,"—we are not authorised to abandon any claim.

The claim of the Church of Ireland on the Divinity School has never been limited to a claim on its control and management. I have searched in vain for any recorded resolution of the General Synod to that effect. I do not believe any such exists. But I find the following passage in the statement submitted by the Church to the Belmore Commission:—

"The claim of the Church of Ireland on Trinity College, Dublin, is that on which the Commissioners are directly called upon to pronounce. It is needless to say much to establish the claim of the Church of Ireland on that institution. It seems not unreasonable that whatever claims the Church fairly has should be satisfied out of the funds heretofore devoted to its service before those funds are applied to any new purpose."

And the Board of Trinity College, Dublin, amongst other resolutions passed the following:—

"That on the vacancy of any Professorship or Lectureship in the Divinity School, a sum equivalent to the salaries and payments made to such Professor or Lecturer shall be paid annually to the Representative Body of the Church of Ireland towards the maintenance of the Divinity School with following condition, viz., that the students of Trinity College, Dublin, shall continue to receive instruction in the school as hitherto free of charge."

an unquestionable admission of the claims of the Church on the funds of the School—claims which time cannot bar.

The Belmore Commissioners state in their report that the Divinity School Committee of the General Synod "expressed a wish" that the sum hitherto expended on the Divinity School of the Church of Ireland should be capitalised and the amount placed in the hands of the Representative Church Body in trust.

Provost Lloyd and the then Regius Professor of Divinity, Dr. Salmon, both expressed views distinctly admitting the claim of the Church on those particular funds.

The Belmore Commission finally report—

"That a liberal provision for the future support of the Divinity School of the Church should be secured and paid to the Church Representative Body,"

clearly not from "public funds but by the application of the existing funds of the Divinity School.

The principles on which the report of the Belmore Commission is based were stated and propounded first by the Board of Trinity College, Dublin; they were accepted by the General Synod, and after an exhaustive enquiry into the history and constitution of the School those principles were confirmed by the finding of the Royal Commission.

The Committee of the General Synod in 1881 in their report to the Synod state as one thing of two which the Church may fairly expect to be done—

"That formal recognition should be given to the Church's equitable claim that the funds now devoted to the maintenance of the Divinity School shall continue to be applied as at present."

The claim of the Church on the funds of the Divinity School, in case of a severance of the University and the School, has therefore been made, and has been admitted, and there is no evidence that I have been able to discover to show that the General Synod, under whose authority alone we act, has ever consented to abandon that claim, and I hold we have no right to volunteer to give it up. It is incomprehensible to me then how such expressions have crept into the report.

If the School be severed from the University and the funds appropriated to other purposes, the Church of Ireland will have been subjected to a supplemental disendowment. I find it impossible to think that any impartial man could consider it just that while the Roman Catholic Divinity School of Maynooth has been provided in the Act of 1864 from funds derived from the Church of Ireland, that the same Church of Ireland should be deprived of the Divinity School left to her by that Act, and of the funds then and ever since necessarily applied to the maintenance of that School.

I feel then that I should neglect my duty if I allowed the statement to pass as approved by the General Synod, that the funds of the Divinity School could be applied without grave injustice to any other purpose than the maintenance, in the University, or outside the University, of a School of Divinity for the Church of Ireland.

I think the expressions from which I am compelled to disassociate must have escaped the notice in some way of other members of the Committee.

As private individual member of Synod I have witnessed the interminable negotiations between the Church and the Board, beginning with an admission on part of the Board of all the Church could possibly ask and ending in 1904 in the refusal of everything but a shadowy statement of respect, and I have come to the conclusion that the only end of wrangling and strife is to be found in carrying out to the full the finding of the Belmore Commission.

I am,

Your obedient servant,
R. KYLE KNOX.

Resolution passed by Diocesan Council of Down and Connor and Dromore.

DOCUMENTS.

SECTION D.

XXVI.

Divinity School.

Office, 6, Clarence Place, Belfast,

November 2nd, 1906.

SIR,—I have been directed to forward, for the consideration of your Commission, the subjoined Resolution, which was passed at the recent Meeting of the Synod of the United Dioceses of Down and Connor and Dromore, and respectfully request that you will be good enough to submit the same to the attention of the Commissioners.

I am, Sir,

Your obedient servant,

C. W. FRIZELL,

Diocesan Secretary.

The Secretary,
Dublin University Commission.

RESOLUTION.

"That this Synod most strongly disapproves of the proposal to remove the Divinity School from Trinity College, Dublin; but if the School be removed, resolves that the funds hitherto employed in supporting the Divinity School in Trinity College, Dublin, cannot, without grave injustice, be diverted to any

other purpose without making a sufficient provision for the maintenance of a Divinity School for the Church of Ireland; and that a copy of this Resolution be sent to the Secretary of the University Commission."

APPENDIX TO THE FINAL REPORT.—DOCUMENTS.

SECTION E.

Statements submitted to the Commission, with reference to the Law School in Trinity College, Dublin, and the University of Dublin.

(1)—REPORT OF LAW SCHOOL COMMITTEE, appointed by the Board, January, 1901.

The Committee are of opinion that the Law School in Trinity College should be regarded, not only as a preparation for the Legal Profession, but as forming a part of the general educational system of the University.

Hitherto the matter dealt with in the Professional Lectures has formed little more than an elementary introduction to the subject of Law, and there has never been any attempt made to found a Scientific School of Jurisprudence in the University.

In this respect we are much behind other Universities in the United Kingdom and elsewhere.

At Cambridge, students can obtain the degrees of B.A. and LL.B., by taking Honors in the Law Tripos Examinations.

The following are the subjects for examination in the first part of the Tripos:—

- Paper 1. General Jurisprudence.
2. History and General Principles of Roman Law.
- 3 & 4. The Institutes of Justinian and Gaius, with a selected portion of the Digest.
5. English Constitutional Law and History.
6. Public International Law.
7. Essays.

The second part consists of the following:—

- Papers 1 & 2. The English Law of Real and Personal Property.
- 3 & 4. The English Law of Contract and Tort.
(With the equitable principles applicable to these subjects.)
5. English Criminal Law and Procedure and Evidence.
6. Essays.

There is a Board of Legal Studies.

The University Staff in Law consists of:—

- Regius Professor of Civil Law.
- Downing Professor of Law.
- Professor of International Law.
- Whewell Professor of Law.
- Reader of English Law.

There are, besides, Lectures in the several Colleges. At Oxford there are eight Honor Schools, in any one of which a Student may graduate. One of these is Jurisprudence.

The final Honor Examination in this School includes:—

- (1) General Jurisprudence.
- (2) The History of English Law.
- (3) Such Departments of Roman Law, and (if the Board of the Faculty of Law shall think fit) such departments of English Law as may be specified from time to time by the Board.
- (4) International Law or some department of it.

The books recommended to be read or consulted are very numerous. See Examination Statutes, pp. 80-82.

The University Staff consists of four Professors, all Fellows of College, and two Readers.

Besides these there are Lecturers in the College.

In both Oxford and Cambridge there are regular Scientific Schools of Law, and the subject is of first rank importance. In most cases the Professors or Lecturers are, we believe, Fellows of Colleges.

At Edinburgh the Classes in the Faculty of Law are lectured by seven Professors and a number of Class Assistants.

The Course of Study for the Degree of Bachelor of Laws (LL.B.) includes the following subjects:—

- (1) *Jurisprudence, General or Comparative*, during a Course of not less than forty Lectures.
- (2) *The Law of Nations, or Public International Law*, during a Course of not less than forty Lectures.
- (3) *Civil Law*, during a Course of not less than eighty Lectures.
- (4) *Law of Scotland or Law of England*, during a Course of not less than eighty Lectures.
- (5) *Constitutional Law and History*, during a Course of not less than eighty Lectures.
- (6) *Conveyancing*, during a Course of not less than eighty Lectures, or *Political Economy or Mercantile Law*, during a Course of not less than eighty Lectures.
- (7) Any two of the following subjects:—International Private Law, Political Economy, Administrative Law, and Forensic Medicine, in each, during a Course of not less than forty Lectures.

The Course of Study extends over three years.

For the Degree of B.L. there is a similar, but somewhat shorter, Course that extends over two years.

In Cambridge, Oxford, and Edinburgh, valuable Prizes and Scholarships are given in Law, and, in Oxford and Cambridge, Students are elected to Fellowships.

It is obvious, therefore, that the position of Law in Trinity College, Dublin, compares very unfavourably with any of the important University Schools in the United Kingdom.

The Appendix contains a summary of the present system of Legal Education in the United States of America, which indicates that the Universities there are even in advance of the United Kingdom in the amount of attention given to that department of learning.

We are indebted to the kindness of a number of distinguished members of the American Bench Professoriate and Bar for the information upon which the Appendix has been prepared.

The number of Lectures delivered in Oxford and Cambridge cannot be readily discovered from the Calendars, but the amount of instruction given to Students studying Law at Edinburgh forms a striking contrast to the sum total of 108 Lectures delivered in our School.

We are of opinion that there can be very little real improvement unless the Board require the Professors to devote a good deal more of their time to giving instruction in the subjects of their Chairs; and, although the University may not be able immediately to provide all that is desirable, it may be able to do so in a few years.

DOCUMENTS.

SECTION E.

XXVII.

In recommending that the Law School should adopt a more comprehensive Course, and increase the facilities for instruction, we do not think that there is any reason to fear that any friction will arise between it and the King's Inns. The former ought to confine itself mainly to the Scientific and Historical side, while the latter will develop those branches specially relating to Modern Legislation and Practice.

Any progress made by Trinity College will not only be to its own advantage, but will further the study of Law in Ireland generally. We think that our University ought to lead the way.

The encouragement of Legal studies in the University, and the improvement in the Law School, will, we believe, diminish the prevailing tendency to undue and premature specialisation on the part of Candidates for admission to the Bar.

We believe that a liberal education, such as is afforded by our University, is the best preparation for the Bar, regarded even from the point of view of professional success, and we observe with regret that a diminishing proportion of men called to the Bar, are holders of University Degrees. The valuable Prizes offered by the Inns of Court in England and here present a temptation to clever young men of narrow means to betake themselves too early in life to professional studies, to the ultimate disadvantage of themselves, as well as of the Profession generally.

It would, we believe, be of great public advantage, if a larger proportion of candidates for the Bar could be attracted to the University. As a means to this end, we recommend the establishment of an Honor Course in Law and certain kindred subjects, leading up to Moderatorship at the Degree Examination.

The attainment of an Honor Degree in the higher branches of legal studies as the culmination of an Arts Course in the College would, we believe, come to be regarded as an excellent introduction to the Legal Profession.

The establishment of the Moderatorship which we have suggested would not, we think, withdraw Students from the principal subjects of Classics and Mathematics. So long as Scholarships, Studentships, and the higher Prizes, depended on proficiency in those subjects, those studies would always hold their proper position. They would be supplemented, not superseded, by the Law School Course of study. That Course might be taken up with advantage by other than professional Students. It would be a useful one for Candidates for the Indian Civil Service, and for Consular appointments. If it came to be taken up as a second subject by Candidates for Studentship, the foundation might be laid of the ultimate establishment of a Law School with intimate relations to the Fellowship system of the University. We may point out that in the original Constitution of the

College, it was provided that one of the Fellows should be a Jurist.

At Oxford and Cambridge, Fellows of certain Colleges are chosen for proficiency in Legal Studies. It is, of course, impossible that Fellows of Trinity College should be elected as in All Souls and Downing Colleges. But if the proposed Moderatorship were to prove a success, there is no reason why the higher branches of Legal Study should not rank with Experimental Science, or Mental and Moral Philosophy, in the Fellowship Course. Men of ability might then become interested in the study of Law, who would in time raise the character of our Law School and our Legal Degrees to a higher standard in the estimation of the public.

In order to build up a School of Law it will be necessary to have at the head of the School a Professor who can devote to his duties, both of teaching and administration, more than the two hours per week at present required of him.

We ought to have a Legal Scholar whose interests are really bound up with the success of the Chair which he holds, and who can place the main portion of his time at the service of the University.

We suggest the following as the courses for the Junior and Senior Sophister Years:—

JUNIOR SOPHISTER YEAR:

- (1) General Jurisprudence.
- (2) Public International Law.
- (3) Roman Law
- (4) Elements of English Law.
- (5) Elements of Political Science.

SENIOR SOPHISTER YEAR:

- (1) English Constitutional Law and Constitutional History.
- (2) English Law.
 - (a) Law of Real and Personal Property.
 - (b) Law of Contract and Tort.
 - (c) Equitable Jurisprudence.
 - (d) Criminal Law.
- (3) Public and Private International Law.
- (4) Political Science.

We also suggest that the Course for *Moderatorship in Legal and Political Science* shall consist of the subjects of the two years, but a more extended Course in each subject should be specified.

(Signed), D. H. MADDEN, *Chairman*.
 GERALD FITZGIBBON.
 H. P. JELLET.
 ANTHONY TRAILL.
 ROBERT RUSSELL, *Secretary*.

APPENDIX.

STUDY OF LAW IN AMERICAN UNIVERSITIES.

The principal Universities or Colleges in the Eastern Division or Atlantic States of America are, in respect of their Constitutions, referable to four types.

- (1) Colleges on the model of Dublin, Cambridge, or Oxford, with a Head or President, with a number of Teachers generally called Professors, and a body of Trustees in whom the property of the College or University is vested. Such Colleges or Universities are generally of private foundation, and appear to contain no Law Schools of particular eminence.
- (2) Colleges or Universities of a public type, established, endowed, and governed by a State, usually through a body of persons called Rectors. The New York University is an instance of an University of this type.
- (3) Universities which began as private foundations with a Collegiate and quasi-domestic character, but which have now developed into true Universities generally resembling those in Scotland. Harvard University in Massachusetts, and Yale University in Connecticut, are instances of Universities of this type.

- (4) Colleges or Universities founded by public authority, but which have been practically left to be controlled by a body of self-renewing Trustees. Columbia University and College, in the City of New York, are instances of this type.

According to the opinion of some authorities, the Law School of the Harvard University is the largest and best equipped Law School in the United States, and is ahead of any others in teaching Common Law and Equity profoundly. At Harvard the opinion appears to prevail that the general education of the University should be separated from the special study of the Law, and that the former should precede the latter. It is therefore necessary to state the course adopted with a view to giving effect to this view in the

HARVARD UNIVERSITY.

Bachelors of Arts of certain defined Colleges will be admitted without examination as candidates for the degree of Bachelors of Laws. These are what are called "Regular Students." Persons will be admitted as "Special Students" who are holders of Academic degrees in Arts, Literature, Philosophy, or Science.

and who are not admissible as candidates for a Degree. Persons who have never received a Degree, but who have attained the age of twenty-one years, will, in rare instances, be admitted as "Special Students" by special vote of the Faculty; and any person who, after receiving a Degree in the enumerated Colleges, has been in regular attendance for at least one Academic year of not less than eight months at another Law School having a Three Years' Course for its degree, will be admitted to the Second Year's Class upon passing satisfactorily the annual examination in the studies of the first year. Annual examinations and a three years' residence at the school is required. Students must give their undivided attention to school work, which must not be combined with office work. The Special Students to obtain the Degree of LL.B. must obtain, on the Three Years' Course, nearly 15 per cent. higher than those required from the regular students. The object of this is to throw influence in favour of a preliminary College education, but not to exclude the exceptionally able young men of limited means, who, from that or other causes, have not had the benefit of College training. In a few cases "Special Students" of exceptional merit have been transferred to the "Regular Class." The Student in Law must, to obtain the Degree of Bachelor of Laws, continue in residence at the School for three years. To qualify for receiving his Degree he must have attained twenty-one, and have passed the examinations in the studies of the First, Second, and Third Years at the end of each year respectively, and have also passed a satisfactory examination in the entire Course for the three years at its conclusion. A Student is not entitled to the status of the next year if his answering at the examination for the previous year is not satisfactory. In order to obtain the Degree in Law the Student must have attended fifteen sets of Lectures. These are so arranged as to meet the requirements of men of each year, though, in the latter two years, a Student is allowed a free choice of subjects. The Harvard Degree of LL.B. does not admit the holder to practise in Massachusetts, the aim of the College being to make the School a national and not a local one. The Professors give the whole of their working hours to the School and hold their places permanently. The method of teaching and studying Law is by discussion in the class-room of reported cases. This method has displaced lectures and recitations and is rapidly making its way in other Schools; but the Dean of the Harvard Law School would not advise its adoption by one who has not become familiar with it from personal experience. No Student who fails to pass an examination in, at least, four subjects at the end of the First Year, or in four full Courses, or their equivalent, at the end of the Second and Third Years, will be allowed, unless by a special vote of the Faculty, to continue in the School or to rejoin it at a subsequent time, except by complying with the special conditions mentioned in the Rules.

The subjects of the Annual Examinations at Harvard University are as follows:—

FIRST YEAR.

1. Contract.
2. Criminal Law.
3. Property.
4. Torts.
5. Civil Procedure.

SECOND YEAR.

1. Agency.
2. Bankruptcy.
3. Bills and Notes.
4. Carriers.
5. Contracts and Quasi-Contracts.
6. Damages.
7. Jurisdiction and Procedure in Equity.
8. Evidence.
9. Insurance.
10. Persons.
11. Property.
12. Sales.
13. Trusts.

THIRD YEAR.

1. Conflict of Laws.
2. Constitutional Law.
3. Corporations.
4. International Law.
5. Jurisdiction and Procedure in Equity.
6. Partnership.
7. Property.
8. Suretyship.

The Professors at Harvard have, throughout America, finally dispelled the inveterate delusion that Law is not a science but a handicraft, and to be learned by an apprenticeship in chambers or offices. The aim of the Law School at Harvard University is the promotion of a scientific legal education founded on a study of English Law exclusively.

THE YALE UNIVERSITY.

The information as yet obtained on the Course of Legal Instruction in this University is not as complete as that relating to other Colleges. We are informed on high authority:—

- (1) That no one is admitted to the Law Course in the Yale University without having a general knowledge of American and English History, &c.
- (2) That a Collegiate Degree is accepted as sufficient evidence of these acquirements.
- (3) The Course in the Law School of this University occupies three years. Law is taught historically and analytically, partly by lectures and partly by examinations, on from ten to forty pages of a legal treatise previously given out for study. Questions are put intended to be illustrations of the proper applications of the writer's statements. This mode of teaching is considered to be open to the objection that it "is not a virile system, as treating the Law Student as a school-boy repeating his lesson."
- (4) Formerly a Law School Diploma entitled the recipient to admission to the Bar; now it generally entitles the recipient to be examined by the State Examiners.
- (5) It has been the experience of Yale University that it is better to keep instruction in Law for Students who desire to acquire some knowledge of it as an accomplishment, separate from that given to those expecting to follow it as a profession.

COLUMBIA COLLEGE AND UNIVERSITY.

This College, which was founded in the year 1754, is remarkable for having given rise to what is called "The Dwight Method of Legal Instruction." It was established by Professor Theodore W. Dwight who, in 1858, opened a Law School in connection with Columbia College. His method at first encountered much opposition, but triumphed in the end. The attendance at the School grew larger year by year, its standards became higher, and Students were attracted to it, not only from all parts of America, but also from foreign countries. He resigned his Chair at Columbia in 1891, and since his death, which occurred a year after, the New York Law School in the University of that name has been established under the charge of Instructors who were formerly associated with him in the Columbia Faculty for the perpetuation of his special mode of instruction. This method consists in a system of recitation and exposition, accompanied by reading of illustrative cases; instead of discouraging text-books, it uses them as the basis of instruction. The Instructor assigns each day to his class a certain number of pages of the text-book for careful study in preparation for the next day. When the class meets again they are questioned one after another in rapid succession as to the rules of Law they have studied, accompanied by a commentary from the teacher intended to illustrate and simplify the subject, and followed by the reading of reported cases

DOCUMENTS.
SECTION E.
XXVII.

as illustrations of the legal principles the Student finds stated in the law book, the cases thus serving as object lessons of the application of the principles sought to be expounded. It may be fairly assumed that the rules which were established in the New York Law School by the Professors of the Columbia College as to the course of study and the requirements for admission, Lectures, Examinations, and Degrees, correspond with those which then and now exist in the latter College. The papers which have been forwarded from America containing no information on this point, the details hereinafter contained in reference to the New York University Law School may be referred to for the purpose of supplying the deficiency.

The Course of study leading to the Degree of LL.B. appears, from the examination papers, to occupy two years. A Third Year Course of advanced study has also been established leading to a Degree of LL.M. The subjects to be pursued in each year are, so far as can be ascertained from the papers, as follows:—

FIRST YEAR.

1. Real and Personal Property.
2. Criminal Law.
3. Bailments and Carriers.
4. Torts.
5. Equity.

SECOND YEAR.

1. Equity.
2. Mortgage.
3. Real and Personal Property.
4. Common Law Pleading.
5. Evidence.
6. Corporations.
7. Negotiable Paper.
8. Partnership.
9. Contracts.
10. Sale.
11. Suretyship.

THIRD YEAR.

1. Real and Personal Property.
2. Insurance.
3. Equity Pleading.
4. Equity.
5. Quasi Contracts.
6. Domestic Relations.
7. Doctrines peculiar to New York Law.
8. Code Pleading and Practice.
9. Agency.
10. Bankruptcy.
11. Elements of Jurisprudence.
12. Office Practice.

NEW YORK UNIVERSITY.

New York Law School.

The New York Law School was incorporated in June, 1891. "It has been the aim and purpose of it to promote the cause of sound legal learning by pursuing and developing what is believed to be the best method of Legal Instruction which receives its name from the distinguished Instructor Professor T. W. Dwight." An applicant entering the Junior Class in the Law

School as a candidate for the Degree of LL.B. must either—

- (1) Be a graduate of a College or University or Scientific School maintaining a satisfactory standard; or,
- (2) Produce evidence of having passed the prescribed preliminary examination for the Regent's Academic Diploma; or,
- (3) Of having received an education accepted as equivalent to the Diploma;
- (4) Must be at least eighteen years of age.

The Course of Study leading to the Degree of LL.B. comprises two Scholastic years. A Third Year Course has also been established leading to the Degree of LL.M.

The subjects to be pursued in each year are as follows:—

FIRST OR JUNIOR YEAR.

1. Elementary Law.
2. Domestic Relations.
- 2a. Criminal Law.
3. Law of Torts.
4. Law of Contracts.
5. Law of Agency.
6. Law of Partnership.
7. Law of Negotiable Paper.
8. Law of Guarantee.
9. Law of Bailments and Customs.
10. Law of Sales of Personal Property.
- 10a. Law of Personal Property.
11. Law of Real Property.
12. Law of Leases.
13. Law of Mortgages.
14. Law of Easements.
15. Law of Trusts.
16. Law of Powers.
17. Law of Remainders and Reversions.
18. Law of Devises.

SECOND OR SENIOR YEAR.

1. Equity Jurisprudence.
2. Law of Corporations.
3. Law of Insurance.
4. Law of Wills.
5. Pleading and Practice at Common Law.
6. Pleading and Practice in Equity.
7. Pleading and Practice under Codes of Civil Procedure.
8. Law of Evidence.
9. Reviews of Special Topics.
10. Practice Court.

The Practice Court is held during the last half of the scholastic year and in this Students receive a practical training in the drafting of Pleadings, Affidavits, Orders, Forms of Process, &c. In the Examination for LL.B. Degree, a half-day will be assigned to the topics included within each of the following sub-divisions:—

(2.)—MEMORANDUM BY THE REGIUS PROFESSOR OF LAWS ON THE PROPOSED CHANGES IN THE LAW SCHOOL.

The Report of the Committee, upon which I am asked to give an opinion, suggests changes of a radical nature, and calculated, if carried out, to involve considerable expense.

The Committee apparently do not expect that these changes can be realised immediately, but they look forward to them as a high-water mark to be reached in the course of a few years. For this reason probably they do not frame any scheme, but confine themselves to suggesting courses for the Junior and Senior Sophister years, and for a Moderatorship Examination.

I desire to treat this Report with the respect due to the distinguished persons from whom it emanates; but I should fail in my duty to the University if I did not point out the serious objections to these views, and the mischievous results which, in my opinion, would result from their adoption.

The proposed changes may be summed up under two heads:—

I. The establishment of a complete School of Law within the University. This is what it practically amounts to, having regard to the subjects and courses suggested on page 4.

II. The treating of these subjects as part of the general educational system of the University, i.e., as equivalent to the Courses in Arts.

As every proposed change depends upon an accurate ascertainment of the facts, I propose in the first instance to deal with the Report from this point of view.

The first paragraph clearly implies that the Law School is at present regarded only as a preparation for the Legal Profession. In my opinion this is incorrect. I have always kept a record which distinguishes Trinity students into professional and non-professional. They are, roughly speaking, about equal in numbers. I give the numbers for Michaelmas term during the last five years.

	Professional.	Non-Professional.

All the Law Examinations and Prizes, viz., the LL.B. and LL.D. Degrees, the Reid Scholarship, and Prizes in International and Real Property Law, as well as the General Examination Prizes, are competed for by all indiscriminately. It may be said that there is no special instruction for these Examinations. This objection is dealt with in Sir E. Bewley's Memorandum, which is printed in the Appendix. It may be added that, wherever Honor Examinations and Prizes are instituted, the instruction for these is not given by Professors, but by coaches or grinders. This is eminently the case at Cambridge and Oxford, where "the books recommended to be read or consulted are very numerous," the examinations not being confined, as here, to a definite course.

It is suggested then that we should follow the example of Cambridge, by instituting a Moderatorship corresponding to the Law Tripos, and allowing our students to specialize in this subject, and thus obtain an Arts Degree. But no information is given as to the instruction which is provided at Cambridge. The Committee reasonably complain that the number of Lectures delivered at Oxford and Cambridge cannot be readily discovered from the Calendars. It cannot, in fact, be discovered from the Calendars at all.

The Committee therefore give only a list of the subjects for examination in the 1st and 2nd parts of the Tripos, a list of the University Staff, which is incorrect, and some other crumbs of information, the most important of which is that the two Degrees of B.A. and LL.B. can be obtained by taking Honors in the Law Tripos.

The Staff is stated to consist of four Professors and a Reader, and to include the Professor of International Law, and the Whewell Professor of Law. But there are in fact, not two Professors but one Professor whose proper title is the Whewell Professor of International Law. The Staff really consists of three Professors and one Reader. There are about 3,000 students resident in Cambridge. We have, I believe, about 500 or 600 students in residence or in the neighbourhood who are served by three Professors. These facts must shake the authority of the statement of the Report that "it is obvious that the position of Law in Trinity College, Dublin, compares very unfavourably with any of the important University Schools in the United Kingdom."

The Report then states—"There are, besides, Lectures to the several Colleges." The corresponding statement as to Oxford is, "Besides these (i.e., the Professors and Readers) there are Lecturers in the College." Both these statements are vague, and the former is incorrect. At Cambridge five Colleges only out of all the Colleges and Halls, viz., Trinity, Trinity Hall, St. John's, Caius, and Downing have Lecturers attached.

I have already stated in the Memorandum printed below, which was laid before the Committee, my objections to giving an Arts Degree as the result of an examination in Law; I do not therefore repeat them in detail. Professional studies are now crowding out the Arts; and at the rate at which we are progressing, the Universities bid fair to become mainly Professional Schools. One reason why our Medical Degrees stand so high is that we have insisted that the Medical student shall take an Arts Degree, not as the result of

an examination in any branches of Medical knowledge, but in Arts.

The Committee admit that a liberal education such as is afforded by our University is the best preparation for the Bar, regarded even from the point of view of professional success; and they regret that a diminishing proportion of barristers hold University Degrees. It would have been worth their while to have verified this statement by means of the figures which are within their own control and procurement. During the quin-quennial period, 1892-1896, out of 141 candidates called to the Bar, 82 were graduates and 59 non-graduates. During the last five years, out of 147 candidates, 97 were graduates and 50 non-graduates. The figures, therefore, point clearly in the opposite direction. But passing from this point, they think that the specialization which they propose would induce more students to enter the University. I do not agree in this view; I think that these students are well aware of the value of a degree, and would take it if they could. Nor do I think that if more students were thus induced to take degrees, the real object, i.e., a liberal education, would be secured. On this point I agree with Sir Henry Maine's opinion, as stated to the University Commission, that "it is impossible for the University to give a liberal education through Law exclusively." But this is what Cambridge and Oxford pretend to do. Cambridge, indeed, has been the chief offender in this respect, and complaints are frequently heard upon this matter. For her, however, this excuse may be made, that boys remain at school to a later age in England, and that the standard of education is higher than it is in Ireland.

Under the Cambridge system, as at present established, a boy can pass his Little-Go while he is at school. He comes up to Cambridge in December, passes his Little-Go, goes back to school till the following July, and goes into residence in October. He is then free to devote himself to Law alone during the whole of his University career. The examination is divided into two parts. He can pass the first part in his fifth term of residence, and the second in his eighth term.

As the result of these examinations in Law he can take the double degree of B.A. and LL.B. He appears to the public as having taken his degree in Arts as well as in Law. But he had abandoned Arts before he entered the University. If the proposed change is made, there would be a strong temptation to merge the LL.B. Examination in the Moderatorship, as has been done at Cambridge. But I question both the honesty and the expediency of this course.

I am unable to discuss the legal education of Edinburgh without much more information than that given in the extract from the Calendar of that University. The analogy of Edinburgh is by no means so clear as that of Oxford and Cambridge. For Scotch Law has substantially followed the Roman Law in many departments, and, moreover, the native Scotch Law is exceedingly technical. If, as seems probable, the University, with its apparently complete school, is entrusted solely with the education of candidates for the Bar, and receives the fees therefor, the circumstances would appear to be so different as to admit of no comparison. I notice, however, that a Professor is provided for each of the seven subjects, and that there are a number of class assistants. They do not propose to make two Professors do all the work.

I have already questioned the accuracy of the first paragraph of the Report. The second and third paragraphs contain the following statements:—

1. That the matter dealt with in our Lectures "has formed little more than an elementary introduction to the subject of Law."

2. That there has never been any attempt made to found a Scientific School of Jurisprudence in this University.

3. "That in this respect we are far behind other Universities in the United Kingdom and elsewhere." And on the following page it is stated—

4. "That at Oxford and Cambridge there are regular Scientific Schools of Law."

As to No. 1. This proposition, which appeared in Mr. Russell's letter, has been flatly contradicted, and, to my mind, clearly disproved by Sir E. Bewley, as regards the Chair of Feudal and English Law while it

DOCUMENTS.
SECTION E.
XXVII.

was occupied by him. It will be more convenient and will save time if I postpone for the moment its disproof as regards my Chair.

As regards No. 2, I think that such an attempt has been made. I presume that, by a Scientific School of Jurisprudence, which word means "the Science of Law" and nothing else, is meant a school in which Jurisprudence is taught. In 1877, at the suggestion, as it is stated by Sir E. Bewley, of some members of the Education Committee of the Benchers, the University founded a Chair of Jurisprudence and International Law, which latter phrase was deemed to include the subject incorrectly called "Private International Law." I may remark here in passing that the Benchers thereupon suppressed their own Chair of International Law and Equity, and have thus saved a sum which, including interest, must fall not far short of £10,000—a very reasonable course, as there was no use in duplicating the work. I held this Chair from 1878 to 1888, and lectured in successive years on Jurisprudence, International Law, and Private International Law. These lectures were not elementary. I used the best text-book on Jurisprudence, which the author, Professor Holland, modestly calls the Elements of Jurisprudence, and I got through the major and most important portion of it in the year. Any one who reads the first chapter, or the discussion on the Roman and Teutonic theories of possession or on the constituent elements of a contract will discover that the work is not elementary.

As to International Law, besides laying down the principles, I treated it historically, thereby falling in with the Committee's view, stated on page 3, as to the method to be used in a Scientific School. I had then just written a historical treatise on Ancient International Law, which had been effective in securing for me the Professorship. These lectures were not elementary, nor were the third year's lectures, for which the text-book used was Foote's Private International Jurisprudence. In this extremely complicated branch of Law it would, in my opinion, be absolutely impossible to deliver elementary lectures. This Chair was suppressed in 1888. I think that this is much to be regretted, but it may have been difficult to avoid after the acceptance of the Reid bequest.

As to Nos. 3 and 4, they must be considered together. The Committee state that at Oxford and Cambridge there are regular Scientific Schools of Law. Now, the proof of this assertion depends not on the fact that there are a number of Professors, but on the answer to the question, What do these Professors do? This the Committee say they have failed to discover.

They indicate, to some extent, what they mean by a Scientific School by suggesting that Trinity College should devote itself mainly to the Scientific and Historical side, while the King's Inns will develop these branches specially relating to Modern Legislation and Practice.

The Cambridge Staff, as we have seen, consists of three Professors and a Reader, viz., the Regius Professor of Civil Law, the Whewell Professor of International Law, the Downing Professor of the Laws of England, and the Reader in English Law. The two former may be taken to represent the Scientific branch of the School, and the two latter the Modern or Practical side.

The duty of the Regius Professor of Civil Law, according to a former Cambridge Calendar, is to deliver two courses of twelve lectures each during the year in Civil Law or Civil Law and Jurisprudence. He can deliver these at such time as may suit him. Dr. Abdy, the predecessor of the present Professor, held the post in conjunction with a County Court Judgeship. The present Professor, who has held the post for twenty-eight years, took his degree in 1858. His salary is £534 18s., with the addition of £10 10s., paid to him by every candidate for the Degree of LL.D., £3 3s. by every candidate for the Degree of Master of Law, and £2 2s. in each term by every student attending his lectures.

The Whewell Professor of International Law delivers one course of twelve lectures in the year. The present Professor took his Degree in 1850. His salary is £500, and he has resided for many years, and still resides, in London. He is confined, by a clause in the Founder's will, to a special branch of the subject. This clause is as follows:—He is "to make it his aim, in all parts of his treatment of the subject, to lay

down such rules and to suggest such measures as may tend to diminish the evils of war, and finally to extinguish war between nations."

This is the whole of the "regular scientific School of Law at Cambridge. I proceed to contrast its work with that which is done here. The Regius Professor of Laws gives fifteen lectures on International Law every Michaelmas Term which cover the whole subject, including the Law of Status, the Law of Nations in time of Peace, and the Law of Neutrality, from which the Whewell Professor is in terms excluded. International Law is a wide subject if treated historically, but it is possible to compress its principles and practice into fifteen Lectures, giving, at the same time, ample illustrations. Accordingly, the attentive student at these lectures becomes competent to form a judgment on any international question which may be discussed in the public prints. He becomes familiar, too, with such questions as have arisen during this war, e.g., those connected with the rules of military occupation, guerilla warfare, and the doctrine of continuous voyage or ulterior destination, as illustrated by the cases of the "Bundesrath," the "Herzog," and the "General," vessels seized by the British on suspicion of carrying contraband goods to a neutral port, which were intended for transmission to a hostile country. The work of the Regius Professor here is therefore both greater and more comprehensive than that of the Whewell Professor at Cambridge.

It has not yet been ascertained how many lectures the Regius Professor at Cambridge delivers on the Civil Law and Jurisprudence. The Regius Professor here delivers thirty lectures on these subjects. These lectures are in no sense elementary. The first three or four treat of the history and development of the Roman Law and Roman Constitution, with references to the various law-making authorities, from the expulsion of the kings until the final consolidation of the whole body of Law at the hands of Justinian. The method adopted in the other lectures is intended to combine the study of Roman Law, which is well adapted for the purpose, with that of Jurisprudence. The Roman Law is explained first, and then the corresponding English Law; after which the principle which underlies both is set forth. Such topics as Status, Ownership, Possession, Servitudes, Prescription, and Testamentary and Intestate Succession are treated in this way. The method has the further advantage that it is more attractive to the student, who feels that what he is listening to will serve him well in his profession. As far as our information goes at present, it seems not improbable that the Regius Professor of Laws in Dublin does nearly as much work as the two Professors in the Scientific Department of the Cambridge School; and it is worth while to add that the work is done at about one-quarter of the cost.

Turning to the School at Oxford, I proceed to supply a little of the information which is not to be found in the Oxford Calendar. I can do this best by quoting an extract from an article in the *Edinburgh Review* of October, 1869, on Oxford and its Professors, which is based upon a Parliamentary return obtained by Mr. Thorold Rogers:—

"Turning to the faculty of Law, it is to be noticed that a singular unwillingness to 'speak plain' manifests itself on the part of the Professors. Where accuracy might have been most reasonably expected it is not found. An honourable exception from this censure belongs to the Readers of English Law and Indian Law, who stand alone, apparently in keeping records of attendance at their respective lectures. It is significant that these two gentlemen are at once most popular and worst paid. The Law faculty presents the following return:—

Professor, &c.	Income.	Average Attendance
Regius Professor of Civil Law	£434 18s.	No record.
Vinerian Professor of English Law.	£300	No account kept about 20.
Chichele Professor of International Law and Diplomacy.	£1,500	About 35: no record kept.
Corpus Professor of Jurisprudence.	£300	No record kept: the class is a small one.
Reader in Roman Law,	£400	No account is kept: about 13-6.
Readers in English Law,	£300	10-60.
Readers in Indian Law,	£400	40-50.

"The Students attending the Lectures of the Reader in Indian Law are mainly, if not exclusively, Civil Service students, and thus constitute a class by themselves. Of the rest, it seems clear that four Professors and two Readers, with an aggregate income of more than £4,000, are provided to meet the needs of

certainly not more, probably less, than fifty students, at a cost to the University of £80 per student, every penny of which springs from endowment, and yet the Law School shows no tendency to increase. And it is an open secret in the University that many of the Graduates adopt the opinion expressed before the Commission by Sir Henry Maine: I am afraid that the Institution of our School of Jurisprudence suggests that it is possible to give a *liberal education through law exclusively*, which I myself believe to be impossible."

This was written in 1889. Since then new Statutes have been passed regulating the duties of the Professors other than the Chichele Professor, who is controlled by a Statute of an earlier date. Under these Statutes the Corpus Professor of Jurisprudence, whose tenure is quinquennial, is bound to lecture twice a week during two terms. He need only reside during three weeks in the year. He lives in London, and also has chambers in Lincoln's Inn. The Vinerian Professor and the Regius Professor of Civil Law, whose salaries are now fixed at £900, are bound to deliver each forty-two lectures in the year, and to reside for six months between the 1st of September and the 1st of July. They are also bound to give some such instruction as that referred to in the Statute regulating the duties of the Chichele Professor, but I have not been able to ascertain the amount with any degree of accuracy.

The Statute which regulates the duties of the Chichele Professor provides that he is to deliver a course of twelve lectures in each of two terms. It then proceeds—"Atque insuper per octo septimanas unius alicujus termini, bis ad minimum in unaquaque septimana per unius horæ spatium vacet instruendis auditoribus, in iis quæ melius sine ulla solennitate tradi possunt." It appears thus that the duties of the Professor consist in delivering forty lectures, and that they can be discharged within the space of fourteen weeks. No information is given on these matters either by the Calendar or by the Oxford Students' Handbook for 1901.

The annual cost of the Cambridge Law School is between £2,000 and £3,000. The cost of the Oxford School, omitting the Reader in Indian Law, is over £4,000. The cost of our School is under £900. I do not think that either as regards effective teaching, or economy, we have much to learn from Oxford or Cambridge.

I proceed now to examine the plan suggested by the Report. The theory is that Trinity College should "confine itself mainly to the Historical and Scientific side," while the King's Inns "will develop those branches specially relating to modern Legislation and Practice." The theory is sound enough, and it was in accordance with it that the Professorship of Jurisprudence and International Law was established in 1878. But when the Committee come to details, we find them suggesting courses absolutely inconsistent with this theory. The courses laid down by them for the instruction of Junior and Senior Sophisters embrace (subject to a reservation to be noticed presently), every subject taught either in Trinity or the King's Inns, except Pleading and Practice. They embrace, among other things, the Law of Personal Property, Contract and Tort. Now one of the two Professors at the King's Inns is the Professor of Personal Property, Contract and Tort. If this scheme were carried out, it would, of course, be the duty of the Hon. Society of the King's Inns to suppress his Professorship, and thereby save another £300 a year. To quote Sir E. Bewley, "such a duplication of lectures would not serve the cause of Legal Education in Ireland."

Other difficulties are suggested by the courses proposed. Why is Evidence omitted, an important subject, which is at present being taught in Trinity? What is the difference between the elements of English Law to be taught to the Junior Sophisters and the English Law to be taught to the Senior Sophisters? What is the difference, again, between the Elements of Political Science for the Junior and Political Science for the Senior Sophisters? These are original ideas, not borrowed from Oxford or Cambridge. But what are the books which suggest, or give any indication of, such a cleavage? The Board and Council will naturally ask for some information on these points. I agree with Sir E. Bewley and Professor Hart, both experienced teachers, in thinking that law is not a progressive subject, as are Algebra and Geometry, in

which you may commence with what is very simple, and proceed gradually to what is complicated and difficult. Each branch or department is taught separately, and it frequently must happen that a more difficult branch, such as Real Property, is taught before a simpler one such as Tort.

Another serious objection must be stated. A Legal Scholar, whose interests are really bound up with the success of his Chair, must hold for life; while his salary must approximate to those of the Divinity Professors, who are deemed to devote their whole time to the service of the University. The words preclude a septennial tenure, nor could such a person, who must be also an accomplished classic, be secured on these terms. Now, this system was deliberately abandoned in 1884 for reasons of overwhelming cogency.

Judge Longfield had held the Chair of Feudal and English Law for just half a century, during the latter portion of which period he had employed a deputy, to whom he paid at first one-seventh and afterwards two-sevenths of the salary. This system was deemed unsatisfactory; but the new proposals seem to me to involve its re-establishment.

The Committee express an opinion that the result of carrying out their proposals "will diminish the prevailing tendency to undue and premature specialization on the part of students for the Bar." I am of the opposite opinion. At present, if a Law student wants a Degree, he has to pass in the subjects known as Arts. Under the new system, which proposes to give him a Degree in Arts for proficiency in Legal Studies, he must substitute these studies for the former. The necessity of earning as soon as possible is becoming so pressing that a student will eagerly grasp at the first opportunity of learning something of the work which will be of use to him in his profession, i.e., something of that work which will be his life-long study. But, in so far as he does this, as I think, he fails to secure a liberal education.

The Committee further argue that the establishment of a Law Moderators'hip would not interfere with the competition for Scholarships and Studentships in Classics and Mathematics. I cannot conceive anyone thinking that it would; but this is entirely beside the mark. The real question is whether it would attract any of those who would otherwise have taken the ordinary Degree in Arts; I cannot conceive anyone thinking that it would not. It is notorious that it is much easier for many men to take a Junior Moderators'hip, or to be allowed their Degree in this way, than to take the ordinary Arts Degree.

The further statement occurs that "at Oxford and Cambridge Fellows of certain Colleges are chosen for proficiency in Legal Studies. I think that this statement is both inaccurate and misleading. It means, apparently, that certain Colleges (Downing and All Souls are mentioned) give Fellowships to Students as the result of distinctions gained in the Law School of the University.

It must be remembered, in the first place, that a Fellowship there is merely a reward for work done. It imposes no Collegiate or University duties—it is a magnified Studentship—it confers certain emoluments and other privileges, and is tenable for six years only. This has not been done by Downing College since the year 1883. At Oxford, as a rule, no Fellowship is given except as the result of a special examination; and I doubt that this examination has ever been confined to Law alone. All Souls College, by virtue of a special statute, has given Fellowships to certain of those chosen as University Professors, such as the Chichele Professor and the Vinerian Professor of the Laws of England.

For All Souls' Fellowships see note (p. 382).

The Report also contains the following paragraph—

"In order to build up a School of Law it will be necessary to have at the head of the School a Professor who can devote to his duties, both of teaching and administration, more than the two hours per week at present required of him."

This would appear to apply to the other Professors also, for the second paragraph on page 3 runs thus:

"We are of opinion that there can be very little real improvement unless the Board (the Committee have apparently forgotten the existence of the Council) require the Professors to devote a good deal more of their time to giving instruction in the subjects of their Chairs."

I may remark, *en passant*, that this is a little hard on the Reid Professor who delivers thirty-six lectures in the year, being only bound to deliver twelve. If, however, this fact had been known he would probably have been exempted.

There is a further statement in the paragraph at the top of page 4, that under the proposed system "Men of ability might then become interested in the study of Law, who would, in time, raise the character of our Law School and our Legal Degrees to a higher standard in the estimation of the public."

These paragraphs seem to me to convey the following propositions:—

1. That the Head of the Law School is only required to devote two hours per week to his duties.
2. That he does not devote to them any more time than is so required.
3. That it would not be in his power to do so.
4. That our Law School and Law Degrees at present rank low in the estimation of the public, and that the standard requires to be considerably raised.

These statements, and, indeed, the whole tone of the Report, are calculated to put upon his defence any Professor who thinks that they fail to do justice to the manner in which he has discharged his duty. Moreover, they appear to me to "deviate" so widely that it is necessary, even for the information of those who have to decide what changes may be expedient, to make a statement of the facts, showing what progress has been made in the School since the time when the legal members of the Committee were acquainted with its working, and showing further how long ago the work commenced, which the Committee think should now be started. It is an ungrateful task to set forth events *quorum pars magna fui*; but there is no other person competent to give the information, and no other means of correcting the erroneous impression conveyed by the Report.

First, as to the time occupied. Two hours per week would amount to fifteen hours per Term for the Head of the Law School, and twelve hours per Term for the other Professors. It is, no doubt, not impossible for a Lecturer to cut down his work to these limits; but I have heard a Professor, in giving evidence before a Commission of which I was Secretary, resent warmly this method, when suggested by a Commissioner, of measuring the time and labour given to the discharge of these important duties, and the Commissioner accepted the reproof.

There are three methods of lecturing—one is to write out the lectures and read them out, year after year, to successive classes of Students. This is an easy and not uncommon practice; but, in my opinion, it is not teaching. The second method is to read out the textbook, and expound in going along. I have known this also to be practised, and, like the former, it has the advantage of requiring no preparation; but it is a lazy and ineffective method, and does not impress the class. The third method is to be such a master of the subject as to be able to speak to the students face to face, using at the same time such notes as will prevent undue divergence from the topic which is being examined. This, which I conceive to be the only true method, involves a special preparation for each Lecture. Since I commenced to lecture, more than twenty-three years ago, during which period I have missed but one lecture (a record, I believe, in the University), I have never once omitted this special preparation. It has occupied, on an average, from one to two hours. I have therefore given to the work of teaching alone, not the minimum of two hours per week, but between four and five hours, or upwards of thirty hours in the Term. The teaching, of course, is the principal part of a Professor's duties; but there are others of which no mention is made. During the past Term, I have had four heavy examinations, viz.:—Moderatorship, the two Law Degrees, and the Reid Scholarship, not to speak of the Term Examination. I estimate the time expended upon these heavier examinations at not less than twenty hours for each. So that, while a casual reader of the Report would infer that the Head of the Law School escaped with twelve hours per Term, the fact is that he gives to the discharge of his duties six or eight times that amount of time.

Further, I have thought it my duty, from time to time, to lecture publicly on topics, for the time being,

of international interest. I think that this practice is of advantage to the University, and that it tends to strengthen the position of the Law School. I did this during the Hispano-American War; and in Hilary Term last I delivered a series of three Lectures, which were subsequently printed, on the History and International position of the Boer Republics. This task, which involved a good deal of careful reading, took, as far as I can estimate it, not less than four or five weeks of solid work.

Passing now to the history of my connection with the Law School, and the reforms which have been effected, I will endeavour, as far as possible, to preserve the chronological order. When I became connected with it, in 1878, its management and administration fell at once into my hands. The reason of this was that the relations between my two colleagues, one of whom was a Deputy Professor, were strained, and that the Registrar was not a man of business habits. Thus there devolved upon me a good deal of the work of administration and correspondence which is now done by the Registrar. The School was then in a condition to which the description in the Report would apply. There was a trifling examination in a short course for the LL.B. Degree, and the LL.D. was purchaseable, the thesis having, as in other cases, come to be regarded as the merest form. The Degrees were valued accordingly. In that year (1878) I took an active part in obtaining a Committee which would initiate some reform and in particular would put a stop to the sale of Degrees. I drafted the Report of this Committee which was accepted by the Board and Council and confirmed by the Senate. The LL.B. examination was stiffened up, an examination for the LL.D. Degree was established, and it was enacted that the thesis system should cease as from the end of 1884. On the 16th of June, 1885, the Senate, at the instance of the Board, and without reference to the Council, revived this practice in favour of all who should have taken the LL.B. Degree before the end of 1881; and I have never since been able to get this rule repealed.

Towards the end of 1881, four Students, Messrs. Fenton, Wilson, Fitzmaurice, and Harvey, who had passed for the Indian Civil Service, found themselves in a derelict condition as regards instructions in Hindoo and Mohammedan Law. In this difficulty, I undertook the work, which was no part of my duty. They came to me for an hour and a half at night during Michaelmas Term. They all passed creditably at the examination, and one with distinction. I should have been quite unable to discharge this onerous task if I had not foreseen the difficulty and made preparation accordingly.

In November, 1883, on the death of Dr. Richey, I was appointed Deputy Professor of Feudal and English Law, which position I held, with my own Professorship, until the end of 1884, when Sir E. T. Bewley, on the death of Judge Longfield, was elected to the Chair. In this year, 1884, during the indisposition of the Regius Professor, I took his work also as a volunteer.

In 1885, in conjunction with Professor Bewley, I took an active part in obtaining another Committee, with a view to further reforms. I drafted the Report of this Committee also, which recommended that the Course for the LL.B. Degree should be extended; that the LL.D. Course should consist of the same books, with three additional ones, and that an interval of at least six months should elapse between a Candidature for the LL.B. and LL.D. Degrees. The Report also recommended once more the abolition of the ignoble method of obtaining an LL.D. Degree by purchase; and I drafted and sent in with the Report a Latin statute which should carry out the proposed regulations. This proposition was rejected, as was the proposition to place an interval between the examinations. The interval being an essential part of the scheme, its rejection was damaging, as it enabled the candidates to take the two Degrees together, two-thirds of the examination being the same for both Degrees.

In March, 1888, I was appointed Regius Professor of Laws. During the Trinity Term of that year I delivered voluntarily an additional Course of Lectures in order to enable those students to get credit for their year who had attended two terms of lectures in connection with the then lately suppressed Professorship.

In 1892, when the Chichele Professor—the principal Law Professor at Oxford—was staying with me, he complained that our examinations were of such a

nature as to attract Oxford students who might otherwise take their Degrees in their own University. I admitted that this was a legitimate complaint; I told him of the efforts which had been made, and said that I was about to make another attempt to remedy the grievance of which he complained.

In 1893, at the instance of Professor Hart and myself, another Committee was moved for and obtained. I drafted the Report of this Committee also, which was accepted, and the result was the present system, which came into operation in 1895. When I met Professor Holland a year or two afterwards, he told me that he was aware of what had been done, and that they were entirely satisfied at Oxford with our present arrangement.

In 1893 I became an Associate of the Institut de Droit International. This body, which is limited to sixty Members and sixty Associates, comprises in its ranks the most eminent International Lawyers of Europe and America. I did this, because I was anxious that our University should not be left unrepresented in so distinguished a company. Its sessions, which occur about twice in three years, and occupy a week, are generally held in some continental city. I have attended three of the seven meetings since held, and have taken a share in the work of its Committees. I mention these things to show that I do not limit my service to the University to the minimum required of two hours per week in Term.

In 1899 I made another effort to terminate the practice of selling Degrees, being anxious that we should escape from this discredit before the opening of the new century. On June 21st in that year, I moved the following resolution in the Council:—"That in the opinion of this Council it is desirable that the resolution as to Law Degrees, passed by the Senate on the 16th of June, 1885, be repealed, and that the Board be requested to bring this matter under the consideration of the Senate."

This resolution met with so little sympathy that I did not press it to a division. It was not even supported by Dr. Traill, who was then a Member of the Council and present on the occasion. But it is this practice which has done most to discredit the Degree in the eyes of the public, who do not distinguish the old system from the new. This distinction, however, is well known, if not to the public, to those most concerned, viz., the students and those who take the Degree. Not long ago a student remarked, concerning some one for whose merits he desired to obtain appreciation, that he was an LL.D. "Yes, but under the old system," was the quick retort. The Rev. Thomas Brook, who took the two Law Degrees at the last Commencements, informed me that his object in doing so had been to obtain a permanent Army Chaplaincy, and that now he was certain of success.

I may give one more illustration of the difference between the condition of the School when the Committee knew it, and its present condition. In Michaelmas, 1867, a near relative of mine—an Engineering student—had been in for his final examination. Being apprehensive of failure, and anxious to cover his retreat, he conceived the idea of going for an LL.B. He knew no law, and the examination was only four days off. He borrowed the notes of Judge Longfield's Lectures, and made them up carefully. He also spent a few hours over the Institutes of Justinian. On receiving the examination paper, which contained eighty or a hundred questions, he found that he knew more answers than he could put down in the time. He came out near the bottom of the Engineering List, and near the top of the LL.Bs. He subsequently purchased the Degree of LL.D. At present it would take a smart man six months' reading to pass for the LL.B. Degree, and not less than a year to secure both. Many take much longer than this, and some fail altogether.

I think that I may now put the question to those who read this Paper—including the signatories of the Report, who surely were unaware of many of these things:—"Does the Report present a fair and just idea of the condition of the Law School—either absolutely, or as compared with the Oxford and Cambridge Schools—and of the work which has been and is being done in it by the Professors?"

Hitherto this criticism has been of the destructive order. It may fairly now be asked, "In the matter of construction and improvement, have you any counter-proposition to make?"

This may be treated under two heads:—

EXAMINATIONS AND TEACHING.

I. As to Examinations, while they are capable of some improvement, the number ought not to be increased. For the Degrees, the courses are excellent. Each of them is nearly equivalent to a Moderatorship Course, the main difference being that a higher standard is exacted for the Degree than that which suffices to obtain a Junior Moderatorship. The Reid Scholarship examination also is excellent, and so comprehensive that one or two additions would make it as good as the proposed Moderatorship could possibly be. There is, moreover, a most valuable condition attached to it, which could not be attached to a Moderatorship, viz.:—that candidates must have attended continuous courses with all the Professors. Such a condition would exclude from this Moderatorship all non-resident students. The moment, therefore, that Law is made a department of Arts, as proposed by the Report, we are deprived of this valuable lever, with the result that the crammers, as at Oxford and Cambridge, will become more prominent. Let it not be forgotten that Professors will not and ought not, as pointed out by Sir E. Bewley, to descend to this—more particularly, if they are to be the examiners themselves. Further, the proposed Moderatorship would cause to disappear the Moderatorship in History and Political Science, an admirable combination of History, Political Economy, and Jurisprudence, a knowledge of which subjects goes much farther in the direction of a liberal education, and entitles the candidate *honestly* to a Degree in Arts. It is curious that in theory we all maintain the necessity for a liberal education, while our practical proposals so often run counter to it; just as in theory we are often found inveighing against examinations, while, in practice, we are constantly inventing new ones.

II. As to teaching, I would suggest that before proceeding to provide additional teaching at further expense, we should endeavour to utilise what we have. There are 117 lectures delivered in College in the year, not 108, as stated in the Report (the Registrar of the Law School might, I think, have been expected to know this); but, save in the case of the Reid Scholarship, a student can fulfil all collegiate and professional conditions by attendance at fifty-four, i.e., less than half. I think that, either for professional privileges or for any other purposes, all three courses should be attended. As regards the ordinary student who attends lectures merely for the purpose of escaping from some branch of his Arts course, this would be very desirable. I have always thought that this individual, as compared with the medical student, obtained his exemption on too easy terms. There is a danger in allowing a student to select two courses out of three. He will be attracted, not to the course which is most profitable for him, but to that which he can most easily negotiate; and thus it is liable to happen that the most ineffective Professor will have the largest class.

I think, moreover, that the two principal Professors might lecture three times a week instead of twice. This could be arranged by allowing the Reid Professor to lecture in the afternoon, which would be more convenient to him. He could not be asked to increase his lectures, as he already delivers three times the number required of him. If these suggestions, which are neither revolutionary nor expensive, are carried out, the Law students will be provided with as much teaching as is good for them. The scheme might involve, as suggested by Sir E. Bewley, an increase in the number of lectures delivered at the King's Inns; but there could be no serious difficulty about this.

Again, I am of opinion, that the suppression of the Chair of Jurisprudence and International Law was a mistake, and that it ought to be revived. I would assign to this Chair, Jurisprudence and Private International Law, leaving International Law, with the Roman Law, to the Regius Professor, as these two subjects run conveniently together. The lectures of this Chair should be delivered in College, in the afternoon, three times a week, to Trinity and King's Inns students. If this were done, I should be disposed to limit the Reid Professor to the duties prescribed by law, and to enforce attendance at the other three courses. The Reid bequest has not been an unmixed blessing, the Course being controlled by the testator's desire, and therefore not exactly what a free agent would select. Moreover it is not certain that every

XXVII.

Reid Professor will acquiesce in the present arrangement.

In considering any reform, it must not be forgotten that the work is carried on conjointly by Trinity College and the Hon. Society of the King's Inns. We are forcibly reminded of this by Sir E. Bewley when he says that "This connexion between the King's Inns and Trinity College, which is of immense importance in reference to the subjects under discussion, has been entirely ignored by Mr. Russell in his letter."

It appears to me that if the word "almost" were inserted before "entirely," the same remark would be applicable to the Report of the Committee of which Mr. Russell is the Secretary. There is a vague reference to the King's Inns in one paragraph of the Report, but this, as already shown, is "entirely ignored" when the Committee come to adumbrate their scheme.

To my mind the present arrangement between the two bodies suggests the idea of that sort of partnership which is known as a "Leonina Societas."

The Hon. Society, which alone can confer the Degree of Barrister-at-Law, receive large fees from their Students, in return for which they are bound, like the Inns of Court in London, to provide a sufficient legal education. They provide this education by supplying them with the services of five Professors, three of whom are paid by the University, and two by themselves. This is an enormous advantage to the Society; but Trinity gets no countervailing benefit—not even a remission of the fees for Trinity Students, which, if adopted, would be far more efficacious in inducing men to enter Trinity and take Degrees, than the plan recommended in the Report, of amalgamating Law and the Arts. This being so, I would venture to suggest, as not inequitable, that the salary of the new Professor should be paid by the Hon. Society. This suggestion may be supported on two grounds:—

First, as a partial compensation to the University, for the great advantage which has accrued to the Hon. Society from the connexion; and

Secondly, on the ground that owing to the establishment of the Trinity Professorship in 1878, and the consequent suppression of the similar Professorship in the King's Inns, they have saved a capital sum, the interest of which would suffice for this endowment.

I set no store upon summaries of the systems pursued in other Universities, and therefore need not notice at length the contents of the Appendix. To make this information of any value, it would be necessary to show what is actually done there. Moreover, nothing is more misleading than a false analogy, and unless our circumstances could be proved to be entirely similar, it would be dangerous to adopt any of these systems as a pattern. I notice, however, one statement of importance. It appears that at Harvard, which is said to have "the largest and best equipped Law School in the United States," "the opinion appears to prevail that the general education of the University should be separated from the special study of the Law, and that the former should precede the latter." This is the principle which has hitherto been adopted here, and which has given to our Medical Degrees so marked a superiority. It is the principle which I earnestly desire to maintain, but which the Committee, apparently, are anxious to abandon. I have reason to think that, as regards Cambridge and Oxford, the value of the ordinary Degree has been depreciated by their excessive specialization, of which this blending of the Legal and general education of the University presents so marked a feature, and that the value of our B.A. Degree, in England, has risen correspondingly. How, indeed, could it be otherwise, once the British public begin to understand that a student at Cambridge may spend his whole time in studying Law, and having passed the examinations which entitled him to a Degree in Law, may get an Arts Degree thrown in? I trust that we shall not abandon an asset which must continue to grow in value, while Oxford and Cambridge continue to specialize.

At Oxford, too, it would appear that the evil example of Cambridge was followed with some hesitation: for the rule is still maintained that a Degree in Arts is a necessary condition for entry into the Faculty of Law. But this is a fiction: for the B.A. may be obtained by passing an examination in Jurisprudence. I notice, however, this passage in the Oxford Handbook for 1901, which is issued under the authority of the University: "There are many reasons for an opinion very largely held, that students who are able to do so, will turn their University education to the best account by devoting themselves for at least three years to the School of Literæ Humaniores, and taking up their Law studies after they have passed this school."

For these reasons I am of opinion that it would be more prudent to allow the Law School, standing apart as heretofore, to continue its progress upon the lines, and according to the methods which have hitherto been used with, as I think, no small measure of success; and that it would be a mistake at a critical moment in the history of the University, to make a violent change in the policy of gradual development which has produced such satisfactory results. "It were well," says Lord Bacon, "that men in their innovations would follow the example of time itself, which indeed innovateth greatly, but quietly, and by degrees scarce to be perceived."

The magnitude of the subject and its importance must be my excuse for the length of this paper. I have now only to add the expression of my profound regret that it has fallen to my lot—as a duty to the University and in justice to myself—to put forward views which differ so widely, both as regards matters of fact and of opinion, from those contained in a document underwritten by such distinguished names.

H. BROUGHAM LEECH.

January 10th, 1902.

NOTE TO PAGE 379.—The conditions under which Fellowships are obtained at All Souls College are so interesting, and at the same time so unlike those suggested in the Report, that it is worth while to state them. This College offers two Fellowships every year for competition "after an examination in subjects connected with the studies of Law and History." The candidates have to declare, on putting down their names, whether they wish to be examined in Law or in History; and receive accordingly three technical papers in one or the other of these subjects. But all the candidates receive the following papers:—

1. Passages to translate from Greek, Latin, French, German, and Italian.
2. A General Paper, with questions on any subject—e.g. Political Economy, Constitutional History, Architecture, History of International Law, Literary Criticism, the Drama, Music, etc.
3. An English Essay.

In making up the award the Jurists are not severed from the Historians. The men who are deemed the best are chosen without reference to this.

The paper on Roman Law contains passages for translation from Justinian. There is also a *viva voce* examination in translation from Greek and Latin. It is clear from this that the mere specialist in either technical subject has a poor chance against the classically trained candidate.

The General Paper, set in 1900, contained the following questions for discussion:—

2. "Vulgar criticism calls Jane Austen's work Dutch painting."
3. The place of colour in architecture.
8. "Wagner is not a man, he is a disease." Criticise this.
10. Does the history of British Drama justify the existence of a stage censorship.

(3).—REPLY OF LAW SCHOOL COMMITTEE TO OBSERVATIONS ON THEIR REPORT.

We have considered the memoranda furnished to the Board by the Professors in the Trinity College Law School, which have been referred to us for consideration.

These papers contain suggestions which will prove useful if the scheme of reform embodied in our Report is carried out. The Memoranda submitted by Professors Bastable and Baxter are especially deserving of careful consideration by whatever body is entrusted with the task of working out, in detail, the principles laid down in our Report, in the event of its being adopted by the Board.

The paper submitted by Professor Leech is conceived in a different spirit, and may be fairly described as a plea for the continuance of the existing state of things, with certain modifications in matters of detail. Of the fourteen pages of this Memorandum, only three are devoted to suggestions for the improvement of the School, while eleven are allotted to what the writer describes as criticism "of the destructive order," directed against the recommendations contained in our Report.

The most serious criticism of this order is that in which Professor Leech challenges the accuracy of the paragraph in our Report in which we express "regret that a diminishing proportion of men called to the Bar are holders of University degrees." This paragraph is the foundation of our suggestion that means should be adopted of attracting a larger proportion of candidates for the Bar to the University by the establishment of an Honor Course and Moderatorship in Law and kindred subjects. Professor Leech accuses us of founding our recommendation on a statement, without verification of that statement by means of figures which are within our procurement, and which figures (he says) "point clearly in the opposite direction."

The figures are as follows, for each of the decennial periods comprised in the latter half of the nineteenth century, the period to which our observations are applicable. Appendix II. gives the details for each individual year:—

—	Admitted to the Bar.	With University Degrees.	Without Degrees.	Percentage with Degrees.
1851-1860	157	139	18	88
1861-1870	213	185	28	86
1871-1880	296	230	66	77
1881-1890	307	226	81	74
1891-1900	292	185	107	63

It is obvious that these figures verify our statement in the most ample manner, and it is strange that Professor Leech should have supposed that the existence of the tendency to which we referred could be proved, or disproved, otherwise than by returns extending over a long period of time. A comparison of short periods will show fluctuations in either direction greater than the variance which Professor Leech has discovered, and on which he founds his destructive criticism of a statement, the truth of which ought to be well known to everyone interested in Legal Education, and ought to stimulate the University of Dublin to make an effort to stay the progress of the decadence which has now been progressive for fifty years.

The decline of University education in the real sense of the term, among candidates for the Bar, would have been more apparent if we had distinguished the holders of Degrees obtained by mere examination from those who had the benefit of instruction in Trinity College, the Queen's Colleges, Oxford or Cambridge.

A good deal of Professor Leech's paper deals with matters of fact relating to the actual working of the Law Schools at Oxford and Cambridge. We have not the same means of testing the accuracy of this portion of his paper, as we had when he was dealing with facts and figures within our own procurement. Accepting, however, Professor Leech's Memorandum as substantially accurate in this respect, it fully supports our statement that, as regards an attempt "to found

a scientific School of Jurisprudence in this University, we are much behind other Universities in the United Kingdom and elsewhere." We have not suggested either Oxford or Cambridge as the model for our reformed Law School. If the general recommendations of our Report are adopted, a careful detailed examination of the constitution and working of each of these schools with others to which we have referred will become of importance. But it is quite apparent that, rightly or wrongly, a different and a higher idea of the position, in regard to the general course of University Education, which should be occupied by Law Studies prevails in England, Scotland, and America, from that which has hitherto prevailed in our University.

It is to be regretted that Professor Leech has devoted so small a part of his elaborate paper to "counter-propositions" in the matter of construction and improvement. We can only say that we regard his suggestions as inadequate to provide Law students "with as much teaching as is good for them," even under the system which he proposes to retain.

He appears to think that he and the other Professors in the Law School have been put on their defence by our Report. This is an entire misconception of the position. If it had been relevant to the subject of our Report, we should have fully recognised the improvement which has taken place in the Law School during the period to which Professor Leech refers.

His Memorandum, and those submitted by Sir Edmund Bewley and Professor Hart, contain important and interesting information as to the work that has been actually done in the School. Our criticism was not directed against individuals, but against the system under which they worked. The fact that the Law School of Trinity College has attained no higher position among the Universities of the world, although it has engaged the services of such accomplished lawyers as Judge Longfield, Sir Edmund Bewley, Dr. Richey, and the present Professors, conveys to our minds the strongest condemnation of the system and conditions under which they have worked.

Professor Leech sums up our proposed changes as amounting to:—(1) "The establishment of a complete School of Law within the University." This description, though correct in one sense, ignores the proposed connexion with the educational courses at the King's Inns. (2). The treating of the subjects and courses suggested on page four of our Report "as part of the general educational system of the University—i.e. as equivalent to the Courses in Arts." Later on he expresses the opinion that our proposals will lead to undue and premature specialization, describing our system as one which proposes to give the student a Degree in Arts for proficiency in Legal Studies.

It is an absolute misapprehension of our proposal to say that it treats the suggested course of legal study "as equivalent to the courses in Arts."

This course cannot be taken up, with privileges in the Arts Course, until a student has reached the third year of his Arts Course, a time at which, under the existing regulations, a professional student in Divinity, Medicine, Engineering, or Law, is allowed to specialize. It is true that we recommend that Degrees in Arts should be attainable by successful candidates at the Moderatorship Examination in Law, who have passed through the Arts Course with the modifications now altered to professional students, following in this respect the example of the English Universities, and the universal custom of our own University with regard to other Moderatorships. But to describe this proposal as one which treats legal studies "as equivalent to the Courses in Arts" is plainly erroneous and misleading. Professor Leech also ignores the essential fact that the subjects which we propose to include in the specialized curriculum comprise a range of liberal education at least as wide and as high, in kind, as that of any existing Moderatorship Course, except the two principal Courses of Mathematics and Classics. We expressly suggested that the Moderatorship Course in Law and kindred subjects should occupy a position similar to that held by the minor Moderatorship Courses, such as Experimental Science, History, and Literature.

DOCUMENTS.
SECTION E.
XXVII.

Professor Leech lays great stress on the question of expense. We observe that, in his letter of the 20th of May, 1901 (printed as an Appendix to his Memorandum), he urges, as a financial argument against the establishment of a Moderatorship in Law, that "instead of receiving the LL.B. fee, the University would present the student with a gold or silver medal." We are quite as anxious as Professor Leech can be to avoid unnecessary expense, though we do not consider that we have been constituted, by the reference to us, custodians of the finances of the College. We have submitted to the Governing Body moderate proposals, which would, in our opinion, lead to the creation of a school of legal education comparable to those which we find existing elsewhere. It is for them to consider whether the funds at their disposal will admit of the establishment of such a school.

We believe that by attracting additional students, as a result of the improvement of the Law School, any additional expense will, to a large extent, be counterbalanced. We also believe that the existing funds, including what is paid to the Professors by the Benchers out of the fees paid by King's Inns students, can be more efficiently applied. But we suggest that considerations of expense should not be allowed to prevent an attempt to make the Law School efficient and worthy of the University.

On the whole, we see nothing in the Memoranda which have been submitted to us, to alter the conclusions at which we arrived, or to modify, in any material particular the proposals which we have presented to the Board.

Appendix No. 1 contains our detailed observations on various matters contained in the Memoranda submitted to us; and Appendix No. 2, as already stated, contains particulars for each year, of the number of Graduates and Non-Graduates admitted to the Bar.

(Signed) D. H. MADDEN, *Chairman*.
GERALD FITZGIBBON,
H. P. JELLETT,
ANTHONY TRAILL,
ROBERT RUSSELL, *Secretary*.

APPENDIX I.

The following extracts from the Memorandum of Professor Leech show that he has entirely misapprehended the fundamental principles on which the Report of the Law School Committee was based:—

Professor Leech says—

"Under the new system, which proposes to give a Degree in Arts for proficiency in Legal Studies, he must substitute these studies for the former" . . . "In so far as he does this . . . he fails to secure a liberal education." . . . "It is curious that in theory we all maintain the necessity for a liberal education, while our practical proposals so often run counter to it." . . . "At Harvard . . . the opinion appears to prevail that the General Education of the University should be separated from the special study of the Law, and that the former should precede the latter." . . . "This is the principle which I earnestly desire to maintain, but which the Committee apparently are anxious to abandon." "I agree with Sir Henry Maine's opinion, that it is impossible for the University to give a *Liberal Education through Law alone*." "The modern tendency . . . has been to crush out the Arts, and to allow students to substitute for them what are really professional subjects. . . . Even the Medical School has never proposed that a Degree in Arts should be taken as the result of an examination in Medicine. I trust that it may not be reserved for us to take this retrograde step." . . . "A man who abandons all his General Education at his Little-Go, and devotes himself to that subject alone which is to be the business of his life, will prove on the whole to be an inferior creature. But this is exactly what the new proposals encourage him to do."

The Committee have made no such proposals, but the very opposite. They say:—"The encouragement of Legal studies in the University, and the improvement in the Law School, will, we believe, diminish the prevailing tendency to undue and premature specialization on the part of candidates for admission to the Bar." "We believe that a *Liberal Education*, such as is afforded by our University, is the best pre-

paration for the Bar, regarded even from the point of view of professional success." "It would, we believe, be of great public advantage if a larger proportion of candidates for the Bar could be attracted to the University." "The subjects of Classics and Mathematics . . . would be supplemented, not superseded, by the Law School Course of Study—that Course might be taken up with advantage by other than professional Students."

The study of Law, as a scientific subject, irrespective of practice is part of a Liberal Education.

After Little-Go, students must keep three terms before they can present themselves for Degree. Legal studies are allowed to replace a portion, one-fourth only, of the Arts Course at present in the Sophister years, and the recommendations of the Committee strictly preserve the Arts Course in this respect. At the Degree Examination alone, students are allowed to specialize, and that only for the purpose of obtaining High Class Honors at Moderatorship Examinations. Medical Students in particular can thus specialize in *Natural Science*, and others can specialize in *History, Jurisprudence, and Political Science*. The Committee do not propose to put an end to this latter Moderatorship, as is supposed by Professor Leech, but to establish another on very similar lines, including the same subjects, but in different proportions, and in more extensive branches, with others in addition.

Sir Edmund Bewley, quoted by Professor Leech, and Professor Hart, appear to consider that the Law School should be purely professional, and the former objects to Honor Lectures in Law. "Such Lectures appear to me to be wholly out of place in a Professional School . . . The object of a Professional School, as I understand it, is to prepare all the students who pass through it for the profession with which it is concerned, and not to allow anyone to receive the stamp of having passed through it who is not qualified to practise his Profession."

Professor Hart says:—"I cannot approve of the proposed alterations . . . It is a Professional School, and its object should be to afford such an education as will best fit a student for entering upon the practical work of his Profession."

The Committee disagree with these views. They state, in their Report, that they "are of opinion that the Law School in Trinity College should be regarded, not only as a preparation for the Legal Profession, but as forming a part of the General Educational System of the University" . . . "There has never been any attempt made to found a Scientific School of Jurisprudence in the University." This is what is aimed at in their Report, and minute criticisms on matters of detail cannot affect this issue. The facts that the "Moderatorship in Legal and Political Science" is suggested as a second subject for Studentship, and that the same subject is suggested to become part of the Fellowship Course, so as to carry out an essential idea in the original Constitution of the College, viz., that one of the Fellows should be a Jurist, show that the whole scheme on which the Report was based, provided that the Arts Courses should in no way be sacrificed in the advanced study of Law.

With regard to the criticisms of Professor Leech on various matters of detail in the Report of the Law School Committee, it is to be observed that they do not in the least affect the main issue raised in that Report, but it may be advisable to consider some of them which at first sight might seem to be of importance.

In Cambridge it appears that the subject of International Law belongs to the Whewell Professor, and is not treated by a separate Professor. The Committee gladly accept this unimportant correction.

The Committee stated that, in addition to the Lectures of the University Professors in Law, "there are, besides, Lectures in the several Colleges." The Regius Professor points out that this is the case in five Colleges only. The Committee have no objection to remove the word "the" from their statement.

The Committee gave the number of Law Lectures here as 108, instead of 117. They accept the correction, adding, by way of explanation, that the extra nine Lectures, though not part of, are extra to the Compulsory Course.

The Committee stated that the number of Lectures in Oxford and Cambridge cannot be readily discovered, and they are glad to have the want supplied by Professor Leech, but they observe that he omits all

reference to the course of legal studies at Edinburgh University, consisting of 440 Lectures. He has also entirely ignored the remarkable information obtained by the Committee from America, especially from the Harvard University, which is said to be "the largest and best equipped Law School in the United States, and ahead of any others in teaching Common Law and Equity profoundly." The Committee repeat the statement, supplied on high judicial authority from the other side of the Atlantic, that "the Professors of Harvard have, throughout America, finally dispelled the inveterate delusion that law is not a science but a handicraft to be learned by an apprenticeship in chambers or offices. The aim of the Law School at Harvard University is the promotion of a scientific legal education, founded on the study of English law exclusively."

The Committee fully endorse these views, and go still further in the same direction in their recommendations, by including other branches of legal education with the study of English law, all being founded on a similar scientific basis.

The Committee consider that the comparison made by Professor Leech of the amounts of salaries paid to the Law Professors of Oxford, Cambridge, and Dublin, is quite irrelevant to the fundamental questions at issue, particularly when it is known that those salaries at the two former Universities are supplied almost entirely from private endowments. The Committee also fail to see what the number of students at the Universities, quoted by him, have to do with the question. The Report has only to do with the number of students receiving instruction in Law, and the provision that ought to be made by the University for them. The return given by Professor Leech of the numbers of Professional and non-Professional students who attended the Lectures in Michaelmas Term of the last five years, viz., 78 and 86, furnishes a strong argument in favour of the view of the Committee, that there is a demand for a really Scientific School of Law, as distinguished from a merely Professional School, such as that of Trinity College, Dublin, is claimed to be by Sir Edmund Bewley and Professor Hart.

Professor Leech states, as an argument against the establishment of Honor Examinations and Prizes, such as Moderatorships with Medals, that "the instruction for these is not given by Professors, but by coaches or grinders." Whatever may be the case at Cambridge, as stated by him, this is certainly not the case here. In the Honor Courses of Mathematics, Classics, Metaphysics, Experimental Science, Modern Literature, and Natural Science, the instruction is given by Fellows and Professors, but the Committee recognise that there is not likely to be any instruction for a Moderatorship in Legal and Political Science unless special provision is made for it.

The Committee pointed out that the teaching in the Law School is quite inadequate, when the principal Professors only lecture for two hours per week in three Terms in the year, but Professor Leech seems to think it a sufficient answer to enumerate the hours occupied in preparation for those lectures, and the hours occupied at Examinations and in occasional public lectures. The students are concerned only with the hours devoted to their instruction, all other considerations are therefore irrelevant, so far as they are not affected thereby. So long as a Professor occupies an onerous official post of a totally different nature outside the College, which must occupy the principal part of his time, it will be impossible for him to discharge adequately the duties of a Professor in the Law School to the extent which, in the opinion of the Committee, will be necessary under the scheme of reform which they recommend. Professor Leech's reference to the case of Professor Abdy, of Cambridge, is rather unfortunate for his argument. He states that Professor Abdy held his post in conjunction with a County Court Judgeship. It will be for Professor Leech to explain how it happened that in the first edition of his book on "The Commentaries of Gaius, and Rules of Ulpian in 1870," Dr. Abdy is described as "Regius Professor of Laws at Cambridge," while in the second edition, of December, 1873, he is described as "Judge of County Courts and Late Regius Professor of Laws in the University of Cambridge." Dr. Abdy thus appears not to have held the two posts in conjunction, but to have resigned his Professorship when he became a Judge, a fact which might have

been known to anyone using his standard work as a text-book.

The history of the foundation of the Chair of Jurisprudence and International Law as given by Professor Leech and Sir Edmund Bewley is not quite accurate. In 1877 a Committee, consisting of the late Judge Longfield (Chairman), his Deputy, Dr. Richey, the Regius Professor of Law, Dr. Webb, and one of the Benchers, was appointed to consider the question whether the teaching of Jurisprudence and International Law could be united with instruction in Roman and Civil Law, and committed to one Professor. They were unanimously of opinion that each of these subjects was sufficient fully to occupy the time of one Professor, and accordingly the new Chair was founded in 1878. The two Chairs were amalgamated in 1888, under the present Regius Professor, and have so remained ever since. It is impossible that a subject so wide as that of the suppressed Chair can be properly taught in the fifteen Lectures given in Michaelmas Term at present.

Professor Leech complains of the action of the Board and Senate, in 1885, in deciding that the new regulations about the Degree of LL.D. should not apply to those who had taken the Degree of LL.B. before the end of 1881. There is nothing unusual in refusing to make new regulations retrospective, and the persons referred to were considered, fairly enough, to have vested rights. Professor Leech relates his attempts on several occasions, up to 1899, "to terminate the practice of selling Degrees." There was no such practice; the number of persons whose vested interests were preserved was exceedingly small, and when the higher Degree was conferred, after the lapse of three years from the time of taking the lower Degree, the test was really made at the examination for the lower Degree. The modern system is no doubt an improvement for the Degrees of D.D. and LL.D., but the old system still holds good for the Degree of A.M., for which the real test is the Examination for A.B., though the higher Degree carries with it the valuable power of voting for Representatives of the University in Parliament.

The Committee consider that many of the subjects here referred to are quite irrelevant to the real issue involved in their Report, but they have considered it due to men of such distinction as the Professors in the Law School, that points raised by them, even though irrelevant, should be answered as far as space will permit, and they have thought it advisable to consign these matters to an Appendix, rather than to overload their reply, which they have confined to the fundamental principles involved.

DOCUMENTS.

SECTION E.

XXVII.

(4.) SCHEME FOR THE RECONSTRUCTION OF THE LAW SCHOOL, SUGGESTED BY THE LATE REGIUS PROFESSOR OF LAWS.

The Scheme which I propose is based upon that which has worked with success in Edinburgh. The position in the two cities of Edinburgh and Dublin presents a close analogy. Each city, as a metropolis, is the centre in which the principal Courts of Justice are situated, and the main and most important work of the Bar is carried on. Each city also contains a University in which candidates for the Bar, to a greater or less extent, receive both their general and legal education.

Before suggesting any change, it is necessary to state exactly the manner in which the legal education of candidates for the Bar in Ireland is conducted. The Benchers of the King's Inns control this education, and alone are responsible for the admission to practise at the Bar. They receive from each student about £88, and are bound, in return, to give him a sufficient education. They provide this education by supplying the services of two Professors appointed by themselves, and, by arrangement with Trinity College, they utilise the services of three of the Trinity Professors. The salaries or emoluments of the King's Inns Professors, amount, as I am told, to about £300. Fees amounting to about £30 annually, or a little more, are paid to each of the Trinity Professors. Speaking somewhat roughly, but with sufficient exactitude, the Benchers expend on the education of Candidates for the Bar about £700 per annum. Under this arrangement, the Hon. Society of the King's Inns have for many years worked harmoniously with the University. The work has been divided in the following manner:—The King's Inns Professors have dealt with the Law of Personal Property, Contract and Tort, and with Equity Practices, and Pleading. The subjects of the Trinity Professors have been partly scientific and partly practical. They deal with (1) Roman and International Law and Jurisprudence; (2) the Law of Real Property; (3) Constitutional and Criminal Law and the Law of Evidence. These subjects together make up a practically complete curriculum.

Under these circumstances it is clear that if one branch of the Law School is to be reconstructed and enlarged, the effect upon the other should be carefully considered. On this point I entirely agree with Sir E. Bewley, whose memorandum contains the following passage:—

"It should be borne in mind that the Law School of Trinity College is not, and never has attempted to be, a complete Professional School in itself, but for a great number of years has worked most harmoniously with the Hon. Society of the King's Inns in the matter of Legal Education. This connexion between the King's Inns and Trinity College which is of immense importance in reference to the subjects under discussion, has been entirely ignored by Mr. Russell in his letter."

On the 20th of June the Council sanctioned the adoption of the new Law Courses, which had been drawn up with care by a Sub-Committee of Professors, with Serjeant Jellett as their Chairman, and had received the cordial approval of the Vice-Chancellor's original Committee. There can be no doubt that these are good courses. They form almost a complete curriculum of Legal education. They embrace the whole ground now covered by the two branches of the Law School, save Practice and Pleading. Practice is better learned at Court after call, and the young barrister has plenty of time for this. Pleading, too, has of late years been relieved of all technicality, and might either be treated like Practice, or dealt with, if necessary, in a short Course of Lectures.

Teaching forms an essential part of the new scheme. The subjects of Personal Property, Contract, Tort, and Equity, comprising about three-fourths of the work done at the King's Inns, are included in the new courses approved by the Committee; and when the system is in working order, instruction will be given in Trinity in these subjects, in all probability out of the same standard text-books which are now used at the King's Inns. It is therefore clear that the teach-

ing in Trinity must then largely overlap that given in the King's Inns. On this point I quote Sir E. Bewley again:—

"Under these circumstances it could hardly be seriously proposed that Trinity College should either require the Professors of the Law School, in addition to discharging their present duties, to deliver Lectures in the subjects dealt with by the Professors of the King's Inns, or should establish new Professorships or Assistant-Professorships, with a similar object. Such a duplication of Lectures would not serve the cause of Legal Education in Ireland."

It appears from this that when the new system is established, there will be little left for the two King's Inns Professors to do, and little gained by maintaining them; and, as no question of vested interests arises, there will be no difficulty in discontinuing them.

The position in Edinburgh is summed up in a letter received by me from Dr. H. Goudy, Regius Professor of Civil Law in the University of Oxford, and formerly a successful advocate at the Scotch Bar.

"1. The Faculty of Advocates calls to the Scotch Bar.

"2. Candidates can be educated where they please, but if they do not possess a University Degree, they must undergo an Examination, conducted by the Faculty, on a standard equivalent to that of an Arts Degree. The University of Edinburgh educates most of the Advocates, but it has no monopoly. Some come from Glasgow. All candidates are, apart from the examination above-mentioned, examined by the Faculty in Roman and Scots Law, unless they hold an LL.B. of a Scotch University.

"3. There is no institution like the Inns of Court, and fees for education are paid solely to the University or other teacher.

"4. Glasgow is the only University, besides Edinburgh, that affords a full legal curriculum.

HENRY GOUDY.

As far as I have been able to ascertain, the fees paid by a Law Student to the University of Edinburgh, for the Courses which lead to the LL.B. Degree, amount to close upon £30. His LL.B. entitles him to practice, either as an advocate or as a Law agent, which I presume means a solicitor. The course extends over three years, and it is necessary to attend six Courses of Lectures.

Edinburgh grants another degree—B.L., or Bachelor of Law—which entitles a man to practise as a Law Agent if he has fulfilled certain other conditions. The University, the Faculty of Advocates, and the body representing our Incorporated Law Society, are clearly determined not only to keep their Legal Education separate from Arts, but also to insist that all legal practitioners shall reach a sufficient standard in Arts.

No one is admitted as a candidate for the degree of LL.B. "unless he be a Graduate in Arts of one of the Universities of the United Kingdom, or of any Foreign or Colonial University, specially recognised for the purpose by the University Court.

"No one is admitted as a candidate for the degree of B.L. unless he be a Graduate in Arts of one of the Universities of the United Kingdom, or of any Foreign or Colonial University, specially recognised for this purpose, or until he has passed" two examinations, one of which is to be conducted in one of the Scottish Universities, by the Examiners in Arts, on the Standard of Education for the ordinary degree of Master of Arts.

From the above remarks, it is obvious that when the new scheme is in full working order, the relationship of the Hon Society to the University of Dublin will be such as to render it not only possible, but easy to make an arrangement similar to that which exists between the Faculty of Advocates and the

University of Edinburgh, to the convenience and advantage of both parties.

I suggest that such an arrangement should be made. This involves the following proposals:—

1. That the Hon. Society should accept as entitling to a call to the Bar a certificate that the student had gone through the full legal curriculum in Trinity College, and had successfully passed all the examinations. That the two King's Inns Professorships should be discontinued, and that in lieu of the present expenditure of £700, a capitation fee of, say sixteen guineas, should be paid for each student. This arrangement would save to the Hon. Society not less than £200 per annum.

2. That the University should by means of these fees, which are moderate as compared with those of Edinburgh, establish two new Lectureships.

3. That the courses of study already arranged and approved of, shall be adopted and carried out as the programme of the Law School, with such modifications as may be found necessary, e.g., Practice and Pleading might be substituted for Political Economy, by which means the whole course of study at the King's Inns would be covered. If, however, it should be thought desirable to retain some Political Economy, it would be quite in accordance with Scotch precedent.

4. That all the prizes in the Law School, including the Reid Scholarship and Prizes, be thrown open to the non-collegiate student of the King's Inns.

This arrangement would be merely a return to the principle prevailing in and about 1870, when a Student might, if a Graduate of Dublin or certain other Universities, be called to the Bar on a certificate of having attended Lectures in Trinity alone, without Examination at the hands of the Hon. Society or attending the King's Inns Lectures. See *University Calendar* for that year, p. 79:—"Every Student electing to attend lectures, if a Graduate of the University of Dublin, Oxford, Cambridge, Durham, or London, or the Queen's University in Ireland, shall be eligible to be called to the Bar on producing certificates having attended at least two complete Courses of Lectures, viz., one complete Course of Lectures of any two, at his option, of the four Law Professors, namely, the Law Professors of the University of Dublin and those of the King's Inns."

At present the Hon. Society insists that the Student shall go through one-third of the work in Trinity, and they pay on his behalf a capitation fee of £3 3s. There cannot be any insurmountable difficulty in his doing all his work there, as was the practice in 1870, a larger capitation fee being paid on his behalf.

I claim for the scheme—

- (a) That it will be of advantage, both financially and otherwise, to the Hon. Society of the King's Inns.
- (b) That it will be of advantage and convenience to the Students, especially to the non-collegiate Students, about whom, very naturally, the Hon. Society is most concerned.
- (c) That to the University also it will be a financial gain, as the scheme already adopted cannot, even though existing salaries should be lowered, be carried out effectively without additional expense.
- (d) That it is fair and equitable to all parties concerned, and that under it the University will receive a reasonable compensation for the work done.
- (e) That it is exempt from all the disadvantages and objections which practically the whole body of experts have urged. I mean by experts those who have had experience of University work and the teaching of Law.
- (f) That the abolition of the Dual Government of the school will give it the same chances of success as have been enjoyed by the other professional schools in the University.

(a) It is obvious that this scheme will be less costly by about £200 to the Hon. Society than is the present arrangement. They are also saved the trouble of keeping up a School of Law, and the necessary expenses, lecture rooms, gas, etc., incidental thereto.

(b) The Law Students will obtain a better education. The present system has not been a success. Each

professor holds office for three years. The King's Inns course is a two years' course. It takes the professor two years to ascertain how he can comprise all his subjects in the prescribed number of lectures. In the third year he starts afresh, and begins to get into his stride. At the end of this year, whether good or bad, he disappears, and the same process recommences. Even assuming that the Professors are invariably appointed on the merits alone, it would be impossible under such conditions that any School should succeed.

The opening of the prizes to the non-collegiate Students, who must continue to exist, as many have neither means nor education sufficient to enable them to take a degree, would be a great boon to them. Many of them answer well, and some would be capable of securing the prizes from which they are now excluded. Moreover, it would be an advantage to all the Students, that all the lectures should be delivered in College. It takes practically two hours now to attend a lecture at King's Inns.

(c) The arrangement will be a gain to the University. It will enable them to appoint two additional Lecturers. It will save Trinity College from the danger, or rather the certainty, of lowering the standard of teaching, by endeavouring to increase the staff without incurring additional expense. This danger may be staved off for the present, but ultimately it must come. It is a truism that if you purchase a larger quantity of a similar material, whether it be tea or teaching power, with the same sum, the quality of the article will be inferior.

(d) It will be observed that I do not ask, on behalf of the University, terms by any means so favourable as those which the University of Edinburgh enjoys, by arrangement with the Faculty of Advocates. My own opinion is that my suggestion errs, if at all, upon the side of moderation. For if there were no institution in Dublin whence the Hon. Society might draw a supply of teachers in Law, they would be obliged to enlarge their own staff. If they had been obliged to employ three additional Professors, or even two, the cost would have vastly exceeded the £100 for which they now obtain the services of the three Trinity Professors.

(e) The scheme which I propose appears to me to possess all the advantages of the other, and to be free from all its objections.

Professor Bastable's objection to "the introduction of technical branches of English Law into an Honor Course in Arts," entirely disappears. This was one of my main points also, but I resist the fusion of Law and the Arts on other grounds besides the educational. It seems to me that there is a serious financial question involved. If we do this, every ordinary student will hereafter be entitled to a complete Legal education without payment of any extra fee.

Every University with a Professional School of which I have ever heard—all the Scotch Universities, Harvard, and apparently Yale justly demand, and are readily conceded, a fair remuneration for their Professional instruction. Why should we, at the moment when we are endeavouring to construct a complete Law School—a process which must involve additional expense—cut ourselves off from a source of income which is justly enjoyed by other Universities, such as Edinburgh and Glasgow, in a position similar to our own. I am not exactly an expert in finance, but it seems to me that the proposal, sanctioned by the Council on Friday last, involves a serious sacrifice of the material interests of the University.

The degree of B.L. at Edinburgh, which is a legitimate source of income to them, suggests the possibility of a similar arrangement here. Professor Hart believes that his lectures are attended by some Solicitor's Apprentices, who enter their names as students of the King's Inns. But under the scheme, this chance of remuneration must also be diminished, if not entirely lost.

Furthermore, Professor Hart's objection, founded on the difference between professional and academic teaching, which I think sound, would also disappear. This is a point with which experts are familiar, but which would not be likely to occur to those without actual experience in teaching.

To sum up, I do not know of any objection put forward by any of the experts which is not entirely met by the scheme which I am now propounding.

DOCUMENTS.
SECTION E.
XXVII.

The truth is that in the end it must come to a question of ways and means. In my opinion, the council would have done well to ask, what additional teaching power would be required, and whether there was a reasonable prospect of supplying this without impairing the efficiency. They are, however, entitled to say that this is not within their province; that it was the Board who had appointed the Committee, and that they had the Report before them for six months, and that they must doubtless have considered this before laying the scheme before the Council.

I also represented to the Board that the proposals of the Committee involved some serious financial considerations. The Committee, in their reply, stated that they had submitted to the governing body moderate proposals, etc. "It is for them to consider whether the funds at their disposal will admit of the establishment of such a school." If the confusion and embarrassment which the Professors apprehend does occur, the Committee will rightly point to these words and to that other piece of sage counsel which is contained on p. 2 of the Reply—

"If the general recommendations of our Report are adopted, a careful detailed examination of the constitution and working of each of these schools, with others to which we have referred, will become of importance."

In other words, if it is decided to make the change before committing ourselves to any particular scheme, a careful detailed examination of various other systems will become important. In my opinion it becomes necessary, but somehow, in the eager hurry to secure the benefit of the scheme for the ensuing year, this wise advice has been entirely overlooked.

I should have been glad that it had devolved on any other person to discuss this most vital portion of the business, for I am at this moment in such a position that it is difficult, or even impossible for me to advise the Board on these points, without running the risk of having my motives misconstrued. But the Board at this moment, too, are charged with a great responsibility, and they are entitled to the benefit of my counsel and long experience.

I referred to the question of ways and means. But are we in a position, yet to consider ways and means? Is not a preliminary inquiry necessary, viz.: What amount of additional teaching is required? is it possible that we are actually on the verge of committing ourselves to a great scheme of reconstruction, and starting it in October next, without any examination of these vital matters?

Has any promoter of the scheme considered these things either seriously or at all? I have examined them as carefully as I could, and this is the result. The scheme practically doubles the work. To carry it out effectively, or indeed at all, three additional Lecturers will be required.

If it is to be started in October, the Professors will lecture the Junior Sophisters in the prescribed subjects, and no difficulties will arise for a year. But in October, 1903, the three Professors will have to lecture the Senior Sophisters in the different Courses pre-

scribed for them. Who then will lecture the rising Junior Sophisters? Three additional Lecturers will be wanting or one who will undertake to do the work of the three. At Edinburgh as the Course extends over three years, nine Professors are required. A two years' Course apparently requires six.

On the other hand, under the scheme which I propose, two professors can be secured, of such a position that the quality of the teaching will not be endangered. And I think it not impossible that if all parties cordially approve this scheme, some means may be found of providing the third Lecturer, whose assistance seems to me to be essential to the success of the measure.

(f) If it is worth while to notice, that one of the main reasons—probably the main reason, why the Law School has never been as effective as might have been desired, is that it has always been under a Dual Control. If it had been otherwise, I see no reason why the Law School should not have done as well as the other professional schools, over which the control of the University is practically undivided.

Should there be anything in this paper defective, either in point of form or as regards lucidity, I beg of the Board and Council to remember that the difficulty is considerable of explaining and supporting a scheme of reconstruction so large and important within the very limited time at my disposal.

H. BROUGHAM LEECH, LL.D.

June 23rd, 1902.

P.S.—The Legal Staff at Edinburgh consists of nine Professors and four Class Assistants. As nearly all the lectures are delivered either at 9 a.m., or in the afternoon, it is probable that, as with us, the Professors are engaged in professional work during the day.

I think it necessary to add, for fear of misconception, that the Trinity Professors, in so far as I know, have always been entirely satisfied with the fees received by them from the King's Inns, viz.—one guinea for the annual course of three Terms for each professional Student, or seven shillings per Term. The question concerns the University alone, which, by paying to its Professors reasonable, though not extravagant salaries, enables them to be thus content with these moderate sums.

H. B. L.

June 23rd, 1902—4.30 p.m.

This Memorandum having been drawn up, of necessity with some haste, I have taken the opportunity of making a few amendments, and filling up some omissions. I trust that I have now succeeded in making my proposals clear.

H. B. L.

June 27th, 1902.

XXVIII.

Statement submitted by the Benchers of the Honourable Society of The King's Inns.

COPY of MINUTE of the Benchers of the Honourable Society of the King's Inns, passed unanimously at their meeting holden at their Council Chamber, Four Courts, on the first day of November, 1906.

The Right Hon. Lord O'Brien, Lord Chief Justice of Ireland, moved, and

The Right Hon. Mr. Justice Andrews seconded:—

"That the statement read be adopted, and copy of same be forwarded to the Royal Commission on Trinity College and the University of Dublin for its consideration.

The Benchers of the Honourable Society of the King's Inns, having been informed by one of their members—the Lord Chief Baron—that reference has been made in the evidence given before the Dublin University Commission to the system of legal education carried on by them in conjunction with the University of Dublin, desire to submit the following statement and the documents referred to therein for the purpose of showing the existing regulations on this subject and the circumstances leading to their enactment.

The Benchers of the Society, being the sole authority to confer the degree of barrister-at-law in Ireland, like the Kindred Societies in England, require from candidates for admission to the Bar attendance at lectures and the passing of examinations given and conducted by professors appointed by themselves. The subjects of these lectures and examinations have generally been selected with the view not so much of making the students scientific lawyers as of preparing them for the active pursuit of their profession. At the same time, the Benchers, recog-

DOCUMENTS.
SECTION E.
XXVIII.

raising that academic teaching of the science and history of jurisprudence is an important element in legal training, has always prescribed as a further condition to admission to the Bar a year's study in the Law School of Trinity College, Dublin, or of some other University or College within the United Kingdom.

Until recently, however, no adequate attempt was made to arrange the curriculum of the King's Inns and that of any Collegiate Law School so that the former would be supplementary to the latter, and so that the two taken together would provide a complete and consistent course of legal study. The first step in this direction was taken by the Board of Trinity College appointing in January, 1901, a committee to inquire into the position of its Law School, and to report thereon. The members of the committee were the Vice-Chancellor of the University of Dublin, who is a Benchers of the King's Inns, and a distinguished scholar; two other Benchers noted for the interest taken by them in legal education, and two Fellows of the College. This committee performed the duty entrusted to them fully and laboriously, and in doing so they received great assistance from the King's Inns Professors and from three of the four Professors of the College. They made themselves acquainted with the systems pursued in the Law Schools of the English, Scotch, and American Universities, and exhausted every source of information within their reach. The result was an unanimous report, which has already been laid before the Commission by Mr. Justice Madden, and to which the Benchers would respectfully call attention.* This Report having been adopted by the Board of the College, was considered by the Education Committee of the Benchers, whose Report, dated the 1st May, 1903, as subsequently confirmed by the Bench as a whole, is sent herewith. There followed a revision of the rules of the Society in accordance with the recommendations thus made; and a copy of the amended rules is also submitted to the Commission. The courses for lectures and examinations in both the College and the King's Inns have been since framed on the lines thus laid down; the lectures have been greatly increased in number; the Professors have given more time to the duties of their Chairs; while the students seem to take much more interest in their work, and have derived greater

advantage from it. The Benchers do not claim that their present system of legal education is perfect. Defects therein will doubtless be discovered from time to time; but whatever may be the nature of such defects, they can be best remedied by further arrangements between the Benchers and Trinity College and other Collegiate Schools of Law. The object of law study in Ireland is, in the great majority of cases, to prepare the student for Bar practice. Hence, his course of instruction ought to comprise both the science of jurisprudence and such subjects as will fit him for the active work of his profession. The first of these branches of education is especially within the province of academic teaching, and is best given by University Professors, who are in the habit of dealing with law in its scientific aspect. The second branch can only be satisfactorily carried out under the direction of the body upon which rests the responsibility of conferring authority to engage in the work of a practising barrister. The practical training for this purpose must be given by teachers in close touch with the profession, who have some experience as practitioners, but whose practice is not yet sufficient to occupy all their time. It follows that their term of office must be comparatively short, as otherwise there would be the danger that their increasing professional success would come into competition with their duties as Professors. The manifest distinction between the science of jurisprudence and the knowledge required for the practice of the legal profession shows the advantage of the present combined system of education. The Benchers, while accepting collegiate teaching in departments for which such teaching is suitable, feel that it would be inconsistent with their duty to the public to accept the degree or certificate of any University or College as an equivalent for instruction which can only be satisfactorily given under their own direction and control. The Benchers feel themselves bound to adhere in this respect to the system of legal education which has long been in force in Ireland, and which is in strict analogy with that acted on by all the English Inns of Court.

RICHARD ARMSTRONG,

Under-Treasurer.

King's Inns, Dublin.

REPORT OF THE EDUCATION COMMITTEE OF THE BENCHERS OF THE KING'S INNS.

(Referred to in the foregoing Statement.)

From and after Michaelmas Term, 1902, Honour Courses of Lectures and Examinations, and Moderatorships, in "Legal and Political Science" have been added to the Curriculum of the Junior and Senior Sophister Years in Trinity College within the University of Dublin. These Courses were adopted upon the recommendation of a Committee of which Mr. Serjeant Jellett, Mr. Justice Madden, Vice-Chancellor of the University of Dublin, and Lord Justice FitzGibbon, acted as Members, upon the invitation of the Provost and Senior Fellows of Trinity College. The Courses include Roman Law; Real Property Law; the Law of Personal Property, Contract and Evidence; Constitutional Law; International Law; Jurisprudence; and Political and Economic Science; and they have been so framed as to form the basis of a Scientific and Practical Legal Education.

The introduction of these Courses necessitated a revision of the Courses of the Professors at the King's Inns, and also necessitated provisions for giving credit to Students of the King's Inns who were also Students of Trinity College, for attendances and distinctions in the Law School of the College, as part of the qualification for Call to the Irish Bar.

It appeared to the Education Committee to be desirable to take the opportunity of this revision to make a general Revision of the Rules of the King's Inns.

Before undertaking this Revision, the Committee, with the approval of the Provost and Senior Fellows, invited a joint Report from the Professors of Trinity College and of the King's Inns, upon the distribution of the Subjects of Legal Study, Lectures, and Examinations, as between the two sets of Professors, so as

to provide a progressive Three Years' Course of Legal Education for the Students of the Inns.

In answer to this invitation, the Committee received a detailed and valuable Report, which was signed by Professors Hart, Baxter, Lawson and Maxwell, and was generally approved by Professor Bastable; to all of whom the thanks of the Committee are due for their assistance.

Having received this Report, the Committee requested Professor Maxwell to draft the alterations which he considered necessary to give effect to the recommendations of the Professors. This he did with much care, and with these materials, the Committee proceeded to revise the Rules, which they have amended, and now present for the consideration of the Benchers.

Amendments in form, and Amendments intended to remove ambiguities, or to bring the Rules into closer conformity with the Consolidated Regulations of the Inns of Court in London, have been introduced. The more important changes are directed to the following objects:—

- (1.) To provide a Progressive Three Years' Course of Legal Education, commencing with Michaelmas Term in each year.
- (2.) To provide that the Students at the King's Inns shall be divided into two distinct Classes, Junior and Senior; and that the present practice of requiring Students to attend the same Lectures, though at the time at different stages of Educational progress, shall be discontinued.
- (3.) To offer alternatives to Students of taking either the Ordinary or the Honour Course at Trinity College; but to require attendance at one complete

* See page 373.

DOCUMENTS.
SECTION E.
XXVIII.

and continuous Course, at the least, of Lectures and Examinations at the King's Inns in every case.

(4.) To retain the existing alternative of taking the First Year's Course in any University or College other than Trinity College, Dublin, having a Law School attached, to which the Student may belong; but to limit the alternative for taking the Course of the Senior Class at the King's Inns, either to passing the Honour Examination at the King's Inns and obtaining distinction thereat, or to attending for that year at Chambers in London, attending Lectures there, and obtaining the Certificate of Fitness for Call to the English Bar which, under the Consolidated Regulations, is obtainable only on passing the Final Examination in all the subjects of Legal Study prescribed for English Students.

The Draft Rules now submitted have been unanimously recommended by the Education Committee for adoption by the Benchers; and, in the opinion of the Committee, their adoption will greatly improve the System of Legal Education in Ireland.

An incidental consequence of the adoption of these Rules will be to increase the number of Lectures to be delivered by the Professors at the King's Inns, who will be required to deliver a complete Course of Twelve Lectures to each of the two Classes, upon two days in each week, of each of the three Terms which make up the Legal Year.

Professor Maxwell has already, of his own motion, introduced the practice of giving separate Preparatory

Lectures to the Junior Class, having found this necessary to bring that Class up to the standard of proficiency required to enable them to profit by the subsequent Lectures delivered to the combined Classes. He has expressed his willingness to undertake the additional work proposed during the coming years of his Professorship; and the adoption of the proposed Rules will impose the obligation upon the Professor who is to be elected in the coming Trinity Term, of giving the increased amount of instruction recommended by the Committee.

If the Rules be adopted, it will be necessary to make some verbal changes in the Forms of the Memorial for Admission, and of the Memorial for Call to the Bar, adopted by the Benchers, so as to bring those Forms into conformity with the new Rules; but these alterations are required by reason only of the wording of the Rules having been brought into conformity with the Consolidated Regulations of the Inns of Court in London.

In order to give effect to the amended Rules, commencing in Michaelmas Term next, they should be adopted and published by the Benchers before the end of the current Easter Term, 1903.

Submitted on behalf of the Education Committee this 1st day of May, 1903.

H. P. JELLETT,
Chairman.

Statement by T. Henry Maxwell, Esq., King's Inns Professor.

To the Secretary of the Royal Commission on Trinity College and the University of Dublin.

4, MOUNT-STREET CRESCENT,
1st November, 1906.

SIR,

I beg respectfully to submit for the consideration of the Royal Commission on Trinity College, Dublin, and the University of Dublin, the following observations upon the statement of the Regius Professor of Laws, Professor H. Brougham Leech, LL.D., page 58, appendix to First Report.

He says (page 60) in reference to legal education at the King's Inns, "The course of each Professor extends over two years, and it takes that time for a man to estimate his pace, and ascertain how he can best comprise all his subjects in the prescribed number of lectures. At the end of two years, having been once round the course, he has got into his stride, and sets off upon the second round, but when he is half-way through, and is becoming competent to conduct an examination, he is pulled up, and another takes up the running."

Professor Leech seems to be unaware that the students at the King's Inns have been divided into two classes—senior and junior—and that the two classes are lectured separately. This system was adopted in 1903 by the Benchers upon the report of a Committee, consisting of the King's Inns Professors and the Trinity College Professors, with the exception of Professor Leech, who, though invited by the Benchers to do so, did not take part in the work of that Committee.

Each of the two King's Inns Professors now goes over the entire senior course with the senior class, and the entire junior course with the junior class, in each year. Thus, the Professors lecture in the entire of their respective courses three times during the three years tenure of their Professorship, and not once and a half only, as stated by Professor Leech.

In the next place, though term examinations are held at the end of Michaelmas and Hilary terms by each of the King's Inns Professors, the classes which they have lectured are examined at the annual continuous course examination, not by the Professors, but by practising barristers appointed specially each year by the Benchers.

As regards the hour fixed for the lectures, 4.30 p.m., my late colleague, Mr. G. Y. Dixon, and I were anxious, if possible to have the time altered to 9 or 9.30 a.m. (9 is the usual hour for Law lectures in

Trinity College), but after consultation with some of the authorities of Trinity College, it was considered that the proposed change might conflict with Trinity College Honor lectures, both in Law and in other subjects, and the proposal was abandoned. The present hour (4.30 p.m.) is a convenient one for many of the students attending the King's Inns who have to dine one week in each term at Commons at the Hall, in Henrietta-street, at 6 o'clock; and it is also convenient to those who come up for lectures each week from places at considerable distances from Dublin.

As regards the time occupied in reaching Henrietta-street from Trinity College, Professor Leech's estimate seems to me about four times too large.

Professor Leech refers to the lectures at the King's Inns, "which it is the practice to read from a manuscript." In reference to this, I should wish to say that in accordance with rules laid down by the Benchers, from twenty to thirty minutes each day are devoted to questions upon the work of the previous day. I have found this plan most useful in clearing up difficulties and obscurities. After anxious deliberation, I came to the conclusion that I could best instruct the classes which had been entrusted to me by writing out beforehand what I had to say. To impart knowledge and training in the principles of Equity and Pleading and Practice requires, in my view, if the instruction is to be of any value, the utmost care and precision in expression. I find as the result of my limited experience that to commit what I have to say to writing is the best plan for me. It enables me better to preserve a logical order in treatment, and to state and illustrate large principles more accurately than I could do *visà voce*.

I am inclined to agree with Professor Leech that a three years tenure of a legal Professorship is too short. On the other hand, I believe it to be a more serious defect to permit a Professorship to be retained for a term so long as to render it likely that the holder, however able, may become "stale," even though he may acquire a rythmical stride as the result of constantly going over the same well beaten path for a large part of a lifetime.

I am, Sir,

Yours faithfully,

T. HENRY MAXWELL, King's Inns
Professor of Equity and Pleading
and Practice.

APPENDIX TO FINAL REPORT.—DOCUMENTS.

SECTION F.

Statements submitted to the Commission with reference to the Medical School in Trinity College, Dublin, and the University of Dublin.

XXX.

Statement of the King's Professors in the School of Physic.

Received 2nd October, 1906.

SHORT ABSTRACT OF CONTENTS.

In the following Statement we show that Trinity College co-operated with the College of Physicians in the establishment of a complete School of Physic in 1785. The Teaching Staff of the School was constituted of King's Professors, whose chairs were endowed from the estate of Sir P. Dun, and of University Professors, supported by Trinity College. Both sets of Professors were empowered to charge regulated fees to the students attending their respective courses.

The School was managed jointly by the bodies co-operating in its foundation.

Trinity College derived advantage from its establishment, and the School of Physic from the outset was utilised as a Professional School in the University.

A hospital for clinical teaching was added to the School under the Act of 1800, being erected out of funds accruing largely from Dun's Estate.

After the completion of the Hospital in 1816 the King's Professors lectured there, the University Professors continuing to lecture in the Medical Buildings of Trinity College.

In 1846 the College of Physicians, in response to petitions showing that it would be in the interests of the School of Physic, permitted the King's Professors to deliver their lectures in the Trinity College Medical Buildings. In 1865 the central portion of Dun's Hospital was placed by the College of Physicians at the

disposal of the Governors, to enable them to make room for Surgical patients. The University had recently instituted a Diploma in Surgery, and in consequence found it necessary to provide for Surgical teaching in Dun's Hospital.

Since 1865 large additions have been made to the buildings erected by Trinity College for the accommodation of the School of Physic.

Since then an increasing tendency on the part of Trinity College to disown the joint control of the College of Physicians in the management of the School has grown up. This was first indicated by an endeavour to establish a distinction between the "School of Physic in the University of Dublin," and the "School of Physic in Ireland."

The Board of Trinity College now claims that no person can lecture or demonstrate in the buildings or laboratories of the School of Physic without the permission of the Provost and Senior Fellows.

Reasons showing that this claim is untenable, and threatens to injuriously affect the position and tenure of the King's Professors, are set forth.

Other disabilities of the King's Professors are also mentioned; and recommendations with a view to removing them, and for improving the working of the School of Physic, are given.

XXX.

STATEMENT.

GENTLEMEN,

It has recently come to our knowledge that many important matters concerning the mode of appointment, status, and tenure of a section of the Teaching staff of the School of Physic, known as the King's Professors on the Foundation of Sir Patrick Dun, to which we belong, have never been considered by previous University Commissions, and that no adequate provision has up to the present been made to lay them before you. We therefore humbly beg leave to make the following statement:—

I. FACTORS WHICH DETERMINED THE ESTABLISHMENT OF A JOINT SCHOOL OF PHYSIC.

The constitution and government of the School of Physic, agreeably to the provisions of the Acts 25 Geo. III. c. 42 (Ir.), 40 Geo. III. c. 84 (Ir.), and 30 Vict. c. 9, have been fully explained in other statements already laid before you. The University Calendar of 1868 defined it as "a Medical Corporation or College under the joint control of the Provost and Senior Fellows of Trinity College, and of the President and Fellows of the College of Physicians." The same definition without essential variation, is given in the Calendars from 1867 to 1884.

The first effective impulse to found a University Medical School arose out of the provisions of the Deed

of Sir Patrick Dun, which was executed in 1704. This led to the erection of separate medical buildings in Trinity College, and to the opening in 1711 of a small University School of Medicine, which however did not provide for the teaching of the whole medical curriculum till 1785.

The King's Professors on the foundation of Sir Patrick Dun, appointed at this period by a Board representative of Trinity College and of the College of Physicians, had been increased to three in number in 1749, and were lecturing in the Philosophy School of Trinity College.

Finding the rents of Sir Patrick Dun's Estate increased, the College of Physicians, supported heartily by the Board of Trinity College,* obtained statutory powers in 1785 to combine the King's Professors with the College Lecturers, and thereby establish a complete School of Physic. This placed the University in a more secure position to meet the prospective competition of the School of Anatomy and Surgery, which the newly-chartered College of Surgeons had taken prompt steps to found.†

The teaching continued to be wholly carried on in Trinity College for more than thirty years afterwards; and it is of importance to note that one of the clauses of the Act of 1785 enjoined that the lectures of the King's Professors should be given in Trinity College, and that "proper rooms should be provided in the said College for giving the said lectures."

* The terms of agreement were drawn up by a Committee of the College of Physicians, after conference with a Deputation from the Board of Trinity College. The proposed plan was introduced into the Irish Parliament by the Provost of Trinity College, the Rt. Hon. J. Hely-Hutchinson, who was also Secretary of State. [From an address on *The Present State of the School of Physic*, p. 9, by Edward Hill, M.D., Regius Professor of Physic in the University of Dublin, Dublin, 1803.]

† The College of Surgeons of Ireland obtained its first Charter in 1784.

SECTION F.
XXX.

II. THE ADDITION OF A CLINICAL HOSPITAL TO THE SCHOOL OF PHYSIC.

In the course of time it became necessary, "for the advancement of the School of Physic in the Science of Medicine," to make provision for clinical teaching as part of its curriculum. With this object, the Act of 1800 empowered the President and Fellows of the College of Physicians, with the consent and approbation of representatives of the University of Dublin and of Trinity College (see sect. iv.), to apply certain of the funds accruing from Sir Patrick Dun's Estate to the erection of an hospital wherein clinical lectures should be given. This Act also repealed the Act of 25 Geo. III. c. 42, but re-enacted all its main provisions for the establishment of a joint School of Medicine. One provision relevant to the present statement, and only one, was altered. The lectures of the King's Professors, pending the erection of the hospital, were to be delivered in Trinity College, in a room or rooms granted by the Provosts, after which they were to be delivered in the said hospital. Sir Patrick Dun's Hospital was not completed till the year 1816, and from that time down, till the year 1846,* the formal lectures in their respective subjects, as well as the clinical lectures of the King's Professors, continued to be delivered there. It is important to bear in mind that the Hospital was and is a part of the School of Physic, and for many years was described in the Dublin University Calendars as "Sir Patrick Dun's School of Physic Hospital." It was the latest constituent deemed necessary at the time for the completion of the School of Physic. It is still administered by a Board of Governors appointed under the Act of 1800, which includes the President, Vice-President, and Censors of the College of Physicians, and the Provost of Trinity College.

III. THE KING'S PROFESSORS FORM THE LARGEST GROUP OF TEACHERS ON THE STAFF OF THE SCHOOL OF PHYSIC.

As explained in the statement regarding the School of Physic drawn up "by request of the Staff," the teachers in the School belong to certain distinct classes, according to the manner of their appointment. The King's Professors constitute the largest of these groups, and are responsible for four of the departments of the School—namely, in statutory order, Institutes of Medicine or Physiology and Histology, Practice of Medicine, Materia Medica, and Midwifery. They are also given priority of reference in the School of Physic Act. Their mode of appointment is given later.

The group of University Professors is three in number, and the next largest engaged in teaching. They represent three departments in the School—namely, Anatomy, Chemistry, and Botany.

IV. THE APPOINTMENT OF KING'S PROFESSORS.

The mode of appointment of the King's Professors and the provisions for regulating their duties in the School of Physic are seen from the following:—

Prior to 1785 the choice of the Professors was in the hands of officials (for the time being) of the joint Colleges concerned in their appointment—namely, the Provost of Trinity College, the Professor of Physic in the same, the President and two oldest Censors of the College of Physicians. These five "examinators" were, "without favour or affection, hatred or compromise," to report to certain "guardians" named in the Act (15 Geo. II., Ir., 1741) the person best qualified from amongst the candidates, and the said guardians were to declare such person duly elected.

In the Act of 1785 a less commendable mode of election was substituted. The Board of Electors still consisted of five—three representatives of the College of Physicians, and two of Trinity College—namely the

Provost, or in his absence the Vice-Provost, and the Professor of Physic. The three Electors of the College of Physicians were chosen by ballot from their own body at a meeting of the President and Fellows held on the day preceding the election of the King's Professor. It is in this latter respect that the Board was open to objection. The candidates were usually Fellows of the College of Physicians, who might work to secure the return of three Fellows favourable to themselves. On the other hand, the Electors representing Trinity College were always in a minority as against those of the College of Physicians.

In the Act of 1800 the Board of Electors was constituted in the same way as in that of 1785, with the exception that the fifth Elector is more correctly described as the Professor of Physic "in the University of Dublin," meaning thereby, the Regius Professor. Under both Acts the Electors were sworn to faithfully and impartially discharge their duty, by the Provost, or in his absence the Vice-Provost, of Trinity College. The same oath was administered by the President, or in his absence the Vice-President, of the College of Physicians, to the Provost and Senior Fellows of Trinity College, when proceeding to the election of University Professors in the School of Physic. This observance is still followed.

Though the case of the King's Professors in School of Physic was not presented to the Dublin University Commission of 1851, the Commissioners found themselves unable to exclude evidence concerning the mode which then existed of electing these professors, and they made the following recommendation:—

"As the success of the School of Physic must in great measure depend on the ability and fitness of those who fill the different chairs, the due selection of the Professors is a most important trust connected with the School. This trust is, we think, more likely to be well exercised by a body . . . having such a permanent connexion with the School as to be interested in its welfare, and to feel the responsibility of their acts. We trust, therefore, that some other plan (shall be) adopted which would place the selection of the Professors in the hands of those who are most likely to be competent and disinterested, and to feel responsible for their selection."

In the year 1867 an amendment Act was obtained by the College of Physicians, with the consent and assistance of the Board of Trinity College, which placed the election to the King's Professorships entirely in the hands of the President and Fellows of the College of Physicians, the Electors being sworn in the same manner as before to faithfully and impartially discharge their duty.

V. THE SCHOOL OF PHYSIC HAS SERVED AS A PROFESSIONAL SCHOOL IN THE UNIVERSITY OF DUBLIN FOR OVER 120 YEARS.

The School of Physic thus constituted has, since its foundation in 1785, performed the recognised duties of a Professional School in the Faculty of Medicine of the University of Dublin. In the earlier years of its existence it was the only complete Medical School in Dublin; but the majority of the students taught in it were not undergraduates of the University. Even at this time, however, it was meant to be, and was regarded as, the University School, for it was considered necessary to introduce a clause into the School of Physic Act providing that non-University students should not be obliged to have a tutor, nor to answer the examinations, nor to attend any of the academical duties of the University. This is also shown by the fact that the same section provided for the exercise of a parental care on the part of the University over all students attending the lectures of the School of Physic by enacting that they "shall be matriculated in the said University by having their names entered in a book to be kept for that purpose, for which entry each

* In February, 1844, the Students of the School of Physic, supported by the University Professor of Anatomy, presented a Memorial to the College of Physicians, praying that the King's Professors should be allowed to deliver their Lectures, other than clinical, in the Medical Buildings of Trinity College. On the 1st July, 1846, the King's Professors, with the support of the University Professors in the School of Physic, presented a similar request. On the 14th of the latter month the President and Fellows of the College of Physicians granted the permission requested, and forwarded their resolution to the Board of Trinity College. On the 27th of the same month the Provost and Senior Fellows resolved—"That in pursuance of the permission before granted by the Board, but not acted upon, the use of their Medical Lecture-rooms shall be allowed for the delivery of the several courses of Medical Lectures at present given in Sir P. Dun's Hospital, &c."

student shall pay the sum of five shillings and no more." It is further implied in the injunction that the "several lecturers shall during each Medical Session, when they shall have delivered one-half of their several courses of lectures, return to the Senior Lecturer of Trinity College, for the time being, a list containing the names of such pupils (of Trinity College) as shall have attended them during such part of said course of their respective lectures."

Since 1854, the University Calendars expressly state that there are four Professional Schools in the University. One of these is the School of Physic. It is true that the School has not always been given its statutory title in the University Calendars; but out of the sixty-four years which have elapsed since the first Calendar was issued, the title "School of Physic" or "School of Physic in the University of Dublin" has been employed in fifty-seven.

The following are the phases through which its designation has passed, with the Calendar years placed opposite:—

School of Medicine	1833—1834
(No mention)	1835—1844
School of Physic	1845—1859
School of Medicine and Surgery	1860—1864
School of Physic	1865—1866
School of Physic in the University of Dublin	1867—1906

On 25th October, 1862, a Resolution was passed by the College of Physicians, as follows:—"Resolved, That the advertisements of the School of Physic be headed: 'School of Physic of Ireland, incorporated under 40th Geo. III, c. 84, maintained and directed conjointly by the University of Dublin and the King and Queen's College of Physicians in Ireland.'"

But although the full name employed here has come to be frequently used, it is nowhere mentioned in any of the Acts under which the School is founded. That given in the body of each Act is always "School of Physic," with either the definite or indefinite article preceding. The nearest approach to the longer name occurs in the amending Act of 1867, where the short title is given as "THE SCHOOL OF PHYSIC (*Ireland*) AMENDMENT ACT, 1867."

The Act of 1785 is called "An Act for establishing a complete School of Physic in this Kingdom." The same phraseology occurs in the title of the Act of 1800; but these titles are applied to the Acts themselves. The words "in this Kingdom," which refer to Ireland, are not meant to be, nor is their equivalent (*Ireland*), in the Act of 1867, meant to be part of the title of the corporation founded by, or referred to, in the respective Acts. It is simply called School of Physic.

VI. ATTEMPTED DISTINCTION BETWEEN THE "SCHOOL OF PHYSIC IN THE UNIVERSITY OF DUBLIN" AND THE "SCHOOL OF PHYSIC IN IRELAND."

At one period, namely, in 1867, and for some years before and after, a distinction was attempted to be drawn in the University Calendars between the "School of Physic in the University of Dublin," and the "School of Physic in Ireland."

This nominal distinction would be of little consequence had it not led to the practice of disregarding the joint control of the College of Physicians in the affairs of the School of Physic, except in the appointment of the King's Professors and the University Professors. It is now a common belief in Trinity College and elsewhere that the School of Physic in the University of Dublin is a different thing from the School of Physic in Ireland.

As it is of importance to trace the origin of this belief, and the practice founded upon it, we quote the Calendar references for the year 1867—one of the earliest in which the attempted distinction appears.

Page 74:—

SCHOOL OF PHYSIC.

The School of Physic in the University of Dublin is under the joint control of the Board of Trinity College and of the President and Fellows of the College of Physicians.

It consists of the following staff:—

I. Professors elected by the Board of Trinity College—

1. The Regius Professor of Physic.
2. The University Professor of Surgery.
3. The Professor of Anatomy and Chirurgery.
4. The Professor of Chemistry.
5. The Professor of Botany.
6. The Professor of Surgery.

II. King's Professors in the School of Physic.

1. The Professor of Materia Medica and Pharmacy.
2. The Professor of Practice of Medicine.
3. The Professor of the Institutes of Medicine.

III. Professors elected by the College of Physicians—

1. The Professor of Midwifery.
2. The Professor of Medical Jurisprudence.

Page 266 of the same Calendar states as follows:—

SCHOOL OF PHYSIC.

"The School of Physic in Ireland" is a medical corporation or college governed by the statute or 40 Geo. III. It consists of the Professors of Anatomy and Chirurgery, of Chemistry, and of Botany, on the University Foundation, appointed by the Provost and Senior Fellows of Trinity College; of the King's Professors of the Institutes of Medicine, of the Practice of Medicine, and of Materia Medica and Pharmacy, on the foundation of Sir Patrick Dun, practically appointed by the President and Fellows of the College of Physicians as provided in the School of Physic Act;* and of such students as shall matriculate with the Registrar of Trinity College.

To this statutable foundation the University has added a Professor of Surgery and an Anatomist on the foundation of Trinity College; and the College of Physicians has added a Professorship of Midwifery and the Diseases of Women and Children, and also a Professorship of Medical Jurisprudence. As soon as the Governors of Sir Patrick Dun's Hospital are able to support 100 patients, the Professorship of Midwifery will become a King's Professorship, on the same foundation as the others of the same name.

The Calendar then goes on to refer to the history of the foundation, and, amongst other events, makes reference, for the first time, to the Will, Deed, and Statutes which dealt with the estates of Sir Patrick Dun, and led up to the establishment of the School of Physic.

VII. THE DISTINCTION UNREAL AND NOMINAL.

It was in the above way that the first mention of the "School of Physic in the University of Dublin" appeared in the Calendars; and, without special attention being called to the matter, it would not be recognized that a distinction is meant to be drawn between the School thus designated and the "School of Physic in Ireland."

Nor can it be fairly contended that the School of Physic, which now performs the functions of a Professional School in the University of Dublin, is other than the School of Physic constituted by the Acts of Parliament already quoted. It is true additions have from time to time been made to the Staff of the School of Physic as the progress of Medical Science required. In times past these were made, apparently in equal numbers, by the Royal College of Physicians and by the Board of Trinity College. Recent additions have been made only by the latter body. But these additions have never been such as to alter in any essential degree, much less subvert, the constitution of the medical corporation known alternatively in the Calendars as the "School of Physic in the University of Dublin" and the "School of Physic in Ireland."

*There are five electors: the Provost of Trinity College, the Regius Professor of Physic, and three (the majority) chosen by the College of Physicians. (*Calendar, foot-note.*)

DOCUMENTS.
SECTION F.
XXX.

The College charters empower and enjoin the Provost and Senior Fellows to provide for the education, institution, and instruction of youths and students in all arts and faculties, who are afterwards to be admitted, *juxta tempus idoneum*, to the degrees of Bachelors, Masters, and Doctors of the University.

In the exercise of this power and obligation, they provided independent instruction in the Faculty of Medicine from the early part of the seventeenth century, for a period of more than 150 years. About the year 1785 they were led by force of circumstances to enter into combination with the College Physicians for the purpose of establishing by Act of Parliament a complete School of Physic, and from that year down to the present they have supplied the instruction through the medium of the School which was then founded. We therefore claim that the alleged distinction is unreal and nominal.

VIII. THE STATUTORY POSITION OF UNIVERSITY OFFICERS NOT ACCORDED TO THE KING'S PROFESSORS.

The School of Physic having thus been employed for more than a century in the services of the University of Dublin as a professional School, it would be reasonable to suppose that its whole staff of Professors and Lecturers without distinction would have enjoyed the rights and privileges of University Officers. But this is not so.

A list of "University and College Officers" is now published at the beginning of each University Calendar, and has been so published since the year 1858. Prior to that time, that is to say from 1833 to 1857, much the same list was given as "University Officers."

During the whole of this period all the Professors on the teaching staff of the School of Physic, with the exception of the King's Professors, were included in the list, at first as "University Officers," afterwards as "University and College" Officers. It was not till 1901 that the King's Professors on the foundation of Sir Patrick Dun received mention. In that year they appear near the bottom of the list, lined off as a separate group between the "Lecturers" above and the "Auditor" below. In this position they continued till 1904-5, when, on a re-arrangement of the professors according to schools, they were assigned a place at the bottom of the staff of the Medical School. Their status as University Officers has not, however, received statutory confirmation.

This neglect can hardly be attributed to an oversight: throughout the whole series of Calendars, except those in which no mention of the Medical School occurs, they are expressly included in the text amongst the professors of the School, and the earlier Calendars give them the priority of reference which is conceded in the School of Physic Acts.

Further, in the Book of Trinity College, published on the occasion of the Tercentenary Celebrations (1892), the King's Professors are not included in the list of "University and College Officers."

IX. OTHER DISABILITIES OF THE KING'S PROFESSORS.

The exclusion of the King's Professors from the Calendar list of University Officers was no doubt the reason why questions were not addressed to them by the Dublin University Commission of 1851, and explains why their case was not considered by the Commissioners. A similar exclusion from the recognised body of University Professors who are not Fellows, accounts for the following disability from which they suffer.

In the year 1874, Letters Patent were issued by the Crown, ordering that a Council should be elected by the University Senate for the purpose, amongst others, of co-operating in the appointment and regulation of the tenure of office and duties of Professors. Half the members of this Council are representatives of the Fellows of Trinity College. One-fourth of the body is elected by Professors of the University who are not Fellows, those Professors being all included by right of office in the so-called *Classis Tertia* of electors to the Council, even when not actual members of the Senate. The King's Professors are not included amongst the University Professors in *Classis Tertia*. They are unclassified, and have no voice as such in University matters, even to the restricted extent of sharing in the representation accorded to the body of "Professors who are not Fellows."

In common with all Professors who are not Fellows, the King's Professors have been assigned no place in the several orders in the College. These orders are given in vol. i., p. 17, of the Calendar for 1905-1906. Nine orders are there enumerated, but the Professors are not included. It is not that the several orders have been immutably fixed in the past; on the contrary, they have been changed at various times. They were first enumerated in the Calendar of 1834, as follows:—
1. The Provost. 2. Fellows. 3. Noblemen and Barons. 4. Fellow-Commoners. 5. Pensioners and Scholars. 6. Sizars. 7. Doctors in the three Faculties of Divinity, Law, Medicine; also Bachelors in Divinity and Masters of Arts. 8. Bachelors in Civil Law and Physic and Bachelors in Arts.

In 1841 the number of orders was increased to nine by separating the Scholars from the Pensioners. In 1846 the Doctors and Bachelors were given the position they now receive in the list: the Fellow-Commoners, Scholars, Pensioners, and Sizars, following in this order. In 1856 Non-Foundation Scholars were introduced between the Scholars and Pensioners. In 1861 the number of classes was still further increased by adding Masters in Surgery and in Civil Engineering. In 1873 the Masters in Surgery and Civil Engineering were brought into the class of Doctors, Masters, etc., and in the following year Non-Foundation Scholars were omitted, thus establishing the number and sequence of orders as we now have them. Further, prior to the year 1876, the orders were given simply as the several orders in the College. In that year the sub-heading "ORDER OF RANK IN THE COLLEGE," was first introduced.

The following is another instance of differentiation which, happily, in practice, has been allowed to die out. In 1876 the "Professors of the University" were admitted to membership of the Fellows' Common Room on the same terms as the Fellows, and in the following year the privilege of inviting guests to the Fellows' table in Commons was extended to all Professors. The former concession was not, however, interpreted as applying to the King's Professors, and it was not till the end of 1902, a year after the King's Professors were placed on the list of University Officers, that one of their number was admitted to membership of the Common Room.

X. DEVELOPMENTS TENDING TO INJURIOUSLY AFFECT THE INTERESTS OF KING'S PROFESSORS.

The change of attitude on the part of the Board of Trinity College towards the constitution and government of the School of Physic has been already mentioned. It apparently arose out of the necessity to make provision for its expansion. This change, natural enough in its origin and growth, has led insidiously to results which make the position and tenure of the King's Professors in the School of Physic very critical, as will appear from the following:—

During the early decades of the period in which the medical lectures were delivered in two different places, the Board appears to have taken little interest in the doings of the School. The section within the precincts of the College was housed in buildings at the distant end of the Park, shut out by a boundary-wall (removed within the memory of most of us), through which a narrow gateway led into the Park proper. So strict was the exclusion at this period that in 1827 the Board ordered the gate to be kept locked, except during the delivery of the public lectures; that is to say, throughout the whole year, save for a short period at the beginning of each *annus medicus*, when twelve free lectures open to Sophisters and Graduates in Arts were delivered, according to regulation, by each of the Professors in the College section of the School.

The Medical School, at that time, was hardly tolerated; and from 1835 to 1844, received no mention whatever in the University Calendars.

Even after 1846, when the King's Professors returned from Sir P. Dun's Hospital to lecture in the College buildings, there was little arising in the School to create in the minds of the Provost and Senior Fellows an active interest in its affairs. There were then no pressing calls to provide increased laboratory and lecture-room accommodation for an ever-expanding science of Medicine.

But this state of affairs was wholly altered in the early sixties. New Anatomical rooms had to be provided; and from that day till now, the cry for more

buildings and more costly appliances has never diminished. It is hardly necessary to say that these buildings and appliances are the property of Trinity College. So also are the buildings and appliances, where they exist, of all the professional Schools in the University.

There can be little doubt that the onus of providing house-room for all the Professors of the School of Physic, although the buildings were necessary in the interests of the College, and the University has gradually produced the tendency to disown the joint control of the College of Physicians, which was first shown in the University Calendars about the period of 1867. This tendency was more distinctly displayed in the year 1870. Down to that year the joint control was acknowledged in the University Calendars, both when referring to the "School of Physic in the University of Dublin," and the "School of Physic in Ireland." In the Calendar for 1870 the acknowledgment was no longer made when mentioning the former, but was retained for the latter till the year 1885, when it ceased also, and has not since been restored.

XI. THE PROHIBITORY CLAIM OF 1886

In 1886 the following paragraph was inserted in the University Calendar, under the head of History of the School of Physic in Ireland,* and has been since continued:—

"The buildings and laboratories of the School of Physic belong to the Provost and Senior Fellows of Trinity College; and no person can lecture or demonstrate in them without the permission of the Provost and Senior Fellows."

To the claim set up in the latter part of this paragraph, it would at first sight seem difficult for the King's Professors to take exception. It has, however, to be borne in mind, that the School of Physic is constituted and regulated agreeably to the provisions of certain Acts of Parliament; that *de jure* it is under a joint control as explained; and that each of the controlling bodies has regulatory powers as regards the duties, discipline, and fees of the professors it appoints, subject to certain conditions of appeal laid down in the Acts.

It is difficult to see how the voluntary erection of buildings for the accommodation of the Professors in the School of Physic, could confer a right upon the Provost and Senior Fellows of Trinity College to neglect any of the terms of the School of Physic Act, which was promoted in the interests of the College and University, although in the course of time some of the provisions of that Act may, from their point of view, have become unsatisfactory.

Further, the following facts show that the return from Sir Patrick Dun's Hospital, and accommodation of the King's Professors in the College Buildings, was undertaken mainly in the interests of the School.

About the year 1849 the Irish College of Surgeons refused to recognise the lectures delivered in the School of Physic as part of the professional education required for their Surgical diploma. Candidates for most public medical appointments were, however, required to hold qualifications in both Medicine and Surgery. Accordingly, in 1849, the Board of Trinity College added a professorship of Surgery to the School of Physic. In 1850, in consequence of medical cases

only being admissible to Sir P. Dun's Hospital, University Students were required to attend another hospital for part of their clinical course, with a view to receiving instruction in Surgery. In 1851 the University of Dublin instituted a Diploma or Licence in Surgery and in 1858 the degree of Master in Surgery was instituted.

In 1864 the College of Physicians vacated the central portion of Sir Patrick Dun's Hospital. In December of this year the Board of Trinity College instituted a fee of £5 on the *Liceat ad Examinandum* Certificate issued to Candidates for the Final Examinations in Medicine and Surgery, and directed that the sum accruing therefrom should be entrusted to the Governors of Sir Patrick Dun's Hospital for the purpose of increasing the number of beds, these additional beds to be used exclusively for surgical cases. In July, 1865, the central portion of the Hospital was transferred to the Governors by the College of Physicians with a view to its conversion into a Medico-Chirurgical Institution. This conversion was carried out in conference with the Board of Trinity College; and in the same year Sir Patrick Dun's was opened as a Medico-Chirurgical Hospital.

The prohibitory claim above referred to, made after the joint control of the School of Physic had been acknowledged for more than one hundred years, has never been notified to the College of Physicians.

The establishment of this claim would render the King's Professors, as well as the University Professors, liable to immediate deprivation of the chief emoluments of their statutory offices, namely, the reasonable fees which they are empowered by the Acts to charge students attending their respective lectures.

From the foregoing it will be seen that the position in which the King's Professors find themselves is very unsatisfactory, and subjects them to unnecessary anxiety in the discharge of their duties as officers carrying on the business of a professional School in the University.

XII. RECOMMENDATIONS.

We beg to make the following recommendations:—

1. That the "School of Physic" be incorporated in the University of Dublin as the Professional School in the Faculty of Medicine.
2. That the King's Professors on the Foundation of Sir Patrick Dun be accorded the rights and privileges of officers of the University.

We have the honour to be,

Your obedient servants,

WALTER G. SMITH, M.D.,

King's Professor of Materia Medica and Pharmacy.

J. MAGEE FINNY, M.D.,

King's Professor of Practice of Medicine.

ARTHUR V. MACAN, M.B.,

King's Professor of Midwifery.

W. H. THOMPSON, M.D., Sc.D.,

King's Professor of Institutes of Medicines.

* The section of the Calendar in which this occurs was published annually till the year 1901, when it was included in a Special Supplemental, Vol. II., p. 334, which appears only once every five years.

Supplementary Statement submitted by Professor W. H. Thompson, relative to (1) Fees payable by Medical Students in the School of Physic and the University of Dublin, with suggested reductions; (2) Prizes and Scholarships in the same, with suggested additions.*

GENTLEMEN—

The facts set forth in the following additional statement come under the heads of enquiry (a) steps proper to be taken to increase the usefulness of Trinity College, Dublin, and of the University of Dublin, in

the country; (b) the provisions made for the encouragement of post-graduate study and research. I beg your permission, therefore, to be allowed to bring them before you.
The following Table gives the fees payable by medical students of the School of Physic who graduate in the Dublin University:—

1.—FEES PAYABLE IN THE SCHOOL OF PHYSIC AND IN THE UNIVERSITY OF DUBLIN.

SCHOOL OF PHYSIC.

Fees for Professional Education, together with Medical Examination Fees.

	I. Medical School. Lectures and Practical Instruction for 4 years (13 subjects).	II. General Hospital. (Clinical Medicine, Clinical Surgery, Gynaecology.)	III. Special Hospitals. (Midwifery, Mental Diseases, Ophthalmology, Vaccination.)	IV. Licent and Degree Fees.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1st Year,	20 9 6	—	—	—
2nd „	18 18 0	12 12 0	—	Previous Examinations, —
3rd „	14 3 6	12 12 0	—	Licent, 10 0 0
4th „	13 13 0	12 12 0	1 1 0	Degree, 17 0 0
5th „	—	—	16 16 0	—
Total	67 4 0	37 16 0	17 17 0	27 0 0

Total Medical Fees, £149 17 0
Entrance and Arts Fees, 83 4 0
£233 1 0

The total medical fees amount to £149 17s. Including the entrance and Arts fees, the whole fees payable for the registrable medical qualifications of the University of Dublin, amount to £233 1s. For comparison, I give the corresponding fees payable by a student who seeks his registrable qualifications

through a Queen's College and the Royal University. It is not for the purpose of advocating complete equality of fees in the two cases. The comparison will, however, show that in some respects our Dublin fees are unnecessarily high, and also indicate where reduction might be made.

MEDICAL SCHOOL, QUEEN'S COLLEGE, BELFAST.

Fees for Professional Education, together with Medical Examination Fees in R.U.I.

I. Medical School. Lectures and Practical Instruction for 4 years. (14 Subjects.)	II. General Hospital. (Clinical Medicine, Clinical Surgery, Gynaecology.)	III. Special Hospitals. (Midwifery, Mental Diseases, Ophthalmology, Vaccination.)	IV. Examination Fees.
£ s. d.	£ s. d.	£ s. d.	£ s. d.
51 0 0	21 0 0	8 8 0	(Previous) Examinations, . 3 0 0 Licent, — Degree, 12 0 0 £15 0 0

Total Medical Fees, £95 8 0
Fees for Matriculation and First Arts, 2 0 0
£97 8 0
Additional Fees for Degree in Arts (if taken), 4 0 0
£101 8 0

The total medical and graduation fees payable by a Belfast student, who proceeds through the Royal University, amounts to £95 8s., to which have to be added the compulsory Matriculation and First Arts Examination fees of £2; making in all £97 8s. If the candidate also graduates in Arts, he has to pay additional examination fees, amounting to £4.

Suggested Reductions.

Fortunately it is possible, under two of the above heads, namely, II. and IV., to effect reductions without touching individual interests, and at the same

time to remove fees which in themselves cannot at the present time be justified.

The School of Physic Act fixes the hospital fee payable to Sir P. Dun's for the medical year at £12 12s. Of this, a sum of £3 3s. goes for the maintenance of the hospital, and £9 9s. to the clinical teachers. The medical student who attends Sir P. Dun's Hospital is, therefore, as it were, taxed to the amount of £3 3s. per annum for the support of patients in the hospital. It may be asked why he does not go to some other hospital? The answer is that the clinical fee in other Dublin hospitals is also £12 12s. But I claim that

* Professor Thompson also furnished a Statement printed in the Appendix to the First Report (Cd. 3176). 1906, p. 69. His oral evidence will be found at page 117 of this volume.

the School of Physic Act has indirectly fixed the fee at this amount. So far as I can ascertain the Dublin Hospital fee for nine months seems to have been originally £9 9s., or less. In 1877 an understanding was arrived at amongst the various Dublin hospitals, that a like fee should be charged in all for clinical instruction, and that it should be £12 12s. for nine months. Dun's Hospital could not have come into the scheme had the fee been fixed lower. I would suggest, therefore, that the clause in the School of Physic Act which is responsible for this be repealed.

On the same grounds, I beg to suggest the reduction of the *Liceat ad Examinandum* fees of £10 to £1 each. In 1864 the Board of Trinity College resolved that a fee of £5 should, for the future, be charged on the liceat certificates for the final examinations in Medicine and Surgery, and that the proceeds should be handed over to the Governors of Sir P. Dun's Hospital for the support of surgical beds. At that time it was unnecessary to take the only degree in Surgery which the University had then instituted, the M.Ch.; the *diploma*, on which no liceat fee was charged, sufficed for qualification. In 1872 the degree of B.Ch. was instituted, and became the usual qualification. This required a liceat certificate, with a fee of £5, which also went to Dun's Hospital. It was still open, however, to a candidate to take the Diploma in Surgery, and avoid the second liceat fee; but this door was closed in 1887, when the triple qualification of M.B., B.Ch., B.A.O. became necessary for registration as a medical practitioner. The arguments used to induce the Board of Trinity College to institute the liceat fee in 1864 were fallacious (it is unnecessary to go into them). The fee can only be regarded from the outset as a burden, which in process of time automatically doubled itself.

I would further venture to suggest a reduction of the Degree fees in Medicine. These are, for the M.B., £11; for the B.Ch., £5; for the B.A.O., £1.

The Royal Commission of 1851 recommended that the University graduation fee in Medicine be fixed at £10. At the same time they recommended the removal of charges on the degree to the amount of £57. Both these recommendations were carried into effect. But in 1867 the graduation fee in Medicine was raised to £11. When the B.Ch. was first established the degree fee for it was fixed at £1 (the liceat fee being £5, as explained). Two years later the fee for the B.Ch. Degree was raised to £5. It would not, under these circumstances, I think, be unreasonable to ask that the M.B. should be reduced to £5, thus making the total degree fees for the triple qualification £11.

These reductions could be effected without touching the individual interests of the teaching staff of the School of Physic, including Sir P. Dun's Hospital, and would amount in all to £23 9s., namely—on the total hospital fee, £9 9s.; on the liceat fees, £8; on the degree fees, £6.

But I do not advocate that they should be carried into effect without compensation being made to Sir P. Dun's Hospital for the loss of pecuniary support which would be entailed.

Under the first head, removal of the three-guinea fee payable by students, the hospital would lose on the average about £150 a year. Under the second head—extinction of the liceat fees—it would lose on the average £300 a year—a total loss of about £450 a year. The difficulty might, perhaps, be met by an annual contribution from the Board of Trinity College towards the upkeep of the hospital, given on condition that the Governors of the hospital raised a like annual sum, by public subscription or otherwise, over and above the present income of the hospital after deduction of the fees I have indicated. In the interests of the hospital itself, I would venture to suggest that it might also be advisable to disconnect it from the School of Physic. There is much to be said for the view that so long as the hospital is looked upon as the special School of Physic Hospital, the public will not consider it as much in need of charitable support as its work deserves.

In addition, I would venture to recommend a reduction of the Arts curriculum from four years to three years, which in fees alone would effect a saving to the student of £16 16s.; also a reduction of the entrance fee of £15 to something nominal, say £1.

The maintenance of a four years' Arts curriculum in the University of Dublin has in the past been justified, owing to the backward condition of secondary schools in Ireland. This state no longer exists; the secondary schools in Ireland are now, on the whole,

exceedingly good, and are capable of turning out students who in three years obtain Arts degrees from other Universities, where the examination standards are not lower than in Dublin University. The effect of the reduction of tutorial fees on the tutors incomes would, naturally, have to be compensated for.

2.—PRIZES AND SCHOLARSHIPS IN THE SCHOOL OF PHYSIC.

I beg also to be allowed to call attention to the inadequate amount of prizes and scholarships available for students in the School of Physic and the Faculty of Medicine of the University of Dublin. The matter closely concerns the facilities for post-graduate research work. The following summary shows the prizes attached to the School of Physic:—

PRIZES AND SCHOLARSHIPS IN THE SCHOOL OF PHYSIC: Annual Value.

Prizes and Scholarships.	Annual Value.	Source from which derived.
Medical Scholarships, .	£ s. d. 80 0 0	Provided by Trinity College.
Stewart Scholarships (variable, average for 12 years).	42 11 8	Private Foundation.
Stewart Scholarship in Mental Diseases (average for 20 years).	22 10 0	Do.
Fitzpatrick Prize (interest on £1,000 <i>circa</i>).	30 0 0	Do.
Class Prizes, about	50 0 0	Voluntarily given by Professors.
	£225 1 8	

UNIVERSITY PRIZE.

Prize.	Annual Value.	Source from which derived.
Travelling Prize, .	£ s. d. 100 0 0	Provided by Trinity College.

For comparison, I also give a corresponding list, taking the Medical prizes of Queen's College, Belfast, and of the Royal University as examples.

PRIZES AND SCHOLARSHIPS IN MEDICAL SCHOOL, QUEEN'S COLLEGE, BELFAST: Annual Value.

Prizes and Scholarships.	Annual Value.	Sources from which derived.
10 Medical Scholarships of £20 each.	£ s. d. 200 0 0	Provided by College.
2 Dunville Studentships, .	145 0 0	Private Foundation.
1 Andrews Studentship (£145 alternate years).	72 10 0	Do.
Class Prizes (variable about).	101 0 0	Provided by College.
	517 10 0	

UNIVERSITY PRIZES, R.U.I. In Faculty of Medicine.

Prizes.	Annual Value.
	£ s. d.
At First Examination, 4, aggregate value, .	80 0 0
At Second Examination, 4, aggregate value, .	80 0 0
At Third Examination, 4, aggregate value, .	100 0 0
At Degree Examinations, 4, aggregate value, .	130 0 0
Travelling Scholarships, .	100 0 0
Medical Studentship (£200 for 2 years), .	400 0 0
Stewart Scholarship, variable average for 20 years,	12 0 0
Stewart Scholarship (Mental) variable average for 20 years.	30 0 0
Total, .	912 0 0

The foregoing lists speak for themselves. I might, however, be permitted to call attention to three facts in connection with the School of Physic list:—(1.)

DOCUMENTS.
SECTION F.
XXXI.

The total amount of undergraduate prize money is exceedingly small, and might with advantage be considerably increased. (2.) Trinity College provides no funds for ordinary class prizes; the gap has to be filled by the professors themselves. This latter arrangement is unsatisfactory; for even if the professor contributes prize money liberally from his own resources, the prizes are, after all, personal, and have not the same academic value as if they were College or University prizes. Further, prior to 1860, when the number of classes in the School of Physic was considerably smaller than it is now, Trinity College contributed £50 annually for class prizes. This was discontinued, by resolution of the Board, in November of that year, when the two existing Medical Scholarships were founded. (3.) There is no prize money attached to the School, which can be looked upon as an aid to research in the School. The need of pecuniary aid to research in medical sciences alone

is very great; too great to be fully supplied from the endowments of the University. It is, however, an incalculable loss that we have not even one prize in the whole range of medical subjects which would afford maintenance to a young graduate for two or three years of laboratory and research work, such as is necessary to qualify him for holding a professorship. From having seen the benefits of such a prize elsewhere, I can never cease to deplore its absence from the School of Physic.

I should, therefore, beg to recommend that there be two annual Medical Scholarships, of the value of £20, for each of the first four years of medical studies; that £100 be allocated by the Board for class prizes annually; and that there be established at least one post-graduate prize of £150, tenable for two or three years, to be awarded in the subjects of the Medical curriculum, other than those for which the Medical and Surgical Travelling Prizes are provided.

DOCUMENTS.
SECTION F.
XXXII.

Joint Statement of the Board of Trinity College, Dublin, and the President and Fellows of the Royal College of Physicians of Ireland.

The Board of Trinity College and the President and Fellows of the Royal College of Physicians of Ireland beg to submit the following proposals for the consideration and approval of the Royal Commission on Trinity College, Dublin, and the University of Dublin.

The proposals are the result of several conferences between representatives of the two Colleges, together with the King's Professors, the University Professors, and a representative from Sir Patrick Dun's Hospital.

The proposals are therefore placed before the Commission with the sanction of the different bodies interested in the matter.

Resolved:—That a conjoint application be made by Trinity College and the College of Physicians to the Royal Commission on the following terms:—

(a.) That the connection which has hitherto existed between the Colleges under the School of Physic Act shall come to an end.

(b.) That the connection between the College of Physicians and Sir Patrick Dun's Hospital shall come to an end on condition that half the capital sum realised by the sale of Sir Patrick Dun's estate shall be handed over by the College to the Governors of the Hospital.

(c.) That the connection between Trinity College and Sir Patrick Dun's Hospital, under the School of Physic Act, shall come to an end, existing vested interests of the teachers being preserved.

(d.) That, as the Royal College of Physicians of Ireland and Trinity College both claim the £400 (Irish) which are at present paid to the King's Professors out of Sir Patrick Dun's estate, the Colleges agree to a compromise on the basis of an equal division between the Colleges of the funds in question, the present King's Professors being paid as heretofore by the College of Physicians during the remainder of their tenure of office, and the proportionate division of the funds taking place as each vacancy occurs. (The vacancies will occur in two cases in three years and in two others in four years).

(e.) That when the period for which each Professor has been elected expires his re-election, or the appointment of some other person to the Professorship, shall be entirely in the hands of the authorities of Trinity College, who shall be responsible for his future payment.

(f.) That as soon as the period for which each Professor has been appointed expires the capital sum which yields his salary shall be divided, share and share alike, between the College of Physicians and Trinity College.

(g.) That the sum which at present is allocated to the Library, the Librarian, &c., be reserved to the Royal College of Physicians for distribution as heretofore.

According to the arrangements set forth above, the estate of Sir Patrick Dun would be allocated in the future in the following manner:—

1. One half of the entire capital sum would be transferred to the Governors of Sir Patrick Dun's Hospital.

2. A capital sum sufficient to yield £200 (Irish) would be transferred to Trinity College in accordance with the plan above agreed upon.

3. The remainder of the estate would remain in the hands of the College of Physicians.

ANTHONY TRAILL, *Provest*.

R. Y. TYRRELL, *Registrar*.

Statement submitted by the Professors of the School of Physic in Trinity College, Dublin.

School of Physic,

Trinity College Dublin,

15th November, 1906.

DEAR SIR,—I am instructed by the Professors of the School of Physic to inform you that they passed the following resolution at a meeting held on Monday, 5th inst., viz.:—"The Professors of the School of Physic consider that it would be desirable to have the School of Physic Act repealed, and the Medical School of Trinity College completely separated from Sir Patrick Dun's Hospital, provision being made that the vested interests of existing officers appointed under

the provisions of the Act shall be duly safeguarded. They recommend that any financial loss sustained by the Hospital owing to these changes shall be made good by an equivalent grant from the Government Hospital Fund" (ends).

Yours faithfully,

H. W. MACKINTOSH,

Registrar, School of Physic.

James D. Daly, Esq., M.A.

Supplementary Statement submitted by the Royal College of Physicians of Ireland.*

ROYAL COLLEGE OF PHYSICIANS,

6 KILDARE-STREET,

DUBLIN, 13th November, 1906.

J. D. Daly, Esq., Secretary to the Royal Commission on Trinity College, Dublin, and the University of Dublin.

DEAR SIR,

In reply to your letter of the 20th ult., I am directed by the President and Fellows of the Royal College of Physicians of Ireland to forward you the enclosed resolutions of the College, which were adopted *nemine contradicente*; together with a short explanatory statement in support of the resolutions.

Faithfully yours,

JAMES CRAIG, M.D.,

Fellow and Registrar.

TO THE ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, AND THE UNIVERSITY OF DUBLIN.

Resolutions of the Royal College of Physicians of Ireland of 25th October and 2nd November, 1906, with explanatory statement.

RESOLVED: "That the College hopes that the Royal Commission on Trinity College, Dublin, and the University of Dublin, now sitting, will recommend such reform as may set the College of Physicians free from such obligations in respect of Sir Patrick Dun's Estate as tend to connect the College with Trinity College and Sir Patrick Dun's Hospital, while reserving to the College of Physicians out of the estate such sum to be used for the maintenance of the College as may fairly correspond to Sir Patrick Dun's desire, as expressed in his will.

"That the above resolution, and a statement in support of it, be put before the Royal Commission.

"That a similar statement be put before the Government, with a prayer that legislation may be introduced to give effect to the desire of the College.

"That the Board of Trinity College, Dublin, be informed that the College proposes to take measures to sever its connection with Trinity College.

"That the President and Fellows of the Royal College of Physicians of Ireland are prepared to surrender their right to appoint any Professors in the School of Physic in Ireland on the condition that there shall be secured to the College one moiety of the capital sum now representing the corpus of Sir Patrick Dun's Estate; the other moiety to be invested in Trustees for the benefit of Sir Patrick Dun's Hospital.

"That, in making the above changes, the vested interests of the existing King's Professors be safeguarded."

Statement in support of Resolutions.

A careful study of the historical statement submitted to the Commission by the President and Fellows of the Royal College of Physicians of Ireland will make clear the grounds on which the College base their claim for a revision of the School of Physic Act of 1800.

It is evident that Sir Patrick Dun by his "deed" and by his "will" wished to aid the cause of Medical Education in Ireland, to advance the influence of the College of Physicians, and in some measure to endow it with means for its support.

Owing to the loss of interest in the lease of Sir Patrick Dun's house, the College was left without a suitable habitation in which to carry on the teaching scheme intended by Dun, and, consequently, the Professors on Dun's foundation were directed, in the year 1752, to read their lectures in the halls of Trinity College. Thus was taken the first step to make Trinity College a beneficiary under Sir Patrick Dun's will.

During the 18th century the conception of a Medical curriculum made great advances, and with each advance we find the College of Physicians petitioning Parliament for an extension of their powers in dealing with, and administering, Dun's estate. These petitions were readily granted by the Irish House of Commons, as is shown by the various Acts mentioned in the historical statement above referred to.

With the Act of 1785, for establishing a complete

School of Physic in Ireland, a new difficulty arose, for then first the necessity for clinical teaching as a part of the Medical curriculum was recognised. At this time clinical teaching in Medicine, as we understand it, did not exist, and although there were in Dublin several Hospitals in which such teaching could have been given, still the difficulties to be overcome were so great that it seemed necessary to found a special Hospital in connection with the School of Physic to overcome them. Hence the School of Physic Act of 1800 was passed by the Irish Parliament. This Act devoted a large part of Sir Patrick Dun's estate to found the Hospital, now known as Sir Patrick's Dun's Hospital, and to maintain it as a place where the Professors of the School of Physic could give clinical instruction to the students of that School.

Since the School of Physic Act passed, in 1800, the conditions of Medical teaching have been completely changed. A number of Medical Schools and Clinical Hospitals have sprung up in Ireland, and more especially in Dublin, students from all of which the College of Physicians examines for its diplomas. The College, therefore, desires to stand in relation to all of these Schools and Hospitals on an equal footing.

Furthermore, the conception of a Medical School has so developed within the past century that the amount of money paid to the King's Professors lecturing in Trinity College is quite an unimportant item in the endowment of its School; and the withdrawal of the £100 (Irish) from each Chair would, almost certainly, not deter any candidate from seeking these appointments. The share contributed to the School by the College of Physicians is relatively so small, when compared with that expended by Trinity College on the School, that the control of the School has passed entirely from the hands of the former College.

As to Sir Patrick Dun's Hospital, which the College desires to see left in permanent enjoyment of half of Sir Patrick Dun's estate, it has now become a public charity, in the management of which the College has no special concern. The income of Dun's estate is expended in the following ways:—

	£	s.	d.
Four King's Professors	369	4	8
A Librarian to Sir Patrick Dun's Library 64	12	4	
A Clerk to the Estate	25	0	0
Attendant in Library,	6	6	0
Library Grant	30	0	0
Arrangement of Accounts for Audit	4	4	0
	£499	7	0

The annual surplus is paid to the Governors of Sir Patrick Dun's Hospital, and now amounts to £500 per annum.

In view of the matters here set forth, it has appeared right to the President and Fellows of the College of Physicians to petition the Royal Commission to recommend Parliament again to readjust the administration of Sir Patrick Dun's estate by giving effect to the foregoing resolutions, unanimously passed by the Fellows of the College.

At present the maintenance of the College entirely depends on the funds derived from the fees of those seeking its qualifications, and it is to be expected that with the extension of University Education in Ireland the number of these students will be considerably diminished. At present the means at the disposal of the College for maintaining and developing its Library are quite inadequate, and if any substantial falling off in the income of the College should occur, the Library must suffer, and the very existence of the College be endangered. If, however, the proposed alterations in the administration of Sir Patrick Dun's estate be carried out, not only will the future of the College and the development of its Library be secured, but the College will be in a position to continue to maintain a high standard of Medical Education in Ireland.

* The Registrar of the Royal College of Physicians also furnished a statement, printed in the Appendix to the First Report (Cd. 3176), 906. page 125.

Statements with reference to Sir Patrick Dun's Hospital.

(1.) Resolution of the Board of Governors of Sir Patrick Dun's Hospital.

SIR PATRICK DUN'S HOSPITAL, DUBLIN,
24th December, 1906.

DEAR SIR,—I now beg to enclose you a copy of the Resolution you ask for per your letter dated 24th instant.

Yours faithfully,

T. HARLOE PHIBBS, Registrar.

James Dermot Daly, Esq.,
Secretary,
Royal Commission on Trinity College, &c.,

Copy of Resolution passed by the Board of Governors the 5th November, re Royal Commission, &c.

At a special meeting of the Board of Governors, held at the Hospital on the 5th November, 1906, at 4 o'clock, p.m., it was proposed and agreed to that Professor O'Sullivan and Mr. Edward Watson, s.r., be selected as the representatives of Sir P. Dun's Hospital to join the Conference with the College of Physicians and Trinity College.

(2.) Statement of the Medical Staff of Sir Patrick Dun's Hospital.

To the Chairman and Members of the Royal Commission on Trinity College, Dublin, and the University of Dublin.

GENTLEMEN,

The Medical and Surgical Staff of Sir Patrick Dun's Hospital having learned that representations in favour of the repeal or amendment of the School of Physics Acts are being made by the authorities of Trinity College and the Royal College of Physicians in Ireland to the Royal Commission at present taking evidence on the University of Dublin and Trinity College, desire briefly to point out the effect that such repeal would have upon Sir Patrick Dun's Hospital.

The Governors of Sir Patrick Dun's Hospital are constituted under the Act of 1800, and are partly *ex-officio* and partly elected.

The Medical Staff consists of the King's Professors, appointed under the Act of 1800, by the Royal College of Physicians, and the Surgical Staff of the Professor of Anatomy, the Professor of Surgery, and the University Anatomist, appointed since 1865 by Trinity College. As the duties of the Medical School of the King's Professor of the Institutes of Medicine and the Professor of Anatomy are so important, they have had to technically neglect their duty at Sir Patrick Dun's Hospital in order to permit of the Royal College of Physicians and Dublin University respectively to appoint substitutes to discharge the clinical duties of these Professorships at the Hospital.

Sir Patrick Dun's Hospital was founded mainly by money from the income of Sir Patrick Dun's Estate, held in trust by the Royal College of Physicians in Ireland, and endowed with the annual surplus income from the same source, after the fixed charges for maintenance of Sir Patrick Dun's Library and the salaries of the four King's Professors are paid by the Royal College of Physicians. Twenty years ago this annual surplus averaged £1,500 a year. Of recent years, owing to depreciation in the value of the estate, the average income from this source was only £750 a year, and as the estate has now being sold to the tenants, and the money invested by the Royal College of Physicians, the future income will be reduced to £500 a year.

When the Act of 1867, having empowered Trinity College to appoint Surgeons to Sir Patrick Dun's Hospital, which had hitherto been only available for Medical cases, the Provost and Senior Fellows instituted a fee of £5 *liceat ad examinandum*, payable by all students proceeding to Medical Degrees in Trinity College, and paid over the proceeds to the Governors of Sir Patrick Dun's Hospital for the purpose of providing Surgical beds; this payment has been since continued, and for the past ten years has averaged £400 a year. The other sources of income are interest on investments, Hospital Sunday Fund, Grant from

the Dublin Corporation, and Legacies, Donations, and public subscriptions, but Sir Patrick Dun's Hospital receives no share of the Parliamentary Grant in aid of several Dublin Hospitals.

The repeal of the School of Physics Act would necessitate provision being made for—

1. The appointment of new Trustees for Sir Patrick Dun's Estate.
2. The Constitution of the Board of Governors of Sir Patrick Dun's Hospital.
3. The continuance in office of the present Medical and Surgical Staff, and arrangements for the election of their successors.
4. Securing the income of the Hospital from further reduction by the loss of the *liceat ad examinandum* fees paid by Trinity College. If Trinity College ceases to nominate its Professors on the Surgical Staff, it cannot be expected to continue the grant of £400 a year to the Hospital, provision should, therefore, be made for an equivalent grant from the Parliamentary Grant in aid of Dublin Hospitals, or from some other source.

The income from Sir Patrick's Dun's Estate having fallen in twenty years to one-third of what it was, the further loss of £400 a year would very seriously affect the utility of the Hospital.

Subject to the above provision, the Medical Staff of Sir Patrick Dun's Hospital are in favour of the repeal of the School of Physics Acts.

The Medical Staff will be pleased to nominate one of their Members to give oral evidence before the Royal Commission should such evidence be considered desirable.

(Signed),

WALTER G. SMITH, M.D., King's Professor of Materia Medica and Pharmacy.

J. MAGEE FINNY, M.D., King's Professor of Practice of Medicine.

ARTHUR V. MACAN, M.B., M.A.O., King's Professor of Midwifery.

HENRY C. DRURY, M.D., Deputy for the King's Professor of Institutes of Medicine in Trinity College.

CHARLES B. BALL, Regius Professor of Surgery in Trinity College.

EDWARD H. TAYLOR M.D., University Professor of Surgery.

Statements submitted to the Commission with reference to Women Students in Trinity College, Dublin, and the University of Dublin.

XXXVI.

Statement submitted by certain parents and guardians of women students in Trinity College, Dublin, and by certain women students in that College.

(1) LETTER FROM A. PURSER, Esq.

12 PALMERSTON ROAD,
DUBLIN, 31st October, 1906.

sulted, and that only six parents have written refusing to join in this matter.

I am,

Yours truly,

A. PURSER.

DEAR SIR,

I have been commissioned by parents and guardians of women students of Trinity College, Dublin, to forward to you the accompanying expression of dissent from certain views expressed by Dean Bernard and Miss White in their statements,* which are published in the Appendix to the First Report of the Royal Commission on Trinity College, Dublin, and the University of Dublin, and I have to request that our expression of dissent may be laid before the Royal Commission.

Certain women students, who are not under the tutelage of parents or guardians, have desired to join in the same expression of dissent. Their statement also accompanies this letter.

I may add that all parents whose daughters had entered Trinity College before this month were con-

P.S.—In explanation of Mr. Fowler's double signature, I may mention that he was at Mr. Shegog's house when the printed paper arrived, and as he approved of the dissent, he signed it at once. On returning to his own house he found another copy of the paper, which Mrs. Fowler had signed: to this he also added his signature. In no case was a second parent requested to sign. The double signature to this paper and to the paper signed by Lady and Sir J. Johnston are, therefore, exceptional.

A. P.

J. D. Daly, Esq.

Secretary to the Royal Commission.

(2.) STATEMENT

Referred to in foregoing letter.

We, the undersigned parents and guardians of women students in Trinity College, desire to inform the Royal Commission on Trinity College, Dublin, and the University of Dublin, that we dissent from the opinions expressed in the following statements of Dean Bernard and of Miss White (paragraphs 4 and 5), as published in the Appendix to the Commissioners' First Report:—

DEAN BERNARD.—

"The provisions for the admission of women to undergraduate lectures are, in my opinion, unsatisfactory. It is not desirable that women and men should attend 'Pass' Lectures in the Freshman years together, and it would have been much wiser, when women were admitted to the University, if separate lectures had been arranged for them.

"The recognition by the University authorities of some of the lectures delivered at Alexandra College, and the provision of lecturers from the Alexandra College staff for the needs of women undergraduates, would go far to meet this difficulty. As things stand, Alexandra College, which was the pioneer in Ireland of the movement for the higher education of women, is being injured, from a financial point of view, by the determination of Trinity College to reserve all the tutorial fees of women undergraduates for the tutors. And not only is this the case, but the withdrawal of the women undergraduates from the social life of a women's college is disadvantageous to their best interests. It would be a simple matter to arrange a scheme by which the great benefits of a women's college, in this regard, could be secured to the women undergraduates of Dublin University, provided that the University authorities were willing to relinquish a small fraction of the fees paid by women." (Page 43.)

MISS WHITE, LL.D.—

§ 4. "This refusal [of an application from the Alexandra College authorities for a Trinity College lecturer] was received with strong feelings of regret, as it seemed to me desirable, if the degree is to have the same value in the case of women as of men, that women should have the opportunity of sharing in the corporate life of a woman's college. This corporate life can never be fully developed for women in a men's college, and it is deemed on all hands an indispensable preparation for filling the highest educational posts. A University degree which does not include it, is therefore, of considerably less value" (Page 134.)

§ 5. "With regard to residence for women students, the conditions seem to me hardly satisfactory. Where there is no recognized women's college, the regulation for women's residence must necessarily allow of considerable freedom in choice of rooms, &c.; for example, it appears that students are allowed to live in rooms in various parts of the city, either alone or with their brothers who are Trinity students." (P. 135.)

The authorities of Trinity College have the following rule among the "Regulations which women students of Trinity College are expected to observe":—

"Women students shall not attend lectures, unless resident either with their families in town, or in a hall or lodgings approved by the College authorities. They should communicate with the Lady Registrar at least one week before the commencement of lectures."

We entirely agree with the following statement from the Association of Women Graduates and Candidate Graduates:—

"The Association cannot too strongly urge upon the authorities of Trinity College, when making their provision for the teaching of women students,

* Appendix to First Report (Od. 3176), 1906, pages 42 and 134.

DOCUMENTS
SECTION G.
XXXVI.

the absolute necessity of giving to them exactly the same advantages as men students have, by opening to women all lectures, both Pass and Honour, delivered within the walls." (P. 130.)

We are satisfied that the advantages of a "corporate life," dwelt on by Miss White, have been largely secured by the following arrangements:—

"The women students have been placed under the supervision of a Lady Registrar. . . Women's

literary, debating, and athletic societies have been formed, and rooms and extra-mural playing fields have been allotted for their use." (P. 133.)

It would be desirable, if possible, to have a Hall of Residence for women students coming up from the country to attend lectures, and we hope the College authorities may be able to establish it. But such a Hall should not be connected with any institution outside Trinity College, and should not admit students below undergraduate rank.

Joint Statement submitted by certain Tutor Fellows of Trinity College, Dublin.

Certain proposals having been made to the Commissioners, which appear to be founded on the belief that the education of Women Students in their Freshmen Years cannot be advantageously carried on in Trinity College, we, the undersigned Tutor Fellows,* desire to state briefly our opinions thereon.

We consider that the change proposed would be both undesirable and unpracticable. Undesirable, among other reasons, because the claim of women has always been, and must always be, for equal advantages with men; and unpracticable, because of the great waste of energy involved in dividing the instruction, and the impossibility of making any such arrangement as is proposed without depriving some of the honour or professional students of the opportunity of attending the instruction given in Trinity College—even as it is, the time-table difficulty is a very serious one.

The experiment of admitting women to the full educational benefits of the College has, we believe, fulfilled the highest expectations of its supporters; and those who have availed themselves of it have

shown, in every way in their power, their earnest desire to do credit to the College.

SECTION G.

XXXVIII.

Supplementary Statement submitted by Miss White, LL.D., Lady Principal of Alexandra College, Dublin.*

October 31, 1906.

To the Royal Commission on Trinity College, Dublin, and the University of Dublin.

GENTLEMEN,—I desire to add to the evidence I have already furnished the following supplemental remarks:—

1. Importance of Collegiate Life for Women.

There are, to my knowledge, a considerable number of parents who would prefer the degree of Trinity College for their daughters to that of any other University, but who strongly feel that as matters are at present arranged in Trinity College they cannot allow their daughters to prepare there for the degree. They regard the life of a woman's college as being such a highly important part of a woman's University training that they are willing to forego for their daughters the advantage of the Trinity College degree, rather than that they should be separated from those influences with which they desire that their daughters should be surrounded. (See letter from Mrs. G. F. FitzGerald, Appendix A.)

Since the publication of my statement to the Commission I have reason to know, from letters received, that the views expressed in it have met with the approval of parents who intend their daughters to enter Trinity College.

Although the scheme for the admission of women to Trinity College has now been in force for three years, it appears that at the Entrance Examination in last June only nine women matriculated (eight of these being students from Alexandra College). This small number surely seems to indicate that the present arrangements at Trinity College cannot be generally deemed satisfactory.

One cannot ignore the fact that in American Universities, where the experiment of mixed education has been tried, the trend of thought is in favour of separate University life for men and women (as mentioned in my previous evidence in the case of Chicago University). If this is so in a country where mixed education at school is universal, we ought, I think, to hesitate before adopting a system of mixed University education in a country where separate school education is the rule.

In a conversation with the Vice-Principal of the Women's Department of King's College, she explained to me that students reading for London B.Sc. did not complete their course in the Women's Department but did their Final work at King's College, Strand. This arrangement was of great advantage to the students, in so far as it enabled them to work in large and well-equipped laboratories in which advanced work was being done, but she deplored the necessity for the break in a student's College life, which was inevitable when the centre of her work was changed, and the loss of touch with the corporate life of her own department.

That students of Trinity College have themselves felt the difficulties of carrying on their social life within the walls of Trinity College is proved by the Memorial which was presented by Dr. Eva Jellett to the Board in January, 1905. Dr. Jellett was at the time a student of Trinity College, and afterwards took first places at the Final Examinations in Medicine and Surgery. A copy of her letter is appended to this Statement. (See Appendix C.)

2. Lectures at Alexandra College.

I should like emphatically to urge the claim of Alexandra College to recognition on the part of Trinity College. I urge this claim with the conviction

that a scheme to render available for Trinity College students the resources of Alexandra College would strengthen the position of Trinity College, and would be a step towards creating an Irish Women's University College.

Such recognition ought to include:—

(1.) Recommendation of residence in the Residence Hall attached to Alexandra College (except in the case of those students who live with their parents or guardians).

(2.) Arrangements for Pass Lectures for Women to be given at Alexandra College in any subject where the Lecturer is approved by the Board of Trinity College, and arrangements for Honor Lectures in any subject where it appears desirable, as in Modern Languages or English Literature. I further ask for the recognition of suitably-qualified women Lecturers at Alexandra College in a scheme which forms part of a movement for the advancement of the Higher Education of Women. Recognition ought, of course, to include the proportionate return of fees where girls attend Lectures at Alexandra College.

I would plead for our Lectures on the grounds:—

(a.) Of their affording teaching more suitable under conditions more natural and less distracting, to the average girl.

(b.) Of their forming part of a regular Collegiate life, bringing the student into contact with her teachers and with her fellow-students.

3. Supplemental Teaching given by Alexandra College.

That the students who pass from us to Trinity College do not find the teaching given in the Pass Lectures sufficient, and that they feel the need of supplemental instruction, is shown by the fact that in the Session 1904-5, 8 students attended Junior Freshmen classes here; in the Session 1905-6, 7 students attended Senior Freshmen classes, and during the present Session, 1906-7, of the 8 students who matriculated at Trinity College in June, 6 are now attending Junior Freshmen classes here. During the past Session, 1905-6, 11 of our students, who are now following up their degree course in Trinity College have received special coaching here.

These classes naturally involve expense, and a difficulty arises with regard to extra fees for teaching. When the full fee of £16 16s., per annum, has already been paid to T.C.D., the payment of double fees involves a strain which many students can ill afford to meet.

The recognition of Alexandra College, if it involved a partial remission of fees by Trinity College, might mean a diminution of financial gain to Trinity College, but it must be remembered, first, that the equipment for women's collegiate life, in any generous sense of the term, must be costly, and that Alexandra College would provide a valuable equivalent for the portion of fees handed over to her, and, secondly, that the opening of Trinity College to women has brought considerable financial gain to the institution.

4. Limitations in privileges granted to women.

In considering the advantages that Trinity College offers to women, it must be remembered that only to a certain extent are its doors open to women; and

* Miss White also furnished a Statement printed in the Appendix to the First Report (Cd. 3176), 1906, page 134. Her oral evidence will be found at page 263 of this volume.

only to a certain extent can they be so. Its Professional Schools (except one) are closed, its Governing Body is closed, its Teaching Faculty is practically closed, its residence, its social life and its clubs are closed to women.

5. Hostel Scheme.

I feel strongly that it should be made obligatory that students who do not live with their parents should live in a recognised Hostel. Certain financial difficulties arise in connection with the establishment of such a Hostel. Owing to the small number of students, and the fact that in this country very few students can afford to pay adequate fees, it is clear that it would be impossible to work it except at a loss. I, therefore, feel that it would be wise to make use of existing accommodation until it can be seen what the demand will be.

It would, perhaps, be possible for the Council of Alexandra College to give No. 6 Earlsfort terrace for this purpose. University students could enter by their own hall-door, could have dining and sitting rooms separate from other resident students, and study bedrooms would be available for them. They need have no contact with any other inmates of the residence hall, unless they so desire it; but they would have the advantages of access to the College buildings—including the library, gymnasium, common rooms and grounds—and could join the College clubs, and enter into its social life.

It will be remembered that the Royal University Commission emphasised most strongly the paramount importance of this last factor in University education, and educational authority is increasingly strong in its advocacy of life and residence in College. Now in the case of women this factor is as important as in the case of men, and I regard the attempt to provide University education without it, and without allowing

any scope for it, as injurious to the best interests of women's education.

6. Training Department.

The Department for the training of teachers, which was established in Alexandra College in connection with the Trinity College Training Department, has now been at work for one session, and received from the Board of Education, after the visit of their Inspector, a most satisfactory report, when recognition was renewed. This recognition in the case of Trinity College was suspended (see evidence of Mr. Culverwell, p. 78, appendix to first report of Commission). Hence the Training Department of the University of Dublin has no official recognition from Government, except in its connection with Alexandra College. It is much to be desired that the Mistress of Method or some similar Alexandra College officer should be formally associated with the examination and certification of the students who have been in her charge, as recommended in the Inspector's report.

The points I have brought forward are not with me matters of conjecture, as having had a long acquaintance with the needs and capabilities of women students, and a personal knowledge of the majority of Trinity College women students, I feel that I can speak on this subject with confidence and strong conviction.

Any divergence of interests or lack of warm co-operation between Trinity College and Alexandra College is much to be deplored, and must be injurious to both Colleges. Each College can and should render valuable service to the other, and it is only by so doing that the best interests of both institutions can be served.

H. M. WHITE, LL.D.

APPENDIX A.

Letter from Mrs. G. F. Fitzgerald to Miss White.

DEAR MISS WHITE,

From my long connection with Trinity College, through my father, Provost Jellett, and my husband, Professor Fitzgerald, I cannot but take a deep interest in the admission of women to compete for its degrees. And, apart from this, the fact that I have five daughters, makes the question of women's education a very pressing one.

There are few, I fancy, who have so strong ties as mine to Trinity College; yet, notwithstanding this, and having thought over the matter for a long time, I have decided not to send my girls there. Valuable as the Trinity degree would be to them, the system

of education provided for women in Trinity does not commend itself to me, either from an education or social standpoint. And so I must protest, though it be of little account, against conditions which do not make for the highest education of our girls—the mere offering of a degree in a man's residential College, accompanied as it is by conditions which do not find favour in most Colleges where women are admitted, and are, to my mind, wholly unsuitable.

Yours very sincerely,

HARRIETTE M. FITZGERALD.

APPENDIX B.

Note on Term, "Honor Student."

I should like to say that the term Honor Student I take to mean a student who graduates with honors, i.e., takes her degree by obtaining a Senior or Junior Moderatorship, having taken Honor subjects throughout her undergraduate course. The proportion of women who will take Moderatorship cannot be exactly ascertained, as no woman has had time to complete her Trinity College course (Trinity College having opened to women in 1903). We may, however, note that of the 169 men who graduated in 1905-6, 55 were Moderators, i.e., 33 per cent. It is not likely that the proportion in the case of women will reach a percentage very largely exceeding this. Further, of the 170 women from Alexandra College who have graduated in the Royal University, 58 have taken an Honor

degree, i.e., 34 per cent., which bears out my contention that the Honor students will be in a minority.

Since the opening of Trinity College, Dublin, twenty-eight students of Alexandra College have matriculated at Trinity College; of these, three are taking Honor Classics and one is taking Honor Mathematics. All the others are taking the Pass Lectures in Classics and Mathematics. That is to say 85 per cent. of the students who entered from this College are taking the pass course in Classics and Mathematics.

During the past twenty-two years lectures have been held at Alexandra College for R.U.I. students. Knowing, as I do, the relative proportion of pass and honor students in those classes, I may fairly presume from past experience that the percentage of honor students must always be a comparatively low one.

APPENDIX C.

DOCUMENTS
SECTION G.
XXXVIII

Letter of Dr. Eva Jellett to the Board of Trinity College.

27 LOWER LEESON-STREET,
DUBLIN, January 12th, 1905.

DEAR SIR,

In view of the proposed Association among the Women Students of T.C.D., I have been endeavouring to collect information as to the arrangements for social life among women students of several of the English and Scotch Universities which admit women to their degrees or examinations. The Universities from which I have been able to obtain information are:—

1. Oxford University.
2. Cambridge University.
3. London University.
4. Edinburgh University.
5. Glasgow University.
6. University of Wales.
Bangor College.
Cardiff College.
Aberystwyth College.
7. Birmingham University.
8. St. Andrew's University.

From a consideration of the information thus supplied, it appears to me that the following points might be helpful in our efforts to establish social life among the Women Students of T.C.D.

1. *Similarity of T.C.D. to Oxford and Cambridge.*

No University is exactly similar to T.C.D. in its circumstances.

Oxford and Cambridge approach most nearly the character of T.C.D., being both Universities whose College buildings include residence for men. Neither of these Universities has any social organisation for women within its College buildings, nor are the men's clubs open to women except as guests.

2. *Difference between T.C.D. and Oxford and Cambridge as affecting Women Students.*

Oxford and Cambridge differ from T.C.D. in not being situated, as we are, in a large city, and this fact would, in the case of Trinity College, increase rather than diminish the necessity of control, and the importance of wise forethought in laying the foundations, on which the future social life of our students in T.C.D. will be built.

Inasmuch as Collegiate authority cannot control the College societies in their actual working, would it not be well that the Women Students' Meetings should take place in surroundings which, while allowing full liberty of development, would afford sufficient control?

Social life for women, if carried on within the buildings of T.C.D., must either be hampered by restrictions as to hours, etc., which would prevent its efficient development, or would have to be allowed a, perhaps, unwise amount of control. The necessity for these restrictions is due to the fact that—

- (a.) The College is situated in the middle of a large city.
- (b.) It consists largely of men's residential quarters.

3. *Analogous position of Alexandra College to Bedford College, London, and Queen Margaret College, Glasgow.*

I find that where a Woman's College existed side by side with a University which did not admit women to its degrees, i.e., in London and Glasgow, these Universities on opening their degrees to women made use of the already existing Women's Colleges, i.e.,

Bedford College, London, and Queen Margaret's College, Glasgow. Alexandra College, in our case, occupies a position analogous to that of those two Women's Colleges. To utilise it in any way for the Women Students of T.C.D. would, therefore, be no unprecedented step.

4. *Points bearing on social life gathered from other Universities.*

The remaining Colleges mentioned in the list given above are all non-residential for men. Their circumstances are, therefore, very different from those of T.C.D. But the following facts gathered from their arrangements may be found useful.

(a.) It appears that wherever Women's Societies have been allowed to meet within the College buildings, such permission has been part of a scheme which included joint clubs for men and women. The advisability of such a result in T.C.D. deserves consideration.

(b.) In Bangor the clubs are common to men and women. But the liberty thus granted is safe-guarded by the strict regulations laid down by the authorities, both with regard to the residence of students, men and women, and also the conduct of the clubs. Such strict regulations do not obtain in T.C.D.

(c.) Women Students have the option of entering London University through a Woman's College, i.e., Bedford College, and in connection with that College every variety of club life is open to them. Provision is thus made for those Women Students who desire that their social life shall be in connection with a Woman's College. The majority—twenty-five to fourteen—of Women Students now in T.C.D. desire a like connection with a Women's College. What provision can be made for them?

5. *Loss of Students to T.C.D. due to existing arrangements.*

From my own personal knowledge, I know of several students lost to T.C.D., on account of the present arrangements for Women Students. A connection formed with a Woman's College for the social side of women's undergraduate life would go far to remove the objections which at present prevent such students entering Trinity.

6. *The following is a list of the Clubs, etc., at Alexandra College:—*

- I. Alexandra College Guild, which holds a yearly Conference on all questions connected with Women's Work. Branches of the Guild are:
 - (a.) Alexandra College Guild Tenement Co.
 - (b.) Bursaries Scheme.
 - (c.) Alexandra Guild Working Girls' Club.
 - (d.) Literary Society.
- II. Students' Debating Union.
- III. Games' Club; with Hockey Ground, Tennis Courts, etc.
- IV. Photo Club.
- V. Dramatic Society.
- VI. Missionary Society.

All the above, with the exception of VI., are absolutely non-sectarian.

If it is desired, I should be very pleased to give my authorities for any statements made in this letter.

I am,

Yours faithfully,

EVA J. JELLETT.

SECTION G.

XXXIX.

XXXIX.

Statement submitted by Miss O'Farrelly, M.A.*

IRISH ASSOCIATION OF WOMEN GRADUATES AND CANDIDATE GRADUATES.

GENTLEMEN,

1. We desire that the full advantages of University education shall be extended to all women-students in Ireland, and that the same teaching, Prizes, Honours, and Degrees shall be open to them as to men-students.

2. In Ireland at present, while Trinity College and the three Queen's Colleges have thrown open these advantages to women, the women who cannot attend those Colleges are almost wholly shut out from University teaching in Arts. These include the large class of Catholic women-students who are debarred by religious considerations from attending Trinity College and the Queen's Colleges, also all women-students of the Royal University who do not reside within reach of one of the Queen's Colleges. Both these classes of women-students have entered the University in large numbers and taken Honours and Prizes, in proportion to their number, as numerous as those won by men-students.

3. In University College, Dublin, fifteen Fellows in Arts of the Royal University lecture, but (except for certain public lectures given each session) women-students are excluded from their teaching. About 120 lectures in Arts are given weekly to the men-students. From these women-students are excluded; yet for Honours and Prizes they have to compete with men-students so taught by the Fellows (who are also examiners).†

They also lose the greatest benefit of University education—teaching by scholars and experts in the various subjects of their curriculum, and contact with men of academic learning and ability.

4. We submit a correspondence with the authorities of University College, showing our failure to induce them to alter this unjust treatment and extend to this class of students benefits open to all others. We also append a Memorial on the subject addressed to the Chief Secretary for Ireland in 1904.‡

We now desire to iterate the prayer of that Memorial.

We earnestly beg that in laying down any scheme for Irish University education as a whole, your Commission will recommend *that no charter or endowment be given to any University or University College which will not give to women-students the same teaching, degrees, honours and prizes as are open to men-students.*

We desire to point out that these Irishwomen are the only class of women in the United Kingdom thus shut out from University teaching in Arts, every University College in England, Scotland and Wales, having, with the best results, thrown open their advantages to women. Yet nowhere is such education more needed than in Ireland. Every day women have a larger influence in the education of their children and in home and social life; they are increasingly sharing in public and philanthropic work in Ireland, and it is now the rule, and not the exception, that the Irish girls in the middle classes have to adopt some means of livelihood.

We earnestly urge the necessity which exists for legislation on this point and we look to your Commission to be the means of putting an end to a great injustice which reacts on the well-being of the whole community.

XL.

Statement submitted by Miss Hanan, B.A.*

IRISH ASSOCIATION OF WOMEN GRADUATES AND CANDIDATE GRADUATES.

GENTLEMEN,

1. The principle which we desire to uphold is that the same advantages in teaching, Honours, Prizes, and degrees that are open to men students in any University or College in Ireland shall be, as far as possible, open to women.

If teaching, separate and different, be given to women students, there is no guarantee that it will be the same, or as good, as that enjoyed by men students.

In almost all the Colleges of England, Scotland and Wales, the same teaching is given to all students alike, and this system is found to work well and to be the most simple, economical, and just.

2. In Trinity College this has been the system adopted since the admission of women in 1904, and after two years' experience we are authorized to state that the authorities, Fellows and Professors of Trinity College, and the women students themselves and their parents consider that it is quite satisfactory. No difficulties or evils have arisen. The women students have done admirable work (as evidenced by the Honours and Prizes they have won), and are happy and satisfied with the present arrangements in the College. No desire for any alteration has been expressed by those most concerned in the matter.

We submit that the opinion of those who have had practical experience of the present arrangements should have weight, not the views of those who have no personal knowledge of the working of the system.

3. To exclude any class of women students from the teaching given within the walls would be to separate them from the culture, tone, and traditions of Trinity College, and from social intercourse with other women students, giving them instead teaching and surroundings different in every way and not those which are to be enjoyed in a great University. This would be so

injurious and unjust that we believe it would prevent women from entering Trinity College who expected to be thus treated.

Also, we believe that the taking of some lectures in Trinity College and some in another institution would be found wholly unworkable from the difficulties in arranging the time-table.

4. To allow such extern teaching as an alternative course would also be disastrous, dividing the women students into small classes and isolating a few individuals from full University life.

5. The greater part of the social life of the women students must always be carried on chiefly within Trinity College itself, where they daily spend many hours in attending lectures, laboratories and other teaching, in reading in the library, and for examinations. For this the Board have made ample provision under the wise and thorough direction of the present Lady Registrar.

We understand that the Board have now under consideration the establishment of a residential hostel for women students with playing-fields attached, and this will give all that is needed, for every class of women students, in the best way.

6. If changes be found desirable in the curriculum, etc., of Trinity College, we desire that such changes shall be made for the benefit of the whole body of the students, and that no differentiation shall be made in regard to women students—a differentiation needless and injurious.

We, therefore, urge that the present arrangements for women in Trinity College made by the authorities shall be maintained. They are on the same lines as those in other Universities in Great Britain and are working to the satisfaction both of the authorities and of the students themselves.

* A Statement submitted by the Association of Women Graduates and Candidate Graduates is printed in the Appendix to the First Report (Cd. 3176), 1906, page 129. Miss O'Farrelly's and Miss Hanan's oral evidence will be found at page 286 of this volume.

† The School of Medicine has been for some time open to women, with perfectly satisfactory results; and occasionally individual students, who apply for it, are allowed some tuition in Arts.

‡ Note by Secretary.—As these Documents dealt with matters outside the scope of the Inquiry, they are not printed in the Appendix.

XLI.

Letter from the Rev. William Delany, S.J., LL.D., President of University College, Dublin,
in supplement to his Oral Evidence.*

MY DEAR MR. DALY—

On reading the portion of my evidence which deals with the relation of the proposed new College of Science in Dublin to a new University or University College established to meet the needs of Irish Catholics, I realise that I did not express at all adequately my entire dissent from any suggestion that the students of the Catholic institution should receive their scientific education in the College of Science.

I. Any such scheme, if carried into effect, would lower enormously the prestige of the new Catholic institution. Seeing the ever-growing importance of the teaching of Science, a College, whose students were obliged to go elsewhere for their scientific training, could not be regarded as of true University standing. It might be a School of Arts, but would no longer be a School of Science. Such an arrangement would reduce the institution for Catholics below the level at which, notwithstanding our serious disabilities, this College at present stands.

II. One of the most potent influences in developing that culture, which is one of the most valuable results of University life is, for the Professors who teach, as well as for the students who learn, the intermingling of men of different tastes, trained on different lines of study.

III. It is plain that the intellectual culture imparted and received in the College for Catholics would be very seriously impaired by any arrangement which would in great part or altogether withdraw from it the Professors and the students engaged in scientific work.

IV. By withdrawing pupils of the College to pursue their studies in another and quite different institution it would go far to destroy the *esprit de corps* and the solidarity of collegiate life, which is so essential to the welfare of a College.

Nor could the Governing Body of the College effectively direct and supervise the work of its students in a most important part of their education, carried on, as it would be, in an institution not controlled by the College, and (as might easily happen in such circumstances) carried on possibly on lines that the College authorities might deem quite unsuited to their students. In regard to its more gifted students, the scientific function of a University is largely the development of faculties of original research and the widening of the field of knowledge; the function of a College of Science is to train its students more and more perfectly in the application of scientific principles and of new discoveries to the improvement and development of practical industries in their manifold forms.

The question presents itself: is the College of Science to provide the teachers and the teaching on these quite

distinct lines? And as relates to the University students—is the direction of their scientific studies to be transferred from the University authorities to those of the College of Science?

V. Then come the vital administrative questions:

Who are to have control of the programme of study? Of the arrangement of the time-tables? Of the use of the Laboratories?

What abundant materials for friction and disagreement, and what a lowering of the status of the so-called University College?

But as a Catholic educationist, I feel it my duty to go further, and to register a protest against the whole project of spending a vast sum of money on a College of Science, whilst the crying grievances of the great mass of the Irish population in the matter of Higher Education are left unredressed.

No body of Irish educationists, so far as I know, have asked for, or expressed their approval of such an expenditure in existing circumstances. It has not been called for by the elected representatives of Ireland in Parliament. So far as I can conjecture, the proposal seems to have had its origin in the Department of Agriculture, a body whose ingercence into the domain of Irish education has, so far, given little satisfaction to Irish educationists.

It seems to me perfectly plain (if Irish opinion is to carry any weight in this purely Irish subject) that if there existed to-day in Ireland an elected representative body entrusted with the control of Irish education, a proposal to spend a huge sum of money on a College of Science, whilst leaving Higher Education in its present miserable condition, would be scouted by the whole assembly.

The whole project is just an example of a mode of government that we are unhappily only too familiar with in Ireland. Refuse Irishmen what they ask, even though it seem reasonable enough; but give them something else that they do not want, and then complain to the world how unreasonable and ungrateful they are in rejecting your gift.

I respectfully request that this letter may be appended to my evidence regarding the relation of the College of Science to any proposed new College or University for Catholics.

Believe me,

Yours sincerely,

WILLIAM DELANY.

XLII.

Supplementary Statement submitted by Professor A. F. Dixon, M.B., D.Sc.*

To the Members of the Royal Commission on Trinity College, Dublin, and the University of Dublin.

GENTLEMEN,—When I had the honour to appear before you as a witness in connection with a statement submitted by the staff of the Medical School, it was suggested by one of your number that it would be of interest if I could supply the Commission with figures showing the number of our students who when qualified remain in Ireland (question 1961).

I have lately gone through the names in the Medical Directory for 1906, and I find that out of 2,654 medical men resident in Ireland, 397 are graduates of Dublin University, and that a total of 489 were educated wholly or in part in the Medical School of Trinity College. That is one to every 5·4 medical men in Ireland have been trained wholly or in part in Trinity College. Of this 489, 99 hold hospital appointments in County Dublin; 32 hold provincial

hospital appointments; 17 act as medical officers to institutions, for the most part prisons or asylums; 79 are medical officers to urban districts, dispensary districts, or union workhouses; 4 act as inspectors under the Local Government Board, or are on the Prison Board; 1 is medical superintendent of statistics in the office of the Registrar-General; 1 acts as Commissioner of Control and Inspector of Lunatic Asylums, and another as Inspector of Lunatics; 6 are teachers in Medical Schools, but are unconnected with any Clinical Hospital; and a number of others serve as Admiralty surgeons, medical attendants to the Royal Irish Constabulary, the Post Office, and the Telegraph Office.

Letter from the Rev. J. E. H. Murphy, M.A., Professor of Irish in the University of Dublin.†

RATHCORE RECTORY, ENFIELD, COUNTY MEATH,

4th Dec., 1906.

DEAR SIR,

Since I had the honour of submitting evidence to the Royal Commission on the University of Dublin and Trinity College, in reference to the Professorship of Irish in said University—having regard to the question (or questions) asked me as to the connection of the late Rev. George Salmon, D.D., Provost of Trinity College, with the Irish Society, in the relation of Trustee—I wrote to the Secretary of the said Irish Society (lately amalgamated with the Scripture Readers' Society), asking him to let me know whether the Rev. George Salmon, D.D., late Provost of Trinity College, Dublin, had been ever at any time a Trustee of the Irish Society, and I have the honour to furnish you with a copy (on the next page) of the reply of the Secretary of the Irish Society to my letter—for the information of the Royal Commission.

I am, sir,

Yours faithfully,

J. E. H. MURPHY, M.A.,

Professor of Irish in the University of Dublin.

The Secretary to

The Royal Commission

on Dublin University.

P.S.—I should be glad if this letter—and the copy of the letter enclosed—could be published, by way of explanation, in connection with my evidence before the Commission.

(Copy.)

"Scripture Readers' and Irish Society for the Promotion of Christ's Kingdom in Ireland, by the Circulation and Teaching of God's Holy Word."

"28 MOLESWORTH STREET, DUBLIN,

"4th Dec., 1906.

"DEAR SIR,

"In reply to your letter of enquiry, I have to inform you that the late Rev. George Salmon, D.D., and Provost of Trinity College, was never at any time a Trustee of the Irish Society."

"Faithfully yours,

"JAMES F. CAITHNESS,

"Clerical Sec."

Documents put in by George Fottrell, Esq.

(See the Evidence of Mr. Fottrell, p. 98.)

(1) QUESTIONS IN RELATION TO THE SYSTEM OF TEACHING IN COMMON IN THE UNIVERSITY OF BONN, OF CATHOLIC AND NON-CATHOLIC STUDENTS, SUBMITTED IN DECEMBER, 1905, BY MR. GEORGE FOTTRELL TO A PROFESSOR OF CATHOLIC THEOLOGY IN THAT UNIVERSITY, AND HIS REPLIES THERETO.

DUBLIN,

December, 1905.

The question of University Education is one of pressing importance to Catholics in Ireland. The problem to be solved is how best to secure to Catholic students their rights to university and collegiate training, without unnecessary danger to their faith, and

without in any way infringing on the corresponding rights of non-Catholics.

Of the plans which have been suggested to meet the difficulty, one is, that in the University of Dublin—a University which has but one college, Trinity College—there should be established, in addition to the existing Faculty of Theology (Protestant), a Faculty of Catholic Theology and Philosophy, meaning, by Philosophy, Mental and Moral Philosophy, or, as it

* Professor Dixon's evidence will be found at page 102.

† Rev. Professor Murphy's evidence will be found at page 218.

is expressed in the University of Dublin, Logics, Ethics, and Metaphysics.

Before accepting or even considering this proposal, it is desirable that those who, in this country, are called upon to approve or disapprove of it, should have evidence put before them of its probable effect if adopted.

The best evidence is that of experience. This, I am told, is to be found in Germany. In that country the same difficulty which confronts us in the proposal above alluded to confronted the German authorities—ecclesiastical and lay—the difficulty, namely, involved in teaching Philosophy (in our sense of the term) in one and the same college to Catholic and non-Catholic students.

It is important for our guidance to learn—

- (a) What was the plan adopted in Germany to meet the difficulty?
- (b) Has it been from the educational point of view successful?
- (c) Has it been acquiesced in by the guardians, ecclesiastical and lay, of the students?

It would be imposing too great a burden on you to ask you to reply to questions relating to the whole of the German Empire; and therefore the queries which I take the liberty of sending are confined to the University of Bonn, in which University your long experience as a Professor qualifies you to answer with authority, and I hope without much labour to yourself.

My sole excuse for troubling you must be the importance to us Irishmen of the issues involved in the present discussion.

The Universities of Bonn and of Dublin may with propriety be compared with each other. Each of them serves a country in which Catholics largely preponderate in number, while non-Catholics preponderate in wealth. In the two universities the system of government is probably wholly different.

In Dublin the Senate has practically no influence in the daily working of the University. All effective power is vested in a Board consisting of the Provost and of Seven Senior Fellows, none of whom wins a place on it except by seniority, which in practice means that a man rarely becomes a member of the governing body until he has reached old age—a system of government not conducive to the rapid recognition of the necessity for reform.

No member of the Board is a Catholic, nor is there any Catholic a Professor in Logics, Ethics, or Metaphysics.

With great interest and sincere thanks I look forward to the light which I am sure you will throw upon a difficult and important question.

Faithfully yours,

GEORGE FOTTELL.

To

THE REV. DR. F.,
Professor of Theology in the University
of Bonn.

QUERIES AND ANSWERS IN RELATION TO THE UNIVERSITY OF BONN.

QUERIES.

1. Roughly, what is the population of the country which supplies students to the University? Showing—

- (a) Catholics.
- (b) Non-Catholics.

ANSWERS.

1. The students of the University of Bonn come in their greater number from the Rheinprovinz (Rhenish Prussia), although also students of the other parts of the German Empire often go to Bonn for one or two semesters (we reckon here by semesters, and not by the year). For instance, last semester, i.e., last summer, 3,029 had matriculated here; of these 2,128 came from the Rhenish Province, 658 from other provinces of the Kingdom of Prussia, 175 from other parts of the German Empire, and 68 from other countries. Last winter we had 2,908 students.

We have five Faculties. There were here last summer matriculated—

1. In the Faculty of Catholic Theology, . 307
2. In the Faculty of Protestant Theology, . 89
3. In the Faculty of Law, . . . 942
4. In the Faculty of Medicine, . . . 206
5. In the Philosophical Faculty, which in this sense is the old Faculty of Arts, 1,485

Total, 3,029

Now, answering your question: The country which chiefly supplies students to the University is the Rhenish Province of Prussia, which has—

- (a) Catholics (about) . 3,800,000=69 per cent.
- (b) Non-Catholics (about), 1,700,000=31 per cent.

NOTE.—Catholics form—

of the population of the Empire of
Germany taken as a whole, . 36 per cent.

of the population of Prussia taken
as a whole, . . . 34 per cent.

SECTION H.
XLIV.

QUERIES AND ANSWERS IN RELATION TO THE UNIVERSITY OF BONN—*continued.*

QUERIES.

ANSWERS.

2. What is the average number of students attending the University? Showing—

- (a) Catholics.
- (b) Non-Catholics.

2. Last winter we had in Bonn at the University 2,908; and last summer 3,029 students. The numbers are always greater during the summer months. In Germany experience shows that those universities that are nicely situated in a fine country are more frequented during the summer months, whilst during the winter the universities of Berlin, Munich, Leipzig, &c., have greater numbers than in the summer.

Now the average number of students (which during the last six years increased from 2,000 to 3,000, and is increasing every semester) may be said to be about 2,800. Of these about two-thirds or, speaking still more accurately, three-fifths are Catholics, whilst one-third or, more accurately, about two-fifths, are non-Catholics.

3. What is the Governing Body of the University called?

- (a) Of how many members does it consist?
- (b) How many are Catholics?
- (c) How are the members appointed or elected?

3. The Senate.

- (a) Of twelve members.
- (b) At present (*viz.*, during this year) six.

(c) The members of the Senate are the following:—The Rector, the Pro-rector, the five Deans of the five Faculties, four members elected for the Senate specially, and the Judge of the University.

The only member not elected by the professors, but appointed by the Government, is the Judge of the University. He is *ex-officio* a member of the Senate, and is appointed for lifetime. The present one is a Catholic. The Rector is each year elected on the 2nd July; he is elected in a plenary meeting of all the ordinary professors of the University, must himself be an ordinary professor, begins his office on October the 18th, and has it for one year. When his year of tenure is over, he is *ex-officio* Pro-rector for one year only. As it happens just at present, both the Rector and the Pro-rector belong to the Catholic denomination. The Deans of the faculties are also *ex-officio* members of the Senate. They are elected, July 2nd, for one year only, and are elected each by the ordinary professors of his faculty. Thus the office changes every year; and one may become Dean again in one faculty and in others every five or six years. I may mention that, although the Rector is elected by all the ordinary professors of the University, and the Deans each by the ordinary professors of his faculty, their elections must be ratified by the Government, *viz.*, the Ministry of Education, etc.; although I do not remember an election that was not ratified. The four Senators mentioned above are also elected by the ordinary professors of the University, and are bound to take the office, and need not any approval of the Government. They are elected for two years, and in this way: on the eve of the beginning of the new Rectorship, on the 17th of October, the ordinary professors choose two by written votes. Thus, at present, two of our four Senators were chosen on October, 1904, and go on till October 17th, 1906; two were chosen October, 1905, and go on till October 17th, 1907.

(d) Is there any rule as to the proportion of Catholics and of non-Catholics who must be on the Governing Body, or is the appointment or election unrestricted?

(d) There is no rule, and the election is, as far as religion is concerned, unrestricted.

(e) Is every full professor an *ex-officio* member of the Governing Body?

(e) No. However, every full—*i.e.*, ordinary—professor is *ex-officio* a member of the plenary meeting which elects the Rector and two Senators each year.

4. In the Faculty of Theology how many are there—

(a) Full Professors?

4.

(a) Seven, and one Honorary Professor, who is a Canon of the Cathedral of Cologne, and has no salary as professor, but the right of giving lectures on ecclesiastical art, and also the right of taking part in the election of the Rector.

(b) Extraordinary Professors?

(b) Three.

QUERIES AND ANSWERS IN RELATION THE UNIVERSITY OF BONN—*continued.*

DOCUMENTS.
SECTION II.
XLIV.

QUERIES.

ANSWERS.

4—*continued.*

- (c) *Privat-docenten*? Of these how many are Catholics? Is there any rule as to the number of Catholics and non-Catholics?
- (d) Are the Catholic Professors clergymen, or are they laymen? or, if both, how many are there of each?
- (e) Do they teach professedly in accordance with the received doctrines of the Catholic Church?

4—*continued.*

- (c) Two. All are Catholics. There are two Faculties of Theology here—one of Catholic Theology, another of Protestant Theology.
- (d) All the Catholic Professors of Theology are clergymen, just as all in the Faculty of Protestant Theology.
- (e) Yes. Although all the Ordinary and Extraordinary Professors of Catholic Theology are, just in the same way as the other professors, appointed and salaried by the State or the Government, the statutes of the Faculty say, and these statutes are observed too, that before a new professor is appointed, the Archbishop of Cologne (Bonn is in the archdiocese of Cologne) must be heard. The statutes say: "Nobody can be appointed to the Faculty of Catholic Theology in Bonn, or admitted there to teaching, without the Archbishop of Cologne having been first asked about him; the Archbishop has the right to refuse the appointment or admission of a candidate for a place in the Faculty if he, the Archbishop, has serious doubts regarding the life or the orthodoxy of the candidate."

"In case a teacher of Theology in the Catholic Faculty in Bonn offends, in his lectures, against the Catholic faith or Catholic morals, which he is appointed to prove in a literary manner, or in case he should give more serious scandal by his life, the Archbishop has the right of bringing the matter to the notice of the Ministry, which will then do everything to remove the cause of complaint of the Archbishop."

"The Archbishop of Cologne has the right of visitation as far as the Faculty of Catholic Theology in Bonn is concerned, which Faculty is under his spiritual supervision as far as the Catholic Church is interested in the work of the Faculty. The titles of the lectures which the members of the Faculty intend to give during each semester must first be mentioned to the Archbishop; and the Faculty is bound to receive his remarks about purely theological matters respectfully, and to follow them as much as possible. The supervision of the Archbishop is also extended to the members of the Faculty as far as they are Catholic priests."

5. In the Faculty of *Philosophy*, so far as relates to *Logics*, *Ethics*, and *Metaphysics*, how many are there—

- (a) Full Professors?
- (b) Extraordinary Professors?
- (c) *Privat-docenten*?

Of these how many are Catholics?

And is there any rule as to the number of Catholics and non-Catholics?

5.

- (a) Two full Professors.
- (b) One Extraordinary Professor.
- (c) Two *Privat-docenten*.

At present, of all these only one is a Catholic, who is a full Professor of Philosophy and teaches *Logics*, *Ethics*, and *Metaphysics*.—(There is also a member of our Theological Faculty teaching *Metaphysics* regularly, although he is appointed chiefly for *Apologetics*.)

There is no rule; although we have often had a full Professor of Moral Philosophy and an extraordinary one or a *Privat-docent*.

According to the statutes of the University there must be in the Law Faculty at least one Catholic who teaches *Canon Law*, and there must be in the Philosophical Faculty always a Catholic and a Protestant Professor of Moral *Philosophy*. Since the year 1853 there is also an ordinance, according to which there must be a Catholic and a Protestant Professor of *History*. Short of this, and of the fact that, of course, all the members of the Faculties of Theology must be all Catholics or all Protestants, there is no rule as to the number of Catholics and non-Catholics.

DOCUMENTS.

SECTION H.

XLIV.

QUERIES AND ANSWERS IN RELATION THE UNIVERSITY OF BONN—*continued.*

- | 5.— <i>continued.</i> | QUERIES. | 5.— <i>continued.</i> | ANSWERS. |
|-----------------------|--|-----------------------|--|
| (d) | Are the Catholic Professors in this Faculty Clergymen or are they Laymen, and, if both, how many of each? | (d) | The Catholic full Professor of Philosophy in the Faculty of Philosophy is a layman. |
| (e) | Do they teach professedly in accordance with the received doctrines of the Catholic Church? | (e) | Yes. He, as well as his predecessors. |
| 6. | At the examinations which take place at the University are separate examination papers prepared—i.e. separate questions put for Catholic Theology and Catholic Philosophy: i.e. Logics, Ethics, and Metaphysics? | 6. | As far as Catholic Theology is concerned all examinations regarding Catholic Theology are held by members of the Faculty of Catholic Theology. |
| | | | With regard to examinations in Philosophy, I must distinguish between examinations in Philosophy of students of Catholic Divinity and of others, broadly speaking. |
| | | | The students of our faculty are examined in Philosophy by a special commission appointed by the Archbishop of Cologne, in as far as nearly all our divinity students belong to this archdiocese. |
| | | | If other students wish to be examined merely with reference to the lecture attended during the term, the examination is held by the professor that gave the lecture. |
| | | | However, all those members of the Philosophical Faculty that wish to pass the great examination after a three or four years' course in Latin, Greek, English, French, German, etc., are also examined in Philosophy, and are not necessarily examined, if they are Catholics, by the Catholic Professor of Philosophy. There is a special commission for this examination: both the Catholic and the Protestant Professors of Philosophy belong to it; and as the number of Catholic candidates is greater than that of Protestant ones, the Protestant Professor examines also some Catholic candidates. The same applies to the examination for the Doctorship in the Philosophical Faculty. |
| | | | When a Catholic priest, as often happens, wishes to pass an examination in languages, etc., he always gets, as far as I know and believe, the Catholic Professor of Philosophy as examiner. |
| 7. | Is there at Bonn a seminary for ecclesiastical students, i.e., students who propose to become Catholic priests? | 7. | Yes, there are two; one for the students of the first year (called Collegium Leoninum), the other for the students of the second and third year (called Collegium Albertinum). |
| (a) | Do these students attend the University, and if so, what faculty or faculties do they attend? | (a) | Yes; they belong to the Catholic Theological Faculty; but they also attend lectures—e.g., on Philosophy or on History in the Philosophical Faculty, as every matriculated student has a right to attend all the lectures of any faculty if he inscribe his name for the lecture. |
| (b) | Are they by law compelled to attend university lectures or to obtain a university degree as a condition for ordination? | (b) | They must first finish the so-called gymnasium (that is, a high school for Latin, Greek, etc., which has nine classes, and may be gone through in nine years). Then, as they wish to become secular priests, they must follow the philosophical and theological course of either a university or a diocesan seminary. For instance, in this Rhenish province, there is the archdiocese of Cologne, and the diocese of Treves. Bonn belongs to the former. Now, the students of the archdiocese of Cologne study Philosophy and Theology in Bonn, at the University; the students of the diocese of Treves study these subjects at their diocesan seminary in Treves, where they have their own professors. Now, as far as the students of the two colleges or seminaries in Bonn are concerned, they are bound to attend university lectures as a condition—first, for admission into the seminary at Cologne (where they spend their fourth year of Theology, after having been here three years); and secondly, as a condition for ordination. |
| | | | Any bishop may allow his students to study Divinity in Bonn at the university, too. If people want to take a degree in Catholic Divinity in Bonn, they must have been either for three years at a German university, or if they have had their course at a seminary, they must have been one year at a German university. |

QUERIES AND ANSWERS IN RELATION TO THE UNIVERSITY OF BONN—*continued.*

SECTION H.
XLIV.

QUERIES.

ANSWERS.

7.—*continued.*

7.—*continued.*

(c) Can university lectures, and, if so, on what subjects, be given in the seminary so as to legally count as university lectures?

(c) No. No university lectures can be given in the seminaries in Bonn, viz., the Coll. Albertinum or Leoninum, so as to legally count as university lectures.

(d) Are the persons who give such lectures in the seminary professors on the staff of the university, or are they wholly unattached to the university?

(d) The superiors of the seminaries in Bonn are appointed by the archbishop. It is quite accidental that, at present, one of our professors, the Extraordinary Professor of Pastoral Theology, is President of the College Albertinum, because the archbishop wished this expressly, and got leave of the Government for him to take this post besides his professorship.

(e) How many of the lecturers at the seminary are priests, and how many laymen?

(e) All the superiors of the seminaries here are priests. In the Leoninum there is (a) President, (b) a Repetitor of Moral Philosophy, (c) a Repetitor of Introduction to the Sacred Scriptures and of Hebrew, &c. All are Doctors of Divinity. In the Albertinum there is (a) a President, (b) a Repetitor of Dogmatic and Moral Theology, (c) a Repetitor of Church History (and, eventually, Canon Law?); (d) a Professor of Ecclesiastical Music, who teaches liturgical singing, &c. All four are priests. There is also a priest appointed as Procurator for both houses.

(f) Does the seminary receive a grant from the State, or how is it supported?

(f) The houses or seminaries receive *no grants* from the State, and are solely supported by the archdiocese.

(g) For how many years does the course of studies at the seminary last, and do the students enter on the course before they matriculate at the University?

(g) The course of studies of these students lasts three years here. They receive no orders here, not even the tonsure, and are dressed like the other students whom they meet at the university or in the streets; but they have a fourth year in Cologne, a practical year, during which they receive holy orders.

The students of the archdiocese of Cologne are bound to live in these two seminaries; however, there are two or three living in the town on account of their bad health; also the students of Catholic Divinity that come from other dioceses live in private lodgings in the town. They enter into these seminaries when they matriculate here, or two or three days before. In very exceptional cases students may live in these seminaries who are only inscribed as yet in the Philosophical Faculty, not having quite fulfilled the conditions for getting inscribed in the lists of the Theological Faculty. I do not think that there are any such cases at present.

8. Are there associations (*Vereine*) for Catholic students attending the university, and what is the object of these associations?

8. Yes; in Bonn there are eleven associations for Catholic students attending the university; five, the members of which wear blue or red caps, or caps in other colours; six, the members of which wear no outward signs.

The object of these associations, which usually have about twenty or more members, is chiefly a social one. They are based upon the principles of religion (viz., Catholicity), friendship, and also common pursuit of study. They meet, as a rule, twice a week, and have what is called here a "*Commerz*," viz., a jovial sort of meeting, with drinking beer, singing songs, making speeches, &c. Some of them have, every fortnight, a lecture given by one of their members, and debates.

There is also a union of Catholic students here (I think of about sixty or more) that study social questions, having a Catholic *Privat-docent* of Social Economy, and a young, able priest (who is Doctor of Divinity and Repetitor in the Coll. Albertinum) as their leaders. They go to warehouses, &c., have lectures and debates at their meeting, &c.

There is also a flourishing Congregation of our Lady, of Catholic (not Divinity) students. Their preacher and president is the same Repetitor mentioned above.

There is also a Catholic as well as a Protestant preacher of the university. As to the Catholics, they have a University Mass every Sunday, and a sermon preached by the University preacher. The sermons are at present preached by our Professor of Dogmatic Theology, who is a good and well-known preacher and speaker. Both the Protestant and the Catholic preacher of the university have a salary paid by the State.

(2) THE CHURCH AND THE UNIVERSITIES IN COUNTRIES OF MIXED RELIGIONS:
BEING AN ARTICLE BY THE REV. DANIEL COGLAN, D.D., MAYNOOTH COLLEGE,
REPRINTED FROM THE IRISH ECCLESIASTICAL RECORD OF OCTOBER, 1906.

I have already treated of the duties and claims of the Church in regard to primary and higher education in Catholic countries,* and of her discipline in regard to primary schools in countries of mixed religions;† and in the present article I purpose to study the principles and discipline of the Church in regard to Universities and University Colleges in countries where Catholics live side by side with fellow-citizens of other religious denominations.

As in the case of primary schools, so in the case of universities, the Church positively and formally "approves" of one university, another she "tolerates," another she declares "intrinsically dangerous to faith and morals" without however adding a special ecclesiastical prohibition, another she is bound to "condemn absolutely" and to formally prohibit Catholics from frequenting it, and with regard to others she may adopt simply a policy of *nullum iudicium ferendum*, a policy of observation, permitting Catholics to frequent them provisionally but passing no judgment on them, and meanwhile keeping a vigilant eye on them to see if they contain, in their actual working, any danger to the faith and morals of the Catholic students. I will consider first, in the abstract, the conditions necessary for ecclesiastical approval, the circumstances that necessitate the various forms of ecclesiastical disapproval, the duties of parents and students in regard to colleges condemned by the Church, and the duties of the Pastoral office towards those—if any—who frequent such colleges; and, secondly, I will briefly review a few well-known and familiar examples of ecclesiastical policy in regard to "mixed" and dangerous universities or university colleges.

I.

What are the conditions necessary that the Church can formally and positively approve a University? In the first place, as I pointed out in a former article,‡ university education differs from primary and intermediate education in this, that religious instruction should form an obligatory part of the programme of education in primary and intermediate schools, but does not enter into the obligatory programme of work in universities and university colleges; and consequently the Church can approve a university though the students are not obliged to have lessons in Christian Doctrine, but she cannot approve a system of primary or intermediate education which does not include religious instruction in its programme of obligatory school work. Religion is taught as a science if there be a theological faculty in a university; and a Catholic theological faculty must be established by and continue under the control of the Church. But apart from the consideration of a theological faculty, what are the essential characteristics of the university which the Church can approve? I may answer negatively by saying that in constitution it must not be "secular," nor "mixed," nor, of course, "secular and mixed." When we designate a system of primary education "secular" we have in mind primarily the fact that religious instruction is excluded, though we know that a secular system also implies the exclusion of ecclesiastical authority from the schools, the abolition of tests for teachers, and free access to the schools for children of all religious denominations. But when we designate a system of university education "secular" or "Godless," we should understand it primarily if not exclusively of the complete and absolute subjection of the university to the secular power and of the denial to the ecclesiastical authority of the right of exercising vigilance and supervision over the appointment and continuance in office of teachers and over the teaching of the university in order to safeguard the faith and morals of the students. The absence of religious instruction from the programme of obligatory college work does not make a university "secular" or "Godless," for

religious lessons are not the work of a university or university college. In a Catholic country, as I have already written,§ the Church does not claim the right of appointing or approving the professors outside the faculty of theology, "but the right of exercising vigilance and remonstrating and commanding that a particular person reasonably suspected or proved to be dangerous to the faith or morals of the students be not appointed or deprived of his appointment." The first and fundamental condition, therefore, for the "formal approbation" of a university by the Church is the recognition of the right of the bishop to exercise vigilance over the university for the preservation of the purity of faith and morals.

A "secular" system is also invariably "mixed," at least in theory; that is, there are no tests for teachers or students, and the college with its offices and emoluments is open to all denominations. A "mixed" system, however, is not necessarily "secular"; it may enforce in primary schools denominational religious instruction, and in universities it may recognise, formally or virtually, the right of the Church to exercise supervision over all that may concern the faith and morals of its subjects. The "mixed" system supposes that, by law, entrance to the college and access to its emoluments and offices are open to members of all religious denominations. Then it is a "mixed" college, at least in theory and in law, but it may be purely denominational in reality.

The presence of a few non-Catholic teachers or students in a Catholic university would not prevent the formal approval of the university; the university would receive approbation, and the presence of the few non-Catholics would be said to be tolerated. But if the professorships and entry to a college were open by law to non-Catholics generally, if professors could not be vetoed on the sole ground of being Protestants or infidels, then the system of education would be the "mixed" system, and I think, for reasons to be indicated farther on, the university would not be formally approved by the Church, but only tolerated. And, of course, a system which is both "secular" and "mixed" cannot be "approved" by the Church.

Protestants, no doubt, will claim that this justifies their contention that a Catholic university must be a priest-ridden institution, where liberty of thought and investigation, which is absolutely indispensable to university work, is altogether impossible. But then we can legitimately ask, do they themselves claim to be a part of the Christian Church or to have a Christian episcopate? Do they really admit that the Holy Ghost appointed bishops to rule the Church of God up to the gates of the university, but forbade them to cross the threshold of the seat of higher learning? Do they themselves permit in their universities liberty to teach doctrines distinctively Roman? In the belief of Catholics episcopal jurisdiction over universities is not a doctrine apart and superadded to the general body of episcopal claims. It does not differ specifically from the pastoral office and duty of teaching, of fostering and protecting faith and morals in the castles of the nobles and in the cabins of the poor, in the warehouse and training establishment, in a word, wherever full-grown men are congregated whose religious education is already completed. Authority over and responsibility for the university student is an essential part of the pastoral office which knows no limit or boundary in sea, or mountain, or walls, or gates. If we speak, for example, of a priest, the Church exercises jurisdiction over him at the altar, in the tribunal, in the pulpit, in his publications; and on what Christian principle can he be exempted from Church authority in the university? The Church can reach the ordinary priest or layman with her censures; she can cut off the university professor from the Church; but she cannot remove him from his position of danger to the

* *I. E. Record*, Jan., 1906.

† *Ibid.* April, 1906.

‡ *I. E. Record*, Jan., 1906.

faith and morals of his students, unless the State recognises, formally or equivalently, her right of effective vigilance in respect to the faith and morals of her university subjects.

Appertaining as it does to the functions of the universal pastoral office, the Church cannot allow her right of supervision of universities to be denied. Hence the following propositions were condemned in the Syllabus of Pius IX.:—

Totum scholarum publicarum regimen, in quibus juvenus christianae alicujus Reipublicae instituitur, episcopaliibus dumtaxat seminariis aliqua ratione exceptis, potest ac debet attribui auctoritati civili, et ita quidem attribui, ut nullum alii cui-cumque auctoritati recognoscatur jus immiscendi se in disciplina scholarum, in regimine studiorum, in graduum collatione, in delectu aut approbatione magistrorum (n. 45) . . . Postulat optima civilis societatis ratio, ut populares scholae, quae patent omnibus cujusque e populo classis pueris, ac publica universim Instituta, quae litteris severioribusque disciplinis tradendis et educationi juventutis curandae sunt destinatae, eximantur ab omni Ecclesiae auctoritate, moderatrice vi et ingerentia, plenoque civilis ac politicae auctoritatis arbitrio subjiciantur ad imperantium placita et ad communium aetatis opinionum amussim (n. 47).

II.

The Church declares certain colleges "intrinsically dangerous to faith and morals" without issuing a special ecclesiastical prohibition to frequent these colleges. What are the dangers to faith and morals apprehended in such colleges? May Catholic students frequent these colleges? What are the duties of pastors towards the Catholic students—if any—who frequent them?

1. We may assume that in colleges declared intrinsically dangerous to faith and morals, ecclesiastical right of supervision and vigilance is altogether denied. But though this be a denial of an essential office and duty of the pastoral charge, it does not necessarily carry with it, in fact and in practice, grave dangers to faith and morals. The sources of danger to faith and morals, generally referred to in ecclesiastical official documents, are human respect, non-Catholic teachers and non-Catholic fellow-students. The dangers from non-Catholic teachers and students would be, of course, immensely aggravated if the purpose and policy of the school were the proselytism of the Catholic student or the extirpation of Catholicity, and the danger is much more acute in residential colleges than in non-residential universities. The dangers from heretical teachers and heretical fellow-students are admirably stated in an Instruction of the Holy Office relative to the schools of Berne in Switzerland which I will quote, though it does not deal formally with university colleges:—

Auctoritas quippe praeceptorum [says the Holy Office] quae maxime in adolescentium animis valet, ad ea omnia approbanda quae in iis vident ex iisve audiunt, naturali quandam vi eos rapit; quo fit ut illorum erga religionem indifferentia, errores ipsi haereticales catholicaeque religionis contemptus, venenato quodam alitu, tenella pectora inficiat extinctoque calore omni pietatis penitus corrumpat. Cui pesti haud minus lethifera accedit haereticorum condiscipulorum contagio, quorum corrupti mores, indita ex sectario dogmate indocilitas quaeque pueriles animos vehementissime movet, in catholicam fidem atque Ecclesiae praecepta mordax dicacitas, si quid incorruptum aut firmum in ipsis manserit, labefactant ac perdant necesse est . . . Neque vero illud quispiam sibi persuadeat immunes ab hac perniciē scholas illas fore quae materiam a religione discretam atque profanam habent. Etenim praeterquam quod eadem in illis ab haereticorum, sive praeceptorum sive discipulorum, vitae ratione ac familiaritate scandala impendent, novus profecto in humanis rebus sit oportet qui non sentiat etiam in ejusmodi scholis aditum haereticis magistris undequaque aperiri, ut puerilem simplicitatem opportune et importune, data et non data occasione circumveniat et in laqueos inducat, cujus quo magis

inopinae atque occultae sunt artes, eo magis sunt ad perdendum efficaces. Itaque non tantum quae sacris sed etiam quae profanis disciplinis, non tantum quae metaphysicis aut ethicis, sed etiam quae mathesi aut physicae, aut historiae, aut humanis litteris, aut linguis, aut artibus quibusvis tradendis institutae sunt, periculi atque exitii plenas ejusmodi scholas esse nulla ratione est dubitandum.*

In the abstract this is true universally of all times and countries and schools. There can be grave danger from non-Catholic teachers and fellow-students, even in purely secular or scientific classes. A teacher *could*, for example, make a covert hostile allusion to the principle of authority in the Church even when teaching mathematics, by remarking significantly that mathematical conclusions are not received on authority, that scientific work and authority are mutually incompatible. And hence I have stated that I think the Church would not give "formal approval" to a college if the professorships were by law equally open to all, Catholics and non-Catholics. The Church does not "approve" this mixed system of education. But when we are called on to decide a concrete case; whether, for example, there actually is danger to faith and morals in this particular college, we have to take account of what actually happens or is likely to happen, considering all the circumstances of the case, in this particular college. When the Church condemns certain colleges as intrinsically dangerous to faith and morals it is not a condemnation of a mere abstract theory or system of education, but of the colleges considered as they actually are. It is not a declaration of a remote or slight spiritual danger. It is a declaration that, in regard to the ordinary type of manhood, there is a grave and proximate danger of mortal sin in attendance at such colleges. The danger is not constituted by such a declaration, but the declaration pre-supposes the danger; and if the danger did not really exist the declaration would be founded on an erroneous assumption of fact. This danger cannot be proved to demonstration or mathematically; but it would be the greatest temerity to question the existence of actual danger when it is affirmed authoritatively by the Episcopate. And, of course, in pronouncing on the actual danger, in particular cases, of secular or mixed schools, the Roman Congregations are always guided by the representations of the bishops who are familiar with the actual circumstances of the cases.

2. May Catholic students frequent colleges which have been declared by the Church dangerous to faith and morals? I would observe that there are no special moral principles governing the cases of university students. University students are to be treated like full-grown men of the world who have completed their religious education. We must examine the circumstances of the case and apply the principles which govern the same difficulties universally. I assume that the colleges are merely declared dangerous to faith and morals; that no special ecclesiastical prohibition against entering these colleges is enacted; and consequently that, if a sin is committed at all, it is a sin against the natural law which forbids us from going without necessity into the proximate occasions of grave sin. Now it is obvious that, generally speaking, it is unlawful to frequent schools which have been declared intrinsically dangerous to faith and morals; as it is unlawful, generally speaking, to go into the proximate occasion of mortal sin. There may be cases in which there is a peculiar insensibility to college temptations and consequently no danger of sin, and in such cases no sin is committed by frequenting the colleges, if it be not a sin of scandal to others. Then when we deal with the ordinary types of mankind, we say that it is lawful to frequent these colleges if necessity requires it, provided that precautions are taken to make the danger of sin remote; because then we are dealing with a necessary danger or occasion of sin, and we are prepared to give absolution to a person who remains in a necessary occasion of sin—and therefore it is lawful to go into or remain in such an occasion—provided that means are taken to make the occasion of sin remote. The necessity for entering such colleges may be national, as, for example, the necessity of having Catholics educated for the administrative and

professional offices of the nation; or the desirability of securing a share of the public money allocated for education; or the personal advantage to the individual, who may hope to enter a profession or to secure a high and honourable position in the service of the State and who may be condemned otherwise to pass his life in rather menial occupations.

These principles are recognised in various Instructions of the Sacred Congregations of the Holy Office and Propaganda.* Thus the Holy Office, in the instruction already quoted, proceeds to say:—

Quae sane cum ita se habere apprime noscent Emi. Patres, non illud tamen eos praeteribat, peculiaria quaedam rerum adjuncta id efficere posse, ut easdem adire aliquando cogat necessitas; ubi scilicet ea tyrannide opprimantur catholici, ut ad scholas proprias id est catholicas adeundas, nulla jam illis aut pateat via, aut necessaria domui suae studiorum subsidia deserant, publicumque ipsum regimen heterodoxis totum reliquant, aut scholas mixtas utut invitisissimi subeant.†

Of course if Catholic colleges were available there would be no necessity for frequenting colleges declared dangerous; and students themselves should not be the judges of the necessity of frequenting these colleges or of their chances of spiritual safety, but should be guided by their ecclesiastical pastors.

If, in addition to the declaration that the colleges are dangerous to faith and morals, a particular bishop prohibits his subjects to go to such colleges, the prohibition is to be understood to be of universal application; that is, a person may not then plead that the intrinsic reason for the prohibition—the *finis legis*—does not exist in his case, that there is no danger in his case to faith or morals. But if, besides the mere non-existence of the intrinsic reason of the law, in a particular case, there were an extrinsic inconvenience, an extrinsic loss, if the reason of the law, as they say, were to cease *contrarie*; if there were, first, no proximate danger of sin, and if, secondly, the episcopal prohibition would cause serious loss to an individual in the shape of money, or a profession, or the like, then according to general principles the episcopal prohibition would not bind. And so the addition of an episcopal prohibition does not appear to add anything substantial to the authoritative declaration that certain colleges are dangerous to faith and morals.

3. When we come to consider the duties of their ecclesiastical pastors towards Catholic students who frequent colleges declared intrinsically dangerous to faith and morals, we must bear in mind again that there are no principles exclusively peculiar to the case of these students: the case must be decided by the general principles of pastoral responsibility. If something positively immoral were required of the students in a college, such as conformity to the Protestant religion, attendance at Protestant worship, or attendance at and acceptance of Protestant doctrines, nothing could be done for the Catholic students but to induce them to leave the college. It is supposed then that nothing positively immoral is demanded, that the colleges are dangerous to faith and morals, that certain students are under a necessity of frequenting these colleges and violate no law by frequenting them, that these students are in a necessary proximate (objectively) occasion of sin; and the question is, what are the duties of their ecclesiastical pastors towards these students? The Holy Office replies that bishops are bound in virtue of their office to run to the assistance of these students, and that priests, and especially parish priests invited by the bishops are bound to co-operate with all zeal in succouring those students who are in spiritual danger:—

Ex quo enim constat gravissima ac plane extrema juventuti catholicae in ejusmodi scholis versanti instare pericula, neque profecto cuiquam licet in extremo gregis periculo teneri vi muneris proprii Episcopos in subsidium accurrere, et sacerdotes ab eo evocatos ac praesertim parochos omni studio opem suam conferre, cui tandem veniat in mentem infelices illos adolescentulos in mortis faucibus haerentes negligi ac deseri posse?

They are not to be influenced, the Holy Office says, by the apparent hopelessness of producing any effect. If it be objected that the people may take scandal from this pastoral zeal, that they may begin to consider it lawful to send their sons indiscriminately to these schools, the Holy Office replies that scandal may be given by the omission of a duty but not by its fulfilment, unless it be *scandalum pharisaicum*. And if it be urged that the desertion of the students who frequent these schools may deter others from attending them, the Holy Office replies that a good effect cannot be obtained by unlawful means, such as the spiritual desertion of these students, which would be a violation of a grave obligation intrinsic to the priesthood. And in reply to the question, whether a priest may accept the office of chaplain to such schools, it answers:—

Affirmative, et ad mentem: mens est ut non modo fidei christianae tradendae, verum etiam aliarum disciplinarum scholis quotquot fieri potest praefici sacerdotes, aut honestos perspectaeque religionis laicos curandum sit; quo vero omnis cesset scandalum formido, monendum esse populum id fieri ut mala quae ex hujusmodi scholis dimanant, quantum fieri potest avertantur; idque proinde nemini excusationi esse debere, quominus liberos suos mitant ad scholas mere catholicas in quibus eorum fides ac mores nullo modo periclitentur.‡

III.

There is little to be said about the "formal and necessary condemnation" of colleges, or their "toleration," or the policy of *nullum iudicium ferendum*. The Church necessarily condemns colleges—they are already condemned by the natural law—where conformity to false religion and worship is insisted on, or where attendance at and acceptance of false doctrines is required. She formally and explicitly pronounces judgment of "toleration" in favour of colleges in which, though the Church ideal be not realised, satisfactory safeguards exist for the faith and morals of Catholic students. And she may declare, as in the case of our National Schools, that *nullum iudicium est ferendum*, when there are not sufficient data for declaring the colleges dangerous to faith and morals or for pronouncing formal and explicit judgment of "toleration." In this case Catholics might frequent the colleges, and the colleges would be afterwards "tolerated," at least tacitly, or declared dangerous, according to their fruits.

IV.

I will now proceed to describe the practical application of these principles in certain well-known cases of ecclesiastical policy in respect to universities and university colleges.

When in 1853 the Church of England test was removed from matriculation into the University of Oxford and from the Bachelor's degree, Catholics began to go to the universities, and the question was raised whether Catholics were to be allowed by ecclesiastical authority to go to Oxford and Cambridge. "With his large hopefulness and his trust in men carefully trained in Catholic colleges," writes Mr. Purcell,§ "Cardinal Wiseman, in the first instance and for a considerable period, gave his tacit sanction to their obtaining the advantages of university education at Oxford and Cambridge." Dr. Manning was opposed to the attendance of Catholics at Oxford or Cambridge, whether in colleges of the universities or in Catholic colleges or halls of residence. By direction of Propaganda a meeting of the English Bishops was held on 13th December, 1864, to consider the question. The views of the Oxford converts, Newman excepted, had been asked before the meeting. The Bishops unanimously decided against establishing colleges at the universities and in favour of discouraging Catholics from sending their sons to Oxford or Cambridge; and the decision of the Bishops was confirmed by Rome.

Newman was of opinion that there was considerable danger to the souls of Catholic youth who go to the

* Cf. *Collectanea*, etc., l.c.

† Cf. *Collectanea*, etc., l.c.

‡ Cf. *Collectanea*, etc., l.c.; the Instruction is quoted in part as an Appendix to *Acts of Maynooth Synod*, pp. 387-342.

§ *Life of Cardinal Manning*, Vol. II., p. 288.

Protestant colleges in Oxford, but comparatively little danger in their going to a Catholic college there.* In 1864 he bought a piece of ground in Oxford, which had come into the market, not for any specific purpose, as he explained, but to secure possession of it, and perhaps re-sell it to the bishops or laity, for any ecclesiastical purpose that might in the future be deemed advisable. Later on Dr. Ullathorne approved Newman's proposal of establishing an Oratory and building a church in Oxford for the purpose of ministering to the spiritual wants of the Catholic undergraduates, and signified his intention of transferring the mission to the Oratory. This was opposed by those who took the view of Dr. Manning, on the ground that it would encourage Catholics to send their sons to Oxford. And when Dr. Ullathorne petitioned Rome for founding an Oratory and building a church in Oxford, the petition was granted, but with "a special instruction directed to the bishop to discountenance Newman's taking up his residence at Oxford in the contemplated Oratory."† It is needless to add that since then English ecclesiastical policy has changed and that Catholics are allowed now to go and reside in the Protestant colleges of Oxford and Cambridge.

Now it is easy to understand why Oxford and Cambridge were considered dangerous for Catholics, why it would have been unlawful during the former policy for Catholics generally to frequent them and why Catholic parents were discouraged from sending their sons to them; but it is not so easy to reconcile the discipline approved for England, in regard to the students who could lawfully go to the universities, with the discipline defined by the Sacred Congregation of the Holy Office for the ecclesiastical authorities of Berne. In the latter case bishops and priests were warned not to neglect or desert those who through necessity attended at non-Catholic schools, but, as an intrinsic duty of the pastoral office, to provide most diligently for their special spiritual necessities, irrespective of whether parents may be encouraged thereby to send their children to these schools or not; but in England it was forbidden to establish Catholic colleges or halls of residence at the universities for the Catholic students, and Dr. Newman was practically forbidden to reside at Oxford even in a house of the Oratory which it was contemplated to build, lest it might encourage Catholics to send their sons to Oxford. The truth is that in the Berne case the question was treated by the Holy Office on purely intrinsic theological grounds, but in the English case it was treated on external grounds. Injurious rumours were in circulation about the orthodoxy of a class of English Catholics, and Newman was regarded by some as the leader of the minimisers of Roman claims. It was alleged that the university atmosphere would be specially favourable to the growth and extension of this particular type of Catholic. And the discipline in relation to the English universities is to be attributed to this cause and not to any difference of theory or discipline between the Holy Office and Propaganda.

One cannot fail to notice the admirable flexibility of English Catholic ecclesiastical policy in regard to the universities. The old discipline was relaxed without implying any censure on it or pronouncing that it was wrong. It is not claimed that the old dread of the universities is yet proved to have been unreasonable, or that the new policy is proved to be permanently safe. It is admitted by the friends of the new policy that time alone can decide which is the better, the policy of Cardinal Manning or that of his illustrious successors.

v.

There is some difference also between the Instruction of the Sacred Congregation of the Holy Office about the schools of Berne and the policy of the Irish Bishops, approved by Propaganda, in relation to the Queen's Colleges and Trinity College. Considering that episcopal right of supervision of the teaching in the colleges was denied, that so many of the professors and students were Protestants, that Protestantism was in the ascendant legally in Church and State in Ireland, that it held in its grasp all the offices of the State, national, county, and municipal, that Catholics were only emerging from bondage, and that they were insufficiently instructed in religion for university life,

there was a grave danger to Catholic students frequenting these colleges, not perhaps of denying their faith, but of hiding their religion, of putting it into the back-ground and saying nothing about it, and finally of growing indifferent about its practices. Hence these colleges were declared intrinsically dangerous to faith and morals. Catholic students, however, were not prohibited by ecclesiastical law from going to them; and the only prohibition was the prohibition of the natural law which forbids persons to go without necessity into the proximate danger of mortal sin. Unlike the case of Berne, priests were forbidden to take any administrative or professorial office in the Queen's Colleges; but I do not find this prohibition enacted in reference to Trinity College. They were also forbidden, *sub gravi*, to "advise" parents to send their sons to the Queen's Colleges or Trinity College, or to advise students to go to them. And finally they were forbidden to "favour" these colleges in any way whatsoever.‡

The ecclesiastical authorities of Berne were advised in the Instruction of the Holy Office to promote the appointment of priests and good Catholic laymen as teachers in non-Catholic schools where it was necessary for Catholics to attend them; but this was forbidden in Ireland. This, however, is not important, and can be explained by the wish of the Bishops to create a Catholic University, and by the fact that the presence of priests in the colleges might encourage parents to send their sons to them without necessity. Newman himself thought that Catholics might be prohibited to go to the English universities in order to support the Catholic University. "When I was in Dublin," he writes to Dr. Ullathorne, "I did my best (as you reminded me) in getting a prohibition against Irish Catholics going to the English universities, for I thought that the new Catholic University in Dublin would have no fair chance of success without such a prohibition."§ But there is one point in which we ecclesiastics cannot justify our action, or rather our inaction, in reference to the condemned colleges, namely, our comparative neglect or desertion of the Catholic students who were obliged from necessity to go to them and who legitimately went to them for their education. Assuming the strictest interpretation of our synodal enactments, it must be admitted that, in the case of many students, there was a grave cause, a moral necessity for attending those colleges, particularly the Queen's Colleges in Cork and Galway. There was a national necessity of having Catholics educated in the Arts for professorial purposes in these and other colleges. There was the necessity of securing a share for Catholics of the public money voted for education. There was the necessity for the individual of securing a profession at a moderate expenditure. The students who through necessity went to the condemned colleges violated no law by going to them, and yet they were all but deserted by their pastors. In particular there was an unfounded fear of doing anything special for the students, lest special solicitude for these endangered members of the flock should be taken as "favouring" the colleges with their condemned system of education. And yet greater attention to the spiritual wants of the students might have had far-reaching results. It might have reconciled, in practice, the views of the Bishops who were in favour of condemning the colleges and of the Bishops who had been in favour of the policy of *nullum iudicium ferendum*. Assuming that the colleges were justly condemned, and that no priest could accept an administrative or professorial position in them, if the priests of the parish attended to the special needs of the students it would soon be known from experience whether, admitting the system of the colleges to remain bad theoretically and in the abstract, they continued to be, really and in practice, dangerous to faith and morals; that is, granting zealous care and supervision by the priests of the parish, whether the colleges continued to be for the Catholics generally a proximate occasion or danger of mortal sin. And if it became evident that the colleges became less dangerous in reality than they appeared in theory, ecclesiastical policy might have somewhat relaxed and students might have been allowed to go in greater numbers at least to the colleges in Cork and Galway.

We complain that Protestants get all the positions in Galway Queen's College. But while only very few

XLIV.

Catholic students go there, how can we expect that Catholics will be appointed to teach Protestant and Presbyterian students from the North of Ireland? And if Cork and Galway Colleges were reconstituted to-morrow on Catholic lines, and if we got a college for Catholics in Dublin, have we Catholics ready to fill the professorships in these colleges and in the seminaries? Shall we be ready when—if ever—the education difficulty is finally solved? Through the example of their distinguished president and Catholic professors, and through the zeal of their spiritual director, the Catholic students of the Queen's College, Cork, are recognised to be as safe to-day in the matter of faith and morals as the extern students of any college in Ireland; and yet priests are forbidden *sub gravi* to "advise" any student to go there, and the college is supposed to remain a proximate occasion of mortal sin. No doubt there is no guarantee of the continuance of this happy state of things, and consequently no charge should be made in the official relation of the Church to the College, but while the Church's official relation remains the same, would it not be better to relax somewhat in practice and rather to send as many students as possible to such a college, particularly to study Arts, with a view to qualify them for professorships and other public offices in the country? I mention the Cork and Galway Colleges, because there is less, if any, excuse for going to Trinity College, as there are first-class colleges in Dublin.

Another example worth studying was the policy of the Church towards Mr. Gladstone's Bill of 1873. The main provisions of the bill, as it was introduced, were: it proposed to detach the University of Dublin completely from Trinity College. There was to be a Chancellor and Vice-Chancellor of the University and a Council of twenty-eight members; the first Council to be nominated by Parliament. It was proposed that Parliament itself should affiliate five colleges to the University—Trinity College, the Colleges in Cork and Belfast, the old Catholic University, and Magee College; that the Council should have the power of affiliating other colleges; and that affiliated colleges should have the right of representation on the Council. The University, as distinct from the colleges, was to have an income of about £50,000 per annum to pay professors, conduct examinations and reward its successful students. It was to be a teaching and examining University, and to have a staff of professors whose lectures might be attended by the students of the University colleges or by non-collegiate students in Dublin. It would not supply lectures in philosophy or modern history, but these subjects could be taught in the colleges. And the Council had power to punish professors who gave offence to the religious feelings of their students. Trinity College retained in part its former endowment, and the Cork and Belfast Colleges retained their endowment; but the Catholic University received no endowment under the Bill. It was proposed to transfer the Faculty of Theology from Trinity College to the Church Representative Body, and that the new University should not teach philosophy or modern history. Students from these colleges could present themselves for the degrees of the University; but residence in a college was not necessary, and a person could prepare himself for the University degree by private study.

The Bill was differently received in different quarters:—

Archbishop Manning wrote to Cardinal Cullen, the day after the bill was produced, "strongly urging them to accept it." After a fortnight the Archbishop told Mr. Gladstone that he still saw reason to believe that the Irish hierarchy would not refuse the bill. On March 3rd he says he has done his utmost to conciliate confidence in it. By the 7th he knew that his efforts had failed, but he urges Mr. Gladstone not to take the episcopal opposition too much to heart.*

On the other hand, Cardinal Newman writes:—

Yet in a question so nearly interesting myself as that February bill, which he brought into the House, in great sincerity and kindness, for the benefit of the Catholic University of Ireland, I may be allowed to say this much—that I, who now have no official relation to the Irish Bishops, and am not in any sense in the counsels of Rome, felt at once when I first saw the outline of that bill, the greatest

astonishment on reading one of its provisions, and a dread which painfully affected me, lest Mr. Gladstone perhaps was acting on an understanding with the Catholic Prelacy. I did not see how in honour they could accept it.†

The Cardinal contends that the Bishops could not accept the bill consistently with the educational policy pursued since 1847 and approved by Rome. The Bishops condemned the bill and it was rejected on second reading by three votes.

If the Bishops pronounced judgment on the bill at all they should have condemned it; for the bill contained an approval and confirmation of the existing system of Trinity College and the Queen's Colleges. It may not have been necessary, however, to condemn the bill so severely; as the unacceptable principles had been already sufficiently condemned in the condemnation of Trinity College and the Queen's Colleges. It might have been sufficient to express dissatisfaction with the bill; and Cardinal Newman says: "But, anyhow, it was an extreme relief to me when the papers announced that the Bishops had expressed their formal dissatisfaction with it."‡ But the episcopal condemnation was not necessarily fatal to the bill. The Bishops urged many objections to the bill, and declared it unacceptable unless amended. Now the time for amendment is the committee stage after the second reading; and I think the fatal mistake on the occasion was the opposition of the Irish members to the bill at the division on the second reading. The bill introduced no new unsound principle, no new evil; and it affiliated our Catholic University College with the State University. Taken by itself the bill opened the way to degrees for Catholics without going to the Queen's Colleges or Trinity College, but gave them no endowment. But the new University would have a staff of professors in Dublin; the Catholic student could, of course, attend their lectures; and so the Catholic College would be spared the expense of a staff of professors. Moreover, it is thought by many that the endowment of the Catholic University College would follow; that a college inscribed as an affiliated college of the University on a schedule to the bill by Parliament itself could not be left without an endowment, while Trinity College and the Cork and Belfast Colleges had endowments. If so, it was, I fear, our last chance of having a purely denominational university College endowed by the State.

It is obvious from the newspapers of the time that there was some misconception in the lay mind about "secularism" in University education. The absence of religion in the Queen's Colleges and the removal of the theological faculty from Trinity College were denounced as "secularism;" and it was answered back that a system could not be secular which permitted Deans of Residence. But neither the objection nor the reply affects the character of a specifically denominational university or university college. The teaching of Christian doctrine is not necessary for a denominational university, for on entrance to a university religious education is understood to have been completed; and the spiritual needs of university men can, if necessary, be ministered to by the parish clergy. A *denominational university* for Catholics is a university where the authority of the Bishop in matters of faith and morals is recognised to exist as through his diocese generally, and where the administrators and professors and students are Catholics and animated with the Catholic spirit. It may be thought that the word "university" supposes that all knowledge should be taught in a university, and therefore that it should have a Faculty of Theology. But writers on the history of universities point out that, though etymologically this might seem to be true, the word in reality signifies the same as "college" or "corporation" of masters, or students, or both together; that we can have a perfect university specifically or essentially without having all the Faculties; but, of course, that all the Faculties are necessary for the full integrity of a university.

Another fruitful source of confusion was the expression "Mixed Education," and its condemnation by the Church. What is "mixed education"? If a few Protestant teachers and students are admitted to a Catholic college, it is not the system of mixed education. If the school or college is exclusively, or nearly so, Catholic, but is open in law to all de-

* *Life of Gladstone*, by John Morley, Vol. ii., p. 440.

† A letter addressed to His Grace the Duke of Norfolk on the occasion of Mr. Gladstone's recent expostulation, p. 8.

‡ *Ibid.*, p. 9.

nominations, then it is practically denominational, but legally and theoretically a mixed school or college. Such a system is unsound and comes under condemnation theoretically; but the circumstances of place or time may justify its acceptance and "toleration" practically. And so there can be, in practice, various degrees of mixed education; the form of mixed education which imposes some condition unlawful for Catholics and which can never be availed of without sin; the form which can be formally "tolerated," and which, of course, is somewhat elastic in its conception; the form which can be tried without a formal ecclesiastical judgment, and which, like the preceding, can be very elastic; and the form which is declared dangerous to faith and morals; and in this last case attendance at the mixed schools is considered a proximate occasion of mortal sin to the children or students who frequent them.

vi.

It is in connection with the colleges rather than with the universities that the religious difficulty arises in this country. It is in the colleges that the moral difficulty is felt from the presence, sometimes in overwhelming numbers, of Protestant professors and students. How the colleges are to be connected with a university or with universities, whether the colleges, when satisfactory to Catholics, are to be connected with Dublin University, or with the Royal University, or with some new university, is not a moral or religious, but an educational or political question.

Naturally we should prefer for Catholics formal denominational Catholic colleges; but such colleges, we know, will not be established by the State.

Next to a formally denominational college, we should prefer colleges which, though legally open to students and professors of all denominations, would be likely to remain exclusively, or nearly so, Catholic. These are types of "mixed" colleges; the right of the Church to exercise in them supervision over all that concerns faith and morals would not be formally recognised in law; but as the governing body would be Catholic, nothing offensive to morals or to the Catholic faith would be permitted.

But we cannot hope to have more than one college of this description, a college in Dublin. The colleges in Cork and Galway must always remain common to Catholics and Protestants, like the National schools in areas where there cannot be efficient separate schools for Protestants and Catholics. And thus we have to utilise another type of "mixed" college. If, when these colleges are fully availed of by Catholics, we shall have a constitution for the colleges which will give us a right to secure representation on their governing, administrative and professorial bodies proportionate to the number of their Catholic students, we shall be able to avail ourselves freely of them.

We must therefore accommodate ourselves to the system of legally "mixed" university education. It is for the hierarchy to decide in each case whether it can be accepted or whether it is dangerous to faith and morals. It is a serious responsibility. On the one hand the faith and morals of the people are at stake; and on the other, it is a loss to individuals, to the Catholic community, to the nation, to have Catholics debarred from university education. We distinguish—and the distinction is Cardinal Newman's—between what the Bishops can do as Catholic Bishops and as Catholic Bishops of a Catholic nation. It is difficult, sometimes, in this respect to distinguish between what is a matter of moral obligation and what is an obligation of honour. Undoubtedly Catholics ought to strive for educational equality with their Protestant fellow-countrymen, and to signify their dissatisfaction if they are not treated to equality. But condemnation of an educational system on the ground of unequal treatment does not prevent us in conscience from accepting it. The sole reason apparently why acceptance of an educational system or attendance at a college is unlawful is because some immoral condition is demanded, or the college is intrinsically dangerous, that is, a proximate danger of mortal sin. And if it be asked whether our existing colleges, with certain modifications of their constitution, would remain intrinsically dangerous to faith and morals, the meaning of the question is, would these colleges remain grave and proximate occasions of mortal sin to Catholics.

DANIEL COGHAN.

Documents put in by N. J. Synnott, Esq., in connection with his oral evidence.*

I.—EXTRACT from Vindication and Protest published by the Catholic Committee in 1792, recapitulating the grievances and disabilities of Catholics in Ireland (Plowden: Historical Review of the State of Ireland, Vol. II., p. 377).

"Such is the situation of three millions of good and faithful subjects in their native land! Excluded from every trust, power, or emolument of the State, civil or military, excluded from the benefit of the constitution in all its parts from the Bench, from the Bank, from the Exchange, from the University, from the College of Physicians;—from what are they not excluded? There is no institution which the private charity or public munificence has founded for the advancement of education, learning, and good arts. from the enjoyment of which the Legislature has not taken care to exclude the Catholics of Ireland."

II.—EXTRACT from the Petition of the Catholics of Ireland to the King presented January 2nd, 1793. Signed by Dr. Troy, Archbishop of Dublin, and the Archbishop of Armagh, for the Roman Catholic Prelates and Clergy of Ireland, and by 300 members of the Catholic Committee representing the various counties and towns of Ireland.

"We may not found nor endow any university, college, or school for the education of our children; and we are interdicted from obtaining degrees in the University of Dublin by the several charters and statutes now in force therein."

(For text of Petition and signatures, see reprint by H. Fitzpatrick, 2, Ormond-quay, Dublin, 1793).

III.—EXTRACT from Memorial to the Earl of Westmoreland, Lord Lieutenant of Ireland, by the Prelates of the Roman Catholic Communion in Ireland, presented 17th December, 1793, after the passing of the Catholic Relief Act (Plowden: Historical Review, Vol. II., p. 444).

"We have submitted patiently to the restrictions which the Legislature thought it expedient to impose,

and we do now most thankfully receive the relaxation of these laws, the boon of a more enlightened age and a milder temper."

IV.—EXTRACT from Memorial presented to the Lord Lieutenant, in January 1794, by the Roman Catholic Prelates of Ireland, petitioning for "licence for the endowment of academies or seminaries, for educating and preparing young persons to discharge the duties of Roman Catholic clergymen in this Kingdom."

"Your Excellency's memorialists beg leave to represent that although the mode of education practised in the University of Dublin may be well adapted to form men for the various departments of public business, yet it is not alike applicable to the ecclesiastics of a very ritual religion, and by no means adapted to impress upon the mind those habits of austere discipline so indispensable in the character of a Roman Catholic clergyman, that without them he might become a very dangerous member of society.

"That even where the Roman Catholic is the established religion, candidates for Holy Orders are obliged to receive the most important part of their education in seminaries distinct from the public Universities.

"That many persons, who destine themselves to the ministry of the Roman Catholic religion in Ireland are not sufficiently opulent to bear the expense of education in the University of Dublin, and of constant residence in the metropolis; it is, therefore, the more necessary to provide literary instruction for them on more easy conditions; and although the liberality of the present heads of the University might induce them to receive persons on the foundation, yet neither could a sufficient number be thus accommodated, nor would it prove grateful to the feelings of the parties."—(Plowden: Historical Review, Vol. II., p. 447).

* Mr. Synnott's evidence will be found at page 53.

DOCUMENTS.
SECTION II.
XLV.

V.—EXTRACT from Petition of Roman Catholics presented by Grattan to the Irish House of Commons in 1795, objecting to the clauses in the Maynooth Bill which excluded the admission of Protestants.

Such exclusion the Petitioners stated to be "highly inexpedient, inasmuch as it tends to perpetuate that line of separation between His Majesty's subjects of different religions, which the petitioners do humbly conceive it is the interest of the country to obliterate, and the petitioners submit that if the youth of both religions were instructed together in those branches of classical education which are the same for all, their peculiar tenets would in all probability be no hindrance to a friendly and liberal intercourse through life."

"Having, in common with the rest of their brethren, the Catholics of Ireland, received as one of the most important and acceptable benefits bestowed on them by His Majesty and the Legislature, the permission of having their youth educated with the Protestant youth of the Kingdom in the University of Dublin, and experience having fully demonstrated the wisdom and utility of that permission, they see with deep concern the principle of separation and exclusion, they hoped removed for ever, now likely to be revived and re-enacted." (Irish Parliamentary Debates, XV., 201, 203. Lecky: History, Vol. VII., p. 129).

VI.—EXTRACT from "The Constitutional History of the University of Dublin," by Denis Caulfield Heron, p. 180, and pp. 184-185.

"There is in Ireland a noble field for the generous exercise of that power for which statesmen toil. There is the opportunity to direct the energies of the people to the accomplishment of their own prosperity; there is the opportunity to form the future mind of the nation. In Ireland, Education amongst the higher classes of the Catholics is neglected; amongst the peasants, until very lately, was unknown. Sectarian intolerance blights the land. Two tasks are for that statesman to perform who wishes to achieve the prosperity of Ireland, and deserve the gratitude of her people for ever—to destroy the last incentives to sectarian animosity, and to develop the intelligence of the people. No step could be more effectual towards the accomplishment of both these great good works, than the opening of the emoluments of Ireland's only University to the free competition of all. No step could be more effectual towards future prosperity than the removal of this check upon the Education of Catholics—than the destruction of the last stronghold of intolerance within the island. It ought to be the aim of that statesman, whom the people of the United Kingdom of the western islands elect as the able man of the day to rule the councils of the empire, to make provision that each human soul within the realm receive due and equal encouragement and aid, to unfold the peculiar talent which each has,—a birthright from creation; to make provision that each subject of the Queen be enabled, by Education, to direct his abilities towards the benefit of the State, the advancement of civilization and learning."

"Should the seat of Education be less tolerant than the centre of government? From the army, the bar, and the senate, intolerance has been banished, but the daemon is still permitted to linger within those precincts which, more than all other, should be sacred from that odious presence. It was the spread of knowledge and Education amongst those possessed of the power, that showed them the folly and wickedness of the exclusive system, and induced them to grant to the Catholics of Ireland these enfranchisements. Thus taught, they saw the injurious effects of exclusion upon the oppressor and the oppressed. But intolerance is now suffered to remain only within those very walls, whence came the Spirit which introduced the idea of religious freedom.

"And yet it seems that Emancipation should have begun here, rather than in other places. Did not exclusion remain perpetuated in educational monopoly, sectarian feud might long ago have died away. The young Catholic lawyer is on equal terms with the Protestant, free to run the same course of fame, and reach (with one exception) the highest honours of his profession. The same is the case in the other pursuits of life, to which the young and ardent throng; they are not reminded by the laws that their ancestors were mutual enemies, and shed mutual blood in furious civil war;—they are friends in honourable rivalry. But, during the period of education, when, most of all, mutual friendship should be encouraged, and mutual jealousy and suspicion checked, the Catholic sees himself debarred of various advantages because of his religion. Thus is party spirit maintained—

and the first thought of each faction is not for Ireland, but how to destroy the other. The danger of this system of parties has been exemplified in other countries, and on a larger scale; and the factions of the state have thought of wars, and administrations of foreign provinces, only as the means of driving their opponents from power. This sectarian feud which still survives in Ireland, through means of this educational monopoly, acts as a barrier to all union amongst the people. Sectarian feud is still a rankling, running sore, preventing the health of the nation. In vain have Catholics been permitted to acquire and hold property in each profession and trade, if the Education which enables advancement be denied."

VII.—EXTRACTS from Annual Reports of the [English] Universities' Catholic Education Board (Established 1895). Chairman—Right Rev. John Cuthbert Hedley, O.S.B., Lord Bishop of Newport. Members—The Archbishop of Westminster, Abbot Gasquet, and six clergymen and ten laymen.

"In the two years which have elapsed since Propaganda pronounced on the Universities Question, it must be admitted that a good deal has been accomplished. Not only have the posts created by the Board been most efficiently filled, through the disinterested co-operation of the English Hierarchy (for the loss of good men is no light one to dioceses whose priests are few), but the work set going is already beginning to bear fruit among the undergraduates, in the increased respect for the faith engendered in their immediate surroundings. And the presence of priests, charged with recognised duties at the Universities, cannot fail to have a most beneficial effect in the removal of latent prejudices by the diffusion of a better understanding of the nature and aims of the Church."

"The establishment of these houses for the education of the Clergy has, of course, in no way formed part of the work entrusted to the Board, which is responsible solely for the lay undergraduates; but these institutions for the clergy, on the one hand, and the functionaries of the Board, with the students under their care, on the other, mutually benefit each other by their common association with the work of the Universities. Further, when we reckon up the beneficial results of the general permission of the attendance of Catholics at the Universities, we must not overlook the valuable opportunity which it is found to be affording to a section of the rising generation of our clergy for adequately gauging the life and sentiments of the intellectual centres of the country; and the importance of the stimulus that has thus already been given to Catholic higher schools should not be forgotten. It has afforded them the opportunity of so training their future masters that they may know by personal experience how to mould the existing course of studies so as to meet the present needs of the world. Thus they may hope to secure for such of their boys as may be going to Oxford or to Cambridge such a preparation as may fit them spiritually, mentally, and physically for the task which there lies before them. That on this serious preparation at school the success of our students as men and as Catholics at the Universities, will almost entirely depend, there can be no doubt. Indeed, the permission granted by the Holy See has already had an important effect on the curriculum of our Catholic schools. They now directly prepare boys for the University examinations, and they have, nearly all, abandoned the London Matriculation in favour of the Oxford and Cambridge Higher Certificate Examinations, which are better suited to the classical education given in our schools. We further hear, from the masters of various schools, of a marked improvement in the actual work done by the boys, and in the zest for study evinced by them; and the testimony of one headmaster is eloquent as to the emulation that the prospect of a University career has aroused among his boys. The cleverer boys are now encouraged to aim at a still higher level by the competition for scholarships at the two Universities."

"In conclusion, we venture on a yet wider appeal, an appeal to all those who desire the Church to be more accurately understood, and consequently more adequately respected, throughout the country. Surely no better means to this end could be devised than to make the nature of the Church better understood in the intellectual centres of the country."

Ditto Report for 1906, page 18:—

"The Board have reason to think that the association of Catholics with the national Universities has been productive of excellent results on one side and on the other."

Letter addressed by His Grace The Most Rev. Dr. Walsh, Archbishop of Dublin, to the Right Hon.

Sir Antony MacDonnell, P.C., K.C.S.I., K.C.V.O., Under-Secretary to the
Lord Lieutenant of Ireland.DOCUMENTS
SECTION I.
XLVII.

[NOTE BY SECRETARY.—The following letter was received by Sir Edward Fry, with an intimation from Sir Antony MacDonnell that he was authorized by His Grace the Archbishop to say that the Chairman of the Royal Commission might make public use of the letter.]

ARCHBISHOP'S HOUSE,

Dublin, 20th October, 1906.

MY DEAR SIR ANTONY,—You are quite right in your recollection that the Catholic Bishops of Ireland have long since declared in the most formal manner that the Catholic claim in the matter of University Education can be adequately met without the setting up of any system of religious tests.

For my part, I have long since come to despair of our being able by any number of declarations, no matter how explicit they may be in their terms, or how publicly they may be made, to cope with the policy of misrepresentation that, whether from stupid ignorance or from dishonesty, is being kept up against us.

Take, for instance, the persistent cry against the establishment and endowment of a College “under the control of the Bishops.” As if we had not, years ago (in fact, when the question as to the character of a Governing Body was first raised), published an ex-

press declaration to the effect that, a University being a place principally of secular teaching, we did not consider it would be reasonable that there should be a preponderance—not to say, of Bishops,—but of ecclesiastics of any degree, on the Governing Body.

Yet, still, the old calumny is kept up, and will, I daresay, serve its purpose now, as it has more than once served it on former occasions.

But, coming to your question, I need only refer you to a declaration published by the Bishops on the 23rd June, 1897. It contains the following passage:—

“4. Are we prepared to accept the application of ‘The University of Dublin Tests Act of 1873’?”

“With reference to this we have to say that, with some modifications in the Act, in the sense of the English Acts of 1871 and the Oxford and Cambridge Act of 1877, we have no objection to the opening up of the degrees, honours, and emoluments of the University to all comers.”

Note by Secretary.—At the meeting of the Commission held on 16th October, 1906, it was decided that the following Notice should be issued with reference to statements on matters dealt with in the Appendix to the First Report:—

ROYAL COMMISSION ON TRINITY COLLEGE, DUBLIN, AND THE UNIVERSITY OF DUBLIN.

Whereas in the Appendix to the First Report of the Royal Commission on Trinity College, Dublin, and the University of Dublin, are contained documents suggesting schemes of change in the constitution and government of the said College and University;

And whereas the Commission are willing to consider any objections to or criticisms on the said schemes that may be laid before them;

Now notice is hereby given that the said Commission are willing to receive statements of objection or criticism from any persons who have not already submitted to the Commission their views upon the subject-matter of such schemes, provided that such statements are brief. The said statements are to be addressed to the Secretary, at the Offices of the Commission, 16, Ely-place, Dublin, on or before the 1st day of November next.

Statements received by the Commission in reply to the foregoing Notice are included among the documents printed in this section.

DOCUMENTS.
SECTION I.
XLVII.

After dealing with several other aspects of the case, we added:—

"Should Her Majesty's Government desire any further statement from us, we shall at all times be quite ready to make it."

The declaration from which I have quoted was drawn up at a General Meeting of the Bishops on the 23rd June, 1897, and was published in the "*Freeman's Journal*" (and, doubtless, in all the other Dublin newspapers as well; for it was sent to all for publication) on the 28th of that month.

Since then we have, as you know, been consulted on one occasion. It was in reference to the scheme known as Lord Dunraven's, which was published by him in the Dublin newspapers of the 4th of January, 1904.

That scheme proposed to meet the Catholic difficulty by the establishment of a second College in Dublin, to be, as Trinity College is, a College of the University of Dublin. The government of the new Colleges would be, as that of T.C.D. is, "selected exclusively on academic grounds."

Consulted by Mr. Wyndham as to whether, in their opinion, the University question could be settled on this basis, the Bishops, as you know, answered in the affirmative.

Lord Dunraven indeed had anticipated this. For, as he said in his letter:—

"The Roman Catholic claims will not, as I fully believe, be found, on examination, to be the bugbear they seem to some ill-informed people.

"There is no question of a Catholic University, or of the proscription of any kind of learning, or of a College exclusively for Roman Catholics, or of a College to every post and emolument of which a Protestant may not aspire."

And to all this, the Irish Bishops, in a communication addressed to the Government of the day, formally assented.

As to all this, I send you enclosed a little penny pamphlet containing an able lecture by the Bishop of Limerick, see page 19.

Faithfully yours,

✠WILLIAM J. WALSH,
Archbishop of Dublin.

P.S.—Do not lose sight of the express statement in the *Final Report* of the (Robertson) Royal Commission. See Report, page 33, last paragraph on page. I now see that the declaration to which I have referred in this letter is referred to in the *Final Report*, and has been reprinted by the Commission in the Appendix to First Report, pp. 387-388.

XLVIII.

Statement submitted by the Right Hon. The Earl of Dunraven, K.P., C.M.G., P.C.

Adare Manor,
Adare,
Ireland.
October 21st, 1906.

SIR,

In continuation of my letter of the 28th of July last, I am now in a position to submit the accompanying suggestions, and should be glad if you would be good enough to bring them before the Royal Commission.*

The Secretary,
Royal Commission on the University of
Dublin.

I am,
Yours faithfully,
DUNRAVEN.

SCHEME FOR A NATIONAL UNIVERSITY FOR IRELAND.

(Referred to in foregoing Letter.)

(i.) The introduction of such alterations in the organisation of Trinity College, and the allocation of its revenues as the Royal Commission may agree to recommend.

(ii.) Establishment within the University of Dublin of three additional Residential Colleges, of which one shall be the Queen's College, Belfast; the second the Queen's College, Cork; and the third a new College, suitably equipped, to be established in Dublin.

The Queen's College, Galway, to be converted into an Agricultural College and Technical Institute for Connaught.

(iii.) Exemption of the University and its constituent Colleges from tests and every religious disability; but in any College, the Governing Body of which so desires, provision to be made against teaching derogatory to the truths of revealed religion or disrespectful to the religion of any portion of the class or audience. Provided that any College may make such arrangements for giving denominational religious instruction to persons *in statu pupillari* as it deems expedient.

(iv.) Determination of the Faculties to be maintained or created in the University; provided that no Theological Faculty shall be maintained. The Divinity School of Trinity College to remain attached to the College. The Cecilia Street School of Medicine to be attached to the new College.

(v.) The Senate to consist of the Chancellor of the University, the Vice-Chancellor, the Provosts or Heads of the Constituent Colleges, the Doctors and the Masters of Arts.

The University Governing Body or Caput to be constituted with reference solely to academic considerations, and to be composed of the Vice-Chancellor and twenty-four persons appointed at first by the Crown, of whom twelve shall belong to the Council or Teaching Staff of the Constituent Colleges, each College furnishing three. After seven years eight of the Crown nominees who shall not have been taken from the Councils or Teaching Staff of the Constituent Colleges shall retire, being designated by the Crown for retirement, and their places shall be filled thencefor-

* [Note by Secretary.—Lord Dunraven's letter of the 28th July, 1906, is printed at page 140 of the Appendix to the First Report of the Commission. Lord Dunraven's letter of January, 1904, is printed at page 476 of this volume.]

ward by eight persons who shall be elected by the Senate.

Future vacancies in the Caput to be filled by election as follows :—

(a) If the vacancy be caused by the death or retirement of any of the twelve persons appointed as belonging to the Council or Teaching Staff of the Constituent Colleges, by the Council and Fellows of the College to which such person belonged ;

(b) If the vacancy be in respect of any of the eight persons elected by the Senate, by the Senate ;

(c) If the vacancy be in respect of any of the four persons appointed by the Crown, by the Crown.

(vi.) The Caput to create and establish University Chairs, Scholarships, and Prizes, and to appoint University Professors ; to allocate Fellowships and prescribe the conditions on which they are to be held ; to fix the subjects and courses for Examinations for Degrees ; to control and conduct such Examinations ; and to appoint Boards of Examiners, on which the Professorial or Teaching Staff of the Colleges shall be represented.

Any Examiner who thinks that an Examination paper, or any question put at a *viva voce* Examination, is unfair, or calculated to offend the convictions of any student, may claim that an alternative paper shall be set, or an alternative question put ; provided that the same standard of excellence shall be required from all students.

(vii.) The Councils of the Constituent Colleges—

The Councils of the Colleges, except Trinity College (which shall retain its own improved Board) to consist of not less than nine members, to be nominated in the first instance by the Crown ; but future vacancies, including vacancies on the Board of Trinity College, to be filled by election by the Council or Board from the Fellows and Members of the Professorial or Teaching Staff of the College, and from persons of literary or scientific eminence or expert knowledge of educational matters ; provided that not more than two persons who are not Fellows or Members of the Professorial or Teaching Staff of the College shall be so elected.

(viii.) The Council of each College to appoint teachers and tutors in such College. A teacher in any College, not being a teacher of Theology, may be appointed by the Caput to be a Professor of the University, in which case his lectures shall be open to all matriculated students.

The Council of each College may create Scholarships, Bursaries, and College Prizes, as funds are available.

(ix.) Constitution, if necessary, of Boards of Studies for each College, and settlement of their relations with the College Councils.

(x.) Affiliation, with any College of the University, of the Arts Faculties of St. Patrick's College, Maynooth, of the Magee College, Londonderry, and the College of Science, Dublin. Power to affiliate or grant such recognition as may be desirable to other institutions external to the University.

(xi.) Admission of women to the advantages of the University, except as regards residence.

(xii.) Recognition of the Library of Trinity College as the University Library.

(xiii.) Finance :

1. The assignment of £— for the provision of University buildings, and for the maintenance of the University, its Fellowships, Chairs, and Prizes.

2. The assignment of £— for the building and equipment of the new College and its Residential Chambers, and of £— for its subsequent maintenance.

3. The assignment of £— for the conversion of Queen's Colleges, Belfast and Cork, into Residential Colleges, and of £— as an additional endowment.

4. The redistribution of existing endowments, provided that the following endowments be excluded :—

(a) Trinity College Endowments.

(b) Endowments of private origin.

(c) Endowments impressed with Denominational Trusts.

(d) Endowments of Theological Institutions.

Provided also that the Foundation or Governing Body of any endowment may intimate, in writing, to the Commissioners appointed to execute this scheme their consent that an Endowment otherwise exempt shall be dealt with by the Commissioners, whereupon the provisions of the Act framed to carry out this scheme shall apply to the said Endowment.

(xiv.) Power to the Caput and to Council of Colleges to alter, from time to time, the statutes of the University or Colleges respectively, subject to sanction of His Majesty in Council.

(xv.) Creation by the Crown of a Board of Visitors for the University and the Constituent Colleges, with liberty to appoint Assessors.

The Board shall be entitled to inquire into and decide upon all disputes and other matters connected with the University which call for decision, and in particular shall have the right of hearing and deciding appeals—

(a) From any person who alleges himself to be aggrieved by any act of the Senate or the Council of a College ;

(b) From any student, or the parent or guardian of a student, who alleges that any Professor or Teacher of the University or a Constituent College has taught or published anything offensive to the religious faith of the students or of any section of such students attending his lectures or teaching.

(xvi.) Dissolution of the Royal University ; disposal of its buildings, endowments, and other funds with due regard to vested interests ; and attachment of its graduates to the re-constructed University of Dublin. Provided that graduates who proceeded to the Degree Examinations of the Royal University from Queen's College, Belfast, and Magee College, Londonderry, shall be attached to the Queen's College, Belfast ; that graduates who proceeded from Queen's College, Cork, shall be attached to that College ; and that those who proceeded from Queen's College, Galway, shall, at their individual preference, be attached to the Queen's College, Cork, the Queen's College, Belfast, or the new College in Dublin ; that all graduates who graduated in the Dublin University shall be attached to Trinity College ; and that graduates who proceeded to the Royal University Examinations from the undermentioned group of Colleges, designated the Catholic University of Ireland, shall be attached to the new College :—

Maynooth College.

University College, Stephen's Green.

Blackrock College.

Carlow College.

Clonliffe College.

Cecilia Street School of Medicine.

(xvii.) Power to provide if necessary for Convocation of Graduates, and for framing rules for the conduct of its business.

(xviii.) In financing this scheme regard to be had to the fact that previous to the disestablishment of the Irish Church, sums of £26,000 and £41,000 were annually placed on the Irish Votes for St. Patrick's College, Maynooth, and the *Regium Donum*. In the Irish Church Act full compensation to the religious bodies concerned for these annual payments was made from a purely Irish fund. But Ireland, as a whole, has had no compensation for the withdrawal of these amounts from the Annual Votes.

(xix.) The preceding scheme to be carried into effect by Commissioners appointed by Act of Parliament, as in the case of the Oxford and Cambridge Universities Act of 1877.

DUNRAVEN.

XLIX.

Statement submitted by The Right Honourable Gerald FitzGibbon, LL.D., P.C., Lord Justice of Appeal in Ireland.*

"THE UNIVERSITY QUESTION IN IRELAND."

To the Secretary, Dublin University Commission.

DEAR SIR,—In compliance with the intimation conveyed to me by Sir Edward Fry's letter of the 25th October, that your Commission desires to receive a statement of my "Views on the best Solution of the University Question in Ireland," I have the honour to submit the following observations on that general and comprehensive subject.

STATEMENT OF THE QUESTION.

The object to be attained was defined in the House of Commons by the Chancellor of the Exchequer (Sir Michael Hicks Beach) on June 28th, 1885, in these words:—

"To spread, as far as possible, the great blessing of University Education in Ireland among all persons, whatever their creed, and, so far as possible, whatever their class, if duly qualified."

The demand of those who are not satisfied with the existing state of things was defined in the University College, St. Stephen's Green, by the Roman Catholic Archbishop of Dublin (the Most Rev. Dr. Walsh) on September 22, 1885, as follows:—

"The concession to Ireland of a University system in which all her people shall, for the first time, stand on a footing of full and absolute equality."

Accepting these statements without reserve, I venture to assert, further, that no solution of the question can be just or good, if it deprives any creed or class of duly qualified persons, who now receive University Education, of the great blessing which they enjoy; nor unless the footing of equality on which all are to stand in future is at least as high as that which has hitherto been held by those who now occupy the highest ground.

But I cannot regard the University Question as primarily a sectarian question. Difficulties arising from religious differences, or from the other circumstances or peculiarities of Ireland or of her people, are not the problem; they are only conditions of its solution. Again, questions as to the constitution and character, or as to the government, grouping, or co-ordination, of the institutions which are to supply the required University Education—whether they are to be Colleges or Universities, and the like—are subsidiary and subsequent to the great question, which is one of *Education*—of making adequate and satisfactory provision for *Teaching*, as distinguished from examining or *giving Degrees*, which are only the official test and recognition of Learning already acquired.

UNIVERSITY EDUCATION.

Ireland wants two kinds of University Education, for each of which distinct provision must be made, each being required for a distinct class of students—*First*: a Mathematical, Classical, Literary, and Philosophical Education, which, for brevity, I shall call "*Classical*" such as has hitherto been mainly, but not exclusively, given in such Universities as Oxford, Cambridge, and Dublin. This is required for a class of students whom Ireland has always produced in considerable numbers, and whose success in after life, in the learned Professions, in the Public Service, and in every calling in which "Higher Education" finds

employment throughout the world, is the best proof that such education is required, and has been supplied here. *Secondly*: A much larger number of Irish students require a more practical education, such as is mainly given in more "*Modern*" Universities, but as yet very inadequately in Ireland; which must be founded on a liberal education in Arts, but must also comprise scientific and specialised teaching, of which the range, importance, and cost are rapidly increasing; and which is required for those who are to earn their living in professions and callings connected with commercial, manufacturing, and industrial pursuits, as well as for those who are engaged in physical research.

No system of University education can be deemed complete unless it provides both these classes of Higher Education, though, in any given institution, one or other may, and usually will, predominate according to the number and class of the students whose needs are there to be supplied.

LOCAL NEEDS.

In Ireland the demand for these types of education differs widely in different places, and in endeavouring to meet it the circumstances of the country and of the people must be taken into account. All our lines of cleavage, social, political, religious, and geographical, are strangely parallel, and nearly coincident; and I venture to suggest that attention to this peculiarity of our Irish Body-Politic will simplify the solution of our University Question.

We have two principal cities, almost equal in size and population; Dublin, the national metropolis, and Belfast, the manufacturing and commercial capital, and the most convenient centre for the great majority of those Protestants who require Modern as distinguished from Classical education. There are 443,276 Presbyterians in Ireland, and of these 425,536 are in Ulster, which also contains 360,373 members of the Church of Ireland, and 47,372 Methodists—833,271 Protestants, as against 699,202 Roman Catholics.* Of 1,411 students who entered Trinity College, and whose religion is known, for the six years 1900-1905, 1,093 were members of the Church of Ireland, 164 were Roman Catholics, 111 Presbyterians, and 43 Methodists; being percentages of .774, .116, .078 and .030 respectively.† The average total number of students entering Trinity College annually during the same period was 253;‡ of whom only 50 came from Ulster; 11 came from abroad, the addresses of 4 were unknown, and 188 came from Leinster, Munster, and Connaught; in which three Provinces there were 2,609,459 Roman Catholics, 220,716 members of the Church of Ireland, 17,750 Presbyterians, and 14,634 Methodists.§

I submit that these figures demonstrate that Dublin must be the centre of University education for Roman Catholics; and that it must also remain, as for three centuries it has been, the chief place of Classical education for all Ireland; but that Belfast urgently needs, and can fully utilise, ampler provision for "Modern" university education.

DENOMINATIONAL AND SOCIAL NEEDS.

These conclusions are enforced by social considerations. The largest proportion of students who need

§ Thom.
1906. p. 736.

Classical education is to be found among the members of the Church which has hitherto supplied 77 per cent. of its students to the University of Dublin. A comparatively small proportion of Roman Catholics, distinguished beyond their numbers by their abilities, have profited by the same education there. A similar contingent of Presbyterians has done likewise: of the eight Fellows last elected, three are Presbyterians; and of the three Presbyterian Judges of the Supreme Court in Ireland, one was a Moderator and another was a Scholar and Auditor of the Historical Society. The great majority of the Protestants of Ulster are identical in social standing and in educational needs; and for such of them as require University education Belfast is the natural place for obtaining it. Of the Roman Catholic population, a very large proportion is rural, agricultural, or industrial, and needs primary and technical teaching rather than University education. But, besides the limited class to whom I have already referred, that population includes a large number who need modern University education; and it also includes two numerous and most important classes, for whose education in Arts no suitable public provision has yet been made—namely, the Pastoral or “Secular” Clergy, and the *Teachers*, of whom many, but not all, belong to religious Orders, and from whom the laity receive the chief part of whatever education, classical or modern, they now get from members of their own Church.

THE STANDARD OF EQUALITY.

The “equality” which is claimed for Roman Catholics will not be attained unless the institutions now to be provided are capable of giving acceptable University education to the clergy and teachers of that Church, similar to that which is given by Trinity College to the clergy and teachers of other denominations. I am not, at present, dealing with any distinction between the College and the University. They have hitherto been inseparable, and, in fact, convertible terms, for “The University of Trinity College, Dublin,” is one form of the corporate name. But I take Dublin University, and the education which it now gives to those who accept it, as fixing the standard and the level of that “full and absolute equality” which is, “so far as possible,” to be extended to “all duly qualified persons, whatever their creed, and whatever their class,” by the “solution of the University Question.”

SOLUTION OF THE QUESTION.

The following are the steps which seem to me to be necessary for the solution of the University Question in Ireland:—

(A.) Teaching Institution in Dublin.

(A.) The creation of an institution in Dublin sufficiently endowed and equipped to enable it to give to duly qualified Roman Catholic students an University education suitable to their needs, under conditions which ought to be as acceptable to them as those under which Trinity College now educates its students are to those who accept them.

To attain this end the institution so to be created must, in my opinion, be independent and *autonomous*, and the constitution of its governing body must be *academic*—that is to say, it must ultimately consist of persons selected for their learning, and qualified by their education and experience to rule an institution for higher education.

In the first instance, it would be necessary to form such a governing body by the appointment of proper persons; and they should be so selected as to secure a preponderance of Roman Catholic opinion, and a measure of Roman Catholic confidence, similar to the conditions in favour of Protestants now existing in Trinity College. But provision should be made for the gradual supersession of this body by those who would win their way from the ranks of the institution, as the Fellows of Trinity College now do, by their own academic merit.

It seems to be conceded that the State will not endow any institution which is *de jure* denominational, or which will have power to exclude any otherwise suitable student from its benefits, merely on

sectarian grounds. The continuance of two independent but similar institutions in Dublin, on a footing of equality, both *de jure* open to all denominations, will therefore depend upon the success of each in satisfying the requirements of those for whom it is primarily adapted. At the present time the percentage of Protestant students attending the “Catholic University College” is about equal to that of Roman Catholics attending Trinity College, and the imposition of tests is not required to keep up the distinction between the two institutions. It may be necessary, in framing the constitution for the new institution, to make provisions against any unfair action which would defeat the object of its foundation. But these, and other important matters of detail, can only be settled hereafter; and I propose to offer some suggestions upon that subject before I close. At present I respectfully express my concurrence with the Very Rev. Dr. Delany* in favouring “separate Universities, suited to the character, religious convictions, national sentiment, and social and economic conditions of the people amongst whom they are placed;” and while he submits “that if there were given to Irish Catholics educational opportunities equal to those enjoyed by Protestants in Trinity College there is every guarantee that they would speedily have an University of no mean standing amongst the Universities of the Empire,” I entertain no apprehension that the success of such an University would injuriously affect Trinity College.

Provincial Institutions.

Though I have mentioned “an institution in Dublin” only, I do not overlook the needs of Cork, Galway, and other places. But the creation of an endowed residential and teaching institution in Dublin specially adapted for Roman Catholic students would necessitate a reorganization of the Royal University and of the Colleges connected with it. In the adaptation of the existing institutions to the altered circumstances, provision should be made for the more efficient application of their funds to the modern requirements of University education, and I believe that a considerable saving of expense could also be effected by utilising for higher education the money now spent on the Model Schools.

(B.) University for Ulster.

B. The elevation of the Queen’s College, Belfast, to the *status* of a University for Ulster, and its adequate equipment as a teaching institution, is, in my opinion, the second step to the best solution of the Irish University Question.

The establishment of the newly-endowed teaching institution in Dublin would greatly increase the preponderance of Roman Catholic influence in the Royal University. Since the Robertson Commission, Trinity College has admitted women to its teaching and degrees, and this has withdrawn a considerable number of Protestant female students from the Royal University. For the Robertson Commission I unsuccessfully endeavoured to obtain a return of the places from which the Royal University students come, and I have recently endeavoured to ascertain the relative numbers of the different denominations, but I could get nothing better than a vague “impression” that between 60 and 65 per cent. of the students and graduates are Roman Catholics, and between 20 and 25 per cent. are Presbyterians: no inquiry is made in that institution as to the religious denomination of either students or graduates. I was, however, able to ascertain that of 80 men and 10 women who gained Entrance Exhibitions during three years, 41 were Roman Catholics, of whom 27 came from Dublin, 12 from the South and West, and only 2 from the North.† Of the Protestants 37 were from the North, 30 coming from Belfast itself, 7 from Dublin, 4 from the South, and 1 from the West. Assuming that like proportions exist among the students at large, the establishment in Dublin of a separate institution for Roman Catholics would leave nothing to connect the Royal University with Dublin, except seven out of every ninety of its present students, and in future about four-fifths of those attending it would have to come to Dublin on return tickets from Belfast. Thus the Royal University, unless utilised as the University of the new College for Roman Catholics, would become an exotic in Dublin, and, of its own accord,

gravitate to the North. Belfast is worthy of a University, and is as well able to utilise it as is Birmingham, Manchester, Bristol, Leeds, or Liverpool. An Ulster University would work in conjunction with the Magee College, Londonderry, and the General Assembly's College and the Methodist College in Belfast, while on the withdrawal of the Ulster students to their own University, the Royal University in Dublin, if reorganized on lines acceptable to Roman Catholics, would become the natural and congenial University of the newly-endowed Dublin College, and could co-operate with St. Patrick's College, Maynooth, Mungret College, Limerick, the Training Colleges for Teachers, and the other Colleges throughout Ireland, which are now giving higher education chiefly, or exclusively, to Roman Catholics. I cannot doubt that the establishment of an independent University for Ulster would be for the best interests of Higher Education in that Province: it would end the friction between North and South in the Royal University, and it would facilitate the solution of the University Question, by securing to that institution a preponderance of Roman Catholic influence, similar to the preponderance of Church of Ireland influence which is now supposed to create a peculiar "atmosphere" in Trinity College. Belfast, in the meantime, would be free to develop a congenial atmosphere of its own.

(C.) *The Royal University as Mater Universitatis.*

C. The adaptation of the Royal University to the position of *Mater Universitatis*, having its affiliated institutions diminished by the transference to the Ulster University of Queen's College, Belfast, and the other Colleges which would naturally go with it, but having added to it, or assimilated with it, the newly-endowed residential and teaching institution in Dublin, would complete the solution of the Irish University Question which is, in my opinion, the best.

This final step presents no difficulty. It is, in effect, the same conclusion which commended itself to the Robertson Commission, simplified by eliminating the Ulster difficulty, and leaving all the endowments, buildings, and equipment of the Royal University available for their present purposes, enlarged by the development of the existing "University College." Whether "the record of the educational work done by University College under the greatest difficulties,"* to which Dr. Delany justly points with pride, does not entitle Roman Catholics to prefer that the institution to be provided for them should be rather a transfiguration of the existing "Catholic University of Ireland" and its "University College," than a brand new creation, is one which—if I were one of them—I should have no hesitation in answering; but in any case, the staff which has achieved such results, and the present equipment of the existing institution, with the indirect endowment which it receives, would remain available for the new College.

EXPENSE.

If objection be made on the ground of expense, I answer that the Irish University Question cannot be solved without cost, and that, unless Parliament is willing to pay liberally for the satisfaction of the consciences of our Roman Catholic fellow-subjects, without setting itself up as the judge of other men's consciences, the question cannot be settled at all. In any case, the cost of doing it handsomely could not be more than the money's worth that, on a single day of the current year, was lost in a fog on Lundy Island.

I may point out that, since the Robertson Commission, a step has been taken which might materially diminish the cost of the new institution. A large scheme for the erection of a "Royal College of Science" in Dublin has been sanctioned. I have heard the expense estimated at £400,000, and it has recently been rumoured that this amount will be exceeded. Surely the situation and extent of this new College suggest that it should be utilised, not only by the Royal University, but also by the University of Dublin, for Scientific Teaching; and that the cost of providing for this expensive branch of modern education should be thereby met, at least in part. The expenditure in Dublin, however, seems to strengthen the claim of Belfast for similar help.

ORIGIN OF THE FOREGOING SUGGESTIONS.

I could not have presumed, even at the request of your Commission, to have put forward these views, if they were merely the expression of my own opinion. They are neither new nor original.

I have already quoted the Chancellor of the Exchequer of 1885. The publication of the Biography of Lord Randolph Churchill enables me to point out that this solution was then approved by the Cabinet; and, but for events unconnected with Irish education, it might have been presented to Parliament twenty-one years ago.

On June 28th, 1885, Sir Michael Hicks-Beach had said:—"If it be our lot to be in authority next year, I hope that we shall be able to advance some proposals which will be a satisfactory settlement of this most important question."

On October 12th, 1885, Lord Randolph Churchill wrote to me:—

"The present Government, if they are enabled by the result of the elections to maintain themselves in office, are without any doubt prepared to deal very liberally and fully with the Higher Catholic Education in Ireland, if they receive fair and reasonable encouragement and co-operation from the Catholic Hierarchy. Should these conditions be wanting, and should an unfriendly and suspicious attitude on the part of the Catholic Prelates be persisted in, it will not be in the power of the Government to go forward in the matter."

Late in November, 1885, he submitted to the Prime Minister a formal Memorandum of the policy which he advocated for the coming Session—"the production of a large, genuine, and liberal programme,"† the success of which "turned on Ireland"—and it included the following item, as to which he assumed "Liberality of grants from the Treasury towards Irish objects," and "Concession to the Roman Catholic Hierarchy on education questions.‡

"UNIVERSITY (IRELAND) EDUCATION. §

"This should take the form of:—

1. The transference of Cork College to a Catholic Board of Management.
2. The endowment of the Catholic University College in Dublin.
3. The establishment of a Catholic College in Armagh.
4. The transference of the Belfast College to a Presbyterian Board of Management."

On December 5th, 1885, Lord Salisbury criticised other items of the Programme, but as to this he wrote:—

"With respect to (*inter alia*) Roman Catholic Education I need say nothing, because I generally agree with you."||

At this critical juncture, an ill-timed episcopal denunciation of the projected measure, as an offer of which the main purpose was to buttress up that "ancient citadel of ascendancy and exclusiveness" which had stood for centuries on College Green, intervened on January 14th, 1886; the Government went out of office on January 26th, 1886; and Education "became involved in the chaotic and whirling conflict of Home Rule."¶

When he returned to office, and became Chancellor of the Exchequer, and Leader of the House of Commons, in July, Lord Randolph Churchill delayed the renewal of proposals about Education Legislation, hoping for a change of attitude on the part of the Roman Catholic Hierarchy. His resignation followed in December, 1886, but immediately afterwards he commenced endeavours to bring about a settlement of the question, which ended only with his life. He believed that, as a private member, he had "a better chance of carrying a Bill than the Government,"*** and he contemplated "the erection of a Catholic University out of the existing Royal University, endowed by the moneys paid to the Queen's Colleges," and as a subsidiary measure, a *Modern University at Belfast*; with abolition of the Model Schools and the "Godless Colleges."

In 1888, he hoped for "the great advantage of personally ascertaining the Archbishop's opinions,"* and if he could only attain full agreement with him, he did not anticipate any difficulty with the Cabinet. Down to 1892, he was still prepared to offer "the largest concessions on Education—Primary, Intermediate, and University—which justice and generosity could admit of," "but preserving always intact *Trinity College*."† The opportunity lost in 1885 never returned, and the question is now before your Commission.

† *Ib.*, p. 456.

THE RECTOR OF "THE CATHOLIC UNIVERSITY."

By the sudden death of the Right Rev. Gerald Molloy, the Rector of "the Catholic University," your Commission has lost the evidence of one who, of all others, could speak with the highest authority upon the subject of your enquiry. He had been a Professor at Maynooth; he was the first Assistant Commissioner of Intermediate Education; he served for eleven years upon the Educational Endowments Commission of 1885; he was the Vice-Chancellor of the Royal University; he was a frequent visitor, and a welcomed speaker, at Trinity College; at the Tercentenary, where he represented "the Catholic University of Ireland," no one was received more cordially than he was. He was the representative of the Hierarchy in the "Catholic University," where he seems to have been entirely successful in working harmoniously with the teaching staff of the "University College." The premature publication of the "Scheme for widening the Constitution of Trinity College, Dublin," Statement III., led to the publication of the Statement of the Standing Committee of the Roman Catholic Hierarchy, which in effect declared that the Archbishops and Bishops "on no account would accept" any such Scheme, and a contentious correspondence ensued in the newspapers. On Saturday, September 15th, 1906,† Dr. Molloy published his opinions, and gave his reasons, in a most persuasive paper.§§ Its appearance was a surprise to his friends: it seems now that it was providential, for ten days afterwards he was dead, and this paper alone remains as the expression of his views upon a question upon which no one possessed equal information.

† *Irish Independent*, Sept. 15, 1906 (here-with sent).

I spent the three days from the 17th to the 19th of September in his company. He and I had been intimate friends from 1876, when I was engaged in drafting the Intermediate Education Act; and, when working together on the Educational Endowments Commission, we had dealt with many difficulties, without any instance of antagonism.

When we met, I told him that I had read his paper with the greatest pleasure, and that I thoroughly agreed with all he said, and especially with his conclusion, though I said that, if I had been in his place, I thought I would have said a little more for the Scheme that was "too good to be hoped for." His answer was:—"With all the wild writing that was going on in the papers, I thought it wiser to recall men of commonsense to consider which of the things we were likely to get would be the best for us, if we got it." He added—"I don't know that we will get anything, but at all events Trinity College has got a grand opportunity of reforming itself."

I invite attention to the weight of his testimony in favour of the Royal University solution, and I point out that, if the Ulster University be established, as I have indicated, his accepted solution—the "New College for Catholics under the Royal University"—will approximate to his "ideal solution," in direct proportion to the extent to which the new College will become predominant in that University; and further, that if the existing "University College" is "transfigured" into the "New College," it will have the additional advantage of continuing to co-operate, in the same University, with the other institutions which are engaged in "the advancement of Higher Catholic Education" throughout Ireland, and are now affiliated to the Royal University. This is the declared object of "The Catholic University of Ireland."§

§ *Bishops' Resolution*, Thom, 1906, p. 692.

He rejects, absolutely, the "One University Scheme," which is, in principle and effect, the same as that of Statement III. I have always felt that the Roman Catholic Hierarchy, in 1873, placed all who value learning under an obligation for which they

have not yet received any return, in rejecting the degrading offer, as a solution of the Irish University question, of One University shackled by what Mr. Morley truly says—"Many found *intolerably obnoxious*"—"the prohibition of any University teacher in Theology, Modern History, or Moral and Mental Philosophy."|| Mr. Morley adds:—"This was undoubtedly a singular limitation for a University that had sent forth Berkeley and Burke." No "One University" Scheme, and no "Mixed Education" Scheme, can be framed under which the teaching of these subjects, if given at all, can be kept in accordance with the conscientious convictions of all those who are to study them.

Dr. Molloy deprecates, as "little short of folly," the experiment of "pulling to pieces a fine old Protestant Institution, which has enjoyed a flourishing existence of 300 years, in order to build up on its ruins a system of education which Protestants do not want, and which Catholics will certainly not accept." He prefers the Royal University Scheme, from the practical point of view, as the more feasible; and in its educational aspect, as "better for the development of Higher Education in Ireland." While he regards the change of the Royal University into a Teaching University, with constituent Colleges, as recommended by the Robertson Commission as "a simple and natural process of growth and development"; he recognises the creation of "a new Governing Board for the University of Dublin, on which Catholics and Protestants would sit in equal numbers," as "a serious wrench in its character and constitution"; and with manly courage, he lays aside the temptation to covet, for "the new Catholic College," any share in "the inexpressible charm of the ancient seat of learning." He does not desire to see his College as "a foreign graft on an ancient tree, but rather as a healthy sapling, growing up from its own roots, racy of the soil, and full of the vigour and promise of youth. If it wants *prestige*, let it make a *prestige* for itself by the genius of its sons."

With intimate knowledge of the Royal University, he shows the advantages of its organisation over that of the University of Dublin, for the purposes of the new institution; he points out the beneficial effect which the introduction of the teaching power will have on the other associated Colleges; and he concludes by referring to "the fair prospect that the great resources of the Colleges of Galway and Cork, so deplorably wasted in the past, may now at last be turned to good account for the educational benefit of the nation."

To the authoritative arguments of my departed friend, it would be unpardonable presumption on my part to add anything upon the aspects of the question which were open to him. But I may be permitted to enforce those arguments from the opposite point of view, that of Trinity College and the University of Dublin.

A SECOND COLLEGE IN THE UNIVERSITY OF DUBLIN.

This proposal is opposed by everyone connected with Dublin University, or with Trinity College, whose views are to be found in the Statements hitherto published by your Commission. No one has proposed it as the best solution; no one has attempted to meet Dr. Molloy's practical objections to it; and its difficulties have been displayed by those who speak from experience—notably by Mr. Gwynn.¶ I can find no evidence of its acceptability to those whom it is designed to bring into communion with the existing University, and into partnership with Trinity College. Statement I.** demonstrates the impossibility of satisfying, by the creation of a second College in the University of Dublin, the claim of the Bishops in Statement XXV.††—"A right to a University in harmony with their principles." The Bishops say only that "if a scheme were formulated for setting up in the University of Dublin another College, in addition to Trinity College, they should be prepared to consider it with open minds." They offer no help to formulate it, but "they declare their willingness to consider favourably a solution on the lines of the Report of the Robertson Commission, namely||—"A reconstruction of the Royal University, by which it would be changed from a mere Examining Body into a Teaching University in which an *autonomous College* on an adequate and impressive scale would be

DOCUMENTS.
SECTION I.
XLIX.

provided in Dublin for Catholics." Dr. Molloy has shown that, in the Royal University, this reconstruction would be "a simple natural process of growth and development."

The Vice-Chancellor of the Royal University (Sir Christopher Nixon)—a Graduate of Trinity College—has said:—

"That whilst they had evidence of the multiplication of Universities on the Continent and in England, an attempt to establish a single University in Ireland would be a failure. If this Commission reported as it ought to do, that the settlement of the University question in connection with the establishment of a College for Catholics in the University of Dublin was not practicable, it was not easy to see how any Government could run in the teeth of opinion given by its own Commission."*

I submit that this could not be done without destroying the foundations of the existing institution, and erecting on their ruins what must necessarily be "a house divided against itself."

The *Autonomy* of Trinity College, and the essential principle of its constitution that *Academic Merit* shall be the only avenue to authority in it, and that participation in its honours, emoluments, and government, shall be irrespective of creed, class, or politics, are attributes equally essential to the University and to the College. To all who are willing to win their own way there, on these conditions, Dublin University is open now, but Statement III. is enough to show that no settlement intended to make it acceptable to those Roman Catholics who claim the right to a University in harmony with the principles of Statement XXV. would meet with support, if it did not provide for representation of "*Roman Catholic interests*" on the Governing Body. I submit that such a provision would be not only inconsistent with the principle of academic qualification, but also a violation of Fawcett's Act; and the grotesque Governing Body suggested in Statement III. is an object lesson of the impossibility of constituting a Ruling Authority for the common University of two Colleges, which would satisfy the Roman Catholic claim, and at the same time leave the University autonomous and academic. What is now the only avenue to power in the University of Dublin, would have to be supplemented by a back-door, of which the "*Sesame*" would not be personal merit, but religious and political differences, and governmental interference.

The idea of a *bivertebra* Institution first appeared between three and four years ago, in the form of a suggestion that Trinity College might be left as it was, with its endowments and its educational liberty intact, giving it a subsidy for Scientific Teaching in consideration of its taking a second College into partnership—the Degrees to be given by a common *Caput Universitatis*, on certificates from the Colleges, each College being free to prescribe its own curriculum. In such an institution, all the University functions could be performed by a single clerk, vouching certificates, and engrossing diplomas, which, purporting to be identical, would widely differ in intrinsic value.

I suggest one more difficulty in the way of any and every form of *splitting* the University of Dublin—what is to become of the *ad eundem* rights hitherto mutually enjoyed by Oxford, Cambridge, and Dublin? If they are confined to students of Trinity College, "equality" must go: if not, will Oxford and Cambridge extend them to the new College? If they are withdrawn, the usefulness of Trinity College, and of the University of Dublin, will be materially impaired.

INCOMPATIBILITY OF THE "TWO COLLEGES."

That Trinity College is averse to the proposed association is plain. The evidence of the feeling on the other side is discouraging.

On January 14th, 1886, at a meeting over which the Archbishop of Cashel (the Most Rev. Dr. Croke) presided, Archbishop Walsh spoke of Trinity College in these words:—

"So long as that central fortress of the education that is not Catholic is allowed to stand, as it has now so long stood, in the very foremost position,

and to monopolise, as it has so long monopolised, the most glorious site in our Catholic City of Dublin, so long will it be impossible for any statesman, be he English or be he Irish, to deal with this great question on the only ground on which University Reform in Ireland can be regarded as satisfactory or even as entitled to acquiescence—the open and level ground of full and absolute equality for the Catholics of Ireland."

In the House of Commons on March 22nd, 1906, one of the leaders of the "National" party met a sympathetic reference to Trinity College by the following declaration of hostility—a melancholy utterance coming, as it did, from the son of a "Young Irishman," who was a Graduate of Dublin University, a Gold Medallist in Ethics, and President of the College Historical Society, in 1840. Mr. Dillon said:—

"He thought the present Government was entirely too tender to that institution; he was much interested in the Chief Secretary's statement that he did not believe there was any one who could pass the portals of Trinity College without emotion. As a citizen of Dublin, he himself passed the portals of Trinity College every day when in Ireland, and he felt very deep emotion, but very different emotion from what the right hon. gentleman meant. He looked upon those portals as one of the last fortresses of political oppression and religious ascendancy in Ireland."

This "very deep emotion" was promptly represented by another leader of the same party as a mischievous impulse to break the windows of the building in which it is now proposed that the two Colleges shall meet in Peace, Love, and Harmony, as the Home of their Mother University.

Dr. Delany§ says of Trinity College:—

"It has been throughout its history, and is today, out of touch with the great majority of the people of Ireland, who look on it traditionally, as the stronghold of the English Protestant Garrison in Ireland, the defender and supporter—at the cost of the many—of a privileged Religion and a privileged Class."

No University is, or ever can be, in "touch with the great majority of the people of Ireland," or of any other country, for University education must be confined to a qualified minority.

The President of Milltown Park College (the Rev. Peter Finlay)|| says:—

"Before it can become acceptable to Irish Catholics, it must acquire as distinctive a colour of Roman Catholicism as it has at present of Irish Protestantism. And this would mean the utter destruction of Trinity College, of the Trinity College which Irish Protestants have founded and built up."

But he adds—

"We do not seek to pull down but to build up; and we recognise that to make Trinity College a suitable institution for the higher education of our children it should be pulled down utterly, and rebuilt on wholly different lines."

The Royal University has recently been on the verge of disruption. Its Chancellor and one of its most distinguished Presbyterian Senators have left it. The disorder arose about music. If Dublin University were reconstructed to-morrow, with a second "Autonomous College on an adequate and impressive scale" alongside Trinity College, its bifid *Caput* must forthwith face the question—"Shall the National Anthem be performed at our First Convocation under the protection of the Police?"

But the incompatibility lies deeper than in denunciation, invective, or political animosity. On the Robertson Commission, the Roman Catholic Hierarchy was represented by the Most Rev. Dr. Healy, now Lord Archbishop of Tuam.† He asked me:—

"Do you think it possible to satisfy the Catholic claim by establishing an institution founded on Protestant principles and ignoring Catholic principles?"—Answer.—"I certainly do not."

† "Ad-dresser" p. 392.

† App. p. 264, Questions 8883 et seq.

"Am I right in assuming that one of the fundamental principles of Protestantism in religious matters, to a very great extent at least, is the right of private judgment, and on the other hand, I may undertake to say myself that the fundamental principle of the Catholic Church in religious matters is the principle of authority." *Answer.*—"The right of private judgment among Protestants, as I understand it, is limited by obedience to authority in *omnibus licitis ac honestis*. We are not a law unto ourselves."

"But at any rate you recognise that there is a fundamental difference in this matter between the Catholic and the Protestant principles?"—*Answer.*—"I believe there is."

"I suppose you heard it stated, in the course of your large experience, that the only authoritative judge, according to Catholic principles, in these religious matters, is the Bishop of the Diocese?" *Answer.*—"I have heard that; but, at the same time, a point that was never very clearly defined, so far as my experience went, was the boundaries of his jurisdiction."

"No doubt; assuming, however, that it is a fundamental principle that the Bishop is the only authoritative judge on religious questions when they arise, would it not be most convenient, and I will say necessary, to have a representative or representatives of the Bishops on the Governing Body of the proposed College for Catholics?" *Answer.*—"I can hardly conceive a Governing Body being formed on which there would not be a Bishop."

In face of this authoritative statement of the "necessary" and "fundamental principle of the Catholic Church in religious matters," it passes my powers to suggest how a Governing Body can be formed for the common University in which Trinity College and the "New Catholic College" are to be equal partners—so as to bring that principle into operation upon the University of Dublin, as now existing. Oil and vinegar might be kept in some sort of mixture by constant agitation, but this would be putting the tartaric acid into a seditious powder. A cobweb connection, such as was suggested some years ago, would be a sham, if not a fraud. If any real bond existed, every point of contact would be a point of friction, and every connecting link would soon become a galling shackle to both the Colleges which had been tethered together. Liberty, Equality, and Fraternity would alike be impossible for each of them.

TRINITY COLLEGE AS A MATER UNIVERSITATIS.

Dr. Molloy has well pointed out that although Trinity College and the University of Dublin may be distinguished theoretically, one from the other, they have in the course of their history been woven together into a common web. For 300 years the University has rejoiced in her only child. "Now well stricken in years," is she to resume the function of maternity; and not only that, but *uno ictu* to produce a new Minerva who must be a match for her elder sister? The "Two College" scheme is still more unnatural, for it would turn the two sisters into "Siamese Twins."

Surely Dr. Molloy's appeal to "men of common sense" will not be made in vain. The failure of any other scheme could have no worse result than disappointment and loss of money. But every experiment upon Trinity College is an act of vivisection, performed upon a priceless institution whose usefulness it is your Commission's duty not to imperil, but to increase.

PROCEDURE.

No solution of the University question could possibly be attained by the direct action either of the Crown or of Parliament. I assume that some such measure as "the Universities of Oxford and Cambridge Act, 1877,"* must first be passed; upon the understanding that, if a scheme framed under it is not disapproved by Parliament, the money required to carry it out will be provided. I respectfully direct your attention to the "Educational Endowments (Ireland) Act, 1885,"† as an adaptation to Ireland of the Act of 1877, which has worked smoothly and

effectively in re-organising our educational institutions.

The Commission consisted of two Judges of the Supreme Court, and three "persons of experience in education"; the powers of the Judicial Commissioners and of the expert Commissioners being distinctly defined. Each Assistant Commissioner avowedly represented one of the three principal religious denominations, which were regarded as having distinct and frequently conflicting interests. They were Dr. Traill, of Trinity College, Dr. Molloy, of the "Catholic University," and Professor Dougherty, of the "Magee College."

Every scheme had to pass through the following stages:—

1. A public enquiry, at which all interested parties had an opportunity of being heard; each existing Governing Body being at liberty to submit a draft Scheme for the consideration of the full Commission.

2. The preparation and publication, by the full Commission, of a draft Scheme, to which any body or person interested might lodge objections, and propose amendments.

3. A local public enquiry, after the expiration of the time for lodging objections, concerning the subject matter of the Scheme. At these enquiries, the full Commission always sat together; and, furthermore, although the Act did not so require, the Judicial Commissioners always obtained the advice and assistance of their colleagues in considering the Schemes, at every stage down to their completion.

4. A consideration, usually public, by the Judicial Commissioners, of the objections and amendments, and the framing by them, on their own responsibility of a Scheme to be submitted to the Lord Lieutenant, to whom any Governing Body was at liberty also to submit a Scheme.

5. The submission of a Scheme, signed by both Judicial Commissioners, to the Lord Lieutenant.

6. The consideration of the Scheme, and of any objections and amendments, by the Privy Council, who received objections, took evidence, heard all interested parties, and had power either to provisionally approve the Scheme, or to remit it to the Judicial Commissioners, with such declaration as the case required.

7. When a Scheme was thus remitted—which might be done "as often as occasion might require"—the Judicial Commissioners prepared an amended Scheme, which went through the same course.

8. When all objections had been disposed of, the Lord Lieutenant provisionally approved the Scheme; and it was then laid before Parliament.

9. *Either House* might, by resolution, "disapprove of the Scheme or any part thereof." If no such resolution was passed, the Lord Lieutenant in Council finally approved the Scheme, whereupon it took effect "as if it had been enacted in the Act," and every Act of Parliament, trust, and other thing inconsistent with it, became "repealed and abrogated." If either House disapproved the Scheme, it went back to the Judicial Commissioners, and they began again where they had left off.

The great majority of the Schemes became law without any objection being taken before the Privy Council or Parliament. The first Scheme framed closed a denominational quarrel over a large Endowment, which had lasted for eighty years, by bringing the two Archbishops of Dublin to discuss their differences at the same table. Another quieted the Jesuits in the possession and government of an important College, though it failed to bring the Bishop of the Diocese and the President of the College into the same Corporate Governing Body. A third, framed on the application and with the consent of the Archbishops and Bishops, incorporated "The Catholic University School of Medicine," and vested Visitation Jurisdiction in a mixed body which represented Law, Physic, and Divinity. A good many important Schemes were remitted by the Privy Council—some, notably that relating to the Royal School Endowments, being remitted more than once. Not more than half a dozen were brought before Parliament. In all cases but two, a final settlement was attained. In one case, the House of Commons disapproved an alteration which had been made in

DOC-
MENTS.
SECTION I.
XLIX.

obedience to a declaration of the Council, and the Judicial Commissioners could not proceed when Parliament and the Privy Council could not agree. In one case only, the Judicial Commissioners failed to concur in signing a Scheme; 210 Schemes in all became law, dealing with property worth £67,000 a year, and an annual income from other sources amounting to £74,000 more.

I mention these matters to suggest the advantage of local and public inquiry, and of hearing and re-hearing interested parties, when framing detailed and complicated provisions for the reorganisation of Irish educational institutions, before they are submitted to the final authority of Parliament. Many of the questions and difficulties which remain to be solved in University education arose, in smaller degree but in no less complexity, before the Endowments Commission. For further details, I beg to refer to the Report of the Robertson Commission Appendix, pp. 252-254.

THE WORK OF TRINITY COLLEGE.

I cannot close without some endeavour to appreciate "the place which Trinity College and the University of Dublin now hold as organs of the higher education in Ireland"; and to forecast the effect upon them of creating, outside Trinity College, a new institution which will, as far as possible, spread the great blessing of University education" among those duly qualified persons who, at present, decline to accept it from that College. I cannot be expected to realise the apprehensions, or to admit the objections, which hinder so many of my countrymen from entering the place to which I owe so much. But I respect their scruples, and I sympathise with their submission to authority; and I have long felt that they ought not to be forced to sacrifice so much for conscience sake.

In the Report of the Robertson Commission,* you will find a necessarily imperfect statement of what Trinity College has done for Irishmen qualified to put higher education to good account. I submit that few, if any, institutions have "done so much for the money." I have already given you evidence of what it has done for the clerical profession. It is beyond my power to give similar proof, though I believe it is obtainable, that the medical, engineering, and educational schools have been equally successful. The lists of the Civil Service, Home, Indian, and Colonial, and of men who have attained the highest distinctions in Literature, Science, and the Arts, entitle Trinity College to ask with confidence "*Quæ regio in terris nostri non plena laboris?*" In my own profession of the Law, and at home, within the fifty years during which the Queen's University and Royal University have been at work, of seventy-five Irish Judges of the Supreme Court, sixty-one have been graduates of Dublin University, three of the Queen's University, two of Oxford, and none of the Royal; 61 per cent. of the Bar are University men,† 88 per cent. of the Judges have been graduates; and of these, 91 per cent. were Trinity College men, of whom fourteen were Roman Catholics.

At present, only one of our Judges—a Protestant—is not a graduate; one comes from Oxford, one from the Queen's University, and all the rest, including the three Roman Catholics, are graduates of Dublin University; and of these nine were Moderators, and seven were Scholars.

Dr. Delany says:—

"With the exception of, comparatively, a mere handful of Catholics, who saw in Trinity College the only road to professional advancement and social recognition, the great mass of Irish Catholics have ever stood aloof from it."

With all respect, I consider that University education is not required for "the great mass" of any denomination, or of our people at large; it is a subject of complaint against our system of Intermediate education, that it tempts too many of us away from the more profitable paths of industry and commerce. But however this may be, it is certain that there is nothing denominational in the attractiveness of any "road to professional advancement and social recognition." These are the fruits and the rewards of higher education, and the record of the successes of this "mere handful of Catholics" is the conclusive proof of the excellence of their education, and of their fitness to receive it.

As to "social recognition"—Ireland knows "society people," of the English type, only as absentees or birds of passage. The one *Filius Nobilis* of my College days is now the Earl of Rosse, the Chancellor of the University, a worthy successor of his father, and his brother is one of the most distinguished engineers of the Empire, who won a gold medal in Experimental Science in 1873. When I entered College there was a long array of "Fellow Commoners" at the High Table; only one now appears on the Books,§ and he is a Junior Bachelor. But "social recognition" comes plentifully to those who earn it. When the Robertson Commission sat, there were seven English Privy Councillors who had all been in Trinity College at the same time,|| of whom Lecky has since passed away. There are now seven Peers of the Realm—all but one first creations—who are graduates, and the one who holds his title in the second generation is also a Moderator, as his father was before him. Of the eight holders of these Titles, five were Moderators, one was a Respondent, one was a Scholar, and three were Auditors of the Historical Society.

In 1902, though only eight per cent. of the Registered Solicitors of Ireland were graduates of any University,¶ thirteen of the thirty-one elected members of their Governing Body, the Council of the Law Society, were graduates, all of Trinity College, and three, including the President, were Roman Catholics. Of the sixty-three Fellows of the College of Physicians, thirty-five were Dublin graduates, and five more got their professional education in the Medical School of Trinity College. Of the Governing Body of the College of Surgeons, two-thirds were graduates of Dublin University, one of the Royal, one of the Queen's, and one of Edinburgh. Since 1901, the number of Roman Catholic students annually entering Trinity College has steadily risen from nineteen to thirty-five.**

The present system of Moderatorships was instituted in 1815. The first name upon it is that of a Roman Catholic; let me mention some of the more remarkable names which follow it. In 1823, Chief Justice Monahan was first in Science; in 1853, his eldest son won the same place; in 1855, his second son was a Moderator in Ethics; and in 1884, the same name appears in the Classical List. In 1824, J. J. Murphy, afterwards Master in Chancery, was first in Classics; in 1825, Mr. Justice James O'Brien, "a Catholic of the Catholics," was first in Science; in 1837, Judge Kelly came out first, over Jellett and Roberts, two notable Mathematicians. In 1840, John Blake Dillon was second in Ethics; in 1841, John O'Hagan took the same place, having below him Edward Synam, afterwards Member of Limerick. In 1842 the Right Hon. William Henry Cogan was first in Ethics, with another member of his own Church below him. In 1846 Chief Justice Morris won the same distinction on full marks, and in 1889 his eldest son won a Moderatorship in History and Political Science; in 1857 the Lord Chief Baron won his Gold Medal in Science; in 1858 five medals in three courses, and in 1889 six medals in four courses, Mathematics, History and Political Science, Ethics and Logic, and Experimental Science, all went to Dr. Delany's "mere handful"; in 1861 the two gold medals in Classics were won, the first by J. T. Bellingham Brady, now Assistant Commissioner of Intermediate Education; the second by James Slattery, late President of Queen's College, Cork. In three successive years, 1887, 1888, and 1889, "the Wray Prize" for Metaphysical Studies, and an Extra Prize for distinguished answering, were won by Roman Catholic students. In 1862 Lord Chancellor Naish took two gold medals; in 1866 Sir George Plunkett O'Farrell was first in Experimental Science, and in 1876 he was succeeded by the Rev. W. Vincent Kane, s.j., now of Milltown Park College.

I have mentioned†† but a small proportion of such names; there is some reason to believe that a considerable number of students who afterwards joined Teaching Orders have passed through Trinity College; but I submit that I have gone far enough to show that the President of Milltown Park was insufficiently informed of the benefits derived by the members of his Church from Trinity College when he wrote—§§

"A very small number of Catholic parents send their sons to Trinity College; at rare intervals a Catholic name appears in its lists of distinctions; within the last hundred years two or three Catholics have been admitted to the Fellowship of the College."

‡ Statement xxv, p. 121.

†† Rob. Com. App. III, p. 267, Question 8836.

§§ Statement xxxvi, p. 123.

Did he not know that, until Fawcett's Act, they were not admissible? Did he know that the University of Dublin, always in advance of the Legislature, opened its honours and its degrees to all denominations in the 18th century, and that for nineteen years before Fawcett's Act it provided Test-free Non-Foundation Scholarships; that the name of Thomas Maguire, afterwards a Fellow, stands first upon that list; and that it is followed by the names of Denis Fitzpatrick, now K.C.S.I. and a member of Council for India; John Fallon, Thomas J. Bellingham Brady, James Slattery, John Naish, John Casey, Professor of Higher Mathematics in "the Catholic University of Ireland"; John Wilson Gray, Richard O'Shaughnessy, M.B., M.V.O., Commissioner of Public Works; and Albert William Quill, all of whom obtained Scholarships by merit which, but for their legal disability, would have gained them admission to the Foundation as "Scholars of the House."

In addition to all these, many "Catholic names" appear on the lists of Trinity College, under circumstances which indicate that the distrust of her teaching or influence is far from universal.

The only student of "the Catholic University" who has attained the position of Attorney-General sent three sons to Trinity College, and two of them became Moderators. A late President of the Society of St. Vincent de Paul sent both his sons there; one of them became a Moderator, the other distinguished himself in the Medical School. Five, at least, of the staff of the Mater Misericordiæ Hospital are Trinity College men. One of the Professors of St. Patrick's Training College, Drumcondra, now a Fellow of the Royal University, got a Scholarship in Trinity College in 1886, and was Second Moderator in Mathematics in 1889.

The Clerk of Convocation of the Royal University, who is also a Senator and King's Counsel, was a Scholar, a Senior Moderator, a Berkeley Medallist, and Auditor of the Historical Society.

Clongowes College is the largest and best equipped Residential School in Ireland, and its teaching staff is second to none, as a community of scholarly gentlemen, unless it be so to the Fellows and Professors of Trinity College; the Roll of the Clongowes Union, of which the Lord Chief Baron is the President, is an index of the work done by Trinity College for the pupils of a single school, for Clongowes has sent many of her most distinguished pupils to Trinity College, and they have, in large numbers, made their way to eminence.

Clear proof can be given of the cordiality of feeling among the Trinity College students of every creed and class. I have never known or heard a single instance of dissension or discord among them, though they widely differ in politics and religion, with all the ardour of youth and inexperience. "The Spirit of the Nation" was largely of College composition. "Who fears to speak of '98"? was written by a future Vice-Provost; Isaac Butt, Thomas Davis, John Blake Dillon, Thomas MacNevin, James O'Hea, William Patrick O'Brien, John Edward Pigot, Denis Caulfield Heron, and John O'Hagan were all officers of the Historical Society between 1834 and 1843. Between 1846 and 1888 the Auditorship was eight times held by a Roman Catholic, Sir Thomas Upington was Secretary in 1867; his son was Auditor in 1896.

In the twelve years from 1883 to 1895, a period for which I happened to get the figures, Clongowes, Ushaw (a Bishop's College), Oscott, Beaumont, and Stoneyhurst, sent seventeen men into the Trinity College Eleven, and seven of them were in it at the same time. The Football Team has got famous captains and "Internationals" from the same sources; and I have heard that it is a moot point, which even special matches have not yet settled, whether they or the Divinity School have produced the best men. Of all that I owe to Trinity College, there is nothing that I remember with more gratitude than the friendships that began there, with men who differed with me on everything which is supposed, by those who know nothing of the place, to have poisoned the "atmosphere" of our College days. Even if a sheep had strayed, before Trinity College was held to blame,

it should be remembered that Voltaire was educated by the Jesuits, and that Renan was the favourite pupil of Bishop Dupanloup, who sent him for his Higher Education to the Diocesan Seminary of St. Sulpice.

The facts which I have ventured to bring before you are evidence of the benefits which the University of Dublin, under its present constitution, has conferred on all who are willing to accept them. Your Commission must have realised the extent and the strength of the reluctance, on the part of those best qualified to profit by a Classical Education, to give up Trinity College as the institution which is to provide it for them all. I read Statement III. and Statement XXX. as striking indications, from opposite quarters, of the lengths to which those who appreciate the education given in Trinity College are prepared to go, rather than submit to separation. I am satisfied that any constitutional alteration in the University of Dublin can end only in spoiling it for those who now enjoy its benefits, without satisfying any of those who are now unable or unwilling to accept them. But I do not believe that its present usefulness will be impaired by making provision elsewhere for the requirements of those classes who have hitherto been left without Higher Education suited to them. The exaggerated language of Statement XXXIV. is utterly unjust to Trinity College, but it goes to support Dr. Molloy's opinion that the University of Dublin is not cast in the mould best suited to the needs of "the great majority of Irish Catholics." Let their education-hunger be justly and generously satisfied elsewhere, in a University of a "more expansive character," and, if this be done, the ravening against Trinity College and the University of Dublin will be appeased.

The same question has arisen in England, and it has been closed by the intervention of the Pope.* So long as Oxford education is tolerated, if not sanctioned, for those who, in England, correspond most nearly to the class which, in Ireland, has hitherto appreciated and accepted the great blessing of University Education offered by Trinity College, that institution will maintain its usefulness unimpaired.

*Life of Cardinal Manning, Vol. II.

CONCLUSION.

I was asked for a "short" statement of my views. I could not make it short, because the question put to me was practically boundless, though it is *the real question*; and because, if my views were worth consideration, it was a duty of honour that the disclosure of them should be clear, candid, and complete. I have done my best to make it so; and, in doing so, I feel that I have tried the patience of your Commission. I trust that I have given no just cause of offence to any of those from whom I differ in opinion.

The conclusion of the whole matter is, that any interference whatsoever with the autonomous independence, the academic government, or the intellectual freedom of the University of Dublin, or with its liberty to fix its own standard of education, will be an injury to learning, and a wrong to all those educated Irishmen who have hitherto found in Trinity College "a middle station at which they can meet so as to learn to understand and to yield to one another;"† and that any such solution of the University Question would be most keenly felt as a deadly blow by those who want Cardinal Newman's ideal—"Not a Seminary, but a place to fit Men of the World for the World."‡

†Dr. Newman's Letter, Dec 10th, 1873.

L.

Memorandum respecting the Royal College of Science for Ireland, submitted by the Department of Agriculture and Technical Instruction for Ireland.

The Royal College of Science for Ireland, which began its career under that name in 1867, and has undergone more than one reorganisation since, is a development from previously existing institutions. Its immediate predecessor was an institution established in 1845 under the Office of Woods and Forests, known as the "Museum of Irish Industry," which body had itself arisen out of a provision made by the Irish Parliament, through the Royal Dublin Society, for the encouragement of Agriculture and Industries and the Arts and education connected therewith. In 1847 the object of this Museum of Irish Industry was extended, and under the name of the "Museum of Irish Industry and Government School of Science applied to Mining and the Arts" its scope was enlarged, so as to embrace the whole range of the Industrial Arts. In the year 1853 this institution passed under the control of the Department of Science and Art, which had then just been created as a branch of the Board of Trade, and in 1867, on the report of a Committee of the House of Commons, and in accordance with the recommendations of a Commission appointed by the Lords of the Committee of Council on Education, the Royal College of Science, which absorbed the existing Museum and School of Science, was established. Its purpose, as defined in the Report of the Commission, was "to supply, as far as practicable, a complete course of instruction in Science applicable to the Industrial Arts, especially those which may be classed broadly under Mining, Agriculture, Engineering, and Manufactures, and to aid in the instruction of teachers for the local Schools of Science." The College, which is situated in Stephen's Green, Dublin, remained under the control of the Science and Art Department in England (now named the Board of Education, South Kensington) until the year 1900. In that year, by the operation of the Agriculture and Technical Instruction (Ireland) Act, 1899, various powers and duties that had previously been divided amongst separate branches of Government were transferred to the Department of Agriculture and Technical Instruction for Ireland, created by that Act. Among the powers and duties so transferred were those of the Board of Education, South Kensington, in relation to the administration of the Science and Art Institutions in Ireland (including the Royal College of Science), and in relation to the "Grant for Science and Art in Ireland" and the "Grant in aid of Technical Instruction." Accordingly the College is now under the control of the Department of Agriculture and Technical Instruction.

On taking over the College the Department considered the question of developing it in connection with the system of technical instruction, which it was their duty to organise for the country; and, accordingly, in April, 1900, a Departmental Committee, of which Sir William de W. Abney was Chairman, was appointed by minute of the Vice-President to consider and report on the future position and functions of the College. The College has been reorganised by the Department on lines recommended by Sir William Abney's Committee, and additional funds have been provided for its purposes from the Parliamentary Vote. It is an institution for supplying an advanced course of instruction in Science as applied to Agriculture and the Industrial Arts; for training teachers for technical schools, and for secondary and Intermediate schools in which Science is taught; and for carrying out scientific research. It now embraces three Faculties, viz.—Applied Chemistry, Agriculture, and Engineering. Students who desire to obtain the Diploma of Associate which is granted by the College are called "Associate" students, and must attend a course of instruction extending over three years, and pass the prescribed examinations. In the first year the instruction is of a general character; in the second and third years it is specialised according to the Faculty or group of subjects selected. Students who are not taking a complete course of study, but who attend the College for single subjects, for

occasional lectures, or for special laboratory work are called "Non-Associates." No student is admitted to the College under the age of 16 years. Certain students who are qualified to carry out research are allowed to devote their whole time to work in the laboratories under the direction of a Professor. The College also grants a Diploma of Fellowship to students who, after receiving the Diploma of Associateship, remain at least a fourth year in the College, and submit an approved thesis, containing the results of original investigations. The College lectures and laboratories are open to women on the same terms as to men. No evening classes are held at the College.

The teaching staff consists of eight Professors, five Lecturers, and ten Assistants, and the subjects of instruction are—Chemistry, Physics, Mechanical Engineering, Agriculture, Mathematics, Zoology, Botany, and Geology. The Professors and Lecturers of the College constitute the College Council, which is presided over by one of the Professors, who is called the Dean of Faculty. The functions of the Council are to advise the Department on educational matters connected with the College. The salaries of the Professors range from £600 to £700; of the Lecturers, from £350 to £450; and those of the Assistants average £130 per annum. There is a Registrar, who is responsible for the administrative and clerical work of the College. All appointments in connection with the College are made by the Department of Agriculture and Technical Instruction for Ireland.

The Albert Agricultural College, Glasnevin, which is also under the control of the Department, is used in connection with the instruction in Agriculture in the Royal College of Science, and measures have been taken for the correlation of this instruction with that given at the Albert College, and also with the work of the Royal Botanic Gardens, Glasnevin.

The College is maintained by an annual Parliamentary Vote, the students' fees being appropriated in aid of the Vote. In the year 1905-6 the cost of the College to the State (exclusive of the cost of maintenance of buildings, furniture, lighting, stationery, printing, etc., which is defrayed by the Board of Works and the Stationery Office) was, approximately, £17,000. The fees payable by Associate students are: £15 for the first year; £20 for the second year; and £20 for the third. These fees cover attendance at all lectures and laboratory and workshop courses, as well as the use of the College apparatus and materials. For non-associate students the fee for any course of lectures is £2, while for such students the fees for practical courses vary from £2 for a special course of one month, to £12 for the entire session.

Special provision is made at the College of Science by means of Scholarships, short Summer Courses, and otherwise for the training of teachers in Science and Technological subjects and in Agriculture. The scheme of Scholarships comprises Science and Technological Scholarships, which are of the value of £50 per annum, in addition to exemption from the payment of class fees during the Associate Course and allowances for railway fare; and Scholarships for students in Agriculture, which include free admission to the first year's Course in the College, board and maintenance at the Albert Agricultural College, Glasnevin, and other allowances. A teachership-in-training entitles the holder to free instruction during the Associate Course, a maintenance allowance of 21s. per week during the session, and certain railway fares. Four Royal Scholarships of £50 each, for two years, with free tuition, are also attached to the College, and two are offered for competition each year to students of the College, not being Royal Exhibitioners or holders of other Scholarships, on the completion of their first year's course. Certain other Scholarships and exhibitions, such as "Royal Exhibitions" and "National Scholarships," which are open for com-

petition at the annual examinations of the Board of Education, South Kensington, are tenable at the College. Medals and prizes are also awarded.

During the Session 1905-6 twenty-three students qualified for the Diploma of Associate. The average number of students (including non-associates) who attended the College during the five years from 1901-2 to 1905-6, was 123. No official information is available as to the religious persuasions of the students, but it is understood that about 50 per cent. are Roman Catholics.

Short Summer Courses of Instruction for Teachers are held at the College, amongst other centres, during the summer vacation, and are designed to enable teachers of Experimental Science under the Department's regulations to gain additional knowledge and skill, and improve their general efficiency. The Summer Courses held at the College during the present year were attended by 162 teachers.

Further particulars regarding the courses, curriculum, and fees of the College, and other matters, will be found in the programme for the current session, a copy of which is appended.

The work of the Royal College of Science has for many years been seriously hampered by the inadequacy of the space available in the existing College buildings. The need of a larger and more appropriate building had been generally recognised even before the extension of the scope and work of the College which has taken place since the establishment of the Department of Agriculture and Technical Instruction. In 1898 a Departmental Committee was appointed by the Board of Education, South Kensington, to consider this question, and that Committee recommended that a new home for the College should be provided. Provision was at length made for the acquisition amongst other things of a site, and the erection and equipment of new buildings for the College, by the Public Offices Site (Dublin) Act, 1903. The cost of purchasing the site and of building and equipping the new College will be, approximately, £203,000. The new buildings have for some time been in progress under the direction of the Commissioners of Public Works on the selected site, adjoining Upper Merrion-street. These buildings will, it is hoped, afford sufficient and satisfactory accommodation for the work of the College. They will be fully equipped for the work of the several Faculties. A Mechanical Engineering Laboratory will form an adjunct to the main structure. The superficial area to be provided for each of the branches of the College is as follows:—

	Area in Superficial Feet
Electrical Engineering,	14,104
Physics,	9,207
Applied Chemistry,	21,785
Geology and Mineralogy,	3,000
Zoology,	2,520
Botany,	1,852
Mathematics,	2,000
Agricultural Botany,	2,370
Agriculture,	5,130
Agricultural Chemistry,	4,200
Bacteriology,	3,100
Library,	2,770
Lavatories, Cloakrooms, etc.,	4,726
Space used for general purposes,	4,180
Rooms to be used jointly,	2,500
	<hr/>
	83,444
Corridors,	16,038
	<hr/>
Total,	99,482

exclusive of areas, wells for lighting, lifts, etc.

The approximate area of the basement, ground, and first floors of the proposed Mechanical Engineering Laboratory will be 9,100 superficial feet, in addition to a yard space of about 900 superficial feet.

With regard to the question of the relations which might be established between the Royal College of Science and the University system of the country, evidence was given on this point by Mr. Gill, Secretary of the Department, before the Royal Commission on University Education in Ireland (see Appendix to the Second Report of the Commission, Cd. 900), and with the views then expressed by Mr. Gill the Department are in agreement. There is practically no difference in principle, and there would be little difference in detail, between the arrangement then suggested and the recommendation of the Royal Commission that the Royal College of Science should have the rank of a University College in the event of the creation of a federal teaching University. The Department are strongly desirous that the College should be connected with the University system, and whether the system to be ultimately established is to take the form of a single federal University for all Ireland, with constituent Colleges, or whether there is to be more than one University in the country, they feel that it would be practicable to arrange for an effective connection of the kind in either case, and that such an arrangement would be of great advantage to the University system in Ireland as well as to the higher technical instruction which it is the special function of the Royal College of Science to provide.

II.

Statement with reference to Trinity College and the University of Dublin, drawn up by the Committee appointed by the Conference of the Methodist Church in Ireland.

The above-mentioned Committee was appointed by the Annual Conference of the Methodist Church in Ireland, sitting in Belfast in June, 1906, to consider the reply which should be given, on behalf of the Conference, to the request of the Royal Commission on Trinity College and the University of Dublin for any observations which the Conference might desire to make as to the place which these institutions now hold as organs of the higher education in Ireland, and the steps which should be taken to increase their influence.

The Committee assumes that it would be desirable that any suggestions offered by it, on behalf of the Methodist Church, should have special reference to the requirements of that Church in relation to Trinity College and the University of Dublin. In the following brief statement, the Committee does not, therefore, touch on the larger questions involved in the various schemes which have been put forth from time to time for the settlement of the University question on lines involving important changes in the constitu-

tion of Trinity College and of Dublin University. The Committee merely confines itself to submitting a few suggestions, the carrying out of which it is believed would be of much assistance in enabling Methodist students to avail themselves, in much greater numbers than heretofore, of the educational advantages offered by Trinity College.

(1.) In the first place, it has long been a matter of regret to many members of the Methodist Church in Ireland that the fees for the ordinary Arts Degree are much too high for the average middle-class student, to which class the great majority of the members of the Methodist Church belong. In the Committee's opinion, £85 is far too high a minimum fee for the Arts' course alone, exclusive of any of the Professional Schools (except the Divinity School). When the cost of books, together with other necessary expenditure, is taken into account, it will be seen that the expense of taking even a Pass B.A. degree is almost prohibitive, except to the wealthy and to some members of the middle class, and in the comparatively rare cases where a student by his ability wins substantial money

LI.

prizes. The Committee is convinced that if the University is to become more useful to the country at large one of the most urgently needed reforms consists in a considerable reduction of the fees. It would suggest that in the case of those students who are able to attend lectures in the College, the fees should be reduced to, say, £30. It would suggest also that the present arrangement, by which extern students who take out their degree exclusively by examinations, without attendance at lectures, are charged the same high fee as if they attended all the lectures, and were thus able to take full advantage of the teaching of the Fellows and Professors, be altered so as to allow these extern students to pay a fee considerably lower than that charged to those students who can attend lectures.

It is, perhaps, needless to remark that the Committee is fully aware of the great benefits to be derived by students from residence at a University, from attendance at its lectures, and from the many influences of collegiate life. There are, however, many students engaged during the day-time in commercial offices, in the Civil Service, in the teaching profession, &c., to whom not only residence in the University, but even attendance at its lectures, are unattainable privileges. They must become extern students of the University, or else not enter the University at all. It must also be borne in mind that these extern students have to pass many more examinations than the intern students.

The Committee, for these and other reasons, trusts that one of the recommendations of this Royal Commission may be in favour of a very considerable reduction of the fees charged by Trinity College, both for intern and extern students. While, as already intimated, fully in agreement with those educational authorities who wish to revive the old academic idea, and diminish, as far as can reasonably be done, the number of extern students, the Committee thinks this desirable object would be much better attained by the suggested reduction of the fees for lectures, and by other inducements, such as a more generous system of bursaries. The total abolition in Ireland of the class of extern University student, the Committee regards as an impracticable policy, for, at any rate, a considerable time to come; and one which would operate most unfairly in tending still further to limit the advantages of University education to the wealthier classes. It would also tend to exclude women from taking a University course. If it were considered desirable a different form of Certificate of Degree could be given to extern students from that granted to intern students. As a good deal of evidence on this important matter was given before the Royal Commission on University Education in Ireland, it is unnecessary to dwell further upon it here.

(2.) Next in importance to the need for reduced fees comes, in the Committee's opinion, the necessity for a much more representative governing body than the Board of Trinity College as at present constituted. Without venturing to go into details, the Committee would propose, in general terms, that some arrangement should be made for extending the power of the Senate, and making it the supreme governing body of the University as distinct from Trinity College. The Commission will doubtless receive a considerable amount of evidence under this head. The pressing need for some such change has been long apparent, and has been urged by many holding responsible positions in Trinity College. The existing constitution and powers of the Board are entirely anomalous, and are a cause of constant dissatisfaction.

(3.) The Committee would suggest that a Methodist Dean of Residences be nominated each year by the Methodist Conference, subject, of course, to the approval of the Senate of the University of Dublin, and the Board of Trinity College. The duties of the Dean of Residences would be to look after, as far as possible, the religious and social welfare of the Methodist students resident in the University, or whose names are on its books. He should be *ex-officio* a member of the Senate or other governing body of the University. The Committee does not believe that there would be any difficulty in the way of such an arrangement, which would be an advantageous one from many points of view, and would be in the best interests of the Methodist students.

(4.) The Committee would also propose that a system of Catechetical Lectures for Methodist students should be instituted on somewhat similar lines to those recently arranged for Presbyterian students in the University.

The above is a brief summary of the views of the Committee as to the direction in which steps might be taken to place the advantages of Trinity College and the University of Dublin more within the reach of Methodist students in Ireland. It has not been thought necessary to nominate a witness to give oral evidence before the Commission, as the views of the Committee on the subject are, it is believed, sufficiently indicated above.

Statement submitted by a Committee of Irish Catholic Laymen.*

I.—RESOLUTION ADOPTED BY THE COMMITTEE OF CATHOLIC LAYMEN, AT A MEETING HELD ON THE 21ST SEPTEMBER, 1906.

(AMBROSE MORE-O'FERRALL, Esq., D.L., in the Chair.)

It was proposed by Mr. COMMISSIONER LYNCH, seconded by R. F. TOBIN, Esq., F.R.C.S.I., and resolved:—

"That this Committee approve of the statement now read, and request our Hon. Secretary,

Mr. Nicholas Synnott, to forward it to the Royal Commission on Trinity College and the University of Dublin, and request him to appear before that Commission and give evidence on our behalf in relation to the several matters set forth in said statement."

II.—STATEMENT OF THE COMMITTEE OF CATHOLIC LAYMEN.

(Referred to in the foregoing Resolution).

In response to the invitation of the Royal Commission, the Committee beg to furnish the following statement of their views "as to the place which Trinity College, Dublin, and the University of Dublin now

hold as organs of Higher Education in Ireland, and the steps proper to be taken to increase their usefulness to the country."

* The oral evidence given on behalf of the Committee will be found at page 83.

Appointments and Objects of the Committee.

This Committee was appointed at a meeting of Catholic laymen, held in Dublin on the 6th of March, 1902, the late Sir Gerald Dease, D.L., being in the chair.

Certain resolutions were then adopted, and steps were taken, to present to the then sitting Royal Commission the views of Catholic laymen, who, in the words of the first resolution, "supported a solution of the 'University Question on the lines of Collegiate Education within the University of Dublin.'" These resolutions, the names of the committee appointed, and the "Statement" presented to the Commission, signed by over four hundred laymen, are to be found in the proceedings of the late Royal Commission, Vol. III., Appx. pp. 581-585.

The following gentlemen were subsequently added to the Committee; the Right Hon. The MacDermot, K.C. (now deceased); R. O'Shaughnessy, C.B., M.V.O.; George Ashlin, M.B.I.A.I., and Andrew Horne, M.D., F.R.C.P.I.

To explain the action and attitude of the Committee, it is necessary to observe, that the terms of reference to the late Royal Commission were apparently drawn up after private negotiations between the authorities of the Royal University and the Government; at any rate, no steps seem to have been taken to ascertain the opinions of the Irish members of Parliament, or of the general body of either Catholics or Presbyterians, as to the proper scope of the inquiry.

The proceedings of the Commission were held in private, and until the publication of the first volume of the evidence, it was not known that Trinity College and the University of Dublin had been ruled to be outside the scope of the inquiry, and that the Commission were practically limited to the alternatives of recommending, either a separate University for Catholics, or a college for Catholics under a reorganised Royal University; nor was it known that a certain number of witnesses, (some of them professing to speak for Catholics in general, had urged the Commission to adopt one or other of the last named solutions, as the best and most acceptable to Catholics.

It was felt that there was a large body of Catholic laymen who did not share the views so put forward, and as no attempt was made to ascertain their opinions, and as no opportunity was given for expression of them before the Royal Commission, the meeting was held, and the action taken by this Committee, as above-mentioned.

The Late Royal Commission and the Action of this Committee.

In spite of the formal ruling of the Commission, certain independent Catholic laymen—the late O'Connor Don, the Lord Chief Baron, and others, had been allowed to express their views, that a college for Catholics, within the University of Dublin was preferable to either of the other solutions suggested, and it was pointed out that whilst Trinity College was excluded from the terms of reference, the University of Dublin was not; and accordingly this Committee and the signatories to the Statement which was forwarded to the Commission, considered that by taking action they might induce the Commission to reconsider their ruling, or they might succeed in getting the terms of reference extended. The Committee also considered that it was impossible to deal thoroughly with the question of how to render "University Education adequate to the needs of the Irish people," if the one teaching University in Ireland, and its college, were left out of sight, and they felt that by their statement and protest, they were, at any rate, helping to keep the door open for the solution which they favoured, namely "Collegiate Education within the University of Dublin."

It is important to remember that at the time referred to, no proposals had been brought before the Commission, and none, by any imaginable rendering of its original terms of reference, could be brought before them, to alter the constitution of Trinity College and the University of Dublin, or by other changes, render them acceptable to Catholics.

Such a proposal as has been made within the last few months to the present Royal Commission, by a number of Fellows and Professors of Trinity College, was not only forbidden ground for the late Commission, but at the time was hardly thought of as possible.

The proposals made by the Board of Trinity College privately to Cardinal Cullen in 1873, and to Cardinal Logue in 1903, were made and rejected, before the Catholic Body had any knowledge of them, and neither of these proposals, nor those made by the Board in 1901 in reply to a requisition by the Junior Fellows, included any modification of the constitution of the Board of Trinity College, or any plan for giving to Catholics representation on the Board.

When, therefore, the signatories to the statement submitted to the late Royal Commission, declared that "they were strongly of opinion, that of the various proposals submitted to the Royal Commission," the best was a college for Catholics within the University of Dublin, they meant simply what they said, i.e., that such a college was better than either of the other solutions then propounded, namely, a separate university, or a college within the Royal University.

The Committee and the signatories did not attempt to anticipate history, nor to express an opinion on proposals not then before them, or before the sitting Commission.

The Committee adhere to the view expressed by them four years ago, that a solution of the question by means of a college under the Royal University, or by a separate university for Catholics is not the best, and they contend that Catholics are entitled to claim the best.

The long course of inquiry before the late Commission, their Report, and the *addenda* by individual Commissioners, in spite of the artificial limiting of their inquiry, all pointed in the same direction, viz: that neither of the solutions above referred to was the best; and this Committee were in hopes that neither of these solutions would be again brought forward, as a reasonable and practical fulfilment of Catholic claims.

These plans have however been revived, and as the relative importance to be assigned to them, bears indirectly upon the question, on which this Committee has been asked to express their views, the Committee submit the following reasons for advocating collegiate education in a reformed and adapted university in Dublin, in preference to a solution by means of a separate university, or of a college in the Royal University, for Catholics.

Reasons for looking for a solution in the University of Dublin and rejecting other Schemes.

(1.) The late Royal Commission rejected, (practically unanimously) the plan of a separate university for Catholics, and in the face of this rejection by a body of experts, the lack of precedent for such a university in other countries, and the well-known feeling in the country and Parliament against new denominational endowment, we feel that such a solution is practically unattainable.

(2.) There is neither need or material for two residential teaching universities in Dublin, nor do the circumstances of Ireland, or her population, justify the unusual plan of the duplication of universities in one city.

(3.) Without proved necessity, multiplication of universities is, from the point of view of State endowment, supply of buildings and equipment, demands on Professors, etc., wasteful and uneconomical, and may be educationally injurious, by lowering the standard of examination and of teaching, owing to competition with the view of attracting students.

(4.) A separate university for Catholics would not give Catholics that equality which they claim, inasmuch as the degrees of a new Catholic university would not, (as the late Royal Commission found) "pass current in the market of life as compared with degrees conferred by institutions resting on a broader basis." It is certain that the value of such degrees would not compare, (especially out of Ireland) with those of a reformed University of Dublin, strengthened by a large accession of students.

(5.) Unless such a separate university were frankly denominational in the composition of its governing body, teaching staff, and students, and in its educational programme, it would not answer the avowed purpose of those who support it. On the other hand, it is certain that any such division of students, professors, and educational aims, on denominational lines, would tend in Ireland to strengthen and perpetuate those prejudices, based on creed differences,

DOCUMENTS.
SECTION
LII.

which the great bulk of Catholic laymen, and certainly those for whom the Committee speak, ardently desire to abate; a result which will be promoted, by enabling students of different creeds to associate together at the critical period preceding manhood, when opinions are shaped and matured, and friendships are formed. There is, of course, no difference of opinion as to the importance of providing for the due observance of religious exercises, and of providing efficient security against the possibility of tampering with the faith of Catholics.

(6.) It is impossible to ignore the fact, that students of different religions, including clerical students, frequent the public and State Universities in other countries, with apparent advantage to themselves educationally, without injury to their religious belief, and with the consent, if not the encouragement of the ecclesiastical authorities. All the information before the Committee seems to prove, that from this system of University education in common, flow—increased religious concord—the opening up of professional and other careers without regard to religious differences, strengthening rather than weakening of belief, and attention to, rather than neglect of, religious observances. In Germany, especially, it is found that so far from making Catholics weak in faith, or remiss in practice, this system of university education in common, has developed a lay body united, courageous, and energetic, in the support of their religion; moreover, nowhere is Catholic literary work more original and productive than in Germany, and nowhere is to be found a clergy more learned, pious, and devoted to their duties.

(7.) It has been pointed out that in England and Continental countries, where there is a mixed population of Catholics and Protestants, the Catholic Ecclesiastical Authorities* recognise a distinction, both in principle and practice, between primary and higher education, in respect of the association of students of different creeds; and this Committee express a strong hope that the Royal Commission will obtain direct evidence on this point, and also on the point mentioned in the last paragraph, as to the conditions, methods, and results of the intermixing of students of different religions in English and foreign Universities, and of the facilities given for dogmatic teaching.

A separate College under the Royal University.

In comparison with a properly devised scheme of collegiate education within the University of Dublin, we consider that the plan of a new College for Catholics in the Royal University, is neither an adequate nor a final solution. Many of our objections to such a plan are covered by our previous remarks. Other disadvantages may be briefly summarised. As the Royal Commissioners themselves unanimously reported, (Report, p. 37)—“The proposal now under consideration has received no support from any Roman Catholic witness except as something which might be taken in the meantime, in default of better things.”

Before the Commission issued its Report, His Grace Dr. Walsh, Archbishop of Dublin, in a published pamphlet†, denounced the proposed scheme of a College under the Royal University as a “makeshift scheme,” a “temporising plan,” and “just the one possible form of dealing with the University question, which has never received support or countenance from the Bishops.” Dr. O'Dwyer, Bishop of Limerick, pointed out that it would not give equality. “Episcopalian Protestants would,” he said, “have their own University system complete within itself, whilst we should be put off on a mere College in a second-class University.” (Vol. I., R.C., p. 30.)

The objection to the Royal University plan was well summarised by another important Catholic witness. “Are we to then,” he said, “to affiliate with the Royal University, for a temporary and undefined period, this new College, with the certain anticipation that a change in the near future would be inevitable, an anticipation fatal to the rest and calm essential to a College, especially to a new foundation?” (R.C., Vol. II., p. 130.)

A Royal University, however modified, could never appeal to Irish sentiment and tradition. According to the plan proposed, its segregated Colleges, with aims

necessarily divergent, would, as one of the Commissioners pointed out, result in producing College Universities, rather than University Colleges, and, as he remarked, “the degrees of such a University would not be of uniform value, but would vary according to the reputation of the College, in which they had been conferred.”

Dunraven Scheme.

The Government who appointed the Robertson Commission omitted or declined to take up its recommendations, and meanwhile the plan of a College for Catholics within the University of Dublin was unfolded in a letter which appeared in the Press, over the signature of Lord Dunraven, on the 4th of January, 1904.

It was currently stated and believed that the Government proposed to propound such a plan, and there was no official contradiction of the rumour.

Resolutions in favour of this scheme, i.e., that of a second College under the University of Dublin, were passed at many meetings. It was stated that the Catholic Bishops had agreed to it, and on the 15th January, 1904, this Committee adopted the following resolution:—

“This Committee, representing the signatories to the Statement of Catholic Laymen of Ireland, presented to the Royal Commission on University Education, approve of the scheme outlined in Lord Dunraven's letter, published on the 4th January, 1904, and consider that it offers a satisfactory basis for the settling of the Irish University Question.”

This was only a skeleton scheme, as outlined, and although in several respects, in the opinion of the Committee, it needed amendment, it was taken as the basis of settlement of a claim for which Catholics had been pressing for two generations without avail.

In its general features it corresponded with the plan advocated by the Committee, its aim being to provide for Catholics collegiate education within the University of Dublin. It was now generally supported by Catholic opinion, and, rightly or wrongly, we treated it as the scheme which the Government intended to bring forward and press through Parliament, and we hoped that a Bill would be at once introduced to carry it into effect. This hope was not realised. The scheme was never submitted to Parliament. Its details were never published. It was understood that in Trinity College strong opposition had been threatened, if the Dunraven scheme were persisted in. The Dunraven scheme had powerful enemies; the scheme of a separate college under the Royal University had no friends; and so the University Question was once more at large.

The Committee did not lose heart, but endeavoured by every means in their power to keep alive public interest in the question of University reform for Ireland.

On the 23rd November, 1905, they passed the following resolution:—

“Inasmuch as the authorities of Dublin University claim that it is the National University of Ireland, and that it is wholly unsectarian, although the governing body of Trinity College—its sole college—consists exclusively of members of the Protestant Episcopal Church, and the authorities of that sole college claim that it is wholly unsectarian, although they at the same time insist upon the retention of the Divinity School, for the education of the Protestant Episcopal clergy exclusively, as an integral part of such college.

“And as the majority of Irish Catholics have, on conscientious grounds, been hitherto, and are still, debarred from entering Trinity College.

“And as on the governing body of that college no creed is represented save that of the Protestant Episcopal Church, whose members form only thirteen per cent. of the population of Ireland.

* See Instructions to Parents, Superiors, &c., by the Archbishop and Bishops of the Arch-Diocese of Westminster, 1896.

† Trinity College and the University of Dublin, see pp. vi. and vii. and 42, Appendix to Final Report of Royal Commission, Document VI., pp. 28-30 and p. 37.

"And as under existing conditions there is no prospect of Irishmen other than members of the Protestant Episcopal Church securing within any reasonable time an adequate representation on such governing body, because

- (a) "It consists exclusively of Senior Fellows; and because,
- (b) "An average period of from thirty to forty years has hitherto elapsed between the date on which a candidate has, by examination, won a Junior Fellowship, and the date on which he has by seniority attained to a Senior Fellowship; a state of things which has in nowise been amended by the passing of Fawcett's Act, 1873, although the preamble to that Act recites that 'it is expedient that the benefits of Trinity College and the University of Dublin, and of the schools in the said University, as places of religion and learning, should be rendered freely accessible to the nation.'

"And as Trinity College was expressly excluded from the scope of the last Royal Commission on Higher Education in Ireland,

"Resolved—That in the interest of the whole Irish community it is imperative that, either by a Royal Commission or by other effective means, an inquiry should be forthwith directed by His Majesty's Government with a view of testing how far the University of Dublin and its sole college, Trinity College, have provided, or are capable of providing, higher education for Irishmen adapted to the needs and circumstances of every denomination."

On the 1st March, 1906, they passed a further resolution calling for this inquiry, and expressing their satisfaction at finding that the Irish Party in Parliament intended to press for the appointment of a Royal Commission.

In the month of July, 1906, a number of Catholic laymen signed the following statement:—

"We, the undersigned Catholic laymen, desire to place on record our conviction that no solution of the University difficulty in Ireland, based upon Trinity College being constituted as the sole college of a National University, can be accepted as satisfactory so long as it fails to provide for:—

- (a) "A substantial representation, from the start, upon the governing body, with a power of expansion of such representation dependent upon, and fairly proportionate to, the number of students whom Catholics send into the college, and the academic distinctions which they may there win.
- (b) "The establishment of dual professorships in, at least, Mental and Moral Science, and in History.
- (c) "The religious instruction of our students by clergymen of our own Church.
- (d) "The establishment of a Faculty of Catholic Theology on terms of full equality with those enjoyed by Protestants.
- (e) "The establishment of a chapel for our students within the college.
- (f) "The creation of a council or other body to secure the practical efficiency of the safeguards provided for our students in religion, faith, and dogma."

The Committee did not take any part in framing this statement, nor did they try to procure signatures to it, but, as they considered that its terms came within the scope of the policy which the Committee was appointed to promote, they approved of the statement, and directed their secretary to forward it, with the signatures attached, to the Royal Commission, in whose hands the paper now is.

At the end of July, 1906, a proposal signed by certain "Fellows, Ex-Fellows, and Professors of Trinity College and the University of Dublin," was lodged with the Royal Commission. This document set forth the heads of a proposed settlement of the University Question in Ireland, on the assumption that Trinity College was to continue to be the only college of the

University of Dublin, but that it was to be so modified in its government and system of studies, as to meet the Catholic claims in respect of University education.

The presentation of this document at once altered the position of the parties to the controversy, relating to these claims. It introduced into the calculation a new factor which no one had anticipated. The scheme of a second college under the University of Dublin became, not the only solution worthy of consideration, but an alternative solution, worthy still of full discussion, but bound to be inquired into by comparison with another, also worthy of close investigation.

The Committee wish to guard themselves against the supposition that they are in hostility towards any scheme of a second college within the University of Dublin, which may be propounded before the Royal Commission.

The Committee feel that they cannot profitably support or oppose the solution by means of a second college under the University of Dublin, until they know, among other things, what constitution is proposed for the governing body of such new college, and of the University which is to connect it with Trinity College; what colleges other than Trinity and the new college are proposed to be included under the University of Dublin, and what are to be the powers of the governing body of each college, and of the University, respectively.

All that the Committee at this stage can do, is to set out certain conditions which seem essential in order to give to the "Second College Scheme" a reasonable chance of success. These are as follows:—

1. Effective academic government of the new college, and of the University.
2. No religious test for students, professors, or officers of the college or University (other than chaplains and professors in subjects for which dual chairs are to be provided).
3. The sole right of appointing or dismissing the teaching staff (other than those just excepted), or officers of the college, be vested in the governing body of the University or the college, as the case may be.
4. Joint examination for degrees and standard of studies to be under the University Governing Body.
5. As far as possible, faculties and courses of study in secular subjects, and all connected equipment, to be under the University, and common to the colleges.
6. Residence for a fixed period to be necessary for obtaining degrees.
7. General regulations to encourage, and not discourage, the association of students of the separate colleges, outside their studies, in societies, sports, and leisure pursuits.

It seems to us, that all the advantages to be derived by Catholics, from the solution based upon a two-college scheme, within the University of Dublin, could equally well be secured by a solution based upon Trinity College being the sole college of Dublin University, and that this latter solution may have this further and great advantage, that it may be proved to be more attainable, i.e., that it may not alone recommend itself to the Royal Commission as a reasonable solution, but that it may afterwards recommend itself to the Government of the day as feasible, and as one which, if put forward in a Government Bill, would have a fair chance of passing through both Houses of Parliament without substantial opposition.

Without saying that the proposals brought forward by certain Fellows, Ex-Fellows, and Professors of Trinity College and the University of Dublin should be accepted as they stand, we may affirm that the principles recognised in these proposals afford a basis for the solution of the question, including, as they do, among others, the principle, that, while ultimately the governing body must be purely academic, some expedient must, for the present, be adopted which will provide equitable representation for Catholics on that body.

Statement submitted by the Catholic Defence Society.

11, LOWER DOMINICK-STREET,
November 1st, 1906.

SIR,

In response to the advertisement asking for criticism on the published statements submitted to your Commission, we beg to submit :—

1. That in any settlement of the Irish University question we protest against the unification of Universities.

That we demand a Teaching University, and not an Examining Board.

(a) In all the solutions proposed there appears to be *a priori* an injustice to Catholics. We seek Equality. We do not seek to invade the rights of others ; but we question the origin and justification of their exclusive claims to privileges. We will regard nothing as finally satisfactory which does not afford this equality.

(b) The whole force of considered opinion seems to be opposed to the unification of Universities. In England we have never seen the stagnation produced by a single National University. In Ireland in "pre-Reformation" days there was not any such. Coming to later times, we quote to support our contention a pamphlet (published in 1868) of the Rev. Samuel Haughton, Fellow of Trinity College, Dublin :—

On page 13 he says—"In France we see the perfection of centralization and identity in the lyceums and colleges of the entire country. In Germany, on the contrary, we witness the full development of the ancient collegiate idea of the University. Twenty-seven distinct centres of education exist amongst forty million, each possessing its own type of excellence to attract students.

"All who are acquainted with the present condition of Science and Letters will be disposed to agree in thinking that the intellect of France is cramped by the imperial cradle, while the genius of Germany is fostered by such excellent, though diverse, centres of development as Vienna, Munich, Heidelberg, or Berlin."

We refer also to a pamphlet of Lyon Playfair, M.P. for the Universities of Edinburgh and St. Andrews (3rd Edition), 1873. The pamphlet is entitled, "On Teaching Universities and Examining Boards," with special reference to Irish education. Therein he argues against the term "University" being regarded as synonymous with "Examining Board." We submit a few quotations from it :—

"From the very earliest days," he says on page 5, "the teaching and examining functions of Universities have been united." On page 7 he goes on to say—"France has completely separated the two functions, and its University forms an excellent study for those who would advocate a State interference with University Examinations." "The unanimity is surprising with which eminent men ascribe the intellectual paralysis of the nation to the centralisation of administration and examination by the University of France."

He quotes Dumas—"If the causes of our marasmus appear complex and manifold, they are still reducible to one principle, administrative centralisation, which, applied to the University, has enervated superior instruction." And, again, Renan—"The system of examinations and competitions on the great scale is illustrated in China, where it has produced a general and incurable senility. . . . We must create in the provinces five or six Universities, each independent of the other."

Playfair goes on to argue that efficient graduation is compatible only with a well-ordered curriculum of study, and that where examination alone is the test, "the students content themselves with learning their note-books by heart," and the Professors have to conform to a uniform programme, and thus by degrees "routine stifles initiative and the genuine spirit of research."

We might multiply quotations from this admirable pamphlet. We will, however, content ourselves with this—"A combined University, when well conducted, aims at producing an *educated* man ; an Examining Board can only be assured that it has produced a

cramped man. It is the curriculum, not the examination, which educates the man."

(c.) A single University in Ireland would afford no variety of standards for comparison, and would take away the friendly rivalry which, when removed from competition, is very serviceable to all University life. Further, Ireland is a poor country ; and in a poor country education should be brought to the doors of those who need it. A great University in a metropolis will never by itself serve all the country ; and there is no reason why one portion of the country should be served to the prejudice of the remainder.

(d.) We refer the Commissioners to the following Resolution, passed unanimously, at the Meeting of the Senate of the Royal University of Ireland, on the 25th October, 1906 :—

"That in the judgment of the Senate of the Royal University, it would be disastrous to the interests of education in Ireland, and gravely injurious to the welfare of the country, to concentrate the control of higher education in one University."

This motion was proposed by the President of University College, seconded by the Most Rev. Dr. Healy, Archbishop of Tuam (who, no doubt, spoke with the approval of the general body of the Hierarchy), and fully discussed by the Senators present, at one of the most representative meetings of the Senate, whereat all parties were well represented.

II. The proposal to modify Trinity College, so as to make it acceptable to Catholics, we regard as impracticable in the extreme ; even if it were practicable, we regard it as undesirable.

The signatories to the statement of "Certain Irish Catholic Laymen, etc.," represent not even all who have signed, and certainly cannot be regarded as representative of the general body of Catholic lay opinion. Many signed (some have even protested their signatures) on account of the inducements held out to them, and without personally considering the matter. Not one Catholic representative body has endorsed this statement, and many have protested strongly against it.

III. In the Royal University of Ireland, defective as it undoubtedly is, Catholic Graduates have been trained to a high standard. This especially applies to those candidates who were trained in Colleges, such as University College, Dublin ; University College, Blackrock ; Loreto College, Dublin ; St. Patrick's College, Maynooth ; Holy Cross College, Clonliffe, etc., and who, having attended regular lectures and kept terms in their respective Colleges, under suitable teachers, have proved successful in examinations of a searching nature. Such students have received high benefits from the Royal University, notwithstanding the fact that it is not, in the full sense, even for them, a teaching University.

It would be a misfortune that such students should enter any University, reformed or otherwise, whose standard is lower than that to which they have been accustomed.

As regards the inferior standard of Trinity College, Dublin, it will suffice to refer to the statement of Miss White, LL.D., of the Alexandra College (p. 135). We know of the case of a successful student in Trinity this year whose highest mark elsewhere was 7 per cent.

IV. Catholics have long been accustomed to the unconscious but offensive tone of superiority which pervades all the non-Catholic testimony on any subject in which Catholics are concerned. This tone we regard as an obvious proof of the unsympathetic, or antipathetic, attitude towards Catholics of those who use it. The College of which it is a characteristic is no place for Catholics. All through the non-Catholic statements we have the same pretentiousness, the same overbearing manner, and the same tone of ascendancy. Some persons wonder why Catholic will not enter Trinity College. Let them read the statement of the Rev. J. W. Barlow, M.A., S.F.T.C.D., Vice-Provost of Trinity College, Dublin. It will serve to illustrate the tone we refer to. The mere fact that such a man holds a high place in Trinity College sufficiently characterises both the College and the man. If any

further proof were needed of the tone to which we refer, it will be found by perusing a recent book of the Rev. Dr. Hogan, of Maynooth College, or by a study of Professor Tyrell's sonnet, and his defence of it. Dr. Traill's evidence, as elicited by Archbishop Healy at the previous University Commission, bears on this point too.

Finally, to sum up our views and criticisms, we object—

(a.) To the reduction of the Universities of Ireland to one.

(b.) To the solution of the University difficulty by any kind of single-College scheme in Dublin University.

(c.) To the statement of "Certain Irish Catholic Laymen" being taken as representative of Irish Catholic lay opinion.

(d.) To any species of University reform which will lower the standard of educational test and training, to which the Catholic students of the Royal University have been so long accustomed.

(e.) To the offensive tone of the non-Catholic testimony on this whole question, which we regard as proof that Trinity College, Dublin, is no place for Catholics.

And we demand—

(a.) Equality for Catholics.

(b.) A Teaching University of National character.

(c.) A University in which the possibility of growth and expansion shall be provided for.

(d.) That the Examinational standards of Trinity College shall be so reformed as to bring them up to the level of those of the R.U.I., so that Catholics may no longer suffer the injustice of seeing non-Catholics obtain degrees on easier terms in a University endowed so largely with the spoils of Catholic property.

Signed on behalf of the Catholic Defence Society.

PATRICK J. O'NEILL, J.P., Chairman Co.
Dublin County Council, *President*.

P. J. LAWRENCE, *Hon. Sec.*

Statement submitted by certain Presbyterian Graduates of the University of Dublin.

(1.) LETTER FROM D. M. WILSON, Esq., 15, FITZWILLIAM PLACE, DUBLIN.

15, FITZWILLIAM-PLACE, DUBLIN,
27th October, 1906.

SIR,—I have been directed by the Signatories to enclosed Statement of Presbyterian Graduates of Dublin University to forward same to you and to ask you to lay it before the Commission.

I am, yours faithfully,

D. M. WILSON.

To J. D. Daly, Esq., M.A.,

The Secretary, Royal Commission on Trinity
College and Dublin University.

(2.)—PROTEST OF PRESBYTERIAN GRADUATES OF DUBLIN UNIVERSITY AGAINST
"THE STATEMENT BY THE COMMITTEE ON HIGHER EDUCATION OF THE PRESBY-
TERIAN CHURCH."

We, the undersigned Presbyterian Graduates of Dublin University, feel called upon to put on record our strong protest against the "Statement by the Committee on Higher Education of the General Assembly of the Presbyterian Church in Ireland"* submitted to the Commission. The statement is an attack directly and by innuendo upon the Authorities of Trinity College, Dublin.

This attack has been made without any inquiry whatever into the facts. The Committee has not taken the evidence of any of the Presbyterian students who have passed through Trinity College, so far as we have been able to ascertain.

We are informed that the Committee has not even made any inquiry of the Dublin Presbyterian Ministers who have been in the habit of acting as Catechists in the College.

The only member of the Committee who is a Graduate of Trinity College was not even informed that the matter was under discussion, or that it was proposed to put any expression of opinion before the Commission.

The statement we now denounce has been most recklessly put before the Commission as representing the views of the Irish Presbyterian Church on Trinity College.

We now beg to bring before the Commission the real facts of the case.

We have lived in Trinity College and attended the various Arts and Professional Classes. We have been members of the great Societies and Clubs of Trinity College. We have, in short, breathed the atmosphere of the place and are qualified to speak from our own experience. We deny that any Presbyterian student in Trinity College suffers from any inequality whatever, or is at any disadvantage by reason of his religion. We do not believe that there is any Presbyterian student who has passed through Trinity College who would venture to say that there is any

thing in the teaching or in the surroundings of the College that would tend in any way to interfere with his religious belief, or tempt him to abandon the faith of his fathers.

Since Fawcett's Act became law, Presbyterian students, though comparatively few in number, have obtained from time to time almost every prize and distinction in the gift of Trinity College, and have been elected to almost every post of honour dependent on the votes of their fellow-students. The impartiality of the Governing Body is well known among all classes of students, and we protest against the insinuation that any religious body has any reason to doubt the strict impartiality of the authorities. We can each speak from our personal knowledge of the position and treatment of the Presbyterian students, during about seven years respectively since the passing of Fawcett's Act, and we have no doubt that all the Presbyterian students would, if consulted, corroborate our assertions.

Although it is not our present object to do more than correct the lamentable errors of fact contained in the Committee's Statement, we venture to add one observation. We believe that to entrust the government of Trinity College to the representatives of the various religious bodies would prove disastrous to higher education in Ireland.

The only men, in our opinion, qualified to govern a great University are academic men who have won their position by proven scholarship and learning.

Statements submitted by J. Adams, Esq., M.A., Assistant Lecturer, Royal College of Science for Ireland.

(1.)

ROYAL COLLEGE OF SCIENCE,
ST. STEPHEN'S-GREEN, EAST,
DUBLIN, 4th September, 1906.

SIR,—As you have been favoured with various communications on the University Question, perhaps you will be good enough to read the following brief suggestions. Being an Irishman and a graduate of the University of Cambridge, perhaps I am in a position to take a somewhat impartial and comprehensive view of the subject as a whole.

(1.) Regarding the suggestion that there should be one University (that of Dublin) for the whole of Ireland, the whole tendency of the present time is in the direction of local Universities. The creation of new Universities in England in the last ten years is a striking illustration.

(2.) Statistics taken from the most progressive countries of Western Europe show that there is on an average one University for each one and a half millions of the population. On this basis Ireland is entitled to *three* Universities.

(3.) There are three chief centres for the population of Ireland, namely, Belfast for the North, Dublin for the centre, and Cork for the South. The inference seems obvious that these are the natural centres for the three Universities.

(4.) As Belfast is the largest city in Ireland in point of population, according to the census of 1901, exceeding by about 2,000 the combined population of Dublin, Rathmines, and Pembroke townships; and as Ulster contains one-third of the total population of Ireland, it therefore seems desirable that in any proper settlement of the University Question, one University should be allocated to Ulster with its home in Belfast.

(5.) The suggestions which I would respectfully make, therefore, for the consideration of your Commission are:—

That there should be three Irish Universities, namely, those of Belfast, Dublin, and Cork,—the University of Belfast to include two colleges, namely, Queen's College, Belfast, and Magee College, Derry. The University of Dublin to include the following colleges:—Trinity College, University College, Royal College of Science, Alexandra College, Loreto College, and others, if thought desirable, such as University College, Blackrock, and the Catholic University Medical School.

The University of Cork to comprise two Colleges, namely, the Queen's Colleges of Cork and Galway.

Wishing your Commission all success in the settlement of this tangled and long-delayed question,

I am,

Your obedient servant,

J. D. DALY, Esq.

J. ADAMS.

(2.)

21st October, 1906.

DEAR SIR—

With regard to the statement in my letter dealing with the number of Universities in proportion to the population of the countries of Western Europe (that is, excluding Russia and the Balkan States), I beg to submit the following statistics. It will be seen from these that the following conclusions may be drawn:—

(A.)—Of the smaller countries, the most progressive are Belgium, Holland, Denmark, Switzerland, and Scotland. The combined population of these five is 22½ millions, or an average of almost 4½ millions for each country, which is about equal to the population of Ireland. There are twenty Universities for 22½ million people—that is, an average of one University for every 1¼th million of the population. On this basis Ireland would really be entitled to four Universities—one for each province.

(B.)—The total population of all the countries mentioned is 260½ millions, and the number of Universities is 112, or one University for every 2½rd millions of people. On this basis Ireland would be entitled to two Universities—the number she possesses at present. It would, therefore, be a retrogressive step to merge two existing Universities into one, which is the solution implied in the nationalisation of Trinity College.

STATISTICS OF POPULATION AND UNIVERSITIES.

Country.	Population. Millions.	Universities.
Belgium,	6½	4
Holland,	5½	4
Denmark,	2½	1
Switzerland,	3½	7
Scotland,	4½	4
	22½	20
Portugal,	5½	1
Spain,	18½	10
France,	39	16
Italy,	33	21
Austria-Hungary,	45½	10
Germany,	56½	21
Sweden and Norway,	7½	3
England and Wales,	32½	10
	260½	112

DOCUMENTS.
SECTION I.
LVI.

Statement submitted by M. J. Burke, Esq., B.A., M.D.

RATHVILLE HOUSE,
KILTIMGAGH,
22nd October, 1906.

To the Right Honourable Sir EDWARD FRY, P.C., D.C.L., Chairman of the Royal Commission, and Trinity College, and the University of Dublin.

RIGHT HONOURABLE SIR,—When in Dublin recently attending Convocation of the Royal University of Ireland I learned that the Commission on Trinity College now sitting are willing to receive from persons interested in the matter a statement of their views regarding the schemes suggesting changes in the constitution and government of Trinity College and Dublin University. Having taken a life-long interest in this important question of University Education, which I am convinced is in many ways closely associated with the prosperity of the country, I beg to submit the following statement of my views as a Catholic layman, who is sincerely anxious to see the grievances of his fellow-countrymen in this matter at length removed.

I have always favoured the view that these grievances could be more satisfactorily redressed by setting up a second College within the University of Dublin, adequately endowed and equipped for educating the Catholic youth of the country, who are now practically debarred from entering the portals of Trinity College. If this scheme were found to be feasible I have no doubt it would give a large measure of satisfaction to all classes throughout the country, but, considering the matter in all its bearings, and having regard to the long period through which the Catholics of Ireland have suffered a denial of justice in this matter of higher education, I have come to the conclusion that it would scarcely be politic to press this claim just now. At the present time, when the Government is so chary about giving grants for public purposes, I do not think it likely that they can be induced to allocate the large endowment which would be required for a second University College in Dublin when they find that in Trinity College they have already at hand an institution lavishly endowed from public funds, and fully equipped in every respect to do the work from which the second College is sought to be established. I do not think it is probable, or even possible, that while Trinity remains with its magnificent equipment and lavish endowment the Government will consent to provide funds for setting up another College for the same purposes and with the same object in Stephen's-green or any other part of Dublin.

It will then be asked what is the alternative by which the Catholics of Ireland can secure a long-deferred measure of justice in this all-important matter. In this letter I am merely putting forward my own views on the subject, but I venture to assure the Commission that these views will find a widespread acceptance among the overwhelming majority of my Catholic fellow-countrymen throughout the country. Having given some consideration to the various aspects of the question, I have come to the conclusion that a practical settlement can only be arrived at by making use of the existing institutions. I am convinced that our only hope of redress at the present time lies in the development, alteration, and extension of the constitution of Trinity College, so that our Catholic youth may enter its halls without any danger to the faith which is more important to them than any transient educational advantage, and which to many of them is even dearer than their lives. I may say that, personally, I have never been

able to find any sufficient reason for depriving our Catholic boys of the great educational advantage offered to them by Trinity College and the University of Dublin. I could never have been convinced that there was any danger to be apprehended to the religion of any good Catholic who passed through Trinity College, and my impression in this respect is borne out by the role of distinguished Catholic Graduates who went through Dublin University, and in their subsequent careers brought credit to their faith and honour to our native land. At the same time it must be borne in mind that this is an aspect of the question on which we are in duty bound to pay proper attention to the pronouncements of the heads of the Church to which we have the honour to belong, while, at the same time, maintaining the right of the Catholic laity of Ireland to frankly express their opinions at this important juncture in the struggle for justice in University education. I think that the question of providing for young Catholics who may enter Trinity, under its altered constitution, safeguards for their religion which would satisfy the revered heads of our Church ought not to present any insuperable difficulties. For these and other reasons I respectfully beg to submit my view that a satisfactory solution of the question can be arrived at by altering the constitution of Trinity so as to make it a National University (such as has been provided in other countries with the sanction of the Catholic Church), whose halls will be open to all creeds and classes alike, and where the comingling of the Protestant and Catholic youth of Ireland would remove the barriers of class and creed distinction, which have long exercised a baneful effect on the prosperity of the country. I believe that such an institution would succeed in sending forth our young men fully equipped for the battle of life, and also, let us hope, in many cases destined, irrespective of religion or politics, to bring back to Ireland some of the glory which won for her in the olden days the proud title of "The Island of Saints and Scholars."

I firmly believe that this solution of the question would be acceptable to the vast majority of my Catholic fellow-countrymen, and I have no doubt that its result would be to open up a long-delayed vista of hope for the young Catholics of Ireland. If the Commission are good enough to recommend its adoption I am convinced that they will have arrived at a wise, patriotic, and just decision, and one which would do a great deal to dissipate the mists of sectarian bitterness that have too long blighted every honest and united effort for the advancement of the country.

What matter if at different shrines
We pray unto one God,
What matter if at different times
Our fathers won the sod;
Yet fear not, Irish-born man,
We have no hate for you;
We heed not creed nor class nor clan.
If you're to Ireland true.

I have the honour to be,
Your obedient servant,

MICHAEL J. BURKE,
B.A., M.D., M.A.O.

LVII.

Statement submitted by The Rev. E. Clarke.

THE MANSE, STRABANE,
October 30th, 1906.

SIR,

In response to the invitation for comments on the evidence given before the Commission on Dublin University and Trinity College, I beg to offer a few suggestions in support of the evidence given by the General Assembly's Committee on Higher Education. I am strongly convinced that it indicates the direction in which must be sought the settlement of the University question, which will best serve the interests of Higher Education in Ireland.

As a Trinity man I share with all who owe a debt of gratitude to Dublin University the desire that any steps taken may be toward strengthening the position which our ancient University has hitherto held as a seat of learning. And as an Irishman, I most sincerely desire that the advantages afforded by the best available University education should be brought within reach of all classes and creeds, and presented to them under conditions in which all shall be on a perfect equality.

A plurality of Universities on denominational lines must always occasion a sense of inferiority in those who feel themselves precluded by sectarian considerations from sharing in the prestige which a degree from Dublin University will always carry with it; and therefore if justice is to be done to all it will be by so reorganising the internal arrangements of Trinity College so as to relieve it of its denominational atmosphere, and uniting other Colleges on an equal footing with it as the teaching schools of one National University.

Trinity College with its present Episcopalian atmosphere can never be wholly acceptable to denominations other than Episcopalian. Though they may, as to a limited extent they have, resorted to it for the advantages of its academic life, they must necessarily feel that they have a grievance. As a student of Trinity College I shared that feeling. I lived within the walls of Trinity for three years, and had therefore ample opportunity of breathing its atmosphere. I must say that never during my residence there was I conscious of any influence exercised personally by Fellows or Students to induce me to abandon my Presbyterian principles. Methodist students and others who resided within the College have told me that such was also their experience. They were never molested in any way. Nevertheless, the Episcopalian atmosphere is there, and any student who is not an Episcopalian, especially if he has pronounced denominational convictions, must be unpleasantly conscious of it, and must feel that he is, as it were, in a

strange country. He must notice, for example, that it is a rare thing for a minister of his own denomination to be seen inside the College, whilst Episcopalian Bishops and clergymen are constantly in evidence. Then, there is the College Chapel, in which Episcopalian services are held daily, the Divinity School, and the College Theological Debating Society. I would especially draw attention to the substantial advantage afforded by Trinity College to Episcopalian Divinity students over students of other denominations who study in Trinity with a view to the ministry. Episcopalian Divinity students who take their theological course concurrently with their Sophister Undergraduate years, as most of them do, receive their Divinity training absolutely free of any extra fee. And whilst all other degrees conferred by the University are open to students of all denominations the Divinity degree is conferred only upon those who choose to take the Theological Course prescribed by the Episcopalian Church. These are certainly immense advantages which the Episcopalian Church derives from the association of the Divinity School with T.C.D., but they are also a strong ingredient in "the atmosphere," which renders it sometimes peculiarly seductive to Theological students of other denominations, who naturally see in this arrangement an inducement to enter the Episcopalian ministry; and I know one man who entered as a Presbyterian with myself with a view to the Presbyterian ministry who was unable to resist it, and is now an Episcopalian Rector.

For these reasons I strongly support the removal of the Divinity School from Trinity College, and the widening out of the basis of Dublin University (which might include under it other Colleges besides T.C.D.), so as to make it a National University on undenominational lines.

In this reconstruction of our University system it would be desirable to have regard to the claim of Theology as a science. It would greatly detract from the value of a Divinity degree, as compared with other degrees, if it could not be conferred by the University, and therefore, whilst each denomination should provide its own Divinity School, the Divinity degrees should be conferred by the University on courses of study to be approved by the Senate as representing the same standard of work for each denomination.

Faithfully yours,

E. CLARKE,

(Minister of First Presbyterian Church, Strabane).

J. D. DALY, Esq.,
Secretary.

LVIII.

Statement submitted by John F. Harris, Esq., President, "Education Reform Association," Belfast.

DUBLIN UNIVERSITY AND TRINITY COLLEGE.

The impression remains that Trinity College and Dublin University are still the seats of learning for the members of the Episcopal Church. Notwithstanding the disestablishment, the control of the University remains practically in the hands of the members of that body. The alterations in the constitution have been insufficient to make them acceptable to other Protestant denominations and to Roman Catholics, and it is alleged that the high fees are prohibitive for the poorer classes.

The attempts to establish other Universities and Colleges have not been successful, because the unsectarian character was not sufficiently assured, or was grudgingly accepted. At the same time the continuance of a Theological School for the Irish Church in Trinity College remains a grievance and gives an excuse for the Hierarchy of the largest religious body to continue the demand for similar exceptional treatment.

The learning and abilities that it is necessary for the State to recognise are neither Roman Catholic nor

Protestant exclusively, and any institution to assist and honour knowledge, maintained by the public purse, should be constructed without reference to religious beliefs and should be open to every citizen.

In considering the further alterations needed in the constitution and requirements of Dublin University and Trinity College the Commissioners should bear in mind the necessities of this country for science rather than literature, and the desirability that these and similar institutions should become National in usefulness and be governed in accordance with the wishes of the laity.

As a layman with some knowledge of the educational needs of the people, I venture to submit:—

1. That one University, with sufficient number of affiliated Colleges to meet the convenience of the population, would be more suitable than two or three. The value of a degree from one National University would be greater than that of a local or a sectarian University.

- 2 The governing bodies should consist of laymen elected in suitable proportions to represent Science, Literature, Medicine and Law. The constitution should be so defined as to secure the undenominational character of all seats of learning provided by the State.
3. The funds and property of Dublin University and the Royal University should be transferred to the new University, which might be called the "University of Ireland," and which should be given what further assistance may be considered necessary.
4. Trinity College and the Queen's Colleges should become affiliated Colleges of the new University. The Provosts and Presidents should be laymen.
5. Each affiliated College should be open to every person without reference to creed, and should be governed by a Council elected without reference to religious belief by the graduates and local public bodies.

6. Any new College should be constituted on the above lines.
7. The Theological School in Trinity College should be removed with its proper funds. Care should be taken to preserve those funds that were not originally given for sectarian purposes by private individuals.
8. The students from voluntary Theological Schools should be at liberty to present themselves for examination and degrees in the Arts and Sciences same as others, but there should be no examination in Theology and no Theological Degrees from the State University.

Letter received from Redmund Naish, Esq., requesting that his name be withdrawn from a Statement submitted by certain Catholic Laymen for the information of the Commission.

2, Proby Square,
Blackrock,

29th September, 1906.

SIR,

I beg respectfully to request, in reference to the "Statement (July, 1906) of Certain Irish Catholic Laymen in relation to Irish University Reform,"* that it may be noted that I desire my name to be withdrawn from the document.

I am,

Sir,

Your obedient servant,

R. NAISH.

To the Secretary to the Royal Commission on Trinity College, Dublin, &c.

LX.

Statement submitted by Charles A. O'Connor, Esq., K.C.

I am a member of the Irish Bar, King's Counsel, and a member of the Committee of Irish Catholic Laymen.

I am a graduate of Dublin University and Senior Moderator.

I was also, when a student of Trinity College, elected by my fellow-students to the Auditorship of the College Historical Society, which I refer to for the purpose of showing that there was the utmost good fellowship between Protestant and Catholic students, and I look back with pleasure to my college days when I formed many friendships with Protestants as well as Catholics which still endure. But still, being a Roman Catholic, I always felt that in Trinity College I was not part and parcel of the institution, that I was there, so to speak, as a guest rather than as a member of the collegiate family, with the privileges hospitably extended to me as a guest, but without the rights which one feels he has in his own house.

I myself felt no conscientious objection to entering into Trinity College, but knowing the difficulties which those responsible for my bringing up had in allowing me to enter it, I am sure, in fact it is within my knowledge, that for every one Catholic who entered Trinity in my time, there were at least twenty prohibited from doing so owing to conscientious objections on the part of their parents or guardians; and, in addition to those who were so prohibited, there was, as there still is, a large portion of the population who kept aloof from Trinity College, regarding it as an English rather than an Irish institution.

In my opinion the University difficulty is a national as much as a religious difficulty. The people want something which they can call *their own*, and which will be governed by Irishmen with Irish ideas and sentiments.

There may be some difference of opinion whether the best remedy is to be found in establishing a new College within an existing University, or a new University, but there has been a strong expression of opinion by a great number of lay Catholics (many of

whom are University men) in favour of a new College which shall be a constituent College of Dublin University. I entirely support this view. I think that Catholics are entitled to get facilities for obtaining the best degrees which the country can give, and will not be satisfied with any scheme which does not do so.

The degrees of Dublin University, owing to its great traditions, would undoubtedly be held in greater esteem than those of a new University or the existing Royal University. Further, I am anxious that a solution should be found which would have a tendency to draw youths of different religious opinions together. I would hope that if a new College were established within Dublin University, there would be a bond between such new College and Trinity College which would foster friendly associations between the students of both. For instance, I would hope that the debating and literary societies of Trinity College would develop into Unions representative of the two Colleges, as the Oxford and Cambridge Unions represent the several Colleges of the respective Universities, and that the students of Trinity and the new College would meet in common debating halls and reading rooms, and so come to know and respect one another.

In addition, if there be two Colleges within one University, there are certain schools which might, with great advantage, both from the economical as well as the moral aspect, be common to both—such as the engineering, physical science, and law schools.

I do not propose to deal with the details of a scheme for the constitution of the governing body of a new College or a remodelled University, but there is an unanimous opinion among lay Catholics, endorsed by the Irish R. C. Hierarchy, that the governing body should be appointed on strictly academic lines.

CHARLES A. O'CONNOR,

Statement submitted by W. O'Reilly, Esq., D.L.

DEAR SIR,—As I hear through friends of mine that my application to give evidence before your Commission is probably too late, I should be very greatly obliged if I could be permitted to convey to the Commissioners through you the following statement of my views, not only because they are my personal views, but because I have good reason to know that they are shared by the great mass of the Catholic laymen of Ireland.

Of the different suggestions put forward for the solution of the University question in Ireland, I consider that which would make Trinity College the sole national University not only comparatively the worst but intrinsically impracticable and unsatisfactory. In the first place we have had an expression of opinion from the Hierarchy that they would not look with favour upon such a scheme. Whilst not in the least desirous or even willing to allow ecclesiastical authority any undue influence in educational or temporal matters as such, I consider that from their position and experience, the Bishops are well qualified to judge of the effect on the religious beliefs of the young, of certain conditions and surroundings, and the expression of their opinions on such matters should have considerable weight. From what I know of Irishmen it would certainly have such weight, and the vast bulk of Irish Catholic parents would be deterred from taking advantage of the educational opportunities offered to their sons which were discountenanced by the Bishops. Hence any money or trouble spent in this way would be spent in vain, and would leave the question as unsolved and unsettled as it is at present.

In the second place the scheme of education at present existing, and which has existed for centuries, at T.C.D. is not suited to the requirements of the nation. Its leaning has always been towards the classical side of education, or education for the professional classes, whereas it is the industrial and commercial side of education which requires development in Ireland. Hence its system of education would require, to say the least of it, considerable expansion. Its scale of fees would have to be revised and very considerably reduced to bring its education within the reach of those seeking education at the present time.

The government would have to be *revolutionized* to satisfy the legitimate aspirations of Catholics. I call them legitimate because they are the aspirations and the demand, not only of the vast majority of the population, but of the majority of those fitted to profit by a University education. Being in the majority they would consider themselves entitled to a representation of at least a half on the governing body, and if they accepted anything less in the beginning it would probably be only with a view of securing it later on, and in the effort to do so it is likely that educational efficiency might be sacrificed to party requirements.

Two other suggestions hold the field, both of which involve a new College suited to the requirements of Catholics, and therefore either would be acceptable to Catholics as such. One is a new College under the University of Dublin, the other—the Robertson Com-

mission scheme—a new College under a reconstituted Royal University. Of these I should much prefer the latter. It would not disturb existing institutions. It would leave untouched T.C.D., with its government, its fees, its education, and its vested interests. Furthermore, the consensus of educational opinion and experience seems to favour the multiplication of Universities rather than amalgamation. The Dublin University scheme, on the other hand, would have many of the objections already mentioned in considering the first scheme. Fees would have to be revised—or you would only set up a poor man's College and a rich man's College. The governing body would have to be revolutionised in this case too. Vested interests would have to be protected. It would not even have the result which many people, I think, hope for—of bringing members of different religions together and “knocking off their corners”—a most desirable consummation if it could be attained. T.C.D. being in a certain sense levelled down, and the two Colleges placed, as far as possible, on an equal footing, there would be no inducement to anyone to enter one College or the other, except the religious inducement. Whereas, with two more or less dissimilar Universities, if T.C.D. were rendered, as it well might be, more acceptable to certain classes of Catholics, or those requiring a certain type of education, young men might be attracted by educational or other advantages to one or other University apart from religion, and fusion might be expected on both sides.

From the experience of University College, I see no reason to think that a College acceptable to Catholics, such as that outlined in the Report of the Robertson Commission, would be utilised for sectarian purposes or become unduly under ecclesiastical control, or lower the standard of education. Judging from results, University College has attained a very high standard of efficiency considering its means, and has always been *de facto*, as well as *de jure*, open to all and made use of by all. Any other College such as that proposed would, I am convinced, continue the same traditions.

I have put down my views merely as an ordinary Catholic layman—neither an educational expert nor a religious authority. I have done so rather hurriedly and, I fear, inefficiently, as I am late in the field, and have no books or papers at my disposal. But, as I am convinced they are shared by a very large number of other Catholic laymen of all classes, I should be very greatly obliged if you could see your way to lay them before the Commissioners before they quite close their sittings, which, I understand, are nearly at an end.

Believe me,

Yours faithfully,

W. O'REILLY,

Knock Abbey, Dundalk.

Statement with reference to a Chair of Architecture in the University of Dublin, submitted on behalf of the Royal Institute of the Architects of Ireland, by R. Caulfeild Orpen, Esq., B.A., Hon. Secretary.

Proposed Chair of Architecture.

To the Members of the Royal Commission on Trinity College, Dublin, and the University of Dublin.

MY LORD AND GENTLEMEN,—The Committee of the Architectural Association of Ireland having informed the Council of the Royal Institute of the Architects of Ireland that they had obtained your permission to present a report dealing with the above subject, the

Council of the Institute decided that, as the representative body of the profession in Ireland, it were best that such a report should come from the Institute. I, therefore, beg to submit a brief statement of the present condition of architectural education in Ireland.

Previous to 1896 no educational facilities for the architectural student existed beyond the ordinary system of articulated pupilage to a practising architect. In that year, however, the Architectural Association of Ireland was formed by the junior practising architects

and students for their mutual benefit, and in order to supply the need of further educational facilities which they felt very keenly.

The work of the Association included such subjects as the History of Architecture, Building Design and Construction, together with lectures on architectural and kindred subjects. Its teaching has proved of great value to the students who have availed themselves of it, but it has been hampered by the following grave drawbacks, viz. :—

1. Lack of authority to enforce discipline.
2. Want of an object for study, such as an Irish degree or diploma, which would be universally acknowledged.
3. The financial difficulty of providing properly paid teachers who could devote most of their time to architectural instruction.
4. The need of Physical and Chemical Laboratories.

My Council consider that the taking of the Arts Course by intending students of architecture should be rendered obligatory, as they believe a sound and liberal general education such as would be imparted

thereby to be of the utmost importance to the profession. At the same time they feel very strongly that a course of work in the office of a practising architect is absolutely essential for the proper equipment of any student who aspires to become a true architect.

If my Council might venture to offer a suggestion it would be that, speaking generally, the course of study for the School of Architecture would naturally follow the lines of that adopted by students for the degree of Engineering, with such modifications as the difference between the two professions would render desirable.

I have the honour to be,

My Lord and Gentlemen,

Your obedient and faithful servant,

R. CAULFEILD ORPEN,
Hon. Secretary, Royal Institute of the Architects of Ireland, 20, Lincoln-place, Dublin.

LXIII.

Statement submitted by A. W. Quill, Esq., M.A.

Objections by Albert W. Quill, Roman Catholic Master and Scholar of the University of Dublin, to the "Scheme for Widening the Constitution of Trinity College, Dublin" (Blue Book, p. 23—III.).*

I object to this Scheme on two principal grounds, and before setting forth those objections, I respectfully submit to the Royal Commission that the logical pivot on which the main controversy turns consists of the right of the Roman Catholics of Ireland to perfect equality in the matter of educational advantages and privileges. That equality they willingly accord to others, and therefore justly claim it for themselves.

My two principal objections are as follows:—

I. I object to the Scheme, in the first place, because it proposes to confer upon the Roman Catholics of Ireland a representation in the proportion of 25 per cent. in the Governing Body. To such a Scheme the words of Lord Campbell in *The Queen v. O'Connell* would apply. It would be "a mockery, a delusion,

and a snare." In the language of the Roman Catholic Hierarchy (Blue Book, p. 81), "the Catholics, under the most favourable circumstances, could never hope to be more in Trinity College than a helpless minority." I respectfully submit that this objection alone should prove fatal to the Scheme, for we have it on the high authority of Aristotle in his great treatise on Politics that schemes of government must be practical (Oxford translation, p. 146).

II. Secondly, I object to the Scheme on the ground that it cannot be accepted by the Hierarchy as the guardians of Catholic faith and morals. No correct analogy can be drawn from the non-residential German Universities, where the conditions of the applicability of the mixed system of education are absolutely different from those attaching to that system in a residential College.

(Signed),

ALBERT W. QUILL.

LXIV.

Statement submitted by Charles Ronayne, Esq., M.D., J.P.

To the Chairman and Members of the Royal Commission on Trinity College, Dublin, and the University of Dublin.

SOUTH ABBEY, YOUGHAL,
31st October, 1906.

GENTLEMEN,

I have the honour to submit this statement to your Honorable Commission, in accordance with your gracious wishes, and, without undue egotism, I think I may say that I fairly express the views generally of those most interested in this question—the educated Catholic laity of Ireland. I represented the opinions of the Graduates and Scholars of the Catholic University on the eve of the creation of the Royal University of Ireland, and from that date to this I have studiously interested myself in the methods of University education on the Continent and at home, and have expressed my views at public meetings, in magazine and newspaper articles, and in pamphlets, one of which I forward herewith for your perusal, in

which you will see the outline of that solution now most generally accepted. It has been a sad and wearying fight for us Catholics for the last half-century, since our fathers and ourselves founded and contributed over a quarter million sterling in support of the Catholic University, and during that time many remedies have been promised and attempted, and we now hope that a final and acceptable one will be devised by your Commission, composed of so many learned and distinguished names. You will have many and conflicting views offered to you by many learned and some interested witnesses. Catholic, Protestant, Presbyterian, and Methodist divines, will state their various and conflicting opinions, but the question is really one affecting the laity, especially the educated classes, and those who can afford to give their children the benefits of collegiate and University culture, and the clerical element really only comes in

* Appendix to First Report (Od. 3176), 1906, p. 23.

DOCUMENTS.
SECTION I.
LXIV.

DOCUMENTS.
SECTION I.
LXIV.

to see that this culture is in harmony with the religious tenets of their flock. This seems to be the idea of the educated laity in Ireland, as testified by that statement of these five hundred "Irish Catholic laymen, resident in and around Dublin," presented to you, and if this document were sent to the provinces, I have no doubt that five thousand signatures would be added, representing the highest, the best, and most cultured Catholics, so anxious are we to have this grievance settled in an equitable spirit, and satisfactory to our religious convictions. Many say that these ecclesiastics have their own splendid Colleges for their own youths, and that they might leave this present question to those most interested, the laity who will use it and support it.

Governments have made many efforts to settle this Sisyphuan problem, notably Mr. Gladstone and Lord Beaconsfield, when Mr. Disraeli; I am one of the many Irish Catholics who regret the rejection of Mr. Gladstone's statesman-like and generous solution, Mr. Disraeli's "miserable makeshift," the Royal University, was never intended even by its promoters to be anything more than a temporary arrangement—at best a sordid bribe; Mr. Disraeli admitted "it was not a suitable settlement," and one of its promoters said "it was a mean and underhand arrangement;" its acceptance was a huge mistake, and the initial cause of the abandonment of Cardinal Newman's noble ideal—the Catholic University. However, as this Royal University is not within the scope of your Commission, no more about it. Of the three or four fair solutions that could be proposed for the settlement of this question two only really hold the field—I may safely say that the most sanguine of us now abandon the hope of our once cherished ideal—the Catholic University. We voluntarily did so when that "nonsuch nondescript institute, the Royal University" was accepted, and Cardinal Newman's University degraded into a mere College or school of this strange institute; besides, we certainly could not support three Universities in our decaying and depopulating country. The other plan of an endowed College in this miserable makeshift, the Royal University, is too ridiculous to entertain; no cultured Irishman could accept such a solution, none but those who have a money interest in it, or seek its cheap degrees. Such a scheme would be an insult to our country; it is availed of by our Catholic students because they won't go to Trinity College, and it is a scandal to give them this mere Examining Board, that is universally condemned, and deny them the essential collegiate training, the refining influence and culture of an University proper; besides this solution or scheme is also outside the scope of your Commission, I fancy. The scheme proposed by Trinity College (I advisedly say this), and in principle accepted by the five hundred signatures "in and around Dublin," who represent the best and most learned Catholics, and who would be reinforced, I feel sure, by ten times that number, if there was time to solicit the opinions of the educated Catholics in the provinces, this gives importance to this plan, and makes it a serious consideration for your Commission, that so many intelligent and distinguished Catholics are willing to accept this solution. It is a proof how anxious we are to have this great grievance fairly closed, and how necessary it will be to consider this important representation of the Catholic laity of Ireland, for any solution adopted without their acceptance will be a failure. Many of our best and most prudent Catholics think it a pity that our youths on the eve of their entrance into the fight of life could not commence by fraternising in their University life, as they do in England and all the countries of the Continent with full sanction. I spent some time in Bonn, where Catholic and Evangelical Protestant Professors and students profess and attend their different courses in the same University building, and mix freely in their University life with no appearance of religious clash, but an intense patriotism for Fatherland. I was also pleased in noting the community life of the Swiss Catholic and Calvinist students in the fine University of Zurich, where there are Catholic and Calvinist Deans of residence, and I would wish to see such patriotic camaraderie amongst our clever Irish students, but I suppose we are not tolerant nor patriotic enough for this yet, and this solution is not feasible if our Bishops disapprove of it, for any plan they disapprove of is also doomed to failure. The other and only plan, then, seems to be this one of *endowing another College within the University of Dublin*—say, the present

University College or defunct Catholic University. This is the solution that is the oldest and most favoured. Twenty-five years ago I outlined it, as you may see in the pamphlet I enclose. When the late Rector of the Catholic University, Dr. Woodlock, was despairing of a Charter, this was the scheme he considered next best. It was the one Isaac Butt, as leader of the Irish Parliamentary Party, proposed to Parliament in 1876, in a Bill backed by The O'Conor Don, Mr. Justice M'Carthy, and Mr. A. M. Sullivan, and it is one of the solutions acceptable by our Catholic Bishops, and I think I may add by the educated and general Catholic laity. But the endowment of this College must be equal in every respect to Trinity College; it must have a complete Professoriate in all the faculties; substantial prizes of Fellowships, Studentships, Scholarships, etc., with Sizarships or Bourses to help clever and ambitious students, who may not have the means, but have the brains, to follow an University career with distinction; its site would be most fittingly within the vast University or College Park; its Medical School may be left where the present University School is in Cecilia-street, but enlarged; these are mere details, easily filled in. The financial floating of this College may loom large, but not necessarily so; much could be transferred from the abolition of these numerous and costly Fellowships and Studentships, etc., of the Royal University, which in future need only be preserved as a mere examining one, which it really only is, and Mr. Gladstone's intention of transferring £12,000 per annum from Trinity College to its University, to enable this to commensurably carry out its new amplified rôle, might be acted on now. The interested and invested staff of Trinity College may object to this utilisation of its great wealth—Mr. Gladstone said "it was the richest College in the world"—but as your Commission is to report upon "the steps proper to be taken to increase their usefulness to the country" (Dublin University and Trinity College), it will be within your province to suggest how its great wealth may be so utilised.

"Hands off Trinity" really spells its doom, and should there be any sordid, grasping objection to utilise some of its great wealth, then, in all events, its splendid prizes of Fellowships, Studentships, Scholarships, etc., should be transferred to its University, to be competed for on equal terms by the students of its Colleges, and by so much will the expense of the new College be lessened, the endowment of these prizes not being required for it; Trinity may be thus bettered from its present anomalous state. Mr. Gladstone spoke of it as "the case of a single College with an University, and the University is in absolute servitude to the College, and the whole institution is one of the strangest academic corporations which has entered the head of man to devise;" nevertheless no patriotic Irishman would wish to spoliage Trinity; for, notwithstanding its sinister foundation, we will always remember that it was the Alma Mater of those noble sons whose memories are ever dear to and cherished by Irish Nationalists. Of course, the constitution of the University of Dublin must be altered with the change, and brought in line with modern methods; the Senate should include representatives from the Professors, the Graduates, and the Catholic Bishops, or their nominees.

After so many sad and weary years of waiting, we have now every hope that your distinguished and learned Commission will solve this question in a generous and acceptable manner, and that your Report will be such that this sympathetic Government will be able to legislate satisfactorily for the great majority of this country without detriment to the educational requirements of any minority; and whatever fair and equitable settlement will be now offered, I earnestly pray will not be rejected by any section of our Catholic fellow-countrymen.

I have the honour to be,

Gentlemen,

Your obedient Servant,

CHARLES RONAYNE, L.R.C.P., and
B.C.S.I., etc., etc.; University
Double Gold Medallist, and
First Class Prizeman, C.U.I.
and T.C.D.; Decoré Cr Française.

LXV.

Statement submitted by Rev. Charles H. H. Wright, D.D.

90, Bolingbroke Grove,
Wandsworth Common,
London, S.W.,
Oct. 29, 1906.

DEAR SIR,—I have, by sending the Royal Commission appointed to enquire into Trinity College, Dublin, and the University of Dublin, copies of my pamphlet on the *Irish University Question* (published in 1901), already called their attention to many points connected with the Divinity School, and although I do not see in the *First Report* any references made to that pamphlet, or to others of a similar character—such references may appear in later Reports.

The retention of the Divinity School in the University I consider to be a matter of the highest importance, even from a purely scientific point of view, for if it be separated from the University, the teaching of Hebrew and cognate languages, such as Aramaic and Syriac, which teaching cannot well be absolutely severed from the study of Hebrew and even of Theology, must cease to form subjects of instruction in the University.

Rather than obliterate the teaching of Theology, I would advise that full permission should be given to different Theological Schools (even those existing outside Dublin, e.g., in Belfast) to annex themselves to

the University. The examination for B.D. degrees would then have to be confined to a purely scientific course in Hebrew, N. T. Greek, LXX, or Vulgate, and to Patristic Theology and Church History, all points of religious controversy being rigidly excluded. All Theological Faculties connected with the University might be given the right of appointing special examiners for such examinations.

The degrees in Theology in Dublin are at present open without restriction to Episcopalians, Presbyterians, and Methodists, and even to laymen; nor is there anything to hinder a Roman Catholic becoming a candidate for those degrees, except that the course of study might not be agreeable to him. But the latter point could be easily adjusted.

It would be necessary in that case, however, to deprive the Regius Professor of his veto on all such degrees, or rather transfer the power of veto to the majority of the Theological Professors in the University, instead of confining it to a single individual.

Some of those points have been already discussed in the pamphlet which is already in the hands of the Commissioners.

Yours faithfully,

CHARLES H. H. WRIGHT, D.D.

The Secretary of the Royal Commission on
Trinity College, Dublin, &c.

DOCUMENTS.
SECTION I.

LXVI.

Resolution of the Senate of the Royal University of Ireland, passed on the 25th October, 1906.

THE ROYAL UNIVERSITY OF IRELAND.

At a meeting of the Senate of the University held on Thursday, October 25—

Present :—The Right Hon. Lord Castletown of Upper Ossory, C.M.G., Chancellor of the University, in the chair; Sir Francis R. Cruise, M.D.; His Grace the Most Rev. Dr. Healy, Archbishop of Tuam; Rev. William Delany, LL.D.; Sir Christopher Nixon, Bart., M.D., LL.D.; Rev. Matthew Leitch, M.A., D.LIT.; Edward Cumming, M.A.; Rev. Thomas Hamilton, D.D., LL.D.; John R. Leebody, M.A.; D.Sc.; Michael F. Cox, M.D.; Rev. William Nicholas, D.D.; the Right Hon. Sir Rowland Blennerhassett, Bart., LL.D.; J. Walton Browne, M.D.; Lieutenant-Colonel Sir John F. G. Ross of Bladensburg, K.C.B.; Sir Henry Bellingham, Bart., M.A.; Alexander Anderson, M.A., LL.D.; Sir William Thomson, C.B., M.A., M.D., M.Ch.; Bertram C. A. Windle, M.D., D.Sc., F.R.S.; Richard W. Leslie, M.D., M.Ch.; Charles E. Martin; and Right Rev. Monsignor Mannix, D.D.

It was moved by Rev. W. Delany, LL.D., President of University College, and seconded by His Grace the Most Rev. Dr. Healy, Archbishop of Tuam, and carried unanimously :—

“That in the judgment of the Senate of the Royal University, it would be disastrous to the interests of education in Ireland, and gravely injurious to the welfare of the country, to concentrate the control of Higher Education in one University.”

It was subsequently resolved that copies of this resolution be sent to His Excellency the Lord Lieutenant, the Chief Secretary, the Prime Minister, and the members of the Royal Commission at Trinity College, Dublin, and the University of Dublin.

J. C. MEREDITH, }
J. M'GRATH, } Secretaries.

Resolution adopted by the Corporation of Cork, on the 24th August, 1906.

(Received 3rd September, 1906.)

“That we, the Lord Mayor and County Council of the County Borough of Cork, cordially endorse the pronouncement made by Dr. Windle, President of Queen's College, Cork, in his recent Report to His Majesty, the King, that the signal failure of that institution to achieve the objects for which it was

founded is due to the fact that its constitution is not in harmony with the feelings and requirements of the vast majority of the people of this part of Ireland. That, in our opinion, this declaration by one so competent, from experience and attainments, to form a clear and independent judgment on the

DOCUMENTS.
SECTION I.

DOCUMENTS.
SECTION I.
LXVII.

question, casts upon the Government an imperative duty to grapple promptly and effectively with the causes of the failure, which Dr. Windle has so ably and courageously indicated, and to take advantage of his special knowledge and capacity to bring about, in the case of the Cork College, a change as salutary as that which, mainly at his instigation, resulted in the establishment of Birmingham's prosperous University.

"That we are convinced the conversion of the Queen's College into a properly constituted and equipped University centre would tend in like manner to elevate the whole standard of education, develop the intellectual life, and promote the general prosperity of Munster, and in due time, exercise a potent influence in the uplifting of the Nation.

"That the warmest thanks of this Council, and of the community at large, are eminently due and hereby tendered to Dr. Windle for his timely and public-spirited pronouncement on a question of such vital and pressing importance to all;

"And that copies of this resolution be forwarded to His Majesty, the King, the Lord Lieutenant, the Prime Minister, the Chief Secretary for Ireland, the President of the Queen's College, to the Catholic and Protestant Bishops of Cork, to Sir Antony MacDonnell, to the Secretary of the Royal Commission on University Education in Ireland, to the Irish Members of Parliament, and to the County and Borough Councils of Ireland, in the earnest hope that at the earliest opportunity effective action may be taken on this great question."

Letter received from the Town Clerk, Cork.

Municipal Buildings, Cork,
15th day of September, 1906.

SIR,

Pursuant to my letter of the 28th ult., forwarding a copy of a Resolution passed by the Cork Corporation in favour of the conversion of the Queen's College, Cork, into a properly constituted and equipped University centre, I am directed to inform you that the Corporation of Cork have passed a Resolution that the Right Hon. Joseph Barrett, Lord Mayor, and Messrs. William O'Brien, M.P., and Augustine Roche, M.P., be requested to attend and give evidence before your Commission.*

I am, therefore, to ask you to inform me whether the Commission will permit these gentlemen to appear before them and give evidence in connection with the claims of Cork as a University centre.

I am,
Sir,

Your obedient servant,

F. W. MCCARTHY,
Town Clerk.

Secretary,
Royal Commission on the University of Dublin,

Resolution adopted at a Public Meeting held in Cork on 17th November, 1906.

Municipal Buildings, Cork,
21st November, 1906.

SIR,

We beg to state for the information of the University Commission that a public meeting, jointly convened by the Right Hon. Joseph Barrett, Lord Mayor of Cork, and Mr. William M'Donald, Chairman of the Cork County Council, was held at the City Hall, Cork, on the 17th inst., with reference to the question of University Education in Munster. Invitations to attend the meeting were sent to every public body in Munster and to every prominent man in the province.

The meeting held was thoroughly representative of the South of Ireland, and the following resolutions were adopted:—

(1.) Proposed by Mr. William O'Brien, M.P.; seconded by Alderman Henry Dale, supported by Sir T. C. O'Brien, Bart., D.L.

"That, whilst pressing for a complete settlement of the University Question in Ireland, this meeting, representative of the South of Ireland, declare that it is their assured opinion that it is essential that local facilities for University Education on a much more generous scale than at present, should be secured for Munster and Cork."

(2.) Proposed by Mr. Wm. M'Donald, Chairman, Cork County Council; seconded by Mr. Stanley Harrington, J.P., Commissioner of National Education in Ireland.

"That this meeting further declare that it is essential to the success of any College or University in Cork that it should be of such a character as to be satisfactory to all classes of people in the province, which has not been the case with the Queen's College, Cork, in the past."

(3.) Proposed by Mr. D. M. Moriarty, Solr., Chairman, Kerry County Council; seconded by Mr. D. Horgan, T.C.

"That this meeting agree with the conclusions arrived at by the President of the Queen's College, Cork, in his recent report to the King, and join with him in calling upon the Government to make such alterations in the constitution of that College as will render it acceptable to the people amongst whom it is placed, and for whose use it is intended; and express their opinion that there will be no difficulty in carrying this out in such a manner as to avoid giving offence to any section of the community."

(4.) Proposed by Mr. Michael Murphy, Solr.; seconded by Mr. Edward Fitzgerald, Solr., Chairman, Mallow Urban Council.

"Finally, that this meeting claim that whatever settlement of the general question in this country may be arrived at, the reconstituted College in Cork should possess the largest possible measure of autonomy in order that it may develop along the lines desired by the people of Munster; and this meeting consider that this end may be most satisfactorily attained by the creation of an independent University for Munster, with its seat in Cork."

We also enclose copies of resolutions passed by the Corporations of Limerick and Waterford respectively on this subject.

We are, Sir,
Your obedient Servants,

F. W. MCCARTHY, } Hon. Secretaries.
EUGENE CALLANAN, }
MICHAEL MURPHY, } Organising Committee.

Secretary, Royal Commission on the
University of Dublin,
16 Ely-place, Dublin.

* Note by Secretary.—It was subsequently arranged that the Right Hon. the Lord Mayor of Cork would give evidence before the Commission. His evidence will be found at page 237.

Copy of Resolution passed by the Corporation of Waterford on the 2nd day of October, 1906.

On the motion of Councillor Dr. O'Sullivan, seconded by Alderman White, and supported by the High Sheriff of the City of Waterford, the following Resolution was passed unanimously:—

"That we, the Mayor, Aldermen, and Burgesses of the County Borough of Waterford wish to express our sense of the great importance that a properly organised University College in Cork would be to the South of Ireland.

"That, whilst we heartily desire the establishment in Dublin of a University that would be acceptable to Catholics, we think that such would not be entirely satisfactory unless the South of Ireland was provided with a University centre, and of such a character as would be satisfactory to the people in that district.

"We, therefore, call upon the Government to bring about such changes in the Queen's College, Cork, as will give to the people of Cork and the South of Ireland the advantages of a full measure of University Education which they so much desire, and to which they are entitled."

Copy Resolution adopted by the Limerick Corporation, at a Meeting held on the day of November, 1906.

On the motion of Councillor E. J. Long, High Sheriff of the City of Limerick, the following Resolution was unanimously adopted:—

"That we, the Mayor and Council of the County Borough of Limerick, cordially endorse the pronouncement made by Dr. Windle, President of the Queen's College, Cork, in his recent report to His Majesty the King, that the signal failure of that institution to achieve the objects for which it was founded is due to the fact that its constitution is not in harmony with the feelings and requirements of the vast majority of the people of this part of Ireland.

"That, in our opinion, this declaration by one so competent, from experience and attainments, to form a clear and independent judgment on the question, casts upon the Government an imperative duty to grapple promptly and effectively with the causes of failure which Dr. Windle has so ably and courageously indicated, and to take advantage of his special knowledge and capacity to bring about in the case of the Cork College a change as salutary as that which mainly, at his instigation, resulted in the establishment of Birmingham's prosperous University.

"That we are convinced the conversion of the Queen's College, Cork, into a properly constituted and equipped University centre would tend in like manner to elevate the whole standard of education, develop the intellectual life, and promote the general prosperity of Munster, and, in due time, exercise a potent influence in the uplifting of the nation.

"That the warmest thanks of this Council and of the community at large are eminently due and are hereby tendered to Dr. Windle for his timely and public-spirited pronouncement on a question of such vital and pressing importance to all."

Resolution adopted by the Cork County Council on the 6th September, 1906.

CORK COUNTY COUNCIL,
SECRETARY'S OFFICE,
COURT HOUSE,
CORK, September 11th, 1906.

SIR,—I beg to enclose copies of resolutions passed by the Cork County Council at the quarterly meeting held on the 6th September, inst., and I am to request the Royal Commission on Trinity College to receive evidence from the Council.*

I am, Sir,
Your obedient servant,
E. CALLANAN,
Secretary.

The Secretary,
Royal Commission on Trinity College,
Dublin.

RESOLUTION OF THE CORK COUNTY COUNCIL, PASSED UNANIMOUSLY AT QUARTERLY MEETING HELD ON 6TH SEPTEMBER, 1906:—

Proposed by Councillor William McDonald.

Seconded by Councillor James M. Burke.

Resolved—"That the Council of the County of Cork, in view of the present discussion in connection with the settlement of the University question in Ireland, desires to express its sense of the great importance to the district of the continuance of a University College or the creation of a University in Cork.

"It desires to point out that the present Queen's College, with all its many drawbacks, has been of great value to the inhabitants of the district, to whom it has afforded possibilities of education and advancement which would have been otherwise unattainable.

"It also desires to express its opinion most emphatically that the creation of a new College in Dublin, acceptable to Catholics, however excellent and desirable in itself, would not afford to the inhabitants of Munster the opportunities for higher education which they desire, and to which they are entitled, since the extra cost of living and the necessity for sending students to a great distance from their own homes would prevent many making use of such an institution who would be glad to avail themselves of one in Cork.

"It wishes to express its concurrence with the view lately put forward by the President of the Queen's College, in his valuable report to His Majesty the

King, that the failure of that institution has been due to the fact that it has not been established in such a manner as to be in harmony with the sentiments and wishes of the people of Munster. Were it made as acceptable to them, as the President suggests, as the English Colleges are to the districts in which they are placed, the Council believes that the numbers in attendance would be very greatly increased, that popular support might be expected to be given to it, and that from an unsuccessful institution the College would be one of great prosperity and of untold value to Munster.

"They call, therefore, upon the Government to make such changes in the government of the College as shall place it on a more satisfactory footing, and they have no hesitation in saying that they are convinced that such changes could be made without inflicting the slightest injury upon any body of persons living in the district.

"That copies of this resolution be sent to the Lord Lieutenant, the Chief Secretary, the Under-Secretary, the members of Parliament for Munster, the Chairman of the Irish Parliamentary Party, and the Secretary of the Royal Commission on Trinity College; and also

"That the Secretary of the County Council be directed to apply to the Royal Commission on Trinity College to have evidence received from this County Council in support of the foregoing resolution."

WILLIAM McDONALD, *Chairman*.

EUGENE CALLANAN, *Secretary*.

RESOLUTION OF COUNTY COUNCIL PASSED UNANIMOUSLY AT QUARTERLY MEETING HELD ON 6TH SEPTEMBER, 1906.

Proposed by Councillor John R. Daly.

Seconded by Councillor Thomas B. Healy.

Resolved—"That we reiterate our earnest protest against the continuance of the present unjust system of University education in Ireland, and we urgently demand such an extension of the system as will afford the Catholic majority of our fellow-countrymen the equality they have so long claimed and are admittedly entitled to, and we regard the recent so-called Trinity College proposals as delusive and unworthy of consideration."

WILLIAM McDONALD, *Chairman*.

EUGENE CALLANAN, *Secretary*.

* Note by Secretary.—It was subsequently arranged that Mr. McDonald, Chairman of the County Council, would give evidence before the Commission. His evidence will be found at page 284.

Resolution adopted by the Cork Rural District Council on 20th September, 1906.

No. 21889.

DUBLIN CASTLE,
5th October, 1906.

SIR,—I am directed by the Lords Justices to transmit to you, for the information of the Royal Commission on Trinity College, Dublin, and the University of Dublin, the attached copy of a Resolution adopted by the Cork Rural District Council.

I am, Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,
Royal Commission on Trinity College,
and the University of Dublin,
16, Ely Place

(Resolution referred to in the foregoing letter).

CORK RURAL DISTRICT COUNCIL,
CLERK'S OFFICE, WORKHOUSE,
CORK, 3rd October, 1906.

SIR,—I have been directed by the Rural District Council to forward you the following copy of a Resolution adopted at their meeting on the 20th ultimo:—

Resolved:—"That we, the members of the Cork Rural District Council, in view of the proposed reformation of the University System in Ireland, express our agreement with the able and practical views expounded by Dr. Windle, President of the Queen's College, Cork, with regard to the continuance and remodelling of the Cork Queen's College. Having a very large interest in University Education, even in the past, when an exceptionally large number of ratepayers' sons were educated in Medicine and Arts in this College, and distinguished themselves in all branches of the public service, we feel that any reformation of the University System which would

not bring within easy reach of every ratepayer, as well as the wealthy ratepayer, the advantages of University Education would fall very short of what is required. As the advantage of local University Education is for our community a matter of the utmost importance, we beg to represent to the Chief Secretary that the Commission relating to University Education should hold inquiries in an important centre such as Cork with the view of ascertaining from the people themselves, their wishes and requirements, especially of those who cannot afford the expense and inconvenience of travelling, and hearing their views on such a subject of the highest interest to them, and that the Clerk be directed to send a copy of this Resolution to the Chief Secretary for Ireland."

I have, &c.,

F. COTTER, Clerk of Council.

The Right Honourable James Bryce, M.P.,
Chief Secretary for Ireland.

Resolution adopted by the Agricultural Committee of the Kerry County Council on 31st August, 1906.

County Council Chambers,
Courthouse, Tralee,
15th September, 1906.

DEAR SIR,

I am directed to request your attention to the subjoined Extract from Minutes of Proceedings of the Agricultural Committee at their meeting held on 31st August, 1906.

Your obedient servant,

P. M. QUINLAN,
County Secretary.

J. D. Daly, Esq.,
Secretary Commission on University Education,
16, Ely-place,
Dublin.

(EXTRACT REFERRED TO.)

University Education.

*Resolved:—*That we join heartily in the demand made by the Irish people in reference to University and higher education, and we declare that no scheme of improvement can be acceptable that will not satisfy the wishes of the Bishops and people of Ireland from a National and Catholic standpoint, and afford facilities for the children of the Poor to obtain the benefit of the highest education available in the country.

LXXIII.

Resolution adopted by the County Council of King's County on the 25th August, 1906.

(Received 5th September, 1906.)

Proposed by Henry Egan, J.P., seconded by John Shiel, and resolved:—"That we, the County Council of the King's County, take this opportunity to renew the following declaration made in the year 1870, on behalf of the Catholic laity of Ireland:—

1. That it is the constitutional right of all Irish subjects to adopt whatever system of Collegiate or University education they prefer.
2. That perfect religious equality involves equality in all educational advantages afforded by the State.
3. That a large number of Irishmen are at present precluded from the enjoyment of University education, honours, and emoluments, on account of conscientious religious opinions regarding the existing systems of education.

4. That we, therefore, demand such a change in the system of Collegiate and University education as will place those who entertain these conscientious objections on a footing of equality with the rest of their fellow-countrymen as regards Colleges, University honours, and emoluments, University examinations, government, and representation.

That copies of this resolution be sent to J. E. Redmond, M.P., His Grace the Archbishop of Dublin, the Prime Minister, the Chief Secretary, the Secretary, Royal Commission on University Education, and to each County Council in Ireland.

Resolution adopted by the Meath County Council on 27th August, 1906.

Meath County Council,
Council Offices,
Navan, 29th August, 1906.

DEAR SIR,

I am directed to forward you the following copy of resolution passed by the Meath County Council, at quarterly meeting, held on 27th instant:—

"That we, the Meath County Council, object to mixed University education being forced upon Catholics against their religious convictions, and we demand equal educational opportunities for Catholics as are enjoyed by Protestants.

"That a copy of this resolution be sent to Mr. John Redmond; to the Prime Minister of England; Sir Antony MacDonnell, the Under-Secretary for Ireland; the Secretary of the Trinity College Commission; and to the General Council of County Councils."

"Yours faithfully,

HUGH C. CULLEN.
Secretary.

To the Secretary,
Trinity College Commission.

Resolution adopted by the Corporation of Waterford on 2nd October, 1906.

TOWN CLERK'S OFFICE,
TOWN HALL, WATERFORD,
2nd October, 1906.

SIR,—I beg to send herewith copy Resolution passed unanimously by the Corporation of Waterford at a Meeting held on the above date.

I am, Sir,

Your obedient servant,

JAMES J. FEELY,
Town Clerk.

Proposed by Councillor O'SULLIVAN, M.D., seconded by Alderman WHITE, M.D., and resolved unanimously:—

"That we, the Mayor, Aldermen, and Burgesses of the County Borough of Waterford, wish to express our sense of the great importance that a properly organised University College in Cork would be to the South of Ireland.

"That, whilst we heartily desire the establishment in Dublin of a University that would be acceptable to Catholics, we think that such would not be entirely satisfactory unless the South of Ireland was provided with a University centre, and of such a character as would be satisfactory to the people in that district.

"We, therefore, call upon the Government to bring about such changes in the Queen's College, Cork, as will give to the people of Cork and the South of Ireland the advantages of a full measure of University Education, which they so much desire, and to which they are entitled;

"And that copies of this Resolution be forwarded to His Majesty the King, the Lord Lieutenant, the Prime Minister, the Chief Secretary for Ireland, the President of the Queen's College, to the Catholic and Protestant Bishops of Waterford, to Sir Antony MacDonnell, to the Secretary of the Royal Commission on University Education in Ireland, to the Irish Members of Parliament, and to the County and Borough Councils of Ireland, in the earnest hope that at the earliest opportunity effective action may be taken on this great question."

Resolution adopted by the Youghal Urban District Council.

Urban District Council Office,
Town Hall, Youghal,
28th October, 1906.

SIR,—I am directed by the Youghal Urban District Council to transmit to you the annexed copy of a Resolution on University Education in Ireland, unanimously adopted at their last meeting.

I am, Sir,

Your obedient Servant,

JAMES O'SHEA, *Clerk.*

To the Secretary,
Trinity College Commission,
16, Ely Place, Dublin.

RESOLUTION.

That We, the Youghal Urban District Council, object to mixed University Education being forced upon Catholics against their religious convictions; and we demand for Catholics educational opportunities equal to those enjoyed by Protestants.

APPENDIX TO FINAL REPORT—DOCUMENTS.

DOCUMENTS.
SECTION K.
LXXVII.

SECTION K.

Memoranda drawn up by Members of the Commission.

LXXVII.

Memorandum by Sir T. Raleigh on the relation of the Colleges to the University of Oxford.

The University.

The University of Oxford is a lay corporation, consisting of the Chancellor and Masters, who are governing members, and Scholars, who are pupillary members.

Under the Statutes of Archbishop Laud, the corporation was exclusively Anglican. Even candidates for matriculation subscribed the Articles. Bentham, for example, signed them at the age of twelve, and this was the beginning of his lifelong prejudice against Anglican beliefs.

Under the law as it now stands, no test may be imposed on candidates for any lay office or degree. The University is still Anglican, so far as its public worship and teaching are concerned. In the Faculty of Theology, Professors and Examiners must be clergymen of the Church of England. The same rule applies to Examiners in the Honour School of Theology, but that School leads only to the B.A., which is a lay degree, and no test is imposed on candidates. A good many Nonconformists have taken honours in Theology.

Government of the University.

For administrative purposes, the governing body is the Hebdomadal Council, which includes six Heads of Colleges, six Professors, and six Masters of Arts, together with the Vice-Chancellor and Proctors. The Council has the sole right to initiate business in Congregation (which consists of University officers and resident graduates) and Convocation (which includes all graduates who keep their names on the books by paying dues).

Before 1854, the Hebdomadal Board consisted of the Heads of Houses, and the Proctors. It was, generally speaking, a body of clergymen. At present, eight members of the Council are clergymen.

University Teaching.

Undergraduate teaching has been and is controlled by the Colleges, and there was a time when the University Professors took a comparatively small share in the work of instruction. Candidates for degrees are required to reside so many terms; they are not, generally speaking, required to attend any particular course of lectures, and many students obtain their degrees without entering the class-room of any Professor.

Lord Salisbury's Commission took steps to strengthen the professoriate; to provide a larger staff of Readers and Demonstrators; and to prescribe the duties of each chair, so that each Professor is required to take an effective part in University teaching. These measures have been, to a great extent, successful, but the examination system operates to the prejudice of learning. A Professor who expounds his subject without reference to examinations may find himself left without a class. Some of the best lectures I attended at Oxford were delivered to absurdly small audiences.

College lectures, if inserted in the published lists, are open to all members of the University. A tutor who lectures to a class drawn from a dozen different Colleges is evidently doing University work; he is an effective, though not as yet a recognised member of the professoriate.

So far as I am aware, no religious difficulty arises in regard to any of the ordinary subjects taught. In such subjects as Law, or Medicine, or Natural Science,

the student goes to the most competent teacher; he does not even inquire to what Church, if any, his Professor belongs. If a tutor distrusts the tendencies of the Professor of Moral Philosophy, he may advise his pupils not to attend the class; but such cases do not in fact occur. It would indeed be useless to prevent a student from hearing A or B, when the printed works of A and B are to be found in libraries to which every student has access.

I understand that Roman Catholics have been appointed to lecture on Philosophy and Modern History to classes mainly composed of Anglicans, and that no objection is taken by parents or others.

The Colleges.

Each College in the University is a self-governing corporation; the governing body consists of the Head (Master, President, Principal, Provost, Warden, or Rector) and the Fellows.

Under our last scheme of reform the Colleges are laid under contribution for University purposes, and the Fellowships in each College are divided into classes. There are—

- (1) Official Fellowships, forming part of the emolument of Bursars, Tutors, Chaplains, etc., and held during tenure of the office to which they are attached;
- (2) Professorial Fellowships, attached to chairs for which the College has undertaken to make provision;
- (3) Research Fellowships, usually held for seven years, with the possibility of re-appointment;
- (4) Prize Fellowships, to which no special duties are attached: awarded after examination, or on the ground of University distinction; tenable for seven years. Fellows of this class serve a probationary year before they are admitted to take part in College business.

Important questions are decided by a College meeting. In my own College the attendance at a business meeting is about thirty. No distinction is made between senior and junior Fellows. In matters relating to property, we are usually guided by the seniors; where teaching and University work are concerned, those junior Fellows who are engaged in lecturing and examining often have a considerable share in determining the policy of the College.

University and College accounts are prepared in a statutory form, audited by professional accountants, and published.

In Colleges founded before 1871, no test may be imposed on candidates for ordinary Scholarships or for lay Fellowships. In making its election, a College is not rigidly bound by any system of marks; the examiners report on the papers, and the Fellows choose the person who is best fitted to be a member of their society. It is theoretically possible that a Fellow may take note of a candidate's opinions or ecclesiastical connections; but in practice these matters are not brought into the discussion. I should say that a Roman Catholic or a Presbyterian has as good a chance of obtaining a lay Fellowship as if he were an Anglican.

Each College has a chapel in which the services of the Church of England are maintained. Students not belonging to that Church are not required to attend; and the Colleges readily co-operate in making any special arrangement for religious instruction, &c., which may be desired by Roman Catholic or Nonconformist parents. In the old days, College tutors were always clergymen, and they prepared their pupils for Communion. A lay tutor usually prefers

DOCUMENTS.
SECTION K.
LXXVII.

to leave this duty to a clerical colleague. Lay Heads and tutors of Colleges occasionally give addresses of a religious nature: in such cases attendance is voluntary.

The Colleges and the University.

There are twenty-four Colleges in all, and none is powerful enough to dominate the University.

Elections to University offices were at one time the cause of fierce disputes, but under present conditions no such dispute arises. Archbishop Laud put an end to quarrels about the Proctorship by devising a cycle of election; each College has a Proctor when its turn comes round. The Chancellor offers the Vice-Chancellorship to the Heads of Houses in the order of their seniority.

College patriotism is very strong, but it can hardly be called a factor in University politics. The Colleges do not embody or perpetuate any distinction of race, or religion, or politics; they are all alike, mixed societies. One may see all the Fellows of a College voting together in a University election. But in Congregation or Convocation, the line of division usually runs between progressives and conservatives; and the good progressive takes a natural pleasure in beating a conservative from his own College on any question of principle. I am using party names for the sake of brevity; it will be understood that parties in the University are not permanent associations, like parties in the House of Commons. Each question as it arises produces a redistribution of votes; and the man who votes progressive at 2.30 may vote conservative at 2.45 without exciting remark.

DOCUMENTS.

LXXVIII.

LXXVIII.

Memorandum by Sir Arthur W. Rucker, M.A., D.Sc., F.R.S., on the Relations of the University of London to Institutions connected therewith.

1. Though recently reconstituted as a Teaching University, the University of London still confers degrees on candidates who have passed the requisite examinations without inquiry as to the circumstances under which they have obtained their knowledge. Students studying for these degrees are called "External Students." The teaching powers of the University are exercised with reference to another group called "Internal Students," who are defined as follows:—"Internal Students" of the University are students who have matriculated at the University, and who are pursuing a course of study approved by the University either (a) under the direct control of the University or a committee appointed thereby or in any one or more schools of the University; or (b) under one or more of the appointed or recognised teachers of the University. (The various technical terms used in this definition will be explained below.)

It is sufficient to say that the examinations for these two classes of students need not be the same, though they must be of the same standard; that no member of either class can obtain a degree until three years have elapsed from matriculation; and that during these three years an Internal Student must have studied under the conditions set forth in the above definition.

What follows relates only to Internal Students.

2. As a teaching University the University has relations both with institutions and with individual teachers. To take the latter first, it can recognise one or more teachers in any public educational institution within a radius of thirty miles from the University buildings. It would, thus, be possible, if a single teacher were carrying out some important research in an institution which was not otherwise of University character to recognise him as an individual. I am not aware that such a case can be quoted, but in the Polytechnics and other institutions the University recognises teachers in cases in which the institution as a whole has no relations to the University other than those implied in such recognition. These, however, give the University a certain amount of control, inasmuch as the Senate is directed only to recognise teachers if their courses of instruction are of a University standard, and if they are provided with such laboratory accommodation, apparatus, and other appliances as may be necessary for the instruction they give. Colleges or Polytechnics in which some teachers are recognised are called "Institutions connected with the University."

3. A closer grade of connection is, however, established in the case of institutions which are known as "Schools of the University."

Certain institutions, twenty-four in all, were nominated as Schools of the University by the Commissioners appointed under the Act of 1898. These were University and King's Colleges, six Theological Colleges, two Women's Colleges, the Royal College of Science, ten Medical Schools, the Central Technical College, the London School of Economics, and, in virtue of a power specially given, the South-Eastern Agricultural College at Wye in Kent. To these three have been added, namely, Westfield College for Women, the

Lister Institute, and the London School of Tropical Medicine.

The relations of the Schools to the Senate are in some respects similar to those which connect the Colleges at Oxford and Cambridge with those Universities. Like such Colleges, the Schools are financially independent of the University, and are managed by their own Governing Bodies, but the acceptance of the status of a School gives the University powers which are not, I believe, exercised by the Universities of Oxford and Cambridge over their Colleges. All Schools of the University are open to visitation by the University, and the Senate is to make arrangements for obtaining reports at prescribed intervals of time on their efficiency. An inefficient institution may be deprived of the status of School subject to an appeal to His Majesty in Council.

Teachers in Schools of the University do not thereby become teachers of the University, but must be separately recognised.

The Senate may make arrangements with the Governing Body of a School for carrying on in the School a Special Intermediate Examination of the same standard as the University Examination, but modified so as to fit the special form of teaching which that School may adopt. The Degree Examinations are the same for all Internal Students. These regulations are intended to secure equality of standard for the degrees while allowing considerable latitude as to the methods by which that standard is attained. The Degree Examinations for Internal Students are conducted by the teachers associated with the Examiners of the External Students.

4. A still closer connection with the University exists in the case of institutions (1) established and financed by the University or (2) incorporated in it. The following examples of these may suffice:—

(1) A Physiological Laboratory has been established in the University Buildings under the control of Dr. Waller, F.R.S. This is financed by the University with the aid of subscriptions, and serves as a centre for research and for lectures, open to all undergraduates, which are given by all the most distinguished physiologists in London in turn.

(2) The Goldsmiths' Company have presented to the University their Institute at New Cross. This has been converted into a training college for 500 students, who are sent by the County Councils of London, Kent, Surrey, and Middlesex, and the County Borough Council of Croydon. It is governed in detail by a Delegation appointed by the Senate and consisting of representatives of the Senate, the Goldsmiths' Company, and the co-operating Counties. The Senate votes the necessary funds annually, and its control is exercised (a) by certain limitations on the powers of the Delegation, (b) by the Budget, (c) by the right given to any two members of the Senate who are members of the Delegation, or to one of them and the Principal of the University, to veto action on any particular point till the Senate has considered it. So far it has not been found necessary to exercise this power.

(3) By a recent Act of Parliament University College and its property, with certain exceptions and under conditions laid down in the Act, is about to be transferred to the University which will control it by means of a Committee and Budget in a way similar, *mutatis mutandis*, to that adopted in the case of the Goldsmiths' College, except that the College will have the rights of a School of the University which have not been granted to Goldsmiths' College.

5. Lastly, the University can appoint and pay individual teachers and direct them as to where their duties are to be performed. In this way it can strengthen a particular School in any particular subject or group of subjects. Thus, Professors are working in University College, King's College, the City and Guilds Institute, the School of Economics, the Lister Institute, and elsewhere, who are appointed and paid by the University.

Summing up it will be seen that the relations of the University to Teaching Bodies in London are as follows:—

(1) The University may recognise teachers for the instruction of Internal Students in "Institutions" independently controlled by their own Governing Bodies. The influence of the University on the Institutions is thus indirect and is exercised through the conditions of recognition.

(2) "Schools" of the University are, in general, also independent institutions, but the influence of the University is more direct and is exercised through recognition of teachers, visitation, and the power of withdrawing the status of a School. Such institutions have certain privileges.

(3) Institutions may be established or taken over by the University and entirely financed and controlled by it. Such institutions may or may not be granted the privileges of a School, and are managed in detail by Delegacies or Committees.

(4) Individual teachers may be "appointed" by the University to carry on their work as may be directed by the Senate.

The share which the various Institutions above described take in the government of the University can only be indicated very briefly.

The Supreme Body is the Senate, consisting of fifty-six members, viz:—

- (1) The Chancellor, Vice-Chancellor, and Chairman of Convocation;
- (2) Four members nominated by the Crown;
- (3) Sixteen representatives of the graduates electing in their faculties;
- (4) Sixteen representatives of the teachers electing in their faculties;
- (5) Two representatives each of University and King's Colleges;

6) The remaining thirteen representatives are divided among the Royal Colleges of Physicians and Surgeons, the Inns of Court, the Law Society, the Corporation of London, the London County Council, and the City and Guilds Institute.

Two standing committees of the Senate, consisting respectively of the sixteen representatives of the graduates and the sixteen representatives of the teachers (with some additions in each case) are called the External and Academic Councils. The former advises the Senate as to matters relating to External Students, while the latter gives advice as to the recognition of teachers, admission of Schools, and all other matters relating to Internal Students.

Before advising the Senate on educational matters, the Councils are bound to consult the appropriate Board or Boards of Studies. The different subjects of study are divided among thirty-one of these Boards. Each Board is annually appointed by the Senate from among the teachers and examiners in any of the subjects for which the Board is constituted together with such other persons as the Senate may think fit, provided that their number does not exceed one-fourth of that of the whole Board.

There are eight Faculties which (as stated above) elect representatives to the Senate, and may also report to the Senate on matters connected with examinations, education and research.

These facts are stated to show that, apart from the representation of a few institutions and of the teachers on the Senate, the recognised and appointed teachers must be consulted in the appropriate Board of Studies on all matters affecting Internal Students before the Senate arrives at a decision thereon. The influence of the Schools and Institutions is thus exerted through their teachers throughout the whole organisation of the University.

One other point should, perhaps, be referred to. The University is undenominational, and may not impose religious tests, but seven of the Schools are connected either with the Church of England or with one or other of the chief Nonconformist bodies. It is, however, expressly laid down "that the University shall not be prevented from allocating funds on such conditions as the Senate shall think fit for the remuneration of any person appointed or recognised under the provisions hereinafter contained as a teacher of the University or for the expenses of his laboratory or for apparatus to be used by him, notwithstanding any conditions attached to any office held by him in any School of the University."

Thus, the Senate may allocate funds to teachers in Denominational Schools of the University though it is itself undenominational.

This brief account supplies in outline the information requested, but, of course, details can be furnished on any point on which further inquiry may be desired by the Commission.

ARTHUR W. RÜCKER.

LXXIX.

Memorandum by Professor Henry Jackson, Litt.D., on the relation of the Colleges to the University of Cambridge.

1. The University.

The University of Cambridge has about 13,000 members, who may be classified under three heads:

(a.) Members of the Senate: that is to say, Masters of Arts and other holders of superior degrees who, whether resident or non-resident, have kept their names on the Register of the University in virtue either of the continuous payment of 17s. a year, or of a composition for it. There are about 7,000 members of the Senate.

(b.) Bachelors: that is to say, persons who, having taken a first degree, have not yet proceeded to a second. There are, perhaps, 3,000 Bachelors. The great majority of them have ceased to reside. Like the Undergraduates, they are *in statu pupillari*.

(c.) Undergraduates: that is to say, junior students who have not yet taken the first degree, that of Bachelor. There are nearly, but not quite, 3,000 Undergraduates in residence.

It is to be observed that persons who have resided, but have not kept their names on the Register, although commonly spoken of as "Cambridge men," are not "Members of the University" in the strict sense of the term.

2. The Government of the University.

The government of the University is in the hands of the Senate. Subject to statutes made with the approval of the King in Council under the authority of an Act of Parliament, the Senate legislates, administers, elects officers, confers degrees. It performs

DOCUMENTS
SECTION K
LXXII.

these functions by voting upon a "Grace" or proposition, which is not subject to amendment. Legislative graces approved by the Senate are collected under the name of "Ordinances." All members of the Senate, whether habitually resident or habitually non-resident, are entitled to vote on graces; but it is only on rare occasions that non-resident Members of the Senate come to Cambridge to exercise their right. (The vote of 4th March, 1905, on the question of Compulsory Greek in the previous examination—placets 1,052, non-placets 1,559—was a very unusually large one). The Senate also elects the parliamentary representatives. In this election, and in this election only, voting by proxy is permitted.

The graces upon which the Senate votes are prepared, approved, and submitted, by the Council of the Senate, which consists of the Vice-Chancellor, four Heads of Colleges, four Professors, and eight other Members of the Senate. The elective members of the Council of the Senate are elected biennially for four years by the "Electoral Roll," which consists of those Members of the Senate who are resident in the University, together with certain officers of the University whether resident or not.

Departmental administration is in the hands of (1) a Financial Board, (2) a General Board of Studies, (3) Special Boards of Studies, (4) Permanent Syndicates or committees for the management of the Library, the Press, etc. These bodies report to the Senate, and their recommendations are submitted to the Senate in the form of graces.

3. Graduation.

To qualify for the first or Bachelor's degree, the Undergraduate must (1) reside during nine terms, (2) satisfy the examiners in certain examinations. Normally, the passman takes the previous examination, the general examination, and a special examination; and the honour man the previous examination (with certain additional subjects) and a tripos or honours examination. Nevertheless, an "Advanced Student" is excused three terms of residence, and may substitute a dissertation for the examinations: and a student who has attended lectures, &c., at an affiliated institution is excused three terms.

The Colleges certify to the University that the applicants for the first or Bachelor's degree have kept by residence the necessary terms; and the Council of the Senate satisfies itself of the sufficiency of each certificate.

A Bachelor of Arts may proceed to the degree of Master of Arts after six years from the end of his first term of residence, provided that two years have elapsed from his admission to the B.A. degree. For the M.A. degree there is no examination.

For admission to the Doctorate in Theology, in Law, and in Medicine, lapse of time and the performance of certain exercises are required. For admission to the Doctorate in Science and in Letters, the applicant must have given proof of distinction by some original contribution to the advancement of knowledge.

4. The Colleges.

The Colleges are corporations within the University. Each College has a Head (Master, Provost, or President), Fellows, Scholars, Pensioners. Some Colleges have also Sizars or poor scholars. The College has for its functions: (1) the management of the estates and the affairs of the house or society, (2) the promotion of science and learning, (3) the superintendence of the scholars and pensioners, and the provision of teaching for them.

Of the Fellows, some hold their fellowships as pensions, in virtue of a term of years spent in the service of the College; others are professors of the University, who receive also stipends from the University, or tutors, lecturers, officers, of the College, who receive also stipends from the College tuition fund or revenues; to others again, the fellowship is a prize, terminable in (say) six years. The maximum value of the fellowship is, in general, £250, but this maximum value is now very seldom attained. In some Colleges the dividend is progressively augmented in consideration of length of service.

The Colleges may have been originally mere halls of residence, lodging houses of a superior sort; but from ancient days they have supplemented the teach-

ing given by the University. Before 1867 or 1868 each College confined its teaching to its own students, but at that time a group of Colleges announced lectures in classics open to all the students of the associated Colleges, and out of this experiment came an inter-collegiate system, applicable to all Colleges, and, in a greater or less degree, to all subjects. At the present time a College admits students from other Colleges, on payment of a small fee, in some subjects to all its lectures, in others to certain of its more advanced lectures. Thus, in history, nearly all the lectures are open; in mathematics and classics most of the higher lectures are so. Departments of study in which a considerable plant is necessary are, for the most part, managed by the University: but, since 1882, (1) a tax has been levied upon the Colleges to defray the cost of this sort of teaching; (2) they pay, wholly or in part, the stipends of some of the teachers; and (3) they frequently appoint teachers and directors of studies to supervise the work of their own students. Thus, even in departments managed by the University, a very considerable part of the teaching is provided, directly or indirectly, by the Colleges.

By an ancient anomaly, the University recognises the Colleges, in so far as the Vice-Chancellor is chosen from amongst the Heads of Houses, and the Proctors and certain examiners are nominated by the Colleges according to a rota.

5. The Undergraduates.

Of the Undergraduates, who number not quite 3,000, about 100 are "non-collegiate," superintended by a Censor and a Board; about 90 are members of a hostel recognised by the University under an Ordinance; the rest are attached to one or other of the seventeen Colleges. The number of persons *in statu pupillari* differs widely in different Colleges. Thus the number at Trinity is estimated at 562, and the number at Magdalene at 36. Of the students attached to a College, some have rooms within the walls, others have licensed lodgings in the town; but all are admitted to the College dining hall, are subject to the College discipline, and are controlled by the College Tutor (or Tutors) and Lecturers. Undergraduates are expected to return to their rooms or lodgings before midnight, and breaches of this rule are notified to the College authorities. An undergraduate who desires to be absent from Cambridge for a night must obtain leave from his tutor.

6. General Remarks.

The system which I have tried to describe will probably seem complicated, because, while the functions of University and College are not very clearly discriminated, University and College are, apparently, antagonistic organisms. In reality, little difficulty arises, because the constituents of the University and the Colleges are identical, the Professors of the University being, for the most part, Fellows of Colleges, and the Fellows and Lecturers of Colleges constantly acting for the University as members of Boards and Syndicates.

Except on formal occasions, such as matriculation and graduation, the Undergraduate deals with the College, and not with the University. He arranges with the College Tutor or Director of Studies what lectures he is to attend, whether within the walls, or in other Colleges, or in the University. The College watches his career, and in due course submits his name to the University as a candidate for a degree.

In this statement I have not laid stress upon the part played by the University and the Colleges in the promotion of science and learning, because this is not matter of detailed enactment, and does not very directly affect the constitution of the foundations. I make this remark that it may not be supposed that I am blind to this aspect of University life.

Throughout I have confined myself strictly to those matters which seem to me primarily important. Fuller information will be found in "The Students' Handbook to the University and Colleges of Cambridge," published at the University Press, 1905. In preparing the present memorandum I have made frequent use of this excellent work.

HENRY JACKSON.

Summary of Scholarships, Exhibitions, and Prizes, awarded by Examination in the University and College.*

At Entrance:—

Twelve Exhibitions, six of £20 and six of £15 a year, tenable for two years, awarded on the result of the Examination held under the Board of Intermediate Education, Ireland.

Ten Exhibitions of £50 a year, tenable for two years, on the foundation of Sir John Gardiner Nutting, for students from unendowed schools, awarded on the result of the Examination held under the Board of Intermediate Education, Ireland.

Every year sixteen Junior Exhibitions, twelve of £20, and four of £15, a year for two years, and every fourth year the Kidd Scholarship, value about £76 a year for four years; open to all persons under nineteen, on the 1st of June preceding the Examination which is held in October, and who have just entered College, or, in the case of Candidates for Junior Exhibition, who pay a special fee of £1. The subjects of the Examination are:—Greek, Latin, Ancient History, English Essay, English Literature, English History and Modern Geography, Arithmetic, Algebra, Euclid with Deductions, Trigonometry, and Experimental Science.

Twenty-two Entrance Prizes, namely a First of £5 and a Second of £2 in each of the following subjects:—Greek Verse, Latin Verse, Greek Prose, Latin Prose, English Literature and Composition, English History and Modern Geography, French, German, Hebrew, Experimental Science, Natural Science, open with same limits of age.

About ten Sizarships annually, in Mathematics, Classics, Experimental Science, Hebrew, and Irish, awarded by examination in June, limited to poor students, and open with same limits of age. Sizars pay no half-yearly fees, have their Commons free, and their Sizarships last four years.

The Charles Wilkins Memorial Prize in Mathematics, £10, for women.

In any year of their Course Students may compete for:—

About sixteen Foundation Scholarships for men, awarded annually in Mathematics, or Classics, or Experimental Science (limited to 2). Successful candidates are styled Scholars of the House, and are members of the Corporation of Trinity College; they receive a salary of £20 Irish, have their Commons free, their rooms at a reduced charge, pay only quarterly tuition fees of £1 1s., and their Scholarships last usually for five years. The examination is held in Trinity Term.

Non-Foundation Scholarship, in the same subjects, for women, value £30 a year, with exemption from ordinary College Fees, save Tuition Fees. Such Scholarships are not awarded to any woman unless her marks are at least equal to those of the lowest successful Foundation Scholar in the same subject in the same year.

The Marshall Porter Memorial Prize, £20, is awarded annually to the most deserving unsuccessful candidate for Classical Scholarship.

Term Honors and Prizes, and Prizes at Lectures:—

Every Term, Examinations are held, at which Honors of the First and Second Rank are awarded to Candi-

dates who exhibit sufficient merit. In Michaelmas Term, Prizes of £4 and £2 are awarded to Candidates who obtain First and Second Honors, respectively.

Two Prizes of £1 10s. each, for Composition, are awarded each term to Freshmen students attending the Honor Lectures in Classics, and three Prizes of £2 each for Composition in French, German, and English, are awarded each Term to the students attending the Professors' Lectures.

*Prizes and Exhibitions open for Competition:—**In the Junior Freshman year:—*

Term Prizes (see above) in Michaelmas Term in: Mathematics, Classics, Experimental Science, Natural Science, Modern History, English Literature, French, German.

Composition Prizes at the Honor Lectures in Classics every Term (see above).

Catechetical Prizes, £2 each, at all the Lectures and Examinations, to Students who exhibit sufficient merit.

The Townsend Memorial Prize in Mathematics, £23, awarded on the results of the Honor Examinations in Mathematics.

In the Senior Freshman year:—

Term Prizes (see above) in Michaelmas Term in: Mathematics, Classics, Logics, Experimental Science, Natural Science, Modern History, English Literature, French, German.

Prizes for Composition at the Honor Lectures in Classics, every Term (see above).

Catechetical Prizes, £2 each, at all the Lectures and Examinations, to Students who exhibit sufficient merit.

Sixteen Senior Exhibitions, twelve of £20, and four of £15 a year for two years, awarded on the results of the Final Freshman Examination and the Honor Examinations of the Senior Freshman year.

The Jellett Prizes, £5 and £3, for first and second places at the Final Freshman Examination.

The Michael Roberts Prize, of £7 10s., in Mathematics; the William Roberts, £7 10s., in Classics; the Dunbar Ingram, £8, in Modern History; and the Littledale, £8 10s., in English Literature, are all awarded at the Term Prize Examinations in Michaelmas Term.

In the Junior Sophister year:—

Term Prizes in Michaelmas Term in: Mathematics, Classics, Logics, Experimental Science, Natural Science, Modern History, Modern Literature, Legal and Political Science.

Catechetical Prizes, £2 each, at all the Examinations to Students who exhibit sufficient merit.

The Lloyd Exhibition in Mathematics, value about £17 a year for two years, awarded at a special Examination in Michaelmas Term.

The Dr. Henry Hutchinson Stewart Literary Scholarship, value £20 a year for three years, awarded on the results of the Term Honor and Prize Examination, in French, German, and Literature, in the Freshman and Junior Sophister years.

The Cluff Memorial Prize, £12, in Modern History, awarded at the Term Prize Examination in Michaelmas Term.

* Extracted from "The Dublin University Calendar," Vol. I., page 174, *et seq.*

DOCUMENTS.

SECTION L.

LXXX.

In the Senior Sophister year:—

The Wray Prize, £30, in Logics and Metaphysics, awarded at a special Examination in Hilary Term.

The Degree Examination can be passed by answering in any of the following Courses:—Mathematics, Classics, Ethics and Logics, Experimental Science, Natural Science, History and Political Science, Modern Literature, Legal and Political Science, Engineering Science. Successful Candidates are styled Senior or Junior Moderators, and receive gold or silver medals. A Studentship, not exceeding £100 a year for five years, and a Brooke Prize of £40, are awarded to the first and second answerers, respectively, in Mathematics, combined with another Course; and a Studentship and Brooke Prize of similar values are awarded to the first and second answerers, respectively, in Classics, combined with another Course.

About £450 is awarded annually in other Prizes to deserving answerers at the Degree Examination.

Scholars who obtain Senior Moderatorships are usually granted Exhibitions of £10 a year for three years.

The King Edward Prize of £10 is awarded to the Respondent who answers best in the whole Course required at the Degree Examination.

The FitzGerald Memorial Scholarship and Medal in Experimental Science, £50.

Catechetical Prizes, value £2 each, are awarded at the Term Examinations to Students who exhibit sufficient merit.

In the Junior Bachelor year:—

The Bishop Law Prizes, value £20 and £10, in Mathematics, in Michaelmas Term.

For Graduates of not more than eight years standing:—

The Elrington Theological Prize, value £50, for an Essay on a Theological subject.

For Graduates:—

The Whately Memorial Prize in Political Economy, every fifth year, value about £60, awarded for an Essay on a specified Economic subject.

At the Examination for Fellowship, the first man out receives the Madden Prize, value about £310, provided there are two disappointed Candidates at least, and to him and other unsuccessful Candidates the Board usually grant prizes, varying from £60 to £20, in order to encourage them in reading for Fellowship.

In any year of their College Course up to M.A. standing:—

Students may compete for the following special Scholarships or Prizes, which are all awarded annually, unless a statement to the contrary is made:—

In Mathematics:—

The McCullagh Prizes, value £30 and £20, on a special course.

Classics:—

Bishop Berkeley's Gold Medals (2), for a special subject.

Vice-Chancellor's Latin Medals (2 Gold), on a special subject.

Two Vice-Chancellor's Prizes, value £20 each, for Compositions on special subjects.

The Ferrar Memorial Prize, £18 15s., for Comparative Philology, a special course being set.

Tyrrell Memorial Gold Medal, every second year, for Composition.

Mullins Classical Exhibition, value £18 a year for three years, every third year, awarded on a dissertation and an Examination on a special course.

History and Political Science:—

Prizes in Political Economy, £10 and £5, in Trinity Term.

The Blake National History Scholarship, every fourth year, value about £92 a year for four years, awarded for an Essay on a specified subject.

The Cobden Prize of £20 and Silver Medal, every third year, awarded for an Essay on some subject connected with Political Economy.

English:—

The Vice-Chancellor's Prizes, £20 and £20, for English Prose and English Verse.

Prize in Early English. New Shakspeare Society's Prize.

Languages:—

Hebrew, Chaldee, and Syriac, £40; Arabic, £10; Hindustani or Persian, £5; Sanskrit, £10: all awarded by Examination to Students attending the corresponding Lectures. Prizes in Irish, £20; Italian, £4 and £2; Spanish, £4 and £2.

In Subjects connected with the Study of Divinity:—Wall Biblical Scholarship, value £20 a year for five years. Prizes in Biblical Greek, £15; in Ecclesiastical History, £10 and £5.

Prizes in the Professional Schools:—

Prizes in the School of Divinity:—

Each Term two Prizes for Composition, value £2 each, one for the Senior Class, and one for the Junior. The Carson Biblical Prize, £18 12s. The Ryan Prize, £3 6s. Archbishop King's Divinity Prizes, £12, £8. Bishop Forster's Divinity Prizes, £17 10s. The Downes' Divinity Premiums: for Written Composition, £20 and £10; for Oratory, £12 and £8; and for Reading the Liturgy, £8 and £4. The Warren Church Formularies' Prize, £10. The Robert King Memorial Prize in Ecclesiastical History. Two Theological Exhibitions, value £60 and £20 a year, tenable for three years. The Kyle Irish Prize, £11. A Bedell Scholarship of £20 a year for four years, and a Bedell Prize of £10, are awarded from time to time.

Prizes in the School of Law:—

At the end of Trinity Term Prizes amounting to £45 may be awarded by the Professors to the best answerers of the Students attending their Lectures.

Prizes in the School of Physic:—

A Medical Scholarship of £20 a year for two years, and a Dr. Henry Hutchinson Stewart Scholarship of £10 a year for three years, in Chemistry, Physics, Botany, and Zoology, open to Students who have not completed two years.

A Medical Scholarship of £20 a year for two years, and a Dr. Henry Hutchinson Stewart Scholarship of £10 a year for three years, in Anatomy and Institutes of Medicine, open to Students who have not completed three years.

The John Mallet Purser Medal in Physiology and Histology, awarded at the Intermediate Medical Examination Part I. in June, open to Students who have not spent more than three years in the School.

The Fitzpatrick Scholarship of about £32 is awarded annually to the Student who obtains the highest aggregate marks at the five sections of the Final Medical Examination, provided that his Medical Course shall have been completed in the prescribed time of five years.

A Medical Travelling Prize, and a Surgical Travelling Prize, each of £100, in alternate years, open in Trinity Term to Students who have passed the Final Examination in Medicine, or in Surgery, as the case may be, within two years from the beginning of the Term.

The following Prizes are granted by the Professors:—Practice of Medicine, £5; Materia Medica, £5; Medical Jurisprudence, £5.

In the School of Engineering:—

A Prize in Geology and Mineralogy of £10 to third year's men, and one of £5 to second year's men.

A great number of the above prizes, &c., are paid out of Special Trust Funds, and accordingly are subject to variation, so that the amounts given must be taken only as fair averages.

LXXXI.

Summarised Statement of the Professorships and Lecturerships in Trinity College, Dublin, and the University of Dublin, showing briefly their Foundation, Tenure, and Emoluments.

NOTE.—The Council of Trinity College, Dublin, nominates to all Professorships excepting the Professorships in the School of Divinity and those the nomination to which is vested in some other body or persons by Act of Parliament, or by the directions of private founders.

Title.	Foundation.	Tenure, and Mode of Appointment.	Present Holder of.	Salary and other Emoluments from the College.
REGIUS PROFESSORSHIPS.				
Regius Professorship of Divinity.	Founded 1607, made a Regius Professorship 1761.	<i>Tenure.</i> —For life, or until promotion to Bishopric. Election by Board from among Doctors in Divinity of the University in Holy Orders in Church of Ireland.	Rev. John Gwynn, D.D., ... <i>Assistants</i> —Four.	£1,213. Total emoluments of present holder, including Examination Fees, £1,240.
Regius Professorship of Greek.	1761, ...	<i>Tenure.</i> —For life. Election by nomination of Council† Holder not to be Tutor, or occupy any other office incidental to Junior Fellowship except Junior Proctorship. Holder vacates office on ceasing to be Junior Fellow.	J. I. Beare, M.A., F.T.C.D., ...	Salary £200 per annum, with amount of such fees as holder would have received as Tutor Fellow. Total emoluments of present holder, £297, including Examination Fees and Salary as Junior Fellow and Assistant to Professor of Hebrew.
Regius Professorship of Law.	1663, ...	<i>Tenure.</i> —7 years if not previously a Fellow, for life if previously a Fellow. Fellow if appointed must vacate his Fellowship. Election by nomination of Council† Holder to occupy also the Chair of Civil Law and General Jurisprudence.*	H. Brougham Leech, LL.D., ...	£330 for non-Fellow. } Salary of present Holder fixed at £180.* £500 for Fellow. } Total emoluments of present holder £189 9s., including Examination Fees.
Regius Professorship of English and Feudal Law.	1761, ...	<i>Tenure.</i> —For life if holder is Fellow, otherwise for five years. Election by nomination of Council† Holder if previously a Fellow must resign his Fellowship. Candidates must be Barristers of two years standing.	J. V. Hart, LL.D., ...	£360.†
Regius Professorship of Physic.	1637, ...	<i>Tenure.</i> —7 years. Election by nomination of Council† Holder may be re-elected at expiry of period.	James Little, M.D., ...	£100.‡
Regius Professorship of Surgery.	Founded 1852, made a Regius Professorship 1868.	<i>Tenure.</i> —5 years. Election by nomination of Council†	Sir Charles Bent Ball, M.D., M.Ch.	£100.‡
ERASMUS SMITH'S PROFESSORSHIPS.				
Erasmus Smith's Professorship of Mathematics.	1762, by Board of Erasmus Smith,	<i>Tenure.</i> —For such period as Governors of Erasmus Smith's schools appoint. Election by Board on result of Examination, subject to person elected being approved by Erasmus Smith Governors. Preference given to Erasmus Smith Exhibitioners. Professorship to be vacated if holder having been a Junior Fellow vacates his Fellowship. Holder not to be a Tutor.	W. S. Burnside, M.A., SC.D., F.T.C.D.	Salary £200 per annum (including £60 received from Erasmus Smith Governors), with sum equivalent to amount of such fees as holder would have received as Tutor Fellow. Total emoluments of present holder including Examination Fees and salary as Junior Fellow, £282.
Erasmus Smith's Professorship of Natural and Experimental Philosophy.	1724, by Board of Erasmus Smith,	[Same as for Erasmus Smith's Professorship of Mathematics.]	W. E. Thrift, M.A., F.T.C.D., <i>Assistant</i> s, James T. Jackson, M.A., Joseph R. Cotter, M.A.,	[Same as for Erasmus Smith's Professorship of Mathematics]. Total emoluments of present holder, £207.
Erasmus Smith's Professorship of Oratory.	1724, by Board of Erasmus Smith as of Oratory and Modern History. Latter made a separate chair 1762.	Ditto, ...	E. Dowden, LL.D., LL.T.D.,	Salary £60 from Erasmus Smith fund. (See Professorship of English Literature).
Erasmus Smith's Professorship of Modern History.	1762, by Board of Erasmus Smith	Ditto, ...	J. H. Wardell, M.A., <i>Assistant</i> , H. L. Murphy, B.A.	Salary £80 (including £20 out of Erasmus Smith's fund). Total emoluments of present holder £242, including Examination Fees and Class fees, Army Class, &c.
KING'S PROFESSORSHIPS in School of Physic.				
King's Professorship of Practice of Medicine.	1717, ...	<i>Tenure.</i> —7 years. Holder may be re-appointed or re-elected at expiry of period. Election by a body consisting of 3 electors chosen by President and Fellows of Royal College of Physicians with Provost and Regius Professor of Physic.	J. M. Finny, M.D., ...	£92 6s. 2d. (£100 Irish), from Dun's Estate, Students' Fees from T. C. D.‡
King's Professorship of Materia Medica and Pharmacy.	1749, ...	Ditto, ...	W. G. Smith, M.D., ...	ditto.
King's Professorship of Institutes of Medicine.	1786, ...	Ditto, ...	W. H. Thompson, SC.D., ... <i>Assistants</i> —Two.	ditto. Total emoluments of present holder, including Examination Fees, £242.
King's Professorship of Midwifery.	1827, ...	Ditto, ...	Sir A. V. Macan, M.B., M.A.O.	£92 6s. 2d. (£100 Irish) from Dun's Estate Students' Fees from T. C. D.‡

* Existing Regulations liable to Revision at next vacancy. Present holder occupies an official position outside the College (Registrar of Deeds and Titles).
† Such nomination being subject to the approval of the Provost and Senior Fellows. ‡ Holder is a Physician in Practice.
‡ Present holder occupies an official position (Examiner of Titles) in Land Judge's Court. ‡ Holder is a Surgeon in Practice.

Title.	Foundation.	Tenure, and Mode of Appointment.	Present Holder of.	Salary and other Emoluments from the College.
THE OTHER PROFESSORSHIPS				
Professorship of Natural Philosophy.	1847, ...	Tenure.—Fixed by Board. Election by nomination of Council.*	F. Purser, M.A., F.T.C.D., ... Assistant, M. W. J. Fry, M.A., F.T.C.D.	£300. Total emoluments of present holder, including Examination Fees and salary as Junior Fellow, £382.
Royal Astronomer of Ireland.	1783, ...	Tenure.—For life. Election by Board.	E. T. Whittaker, S.C.D., F.R.S. Assistant, Charles Martin.	£700.
Professorship of Chemistry.	1711, ...	Tenure.—7 years. Election by Board. Holder may be re-elected.	S. Young, S.C.D., ...	£400. Total emoluments of present holder, including Examination Fees, £393.
Professorship of Applied Chemistry.	1841, discontinued 1881, re-established 1904	Tenure.—5 years. Election by nomination of Council.*	E. A. Werner, ...	£350. Total emoluments of present holder, including Examination Fees, £358.
Professorship of Botany.	1711, ...	Tenure.—7 years. Election by Board. Holder may be re-elected.	H. H. Dixon, S.C.D., ... Assistant, L. B. Smyth, ...	£425. Total emoluments of present holder, including Examination Fees, &c., £532.
Professorship of Geology and Mineralogy.	1844, ...	Tenure.—7 years. Election by nomination of Council.* Holder may be re-elected.	J. Joly, M.A., S.C.D., F.R.S., ...	£500. Total emoluments of present holder, including Examination Fees, &c., £536.
Professorship of Zoology and Comparative Anatomy.	Professorship of Comparative Anatomy founded 1872, united to Lectureship in Zoology 1895.	Tenure.—5 years. Election by nomination of Council.*	H. W. Mackintosh, M.A., ...	£300. Total emoluments of present holder, including Examination Fees, &c., £773.
Professorship of Latin, ...	1870, ...	Tenure.—7 years. Election by nomination of Council.* Holder may be re-elected. Holder not permitted to occupy office of Tutor. Holder vacates office on becoming Senior Fellow.	J. Gilbert Smyly, F.T.C.D., ...	£200. If holder is a Fellow he also receives sum equivalent to amount of fees he would have received if he were a Tutor. Total emoluments of present holder, £755.
Professorship of Hebrew, ...	1724. By Erasmus Smith Governors.	Tenure.—As fixed by Board. Election by Board.	Rev. G. Wilkins, B.D., F.T.C.D.,	£100 (including £60 from Erasmus Smith Fund). Total emoluments of present holder, as College Tutor, &c., including Examination Fees, &c., £379.
Professorship of Biblical Greek.	1838, ...	Tenure.—5 years. Election by Board.	Rev. Newport J. D. White, D.D.	£100.
Professorship of Sanskrit and Comparative Philology.	1858, ...	Tenure.—5 years. Election by nomination of Council.* [Tenure for life, with pension, granted to present holder].	R. Atkinson, LL.D., LITT.D.,	£300. Special increment to £300 granted to present holder. Total emoluments of present holder, £352.
Professorship of Romance Languages.	1778, as of Italian and Spanish.	Tenure.—5 years. Election by nomination of Council.* [Tenure for life, with pension, granted to present holder].	R. Atkinson LL.D., LITT.D.,	£300.
Professorship of Arabic, Persian, and Hindustani.	1856, ...	Tenure.—7 years. Election by nomination of Council.*	L. White King, LL.D., ...	£300.
Professorship of German, ...	1778, as of French and German. French now merged in Romance Languages Chair.	Tenure.—5 years. Election by nomination of Council.* [Tenure for life, with pension, granted to present holder].	A. M. Sells, LL.D., ...	£300. Special increment to £300 granted to present holder. Total emoluments of present holder, £402.
Professorship of Irish, ...	1840, ...	Tenure.—As fixed by Board. Appointment—subject to approval by Board—by Trustees of a Fund subscribed by some noblemen and gentlemen.	Rev. J. E. Murphy, M.A., ...	£100 and £102 paid out of fund. Total emoluments of present holder, £207.
Professorship of English Literature.	Originally founded in connection with Erasmus Smith's Professorship of Oratory. Made a separate Professorship 1867.	[Tenure for life, with pension, granted to present holder].	E. Dowden, LL.D., LITT.D.,	£500. Holder is also Professor of Oratory and Secretary of Council. His total emoluments are £639.
Professorship of Moral Philosophy.	1837, ...	Tenure.—5 years. Election by nomination by Council.* Holder may be re-elected.	H. S. Macran, M.A., F.T.C.D.,	£100. Total emoluments of present holder, £784.
Professorship of Political Economy.	1822, by Archbishop Whately.	Tenure.—For 5 years. Holder may be re-elected. Election by nomination by Council.* Candidates for Professorship must be graduates of a Chartered University in United Kingdom.	C. F. Bastable, LL.D., ...	£100. Holder is also Professor of Jurisprudence. His total emoluments are £503 16s., including Examination Fees.
Professorship of Ancient History.	1809, established as Lectureship. Made a Professorship in 1871.	Tenure.—5 years. Election by nomination by Council.*	W. A. Golligher, M.A., F.T.C.D.	£60. Augmented to £120 for present holder, in view of increased duties. Total emoluments of present holder, including Examination fees, £767.
Archbishop King's Professorship of Divinity.	1718. By Archbishop King and Rev. R. Dougall, who endowed Lectureship with £1,000, now a Professorship.	Tenure.—For life or in case of Junior Fellow, until he is elected Senior Fellow. Election by Board. Candidates must be Members of Church of Ireland in Holy Orders, and must hold Degree of B.D. in University.	Very Rev. J. H. Bernard, D.D., Assistants.—Five.	£700 (£44 out of Fund). Total emoluments, with Examination fees, £728.
Professorship of Ecclesiastical History.	1850, endowed partly by Primate Beresford.	Tenure.—5 years. Election by Board. Holder may be re-elected. Candidates must have B.D. Degrees in the University.	Rev. H. Jackson Lawlor, D.D.	£100. Total emoluments, including Examination Fees, £394.
Professorship of Pastoral Theology.	1888, endowed by James B. Ball, Esq.	Tenure.—5 years' appointment, subject to approval of Board by Archbishops and Bishops of Church of Ireland. Candidates must have Degree of M.A. or D.D. in the University, and be members of Church of Ireland in Holy Orders.	Rev. J. Paterson Smyth, LL.D.	Interest on endowment of £5,000.

* Such nomination being subject to the approval of the Provost and Senior Fellows.

Title.	Foundation.	Tenure, and Mode of Appointment.	Present Holder of.	Salary and other Emoluments from the College.
Professorship of Jurisprudence and International Law.	1877, discontinued 1888, re-established 1902.	<i>Tenure</i> .—To terminate at next vacancy of Regius Professorship of Laws. Election by nomination by Council.*	C. F. Bastable, LL.D., ...	£250. (<i>See Professorship of Political Economy.</i>)
Reid Professorship of Penal Legislation, Constitutional and Criminal Law, and Law of Evidence.	1888, endowed by R. T. Reid, Esq., B.L.	<i>Tenure</i> .—5 years. Holder not eligible for re-appointment. Appointment made by College on result of examination. Candidates must be members of Irish Bar.	R. G. L. Leonard, B.A., ..	Not to exceed £200, payable out of funds. Total emoluments of present holder, including Examination fees, £211.
Professorship of Surgery, ...	1849,	<i>Tenure</i> .—7 years. Election by nomination of Council.* Holder may be re-elected.	E. H. Taylor, M.D.	£150. Total emoluments of present holder, £264.
Professorship of Anatomy and Surgery.	1711, Lectureship. Made a Professorship in 1785.	<i>Tenure</i> .—7 years. Election by Board. Holder may be re-elected.	A. F. Dixon, M.B., Sc.D., ...	£250. Total emoluments of present holder, including Examination and School fees, £750.
University Anatomist, ...	1716,	<i>Tenure</i> .—Terminable with that of the Professor of Anatomy and Surgery. Election by Board.	Sir C. B. Ball, M.D., M.Ch., ...	£100.
Professorship of Civil Engineering.	1842,	<i>Tenure</i> .—5 years. Election by nomination of Council.* [Tenure for life, with pension, granted to present Professor.]	T. Alexander, M.A.I., Assistants—Two.	£300, increment to £500 granted to present Professor. Total emoluments of present holder, including Examination fees, £694.
Professorship of Music, ...	1764,	<i>Tenure</i> .—5 years. Election by nomination of Council.*	E. Prout, Mus. Doc., ...	£100. Total emoluments of present holder, including Examination fees, £100.
Professorship of Education.	1905,	<i>Tenure</i> .—5 years. Election by nomination of Council.*	E. P. Culverwell, M.A., F.T.C.D.	£100. Total emoluments of present holder as College Tutor, including Examination fees, £307.
Professorship of Agriculture,	1906,	<i>Tenure</i> .—3 years. Election by nomination of Council.*	W. A. Barnes, B.A.	£100, or the Fees payable by Students, whichever be the greater.
LECTURESHIPS.				
Donegal Lectureship in Mathematics.	1680, by Earl of Donegal	<i>Tenure</i> .—As fixed by Board. Election by Board.	R. Russell, M.A., F.T.C.D., ...	£70 (£27 paid out of Fund). Holder is also a College Tutor, and Registrar of Law School. His total emoluments are £1,152.
Lectureships in Hebrew (3),	—	<i>Tenures</i> .— (1)—Annual. (2)—Quinquennial. (3)—Annual.	(1)—J. I. Beare, M.A., F.T.C.D. (£200) (2)—Rev. N. J. D. White, D.D. (£250) (3)—W. Kennedy, M.A. (£250)	£160 in all.
Lectureship in French, ...	1906,	—	M. A. Geroldwohl, D.Litt., L. & L.	—
Lectureship in Dutch, ...	1903,	—	J. A. Hahn,	£50. Present emoluments, with Examination fees, £53.
Lectureship in the English Bible,	1893,	—	Rev. N. J. D. White, D.D., ...	—
Wallace Divinity Lectureship,	1901,	—	Rev. J. A. Jennings, M.A. ...	£48 (paid out of Fund).
Donnellan Lectureship (Divinity).	1794. By Mrs. Anne Donnellan, who endowed it with £1,243.	<i>Tenure</i> .—1 year. Election by Board. Candidates must be Clergymen who hold M.A. Degrees in University.	Rev. H. J. D. Astley, LL.T.D.,	Interest on £1,300.
Lectureship in Roman-Dutch Law.	1906,	<i>Tenure</i> .—As fixed by Board. Election by Board.	G. Maturin, B.A., LL.B., ...	£50. Total emoluments, with Examination fees, £53.
Lectureship in Medical Jurisprudence.	1883,	<i>Tenure</i> .—As fixed by Board. Election by Board.	H. T. Bewley, M.D.,	£124, being School fees.
Lectureship in Pathology ...	1895,	<i>Tenure</i> .—As fixed by Board. Election by Board.	A. C. O'Sullivan, M.D., F.T.C.D., Assistants—Two.	£200. Total emoluments of present holder, from Tutorial Fund, including Examination fees, £1,101.
Lectureship in the Practice of Electrical Engineering.	1902,	—	W. Tatlow, M.A., B.A.I., ...	£150. Total emoluments, including Examination fees, £152.
Lectureship in Electric Traction.	1903,	—	P. S. Sheardown,	£12 12s., for six lectures.
Lectureship in Mechanical Engineering.	1903,	—	W. E. Lilly, M.A., M.A.I. ...	£356. Total emoluments, including Examination fees, £368.

* Such nomination being subject to the approval of the Provost and Senior Fellows.

Decision of the Right Hon. Francis Blackburne, Vice-Chancellor of the University, on the right of appointment of the Registrar to the Senate.

[Reprinted from Vol. II. of the *Chartae et Statuta Sacrosanctae et Individuae Trinitatis Reginae Elizabethae Juxta Dublin*, pp. 142-146 (Dublinii, G. Weldrick, 1898).]

Question
as to
election of
Registrar.

(u) At the comitia held on the 16th of February, 1858, a question arose on the interpretation of this section [i.e., the tenth paragraph of the Letters Patent, 21 Vict., July 24, 1857 (Document IV., page 323)].

Mr. Galbraith then proposed that Mr. Jellett should be chosen to keep the seal of the senate, and to discharge the duties of its Registrar.

Dr. Carson seconded this proposition.

Dr. Todd, the Registrar elected by the Board, submitted that the Provost and senior Fellows were the only proper body to elect the Registrar of the senate.

It was then agreed that the ordinary business of the comitia should be proceeded with, and that the question in debate should be adjourned, and should await the decision of the Vice-Chancellor, the Right Honourable Francis Blackburne, Lord Justice of Appeal.

A meeting of the senate was held on the 17th of November, 1858, to receive the decision of the Vice-Chancellor on the question submitted to his judgment on the 16th of February last.

The comitia having been opened in the usual form, the Vice-Chancellor pronounced judgment in the following words;—

Decision.

"The question reserved for my opinion and decision is, whether Dr. Todd was the Registrar of the senate of this University before and at the time of holding the Spring Commencements. He was elected to the office of Registrar for one year, commencing the 20th of November, 1857. This election was the sole act of the Provost and senior Fellows of Trinity College, and their right to elect to this University office is the matter in controversy. In my opinion, their right is clearly established by the express words of the charter of the 13th Charles I.; they are:—

"Quod Præpositus, et seniores Socii, Collegii prædicti, pro tempore existentes, vel major pars eorundem, una cum Præposito, de cætero in perpetuum, habeant licentiam et potestatem eligendi et admittendi Cancellarium, Procuratores aliosque omnes officarios ad Academiam prædictam spectantes."

"These words are so explicit and comprehensive, that their effect and meaning cannot be made clearer by any exposition of them than they are by their simple perusal. If it were necessary—which it is not—to refer to usage as a test of their construction, it is found to have been at all times in conformity with their literal import. The Registrar elected by the Board, in whatever terms or form, has been the Registrar of the senate; and, on the other hand, not an instance exists of the appointment of Registrar or any other officer of the University (except, indeed, the Vice-Chancellor) by any other body or authority. It is satisfactory to know, that this is also the opinion of the eminent counsel to whom the matter has been submitted.

"I would further add, that my decision, or the grounds of it, are not to be understood to intimate any doubt of the right of the body incorporated by the recent charter of her Majesty to adopt a common seal, and to appoint, at any time, any officer that may be required for the execution of the duties that may appertain to it, in regard to property it may acquire for the promotion of useful learning."

The comitia were then dissolved.

A meeting of the senate was held on Saturday, the 11th of December, 1858, pursuant to the grace passed on the 6th day of June preceding.

The comitia having been opened in the usual form, the Vice-Chancellor said that he had given great attention to the subject of the legal constitution and duties of the senate, and that he was desirous of communicating to the Doctors and Masters the following paper, as supplementary to what he had said at the extraordinary meeting held on the 17th ult.:—

"The University senate is now a body corporate. Its powers and duties are not fully defined by the charter of the Queen, which was framed with special reference to that body and its accustomed duties and powers, as they had existed and been exercised since the reign of James the First. These duties and powers it confirms and perpetuates, with such alterations only as are expressed in it. The charter must, therefore, be expounded with special regard to the antecedent functions of the senate; and these are to be discharged in the same manner and by the same persons as they had been before the act of incorporation. It is now, for any practical purpose, not necessary to inquire whether the University was a corporate body before the late charter. But I may observe, that through the agency of the Chancellor, or the Vice-Chancellor, and other proper officers, for whose perpetual appointment the Crown made ample provision, the power to grant degrees was insured to continue for all time. So, and in like manner, the succession of members of the senate was to be for ever supplied out of the members of another body expressly incorporated. The state of things, which continued for above 250 years, was in exact conformity with the intention which these provisions indicate, though the University never used a common seal, nor authenticated its acts by the legal mode of proving them. These acts, however, were confined altogether to the conferring of degrees; and whatever the effect of the omission, it is little or none when we find that there has always been an uniform and customary mode of testifying degrees, namely, an instrument executed by the Board under a seal (not that of the College), which has been always received as evidence that the University confirmed the degree, and that the right to it had been acquired by the performance of the duties and proficiency in learning prescribed by the College rules and authorities. In addition to these and other considerations of a similar kind, it is to be kept in mind that the Legislature and the Crown, from the earliest period down to the time of the last charter, have recognised and treated the University as a body corporate; but what is directly to the purpose is, that this charter of the Queen recognises and perpetuates all the functions and duties of the University, and its means of exercising them, in their full integrity. Their discharge is now devolved on the senate as incorporated, subject to such modifications as are expressed in this charter. With respect, however, to the use of a common seal, and the administration of any property which the senate may acquire for the promotion of learning, it is not to be regulated or limited by any practice that has heretofore prevailed, and that body may fix on a common seal, and appoint officers in relation to any property it may acquire. The custody of the common seal will belong, in my opinion, to the Chancellor, as head of the Corporation.

"F. BLACKBURNE

"November 29, 1858."

JAMES H. TODD, Registrar.

December 20, 1858.

LXXXIII.

Opinion of the Assessor, The Right Hon. Judge Keatinge, on the occasion of the Appeal of
Denis Caulfield Heron.DOCUMENTS.
SECTION L.
LXXXIII

[Irish Law Reports, 1846 and 1847, Vol. IX., pp. 56-60.]

The eligibility of Roman Catholics to scholarships in Trinity College depends on the construction of the College statutes of 1794. As the law stood previous to the Act 33 G. 3, c. 21 (1793), there was nothing to prevent Roman Catholics from entering the College; but on their admission, they would (in common with all other students) have immediately become subject, under the College statutes, to the performance of religious duties which, as Roman Catholics, they could not conscientiously discharge, and in addition to this obstacle, they could not obtain degrees without taking the oaths of allegiance and abjuration, and making the declaration against transubstantiation, prescribed by the statute 3 W. & M., c. 2. The effect of this was that Roman Catholics were excluded from the College. The 13th section of the Act of 1793 is in these words:—"And whereas it may be expedient, in case his Majesty, his heirs and successors, shall be pleased so to alter the statutes of the College of the Holy and Undivided Trinity near Dublin, and of the University of Dublin, as to enable persons professing the Roman Catholic religion to enter into or to take degrees in the said University, to remove any obstacle which now exists by statute law; be it enacted, that from and after the first day of June, one thousand seven hundred and ninety-three, it shall not be necessary for any person, upon taking any of the degrees usually conferred by the said University, to make or subscribe any declaration, or to take any oath save the oaths of allegiance and abjuration, any law or statute to the contrary notwithstanding."

This section does not, nor does any other part of the Act of 1793, profess to interfere with any of the College statutes. It was in the power of the Crown alone, without the concurrence of the rest of the Legislature, so to alter the College statutes as to relieve Roman Catholics from all duties inconsistent with their religious opinions, and thus to give them the benefit of instruction in the University; but the Crown alone had not the power to remove the bar to taking degrees, which had been created by Act of Parliament. The College statute of 1794 recites the 13th section of the Act of 1793, and then proceeds as follows:—"Sciatis ergo quod nos, pro eâ curâ, quam singularem habemus erga subditos nostros qui religionem Pontificiam sive Romano-Catholicam profitentur, et ut iidem in dicto Collegio nostro et in dictâ academiâ bonis artibus et literis instituuntur: statuimus et ordinamus, quod omnibus subditis nostris qui religionem Pontificiam sive Romano-Catholicam profitentur, liceat, et deinceps licebit in dictum Collegium admitti, atque gradus in dictâ academiâ obtinere præstitis prius omnibus exercitiis per leges et consuetudines academiæ requisitis, aliquo statuto dicti Collegii, aut statuto, regulâ, aut consuetudine quâcunque dictæ academiæ in contrarium non obstante."

Thus, it will be observed, the College statute of 1794 very precisely defines the object which the Crown had in view, viz., that Roman Catholics should have a liberal education in the University; and then, to effect that object, it provides that it shall be lawful for Roman Catholics to be admitted and obtain degrees, notwithstanding any statute, rule, or custom of the College to the contrary. The words "in dictum collegium admitti atque gradus in dictâ academiâ obtinere," taken strictly and in their literal sense, would merely entitle Roman Catholics to enter College, and perform all the exercises (not inconsistent with their religious opinions) necessary for obtaining degrees; and having performed these exercises, and thus acquired proficiency "in bonis artibus et literis," then to obtain degrees accordingly. The College statute of 1794 does not, in favour of Roman Catholics, dispense in terms with the religious duties and obligations, which were, by the then existing College statutes, cast on all students; but I think it quite clear, that on its true construction, it, by necessary implication, dispensed, in favour of Roman Catholics, with all religious duties which they

could not conscientiously perform, so far as such dispensation was necessary for enabling them "in dictum Collegium admitti atque gradus, in dictâ academiâ obtinere"; but no further or otherwise. I think it equally clear, that the College statute of 1794 did not in any manner interfere with the religious duties of the students who were not Roman Catholics. In order to form a correct opinion as to the meaning of the words "in dictum Collegium admitti atque gradus in dictâ academiâ obtinere," and to determine whether they entitle Roman Catholics to become candidates for Scholarships, it is necessary to consider the nature of the University establishment. The Visitors being appointed by the founders, are bound to carry out their intentions, so far as they are clearly expressed in the original Charters and College statutes, save so far as by equally clear words or necessary implication, they have been abrogated by subsequent provisions. The College is a corporation; the members of which are the Provost, Fellows, and Scholars. The number of Fellows and Scholars is limited. The Charter of Elizabeth and Charles the First, and the body of College statutes accompanying the last-mentioned Charter, clearly contemplate an establishment for the advancement of religion, and in which not only all the members of the corporation, but all persons receiving instruction, should be Protestants. This will be abundantly shown by a few references to the last edition of the College statutes (1844). By the Charter of Elizabeth (pp. 7, 8) Fellows were to vacate their Fellowships at the end of seven years, "ut alii in eorum locum suffecti pro hujus Regni et Ecclesiæ beneficio emolumentum habeant." The statute "de cultu divino" (p. 44) points out religious duties to be performed by all the members and students, including the receiving of the Sacrament as received by Protestants; by the statute "de sociorum juniorum electione" (p. 42), all Fellows (except the Professors of Law and Medicine) must take priests' orders within three years after their election, or forfeit their Fellowships. The statute "de cultu divino" (p. 50) provides. "Porro Præpositi et sociorum seniorum erit videre ne qua Pontificiæ, aut hæreticæ religionis opinio intra Collegii fines alatur aut propugnatur sive publice sive privatim." The Charter of Charles the First (p. 38) removes the restriction preventing Fellows from holding their Fellowships for more than seven years, "it being found injurious to the welfare of the College, the State, and the Church." The better advancement of religion and learning, is the reason assigned for the Chancellor's assent (p. 119) to the College decree of the 23rd October, 1722, for increasing the salaries of the Provost, Fellows, and Scholars. The College statute of 1st George the Third (p. 147), "de Professore in sacrâ Theologiâ," proposes the establishment of a Professorship of Divinity by this recital, "cum vero permultum refert ut juvenus academica, illi præsertim qui sacris ordinibus destinantur in sacris literis, et religionis Christianæ doctrinis diligentius erudiantur, in quem præcipue finem fundatum fuit hoc Collegium." The words "in quem," &c., clearly stating in the words of the then Sovereign (George the Third, who afterwards made the College statute of 1794), that the advancement of religion was the principal object for which the University was established. The College statutes contemplate Scholars as a class in whose selection the Church and the State had an interest. By the statute, "De Scholaribus sive Discipulis" (p. 36), it is provided, that in the election of Scholars, those educated in Dublin schools, and counties where the College had lands, should be preferred, "ut quorum labore et sudoribus Collegii membra omnia, et singula sustentantur eorum potissimum liberi in eodem educantur et virtute ac humanioribus literis ad ecclesiæ et reipublicæ emolumentum instituuntur." Scholars were to hold their Scholarships (p. 38) until they obtained, or could have obtained, a degree of Master of Arts or until they were elected Fellows; and (p. 39) in the

DOCUMENTS.
SECTION L.
LXXXIII.

election of Fellows, Scholars were to have a preference. The Charter of Elizabeth (p. 5) gives to the Provost, Fellows, and Scholars, power to acquire land to the value of £400 a year—"ad sustentationem et manutentionem prædicti Collegii et ad relevamen et sustentationem Præpositi, Sociorum et Scholarum prædicti Collegii"; and the Charter of Charles the First (p. 32) gives power to the College to hold additional land, to the value of £200 a year, for the same purpose.

The cultivation of the Protestant religion appears to have been one principal object for which Trinity College was established, and the cultivation of learning was another. It was clearly in the power of the Crown to alter all or any of the College statutes imposing religious duties on students; and the Legislature having, by the Act of 1793, relieved Roman Catholics from the necessity of taking any oaths, on graduating, save those in that Act mentioned, there was nothing to prevent the Crown (if it had so pleased) from so altering the College statutes as to put Protestants and Roman Catholics in all respects (save as to Fellowships) precisely on the same footing; and the inquiry is, did the Crown, in the College statute of 1794, use words showing an intention to do so? The Act of 1793 relieved Roman Catholics from disabilities, but it cannot be denied that, after having in section 7 provided in general terms that they might hold, exercise, and enjoy all civil and military offices and places of trust or profit under his Majesty, his heirs and successors, there is in section 9 a long list of exceptions, including almost all of the most valuable offices, and in the enumeration of exceptions is to be found "Provost or Fellow of Trinity College, Dublin." Now, if Fellows had not been named in this exception, I think it very doubtful whether the provisions of the 7th section of the Act of 1793 could have extended to them, as they could not well be said "to hold any place of trust or profit under the Crown." The insertion of Provost and Fellows, and the non-insertion of "Scholars" in the 9th section, was relied on as affording an inference that the Legislature intended to open Scholarships to Roman Catholics; but the answer to this argument is to be found in the 7th section of the Act of 1793, which clearly does not include Scholars, and therefore it was not necessary to name them in the 9th section for the purpose of excepting them out of the operation of the 7th section. Besides, the 7th section of the Act of 1793 provides that Roman Catholics might hold any office or place of trust in, or be a member of, any lay body corporate, except Trinity College, and also that Roman Catholics might be Professors, Masters, or Fellows of any College to be thereafter founded in Ireland, provided such College should be a member of the University of Dublin, and not founded exclusively for Roman Catholics. All this seems to me to afford strong evidence of an anxiety on the part of the Legislature not to interfere with the Protestant character of the corporation of Trinity College. At all events, it clearly shows that where the Legislature intended to legislate in relation to Masters or Fellows of Colleges, or members of corporations, it deemed it right to use definite and precise language for the purpose. The 13th section of the Act of 1793 recites the expediency of removing the bar which then existed by statute to Roman Catholics taking degrees, in order to enable the Crown so to alter the College statutes as to allow Roman Catholics to enter College and take degrees. Without altering the Protestant character of the corporation, or allowing Roman Catholics to be members of it, and without diverting any of its funds from the purposes mentioned in the Charters of Elizabeth and Charles the First, it was quite possible for the Crown to admit Roman Catholics to enter College and obtain degrees, by relieving them for that purpose, and for that purpose only, from the obligation to perform religious duties; and if it be supposed that this limited object was in the view of the Crown, I do not think more suitable words could have been used for the purpose than those which are to be found in the College statute of 1794. The operative words of that statute are special and precise, and in my opinion, have the effect of dispensing with the religious duties imposed by the College statutes (on the Students generally) in favour of Roman Catholics, not altogether, and for all purposes, but merely for the limited purposes specified.

It must be admitted that if Roman Catholics are, on the true construction of the College statute of 1794, eligible to Scholarships, a change was thereby made

in the Protestant character of the corporation of so serious and important a kind, that it is not very probable the Crown would have made it intentionally, without at the same time making some change in the Scholar's oath. The Scholar's oath is not abrogated—it contains three important matters. The first consists of an acknowledgment, "*Regiam auctoritatem serenissimi nunc Regis Caroli secundum Deum summum esse in regnis Angliæ, Scotiæ, et Hiberniæ agnoscere, et nullius externi principis aut pontificis potestati obnoxiam*"; he then swears that he will willingly obey the College statutes, and do all in his power to have them observed by others, and next, that he will diligently perform all business of the College which shall be entrusted to his charge. It appears by the College statutes that in all cases where any changes were made in the duties or rights of the Provost or Fellows, which might render the existing forms of oaths inapplicable, the oaths were altered with reference to the new provisions, but here the oath is left entire. Assuming (as was argued) that a Roman Catholic could now conscientiously make the profession, "*regiam auctoritatem*," &c., in the same sense in which the words were used in 1637, and admitting (as was also argued), that a Roman Catholic, though intending not to perform the religious duties required by the College statutes, might conscientiously swear that he would obey the statutes, if the obligation on him to perform religious duties were abrogated by implication; I do not think he could conscientiously swear that he would do all in his power to have the statutes observed by others, it being clearly the duty of all Protestant Students and members to perform religious duties which he, as a Roman Catholic, could not conscientiously enforce the observance of. The College statute of 1794 does not require any oath from a Roman Catholic student. None of the antecedent College statutes required any oath from any student, but if it be supposed that the Crown, by the College statute of 1794, intended to make Roman Catholics eligible to be members of the corporation of Trinity College, it is strange, with the Act of 1793 before it, it did not require the Roman Catholic Scholar to take the oath which the Act of 1793 required from every Roman Catholic on becoming a member of a body corporate.

On the whole, I am of opinion, that on the true construction of the College statute of 1794, Roman Catholics are not admissible to Scholarships in Trinity College Dublin, looking at the precise and pointed language of that statute and of the thirteenth section of the Act of 1793, both in their recitals and their enactments; and looking to the whole body of College charters and statutes, I think it was the clear intention of the Crown, by the statute of 1794, merely to give to Roman Catholics the benefit of a liberal education, and the right to obtain degrees, but without allowing them to become members of the corporation of Trinity College, or in any manner changing its Protestant character.

For these reasons I advise the Visitors to dismiss Mr. Heron's appeal.

R. KEATINGE.

In accordance with the foregoing opinion, the Visitors made the following return to the mandamus:—

"By virtue of the within writ to us directed, and in obedience thereto, we, as such Visitors of the said College, did hold a visitation therein, and duly hear the said appeal of the within named Denis Caulfield Heron, as by the said writ we are commanded, and thereupon, on hearing the matter thereof in presence of Counsel learned in the law, as well on behalf of the said Denis Caulfield Heron as for and on behalf of the Provost and Fellows of the said College; and on full debate and due deliberation had thereon, we have adjudged it reasonable, and fit, and consonant to the true intent and meaning of the statutes of the said College, and the laws of this realm, in that behalf, to order and determine that the said appeal of the said Denis Caulfield Heron should be dismissed; and we have thereupon dismissed the same; all which we humbly certify to our Lady the Queen, at her Court of Queen's Bench at Dublin, as by the within writ we are commanded.

So answer,

JOHN G. ARMAGH,
RICHARD, DUBLIN,

Visitors.

LXXXIV.

DOCUMENTS.

SECTION L.

LXXXIV.

Extract from Opinion given by Francis A. FitzGerald, Esq., Q.C., as to the relations between Trinity College, Dublin, and the University of Dublin.

[Printed as a note to Dr. Todd's Introduction to the Catalogue of Graduates of the University of Dublin, pp. xxiii.-xxv.]

"The English Universities were lay corporations, having a distinct corporate existence from the several eleemosynary corporations in them, called Colleges. But the members of these University Corporations were not merely the proper members of the several College Corporations, but included the Chancellor, the Professors, and every Graduate, and every matriculated Undergraduate student in each and every one of these Colleges. 1 Kydd, 328, and Statute 13 Eliz. c. 29. Every student in any College became on matriculation, though not a member of the College Corporation, a member of the University Corporation, just as the freeman of a corporate town, who may constitute no part of the governing body of the corporation, is yet a member of the corporation.

"To be, then, a member of the University Corporation, it was essential that a student should belong to some College in the University, but not that he should be a member of the College Corporation; and upon matriculation, though he did not become a member of the College Corporation, he did become a member of and free of the University Corporation.

"Of course if there had happened to be but one College in the University, no student who had not been admitted into that College could be a member of the University, but on matriculation he would have been a member of the University, though, by the constitution of the College, he might not be a member of it, *qua* Corporation.

"Now what the Charter of Elizabeth does after constituting the Provost, Fellows, and Scholars a corporation, '*matrem Universitatis*,' is to give to all the *Studiosi* in the College (including to be sure the members of the corporation, in their individual capacities, but comprehending also every student to be admitted to the College) the privilege of obtaining Degrees, and for that purpose, of performing all such acts and exercises as the Provost and major part of the Fellows of the College should think fit, and of electing, creating, and appointing all proper officers for that purpose, with the exception of a Chancellor, whose first appointment is made by the Charter itself, and whose subsequent appointment is to belong to the Provost and major part of the Fellows.

"Nothing appears to be more clear (notwithstanding the singular mode of punctuation adopted in the printed form of the Statutes, which, I may observe, is not followed, and indeed could not well be in the recital of the same Charter by Charles I.) than that the only University privileges mentioned were given, not to the Corporation of the College, or to those particular students who alone are members of the

Corporation, but to each and every student admitted to the College as well.

"The consequence of this, of course, would be, that, by the mere creation of any other College in the University, each and every *Studiosus* admitted to it, whether belonging to that new College Corporation or not, would become entitled to the University privileges.

"This is what I apprehend is meant by *Mater Universitatis*; every alumnus of the College, and not merely the proper members of that corporation, became, by being such alumnus, entitled to University privileges, and a member of the University. The College was *Mater Universitatis* because by the first foundation her children, and her children only, constituted the University.

"But though so far the analogy of the English Universities was carried out, the enjoyment of those privileges was not secured to the students by making them, in conjunction with the Chancellor and Professors, a corporation (most probably, I should say, because the constitution of other Colleges in the University was contemplated), but it was secured to them by appointing a Chancellor to exercise the Royal function of conferring Degrees, and providing for future appointments to that office by the Provost and Fellows of the College, and by giving to the *Studiosi themselves* the power of electing Proctors and all other necessary officers for the purpose.

"This is altered by the Charter of Charles I., which gives, with the consent of the College Corporation, to the Provost and Senior Fellows the right of appointing the Chancellor, Proctors, and other necessary officers; but there is nothing that I can find, either in the Charter or Statutes of Charles, or any other Statutes or Charter, to take away further the University privileges given by the Charter of Elizabeth to the whole body of students; and in my judgment, each and every Graduate, and each and every student admitted to Trinity College, and matriculated, was, antecedently to the Letter Patent of the Queen [meaning the Letter Patent of 21st Vict.], and is a member of the University in the only sense in which the University had or has an existence.

"It is, I apprehend, in this sense that the Letter Patent of James I. recites that Trinity College is and is accounted an University, and has the privileges of an University, and that the Charter of Charles describes it as a College with the privileges of an University; not that the privileges belong to it *qua* corporation, but because the privileges do belong to its alumni, and to its alumni only."

Opinion of Sir Joseph Napier, Bart., formerly Lord Chancellor of Ireland, Vice-Chancellor of the University of Dublin, on the relations of the University of Dublin and Trinity College.

(Reprinted from the Introduction to Volume II., of "A Catalogue of Graduates of the University of Dublin."—Hodges, Figgis, & Co., Ltd., Dublin, 1896.)

The constitution of the University of Dublin, and its relation to Trinity College, have been a subject of controversy. Some questions that were generally supposed to have been settled have been recently re-opened. The Letters Patent of Her Majesty the Queen (21 Vict.) confirmed to the Provost and Senior Fellows of the College, and to the Chancellor or Vice-Chancellor, Doctors and Masters of the University, without any alteration or diminution whatsoever (save as therein provided), all such powers, rights, and privileges as by Royal Charters and Statutes had been given or granted to the Provost, Fellows, and Scholars of Trinity College, or to the University of Dublin, or which by long usage had been possessed.

The Introduction to the first volume of the University Calendar (1833) contains an instructive historical account of the foundation and settlement of the College. It afterwards states that neither in the Charter of Queen Elizabeth, nor in the Charter of King Charles I., was the University recognised as a corporate body distinct from the corporation of the College: that the University was simply a College with University privileges and powers, and that the Provost and Senior Fellows of the College constituted the only Senate or University convocation which was recognised by Charter, and were entrusted with the same powers of electing officers and conferring degrees, which, in the English Universities, belong to a body consisting of Masters of

Arts and Doctors in the higher faculties. A reference is therein made, in terms of unqualified approval, to a pamphlet published A.D. 1804 by the late Rev. George Miller, D.D., then a fellow of the College, "for a complete and satisfactory discussion of the question about the distinction between the College and the University."

This discussion was afterwards deemed by the writer to be incomplete and unsatisfactory. In his Introduction to the Book of Graduates, published in 1869,* the same learned and much-lamented writer (the late Dr. Todd) confuted the positions on which Dr. Miller relied in order to prove that the University was not a distinct body.

In this later publication reference is made to the official records, whereby it is shown that the "University consisted in Temple's time, as it does now, of the Chancellor or Vice-Chancellor with the Congregation of Doctors and Masters who constitute the Senate; and Caput Senatus Academici." Temple was Provost of Trinity College from November, A.D. 1609, until January, A.D. 1627; and therefore the University and its Senate, as above described, could only have been constituted under the Charter of 34 Elizabeth, A.D. 1592. This Charter consists of two parts—one relating to the College, designed to be (as described therein) "*Mater Universitatis*," for the education, institution, and instruction of youths and students in arts and faculties; the other relating to the University that was to be brought into existence. The former provides an eleemosynary foundation for the support and habitation of a Provost, Fellows, and Scholars (whom it names), and their successors, and it constitutes these a body politic and corporate. It gives power to the Provost and majority of the Fellows to make laws for the government of the College and to adopt such of the laws that were established in either of the Universities of Cambridge or Oxford as they should consider to be suitable to themselves. The latter part of the Charter confers on the *studiosi* of the College the privilege of obtaining degrees of Bachelor, Master, and Doctor, "*juxta tempus idoneum*," in all the arts and faculties. It gives power to the Provost and major part of the Fellows to prescribe the preliminary acts and scholastic exercises; to appoint "*omnes personas pro hujusmodi rebus melius promovendis*," whether Vice-Chancellor, Proctor, or Proctors, and to elect the Chancellor except the first, who is named in the Charter as having been appointed by the Queen.

In interpreting this Charter it is proper to consider the circumstances under which it was granted, and which must be supposed to have been present to the mind of the Queen and her official advisers at the time of making the grant. Express reference is made to the Universities of Cambridge and Oxford; and the clause in which power is given to elect the proper officers, for the purpose of having degrees conferred must be taken to mean such as there were in these Universities for the like purpose. Three of these officers are expressly named—the Chancellor, Vice-Chancellor, and Proctor or Proctors. A like reference is impliedly made as to the degrees, and the "*idoneum tempus*" at which they were to be conferred—*et sic de similibus*.

As to the meaning of "*Universitas*," there are two reliable authorities. Dr. Cowell was the Regius Professor of Civil Law in the University of Cambridge. He published a work that was printed at Cambridge A.D. 1607, in which he gives the following explanation: "*Universitie (Universitas) is, by the Civil Law, any body politic or corporation; but, in our language, it is (at the least most ordinarily) taken for those two bodies that are the nourishers of learning and the liberal sciences, Cambridge and Oxford.*" Another learned civilian (Dr. Ayliffe), a very high authority, in a treatise on the state of Oxford, published in 1714, states, and proves, that Oxford had the title of "*University*" before the reign of Henry III. He adds that, "by legal grants all Professors and students incorporated into a body politic, in the Latin tongue called *Universitas*, do bear this name, and become hereby a republic of learning." He comments on and rejects other explanations of the word "*University*."

I have therefore been led to conclude that, inasmuch as the College is described in the first part of this Charter as "*mater Universitatis*," and express reference is made therein to the Universities of Cambridge and Oxford, and in the latter part a like reference is plainly to be implied, the University to be brought forth was intended to be constituted on the model of these, so

far, at least as related to what belonged to a "*Universitas*," in its then accepted meaning.

The Colleges in these Universities were adjuncts or accidents thereof. They were the later, the Universities the earlier institutions; but here, both the College and the University had to be created under the Queen's Charter, and from the nature of the case, the College had to take precedence. It could not indeed be considered as having been intended to be an accidental adjunct to the University, but it might well have been designed to be subsidiary, by providing a tutorial system, in subordination to Professorial, and thus affording what, according to Sir W. Hamilton, is "the condition of an absolutely perfect University."

The designation of "*mater Universitatis*" was appropriate, as well because the *studiosi*, who were to be admitted to take degrees, were to be supplied by the College, as because the prescribing of the preliminaries and conditions of graduation, the appointment of University officers (except the first Chancellor), and the making of regulations for conferring degrees, were confided to the governing body of the College.

Although the actual creation of the University was, under the provision of the Charter of Elizabeth, only effected by the instrumentality of the College, it does not follow that the University is not to be considered as having been founded by the Queen herself. What was done in pursuance of the Charter was done by the Queen's authority, and is deemed in law to have been done by herself. It has long been settled by law that the Sovereign in erecting a corporation may either name the officers and corporators, of his or her own authority, or by express words empower others to do so.

The distinction between the founding of the College and the founding of the University should be clearly understood. There were available means of completing the foundation of the College at once and directly; but the case was different as to the University; for although in legal intendment it was founded by the Charter, it had afterwards to be brought forth by the College as its "*mater*."

If the Charter of Queen Elizabeth be looked at, without reference to what was done under its provisions, it is likely to be (and it often has been) misunderstood to have merely founded a College with University privileges. But when the whole matter shall be duly considered, it will appear that the University designed by and constituted under this Charter was intended to be, and was a distinct incorporation.

The power given to the Provost and Fellows, with reference to the conferring of degrees, sufficiently implied a power to make such subsidiary regulations as were not unreasonable, nor against any rule of law, but were suitable to the purpose for which the express power was given. These were made and were entitled "*Consuetudines seu Regulæ Universitatis Dubliniensis, pro solenniore graduum collatione*." The meaning of "*Universitas*" as then and now understood, is shown by the prescribed form of supplication for a degree.

In Barrett's MSS. the learned writer says—"The Crown vested in the Provost and major part of the Fellows the power of transacting everything about the conferring of degrees, and consequently that of framing University statutes, or, as they are called, *Consuetudines seu Regulæ Universitatis Dubliniensis, pro solenniore collatione graduum*. Under this grant Temple drew up his Statutes for that purpose [i.e., *pro solenniore graduum collatione*], and so must the author of these *Regulæ* (whoever he was) have done. Acting under this authority, which being derived from the Crown may be called Royal, statutes so made seem to me not to require any further confirmation or interference. Accordingly I know no instance where the Crown interfered in making or changing any of them. Acts of Parliament indeed, imposed certain oaths at Commencements, etc., but this was not making any new law or statute, and in the Testimonium is mentioned as additional to the exercises imposed per *leges et consuetudines*." Barrett MSS., 355.) The propriety and reasonableness of these *Regulæ* are clearly shown by Dr. Todd in the Introduction to the Book of Graduates, p. xviii, n.; p. xxix., pp. xxxii., xxxiii. They were recognised as the "*leges academice*" in the Statutes of King Charles I., cap. v. They have been recognised, not only by the Crown, but by the Legislature.

The Charter of King Charles I. is dated A.D. 1637. It is important to bear in mind how matters stood at the time when this Charter was granted. The "*Universitas*" designed by the Charter of Queen Elizabeth

* P. xvi., n., xviii. n.; pp. xxxi., xxxiii. (a), xli., l. lvi., &c.

had been constituted by the Provost and Fellows of the College in pursuance of its provisions. The Senate was governed by a code of regulations drawn up and approved under the power impliedly granted. A period of gestation (if I might say so) had been required before the University could thus have been brought to the birth. As the design was that it should come from the womb of the College, privileges have been conferred on the *studiosi*, and powers given to the Provost and Fellows of the College, by which provision was made for the constitution and continuance of a proper staff of University officers, and of a body of accredited teachers. It may therefore be said that the College was adorned or invested with the privileges of a University. But after the holding of Commencements (which first took place A.D. 1600, *juxta tempus idoneum*, i.e., seven years after the foundation of the College), the University was brought to the birth, and thenceforth it was distinct from, although dependent on, its mater—the College. As thus constituted, and as it then existed, it was recognised by the Charter of King Charles I. as "*Academia sive Universitas*." The Chancellor, who had been described in the Charter of Elizabeth as Chancellor of the College (at a time when the University existed only in intendment and consideration of law) is designated in the Charter of King Charles I. as Chancellor, "*Academice sive Universitatis predictae*." This Charter creates the distinction of Senior and Junior Fellows, and makes the Provost and Senior Fellows the governing body of the College. It gives to them the power of nominating, electing, and admitting the Chancellor, Proctors, and all other officers "*ad Academiam spectantes*," save the Vice-Chancellor—he is to be appointed by the Chancellor. To them the power is given by the Statutes of King Charles I. (cap. iv.), *ut graduum collationes definiant et concludant*." The *leges Academicæ*, as already observed, that had been framed under the Charter of Queen Elizabeth, are recognised in these Statutes, cap. v. (Barrett MSS., 357).

This code, much of which was taken from the Statutes of Trinity College and other Colleges in Cambridge, prescribes (*inter alia*) a course of discipline and tutorial instruction for undergraduates (cap. xv.), which has since been largely amended and improved. In cap. xxv. the College is again described as "*mater Universitatis*." The Chancellor of the University, or (in his absence) the Vice-Chancellor, together with the Archbishop of Dublin, are made the only Visitors of the College, with large powers of supervision. Where power is given to the Provost and Senior Fellows to make new decrees, "*in casibus ommissis*," it is required that they should have the consent of the Visitors. In cases of doubt as to the interpretation of any of the College Statutes, provision is made for a reference to the Visitors, whose decision is to be final and conclusive.

It would seem that the framers of this code looked upon the College as subsidiary to and connected with the University, so as to secure completeness of instruction in arts and faculties. The University is not the less a distinct body because the College supplies the *studiosi* whom it prepares for their first degree in Arts, and for availing themselves of the teaching of the Professors of the University to qualify them for the higher degrees. It would be strange, if not absurd, to have designated the College as "*Mater Universitatis*," if the University was not to be regarded as distinct from the College; but it may have been truly said that Queen Elizabeth founded and endowed the College, "*et Academicæ privilegiis ornavit*." This is all that is said on the subject in the preface or preamble to the Caroline Code of Statutes for the College in which the "*leges Academicæ*" are expressly recognised as the code of the University. In the Charter of King Charles I. there is nothing whatsoever to indicate that the College and the University were not to be considered as distinct, though not independent bodies.

In the exercise of their powers the governing body of the College appointed the University officers (except the first Chancellor, and after the Charter of King Charles I., the Vice-Chancellor); they prescribed the preliminary acts and exercises for obtaining, and provided suitable regulations for the conferring of, degrees, by which a concurrent voice was given to the Senate of the University. This was not only a confirmation of the fitness of those who obtained degrees, but was also a guarantee to the public that the power confided as to the conferring of degrees was properly exercised.

One corporation may be made out of another; and under the same Letters Patent or Royal grant, a body corporate may be constituted for a limited purpose and to act concurrently or conjointly with another body. The governing body of the College could act with the Senate of the University in relation to the conferring of degrees, without prejudice to the distinct character and constitution of the two corporate bodies of the College and the University.

So far the intention is manifest that the University should be a distinct but not an independent body. With its appropriate head, its succession of Doctors and Masters, its perpetuity of privilege, its proper officers, its Senate, its professors and schools, and its *leges Academicæ*, it is (as it seems to me), a distinct incorporation.

The late Lord Chancellor Blackburne, on the 11th December, A.D. 1858, when he was Vice-Chancellor of the University, communicated to the Senate a formal and deliberate opinion, in which he observed that, "through the agency of the Chancellor or Vice-Chancellor, and other proper officers, for whose perpetual appointment the Crown had made ample provision, the power to grant degrees was insured to continue for all time. The state of things" (he said) "that had continued for above 250 years was in exact conformity with the intentions these provisions indicate. That, in addition to these and other considerations of a similar kind, it was to be kept in mind that the Legislature and the Crown, from the earliest period down to the time of the last Charter (21 Vict.), had recognised and treated the University as a body corporate; but what was directly to the purpose was, that the Charter of the Queen recognises and perpetuates all the functions and duties of the University, and its means of exercising them in their full integrity."

The authority of so eminent a judge, whose attention had been specially directed to this subject, when he was Vice-Chancellor of the University, not only before but after the granting of the Letters Patent of 21 Vict., naturally led me at the time to accept this exposition as final. But as the learned author of the Introduction to the Book of Graduates, published A.D. 1869, propounded a view of this subject which not only was at variance with this opinion of the late Vice-Chancellor of the University as to its corporate character, but also impugned the received opinion as to the import of certain parts of the Charter of Queen Elizabeth, I felt that, having succeeded to the office of Vice-Chancellor, I was in some degree called on, if not bound, to consider the several positions which he put forward, and the arguments and proofs which he offered in order to sustain them.

In the Introduction to the Book of Graduates, it is more than once asserted that the University of Dublin is not a body corporate. It is true that an eminent lawyer gave an opinion to this effect when consulted on this question, in the early part of the year 1858. But this was known to, and had been considered by, the late Vice-Chancellor of the University before he drew up the opinion that he publicly communicated to the Senate at the end of the same year. His great learning and judicial experience, as well as the soundness of his judgment, give an impressive authority to his deliberate exposition.

In this Introduction it is said that the "true ancient notion of a University was a special society of students, although not in the strictly legal sense a corporation." It might suffice to say that the material question is not as to the ancient notion, but in what sense was the word understood by the advisers of Queen Elizabeth and of King Charles I., at the time of granting the Charters?

The case of the University of Paris is referred to, and a passage is cited from Halmagrand on the origin of that University, in which this writer says that it was formed of itself by the association of its members, and that it never had either a Regal or Papal Charter. It does not follow from this that it was not a corporate body. Blackstone says that by the Civil Law, corporations might be created by the mere act and voluntary association of their members, provided such convention was not contrary to law. Perhaps it is more accurate to say that such bodies could not assume a corporate character without the consent of the head of the State. It stands confessed that the University of Paris has been recognised by both Sovereigns and Popes, and has been granted many privileges under the name of a University. Savigny, in his work on

DOCUMENTS.
SECTION I.
LXXXV.

the Roman Law of the Middle Ages,* in terms describes the University of Paris as a *corporation* of teachers; and he contrasts it with Bologna, which he describes as a *corporation* of scholars. These were the two oldest Universities. Merlin treats the old French Universities as corporations. In a learned treatise of Professor Bluntschli, of Heidelberg, on University Constitutional Law,† he describes Universities (especially in Germany), as they stood at first, "in the juristic-corporate sense of the word, beginning with single sciences; and, as they have become organic institutions, embracing and developing to full ripeness the entire higher scientific culture." He explains in a lucid manner the important influence of their corporate character, in securing the independence and the mental freedom that the successful study of science demands, and for which corporate self-defence (he says) is an excellent foundation. He sets forth the principal corporate privileges: the last to which he refers is the representation which is conceded to the corporations of the Universities in the Council of the nation, which (he adds) "is quite as much corresponding to its great importance for the spiritual life of the nation, as servicable for discerning deliberations on legislation." The whole of the extract, for which I am indebted to my friend, Mr. Droop, of Lincoln's Inn, late Fellow of Trinity College, Cambridge, will be found in the Appendix. From these and other authorities it appears that the true ancient notion of an University included the corporate foundation. Sir William Hamilton, therefore, has well described the ancient Universities as "Cosmopolite corporations." The great authority of Savigny may suffice as to the particular case of the University of Paris. Halmagrand (on whose authority Dr. Todd has relied) was a medical writer, not a jurist.

It will be seen from what Ayliffe has said in the extract given in note A, as well as from what has been stated and explained by Professor Bluntschli, that the name of University did not originate in a "Universitas Studiorum." Its primary and etymological meaning is an aggregate whole; it is the generic name of a body corporate. In Paris it was applied to a body of teachers; in Bologna to a body of learners; and in Oxford and Cambridge to a like body of masters and scholars. It is quite true (as Dr. Todd observes) that the Universities of Oxford and Cambridge were first incorporated by Act of Parliament, about twenty years before the date of the Charter of Queen Elizabeth, under which the University of Dublin was founded. But he has not adverted to the reasons which made it expedient to have this Act passed. They are stated by Sir E. Coke.‡ He states that each of the Universities had divers courts, jurisdictions, and powers, by the Charters of the Kings of this realm, divers of which were not grantable by Charter, but by Parliament only; which being espied, Queen Elizabeth, who (he says) excelled all others of her sex in knowledge, both divine and human, for the love and affection that she had to her Universities, and with a view to settle and secure their rights and privileges, and quiet all controversies, procured the passing of this Act in order to confirm these rights and privileges. They were incorporated by a certain name in the Act, "albeit" (as Coke adds) "they were ancient corporations before." The Act refers to the Letters Patent previously made by the Queen or by any of her progenitors or predecessors, "to either of the said corporated bodies severally." Throughout, it recognises them as corporations theretofore and then subsisting, and confirms all their powers, rights, and privileges, that they might prosper in their study with quietness, and be free from vexatious controversies.

The Letters Patent of King James I. (A.D. 1613), may here be adverted to. The main purpose seems to have been political, as part of a plan for increasing the borough representation in his new Irish Parliament. They speak of the College as "*mater Universitatis*" and afterwards deal with the University and the College as one institution, proper to be represented in Parliament as one of the new boroughs. They also speak of other Colleges and Halls to be erected in the said University; thus treating the College and the University as distinct. Few of the native *studiosi* of the College had at that time obtained any of the higher degrees; and as the College (but not the University) had property with which it had been endowed, and as its influential members were Englishmen, it may have been considered important, as a matter of State policy, to keep the two bodies so bound together as to afford a sufficient pretext for making a new borough, in which

the members of the corporation of the College would be the electors. Whatever view may be taken of it, it could not vitiate the construction of the Charter of Queen Elizabeth, much less that of King Charles I.

I am not aware that there is any other reason put forward by Dr. Todd in support of his statement that the University is not a corporation. Dr. Miller, indeed contended that, as a name had not been expressly given to the University by either Charter, this was a decisive objection to its claim to be a body corporate. This is akin to the objection that there was no express grant of a common seal. It has been settled (at least from the time of Lord Chief Justice Holt) that it is sufficient if the name may be implied from the nature of the thing. The maternal name, i.e., the University of Trinity College, is that which is used in the treaty and the Act of Union between Great Britain and Ireland; and the local name—the University of Dublin—is found in the title and heading of the *Regulæ* that were drawn up by Provosts Temple and Bedell; in the Queen's Charter (21 Vict.), by which the rights and privileges of the University have been confirmed; in the 24 and 25 Vict., c. 53, which speaks of "the Universities of Oxford, Cambridge, and Dublin;" and in the 31 and 32 Vict., c. 112, in which it is called "the Borough of the University of Dublin."§

No precise form of words is required to make a corporation. The instance to which Sir Edward Coke refers, in order to sustain this position, is much to the purpose in the present discussion. Of the corporations that have been established directly by the King's Charter, the *guilds* seem to have been among the most ancient. Cowell says that one of the meanings of the word "guild" is, a "fraternity or company combined together by orders and laws made among themselves by the Prince's license." Sir E. Coke says that it signifies "*contubernium seu fraternitas incorporata*." "I have seen" (he says) "the Charter made by King Henry I., *Textoribus Lond.*, by which he grants to them that they shall have *guildam mercatoriam*; and a confirmation of it made by Henry II., by which Charters they were incorporated." In order to show that it was not necessary that a corporation aggregate should have a head, he relies on the case of the *guilds* as decisive. "For at first (he says) the greater part of corporations were bodies without any head, by force of these words, *guilda mercatoria*." He had in a previous case stated that "the king may erect *guildam mercatoriam*, i.e., a fraternity, or society, or corporation of merchants, to the end that good order and rule might be by them observed for the increase and advancement of trade and merchandise."

When a corporation has been duly created, there are incidents which are tacitly annexed. These include the privilege of suing and being sued, taking and granting property, and having a common seal. Although often expressly given, they may well be left out, for they are implied by law.

The '*guilda mercatoria*' was a corporate body, distinct from that in which the local government of the place was vested. It was one of a class of lay corporations erected for the better carrying on of divers special purposes (to use the words of Blackstone); and in this class he ranks the general corporate bodies of the Universities of Oxford and Cambridge.

'*Universitas*' as importing a corporate body, whether of accredited teachers and matriculated learners, or of either, constituted for the purposes of instruction in arts and faculties and for the advancement of learning, is surely as much entitled to have its import allowed in a Charter of the Sovereign, as the word '*guilda*' in the case of merchants or traders. And the more so, where the other provisions plainly indicate the intention that the society or fraternity shall be perpetuated without disruption of its continuity or interruption of its franchise. Cowell's work was published a few years after the date of the Charter of Queen Elizabeth, and about thirty years before the Charter of King Charles I. His explanation of '*Universitas*' may therefore be taken to be what had been and then was the accepted and applied sense of the word in England. It is but reasonable to suppose that it was used in this sense in these Charters. It plainly was so used in the title of the '*Regulæ*,' and in the formula of supplication for a degree. In addition to this, the recognition by the Crown and Legislature to which the late Lord Chancellor Blackburne has referred, seems to be sufficiently decisive.

The next position which I proceed to notice is as to the true import of that part of the Charter of Queen

* Vol. III., p. 157, 2nd German Edition.

† Vol. II., p. 367, 4th Edition.

‡ 4th Inst., 227.

§ In the Letters Patent of I. Geo. III. where the University of Oxford is described as *celeberrima Academia Oxoniensis*, the University of Dublin is described as *Academia illustrissima Dublinensis*. See also 33 Geo. III., c. 21, s. 13; Letters Patent, 34 Geo. III. 40 Geo. III., c. 84, s. 11. References might be multiplied.

Elizabeth that relates to the privileges of the *studiosi*. Dr. Todd, in his 'Introduction' to the Book of Graduates, says that the real meaning of this part has been generally misunderstood, and that it seems to have been misunderstood even in the Charter of King Charles I. He contends that the *studiosi* were not only invested with the privilege of obtaining degrees, on fulfilment of the conditions prescribed, but that the power was given to them and not (as commonly supposed) to the Provost and majority of the Fellows, to elect, create, nominate, and ordain the University officers, such as the Vice-Chancellor, Proctors, etc.; whilst the election of a Chancellor (after the first) was confided to the Provost and major part of the Fellows. In order to sustain this contention he sets out in a note (p. xxii., d.), what he describes as "the whole passage of the Charter." But in the text of the same page of this Introduction it will be found that the sentence with which his extract begins is said to be immediately connected with a cause that is before set forth (p. xx.). He gives a sufficient reason for omitting from his extract the clause that intervenes, inasmuch that it merely defines the duration of a Fellowship, and is not relevant to the question as to the *studiosi*. But I cannot find any reason for the omission of the preceding clause which is relevant and with which the clause he places at the beginning of his extract is (as he has admitted and pointed out) "connected." In fact, the omission of this clause made it necessary for him to insert the word [*studiosi*] in brackets in the first clause of his extract. This word is taken from this omitted clause. In order to prevent any misconception or mistake from unauthorised punctuation or otherwise, I have extracted the whole passage as it stands in the original Charter from which I have had it copied, and with which the copy has been carefully collated. It is as follows:—

"Et cum gradus quosdam in artibus et facultatibus constitui literis fuisse adjumento compertum sit, ordinamus per praesentes ut studiosi in hoc Collegio sanctae et individuae Trinitatis Elizabethae Reginae juxta Dublin libertatem et facultatem habeant gradum Baccalaureatus Magisterii et Doctoratus juxta tempus idoneum in omnibus artibus et facultatibus obtinendi. Hoc semper interim proviso, ut cum hujus Collegii Socii septem integros annos post gradum Magisterii ibi assumptum adimpleverint, tum e Sociorum numero amoveantur, ut alii in eorum locum suffecti pro hujus Regni et Ecclesiae beneficio emolumentum habeant. Et ut intra se pro hujusmodi gradibus assequendis habeant libertatem omnia acta et scholastica exercitia adimplendi, quemadmodum Praeposito et majori parti Sociorum visum fuerit. Ac ut omnes personas pro hujusmodi rebus melius promovendis eligere, creare, nominare et ordinare possint, sive sit Procancellarius, Procurator, aut Procuratores (nam Cancellarii dignitatem honoratissimo et fidelissimo Consiliario nostro Guilelmo Cecillio Domino Baroni de Burghley totius Angliae Thesaurario delegatam approbamus) et ut posthac idoneam hujusmodi personam cum defuerit pro hujus Collegii Cancellario Praepositus et major pars Sociorum eligant ordinamus."

The second sentence, 'Hoc semper habeant,' may be put in a parenthesis, or omitted altogether, as suggested by Dr. Todd. The remainder may then be divided into two parts; the one part governed by the 'ordinamus' at the opening; the same word at the close governing the other. The point of separation at the two parts is at 'Ac ut.' The subordinate clauses dependent on the same 'ordinamus' are, in each case connected together by 'et ut,' while 'ac' is used to connect the two main sentences. The words 'ut omnes personas ordinare possint' are naturally connected with the second 'ordinamus,' not with the first. 'Praepositus et major pars Sociorum' may properly be taken as the nominative to 'possint,' as well as to 'eligant.' Dr. Todd's more limited extract does not contain the first 'ordinamus,' and therefore 'et ut visum fuerit' appears in it to be connected with the second 'ordinamus.' His view that the *studiosi* were to elect the Vice-Chancellor, Proctors, etc., was never acted on. In the Introduction to the University Calendar, A.D. 1869, to which he specially refers as "containing a clear and concise history of the different Charters," this power of election is stated to have been given by the Charter of Queen Elizabeth to the Provost and major part of the Fellows. No instance has been shown in which the *studiosi* claimed or were allowed to

exercise this power, to which if they had a right, they could not have been deprived of it, without their consent, by the Charter of King Charles I. We have the record of the appointment of Ussher to the office of Vice-Chancellor, A.D. 1614, and his re-appointment, A.D. 1617. In both instances he was appointed by the Provost and Fellows. The former of these was made and confirmed in the same form as the election of the Chancellor, A.D. 1612.

Thus we have the 'contemporaneo expositio, quae est optima;' and this was adopted by the framers of the Charter of King Charles I. It is, at the least, reconcilable with (if not required by) the grammatical construction of the whole passage as it stands in the Charter of Queen Elizabeth. It may be admitted that the *studiosi* of the College are to be regarded as dependent members of the University, having inchoate privileges and rights of protection. But however they may stand in relation to the corporate body of the University, their right to appoint any of the University officers is a different question. "It may seem strange," says Dr. Todd, "and to modern ideas it is strange, that the nomination and election of officers of so much importance as the Vice-Chancellor and Proctors should have been committed to the general body of the University, consisting of all graduates, and even of matriculated undergraduates. But this is quite consistent with the ancient notion of a University, and is an evident proof that all matriculated students, as well as the graduates, were regarded as members of the University in the sense that has been explained" (p. xxiii.). He cites from Halmagrand (p. 67), a passage, in which it is said, as to the University of Paris, that the "Rector, who was supreme governor and chief President of all the faculties, was chosen by the lowest of them all, the Faculty of Arts, which included undergraduates."

With reference to the University of Paris, the authority of Savigny is distinct, and ought to be decisive. In the passage to which I have already referred, in which he contrasts the constitution of the Universities of Paris and of Bologna, he says: "There is found from the earliest time a remarkable contrast. In Paris the corporation consists of all the teachers; these are in possession of all power; and of scholars, as merely subject members of the little state, no mention is made." In another part of the same volume of his learned work (p. 348) he controverts an opinion of Bulaeus, that besides the assemblies of regent masters and of regents and non-regents, there was another assembly which included the students; but Savigny says that Bulaeus could not point out a case in which such an assembly had been held and that the grounds for the opinion appear to be, first an incidental statement in a manuscript treatise of unknown date and origin; second, the very usual official phrase, "Universitas Magistrorum et Scholarium." "But this" (he adds) "proves nothing, as in any case the students belonged to the University as dependent members, even if they had no voices in it, but were only represented by the Professors. This explanation is confirmed by a resolution, A.D. 1250 (Bul., vol. iii., p. 356), the preamble of which has the formula 'Rector et Universitas Magistrorum et Scholarium,' but the conclusion of which is 'Datum Parisiis, in nostra congregatione generali Magistrorum, tum regentium quum non regentium.'" With reference to the election of the Rector, Savigny says: "The Doctors of the three faculties could neither themselves become Rector nor take part in the election; both were reserved for the Master of the Artists."

The earliest Statutes of Oxford are supposed to have been nearly a wholesale adoption of those of Paris. A regulation, attributed to the date A.D. 1250, requires that every scholar shall have his own master, on whose roll (matricula) his name must be entered, and of whom he shall hear one lecture daily.* Amongst the Statutes of Cambridge there is one said to be "ante annum 1276," by which a scholar was required, within fifteen days to inscribe himself in the matricula of some Master of Arts.† I do not find that in either of these Universities the *studiosi* had any voice in the election of the University officers.

The next matter upon which Dr. Todd comments is as to the power of adopting any of the laws established in either of the Universities of Cambridge or Oxford. This he considers to be a power given with reference to the University, and not a power of adopting such laws for the government of Trinity College.

The clause in question is found in the part of the Charter which expressly provides for having laws for

* Monumenta Academica Oxon., p. 17.

Documents relating to the University and Colleges of Cambridge, vol. 1 p. 333.

DOCUMENTS.
SECTION L.
LXXXV.

the good government of the College. The University had not been previously referred to except where the College is described as 'mater Universitatis.' The words of the clause are not 'leges alterutræ Academiæ,' or 'ex alterutrâ Academiâ,' but they are 'et ut quascunque leges bene constitutas senserint in alterutrâ nostrâ Academiâ, modo sibi aptas et accommodas judicaverint intra se stabiliant.' As they stand in their place in the Charter, and when taken with their context, they seem to import that, in settling laws for the government of the College, the Provost and Fellows might select from the laws of any of the Colleges in either of the English Universities such as were adapted to themselves, i.e., to their own College. This was the "contemporanea expositio" of the Charter by those who at the first had to exercise this power. In recording the reasons given by the Provost and Fellows for declining to surrender their Charter, Provost Temple speaks of "their Chartered privilege of procuring from the University of Cambridge copies of the best orders and laws in any of their Colleges there; and according to their said privilege, they have, upon obtaining from thence of so worthy a pattern and direction, made and enacted a certain number of Statutes for the good government of the said College—approved of by the Visitors and by the Chancellor."* In a previous page his words are given thus: "We have been warranted by our Charter to entertain and establish for the government of the College any good and fit law observed in Cambridge" (p. 100). In another page the Statutes 'pro regimine Collegii' are spoken of as "framed after the best laws in Cambridge." In the Charter of King Charles I., where the power of making or establishing laws for the government of the College is taken away from the governing body, and reserved to the Crown in future, both parts of the clause in the

Charter of Queen Elizabeth (the one as to making such laws, and the other as to adopting any of the 'leges constitutas' in the University of Cambridge or of Oxford) are recited, and then the Charter proceeds to take away 'hanc potestatem.' If this did not include both, why were both recited? The 'leges Academiæ' were not interfered with.

By the recent Charter (21 Vict.), the power of altering, amending, or repealing any of these 'leges Academiæ,' and of making new laws from time to time for the like purpose, is expressly given to the Provost and Senior Fellows; but, in order that such alterations or additions may be binding upon the University, it is required that they shall have received the sanction of the Senate in congregation lawfully assembled.

The result then appears to me to be this:—

1. That the College has certain University privileges which have been conferred on its *studiosi* and on its governing body.

2. That the University (properly so called) is a distinct corporate body.

3. That the *studiosi* have not, and never had, the right to elect any of the principal officers of the University.

4. That the governing body of the College had the power of making the 'leges Academiæ,' with reference to the conferring of Degrees, and were not confined to the adoption of laws of either of the Universities of Oxford and Cambridge.

5. That the true intent and purpose of the Charters and Statutes is, to deal with the College and the University as integral parts of one educational institution, in which a complete course of Instruction in arts and faculties is to be provided.

LXXXVI.

Judgment of the Right Hon. Sir Andrew Porter, Master of the Rolls, in the Case of Trinity College, Dublin, v. The Attorney-General and Others.

[June 2, 1888.]

This case comes before the Court on a motion by the plaintiffs' statement of claim, in the pleadings. The plaintiffs are the Provost, Fellows, and Scholars of Trinity College, Dublin, and the defendants are the Attorney-General, the Chancellor, Doctors, and Masters of the University of Dublin, and the Trustees and Executors of the will of the late Richard Tuohill Reid, Barrister-at-Law, formerly of Killarney, in the county of Kerry, and afterwards of Bombay, in the East Indies.

The will of Mr. Reid is set out *in extenso* in the plaintiffs' statement of claim, except that in the will the testator describes himself as L.L.D., without stating, however, of what University. The will bears date the 22nd of September, 1881. It commences by appointing the defendants, Sir George Christopher Molesworth Birdwood, Knight, M.D., of the India Office, and James Cornelius O'Dowd, Deputy Judge Advocate-General, and Barrister-at-Law, of No. 35, Great George's-street, Westminster, his executors.

The statement of claim alleges that the testator died on the 11th day of February, 1883, at Rome, without having revoked or altered his will, which was duly proved in the Probate Division of Her Majesty's High Court of Justice, in England, by the defendants. George Christopher Molesworth Birdwood and James Cornelius O'Dowd, on the 25th day of April, 1883. The testator had no assets in Ireland.

Hannah Reid, the sister of the testator in his will mentioned, died before him, on the 9th day of February, 1883; her life estate, therefore, never came into existence. The ready money and cash at the testator's bankers were sufficient for payment of his debts, funeral and testamentary expenses, and the other expenses connected with the administration of the estate.

The bequest in the will contained of all the testator's shares or stock in the Great Indian Peninsula Railway Company, and in the Bombay, Baroda, and

Central India Railway Company, is, for the sake of convenience, referred to as the second bequest; and the bequest of all the testator's funds in Three per Cent. Consolidated Bank Annuities is referred to as the third bequest.

The testator was, at the time of his death, possessed of the sums of £2,800 Great Indian Peninsula Railway Company Guaranteed £5 per Cent. Stock, and £1,904 Bombay, Baroda, and Central India Railway Company Stock; which sums became vested in his executors as trustees of his will, for the purposes of the second bequest; and he also died possessed of the sum of £6,089 13s. 4d. Consolidated £3 per Cent. Bank Annuities, transferable at the Bank of England, which became vested for the purposes of the third bequest.

As to the second bequest, the plaintiffs say that there is no such body, strictly speaking, as the Board of the University. The defendants, the Senate of the University, have been incorporated by Letters Patent, dated the 24th July, 1857, under the title of the Chancellor, Doctors, and Masters of the University of Dublin, and as such Corporation are, by the said Letters Patent, empowered to hold and acquire such property, real and personal, as may be given or bequeathed to them. Up to the present the defendants have not acquired, nor do they now hold, any property.

As to the third bequest, the plaintiffs say "that Trinity College, Dublin, is the only College in the University, and is incorporated by the Letters Patent or Charter of the 34th year of Queen Elizabeth, which was confirmed by the Letters Patent, or Charter of the 13th Charles I., under the name of the Provost, Fellows, and Scholars, of the College of the Holy and Undivided Trinity of Queen Elizabeth, near Dublin, who are the plaintiffs in this action. The Provost and senior Fellows of the said College are by the said Charter and the Statutes of the College constituted the Governing Body of the College, and are known as the

Board of Trinity College, Dublin. There is no other body called or known as the Board either in the College or University." That statement must be taken as uncontradicted.

The defendants, the executors, having been informed of the facts aforesaid, were advised that they could not safely give effect to the second and third bequests without the protection of the Court, and accordingly they lodged in the Chancery Division of the High Court of Justice in England, to the following credit:—"In the matter of the trusts of the bequest by the will of the late Richard Tuohill Reid, in favour of the Corporation of the University of Dublin, in trust to found a Professorship of Penal Legislation,"—the said sum of £1,904, Bombay, Baroda, and Central India Railway Company Stock; and the sum of £2,300, Great Indian Peninsula Railway Company Guaranteed £5 per cent. Stock, part of the said sum of £2,800 like stock; and £339 8s. 6d. cash, representing the said second bequest, and the dividends that had accrued in respect thereof up to the 1st July, 1884, less by a sum of £702 16s., paid by the same defendants in respect of duty on the capital of the second bequest; and £26 2s. for duty on the income thereof, and £27 10s., being a moiety of the costs of and incident to the lodgment in Court.

The defendants, the executors, also lodged in the Chancery Division of the said High Court of Justice in England, to the following credit:—"In the matter of the trusts of the bequest by the Will of the late Richard Tuohill Reid, in favour of the Corporation of the University of Dublin, in trust to found in Trinity College, Dublin, additional Sizarships, Exhibitions, and for other purposes,"—the sum of £5,463 17s. 11d. Consolidated £3 per Cent. Bank Annuities, part of the said sum of £6,089 13s. 4d., like annuities and £217 4s. 8d. cash, representing the third bequest, and the dividends that had accrued in respect thereof, up to the 5th July, 1884, less by a sum of £616 11s. 6d., paid by the same defendants in respect of legacy duty on the capital of the third bequest; and £16 9s. for duty on the income thereof, and £27 10s. being the remaining moiety of the costs hereinbefore mentioned.

The result of this proceeding was the payment of 10 per cent legacy duty for both the second and third bequests, from which duty they would probably have been free if lodged in this Court, inasmuch as the law in England is different from that in this country. Here no duty is payable on bequests for purposes merely charitable in Ireland.

The statement of claim then states that the testator, who was born in the County of Kerry, was educated in Trinity College, Dublin, where he took the degree of Master of Arts. He was afterwards called to the Irish Bar, and went to Bombay in the year 1853, after which period he never returned to Ireland.

The statement of claim then avers that all the endowments, estates, and property by which the University of Dublin is sustained, including all endowments for special purposes, are vested in the plaintiffs, and managed by the Board of Trinity College. The appointment and election of the professors in the University was also vested in the said Board up to the time when the Council was constituted by Letters Patent of the 4th day of November, 1874. By these Letters Patent the nomination to all professorships, with certain specified exceptions, is now vested in the Council, subject to the approval of the Board; and since the constitution of the Council any proposed alterations in the rules and regulations respecting any studies, lectures, or examinations (not connected with the Divinity School), and also any proposed alterations in the rules and regulations respecting the qualifications, duties, and tenure of office of any professor not connected with the Divinity School, require the approval both of the Board and of the Council. No new professorship can now be created or founded by the Board without the consent of the Council.

The Council consists of the Provost, or in his absence the Vice-Provost, of Trinity College, and sixteen other members elected out of the members of the Senate of the University.

The Board of Trinity College elect to all the existing sizarships, after the usual examination of candidates.

The statement of claim then states that the plaintiffs are desirous that a scheme or schemes may be settled and approved by the Court for the regulation and management of the said charitable bequests respectively, and for the application of the income of the said stocks and securities, pursuant to the trusts by the said will declared with respect to the same re-

spectively, and that the plaintiffs may be at liberty to apply in the Chancery Division in the High Court of Justice in England for the transfer to the credit of this action of the several securities and moneys standing to the credits respectively hereinbefore mentioned.

The plaintiffs claim:—

1. That the trusts of the will of the testator Richard Tuohill Reid, with respect to the second and third bequests respectively, may be carried into execution under the direction of the Court.
2. That the plaintiffs may be at liberty to apply in the Chancery Division of the High Court of Justice in England in the said matter, under the Trustee Relief Act, for the transfer and payment into this Court, to the credit of this action, of the several securities and moneys which now are, or shall at any time hereafter be, standing to the said credits hereinbefore mentioned.
3. That a scheme or schemes may be approved by the Court, directing the regulation and management of the said charitable bequests respectively, and the application of the income of the said stocks and securities, pursuant to the trusts of the said will, declared with respect to the same respectively.
4. That for the purposes aforesaid all necessary accounts may be taken, inquiries made, and directions given, and

Such further relief as the case may require.

The Chancellor, Doctors, and Masters of the University of Dublin have filed a statement of defence, by which they admit the making of the will as set forth in the statement of claim, and the statements of fact and the documents in the statement of claim mentioned, and submit that they are the body designated as the Corporation of the University of Dublin in the will; and that the stocks and funds which are in the statement of claim designated as the 2nd and 3rd legacy bequests respectively should be transferred and paid to them for the purposes of the will; and state that they are desirous that a scheme or schemes directing the regulation and management of the said charitable bequests respectively, and the application of the income of the same may be settled and approved of by the Court as in the statement of claim is prayed.

The Attorney-General has delivered a statement of defence, in which he states in substance that he has no knowledge of the several matters in dispute, but submits that the legacies are good charitable bequests.

The principal question for decision therefore is, What is the body which the testator designates as "the Corporation of the University of Dublin"?

Trinity College, Dublin, was founded by Queen Elizabeth, by a Charter dated A.D. 1592, in the 34th year of her reign. That Charter is of great importance in determining the constitution of Trinity College, and of the University of Dublin.

That Charter recites:—

"Cum dilectus subditus noster Henricus Ussher Archidiaconus Dubliniensis nobis humiliter supplicavit, nomine civitatis Dubliniensis, pro eo quod nullum Collegium pro Scholaribus in bonis literis et artibus erudiendis infra regnum nostrum Hiberniæ adhuc existit; ut unum Collegium *matrem Universitatem* juxta civitatem Dubliniensem ad meliorem educationem, institutionem, et instructionem Scholarium et studentium in regno nostro prædicta erigere, fundare, et stabilire dignaremur;" and goes on to provide:—"quod de cætero sit, et erit, unum Collegium *mater Universitatis* in quodam loco vocato Allhallowes juxta Dublin prædictum, pro educatione, institutione, et instructione juvenum, et studentium in artibus et facultatibus, perpetuis futuris temporibus duraturum, et quod erit, et vocabitur COLLEGIUM SANCTÆ ET INDIVIDUÆ TRINITATIS JUXTA DUBLIN A SERENISSIMA REGINA ELIZABETHA FUNDATUM. Ac illud Collegium de uno Præposito, et de tribus Sociis nomine plurium, et tribus Scholaribus nomine plurium, in perpetuum continuaturum erigimus, ordinamus, creamus, fundamus, et stabilimus firmiter per præsentem." (a)

Then, after naming the first Provost, the Fellows, and Scholars, the Charter proceeds to incorporate them:—

"Per nomen PRÆPOSITI, SOCIORUM, ET SCHOLARUM COLLEGII SANCTÆ TRINITATIS ELIZABETHÆ REGINÆ JUXTA DUBLIN." (b).

Then follow directions as to the election in the future of the Provost, Fellows, and Scholars who are

DOCUMENTS.
SECTION I.
LXXXVI.

empowered to acquire and hold manors, lands, tenements, and hereditaments for the maintenance of the College, and to sue and be sued by their corporate name; and the Charter continues in these most important words:—

"Et cum gradus quosdam in artibus et facultatibus constitui literis fuisse adjumento compertum sit, ordinamus per presentes, ut studiosi in hoc Collegio sanctæ et individue Trinitatis Elizabethæ Reginae juxta Dublin, libertatem et facultatem habeant, gradus tum Baccalaureatus, Magisterii, et Doctoratus, juxta tempus idoneum, in omnibus artibus et facultatibus obtinendi." (a)

The "tempus idoneum" here probably refers to the period at which the first Undergraduates would be ready to receive degrees. The Charter proceeds:—

"Hoc semper iterum proviso, ut cum hujus Collegii Socii septem integros annos post gradum Magisterii ibi assumptum adimpleverint, tum è Sociorum numero amoveantur, ut alii in eorum locum suffecti, pro hujus Regni et Ecclesiæ beneficio, emolumentum habeant; et ut intra se pro hujusmodi gradibus assequendis habeant libertatem, omnia acta, et scholastica exercitia adimplendi, quemadmodum Præposito, et majori parti Sociorum visum fuerit, ac ut omnes personas pro hujusmodi rebus melius promovendis, eligere, creare, nominare, et ordinare possint, sive sit Pro-cancellarius, Procurator, aut Procuratores (nam Cancellarii dignitatem honoratissimo et fidelissimo Consiliario nostro, Guilelmo Cecillio, Domino Baroni de Burghley, totius Angliæ Thesaurario, delegatam approbamus), et ut posthac idoneam hujusmodi personam, cum defuerit, pro hujus Collegii Cancellario Præpositus, et major pars Sociorum eligant, ordinamus."

This Charter was granted in 1592, and no other Charter or Letters Patent were granted during Elizabeth's reign. In 1613 further Letters Patent were granted by King James I. An interval of twenty-one years therefore had elapsed between them and the Charter of Elizabeth; and that degrees must during that interval have been conferred on Students of the College appears to me to be beyond doubt. Therefore it must have been considered that the Charter of Elizabeth, *proprio vigore*, conferred upon the College power to grant degrees. Some body, duly authorized by the Crown, must have conferred them: since the granting of degrees is a branch of the Royal prerogative, the Crown being the fountain of honour. The Chancellor, Vice-Chancellor, and Proctors were not incorporated; the Provost, Fellows, and Scholars were: and it follows that they must have conferred the degrees in the interval between the Charter of Elizabeth and that of James I., though, no doubt, in this the College acted through the Vice-Chancellor.

The Charter of James, after reciting the Charter of Elizabeth, proceeds:—

"Cumque dictum Collegium sit et habeatur universitas, ac habeat, gaudeat, et utatur omnibus et singulis libertatibus, privilegiis, et immunitatibus ad universitatem sive academiam pertinentibus sive spectantibus . . . idcirco operæ pretium et necessarium videtur, quod dictum Collegium et universitas habeant plenam et absolutam potestatem duos Burgenses de seipsis eligendi, eosque mittendi ad supremam illam curiam Parliamenti, in hoc regno nostro Hiberniæ, de tempore in tempus, tenendi: in quâ quidem curiâ hujusmodi Burgenses sic electi et missi, juxta formam universitatis Oxoniensis et Cantabrigiensis in Angliâ usitatam, notum faciant verum statum dicti Collegii ac universitatis ibidem; ita ut nullum statutum aut actus generalis dicto Collegio ac universitati privatim, sine justâ ac debitâ notitiâ et informatione in eâ parte habitâ, præjudicet aut noceat; scriptis quod nos, de gratiâ nostrâ speciali, . . . Voluimus et concessimus, ac per presentes pro nobis hæredibus, et successoribus nostris, volumus et concedimus, præfatis Præposito, Sociis, et Scholaribus dicti Collegii, et successoribus suis, necnon ordinamus et stabilimus per presentes, perpetuis futuris temporibus quod sint et erunt in dicto Collegio ac universitate juxta Dublin duo Burgenses Parliamenti nostri hæredum et successorum nostrorum." (b).

The words just quoted, such as "Cumque dictum Collegium sit et habeatur universitas," "et utatur omnibus et singulis libertatibus privilegiis et immunitatibus ad universitatem pertinentibus," "Collegii et universitatis prædictæ," "quod dictum collegium et universitas habeant"; again, the same words, "dicti Collegii ac universitatis," "dicto Collegio ac universitate juxta Dublin," show that the

framers of the Charter considered Trinity College and the University of Dublin as so inseparably connected that their titles are used throughout as synonymous terms. To whom is the power of electing two members given? "Præfatis Præposito, Sociis et Scholaribus dicti Collegii."

The Charter recites that Trinity College was founded by Queen Elizabeth, "ad exemplum academiarum nostrarum Oxoniensis et Cantabrigiensis." Oxford and Cambridge are no doubt in some respect analogous Universities. But they are essentially different in this that they each contain several Colleges; and I do not think that the reference to them in this Charter indicates an intention that Trinity College and the University of Dublin should be separate bodies.

The next Charter is that of 13 Charles I., which bears date in 1637. (c) It recites the Charter of Elizabeth, and states that by it she granted "quod deinceps esset unum Collegium mater Universitatis, in quodam loco vocato Allhallowes juxta Dublin." It then recites the incorporation of the College; its power to acquire and hold lands for the maintenance of the College; its capacity of suing and being sued in actions, real, personal and mixed; of having a common seal; the power of the Provost and majority of the Fellows to make laws, statutes, and ordinances, for the government of the College; and that "eadem nuper regina per easdem literas suas patentes ordinaverit, ut studiosi in dicto Collegio libertatem et facultatem haberent gradus tum Baccalaureatus, Magisterii et Doctoratus, juxta tempus idoneum, in omnibus artibus et facultatibus obtinendi; et ut intra se, hujusmodi gradibus assequendis haberent libertatem omnia acta et scholastica exercitia adimplendi, quemadmodum Præposito, et majori parti Sociorum usum foret." The Charter confirms the Charter of Elizabeth in respect of its above recited provisions, and provides, with the consent of the Provost, Fellows, and Scholars, that Fellows should not be removed at the end of seven years, as provided by the Charter of Elizabeth: recalls the power of the Provost and Fellows to make statutes and ordinances, and reserves that power to the Crown; repeals those already made, and substitutes an amended code.

In further Letters Patent of the same year (13 Charles I.), I find this recital (after referring to the great advantage of schools and universities in England):—"Quod et reipsâ fecit regina Elizabetha celeberrimæ memoriæ, Collegium Sanctæ Trinitatis juxta urbem Dublinensem extruendo; quod etiam annuis redditibus dotavit et academici privilegii ornavit" (d)

The Letters Patent then proceed to establish certain laws for the government of the College. The Provost and seven senior Fellows are to form a Board. The Board are to have the government of the College, the election of the Fellows, officials, &c., and the conferring of degrees "graduunque collationes definiant, et concludant." A more clear assertion that the College had the right of conferring degrees it is not easy to imagine.

The next Letters Patent which I have to refer to are those of the 34 George III. (A.D. 1794). They are addressed to the Provost and senior Fellows, and relate to the admission of Roman Catholic students to degrees, and announce: . . . "quod omnibus subditis nostris, qui religionem Pontificiam sive Romano-Catholicam profitentur, liceat et deinceps licebit in dictum Collegium admitti, atque gradus in dictâ academiâ obtinere, præstitis prius omnibus exercitiis per leges et consuetudines academiciæ requisitis, aliquo statuto dicti Collegii, aut statuto, regulâ, aut consuetudine quâcunque dictæ academiciæ in contrarium non obstante."

Now, pausing here, if nothing else had happened, what was the position of the University of Dublin? There was no separate incorporation of it. If there had been it must have been by Royal Charter by virtue of the prerogative of the Crown. There was no express creation of it apart from the College. The College had the power of electing the Chancellor and the other officers, and of "defining and determining" the conferring of degrees. The College was supreme; and the University was a branch or department of it, if indeed the College itself was not more accurately the University. That it was so considered by the framers of the Charter of James I. appears from the expressions: "sit et habeatur universitas," "academiæ privilegiis ornavit," and from the power of the College to confer degrees "intra se." It cannot therefore admit of doubt that prior to the Letters Patent of Queen Victoria a gift to the "Corporation of the

(a) Coll. Stat., vol. I, pp. 7, 8.

(b) Coll. Stat., vol. I, pp. 309, 310.

(c) Coll. Stat., vol. I, p. 10.

(d) Coll. Stat. vol. I, p. 30.

University of Dublin" would have meant a gift to Trinity College, Dublin, and could have meant nothing else.

Both phrases, Trinity College, Dublin, and University of Dublin, are used interchangeably, as well in Acts of Parliament as in the Charters and Regulations. The Fourth Article of the Act of Union of Great Britain and Ireland, 40 Geo. III. c. 38, is, "that four lords spiritual, by rotation of sessions, and twenty-eight lords temporal elected for life by the peers of Ireland shall be the number to sit and vote on the part of Ireland, in the House of Lords of the United Kingdom; and one hundred commoners (two for each county in Ireland, two for the city of Dublin, two for the city of Cork, one for the University of Trinity College, and one for each (of the most considerable cities, towns, and boroughs) be the number to sit and vote, on the part of Ireland, in the House of Commons of the Parliament of the United Kingdom.

(a) By the Reform Act of 1832, 2 & 3 Wm. IV. c. 88, section 11, it is (no doubt) enacted that "the city of Limerick, the city of Waterford, the borough of Belfast, and the University of Dublin shall each respectively return one member to serve in such future Parliament, in addition to the member which each of the said places is now by law entitled to return." But by sec. 70 it is provided "that in addition to the persons now qualified to vote at the election of a member to serve in Parliament for the University of Dublin," "every person being of the age of twenty-one years, who has obtained, or hereafter shall obtain, the degree of Master of Arts, or any higher degree, &c., or a Scholarship or Fellowship in the said University, shall be entitled to vote for the election of a member or members to serve in any future Parliament for the said University." &c. By the University of Dublin in this context Trinity College must also be meant, since Scholarships and Fellowships belong to the College and not to the University proper.

The Act of Settlement, too, speaks of the lands of the University, meaning obviously the lands of Trinity College, Dublin. The corporation of the College was at that time the corporation of the University. There was no other corporation but that of the College which, in the words of the Letters Patent of James I., was declared, and was held to be, a University "sit et habeatur universitas."

There is nothing in this view I think opposed to the opinion of the late Mr. Blackburne, Vice-Chancellor of the University. He said:—

"It is now, for any practical purpose, not necessary to inquire whether the University was a corporate body before the late Charter. But I may observe that through the agency of the Chancellor, or the Vice-Chancellor, and other proper officers, for whose perpetual appointment the Crown made ample provision, the power to grant degrees was insured to continue for all time. So and in like manner, the succession of members of the Senate was to be for ever supplied out of the members of another body expressly incorporated." (b)

Mr. Blackburne thus gives no positive opinion on the question. Nor is the view I have expressed opposed, in my opinion, to the fundamental idea of College and University. The Universities of Oxford and Cambridge are in some respects anomalous bodies, differing in constitution from nearly all, if not all, other ancient Universities.

In *The Attorney-General v. Lady Downing and others* (Wilmot's Ca. and Op. 14), Lord Chief Justice Wilmot says:—

"And, indeed, I think Universities and Colleges are within the proper and genuine sense and meaning of the words 'Schools of Learning.' (c). The places where the public exercises are performed are called the Schools. An University is a great school, incorporated to instruct, by their Professors and regular exercises, all who come to study there, and by degrees to give their students rank and credit in the republic of letters, and which are qualifications for lucrative offices and employments in life. It is a public school of divinity, physics, law, and all arts and sciences. And colleges are schools of learning, furnishing scholars for the universal school, which is a combination of all those schools; and in any other view than as schools of learning they are as useless to society as monasteries; and, therefore, I think they are not only within the equity of the Act, but within the words of it. And I consider this devise as made for the further augmenting of the University: and for that

reason the University, in its corporate capacity, is very properly made a relator in this information being materially and essentially interested in the benefaction. For though the University is not a corporation of colleges, but of matriculated members, and all colleges are separate corporations, yet these colleges attract and furnish the members to be matriculated, and every new college enlarges the universal school, and by increasing the number of scholars adds weight, dignity, and strength to the University."

Generally speaking, a University and College are one body. The Universities of Bologna and Paris are both teaching Universities, and Trinity College in this respect appears to have resembled them.

We now come to the Letters Patent of the Queen (21 Vict., July 24, 1857). In them we find the following recitals:—

"Whereas we are informed that the Senate or congregation of the University of Dublin, consisting of the Chancellor or Vice-Chancellor, Doctors in the several faculties, and Masters of Arts in the said University, has heretofore, for the last two hundred years and upwards, been governed by certain rules or statutes, entitled: 'Regulæ seu Consuetudines Universitatis Dubliniensis pro solenniori graduum collatione.' And whereas our right trusty and right entirely beloved Counsellor, John George, Archbishop of Armagh, Primate of all Ireland, Chancellor of the said University; our right trusty and well-beloved Counsellor, Francis Blackburne, Doctor of Laws, Vice-Chancellor of the said University; and our trusty and well-beloved the Provost and Senior Fellows of the College of the Holy and Undivided Trinity, near Dublin, have humbly represented unto us that the said rules or statutes have, by lapse of time, become in many respects obsolete and unsuited to the present state of the said University and College, and doubts have been raised as to whether the Provost and Senior Fellows of the said College have power to alter and amend the same; and the said Chancellor, Vice-Chancellor, Provost, and Senior Fellows have therefore humbly supplicated us to remove the said doubts, and to grant unto the Provost and Senior Fellows of the said College, and also unto the Senate or Congregation of the said University, such further powers as will enable them to revise, alter, or repeal the said rules and usages relating to the conferring of degrees by the said University, and to enact other rules or regulations for the same purpose, to be binding and obligatory on all members of the University." (d).

Then the granting part of the Letters Patent is as follows:—

"We are graciously pleased to accede to their request. Know ye, therefore, that we, of our special grace, certain knowledge, and mere motion, by and with the advice and consent of our right trusty and well-beloved cousin and counsellor George William Frederick, Earl of Carlisle, our Lieutenant-General and General Governor of Ireland, do, by these presents, for us, our heirs and successors, enact and confirm to the Provost and Senior Fellows of the College of the Holy and Undivided Trinity aforesaid, and unto the Chancellor or Vice-Chancellor, Doctors and Masters of the said University, all such powers, rights, and privileges, as by the Charters and Statutes of our royal predecessors to the Provost, Fellows and Scholars of the College of the Holy and Undivided Trinity aforesaid, or to the University of Dublin aforesaid, have heretofore been given, granted, or by usage and prescription possessed, without any alteration or diminution whatever as herein provided.

"And it is our will and pleasure that the Provost and Senior Fellows of our said College of the Holy and Undivided Trinity shall have power, if they shall think fit, to alter, amend, and repeal all laws, rules, or bye-laws, heretofore existing, for the more solemn conferring of Degrees by the Senate of the University aforesaid, and to make, enact, and enforce, from time to time, such additional laws, rules, and bye-laws, to alter or vary the same for the like purpose as to them shall seem fit. Provided always that no such new laws, rules, or bye-laws, or emendations or alterations of such existing laws, rules, or bye-laws shall be of force or binding upon the said University until they shall have received the sanction of the Senate of the same in congregation lawfully assembled." (e)

No law is to be proposed except by the Board. Then the constitution, powers, and privileges of the Senate are defined and determined, and to carry out.

DOCUMENTS,
SECTION L.
LXXXVI.

the objects in view the Senate is incorporated in these words:—

"And our will and pleasure further is, that the Senate of the said University shall be, and continue to be, a body corporate, and have a common seal, and shall have power under the said seal to do all such acts as may be lawful for them to do (in conformity with the laws and statutes of the realm, and with the Charter and Statutes of the College of the Holy and Undivided Trinity, and with the Statutes, Laws, and Bye-Laws made or to be made in pursuance of these our Royal Letters) under the name, style, and title of the Chancellor, Doctors, and Masters of the University of Dublin.

"It shall be further lawful for the said Chancellor, Doctors, and Masters to apply the funds which may or shall belong to the said University Senate for the promotion of useful learning in the said University, subject to such regulations as the Provost and senior Fellows of our said College shall approve of or subscribe.

"And it shall be lawful for the said Chancellor, Doctors, and Masters of the said University, in their corporate capacity as aforesaid, to have, hold, acquire, and receive such lands, manors, tenements, or other property, real or personal, as may from the date of these presents, be given or bequeathed unto them, by any person whatsoever, for the encouragement of learning in the said University. Provided also that such gift or bequest does not impose any condition or obligation inconsistent with the Statutes of the University in force at the time of such gift or bequest, or inconsistent with the Charters and Statutes of the College of the Holy and Undivided Trinity near Dublin." (a)

It is on these Letters Patent and the incorporation therein contained of the Chancellor, Doctors, and Masters, that the claim of the Senate, who are the defendants, depends. In my opinion, that is not the incorporation of the University of Dublin, but of its Senate merely.

By another Charter of the same reign another University, the Queen's University, has been incorporated. The second Charter of the Queen's University (I have not the first one at hand) is in these words:—

"We do will, order, . . . and found a University, which shall be one body politic and corporate by the name of the Queen's University in Ireland." . . . "And we do further will and order that the said body politic and corporate shall consist of a Chancellor, Senators, Secretary, Professors, Graduates, and Students."

Thus we find a Charter of the same reign, dated a few years after the Charter incorporating the Senate, by which a University was incorporated, consisting of a Chancellor, Senators, a Secretary, Graduates, and Students, and in it the persons precisely defined and described of which the University is to consist. This is not an accidental circumstance. The advisers of Queen Victoria knew how to incorporate a University when they meant to do so.

There is, however, another body, viz. the Council, which was established by Letters Patent of 38 Vic. (b) (November 4, 1874), and to which it is said the will of Mr. Reid refers when he speaks of the "Board." I need not allude in detail to its constitution: suffice it to say, it is nowhere called the Board in any official instrument. The contest here is between the College and the Senate.

There are therefore two bodies in existence, to either of which the designation of corporation of the University of Dublin may refer, and to one or other of which it must refer: not with strict accuracy in either case, perhaps, but sufficiently clearly to enable a gift to take effect in favour of whichever is in fact meant. If the gift had been to the "Senate" or to the Chancellors, Doctors, and Masters, there would have been no question, since whatever belief one might have had of the intention of the testator, the body would have been unmistakably defined.

There is of course no reported case in point: *Mostyn v. Mostyn*, 5 H. L. C. 155; *Stringer v. Gardiner*, 27 Beav. 35, 4 De Gex. & J. 468, are cases of gifts to known individuals where there is some inaccuracy in the name and the description connected with it. Nor have *Ellis v. Houston*, 10 Ch. Div. 236, or *Holmes v. Custance*, 12 Ves. 279, any intimate bearing upon it.

Kilvert's Trusts, L. R. Ch. 171, comes perhaps nearer to the present case than any of those which were cited. In that case a testatrix by a will made in 1868 gave a legacy to the "treasurer for the time being of the fund for the relief of the widows and

orphans of the clergy of the diocese of Worcester, to be applied by him in the benefit of the charity." Two societies made a claim—one had been founded in 1777 for the relief of the widows and orphans of the clergy of the diocese, at which time the diocese comprised only the Archdeaconry of Worcester. In 1837 the Archdeaconry of Coventry was added to the diocese, and in 1848 the Worcester Society altered its title, so as to show that its operations were restricted to the Archdeaconry of Worcester. The other society had been founded in 1877 for the relief of widows and orphans of clergy in the Archdeaconry of Coventry. The father of the testatrix had been a subscriber to the Worcester Society till his death in 1817. His widow had continued the description till her death in 1860, and the testatrix had continued it from that time at an increased rate; but it did not appear that the testatrix or any of her family had subscribed to the Coventry Society; it was held by Vice-Chancellor Malins that the gift was to be treated as a gift to an object, not to a particular society, but must be apportioned between the two societies. But the Court of Appeal held that the gift was a gift to a particular society, with a slight inaccuracy of description, and that the Worcester Society was solely entitled. Lord Justice James said:—

"Parol evidence is admissible to show which of the two was meant. Evidence has always been admitted to show which of two societies the testator knew, and to which of them he subscribed. Such evidence is admissible to remove an ambiguity, if there has been sufficient ground laid to raise an ambiguity, and I am assuming against the appellant that the Coventry Society have raised an ambiguity. The fund must, in my opinion, be paid to the treasurer of the Worcester Society."

Lord Justice Mellish: "I am of the same opinion. The language of the bequest shows that the testatrix had some particular society in her mind, and the question is, What Society? There is no difference between the course to be adopted here and in any other case of finding who answers the description given in a will of a legatee. If there was no society answering the description sufficiently to enable it to claim the legacy, it might be that the Court would carry the gift into effect as a gift for the relief of the widows and orphans of the clergy of the diocese. Here, however, I think it clear that the appellants come near enough to the description to be entitled to the legacy, if there was no other society to compete with them. There is a description of the society by its old name; that name has been changed, but that object is precisely the same as at first, and the old name is wholly inapplicable to it. Then, assuming another society to come near enough to the description to have ground for a claim, parol evidence is admissible to remove the ambiguity, and the evidence given is decisive."

This, in short, is a case of latent ambiguity, and in such cases the rule is (when the fact of ambiguity is shown) first to see whether the other words of the will afford grounds sufficient to enable us to decide between the two conflicting bodies, and if not, then to admit extrinsic evidence.

The extrinsic evidence in the case, or rather the extrinsic facts admitted without proof, are all the one way. The testator had left the College and University long before the Senate was incorporated or the Council heard of. It was to Trinity College and its University of Dublin inseparably and indistinguishably blended with it, that he owed his training and his degree.

But in the words of the will itself are to be found indications which leave to my mind no doubt as to what his intention was. He uses the words University and College as loosely as the Legislature and the Crown use them. First he bequeaths all the books which he may die possessed of "to the Librarian for the time being of the University of Dublin." There is no Librarian of the University of Dublin or of the Senate of the University of Dublin. There is a Librarian of Trinity College, Dublin.

Secondly, the testator bequeaths his shares or stock in the Great Indian Peninsula Railway Co., &c., to his trustees for the purpose of paying the same to the Corporation of the University of Dublin, to endow in the said University a Professorship of Penal Legislation, provided that it shall be lawful for the Board of the University to assign any other duties which they may consider proper to be performed by said Professors so as to make the study of Penal Legislation a regular branch of instruction in the Law School of

(a) Coll. Stat., vol. ii., pp. 142-145.

(b) Coll. Stat., vol. ii., p. 372.

the University. And I empower the said Board to award prizes annually for proficiency in the said branch of legal science, &c. The word Board has a well-defined meaning in Trinity College. It means the Provost and Senior Fellows. It was contended by Mr. Twigg, on behalf of the defendants, that the word is synonymous with Council. In my opinion the testator did not mean to designate a body which was not constituted till long after his connexion with Trinity College ceased, and his use of the words, "Board of the University," affords a key to what he meant by the Corporation of the University of Dublin.

Thirdly, the testator bequeaths his Three Per Cent. Consolidated Bank Annuities to the Corporation of the University of Dublin, "to found in Trinity College, Dublin, additional Sizarships, or Exhibitions in the nature of Sizarships, not to exceed five in number, open only to students of limited means, natives of the County of Kerry, who, having failed to obtain the ordinary Sizarship of the College, may be deemed to have shown sufficient merit: such Exhibitions to be held on conditions similar in all respects to those upon which ordinary Sizarships are held in the said College, and not to preclude such Exhibitioners from obtaining any other Exhibitions or Prizes to which an ordinary Sizar would be eligible; and the Board of the said University shall determine the annual stipend to be allowed to each such Exhibitioner, or the privileges in lieu of such stipend, in such a way as to place him with respect to exemption from fees, free commons, and free

rooms, on a footing similar to that of ordinary Sizars. What Board? Plainly the Board of the same Body—the same Corporation to which he made the bequest, "and I empower the said Board to apply the residue of such income (if any) in such manner as they may think best calculated to encourage superior education in the said county, as, for instance, by assigning from time to time stipends, to such schoolmasters as may distinguish themselves in preparing students for the said University, such stipends to be given on condition that such master or masters shall undertake to prepare, free of expense, as day scholars a certain number of boys of limited means for the Sizarship Examinations of the University, or in such other way as to the said Board may seem most effectual and expedient for the promotion of superior education in the said county." There are no Sizarships in the University: they are in the College. There are no such Examinations as Sizarship Examinations of the University. They are held in and by Trinity College. In my opinion, treating the question as one of intention, the testator has clearly shown on the face of the will itself that what he meant by the Corporation of the University of Dublin was the Corporation of Trinity College. I am bound to give effect to that intention unless it is encountered by some rule of law. I have already shown at, I fear, too great length, that the phrase "Corporation of the University of Dublin" has no such defined meaning as in a case like the present, excluding all inquiry as to particular intention; and I have therefore no hesitation in pronouncing a decree for the plaintiffs.

Correspondence with reference to arrangements regarding Fees in the Scottish Universities and in the Universities of Manchester, Liverpool, and Leeds.

DOCUMENTS.
SECTION L.

(1) Letter from the Secretary of the University of Edinburgh.

UNIVERSITY OF EDINBURGH,

6th November, 1906.

DEAR SIR,

I may state, in reply to your letter of 3rd inst., that I have no knowledge of arrangements having been made by the Scottish Universities with a view to preventing competition among these Universities in the matter of fees charged to students.

The position of these fees is as follows:—

1. The fee for the Preliminary Examination and the Matriculation fees are fixed by Ordinance of the University Commissioners, under the Universities (Scotland) Act, 1889, and are the same for all the Universities. Fees in lieu of Matriculation fees (permissible in certain circumstances) are fixed by the several University Courts under conditions prescribed by Ordinance.

2. The University Court of each University fixes the amount of Class fee for each class or course of instruction.

3. The entrance fees admitting to the respective Examinations for Degrees are fixed by the University Court of each University, but the total of these Entrance fees is, in the case of each Degree, prescribed by Ordinance practically—that is to say, by statute—and is the same for all the Universities.

Yours faithfully,

M. C. TAYLOR, *Secretary.*

J. D. DALY, Esq., Secretary, Royal Commission on Trinity College, Dublin, and the University of Dublin.

(2) Letter from the Vice-Chancellor of the University of Manchester.

THE VICTORIA UNIVERSITY OF MANCHESTER,
6th November, 1906.

DEAR SIR,

We have no arrangements with the Universities of Liverpool or of Leeds with a view to preventing competition in the matter of fees. There is no provision relating to the matter in the Charter or Statutes. Possibly the matter might be indirectly affected by Clause II. of our Charter—a copy of which

I enclose, as it may be useful to you for other reasons. Apart from Statutory obligations, we are in the habit of conferring informally with the two other Universities formerly included in Victoria, but so far as I remember no question has arisen with regard to fees which has called for discussion between us.

Yours faithfully,

ALFRED HOPKINSON.

Letter from the Right Hon. The Earl of Dunraven, K.P., P.C., C.M.G., published in the newspapers in January, 1904.

(Referred to in the Statement submitted to the Commission by the Committee of Irish Catholic Laymen.)

"ADARE, CO. LIMERICK,
"1st January, 1904.

"SIR,

"The attention of all thoughtful Irishmen has been recently concentrated on two great questions which intimately concern the future prosperity of Ireland and the well-being of her people, and that all Irishmen, without regard to political differences of opinion, would wish to see satisfactorily solved. I allude to the Land Question and the question of Education. As regards the former we need not greatly trouble ourselves. It is true that some difficulties have arisen as to the interpretation of the Act—that many of those most interested appear strangely ignorant of its provisions, and that in personal and sectional considerations—in the mere desire to get the best of a bargain—the well-being of the whole community and national advantages of a clean settlement have become somewhat obscured. But a great step has been made towards a solution of the Land Question; and though temporary obstacles may for a brief space impede the working of the recent Land Purchase Act, a final settlement is well within sight; for intelligence, commonsense, and the spirit of fair play will certainly prevail. The Education problem, therefore, is, at the moment, the one question of pressing interest.

"In no country is the higher education so necessary as in Ireland, and no other country is so ill provided. The best scientific and technical instruction is essential for any successful attempt at industrial development, and much may possibly be done for Ireland in that direction. But whatever the future may have in store for her in the shape of the revival or creation of industries, the employment offered cannot, owing to natural causes, be large enough to absorb the energies of the more educated among the people to anything like the extent that the control, management, and superintendence of manufacturing and trading operations afford profitable employment to similar classes in Great Britain. As a consequence, a people naturally—and I think I may say exceptionally—quick-witted must seek for expression to a considerable extent in the liberal professions, sciences, and arts. They require an opportunity of qualifying themselves to satisfy a demand at home which, it is true, must always be limited, and to compete on level terms with others in the larger and more profitable field offered by Great Britain and the British Empire. Give Irishmen a chance; and to give all Irishmen a chance at home and beyond the narrow confines of this small island, Ireland must be provided with what she certainly has not at present got—a University adapted to the needs and desires of the people. In Ireland no opportunity of which the great majority of young men can avail

themselves exists for instruction in the higher branches of general and technical education. Ireland has no National University. This is not a mere matter of opinion; it is a demonstrated fact.

"The Report of the recent Royal Commission has made it perfectly clear that, so far as the vast majority of the Irish people are concerned, the existing condition of University Education in Ireland is bad. The Royal University, created by the Act of 1879, is declared by the Commission of Educational Experts 'to suffer from incurable defects,' 'to have lowered the ideal of University life and education in Ireland,' and 'to have introduced a system of appointment to the Senate and all offices of the University which is educationally indefensible.' In view of these conclusions, it is not to be wondered at that the Commission was constrained to recommend the abolition of existing arrangements admitted on all hands to be unsatisfactory. These arrangements have long been the subject of complaint on the part, not only of Roman Catholics, who have always objected to the system of education represented by the Queen's University and its constituent Colleges, but also by those people who, apart from denominational views and claims, have taken no interest in the improvement of higher education in Ireland. That the Queen's Colleges are not endowed with adequate means sufficient to meet the educational necessities of the time, has long been a matter of regret to them. As far back as 1890 this feeling of dissatisfaction was expressed in the House of Commons, and drew from the then Chief Secretary, Mr. Arthur Balfour, the explanation that, while the needs of the Queen's College, Belfast, for example, were admitted, nothing could be done for it until the question of University Education in Ireland as a whole could be dealt with. That this feeling of discontent tends to become more acute is evidenced by the appeal to the Lord Lieutenant made by the Council of Queen's College, Belfast, in a series of resolutions on the 9th of December last, to which I may have occasion later on to allude. That such a state of things should continue, and continue in an aggravated form, to the present day, that the inadequacy and insufficiency of existing University arrangements in Ireland, which depreciate the value of Irish professional degrees, and the uncertainty attaching to these arrangements, should be driving the youth of Ireland to seek in other countries the educational facilities which are denied to them at home, is indeed lamentable; and that we have not in all these years fulfilled a condition precedent to dealing with the whole question by arriving at some sort of consensus of opinion among ourselves is little short of a national disgrace. Abundant reasons, therefore, exist for the conclusion that, apart from all questions of a denominational character, there is an Irish University question which has for

years clamoured for solution, which, being left unsolved, is year by year affecting more and more seriously the prosperity and contentment of the country, and that it is incumbent upon Irishmen to do what in them lies to assist a settlement.

"The proposals by the late Royal Commission have not proved acceptable to any considerable section of Irish public opinion; and their force is, it must be admitted, greatly weakened by the differences of opinion indicated in the Report. From a careful perusal of that Report, and the appended notes, as well as from my observation of the trend of public opinion in Ireland, the conclusion is forced upon me that the only real solution of this vexed question will be found in an arrangement which will combine the highest attainable measure of academical efficiency with perfect equality of treatment for all sections of the community.

"This ideal might, as it seems to me, be realised by the establishment within the University of Dublin, of two additional colleges—the Queen's, Belfast, and a King's College to be established in Dublin—which colleges, like Trinity, should be well equipped financially, and should be autonomous and residential, with governing bodies selected exclusively on academical grounds. Within these broad outlines room could be found for a working arrangement with colleges established in other parts of the country. To the Senate of the University, or some academic controlling body, would naturally be entrusted the all-important duty of maintaining a standard of graduation framed with the object of securing the highest degree of intellectual acquirement, and the greatest possible freedom in the pursuit of knowledge; and a visiting body should see that no teaching or practice contrary to morals, or hurtful to the religious belief of the students, was practised, and that the objects of the foundation were being fulfilled.

"It may be argued that all this pother about higher education is really groundless, and that existing institutions are adequate to the occasion, if only Irishmen would be sensible and avail themselves of them. Let us deal with facts; with a condition which is actual, and not with a condition such as some of us may think ought to exist. Trinity College is open to all. That is true, and true also that many distinguished Roman Catholics have been educated there; but it is also true that such an educational process is strongly objected to by those who are responsible for the faith and morals of Roman Catholics, and that, as a consequence, but few Roman Catholics avail themselves of Trinity College. Is the objection reasonable? Well, in the first place, let us of the Protestant religion try and consider the question fairly; let us endeavour to look at it as if the position were entirely reversed. The doors of Trinity College are wide open; a chapel for the use of Roman Catholic students could, we are told, be erected; Roman Catholic tutors can lecture and teach; instruction is non-sectarian; all are welcome without favour for or prejudice against any man. Be it so. But is that quite sufficient? I think not. Trinity College has a splendid record, a great past, and, if it is wise, a brilliant future before it; but it never has been, is not, and cannot pretend to be a national institution. It was founded, grew, and has become venerable as an institution representing a section of the nation only. Its walls are saturated with racial distinctions; its atmosphere redolent of religious ascendancy; and, try as it will, it cannot at once and wholly divest itself of its inherited environment; it cannot, with the best intentions, become immediately colourless. Is the sentiment against it quite so unreasonable under these conditions?

"If the circumstances were reversed, should we, who are Protestants, be free from prejudice? Imagine an active dominant Roman Catholic minority in a community mainly Protestant and largely of a different race—would the Protestants feel quite easy in their minds at sending their young men at the most malleable age to a college which for centuries had represented the dominant minority? I do not know; but I think not. However, that point is not worth labouring. We have got to deal with facts; and the fact is that, rightly or wrongly, wisely or foolishly, the pastors of the great majority of the people have set their face against Trinity College. Granting, for the sake of argument, that their attitude is quite unreasonable, is it wise or just that the laity should suffer? Is it right to put their consciences to so severe a strain? Is it patriotic of us—the minority—to see them, the majority of our fellow-countrymen, impaled on the horns of so painful a dilemma, com-

pelled either to disobey their pastors or to see their children suffer in so essential a matter as education? Were I convinced that not a reasonable word could be said in extenuation of the attitude of the Roman Catholic hierarchy, I would still plead for a generous consideration of their views, and a fair settlement of the University Question. Those who cannot tolerate the prejudices of the priest, might, at least, be tolerant towards the principles of the laity. Laymen should not be forced to do what they honestly think to be wrong in order to give the best possible educational equipment to their children.

"A grave responsibility rests upon the Protestants of Ireland: for their views will naturally to a considerable extent colour public opinion in Great Britain. I wish they would look at this question, not from a provincial or from a sectarian, but purely and solely from a national point of view. Is not Ireland worthy of a National University? Ought not the highest form of general and technical education to be within the grasp of all her people? Is not suitable endowment of the colleges within a National University desirable? Are we not broad-minded enough to sink differences, prejudices, traditions, for so great an object? Is not united action possible? Those are the questions before us. I plead for the nation, for her right to provide herself with such an educational system as will give full scope to her powers and genius. If Ireland wants a National University, why should not Irish money be utilised for the purpose? Such a scheme as I have sketched inflicts no hardship upon a minority, involves no violation of conscientious scruples, does no injustice to any man. It is not even new; for such an extension of the University of Dublin as I suggest seems to have been originally contemplated by its founders. It was certainly recognised in the Act of Settlement, which provided power to erect and endow to the University of Dublin another college to be called the King's College, and by a further Act passed in the reign of George III., enacting that persons professing the Roman Catholic religion were eligible to take degrees, to hold professorships, to be masters and Fellows of any college to be hereafter founded, provided it shall be a member of the University of Dublin.

"Nor could the creation of a real National University inflict any damage upon Trinity College. That College, with which the University of Dublin has been hitherto identified, has admirably fulfilled the anticipations of its founders, and has conferred large intellectual benefits upon the country. I should be the last to make any proposal which, in my judgment, would impair in the smallest degree the efficiency of that great institution. But how could such a National University as I contemplate do so? Surely it is not beyond the capacity of statesmanship to formulate a detailed plan which, without any interference with the internal management of Trinity, or with its educational efficiency, and possibly with a decided bettering of its financial resources, would make the University of Dublin a potent instrument for the elevation of the intellectual life of the country, for the mitigation of racial or sectarian differences, and for the diffusion to every section of the community of those benefits now unhappily restricted to comparatively few.

"And in thus pleading for the nation I would appeal to Trinity College. Trinity ought to take the lead, honestly desirous to assist in a national movement, and for herself content and proud to maintain in friendly rivalry in the future her great traditions of the past. And I would appeal to my co-religionists—the minority in Ireland. It is my hope that in the provision of some such scheme, fraught with incalculable benefits to future generations, the sympathy, support, and active help of all patriotic Irishmen may be combined. But if this hope is to be realised, attention must be concentrated upon the larger aspects of the question. We must not dissipate our strength in lesser disputes upon the relative claims of rival denominations. The Roman Catholic claims will not, as I fully believe, be found, on examination, to be the bugbear they seem to some ill-informed people. There is no question of a Catholic University, or of the prescription of any kind of learning, or of a College exclusively for Roman Catholics, or of a College to every post and emolument of which a Protestant may not aspire, just as a Roman Catholic may aspire to posts and emoluments in Trinity College or the Queen's College, Belfast. But it seems to me only fair, subject to these safeguards, that my Roman Catholic fellow-

LXXXVIII.

countrymen should be given the educational facilities they desire. Each section of the community will, naturally, select the College it prefers. Trinity College will be mainly Episcopalian; the Queen's College, Belfast, Presbyterian; the new King's College, or whatever it may be called, Roman Catholic. That is inevitable to meet the requirements of the case; but that selection, inevitable as it may be at the outset, need not of necessity become stereotyped. It may or it may not be; that is a matter of opinion. Personally I should be sorry to put bounds to the emollient effects of time. It may well be that, with the progress of education, the growth of a wider culture, and the obliteration of ancient feuds, the choice of the educational area should tend to become more enlarged and free. Be that as it may, this at any rate appears to me certain—that between a scheme such as outlined above and denominational Universities there is no alternative; and the resolutions passed by the Belfast College confirm me in this view. The country cannot remain for ever uneducated. A University based on the report of the Royal Commission would from the

beginning bear in its bosom the seeds of failure. State assistance, such as Belfast requires, would, unless it formed part of a scheme for the settlement of the whole question, lead to pure denominationalism. In less than a generation, the creation of a Presbyterian University in Belfast and of a Catholic University in Dublin would be inevitable. Against such a result, intensifying and perpetuating the lamentable animosities of the past, now happily beginning to abate and disappear, I, for one, protest, and urge the alternative plan herein suggested. Three strings of one instrument would vibrate in harmony. Three separate instruments would sound a discordant note. What Ireland requires is a University instinct with national learning, national spirit, and national life, and satisfying in its colleges the needs and necessities of all sections of the people.

"I am, sir, your obedient servant,

"DUNRAVEN."

Letter of the Right Rev. Monsignor Molloy, Vice-Chancellor of the Royal University of Ireland, and Rector of the Catholic University of Ireland.

(Reprinted from the *Irish Independent*, 15th September, 1906.)

The correspondence that has recently appeared in the public press brings out pretty clearly that there are four possible schemes for the settlement of the Irish University Question. These schemes may be labelled, for convenience, as follows:—

- I. A new University for Catholics;
- II. A new constitution for Trinity College as a College, such as would make it acceptable to Catholics;
- III. A new College for Catholics under the University of Dublin;
- IV. A new College for Catholics under the Royal University of Ireland.

Speaking for myself, I would say shortly of these four schemes that the first is too good to be hoped for; the second is not good enough to be accepted; and therefore the choice practically lies between the third and fourth.

FIRST TOO GOOD TO BE HOPED FOR.

As regards the first scheme, I may dismiss it in a few words. A Catholic University is the ideal solution of this question, which has long been embarrassing to statesmen mainly because they have looked at it from every point of view but the right one. It is so natural, so reasonable, that a people ardently devoted to the Catholic faith and ardently devoted to learning should have a University in which religion and learning should go hand in hand. And this is the more, because, in the midst of this people, there is a Protestant University, in which religion and learning have been associated for three centuries, and with which the Protestant minority of the population are entirely satisfied. But this solution does not seem to come within the scope of the Royal Commission lately appointed; and, therefore, I pass it by, with the sorrowful comment that it is too good to be hoped for.

THE SECOND NOT GOOD ENOUGH.

The second scheme is brought before us in a memorandum issued by certain Fellows and Professors of Trinity College. I think it important to observe that this scheme is not offered to us by the constituted authorities of Trinity College; it is put forward simply as representing the views of those whose names are subscribed to it; and amongst them, there is not a single member of the Governing Body of the College. But let us consider the scheme in its essence, without reference to the source from which it comes.

It is based on an ideal with which we have been long familiar, under the name of Mixed Education. Let the young men of the country come together—Protestants and Catholics, Presbyterians, Methodists, Unitarians, Jews, Agnostics—let them meet at lectures and examinations, let them contend against each other in debating societies and athletic sports; they will soon acquire a spirit of mutual respect, and learn to tolerate the differences of opinion by which they are divided; and the associations so formed in early youth will tend to soften the asperities of social and political life in Ireland.

Now, I do not mean to discuss this ideal on its merits, but rather to judge it by the light of recent history. It was the ideal of the Queen's College system, set up by Sir Robert Peel somewhat more than half a century ago. It has been on its trial all that time, and the results are before us. Queen's College, Belfast, has been a success, not because it was founded on the system of Mixed Education, but because it has been practically worked as a Presbyterian institution, in the midst of a Presbyterian community. The Queen's Colleges of Cork and Galway have been failures, because in them the principle of Mixed Education has been truly carried out, and the Catholic people in the midst of whom they were planted, and for whose benefit they were intended, have steadfastly refused to accept them.

THE MIXED SYSTEM REJECTED.

I submit, then, that the country has recorded its judgment on the system of Mixed Education, in the history of the last fifty years. The proposal to convert Trinity College, Dublin, into a fourth Queen's College, seems to me not to come within the range of practical politics. It can hardly be supposed that a Government which has announced its intention of ruling Ireland in accordance with Irish ideas, will take up a scheme so clearly at variance with the fixed convictions of the people. With the experience we possess, it would seem to me little short of folly to begin the experiment all over again, by pulling to pieces a fine old Protestant institution, which has enjoyed a flourishing existence of three hundred years, in order to build up on its ruins a system of education which Protestants do not want, and which Catholics will certainly not accept.

CHOICE OF ALTERNATIVES.

There remain, then, two solutions of the question: a College for Catholics under the University of Dublin, and a College for Catholics under the Royal

University. According to the signs of the times, one or other of these solutions is likely to be adopted; and the discussion of their respective merits is one in which all Catholics are deeply interested.

To understand how the matter stands, it is important to remember that, in the year 1901, a Royal Commission was appointed to inquire into the condition of higher education in Ireland, outside of Trinity College, and to report on the reforms necessary "in order to make that education adequate to the needs of the Irish people." This Commission presented its final report in 1903. And the new Commission, appointed in the month of June last, is expressly authorised to consider the reports of the former Commission, and the evidence taken before it. Thus the recommendations made by the Commission of 1901, come again to the front, in connection with the inquiry of the present year.

RECOMMENDATIONS OF 1901.

These recommendations, so far as regards the present discussion, may be stated in a few words. The Commissioners advise that the Royal University of Ireland should be made a teaching University, with four constituent Colleges, one of which should be a new College for Catholics, to be founded in Dublin. This new College should be a University College of the first rank, drawing its students from all parts of Ireland, and possessed of an endowment and equipment worthy of its position and character. It should have Chairs in all branches of Arts and Science; and it should include the present Catholic University Medical School, which should likewise be provided with the necessary buildings and equipment for the due discharge of its functions.*

Now let it be observed that this is not a speculation in the clouds, but a scheme carefully elaborated, after eighteen months of inquiry and deliberation, by a Commission of twelve experts appointed for the purpose by the Crown. If we are to choose between this scheme and a similar scheme for a Catholic College under the University of Dublin, we must assume that the latter College is to be as complete and as well equipped as the College recommended by the Commission of 1901. Taking this for granted, I propose now to consider which way our choice should lie. The subject may be viewed under two aspects: first, the practical aspect, which scheme is the more feasible, that is, the more easily carried; secondly, the educational aspect, which scheme is better for the development of higher education in Ireland.

ROYAL UNIVERSITY SCHEME.

From the practical point of view, it seems clear that the Royal University scheme proceeds on the lines of least resistance. In the first place, it has been recommended; as I have said, by the Royal Commission of 1901; whereas, the Dublin University scheme has not been recommended by any Commission, nor by any person authorised to speak on the part of the University. Certain reforms of Trinity College, as a College, have indeed been suggested. But no proposition has been made to give to Catholics an equal voice in the government of the University of Dublin, such as they practically possess in the government of the Royal University.

Again, the Royal University scheme would involve no serious disturbance of existing institutions. It would mean only the enlargement of the powers of the Royal University Senate, a body that already controls the education of three-fourths of the University students of Ireland. This body has existed now for just a quarter of a century, as a mixed examining board, having Colleges associated with it, some of which are denominational, others undenominational. It has a large number of Fellows, whose function it is to conduct the examinations of the University and to teach in the Colleges. The change of such an institution into a teaching University, with constituent Colleges, as recommended by the Royal Commission, would be a simple natural process of growth and development.

Far otherwise is the case with the University of Dublin. For three centuries it has been a University with a single College; University and College alike being Protestant in their foundation, Protestant in their history, Protestant in their spirit and their traditions. In these circumstances, to create a new Governing Board for the University of Dublin, on

which Catholics and Protestants would sit in equal numbers, as they do on the Senate of the Royal University, would involve a serious wrench in its character and constitution, which, I feel assured, would be strongly opposed both by the authorities of the University, and by the Protestant community generally. Add to this, that the University of Dublin and Trinity College, however they may be distinguished theoretically, one from the other, have been so woven together into a common web, in the course of their history, that it would now be a very difficult task to pick out the threads that constitute the University, and leave intact the threads that constitute the College.

CHARM OF AN ANCIENT SEAT OF LEARNING.

The educational aspect of the question is more open to difference of opinion. There is a great attraction, an inexpressible charm, about an ancient seat of learning. It has its roll of illustrious men, whose names are held in veneration, and whose praises resound from generation to generation of students. It has its public halls, its libraries, its museums, standing monuments of the generosity of past benefactors. It has its festivals and anniversaries, its games and sports, its literary and philosophical debates, its academic stories, grave and gay, which never seem to grow stale. It is the great treasure house of knowledge, to which the young look forward with eager expectation, and the old return to revive the memories of youth.

PRESTIGE AND TRADITIONS.

Such an institution is the ancient University of Dublin, with its one College of the holy and undivided Trinity. I honour the sentiments of those amongst us who would gladly see the new College for Catholics associated with the glories of one or the other, or of both. But I must frankly say that I do not share these sentiments. The charm and the attraction of an ancient seat of learning are a possession peculiar to itself; they cannot be imparted to other institutions. For my part, I do not desire to see the new Catholic College as a foreign graft on an ancient tree, but rather as a healthy sapling, growing up from its own roots, racy of the soil, and full of the vigour and promise of youth. If it wants prestige, let it make a prestige for itself by the genius of its sons. If it wants the traditions of learning and fame, let it enter into its own rightful inheritance, and cherish the traditions that have come down from the distant past, when the ancient schools of Celtic Ireland shone out as bright beacons of light to Western Europe.

IDEAL OF A MODERN UNIVERSITY.

Then it must be remembered that the University of Dublin is cast in a mould which is rapidly becoming obsolete. It was founded in an age when University education was looked upon as the privilege of the few; and we have yet to learn how far it can accommodate itself to the needs of the many. The progress and prosperity of a nation are now recognised to be largely dependent on the wide diffusion of higher education; and accordingly, the ideal University of the present day must include amongst its students, not those only who are destined for a professional career, as it is called, but the far larger class who are to be the leaders of industry and commerce, the administrators of municipal and county affairs, the representatives of the people in the great council of the nation. And as the circle of its students is widened, it must enlarge the bounds of its educational system, adding on to the learning of the past the ample fields of modern science and literature.

I do not doubt, for a moment, that the University of Dublin will strive, in its own way, to shape its system of education to the needs of modern life; and I willingly acknowledge that it has already made some notable efforts in this direction. But we know from the example of Oxford and Cambridge, how strong is the prejudice against reform interwoven with the traditions of the older Universities, and how long and arduous is the struggle to engraft a modern education on an ancient model. Reformers are still warned not to lay profane hands on the Ark of the Covenant. And the argument still flourishes that the venerable system which was good enough to produce the great men of the past, must be surely good enough to produce the great men of the future.

* See Final Report of the Royal Commission on University Education in Ireland, pp. 40 and 53; Alexander Thom & Co., 1903.

DOCUMENTS. BROAD PROGRAMME OF THE ROYAL UNIVERSITY.

SECTION L.
LXXXIX.

The Royal University is hampered by no such obstacles. From its first foundation, a quarter of a century ago, it presented to the academic youth of Ireland a broad programme of studies, which embraces the whole domain of human knowledge. It has its Fellowships in the classical languages of ancient Greece and Rome, and, side by side with these, its Fellowships in modern languages, including a special Fellowship in the language and literature of our own country. It has its Fellowships in Mental and Moral Philosophy, ancient, mediæval and modern; its Fellowships in Mathematics, pure and applied; in Biology and the Natural Sciences; in Experimental Physics and Chemistry. Then it has its Studentships and Senior Fellowships, which afford to its most distinguished students the great boon of a few years of leisure, at the end of their academical career, with sufficient means to visit foreign Universities, to work in the laboratories of the great teachers of other countries, and in general to place themselves in line with the intellectual progress of the age.

In fact, the organisation of studies is complete; only the motive power is wanted, which belongs to a teaching University. Grant but this power, as recommended by the Royal Commission, and a new vigour will be infused into the associated Colleges; post-graduate courses will be established; schools of research will spring up; the feverish struggle for Prizes will cease; and while each College will be marked by its own characteristics, and develop its own ideals, the students of all will generously strive to win for their common Alma Mater that prestige which

we so much admire in the older Universities, but which we never can possess till we make it for ourselves.

CONCLUSION.

To sum up. I entirely accept every word of the admirable and comprehensive letter issued, some two months ago, by the Standing Committee of the Catholic Bishops of Ireland. I agree with them that a satisfactory settlement can be arrived at on the lines of a new University for Catholics, or of a College for Catholics under the University of Dublin, or of a College for Catholics under the Royal University. But the first of these schemes hardly comes within the scope of the Royal Commission recently appointed; and therefore the choice, at present, practically lies between the remaining two. Whichever of these two schemes may be eventually adopted I am ready to accept. But we are now in the stage of discussion; and the judgment of the country, as a whole, is best arrived at, when each one speaks out his mind frankly and without offence. In this paper, I have tried to give my reasons for thinking that the Royal University scheme is at once the easier to carry and the better in the interests of education. I will only add that it seems also to afford a fair prospect that the great resources of the Colleges of Galway and Cork, so deplorably wasted in the past, may now at last be turned to good account for the educational benefit of the nation.

Resolution in favour of a solution of the Irish University Question on the lines indicated in Lord Dunraven's Letter of January, 1904.*

(For Letter see page 476.)

IRISH UNIVERSITY EDUCATION.

THE UNDERSIGNED CATHOLIC LAYMEN HAVE SIGNIFIED THEIR APPROVAL OF THE FOLLOWING RESOLUTION:—

"We consider that a satisfactory solution of the Irish University Question can be arrived at on the lines indicated in Lord Dunraven's letter of the 1st January, 1904."

W. Adams, Tullamore, King's Co., C.U.C., J.P.
John J. Alcorn, 24, Corrig-avenue, Kingstown.
William Anderson, Glenavon, Merriem-road, Co. Dublin, J.P.
George C. Ashlin, 7, Dawson-street, Dublin, F.R.I.B.A., F.R.I.A.I.

Letter* from His Grace the Most Rev. Dr. Walsh, Archbishop of Dublin, with regard to the Declaration of the Catholic Laity of Ireland on the subject of University Education, presented to the Lord Lieutenant and the Chief Secretary for Ireland in 1897.†

"The Catholic Grievance Denied: Letter of Protest from the Archbishop.

(January 2nd, 1897.)

[The Declaration of the Catholic Laity, printed in the preceding section of this volume, was published in the Dublin newspapers of the 1st January, 1897. One of those newspapers, a leading exponent of Protestant opinion, in its issue of that day, treated the Declaration as an "anachronism," representing it as having reference to a "state of things that has passed away."

In reply to this bold denial that any grievance in this matter remains to be redressed, the following letter was written:—

ARCHBISHOP'S HOUSE,
 Dublin, New Year's Day, 1897.

An "Anachronism."

SIR,—I regret to find in your issue of to-day an article showing what I must take the liberty of describing as a total want of appreciation of the present position of the Irish University Question. Commenting on the notable Declaration on this subject from the Catholic laity of Ireland, published in this morning's newspapers, you speak of that Declaration as "an anachronism." "It is now," you say, "ancient history; and the state of things which it represented has passed away."

Inequality and Equality.

Now, let us see. The Declaration protests against the inequality which, to the disadvantage of the Catholic body in Ireland, is still maintained by the State in this country, in the Department of University education. It affirms the notorious fact that "a large number of Irishmen are at present precluded from the enjoyment of University education, honours, and emoluments, on account of conscientious religious opinions regarding the existing systems of education." Affirming this fact, what does the Declaration claim? Simply this, that such a change should now be made in the existing system of Collegiate and University education "as will place those who entertain those conscientious objections on a footing of equality with the rest of their fellow-countrymen, as regards Colleges, University honours and emoluments, University examination, government, and representation."

A Fact and a Claim.

Now, here we have a fact and a claim. The fact is that an inequality which is the result of "conscientious religious opinions" is maintained in Ireland by the State, to the disadvantage of those by whom those conscientious religious opinions are held. The claim is that this inequality be removed. The fact is undeniable. The justice of the claim is a necessary consequence of that fact. All this being so, I fail to see where the "anachronism" comes in, or what we have here to do with "ancient history," or with history of any kind, except indeed the history of the repeated admissions of responsible statesmen and Ministers of the Crown that a grievance, to the heavy disadvantage of Irish Catholics, exists in this matter of University education in Ireland, and that this grievance ought to be removed.

A Retrospect.

It will be admitted on all hands that nothing has been done by the State to improve matters in this respect, let us say, for the last ten or twelve years. I begin with the year 1885, the year in which I first had to deal with this question as an Irish Bishop.

Speaking in the September of that year, in reply to an address presented to me by the students of Blackrock College, I made my first protest on the subject. It was practically to the same effect as the protest of the Catholic laity published to-day. I was assured, however, next morning, by a representative Conservative journal of this city that in seeking to raise the University question as a question of practical politics I was merely wasting my time. The subject was "dead." It was not to be even "galvanised into activity." "Everybody except Archbishop Walsh was 'sick of it.'" The question of University education in Ireland had, in fact, been "amicably settled" to the satisfaction of "every class in the Irish community" by the establishment of the Royal University. And there was an end of it.

This is also like the position taken up in your article of this morning, that I think I cannot now do better than confront the comments of that article with the series of important statements from statesmen and Ministers of the Crown to which I have already referred. That was the line that I took, not without effect, in 1885. It is a line that, as a result of all

* Extracted from "The Irish University Question: the Catholic Case. Selections from the speeches and writings of the Archbishop of Dublin."—(Dublin: Browne & Nolan (Ltd.), 1897.)

† This Declaration has been reprinted in the Appendix to the First Report of the Royal Commission on University Education in Ireland.—(Cd. 826) 1901, page 295.

SECTION L.
XCI.

that has since occurred, can be taken with still greater effect now.

Sir Michael Hicks-Beach.

1. Not many months before the date of the incident I have mentioned, Sir Michael Hicks-Beach, on the 28th of July, 1885, speaking in the House of Commons as Chancellor of the Exchequer and Leader of the House, not merely admitted the existence of the Catholic grievance, and the importance of the question raised by it, but distinctly recognised it as one of the matters to be dealt with by a Government measure in the next session of Parliament. He spoke of the question as requiring "the very serious and early attention of Her Majesty's Government," and he added—
"If it be our lot to be in authority next year, I hope that we shall be able to advance some proposal which will be a satisfactory settlement of this most important question."

The "very serious" and "early" attention of the Government! That was eleven years ago. Not one iota has since been done for the settlement of the question by any Ministry, Conservative or Liberal. And yet the Catholics of Ireland are now to be told that their grievances in this matter have long since been removed, and that all reference to the existing state of things as unsatisfactory is "an anachronism," applicable only to some period of "ancient history" that has long since "passed away!"

Mr. Balfour.

2. Four years after the date of Sir Michael Hicks-Beach's words of promise, as yet unfulfilled, Mr. Balfour was questioned in the House of Commons, as Chief Secretary for Ireland, on the 15th of July, 1889, as to whether his attention had been called to a series of resolutions of the Catholic Bishops of Ireland. In those resolutions the Bishops had claimed that the existing inequality in the matter of higher education in Ireland should be removed by the Government. Mr. Balfour's reply was distinct:—

"The resolutions deal with many questions, and cover the whole field of education in Ireland. Without giving specific answers to the various points alluded to in them, I may say that some of them, notably higher education, have long been under the consideration of the Government, and in respect to them we hope to be able to make proposals to the House."

Mr. Balfour's Statement Emphasized.

3. Then followed an interesting incident. One of the grievances complained of by the Bishops was that of the exceptional privileges then enjoyed by the Training College of the National Education Board in Marlborough street. Mr. Morley asked whether that question was engaging the attention of the Government. Mr. Balfour answered that

"They (the Government) had been long considering the question of Training Colleges, and he thought something should be done in regard to them, but he did not put them on the same level of interest as higher education."

And now we are told that there is no question of higher education having a claim to be dealt with at all!

Let me observe, in passing, that Mr. Balfour has long since dealt with the question of lesser interest, that of the Training Colleges, and has dealt with it by a measure of reform, which, as I have more than once stated in a public speech, may well be taken as a model by any British Minister anxious to remove by a measure of absolute justice any existing Irish educational grievance. But my present point is that, whilst that question, which was described as a question of lesser interest, has been dealt with, the University question, which is of far higher interest, has not as yet been even touched, and that, moreover, we are now equivalently told that there is no such question at all!

Further Statement from Mr. Balfour.

4. On the 28th of August, in the same year, in his speech on the Appropriation Bill, Mr. Balfour was still more explicit in his recognition of the grievance.

"I repeat in the House what I have said outside the House, that in my opinion something ought to be done to give higher University education to the Roman Catholics of Ireland."

"The experiment of undenominational higher education has now been tried sufficiently long to make it, I am afraid, perfectly clear that nothing Parliament has hitherto done to promote that object will really meet the wants and wishes of the Roman Catholic population of that country."

"This being so, we have no alternative but to try and devise some scheme by which the wants of the Catholic population shall be met."

The Dublin Evening Mail.

By this time we had got so far ahead that, to my natural and very great satisfaction, I found soon afterwards, in the same Conservative newspaper that had so summarily disposed of my speech on the subject in 1885, a candid recognition that the Catholic case had been fully made out. On the 8th of November, commenting on a speech of mine made on the previous day, *The Dublin Evening Mail* was good enough to describe my arguments on the subject as "conclusive," and my "assault" on mixed education as "triumphant," and to say that

"There seems no resource left but a Catholic University."

Surely it cannot be that, after all this, we are now to be asked to begin at the beginning, and set about arguing the case all over again?

Mr. Balfour's Partick Speech.

6. Whoever else may take such a view of the case, the present First Lord of the Treasury, I am sure, will not. Speaking again in the same year, 1889, at Partick, on the 2nd of December, he was no less emphatic, and he was even more explicit, in his reference to the Irish University question than he had been in either of his speeches in the House of Commons.

He described the existing state of things in Ireland in this respect as "not creditable," and as one that he could not look upon "with equanimity." He spoke of Trinity College, with its Protestant place of worship and Protestant service, and its Chairs of Protestant Theology, as being still what it always had been—

"If not by its constitution, at all events by its composition, a Protestant institution."

And he added—

"You cannot ignore the fact, when you are considering the condition of education in Ireland, that the whole current of thought in such an institution is, and must be, antagonistic to the current of thought which would be acceptable to the large majority of the Irish people."

He spoke of the objections, "the undoubtedly conscientious objections, of Irish Catholics to use the means of University education at present at their disposal," and then he went on to say—

"It is not our business to inquire how far the undoubtedly conscientious objections of the Roman Catholic population to use the means of education at their disposal are wise or unwise. That is not our business. What we have to do is to consider what we can do consistently with our conscience to meet their wants."

After suggesting that "those great places of Protestant education—not exclusively Protestant, but mainly Protestant—Trinity College, Dublin, and Queen's College, Belfast," would be "greatly strengthened" by the establishment of a suitable provision for the University education of the Catholics of Ireland, he put to his hearers the significant question:—

"Whether we are not acting a most unwise part if we give any colour to the belief that a large part of Her Majesty's subjects in Ireland may claim from our hands the greatest of all boons—the boon of increased knowledge—and that this boon shall be refused to them by our prejudices acting upon the Houses of Parliament."

But this, it seems, is all in reference to a grievance that had passed out of existence years before Mr. Balfour had even come upon the stage of Irish politics! And the words of this eminently practical statesman are to be treated as if they had no more reference to an existing state of things in Ireland than if they were the dream of some doting recluse.

Judge Webb and Lord Justice FitzGibbon.

7. As I am quoting only the statements officially made by responsible statesmen and Ministers of the Crown, I merely mention here the noteworthy declarations made at the opening meeting of the Trinity College Historical Society in 1892, by Judge Webb and Lord Justice FitzGibbon. Both, speaking as Protestants, proud of the Protestant traditions of Trinity College, frankly recognised the existence of the Catholic grievance. Both pointed out the remedy—the establishment, as Judge Webb expressed it, of another University, “Catholic, chartered, and endowed.” Both advocated the establishment of such a University, not alone on the ground of justice to Irish Catholics, but on the ground also that Trinity College and the University of Dublin cannot continue as they are, and to be made safe against incessant and eventually successful attack, unless the College and University “rest on the foundation of justice,” through the establishment of a system which will supply to all Irishmen alike who need University education, “the means of obtaining it on equal terms.”

But all this, you inform your readers, we already have, and it is a mere “anachronism,” and a raking up of “ancient history,” if the Catholic laity of Ireland speak of the absence of it as a grievance of the present day!

Mr. T. W. Russell.

8. Having referred to this testimony from the Protestant Episcopalian side, it might seem discourteous if I were to omit noticing the equally frank recognition of our grievance by Mr. T. W. Russell, in an article written by him, whilst yet a private member, in *The Fortnightly Review* for February, 1892. Mr. Russell's words on the subject are as follows:—

“So far as University education is concerned, the Catholic grievance is *too plain to be ignored*. So long as the atmosphere is what it is in the University of Dublin and in Trinity College—i.e., so long as there is a Protestant Chapel and service, a Protestant Divinity School, and a teaching staff almost entirely Protestant, it is impossible to say that Catholics ought to be content.

“Nor can it be fairly urged that the Royal University—a mere examining Board—adequately supplies the place of a teaching University.

“I say the grievance here is undoubted. It ought to be dealt with in a liberal and fair spirit. On this branch of the question I go quite as far as Mr. Balfour went in his speech [in 1889].”

Earl Cadogan.

9. We now come to the present Ministry. In his speech at Belfast on the 15th of last January, his Excellency the present Lord Lieutenant spoke of the question of Irish University Education as a question with which the present Government “have to deal.”

I quite agree with you that if, as you have stated in your issue of to-day, the Declaration of the Catholic laity, published this morning, was an “anachronism,” or mere “ancient history,” and if “the state of things” described in that Declaration had, as you say, “passed away,”—if the equality claimed in that direction had already been conceded to the Catholics of Ireland, as you seem to think that it has been,—it would indeed show “a singular want

of sagacity and statesmanship” on the part of the present Government to waste either their own time or the time of Parliament in dealing with the question to which the Declaration refers. But as the Government have already recognised that question as one with which they “have to deal,” we may feel very confident that they will form a very different estimate from that formed by you of the weight to be attached to that impressive Declaration, and of the light in which it is to be read.

Mr. G. W. Balfour.

10. Last in chronological order comes the statement made upon the subject by the present Chief Secretary, in the House of Commons, on the 24th of last July. Speaking of the attempts at a solution of the question in the past—attempts which, in your view of the case, must have been eminently successful—Mr. Balfour said:—

“Most of the endeavours to solve the question had, he was afraid, been failures, which had brought more or less discredit on those who had attempted its solution. He did not know, if he was to try and solve it, that he should be more fortunate than those who had preceded him. He was not in a position to pledge the Government in this matter; but he repeated that, so far as he was personally concerned, he should be glad to try and make a solution of the problem, and it would be a great pride to him if, before he ceased to hold the office he now held, he could feel that even some step had been taken towards the solution of a problem which he was certain was intimately bound up with the future prosperity of Ireland.”

A safe standard and a safe guide.

It is to be hoped that whatever effort the Chief Secretary may make for the solution of the problem, the high importance of which he so fully recognises, may be as conspicuous a success as the attempts hitherto made have been conspicuous failures. In the history of those attempts he may find ample instruction as to the pitfalls that he has to avoid. In the principles so plainly enunciated in the Declaration now published, he has the key to the solution of the whole problem. Equality is the one thing necessary. It is a safe standard, and one most easily applied. It was the principle kept steadily in view by his predecessor, in the solution of the critical problem of the Training Colleges. In that case, a steadfast adherence to the principle of equality has led to a result practically without parallel in the history of Irish remedial measures. For not merely has the grievance been absolutely removed, not a vestige of it being left behind, but Mr. Balfour's success in the removal of it has been so palpable that even the sturdiest opponents of his project of reform have been unable since the realization of it, to raise even a whisper of criticism against the result.

But whatever may now be attempted for the solution of the University Question, and whatever the result of the attempt may be, it is satisfactory to be able to feel assured from the expressions I have quoted, that the Declaration of the Catholic laity, which, like the recent Declaration of the Irish Episcopacy, is now in the hands of the Government, is in no danger of being tossed aside on the plea that it is mere “ancient history,” and refers only to grievances that have long since “passed away.”

I remain, sir, your faithful Servant,

✠WILLIAM J. WALSH,

Archbishop of Dublin.

XCII.

Extract from a Pastoral Letter* of His Grace the Most Rev. Dr. Walsh, Archbishop of Dublin, issued in February, 1887.

PASTORAL LETTER.

(February 26th, 1887.)

[In a Pastoral Letter issued in February, 1887, the Archbishop dealt with the chief grievances of which Irish Catholics have to complain in the matter of Education.

The following is a portion of the Letter referring to University Education.]

In the year 1871, a Pastoral Letter was issued from a meeting of the Bishops of Ireland, at which his Eminence Cardinal Cullen, Archbishop of Dublin, presided.

Pastoral of the Irish Bishops in 1871; the claim for a Catholic University.

In that Letter, referring to the department of higher or University Education, the Bishops put forward, in the first place, the claim for a Catholic University. They did so in the words of a former resolution of the Episcopal body, which they reiterated, as follows:—

"As regards higher education, since the Protestants of this country have had a Protestant University with rich endowments for three hundred years, and have it still, the Catholic people of Ireland clearly have a right to a Catholic University."

An alternative scheme; a National University.

But, forestalling an objection which it was foreseen might possibly be made to this proposal, on the ground that it would involve an addition to the existing number of Universities in the country, the Bishops at once proceeded to point out another way in which, without any such inconvenience, if it be an inconvenience, the essential condition of religious equality could still be secured:—

"Should Her Majesty's Government be unwilling to increase the number of Universities in this country, religious equality cannot be realized unless the degrees, endowments, and other privileges enjoyed by our fellow-subjects of a different religion, be placed within the reach of Catholics on terms of perfect equality."

"Should it please Her Majesty's Government, therefore, to remove the many grievances to which Catholics are subjected by existing University arrangements, and to establish a National University in this kingdom for examining candidates and conferring degrees, the Catholics of Ireland are entitled in justice to demand that in such a University, or annexed to it.

"(a) They shall have one or more Colleges conducted upon purely Catholic principles, and at the same time fully participating in all the privileges enjoyed by other Colleges of whatsoever denomination or character.

"(b) That the University honours and emoluments be accessible to Catholics equally with their fellow-subjects.

"(c) That the examinations and other details of the University arrangement be free from every influence hostile to the religious sentiments of Catholics, and that with this view the Catholic element be adequately represented on the Senate, or other supreme University body, by persons enjoying the confidence of the Catholic Bishops, priests, and people of Ireland."

Another alternative: the University of Dublin.

Finally, in deference, doubtless, to the feelings with which it might be anticipated that the authorities of Trinity College, Dublin, would receive the suggestion of so great a change in the status of that College as would be involved in the establishment of a National University, the Bishops proceed to

suggest a third course, by the adoption of which, without any such comprehensive change, substantial equality could still be secured:—

"All this can, we believe, be attained by modifying the constitution of the University of Dublin, so as to admit the establishment of a second College within it, in every respect equal to Trinity College, and conducted on purely Catholic principles."

Such were the proposals, most moderate in substance, as well as most definite in form, made upon this subject by the Irish Bishops as far back as 1871. Of those proposals it will be observed that, in so far as they involve any interference with existing non-Catholic institutions, they were not put forward by the Bishops in their direct statement of the Catholic claim. That claim was for the establishment of a distinct Catholic University, in no way complicated in its constitution by a connection with any other University or College in Ireland. In so far as any change in the constitution, or in the position, of any existing College or University is referred to by the Bishops, the reference is introduced only in the suggestion of certain other alternative courses, by the adoption of which the great essential condition of equality might still be attained, in case the Ministry were unwilling, by the establishment of a Catholic University to make a full concession of the Catholic claim.

The Royal University: obvious inequality.

During the sixteen years that have elapsed since the publication of this Pastoral Letter of the Irish Bishops, but little progress has been made in this branch of our education question. Something, however, has been done. An Examining Board, authorized to confer University Degrees,—and thus constituting, in the anomalous modern sense of the term, a "University,"—has been established under the name of the "Royal University of Ireland;" and by means of the examinations that are held by it, the students of our Catholic Colleges are enabled to obtain University prizes and degrees. But the conditions under which our students are thus admitted to the competitive and other examinations of the Royal University are so manifestly wanting in equality,—as regards the position of the students of our unendowed Catholic Colleges, when contrasted with that of their favoured competitors, the students of other Colleges well endowed by the State,—that the impossibility of further maintaining a state of things so obviously indefensible, seems no longer to be matter of serious controversy.

How justice may be done.

That the equitable settlement of this long-standing difficulty of University Education may be effected in any one of the three ways indicated in the Pastoral Letter of 1871 admits of no room for doubt. Whether it may be possible also to effect such a settlement of it on other lines, in further development of the modifications since then introduced into our Collegiate and University arrangements, is a question on which it would, as yet, be unprofitable to speculate.

The Bishops, the Clergy, the Catholic people, of Ireland have too deep an interest in the practical settlement of this great question to allow individual preferences for any special form of University organization to stand in the way of any equitable settlement of this question that statesmanship may be able to devise. One condition, and one condition only, is essential: the maintenance of the principle of equality.

XCIII.

Resolution* of the Irish Roman Catholic Hierarchy on the University Question, 1889.

RESOLUTION OF THE IRISH BISHOPS ON THE UNIVERSITY QUESTION.

(March 21st, 1889, and June 25th, 1889.)

[A series of Resolutions on the Irish Education Question in its three branches, Primary, Intermediate, and University, was drawn up by the Standing Committee of the Irish Bishops on the 21st of March, 1889.

The Resolutions were endorsed by the Episcopal body at its next meeting, on the 25th of June, 1889.

The following is the Resolution in reference to University Education.]

As regards University Education, we renew the oft-repeated protest of the Catholic Bishops, clergy, and people of Ireland against the unfair and oppressive system of higher education, established and maintained in Ireland by State endowments, in the interest of non-Catholics, and to the grave social detriment of Catholics.

Catholics demand equality in University, as well as in Intermediate and Primary, education with their non-Catholic fellow-subjects so far as those systems are sustained and endowed by the State. They demand that their educational grievances, which have extended over three hundred years, and have been a

constant, ever-growing source of bitter discontent, be at length redressed, and they appeal to all sections of Parliament, without distinction of political parties, to legislate promptly and in a just and generous spirit in this all-important matter.

The Committee abstain from formulating the University system which would best satisfy their demands and wishes: they will merely observe that these would be satisfied substantially—

(a) By the establishment, in an exclusively Catholic, or in a common University, of one or more Colleges, conducted on purely Catholic principles, and at the same time fully participating in all the privileges and emoluments enjoyed by other Colleges of whatsoever denomination or character;

(b) By admitting the students of such Catholic Colleges, equally with the students of non-Catholic Colleges, to University honours, prizes, and other advantages; and,

(c) By securing to Catholics in the Senate, or other supreme University Council, in a common University, an adequate number of representatives enjoying the confidence of the Catholic body.

XCIV.

Report on the Accounts of Trinity College, Dublin, furnished by Messrs. Price, Waterhouse & Co.,
Chartered Accountants, in accordance with the instructions of the Commission.

- (1.) MEMORANDUM OF INSTRUCTIONS APPROVED AT THE MEETING OF THE COMMISSION ON 12TH NOVEMBER, 1906, AND COMMUNICATED TO MESSRS. PRICE, WATERHOUSE & CO., FOR THEIR GUIDANCE IN EXAMINING AND REPORTING ON THE COLLEGE ACCOUNTS.

This Commission has been appointed to inquire, among other matters, into the revenues of Trinity College, Dublin, and of any of its officers, and their application.

In pursuance of the duties thus imposed upon them the Commissioners have obtained from the College authorities the following financial returns:—

Return (1)—Summary of Accounts for each of the five years, 1901-1905 inclusive.

Return (2)—Return showing Receipts of Provost and Fellows of Trinity College, Dublin, for the year ended 31st October, 1905.

Return (3)—Return showing the sum expended in erection of buildings, 1890-1905.

Return (4)—Return showing in detail the Revenues of the Provost, Fellows, Professors, and other officers for the years 1904-5.

Return (5)—Return showing the Provost's Income for 1904-5.

Supplementary Returns:—

Return (1)—College Investments. Capital Balance Sheet for year ended 31st October, 1905.

Return (2)—Trust Funds. Capital Balance Sheet and Statement as to Income and Application.

Return (3)—Old Crown Estate. Acreage and Rental.

Return (4)—Old Private Estate. Acreage and Rental.

Return (5)—The Baldwin Estate. Acreage and Rental.

Return (6)—City Estate. Tenants and Rental.

The Commissioners desire to have the foregoing returns checked with the College records so that they may be able to report that the returns in question have been examined by an independent accountant who has certified as to their accuracy.

The Commissioners desire to have a detailed audit made of the accounts of income and expenditure for one year—viz., 1905. In the case of the similar returns for the four years immediately preceding, it will be sufficient to ascertain that the totals given agree with those in the College books.

The Commissioners also desire that explanations should be furnished wherever the technical terms employed, or the complex nature of the accounts, may render such explanations desirable.

The Commissioners also wish to be supplied with a report on the system of auditing, both internal and external, adopted by the College.

Finally, the Commissioners desire to have a general report on the system of accounting at present in operation, with suggestions for improvement, if such should seem to be required.

JAMES DERMOT DALY,

Secretary.

November, 13th 1906.

(2.) REPORT FROM MESSRS. PRICE, WATERHOUSE & CO. ON THE ACCOUNTS OF TRINITY COLLEGE, DUBLIN.

3, FREDERICK'S PLACE,
OLD JEWRY, E.C.,
29th December, 1906.

The Secretary,

Royal Commission on Trinity College, Dublin, and the University of Dublin,
16, Ely Place, Dublin.

DEAR SIR,—We have now completed the work entrusted to us, as set out in your letter of the 13th ulto. The authorities of the College have given us full access to the various books and documents.

It will be convenient to divide our report into three parts, viz. :—

- (A.) Examination of the Returns prepared for the Commission, including any necessary explanations.
- (B.) System of Accounting in use, and general suggestions for its improvement.
- (C.) System of Auditing, internal and external, adopted by the College.

(A.) EXAMINATION OF THE RETURNS.

RETURN (1). SUMMARY OF ACCOUNTS FOR EACH OF THE FIVE YEARS ENDING 31st OCTOBER, 1905.

These summaries agree with the Bursar's books, if we except for the present the additions in italics at the foot of the summaries in respect of the Dublin University Press Series and the Graduates' Memorial Building. There are two or three general remarks that require to be made :—

(1.) The accounts are those of the Bursar only, and do not include those receipts of the Junior Bursar, which are disbursed by him to the Junior Fellows and Lecturers, without passing through the Bursar's hands.

(2.) The accounts are prepared on a purely cash basis, no notice being taken either of Income not received or of Liabilities unpaid at the date of the accounts. For this reason the word "Payments" would be a better heading than "Expenditure" for the credit side of the account, corresponding to "Receipts" on the debit side.

(3.) Though the books are closed at 31st October in each year, the accounts represent in most cases the transactions of the year ending 30th September, as the principal payments are made quarterly, and the Students' payments received by the Junior Bursar in October are not accounted for by him until later.

Our other comments and explanations can be made most conveniently under the various heads in the accounts :—

Receipts.

Estates.—We have examined the Rentals in each year, and satisfied ourselves that the great variations in the totals year by year are due to variations in the amount of Arrears. The reduction in rental due to sales is at present only small, £550 between 1901 and 1905 in the case of the Old Crown Estate, or less than 2 per cent. The rise in the City Estate rental in 1905 is due to the falling in of leases in Westland Row and Lincoln Place, and the consequent inclusion of the rack rentals of these properties. The amounts entered in the printed accounts are the receipts, less outgoings, such as rent charges, drainage, improvements, and "achates and seal." The last-named expression is explained a little later on.

Dividends and Interest on Investments.—In 1904 the interest on Current Account at Bank, £40 8s. 6d., is included in the figure of £8,589 12s. 3d., instead of being shown separately as in the other years.

If the interest paid on the temporary loan from the Bank of Ireland is deducted from the receipts from dividends and interest, the net figures are as follows :

	£	s.	d.
1901,	7,203	3	6
1902,	8,679	1	3
1903,	7,689	4	3
1904,	7,998	11	5
1905,	8,774	14	1

The receipts for 1902 were swelled by large sums for back interest on the King-Harman loan, which

was being paid off by instalments with accrued interest. The figures for the later years show the normal increase due to investment of sale money received. The temporary loan from the Bank was to enable the College to take advantage of the opportunity of a new mortgage loan (to Lord Farnham) before the repayments of the King-Harman loan were to hand, and there appears to have been no loss of interest on the transaction. The loan has now been reduced to a nominal figure of £100.

No apportionment is made when the purchase price of Investments includes accrued dividends or interest.

Degree Fees and Fees in Arts.—These are increased in 1905 by the fees paid by English ladies taking *ad eundem* degrees.

The Degree Fees are received by the Senior Proctor and Junior Bursar, and handed over by them at regular intervals.

The Fees in Arts include only the proportion of the Students' payments which comes to the Bursar. The remainder (amounting to nearly one-half of the total) is distributed by the Junior Bursar among the Tutors, in accordance with an elaborate scale of calculation.

Registrar of Chambers' Fees.—A fee of 10s. per set of rooms is charged on taking possession. The same sum appears as a payment to the Junior Bursar, who is also the Registrar of Chambers.

Miscellaneous Receipts.—The amount of £98 1s. 4d. in 1901 includes a shooting rent of £76 10s. 4d. In other years such rents are included in the Estate Accounts. In 1905 the main item is £30 for the sale of old sheds in Westland Row.

Achates and Seal.—This is a percentage of the rents received, which is distributed among the Senior Fellows. In the 1904 statement the amount (£76 5s. 4d.) is included with Sundry Receipts.

Income Tax deducted from Payments.—The receipts shown from the Estates and Investments of the College are the net receipts after deducting Income Tax. On the other hand, the payments to the Fellows, Lecturers, and Scholars are the gross payments, and the tax deducted from these payments is shown in the accounts as a receipt. In the 1904 statement the amount of £2,901 7s. 5d. should be divided into Income Tax Refunded, £743 8s. 6d., and Income Tax deducted from Payments, £2,157 18s. 11d.

The refunds from the Inland Revenue in 1902, 1904, and 1905 are in respect of expenditure for the maintenance of Buildings which are not liable to tax.

Payments.

Junior Fellows.—The amount shown includes the Statutory Salaries, Compensation for Tutors' Salaries, and the salaries of the two Senior Tutors, the Junior Dean, Junior Proctor, and two or three other officers. The two Senior Tutors and the three Junior Fellows receiving the compensation payment do not share in the distribution made by the Junior Bursar. The total payments to Junior Fellows in 1905 were £19,722 9s. 11d., and full particulars of these are given in Schedule "A" hereto.

Junior Bursar's Poundage.—The Junior Bursar deducts 2½ per cent. on all amounts collected and handed over by him. He also retains the same poundage on the amount he distributes to the Junior Fellows.

Buildings, Maintenance, and Insurance.—The expenditure of £2,923 5s. 4d. in 1904 includes a grant of £1,000 towards the renovation of the Provost's house on the appointment of Dr. Traill. The 1905 figure of £3,131 8s. 11d. includes a further £550 for the same purpose, and also £900 for external painting of the College Buildings which takes place once in five years.

New Buildings.—The expenditure under this head, though included in the Revenue Account, is really of a Capital nature. The main items during the five years are the wings to the Graduates Memorial Building, the Electrical and Physiological Laboratory, and the Women's School of Anatomy.

Municipal Rates.—The large figure of £2,898 9s. 7d. in 1903 includes £1,400 arrears. The College assessment some time before this was greatly increased and payment was deferred pending appeal.

Schools, Charities, etc.—There is a reduction of about £700 in the last two years as compared with the first three, due to the transfer of payments to two professors to the head of Salaries. The 1905 amount is further reduced by £455 in respect of Licate fees payable to the Hospital for Medical Students, this sum not having been paid over until November after the closing of the accounts. This payment is classified in the books year by year under the head of "Charities" which appears to be an incorrect description.

Interest on Loan.—This was interest on a temporary Bank loan, as explained under the head of "Dividends and Interest on Investments."

Dublin University Press Series.—There is a ledger account in the books which is charged with all expenditure for Printing and Binding and with payments to Authors, and is credited with the proceeds of sales of books. In ordinary course no transfer is made to Revenue Account and there appears to be little if any loss on the Series. The amounts in italics at the foot of the statements described as "Increase of Liability" and "Decrease of Liability" can be more correctly described as "Excess of Payments over Receipts" and "Excess of Receipts over Payments" respectively. The amount of £3 18s. 10d. in the 1903 account should be on the other side and the figures are as follows:—

	£	s.	d.	£	s.	d.
Excess of Payments over Receipts in 1902.	298	14	4			
Do., Do., in 1904,	431	17	11			
				730	12	3
Less Excess of Receipts over Payments in 1901,	247	12	9			
Do., Do., in 1903,	3	18	10			
Do., Do., in 1905,	214	8	3			
				465	19	10
Net excess of Payments over Receipts in five years,				£264	12	5

The asset on the books is increased by this amount of £264 12s. 5d. in the five years, viz., from £1,176 4s. 3d., to £1,440 16s. 8d., which should be represented by a stock of Books and Copyrights.

Graduates' Memorial Building.—The sums in italics described as Liability or Increase of Liability of Graduates' Memorial Building are the amounts spent by the College in excess of the Subscriptions. The four amounts shown in the years 1902-5 come to £2,613 19s. 11d., and this sum appears on the books as an asset at 31st October, 1905, and was charged to Buildings in the Revenue Account for the following year.

RETURN (2). RECEIPTS OF PROVOST AND FELLOWS FOR THE YEAR ENDING 31ST OCTOBER, 1905.

Provost and Senior Fellows.—The total of £11,627 10s. 8d. exceeds the amount of £11,424 3s. 8d. in the 1905 accounts on the preceding page by £203 7s. as explained in a footnote to those accounts.

Junior Fellows.—The total of £18,909 15s. 6d. is considerably short of the correct total of £19,722 9s. 11d. In Schedule "A" we show the necessary corrections and also under what head in the accounts on the preceding page the various payments appear.

RETURN (3). EXPENDITURE ON BUILDINGS.

The amount for the year to 31st October, 1904, should be £1,512 7s. as shown in the 1904 accounts instead of £1,889 2s., a difference of £376 15s.

The total expenditure on the Graduates' Memorial Building entered as £7,500 was £11,141 12s. 1d., and

was all incurred prior to 31st October, 1905. The amount was provided as follows:—

	£	s.	d.
Subscriptions,	8,179	14	0
Interest allowed by Bankers,	347	18	2
	£8,527	12	2

Amount paid by the College and appearing as an Asset on the books at 31st October, 1905; charged as Expenditure on Buildings in the year ending 31st October, 1906,	2,613	19	11
	£11,141	12	1

The total of the Return should, therefore, be £73,761 10s. 1d., made up thus:—

Amount as per Return,	70,496	13	0
Less. Error as above,	376	15	0

70,119 18 0

Add Expenditure on Graduates' Memorial Building in excess of £7,500	3,641	12	1
	£73,761	10	1

RETURN (4). REVENUES OF PROVOST, FELLOWS, ETC.

TABLE I. Provost and Senior Fellows.—The total of this Table for 1905 is £12,757 11s. 8d., viz.:—

Amount as in Return (2),	11,627	10	8
Allowance for Provost's Porter,	42	0	0
Retired Fellow,	1,088	1	0
	£12,757	11	8

TABLE II. Junior Fellows. The total of this table for 1905 is £19,702 9s. 11d. This is £20 less than the correct total as shown in Schedule "A," the omissions being sums of £10 apiece to Mr. Kennedy and Mr. Kelleher in respect of the salary of £20 allowed to the Secretary of the Tutors' Committee.

TABLE III. Professors, Lecturers, etc. Under the head of Medicine for 1905 there is an amount of £88 12s. 8d. to add to the medical fees paid to Dr. E. H. Taylor.

Under the head of Literature, etc. for 1905, there require to be added £20 to Dr. Selss for extra German lectures and £3 3s. to Mr. Hahn for further examination fees.

TABLE IV. Salaries of Officers. We found this correct.

RETURN (5). PROVOST'S TOTAL INCOME.

We have not verified the Income from the Estates included in this return.

SUPPLEMENTARY RETURN (1). COLLEGE INVESTMENTS.

We have compared this Return with the books but have not verified the existence of the Investments. All the headings on the Liabilities side of the Return except the last denote merely the source from which the money which has been invested was received.

The final item "Deposits on Chambers" represents a liability to the various occupants of rooms in the College. The actual liability at 31st October, 1905 (being the deposits in hand at that date), was £2,835 5s. 0d., so that the liability is overstated by £12 15s. 10d. This difference is the balance of a number of items, as the account has not been kept correctly. During the year to 31st October, 1905, the Registrar of Chambers handed over £250 for investment, as the sum in his hands had increased beyond his requirements. Following on this transaction an erroneous entry was made crediting General Revenue Account with £250 and debiting Deposits on Chambers, although the transfer was merely an internal one and did not affect the liability. Some years ago there was a reverse entry when £100 was handed to the Registrar. Another cause of error is that the amounts received by the Registrar for damage to the rooms or furniture during occupation are added to this same account instead of being deducted from the expenditure on Repairs and Maintenance. We think the corrected amount should be carried on the General or Bursar's Balance Sheet, as although represented by

DOCUMENTS.
SECTION I.
XOVI.

investments it is not of a Capital character. The item of £217 7s. 7d. among the assets in the hands of the Registrar of Chambers should also be transferred.

SUPPLEMENTARY RETURNS (2), (3), (4), (5), and (6), have been compared by us with the books and found correct. We have not verified the acreage in the Estate Returns.

AUDIT OF THE ACCOUNTS OF THE YEAR ENDING
31st OCTOBER, 1905.

We have made a complete audit of the Bursar's books for this year, including the comparison with the Bank Pass Book of the record of transactions with the Bank, and the inspection of vouchers for all payments made. We have accepted, in the case of disbursements made by the Librarian and other heads of departments, their returns which had been already submitted to and approved by the Bursar and the Internal Auditor. With the exception of the error mentioned above when dealing with the "Deposits on Chambers" Account we find the book-keeping to be accurate.

(B). SYSTEM OF ACCOUNTING IN USE AND
GENERAL SUGGESTIONS FOR ITS IMPROVEMENT.

The accounts of all money passing through the Bursar's hands are kept by the Accountant who acts under the Bursar's instructions. The book-keeping appeared to us to be careful and accurate. We have discussed with the Accountant some suggestions in the direction of saving labour, the principal one being the introduction of a Cash Book to record in the first instance all transactions with the Bank of Ireland, in place of the present more cumbersome practice of passing all such entries separately through the Journal. If required we shall be prepared to furnish detailed proposals on this subject.

Receipts.

(a). *External.* The receipts from the Estates and Investments of the College come direct to the Bursar and are paid into "Trinity College, No. 1 Account" at the Bank of Ireland. The recording of these appeared to us clear and satisfactory, except that for the year 1905 the Rent Rolls had not been completed as in previous years, and we were obliged to write them up roughly for ourselves. The reason given by the Accountant for the omission was that neither of the Auditors asked for a Rent Roll

(b). *Internal.* The receipts from graduates and students mostly come through three sources:—

- (1.) The Senior Proctor.
- (2.) The Junior Bursar, who is also Registrar of Chambers
- (3.) The Assistant Registrar and Clerk of the Buttery.

(1.) The Senior Proctor receives the fees for degrees higher than B.A., and pays them into a bank account in his own name. From time to time sums on account are handed over to the Bursar, and a half-yearly settlement is made. If there is any advantage in a separate account, it would be secured by having an account in the name of the College from which transfers could be automatically made at specified intervals, but we can see no reason why these fees should not be paid into the general banking account of the College. The Proctor might be relieved of the responsibility for the fees themselves by requiring the production of a receipt acknowledging the payment of the fees at the College Office.

(2.) The Junior Bursar and Registrar of Chambers receives all the payments from students other than their weekly payments for Commons, etc. He keeps a Bank Account called "Trinity College, No. 2 Account" which is drawn upon by his own sole signature. The necessary book-keeping is very onerous, and it may be doubted whether it can be most satisfactorily carried out by a succession of brilliant scholars without clerical assistance. At the present time there is the foundation of a serviceable system, but there are many missing links, from an Accountant's point of view.

At the present time the Junior Bursar pays into the account at the Bank the bulk of what he receives, but not the exact amount day by day, and he pays

out the shares of the Tutors from time to time as required by their own Auditor, and makes quarterly settlements with the Bursar. We suggest that, if the present system is continued, the Junior Bursar should, at each distribution, pay himself his own poundage and other perquisites (instead of drawing sums on account as at present). Then, after each settlement (provided all receipts were paid into the Bank in full) it would be possible to ascertain the exact composition of the balance remaining in his Bank Account. At present this is only ascertained when the office of Junior Bursar changes hands, and we doubt whether even then it can be done accurately in the absence of a proper system of Cash Book and Ledger.

It is a weak point in the General Receipts and Payments accounts of the College as given in Return (1) that they do not include the whole of the students' payments, and in any change of system this would, no doubt, be rectified. There appears to be no reason why the whole of the money coming to the Junior Bursar should not be paid direct into a College office and the distribution to the Tutors now made by the Junior Bursar would then also be made from there, and thus both receipts and payments would come into the College Accounts.

We presume that the main purpose of the Offices of Junior Bursar and Registrar of Chambers is that there should be a Fellow available for personal relations with the students, to whom they can come with complaints, and to whom they can refer for various purposes. But if the accounts presented to the students were still made out in his name this requirement would seem to be covered, and in the great majority of cases a clerk could equally well receive the money and give a proper receipt. The present system of receipts with carbon copies is excellent.

(3.) Mr. Miller, the Clerk of the Buttery, receives the weekly payments from students for Commons, etc., and pays over £100 at a time to the Bursar, with a settlement at the end of each quarter. At present he keeps a Bank account in his own name, but we should recommend that the actual amount received each day should be paid into a College Bank Account.

Our suggestions under all three of the preceding heads are in the direction of centralisation. We think it is desirable that all money received from students should be paid at once into the account of the College in such a way that it can be drawn upon only by those who are authorised by the College to make payments on its behalf. Incidentally both the Senior Proctor and the Junior Bursar would be relieved of clerical work which could equally well be performed in a College Office.

(c). *Total income of the College.* The total income of the College consists of four parts as under:—

- (1.) The receipts of the College on general account which come into the hands of the Bursar. These are set out in Return (1).
- (2.) The receipts from Trust Funds applicable to special purposes. The income of these funds for the year 1904-5 is given in Supplementary Return (2) and amounts in total to £5,077 7s. 10d. At the 31st October, 1905, there was in hand the sum of £2,339 4s. 7d., representing undistributed Income of the various Trusts as shown in Schedule "C" to this report.
- (3.) So much of the receipts of the Junior Bursar as is distributed by him direct to the Junior Fellows and others. Of the fees received from Students, slightly more than one half is handed over by the Junior Bursar to the Bursar and appears as a receipt in the general accounts of the College under the head of Fees in Arts. The remainder, amounting in 1904-5 to £9,760 5s. 9d. does not so appear, but the allocation of it to Junior Fellows and other Lecturers is shown in Tables II. and III. of Return (4). The sum of £9,760 5s. 9d. was thus divided:—

	£	s.	d.
To Junior Fellows,	9,533	0	2 (see Sched. "A")
To other Lecturers,			
&c.,	227	5	7
	£9,760	5	9

- (4.) The receipts of the Provost from certain landed property. The total of these for the year 1904-5 is given in Return (5) as £1,787 5s.

Payments.

With the exception of the payments to Junior Fellows made by the Junior Bursar, all the payments are made by cheque on Trinity College, No. 1 Account. The Bursar has the sole right to draw on this Account and at the present time not only signs the cheques but draws them himself. If our suggestions above with regard to the consolidation of the two sets of Accounts were carried out, it would clearly be desirable to relieve the Bursar of this heavy clerical work and leave him freer for the necessary supervision of an enlarged department.

All accounts of any size are passed for payment by the Internal Auditor, and it might be considered desirable that he should also sign cheques over a certain value.

Such an arrangement would involve the separation of the Bursar's Banking Account into two parts, upon one of which cheques would only be honoured if bearing two signatures. The other Account would be available only for cheques below a specified amount.

There are numerous small payments to students for prizes, exhibitions, etc., but otherwise most of the payments are made at regular quarterly intervals.

Trust Funds.

There is a Capital Account and a Revenue Account for each Trust in the College books, and these appear to be in good order. If an annual statement of accounts is prepared, no doubt it will include a Receipts and Payments Accounts for each Trust. The amount of Trust Revenue in hand (£2,339 4s. 7d., at 31st October, 1905) appears as a liability in the Bursar's Balance Sheet (Schedule "C").

The Income Tax deducted from the Receipts for the Trusts is debited to Income Tax Account, and the Trust is given credit for the gross amount. Subsequently the tax deducted from the payments is credited to Income Tax Account, and the payment is stated gross. This is not strictly accurate, but causes no difficulty in the Trust Accounts when the whole Income is distributed exactly year by year. If the Income accumulates for any reason, and it is desired to invest the accumulation, allowance has to be made for the fact that the apparent balance on Revenue Account is subject to tax, and there may also be a difficulty when the rate of the tax varies. We see no advantage in the present procedure, and it has also the disadvantage that it, to some slight extent, confuses Trust money and College money. We, therefore, suggest that each Trust should be credited with net receipts and charged with net payments.

Balance Sheets.

There are at present two Balance Sheets prepared—the Capital Balance Sheet and the Bursar's Balance Sheet. We think it would be preferable to replace these by one General Balance Sheet, together with a list of the Investments of the College other than landed estates. A "Receipts and Payments on Capital" Account will show the actual changes during the year, and the General Balance Sheet will show to what extent there is Capital available for investment.

The General Revenue Account appears to be unnecessary, except as a summary of the balances of Revenue Receipts and Payments from year to year. Schedule "B" gives an abstract of the account for the five years, as it appears in the books. It will be seen from the notes that all the entries other than the transfers from "Income and Expenditure Account" are incorrect, but that they have been subsequently set right, with one exception.

On reference to the Capital Balance Sheet (Supplementary Return (1)), it will be seen that the Capital of the College available for investment is composed of the first six items on the Liabilities side, and totals £282,109 14s. 2d. This requires to be increased by £1,439 15s. 4d., for amounts wrongly debited to Capital, and credited to General Revenue on 14th May, 1904, as shown in Schedule "B," making together £283,549 9s. 6d. The investments on the same Balance Sheet total £278,830 7s. 5d., so that the balance of Capital uninvested is £4,719 2s. 1d.

In Schedule "C" we give the Bursar's Balance Sheet, as it appears in the College books, and in Schedule

"D" a suggested General Balance Sheet, based on the figures contained in the two existing Balance Sheets. We should have liked to have brought in the Junior Bursar's balances also, but we found that impracticable owing to the incompleteness of the books. If the two systems are combined, as we have suggested above, it will be desirable to date the Balance Sheet as at 30th September instead of 31st October.

The annual statements would then be:—

Receipts and Payments on Revenue Account.
Receipts and Payments on Capital Account.
Receipts and Payments on account of each of the Trusts.
General Balance Sheet, to include the balance on each of the foregoing accounts.
Schedule of Investments of the College.

It will be observed that we recommend that the Revenue Account shall continue to take the form of a Statement of Receipts and Payments. After carefully considering the subject, we have come to the conclusion that the greater accuracy in statement which would result from a careful apportionment of Income and Expenditure to the period to which it relates is not of sufficient importance to warrant the considerable increase in work which would be involved by such a change in the present system. We would only urge the importance of those in charge of the accounts endeavouring to get into each year a year's income, and to provide within the year for a year's expenses. We are led to this conclusion partly by the fact that, owing to the peculiar character of the Estate Income, it is undesirable to bring rents into the accounts until they are actually received.

College Office.

It is perhaps not in our province to make any definite proposals as to the best arrangements for carrying on the book-keeping of the College, but it will be seen that many of our suggestions above are in the direction of centralisation. There would seem to be many advantages in putting the whole of the accounting system in the charge of the Accountant, and in giving him whatever assistance may be desirable for the portions of the work requiring less skill. The Fellows of the College, who are responsible for the finances, would thus be relieved of much detail work. To an outsider it does not appear an economical arrangement that men of learning should spend time in writing out cheques and in other work which requires merely clerical accuracy.

(C.) SYSTEM OF AUDITING.

There are at present two Auditors, who work quite independently, and may be described as the Internal Auditor and the External Auditor.

Internal Auditor.

The Internal Auditor is a Senior Fellow, specially appointed to the post, with a salary of £200. A great part of his work is checking accounts for payment, as the Bursar expects to see his signature attached to accounts of any size before he draws and signs cheques in respect of them. He also verifies the receipts from graduates and students in various ways, from whatever source they come. For this purpose he examines the Junior Bursar's books up to a point, and satisfies himself that the proper amounts are handed over to the Bursar; but he does not perform a complete audit of these books, which would, of course, include an examination of the Bank Account in detail. He also examines the books kept by the Senior Proctor and the Clerk of the Buttery.

As far as he considers necessary, he checks the detail of the postings and additions in the ledgers, and signs the annual statements without any form of certificate.

External Auditor.

The present External Auditor is the Deputy Accountant-General of the Bank of Ireland. His fee is fixed at £60, and his duties are not defined, further

DOCUMENTS.

DOCUMENTS.
SECTION L.
XCIV.

than that he is required to sign the following certificate at the foot of the annual statements :

" I, having been appointed to audit and report upon the accounts of the College for the year , report that the accounts of the College are kept in proper books of account, and that the Abstracts and Balance Sheet contain a full and true account of the financial state of the College."

The course adopted by the present External Auditor, Mr. Leet (as communicated to us in conversation), is to take the entries in the Journal as they stand, and check the correctness of the postings and additions, and see that the annual statements correspond with the books. He also verifies the existence of the College Investments and the correctness of the Bank balance shown. He does not examine vouchers for the payments, nor see that they were properly authorised. He does not examine the Estate rentals, nor satisfy himself in any way that the receipts under the various heads shown in the books are those which should come in during the year. He does not institute regular comparisons between one year and another, so as to get explanations of any large variations. He does not compare in detail the entries in the books with the Bank Pass Book.

Remarks on System.

At the present time the work of the External Auditor practically forms part of an internal system. He exercises no check either upon the Bursar or the Internal Auditor, and only a limited one upon the Accountant. For example, all that the External Auditor knows independently about the payments is that they have been made by cheques signed by the Bursar. He does not see the bills in order to ascertain that they have been passed for payment by the Internal Auditor, and that the Accountant has

entered them in the books under the right head. Nor does the Internal Auditor know that the accounts which have been paid are those which he has passed for payment.

The present system would clearly need extension if it were decided to print and publish the annual accounts. It is clear that the Internal Auditor, from his knowledge of the affairs of the College, is a valuable aid to the Bursar, and in the course of our audit of the accounts for the year 1904-5 we came upon various evidences of the thoroughness of his work. But if the External Auditor were to be regarded in any sense as representing the public, it would be necessary that he should bring under review the whole of the accounting, and not take for granted the work of any of the College officials.

Tutors' Auditor.

One of the Junior Fellows examines the Junior Bursar's books on behalf of the Tutors, and sees that the proper proportions of the students' payments (according to an elaborate scale) are paid to each.

We think that the foregoing report fulfils the terms of the instructions conveyed in your letter of the 13th ulto. We have endeavoured to condense our remarks into the smallest possible compass, and we shall be glad to enlarge further, in writing, or at an interview, upon any special point as to which the Royal Commission may require additional information.

We are, dear Sir,

Yours faithfully,

PRICE, WATERHOUSE AND Co.

DOCUMENTA.
SECTION L.
XCV.

Memoranda submitted by the Provost of Trinity College, Dublin, with reference to the Accounts of Trinity College, Dublin.

(1.) Memorandum on certain matters referred to in the Oral evidence of H. Brougham Leech, Esq., LL.D.

[P. 196 *et seq.*]

Par. 3205 and 3209. Professor Leech, claiming to "have experience in financial administration," challenges the accuracy of the returns sent in by the Junior Bursar, Dr. L. C. Purser.

If, instead of making assumption as to the number of students entering, or on the College Books at any particular date, and then calculating the amount of fees they would have paid, he had made inquiry at the Junior Bursar's office, he would have ascertained that the fees which make up the totals for Senior Bursar and Junior Bursar are derived from three sources—(a) entrance fees; (b) half-yearly fees; (c) replacement fees. Students who have gone off the College books often replace again to continue their courses after an absence of half a year, a year, or several years, having temporarily dropped off for various causes. These replacement fees may be paid at any time of the year, causing a variable number of students at different periods. (*e.g.*) It happened that the return asked for by the Commissioners for July 1st, 1906, gave only 965 students on the books. At that date a large number of B.A. students had just gone off the books, and the new Junior Freshman class had only just begun to come on. In the subsequent return for May 1st, 1906, which I sent in, the number was 1,250. Had Professor Leech been one of the Fellows, he could not have made such mistakes in his premises, as he has done, nor have arrived at such imaginary conclusions. The actual amount of students' fees paid for Arts in the year October 31st, 1904, to October 31st, 1905, were as follows:—

Received by the Senior Bursar,	£10,154 4 0
Paid to Tutor Fellows by Junior Bursar,	£9,170 14 0
Total,	19,324 18 0

Par. 3209. Professor Leech challenges the accuracy of the returns sent in from the Senior Bursar's Office, comparing the dividends arising from investments in the years 1888, 1901, and 1902, viz., £7,107 0s. 3d., £7,202 3s. 6d., and £9,022 12s. 7d. respectively, the increase representing "a capital of £60,000 or thereabouts."

His experience in the Deeds Office, in the Four Courts, should have made him aware of the results of the Land Purchase Acts. When the middlemen landlords sell their estates to their tenants, the College head rents are bought out, so it is obvious that what appears in the accounts of one year as rents will subsequently appear in the shape of dividends on investments. In a particular case a mortgage on one estate was substituted for a mortgage on another estate, which was compulsorily paid off, and a temporary overdraft from the bank on a large scale was required to tide over the interval between the re-investment and the receipt of the capital sum. As I was Bursar at that time, I was receiving 4 per cent. interest on the re-investment, and £3 17s. 6d. per cent. on the mortgage, during the interval before the Land Commission paid over the capital sum, and during that interval I was paying the bank an average rate of £3 12s. 7d. on the overdraft, so that the transaction was a profitable one to the College.

Professor Leech in the same paragraph is at a loss to know where the £58,492 15s. 1d. spent on buildings came from in the thirteen years 1891 to 1903 (in-

clusive), and could not understand why there was no money to spend on a "Chair of Classical Archaeology." The above sum was taken from accumulated surpluses of income above expenditure over a number of years. The net surplus in the thirteen years in question was £33,806 9s. 6d. The reasons for this expenditure are obvious. The ancient Classics and other literature had monopolised the funds of the College to the detriment of Science teaching for so long, that it was time to make a change and provide not only for the erection of laboratories and other necessary buildings and equipment connected therewith, but funds to keep those laboratories and their equipments going. Hence the answers from the late Provost and myself, of which he complains, that "there was no money" for Classical Archaeology.

Par. 3211. Professor Leech cannot understand how a "refund" of income tax, £679 17s. 8d., can be "counted as receipts or as income any more than the deductions of £2,320 14s. 0d. as income tax from payments made." On p. 9 Report these figures are given under the head of "Receipts."

Income tax is paid in the first instance on all our income, but the College is entitled to a rebate on the values of certain buildings, library, &c., and when the Income Tax Commissioners "refund" a portion, it becomes part of the "receipts" of the year. Again, for the same reason, the College having paid the tax on its whole income, through its agents on the rents received, &c., any deductions made on the payment of salaries to Fellows, Professors, &c., must clearly be added to the "receipts" of the year. These are the most elementary matters of book-keeping, which Professor Leech might have assumed to be within the knowledge of the Bursars and Accountant, and not troubled himself about. But they cannot be left unexplained in the Report of Evidence, after his statements, hence these remarks of mine.

Par. 3212. Professor Leech finds fault with "interest" on loans from the bank, and criticises its very variable quantity, and assumes the rate to be 5 per cent.

I have already explained this under my remarks on par. 3209, as arising from the changing circumstances caused by the Land Purchase Acts, but at no time did the rate on overdrafts exceed 4 per cent., and the average rate paid on all such overdrafts for the last four years has been only £3 9s. 11d. per cent.

Par. 3323. The most serious mistake, however, that Professor Leech has made in his financial statements is that in which he compares the average incomes of the Junior Fellows with those of the Professors, especially as he draws the inference that the incomes of the Fellows are too high. He places the former at £817 17s. 0d., and the latter at £394 9s. 4d. (excluding the Divinity Professors, as being held by ex-Fellows). In the first instance, the Divinity Professorships are no longer restricted to Fellows or ex-Fellows, but in the next place he has mixed up Professors who give their whole time to the College, with Professors with large incomes outside College, and small incomes for small duties inside College, such as leading Physicians and Surgeons in Dublin who are Regius Professors in Medicine and Surgery in the University with salaries of £100 a year only, or Law Professors such as Professor Leech and Professor Hart, who draw incomes comparable with those of Senior Fellows

DOCUMENTS.
SECTION I.
XCV.

from important legal offices which they hold outside College, and who spend but a few hours in the week during term at their Professorial work. In addition he has included in his calculation of the average incomes of Professors persons who are not Professors, such as Assistants to Professors in the Professional Schools, and temporary Lecturers in the Indian Civil Service Class, and temporary Lecturers on Electricity having business offices in the town, some thirty-three in all. On the other hand, the Fellows have won their positions in open competition, and give their lives to the service of the College and University. The only fair comparison that can be made is to take the average incomes of those Professors who give their whole time to Collegiate and University work, and are

the heads of their various departments. They are thirteen in number, and their average income is £696, which is almost exactly the same as the average income of the Junior Fellows, which is not £817 17s. 0d., as stated by Professor Leech, but only £708, as taken in the normal year 1904, to which I have called attention on p. 12 Report.

On the whole, I am inclined to think that a Professor of Law does not always make a successful amateur auditor of accounts.

ANTHONY TRAILL,
Provost.

10th January, 1907.

(2.) Memorandum on certain matters referred to in the Oral evidence of R. J. M'Mordie, Esq.

[P. 166 et seq.]

THE FOLLOWING STATEMENTS BY MR. M'MORDIE OCCUR UNDER THE CORRESPONDING NUMBERS :—

No. 2580. "It is stated here, and has been for many years, that there is a large amount of residue, after all expenses are paid, which these men (referring to the Board of Trinity College), in a position of trust, divide among themselves, and that is called amongst the students a 'scramble for coppers.'" Mr. M'Mordie knows nothing about Trinity College or its students, who would not use such words.

This is a most serious charge, which should not be allowed to go uncontradicted in the Report of the Evidence before the Royal Commission.

It is absolutely false, and there is not only no foundation whatever for it, but *the thing* is an impossibility. All the College accounts are audited annually by an absolutely independent "external Auditor," an official of the Bank of Ireland, the "Deputy Accountant-General," who would at once put his finger on such misappropriation if it were there, and the attention of the Visitors would at once be called to it. All monies received by the Board are provided by Statute, or Royal Letter.

No. 2581. "The government of the College—their Provost and Senior Fellows—costs £11,424. Allowing a reasonable salary for the Provost there remains £10,000 per annum paid to men as a reward for studying books till they reach the age of 25 or 26. They do no teaching." He does not seem to be aware that the Senior Fellows have been teaching all their lives as Junior Fellows, from 30 to 40 years, and that if they were compulsorily retired on pensions the cost to the College would be very great. Long experience such as theirs is an invaluable qualification for the performance of the duties of their offices, the salaries of which only amount to £2,304.

He then goes on to say—"The Junior Fellows, as Tutors, do not teach; they merely advise students. They give no return either for their salary. They receive out of fees paid by students, for which they make no return, a sum of £12,800, so that £22,800 out of a gross income of £68,600 is wasted."

I cannot understand how any man can make such statements without having any information of any kind upon the subject. If he had made any enquiry whatever, even from students, he would have learned that the teaching of the Arts Course, as distinguished from that of the Professional Schools, is almost entirely carried out by the Tutor Fellows. There is a special Tutors' Committee who apportion the lecturing and teaching both for Pass students and for Honour students, among the Tutor Fellows, and these lectures last for at least six weeks out of each term, after the Term Examinations, which are

also conducted by them, have been finished, and there are three of these Terms in the year. If he happened to come inside the walls at any time from 10 till 1 o'clock in the day during Term he would see a busy hive of students coming and going at the beginning and ending of each hour to the various Tutorial lectures, and there is not a member of the Tutorial Staff who has not two or three hours of teaching each day to successive classes. Tutorial teaching is in many respects more trying than Professorial lecturing, as each individual student has to be taught by the Tutors on the Socratic method, or by demonstration, whereas a Professor lectures a whole large class together, once for all.

No. 2582. "The State, therefore, pays £23,000 per annum, for which no return is made, for the maintenance of a semi-monastic body of men, who have won for their College the title of 'The Silent Sister.'"

Mr. M'Mordie evidently thinks that the Celibacy Statute, which was repealed more than half a century ago, is still in force, and that the Fellows are still clergymen, and does not know that since the abolition of Tests in 1873 only four Fellows have taken Holy Orders, and that at present there are 26 laymen and only 7 clergymen out of the whole number of Fellows.

At one time Trinity College was called "The Silent Sister," but that designation has long since disappeared. The number and the value of the books published by the Fellows have in recent years been very large, and they are well known now in both Oxford and Cambridge, as well as on the Continent and in America.

Again, the most amazing statement with regard to the claims put forward by the Senior Fellows, in regard to examinations, is made here:

No. 2582. "They may give, say, 10 as full marks to a favourite student, and 1 or 0 to a student whose answering is as good or better than the other."

"Where the reward must follow the highest marks, a Senior Fellow claims the right, and sometimes exercises it (to give marks 'according to his impression of the student')." This statement is obviously intended to convey a charge of dishonesty, and therefore requires no answer.

ANTHONY TRAILL,
Provost.

Insufficient provision—Complaint of lack of interest (*Magennis*), 2943-50.

ALEXANDRA COLLEGE:

Ages of Students—Age Limits for practical purposes similar to those obtaining in Trinity College (*White*), 4152.
Courses and Lecturers—University Extension work, etc. (*White*), 4152.
Examinations for which Students are prepared (*White*), 4152.
Guild of past Students—Social work, etc. (*White*), 4152.
Hostel for Women Students at Trinity proposed—question of Alexandra College having the management or a share in it, etc. (*Bernard*), 664, 666-7, 672; (*White*), 4163.
Residence House at Alexandra College not large enough (*Bernard*), 665.
Leading part in movement for Education of Women in Ireland (*Miss Gwynn*), 2085; (*Madden*), 2477.
Literary Society in connection with the College—Classes organised, Lectures, etc. (*White*), 4152.
Loss of Fees, etc., entailed by admission of Women to Trinity College (*Bernard*), 594, 595; (*Gray*), 4011; (*White*), 4153.
Clashing of Financial Interests—Obstacle to providing Facilities for Women Undergraduates (*Bernard*), 730.
Injustice that Pioneer institution should suffer from forward movement (*White*), 4152.
Number of students—
Bye-Students (*White*), 4181.
Resident Students (*White*), 4182.
Total number from Jan. to Nov., 1906 (*White*), 4178-81.
Number of Students going from Alexandra College to Trinity (*Miss Gwynn*), 2148; (*White*), 4164-6, 4183.
Recognition by Trinity College, Claim for—Proposed Recognition of certain Lectures and Courses (*Bernard*), 594, 596-7, 616-18.
All that was asked was what had previously been offered—Trinity had not been able to carry out its own conditions (*Bernard*), 727.
Cleavage would be most unfortunate (*Hanan*), 4217, 4246.
Exclusive Recognition.
Not desired (*Bernard*), 616-8; (*Miss Gwynn*), 2149.
Not possible (*Traill*), 312-3.
Fees Difficulty—Question of remission by Trinity of part of Fees (*Bernard*), 594, 599-602, 668-70; (*White*), 4168, 4171-2.

ALEXANDRA COLLEGE—continued.

Recognition by Trinity College, Claim for—Proposed Recognition of certain Lectures and Courses (*continued*).
Individual Teachers and Particular Courses.
Confining Recognition to proposed (*Miss Gwynn*), 2154.
Offer to recognise (*Traill*), 309-10.
Justice of Claim, Question of—Moral Claim, Pioneer work done by Alexandra College, etc. (*Bernard*), 726, 726a, 727, 730.
Lecturers.
Provision of by Trinity under the Regulations issued by the Board—Not practicable (*Traill*), 313; (*Bernard*), 595.
Supply of
Lady Lecturers—No difficulty if suitably qualified Lady Lecturers were recognised (*White*), 4160, 4169.
Men Lecturers—Difficulty in regard to Men teachers mainly drawn from Trinity College (*White*), 4170.
Lectures which should be recognised—No Honours Lectures except in such subjects as Modern Literature (*White*), 4194-6.
London University, Example of (*Madden*), 2479-81.
Recognition of Alexandra College similar to recognition of Bedford College by University of London, proposed (*White*), 4154.
Rule that Teachers should be recognised by a proper Teaching Institution—Very desirable (*Bernard*), 619.
Women's Colleges recognised by London University were solely for adult Students and number of Students was much larger (*Hanan*), 4225.
Lowering Dignity of Education in the University of Dublin—Lectures recognised would not have same standing nor give same benefit as University Lectures (*Hanan*), 4216, 4218, 4245.
Not wholly satisfactory, but witness would be glad to have so much done (*White*), 4175-7.
Opinion against (*Miss Gwynn*), 2083-4.
Opinion in favour of (*Leech*), 3304-5.
Other Institutions would raise claims and would have to be recognised as well (*Traill*), 308; (*Bernard*), 732-4; (*Gray*), 4011.
No other claim except perhaps St. Mary's (*Bernard*), 731.
Outside Teachers—
Difficulty in recognising (*Bernard*), 595.
Never recognised by Trinity College, with certain exceptions in the Medical Schools (*Traill*), 311-2.
Parents preferring Women's Colleges for Education of their daughters, Case of. Class of Parents had given no evidence of its existence (*Hanan*), 4222-3.
Recognition would meet wishes of such parents (*White*), 4157.
Precedent—Considerable Academic Precedent for proposal (*Miss Gwynn*), 2155.
Slur on Students concerned, and also on Women Students of Trinity (*Hanan*), 4243, 4245.
Time-table difficulties, question of (*Miss Gwynn*), 2150-3; (*White*), 4173-4.
Tone of Alexandra College would not be that of a University—Majority of Students not University Students at all (*Hanan*), 4219-20.

ALEXANDRA COLLEGE—*continued*.

- Recognition by Trinity College, Claim for—Proposed Recognition of certain Lectures and Courses (*continued*).
- Tutorial System of Trinity would be disarranged (*Madden*), 2477-8.
- Women Graduates, Opinion of (*Miss Gwynn*), 2080.
- Religious Question—Governing Body required to be members of Irish Church, no restriction on Staff or Students (*White*), 4197.
- Return of Students from Trinity for additional teaching at Alexandra College (*White*), 4167, 4192-3.
- Robertson Commission Report, Extract from (*Madden*), 2477.
- Successes of past Students—Appointed Examiners in Royal University (*White*), 4152.
- Teaching Profession, Preparation for—Alexandra College v. Trinity (*Bernard*), 662-3.
- University Rank the aim of Founders of the College—Dr. R. P. Graves's Statements (*White*), 4152.

AMERICA:

- Theological Faculties, Separation from Universities—General Tendency (*MacDermott*), 1415-6.

ANDERSON, DR.—*President of Queen's College, Galway*:
Evidence, 3796-830.

ARCHÆOLOGY:

- Foundation of Chair in Classical Archæology, Question of (*Leech*), 3209-11, 3356-8.
- Irish Archæology, *see* title Irish Subjects.

ARCHDALL, RIGHT REV. DR.—*LORD BISHOP OF KILLALOE—Representing the House of Bishops of the Church of Ireland*.
Evidence, 2398-401.

ARMY CLASS (*Traill*), 324.

ARTS:

- Meaning of, as used in Trinity College (*Lord Chief Baron*), 1050.
- Post-Graduate Study, Question of—No Endowment and no time at disposal of present Professors (*Traill*), 321-3.

ARTS COURSE:

- Attendance at Lectures—Requirements at Trinity compared with those at Oxford and Cambridge (*Traill*), 317-8.
- Botany and Zoology for Pass Students (*A. F. Dixon*), 1868, 1877-8.
- refer also* to titles MEDICAL SCHOOL, EXAMINATIONS, etc.

ASTRONOMER ROYAL AND OBSERVATORY:

- Assistants—Present Assistant not drawn from Trinity College (*Whittaker*), 1247.
- Attendance at Lectures, Question of (*Whittaker*), 1248-9.
- Connection with Trinity College—Extent to which College provided Funds (*Whittaker*), 1241-3, 1253-4.
- Examinations (*Whittaker*), 1244-5.
- Government Grant Grievance—Treatment of Ireland as compared with Scotland (*Whittaker*), 1250-6.
- Government taking over the Observatory, Question of (*Traill*), 179; (*Whittaker*), 1241, 1246.
- Research Work (*Whittaker*), 1245.
- "Tutorial Astronomy" (*Bernard*), 684.

ATTENDANCE AT LECTURES:

- refer* to title RESIDENCE QUESTION.

AUDITOR:

- External Auditor—
Board quite satisfied with auditing (*Gray*), 4113.
- Gwynn's, Mr. lack of information (*Gray*), 4112.
- Salary small for the amount of work (*Gray*), 4112.

AUDITOR—*continued*.

- External and Internal Auditors, College provided with—Functions of external Auditor (*Gwynn*), 959, 963-4; (*Raleigh*), 965; (*Gray*), 3946.
- Functions of Auditor—
Independent person, Question of (*Gwynn*), 960; (*Chairman*), 961; (*Joly*), 962; (*Raleigh*), 965; (*Jackson*), 965; (*Joly*), 969.
- Paid Accountant kept (*Gwynn*), 966-7.
- Internal Auditor—
Board, giving appointment to, proposed (*Chairman*), 965; (*Jackson*), 966.
- Duties (*Gray*), 3946.
- Junior Fellow, Appointment of, suggested—Economy to College (*Jackson*), 965-6, 968.
- Registrar and Auditor—
Separate Officers—Proposal that duties should be discharged by one paid Official (*Joly*), 957-8, 962.
- Separation of Offices necessary (*Chairman*), 969.
- Sinecure Office (*Leech*), 3212 (p. 198).

B.

BALFOUR, MR. A. J.:

- Project for separate Universities—
Adopted by Mr. Balfour as means of protecting the Protestant University (*MacDermott*), 1490.
- Opposition to—Presbyterian General Assembly's Resolution, 1900 (*MacDermott*), 1292.

"BAN" OF ROMAN CATHOLIC HIERARCHY:

- Grounds on which Catholics were permitted to go to Trinity as to Oxford and Cambridge (*Delany*), 4448-9.
- Increased severity if Catholic Demands were satisfied elsewhere.
- No danger, the new College would be left to find its own level (*Delany*), 4443, 4450-1.
- Should be faced (*Bernard*), 756.
- Losing its force (*Gray*), 3915, 3917-8.
- Modification of Catholic Attitude not likely—
Present danger of Scepticism regarded as far greater than the old danger of Proselytizing (*Delany*), 4445, 4447.
- No actual prohibition—
Numbers of Students steadily increasing (*Culverwell*), 780.
- Strong discouragement but no active prohibition (*Barrett*), 3860-1; (*Delany*), 4403, 4441-2.
- Withdrawal of—
Accommodation for influx of Students, Question of—No difficulty in expanding (*Gray*), 4121-3.
- Separate College, Opinion in favour of, provided the ban was withdrawn from Trinity (*Traill*), 3 (p. 2).
- Withdrawal would make very little difference in Munster (*Barrett*), 3862.
- Would solve Problem before the Commission (*Gray*), 3922-3, 4012.
- Commission might make withdrawal a condition of any recommendation to assist Roman Catholic Body (*Gray*), 3924-8, 4013.

BARRETT, RIGHT HON. J.—*Lord Mayor of Cork*:
Evidence, 3831-97.

BEARE, MR. J. I.—*Regius Professor of Greek in the University of Dublin*.
Evidence, 4725-912.

BEDELL SCHOLARSHIP:

- refer* to title IRISH SUBJECTS, STUDY OF.

BEDELL'S STATUTES (*Madden*), 2441

- "Natives," Special Provision for (*Madden*), 2546.

BEGLEY, DR.:

- Bequest to endow Studentships in Medical School (*A. F. Dixon*), 1938.

BELFAST:

- Claims to a Separate University (*Delany*), 4302.
- Queen's College.
- Catholic University Medical School, Comparison with (*McWeeney*), 2818-26.
- Divinity Degree, No Connection with (*MacDermott*), 1361.
- Religious Opinions of Teaching Staff—President had always been a Presbyterian, but it had hardly ever been the case that majority of Professors were Presbyterian (*MacDermott*), 1452-6.
- Roman Catholic Students, Number of—Question as to Catholics who did not come to the College (*Hamilton*), 3680-83.
- Strong feeling on the University Question (*Hamilton*), 3610.
- Trinity Graduates on Teaching Staff—Number probably small (*Windle*), 3768.
- University, Development into, Question of (*Traill*), 47; (*Bernard*), 412-3; 499-500; (*Hamilton*), 3646, 3696, 3701.
- refer also to DUNRAVEN SCHEME.

BELMORE BILL [DIVINITY SCHOOL (CHURCH OF IRELAND BILL)] (*MacDermott*), 1284.

- Origin (*FitzGibbon*), 2266.
- Rejection by General Synod and Senate (*FitzGibbon*), 2266, 2268.
- University Council's Resolution disapproving Bill (*FitzGibbon*), 2266 (p. 131).

BERNARD, VERY REV. J. H.—Dean of St. Patrick's:

- Representing Signatories to Statement I. in Appendix to *First Report*—
- Evidence, 328-33, 353-495, 497-500, 561-756.
- Representing Special Committee of the General Synod of the Church of Ireland—
- Evidence, 2283-97, 2299-306, 2329-34, 2342-56, 2360, 2374, 2380, 2383, 2385-91.

BIOLOGY:

- Research Work, Obstacles to (*Thriff*), 1238.
- Teaching of—
- Catholic Objections Common to all Christians (*Delany*), 4317.
- Haeckel's Teaching, Objections to (*Delany*), 4317, 4494.

BOARD OF TRINITY COLLEGE:

- Existing Board, Reforms proposed, etc., refer to title GOVERNING BODY.

BOARDS OF STUDIES:

- see title FACULTIES.

BOOKS FOR CURRICULUM, CHOICE OF:

- Existing System—In practice Professors were free to dictate, Council almost invariably took the view of the Professors (*Joly*), 928-31.
- Professors, Choice to rest with—
- Robertson Commission Recommendation (*Joly*), 848.
- Supervision by Faculties, or some such Expert Body, advisable (*Joly*), 849-51.

BOTANIC GARDENS:

- Cost—Average Annual Cost during last four years, Recent Arrangements would lead to reduction of about £300 a year (*Dixon*), p. 83.
- Lectures and Classes in Connection with (*Dixon*), 1236.
- Research Work, Use for (*Dixon*), 1234-6.
- Separation from University on account of Outlay involved.
- Opinion against (*Dixon*), 1234; (*Joly*), 1276; (*Dixon*), 1276.
- Saving, Possibility of—Glad to part with Botanic Garden if income from estates were to be cut down (*Traill*), 179.
- Situation and Size (*Dixon*), 1238.

BOTANY AND ZOOLOGY FOR PASS STUDENTS (A. F. Dixon), 1868, 1877-8.

BOTANY, SCHOOL OF:

- Building of—Funds provided by Lord Iveagh (*Joly*), 1213.

BROWN, MR. D. F., K.C.:

- Evidence, 4913-5110.

BUILDINGS OF TRINITY COLLEGE:

- Expenditure by Trinity in last fifteen years (*Traill*), 152 (p. 10).
- Graduates' Memorial Building—Cost (*Traill*), 152 (p. 10).
- Improvements effected by use of £4,000 a year (interest on money paid as compensation for loss of advowsons) (*Traill*), 152 (p. 10).
- Sanitary Arrangements, Lighting, etc., Defects in, keeping Students away, Question of (*Mahaffy*), 2610-1.
- Supplied by or assisted by a Grant of money from the Irish Parliament (*Bernard*), 501-2.

BURNSIDE, MR. (*Madden*), 2456.

BURSAR:

- Age at which men became Senior Fellows and eligible for Bursarship—Increase since Dr. Carson's time (*Gray*), 4081-5.
- Duties (*Traill*), 152 (p. 9).
- Suggestion that all the Financial work of the College should be done in one office and not distributed as at present (*Leech*), 3212.
- Governing Body, Member of proposed (*Bernard*), 612; (*Joly*), 951.
- Junior Bursar—
- Clerk, Substituting, for Junior Bursar desirable (*Traill*), 211.
- Duties, Salary, etc. (*Traill*), 152, 210-12; (*Leech*), 3212 (p. 198), 3273.
- Status (*Traill*), 211, 213.
- Junior Fellows—Power desired to make a Junior Fellow Bursar (*Traill*), 255.
- Qualifications—Requirements, etc.
- Fellow not occupying a Chair proposed—Objections to Examination Limit, Business Training as the Qualification proposed (*Leech*), 3212.
- Office transferred from Fellow to Fellow, men without Business Training as a rule (*Leech*), 3333-5.
- Such a man as was described usually held the Office for a considerable time (*Gray*), 4080.
- Teaching Duties. Board to have power to exempt from, proposed (*Joly*), 953-6.
- Tenure (*Tarleton*), 529-30.
- Annual—but Bursar was usually re-elected and might go on for twenty years (*Gwynn*), 1084-9.

C.

CAMBRIDGE UNIVERSITY:

- Accounts published Annually (*Gray*), 3949, 3958.
- Chapels.
- Attendance Optional at some Colleges (*Jackson*), 4071, 4073.
- Cost of 17 Chapels for about 3,000 Undergraduates (*Gray*), 3922, 4064-8.
- Ordinary Chapel did not cost much—It was the Choirs that brought up the figures (*Raleigh*), 4069.
- Maintenance Compulsory by Act of Parliament (*Jackson*), 4074-5.
- Relations between Trinity College, Dublin and Cambridge (*Madden*), 2442, 2555.
- Roman Catholic Students offering themselves for Theological Tripos, Opinion against (*MacDermott*), 1391.

CATECHETICAL LECTURES:

- Attendance not compulsory—Fact to be deplored (*MacDermott*), 1449-50.
- Regulations should be under same Council as dealt with Divinity School (*Bernard*), 2301-2.

CARSON, DR. :

Length of time during which Dr. Carson held the Office of Bursar (*Gwynn*), 1087, 1089.

CATECHIST :

Sinecure Office (*Leech*), 3212 (p. 198).
Merging Office in that of Senior Lecturer proposed (*Traill*), 152 (p. 10), 193.

CATHOLIC ASSOCIATION :

Work of (*Synnott*), 1531.

CATHOLIC BISHOPS :

History of the Question made it impossible to approach the Roman Catholic Hierarchy to find out what would be acceptable (*Culverwell*), 772.

Influence on Success or Failure of Institutions for University Education in Ireland (*Synnott*), 1513, 1571; (*Fottrell*), 1733; (*Gray*), 3922; (*Dunraven*), 4552 (p. 287), 4649.

Lay Opinion and Ecclesiastical Opinion, see title CATHOLICS AND CATHOLIC CLAIMS.

Maynooth Students and the proposed new College or University, Attitude in regard to—Differences of Opinion, Tendency in favour of wider training (*Delany*), 4403-12, 4517-20.

Mixed Education, Attitude towards, see title MIXED EDUCATION, also names of Schemes involving Mixed Education—Single University, etc.

Separate University would be much preferred to a College, and failing that they would prefer a College in a University properly mounted with a Catholic Government (*Delany*), 4263, 4283.

Ideal not insisted on (*Dunraven*), 4643-6.

Three alternative proposals—Statement by the Bishops that they would be prepared to accept any of the Solutions, while pointing out that only one would be satisfactory (*Bernard*), 355-62.

CATHOLIC CLERGY, EDUCATION OF :

Importance of thorough Education for the Clergy and as far as possible of Co-education for Clergy and Laity (*Bernard*), 491-2; (*Delany*), 4357, 4371; (*Magennis*), 2954.

Lack of University Education—Seriousness in view of fact that they had complete control of Secondary Schools—Dr. O'Dwyer's views (*Synnott*), 1523.

Maynooth, see that title.

Royal University, Bishops requiring Students to go through (*Delany*), 4357.

CATHOLIC GRADUATES' ASSOCIATION :

Character of (*Magennis*), 2926-8.

Opinion in favour of any of the three solutions that would give equality (*Magennis*), 3080-1.

CATHOLIC LAYMEN'S COMMITTEE :

Attitude as between the College in a University and the Re-organisation of Trinity proposals.

Benevolent Neutrality (*Synnott*), 1530, 1560-2, 1579-81.

Conditions upon which either proposal would be accepted, see titles SECOND COLLEGE IN DUBLIN UNIVERSITY AND SINGLE UNIVERSITY.

"Hands off Trinity"—Not a Catholic Cry, Committee had no sympathy with the principle (*Synnott*), 1530-1.

Largely representative of Catholics who attend Trinity College (*Traill*), 36-7.

Statement brought before present Commission (*Synnott*), 1499; (*Fottrell*), 1722-3.

Powers of Committee—Jurisdiction exceeded, Terms of Resolution appointing Committee, etc. (*D. F. Browne*), 4963-5.

Statement submitted to Robertson Commission (*Synnott*), 1711-2; (*D. F. Browne*), 4915, 4949-56, 5079-81.

Voluntary Association of Gentlemen taking same view on Education Question (*Synnott*), 1498.

CATHOLIC STUDENTS IN TRINITY COLLEGE :

Church Going—Catholic Students more or less on their honour to be straight about their religion (*FitzGibbon*), 2264.

Date of first admission to Degrees in Trinity College (*Madden*), 2448.

Divinity School, Presence of, effect on Catholic attitude, see DIVINITY SCHOOL.

Number of Catholic Entrants—Mr. Fottrell's Statistics, etc. (*Gray*), 4013.

Due to low standard of admission (*Delany*), 4312.

Population Argument—There should be 1,400 instead of 24 Catholic Entrants alleged. 1,400—Figure obtained from Mr. Fottrell's pamphlet (*Gray*), 4137, 4143.

Intermediate Examination Test (*Gray*), 4014-8, 4129-30, 4136.

Test did not apply to Protestants (*Gray*), 4134-6.

Proportion of University going Population not taken into account (*Gray*), 4013.

Ten per cent. (*Traill*), 8; (*D. F. Browne*), 4915.

Relations with Protestants friendly (*Magennis*), 2955.

Strangers and out of touch with surroundings (*D. F. Browne*), 4915.

CATHOLIC UNIVERSITY MEDICAL SCHOOL :

Amalgamation with New College or University as its Medical Faculty proposed (*Delany*), 4475.

Ample material for construction of a Medical Faculty (*McWeeney*), 2814-5.

Attractive and promising feature (*McWeeney*), 2828.

Amalgamation with Medical School of Trinity College.

Proposal for

Equipment and Endowment, great needs of both Medical Schools (*Synnott*), 1541 (p. 89).

Staff Question (*Synnott*), 1541 (p. 89), 1664.

Protest (*McWeeney*), 2814, 2837, 2923A.

Anomaly of two Medical Schools in same City and connected with same University, Question of (*McWeeney*), 2828.

Apparatus, Duplication commendable measure, Royal University already possessed splendid apparatus (*McWeeney*), 2828.

Classes, Unwieldy Size (*McWeeney*), 2828.

Individuality, Preservation of, desired (*McWeeney*), 2881-4, 2909-10.

One Medical School in different buildings—Objections (*McWeeney*), 2819-22.

Apparatus and Equipment—

Bequest by Dr. Molloy (*McWeeney*), 2828.

Need for Equipment (*Synnott*), 1698.

Royal College of Science, Question of making apparatus available (*McWeeney*), 2865-7.

Royal University—If Scientific Apparatus were available for Laboratory Work, could it be withdrawn for examination purposes? (*McWeeney*), 2857-64.

Competition, Question of, if ban were removed from Trinity (*McWeeney*), 2890-1.

Date of Foundation, Charter and Endowment (*McWeeney*), 2815.

Efficiency of School as a Teaching Instrument—Comparison with Queen's College, Belfast (*McWeeney*), 2818-26.

Examination—Proportion of Students who take the Royal University Examination (*McWeeney*), 2825, 2904-5.

Maintenance of School and individual Departments, Method of defraying expenses (*McWeeney*), 2815.

Number of Students (*Delany*), 4475-7.

Poor Law, Appointment under—Cecilia Street training at present in a man's favour, formerly against him (*McWeeney*), 2885-9.

CATHOLIC UNIVERSITY MEDICAL SCHOOL—continued.

Professors and Teachers—

- Holders of Practical Chairs were practising Medical Men—Holders of Scientific Chairs were Non-Practitioners (*McWeeney*), 2816.
- Indirect advantage of the School to the Practitioners—Students consulting them as Medical Men (*McWeeney*), 2817.
- Protestants becoming more numerous than Roman Catholics—Not Satisfactory, Destructive of Intellectual Sympathy (*McWeeney*), 2845-7.
- Protestants, Succession of (*McWeeney*), 2844.
- Salaries, Amount and Source of (*McWeeney*), 2815.
- Protestant Students, College open to (*McWeeney*), 2843.
- Relations with Medical School of Trinity College. Amalgamation, see that sub-heading. Courses recognised (*A. F. Dixon*), 1816.
- Question whether existence of a Second School was advantageous or not (*A. F. Dixon*), 1837-8.
- Relations with University of Dublin, assuming that the School formed part of a College affiliated to the University.
- Competition—
 - Degree Examination, Objection to Competition—Opinion in favour of graduating out of one College by means of Examinations held in that College (*McWeeney*), 2842.
 - Not a thing to be cultivated (*McWeeney*), 2841.
- Courses—Some Control by the University, Formation of a Board of Studies representative of the different Colleges, proposed (*McWeeney*), 2871-5.
- Examinations—Student ought always to be examined by his teachers with the aid of an External Examiner (*McWeeney*), 2869-70.
- Prizes, Research Fellowships, etc., to be competed for in common (*McWeeney*), 2839-40.
- Separate Standard and Separate Examinations for each College (*McWeeney*), 2839, 2868.
- Teachers, Method of appointment (*McWeeney*), 2876-7.
- Research Work (*McWeeney*), 2815.
- Site and Buildings—Necessity for better Site and Buildings, etc. (*McWeeney*), 2828.
- Success of the School—Steady increase in number of Students, Distinctions gained at Royal University—Cause of Success, etc. (*McWeeney*), 2817, 2826-8.
- Teaching—No Conflict between Catholic Dogma and Science Teaching (*McWeeney*), 2828, 2853-6, 2892-3, 2903.
- Only matter that was interfered with was the teaching of Doctrines contrary to revealed Religion, No interference with investigation (*McWeeney*), 2848-52.

CATHOLICS AND CATHOLIC CLAIMS—LAY OPINION, ETC. :

- Claim of Right by the Catholics to Dublin University as a National University (*D. F. Browne*), 4942-7.
- Community of feeling between teacher and pupil, Importance of—Whole strength of the case for higher Catholic education (*McWeeney*), 2828.
- Declaration signed by Catholics in 1870 and renewed in 1896.
- Browne's, Mr. D. F., association with 1896 movement (*D. F. Browne*), 4914, 4936-9.
- Claims set forth in the Documents (*D. F. Browne*), 4948.
- Desire for Academic Education (*D. F. Browne*), 4983-6.
- Devout Catholic, Definition of (*Tarleton*), 346; (*Bernard*), 393.

CATHOLICS AND CATHOLIC CLAIMS—LAY OPINION, ETC.

—continued:

- Dublin University Staff desire to know what University provision would be acceptable—Decision to consult Catholic Laity (*Culverwell*), 772.
- Ecclesiastical Opinion and Lay Opinion, Relative Weight—Relations between Laity and Hierarchy, etc. (*Culverwell*), 763 (p. 44); 772 (p. 44), 776, 2426; (*Magennis*), 2963, 3019-27.
- Existing Schemes, Attitude towards (*D. F. Browne*), 5065-5110.
- see also names of Schemes, SECOND COLLEGE WITHIN THE UNIVERSITY OF DUBLIN, etc.
- Grievances of Catholics in regard to higher Education generally admitted (*Dunraven*), 4552 (p. 287).
- Individual Catholic, Position of—Prohibition of any particular College would preclude a Catholic Student from entering it, but he had no voice as to whether there should be a prohibition or not (*Synnott*), 1855-8.
- Injustice, Sense of—Catholics constantly saw men they had beaten in public examinations preferred before them (*Delany*), 4321, 4492.
- Favouritism, Preference attributed to (*Dunraven*), 4552 (p. 287).
- Intermediate Results showing large proportion of Catholic Students fully qualified for higher Education (*Delany*), 4473.
- Number of Catholics desiring University Education—
 - Increase in—Number taking Arts Examination in Royal University (*Delany*), 4471-3.
 - Population Argument, Objection to—Three-fourths of Irish people probably were Roman Catholics, but not three-fourths of University going Population (*Bernard*), 472-3.
 - Benefits provided by other Universities and in other countries (*Magennis*), 2953.
- Secondary Education, Success in, did not necessarily mean that the person would be benefited by going to a University (*Bernard*), 483-7.
- Trinity College, attitude in regard to, as at present constituted (*Fottrell*), 1720.
- Avoidance of (*Synnott*), 1666-7; (*Dunraven*), 4552 (p. 256); (*D. F. Browne*), 4915.
- Large number wished their sons to come to Trinity (*Traill*), 8.

CELTIC LANGUAGE AND LITERATURE :

- Encouragement of study of—Establishment of Moderatorship, etc., proposed.
- Means of popularising University of Dublin (*Crozier*), 2411.
- Opinion in favour of (*Madden*), 2546, 2559.
- Subjects in spite of their interest not of sufficient value (*Gray*), 4012.
- Irish, see that title.

CHANCELLOR :

- Election, Mode of.
- Provost and Fellows, Election by—Original mode of Election (*Madden*), 2440.
- University Officer, but elected by Governing Body of the College till 1857 (*Madden*), 2486.

CHAPEL :

- Attendance question (*Gray*), 4072.
- Non-attendance by a man preparing to be a Clergyman—Testimonium would be stopped (*Traill*), 296-7.
- Not compulsory (*Traill*), 193; (*MacDermott*), 1449-50.
- Control.
- Extent to which Chapel was a College, or a University Chapel (*Bernard*), 2253-4.
- Preachers—No security at present that preachers should be loyal members of the Church (*Bernard*), 2303-4.
- Provost, Control by.
- Bishops' Objections, Reply to (*Traill*) 2416.

CHAPEL—continued.**Control—continued.****Provost, control by—continued.**

Cleric of Church of Ireland should have entire control (*Bernard*), 2305-6; (*Traill*), 2420.

Lay Member of Church of Ireland—Power should rest with Provost after consultation with Regius Professor—Present position (*Traill*), 2421-2.

Not a member of Church of Ireland—Control should rest with Regius Professor of Divinity (*Bernard*), 2305-6; (*Traill*), 2417-8.

Worked very well up to the present, nothing inherent in the position of Provost making him suitable for that particular duty (*Bernard*), 650.

Regius Professor of Divinity, Control by, proposed (*Bernard*), 649.

Refer also to sub-heading Provost.

Regulations should be under same Council as dealt with Divinity School (*Bernard*), 2301-2.

Ccst—Choir made the Chapel costly (*Gray*), 4069.

Presbyterian Objections to (*MacDermott*), 1280.

Presbyterian Services, Occasional Use for, proposed—No objection (*MacDermott*), 1333.

CHARTER :

Laudian Statutes, *see* that title.

Recognition of Trinity College as a University and grant of right to elect two members of Parliament—Charter of James I., 1613, (*Madden*), 2441.

Solution of problem must either not interfere with Charter or must count on its surrender (*Gray*), 3922.

Act of Parliament would be required since Charter could not be withdrawn by a King's Letter (*Gray*), 3922, 3960.

Voluntary Surrender not to be expected (*Gray*), 3922, 3960, 3981-2.

Terms of Charter granted by Queen Elizabeth, 1592 (*Madden*), 2440.

CHICAGO UNIVERSITY :

Mixed Classes (*O'Farrelly*), 4249.

CHURCH OF IRELAND :

Athanasian Creed question, History of Settlement (*FitzGibbon*), 2361.

Bishops—

Appointment, Method of (*FitzGibbon*), 2260 (p. 126).

Independent Position—Separate Representation before the Commission an exercise of their Constitutional Right (*FitzGibbon*), 2253.

Representative of all Orders in the Church (*FitzGibbon*), 2266 (p. 131).

Church as a Church should not interfere in any of the matters outside the Divinity School (*FitzGibbon*), 2308.

Clergy.

Appointment, Method of (*FitzGibbon*), 2261 (pp. 126-7).

Number (*FitzGibbon*), 2257.

Provision for—Average Payment larger than Average Payment to English Clergy (*FitzGibbon*), 2261 (p. 126).

Superannuation, Provision for (*FitzGibbon*), 2257.

Constitution (*FitzGibbon*), 2246.

Assemblies, Synods, etc., Right of holding (*FitzGibbon*), 2251.

Declaration of 1870 (*FitzGibbon*), 2251-3.

Dissolution of Union with Church of England—Act of 1871 (*FitzGibbon*), 2247.

Provisional Constitution framed by Convention of 1870 (*FitzGibbon*), 2251.

Courts of the Church.

Constitution and Jurisdiction (*FitzGibbon*), 2274-5.

Success in Maintenance of Discipline, etc. (*FitzGibbon*), 2276.

Crown Appointments made on Church Nomination (*M'Mordie*), 2586, 2590.

Dignitaries—Classes included (*FitzGibbon*), 2260 (pp. 125-6).

Divinity School of Trinity College, connection with, *see* title DIVINITY SCHOOL—Retention.

CHURCH OF IRELAND—continued :**Dublin Diocesan Synod—**

Constitution (*FitzGibbon*), 2253.

Motions and Debates on Divinity School and Chapel—Ineffective and technically impertinent (*FitzGibbon and Bernard*), 2360.

Episcopal Organisation (*FitzGibbon*), 2253.

General Synod—

Constitution, Powers and Functions (*FitzGibbon*), 2253.

Disestablishment, Questions opened up by—Success of the Synod in settling questions (*FitzGibbon*), 2361.

Governing Body of Trinity College, Effect of Disestablishment of the Church—Loss of promotion amongst Fellows (*Traill*), 152 (p. 10).

Numerical Strength (*FitzGibbon*), 2246.

Property held on trust for people bound by Statutory Contract—Section 20 of Irish Church Act, 1869 (*FitzGibbon*), 2247.

Protestant Churches with which Church of Ireland maintains Communion (*FitzGibbon*), 2252-3.

Representation of, before the Commission (*FitzGibbon*), 2246, 2253.

Representative Church Body, Position of—Represented by Special Committee of the General Synod (*FitzGibbon*), 2256.

Students of Trinity College, Percentage of supplied by the Church (*FitzGibbon*), 2246; (*Crozier*), 2401.

Union with Church of England (*FitzGibbon*), 2247.

Position before the Union—Independent, but otherwise identical with Church of England (*FitzGibbon*), 2247.

CLASSICAL SCHOOL :

Leech's, Dr., Criticism of (*Madden*), 2485—Dr. Starkie's statement repudiating alleged sympathy with Dr. Leech's Criticisms (*Beare*), 4727.

CLASSICAL SOCIETY :

Foundation of (*Beare*), 4861.

Objects and Capabilities of Society—Discussions, etc., would be good preparation for original work (*Beare*), 4862-4.

COGHLAN, DR. :

University Professors, Statement of Claims of Roman Catholic Church (*Traill*), 50.

COLONIAL STUDENTS :

Second College in University of Dublin as an Attraction, Question of (*Traill*), 125-7.

CORK—QUEEN'S COLLEGE, ETC. :

Arts Endowment, Question of (*Windle*), 3795.

Catholic Hierarchy, Approval of, would increase number of Students (*Barrett*), 3845-8; (*Dunraven*), 4723.

Deans of Residence for non-Catholic Students, Confraternity for Catholic Students (*Windle*), 3760-1.

Dunraven Scheme, *see* that title.

Excellence of Teaching Staff—Lack of Students (*Archdall*), 2399.

Existing Arrangement—Affiliated to Royal University (*Delany*), 4307.

Subjection to Royal University, Effect of—Initiative destroyed (*Windle*), 3780.

Failure as regards Arts Education (*D. F. Browne*), 5104-6.

Retention as a College of a Roman Catholic University of a modern type, proposed (*Bernard*), 414, 499-500.

Standard affected by lack of Competition and small number of Students (*Delany*), 4311.

Students—

Mixture of—No difficulties (*Windle*), 3759.

Number—

Catholic Students, Proportion of (*Windle*), 3757-8.

Increase in Arts Classes (*Windle*), 3762.

Trinity Graduates on Teaching Staff—Number not large (*Windle*), 3766-7.

University, Claim for, or failing that, an Autonomous College (*Windle*), 3727, 3753; (*Barrett*), 3836-7, 3840, 3842-4, 3849, 3868-9.

CORK—QUEEN'S COLLEGE, ETC.—continued.

- University, Claim for, or failing that, an Autonomous College—*continued.*
- Affiliation to either Dublin or Royal University not desired (*Barrett*), 3851, 3863.
- Committee on University Education in Munster, Conclusions of, Document handed in (*Barrett*), 3995.
- Degree of proposed University, Question as to value of (*Barrett*), 3879-82.
- Financial, Social or Moral Claim—Cork Parents could not afford to send their sons to Dublin and Cork was far better suited to be a University City (*Windle*), 3754-5; (*Barrett*), 3840, 3862, 3866-7, 3883, 3886-8, 3891-3.
- General Medical Council, Autonomous College supervision of on lines of, proposed (*Windle*), 3727-30, 3777.
- Opinion in favour of University Claim (*Windle*), 3776-7.
- Provincial Institution—Objections to Catholics becoming an agency for securing reform of Trinity College (*Magennis*), 3124, 3128.
- Rate aid would be given, but only if College remained in Cork and was really free (*Barrett*), 3870-6.
- Students for new Institution—Number available, Sources of Supply (*Windle*), 3782-3; (*Barrett*), 3852-6, 3884-5.
- University, Claim for, or failing that, an Autonomous College in connection with the Royal University (*MacDonald*), 4525-8, 4538, 4541.
- "Autonomous," meaning of (*MacDonald*), 4536-7.
- Claim based on area of County and distance from anywhere else—Comparison with Scotland (*MacDonald*), 4532.
- Desirable that Queen's College should develop into a University on its own lines—Preferable to an Autonomous College in a Federal University (*Delany*), 4307, 4398-402.
- Federal System disapproved—Opinion that any amalgamation with Trinity would be a failure (*MacDonald*), 4541.
- Local Desire—Unanimity of opinion (*Delany*), 4435; (*MacDonald*), 4541.
- Modification of Queen's College so as to turn it into a University with lower fees than Trinity College, proposed (*Traill*), 46.
- Professors, Mode of Appointment—Governing Body not qualified to make selection (*MacDonald*), 4549-50.
- Rate in aid given if place for University Education for Munster were established in Cork (*MacDonald*), 4535, 4544-8.
- Suitability of Cork for a Denominational College in connection with the Royal University (*Traill*), 3, 46, 92-3.

CORPORATION:

- Existing Constitution—Provost, Fellows and Scholars (*Bernard*), 438-9; (*Joly*), 809, 918.
- Original Charter, Terms of—College incorporated to be a *Mater Universitatis* (*Madden*), 2440.
- Professors—
 - Addition to Corporation, proposed, refer to titles FELLOWSHIP SYSTEM AND PROFESSORiate.
 - Excluded (*Madden*), 2490, 2492.
- Qualification for Membership—Fellowship the only qualification for permanent Membership (*Gray*), 3972.
- Radical change, such as including Members of the Professoriate would meet with strong opposition (*Madden*), 2448, 2454.
- Reform which interfered with Charter of the College must begin by destroying the Ancient Corporation (*Gray*), 3922.
- Reforms to be carried out by King's Letter must be accepted by Corporation (*Madden*), 2447-8, 2454.

COST OF LIVING FOR UNDERGRADUATES, ETC.:

- From £80 up to £120 or £130 per annum, sometimes more (*Mahaffy*), 2691-2.

COUNCIL:

- Abolition of—
 - Not proposed (*Tarleton*), 549.
 - Substituting Boards of Studies, refer to title FACULTIES—GENERAL BOARD.
- Appointment in 1874—Increasing Closeness of Union between College and University (*Madden*), 2486.
- Board and Council—
 - Harmony between—Appointments to Professorships, Arrangement of Curriculum, etc. common to Board and Council (*Gray*), 3942, 3945.
 - Independence of Governing Body in matters educational, Professors could then be represented and have better status, proposed—Professors had already as much power on the Council as Witness had on the Board (*Gray*), 4110-1.
- Catholic Representation on Governing Body, Cry for—Junior Fellows and Professors never exercising their power to put them on the Council (*Gray*), 3938.
- Constitution (*Traill*), 152 (p. 11); (*Gray*), 3933.
 - All members required to be members of Senate (*Beare*), 4749-55, 4793.
 - Bodies represented (*Madden*), 2486, 2499.
 - Difference between Constitution of Fawcett proposal and existing Scheme—Professor to be elected must be a Member of the Senate (*Gray*), 3934-8.
- Makeshift Body, Not needed if a satisfactory Governing Body were constituted (*Madden*), 2454, 2549.
- Medical School not represented (*Traill*), 152 (p. 11).
- Membership not necessary to secure a hearing—Anybody with a grievance, etc., could get a member to bring it forward (*Gray*), 3945-6.
- No governing power (*Traill*), 184.
- Origin of—Real Origin in Mr. Fawcett's proposal of 1869 and 1870 (*Gray*), 3933, 3938.
- Powers and Functions (*Joly*), 889-90; (*Madden*), 2486; (*Gray*), 3929.
 - Degrees really granted by the Board (*Madden*), 2450.
- Membership, Power to nominate for—Board had power to refuse to agree to Council's nomination—Never exercised (*Tarleton*), 533.
- Professors—
 - Election of Arts Professors and Regius Professors of Physics and Surgery (*Traill*), 184-6.
 - Right of nomination and practically of election in the large majority of cases (*Gray*), 3942.
 - Studies—As much power as the Board (*Tarleton*), 533.
- Salmon's, Dr., responsibility for (*Madden*), 2454; (*Gray*), 3933.
- Strengthening so as to form Governing Body of Provost, Fellows and Professors—Dr. Jackson's Scheme (*Joly*), 891-5.
- Value and importance of (*Gray*), 4109.

CRAMMING:

- Objections to cramming done in connection with Trinity College.
 - Explanation of the process (*Magennis*), 3191.
 - University College Professors, Attitude of (*Magennis*), 3003.
- Single University, Objection to—Precautions for guarding the faith of Catholic Students would be useless (*Magennis*), 2954, 3072.
- Refer also to RESIDENT MASTERS.

CROZIER, RIGHT REV. DR., LORD BISHOP OF OSSORY:
Representing the House of Bishops of the Church of Ireland.

Evidence, 2401-15.

CRUISE, SIR FRANCIS:

Catholic Students in Trinity and the Divinity School, opinion as to (*Madden*), 2474.

CULVERWELL, MR. E. P.—Junior Fellow of Trinity College, Dublin; Professor of Education; Registrar, School of Education.

Evidence, 757-94, 2422-35, 2596-7.

CURRICULUM, ARRANGEMENT OF:

Common to Board and Academic Council—Harmonious working of the two Bodies (*Gray*), 3945.

Refer also to names of Schemes involving Mixed Education, Single University, etc.

D.

DEANS:

Junior Dean—Duties (*Trail*), 152 (p. 10); (*Leech*), 3213.

Senior Dean—Sinsecure Office (*Trail*), 152 (p. 10), 192; (*Leech*), 3212 (p. 198).

DEANS OF RESIDENCES:

Appointment by the different Churches to undertake Religious Oversight of Students in Trinity College. Presbyterian Proposal (*MacDermott*), 1298, 1329-31, 1351, 1376-8.

Inefficient substitute for existing Regulations, Unnecessary for Church of Ireland Students (*FitzGibbon*), 2262 (pp. 129-30), 2263-4.

Galway, College at—Dean of Residences in charge of Presbyterian Students (*MacDermott*), 1326-8.

Objection to Divinity School would not be touched (*MacDermott*), 1331-2.

DEGREES:

Length of time required to take Degree—four years normal period, No reduction of Fees for three years' course (*Mahaffy*), 2722-7.

New Degrees—Board's Power to institute new Degrees, Consent of the Council essential (*Beare*), 4911.

Number entering the College much higher than number who eventually took degree—Reasons (*Mahaffy*), 2768-9.

Power of Granting—

College had effective Power under Letters Patent of 13 Charles I. (*Madden*), 2486.

Senate's powers of, see title SENATE.

Prestige of the Trinity College degree (*MacDermott*), 1441; (*FitzGibbon*), 2256, 2260; (*Madden*), 2557-8.

Danger to, involved in the various Schemes, refer to names of Schemes.

DELANY, REV. DR.—President of University College, Dublin:

Evidence, 4250-520.

References to Opinions, etc. (*Trail*), 3, 50, (*Browne*), 5010-5051.

DENOMINATIONAL CONTROL OF EDUCATIONAL INSTITUTIONS:

Balfour, Mr., Scheme adopted by—Objections to Scheme (*MacDermott*), 1490.

Every University Denominational in that its Governing Body was representative of the locality in which it was placed (*Delany*), 4288.

Irish People devoted to Denominational Education—All Denominations desired such denominationalism as existed in Trinity College (*Magennis*), 2931-3.

Meaning of a "Denominational College" (*Trail*), 8; (*Magennis*), 2932.

Mixed Church Control, Private negotiations in direction of, alleged (*McMordie*), 2582.

Objections to—

Churches, Attitude of towards Secular Education (*McMordie*), 2590.

Examinations, abuses in regard to—Instances (*McMordie*), 2590, 2595.

Grounds on which claim of any Church for separate treatment should be dealt with (*McMordie*), 2590.

Misapplication of Funds—instances (*McMordie*), 2590-4.

No evidence of any necessity, much evidence to the contrary (*McMordie*), 2590.

No one but Clergy controlling religious bodies desired a denominational College (*McMordie*), 2595.

refer also to titles SECOND COLLEGE, SEPARATE UNIVERSITY, ETC.

DISCIPLINARY DUTIES:

Discharged by the Junior Dean with occasional reference to the Senior Dean (*Leech*), 3213.

DIVINITY SCHOOL OF TRINITY COLLEGE:

Arts degree, Bachelor of Divinity required to take (*Trail*), 291.

Divinity Reading might be taken in Third Arts' Year (*Trail*), 283-6.

Attendance at Chapel and Catechetical Lectures not regarded as a privilege by Students of denominations other than Church of Ireland (*Crozier*), 2401.

Curriculum, Control and Direction of—

Changes to be submitted to Archbishops as Advisory Committee—Proposals of 1904 (*FitzGibbon*), 2268.

Committee of Governing Body might deal with Studies (*Bernard*), 2364-6.

Experts for all courses, Body of, with revision by some higher authority, say the Archbishop (*Bernard*), 2342.

Revision of Board of Studies' Recommendations desirable owing to dual functions of School, but not absolutely essential (*Bernard*), 2345-6.

Regius Professor and Archbishop King's Lecturer, control by, proposed (*Gray*), 4041.

Degrees in Divinity—

Liverpool, Course of Lectures established in, precedent to Dublin B.D. (*Bernard*), 2332.

Result of Examinations and printed theses, Not of Attendance at Lectures (*Bernard*), 2329-32.

Right of Granting would be retained if School were separated from the University (*MacDermott*), 1360.

University might give a degree though not having a Divinity Faculty (*MacDermott*), 1357, 1362, 1419-22.

Example of other Universities (*MacDermott*), 1315, 1369.

Extent to which Presbyterians would use Trinity College under such conditions, Question of (*MacDermott*), 1371-5.

Heads of Denominations, Consultation with—Objections (*MacDermott*), 1364-8.

Denominational Test—No test (*Trail*), 287-93.

Doctrinal Matters, Disputes on to be left to decision of Archbishop of Dublin, proposed (*Gray*), 4041.

Dual Functions—School of Scientific Theology and Training College for Clergy of the Church of Ireland (*MacDermott*), 1407-9; (*FitzGibbon*), 2253-4; (*Crozier*), 2404; (*Madden*), 2466.

Continuance essential to best Interests of Ireland and of the College (*Madden*), 2471.

Distinguishing School from Divinity Schools of Oxford and Cambridge (*Bernard*), 2283.

Poverty of Irish Students the reason for combination of Functions (*Bernard*), 2283; 2347; (*FitzGibbon*), 2371.

Scientific Theology was more the concern of the University and training of the Clergy, of the College (*Bernard*), 2348.

Elrington Prize, see that title.

Facilities offered to other Denominations for establishment of Divinity Schools in University of Dublin (*Trail*), 272-3, 277; (*MacDermott*), 1284, 1295, 1394.

Bishops would welcome such establishment (*Archdall*), 2398; (*Crozier*), 2401.

Education of all future Clergy of Protestant communities side by side in same University—Hope for the future (*Crozier*), 2404.

Examinations by a Second Religious Body in Trinity College—Opinion that the Efficiency of the School would not be affected (*FitzGibbon*), 2336.

Presbyterian Reasons for Refusing offer (*MacDermott*), 1296-8, 1356, 1395.

DIVINITY SCHOOL OF TRINITY COLLEGE—continued:

Finances—

- Church Claim—Annual Sum at present expended to be secured for permanent maintenance of School (*FitzGibbon*), 2254-6, 2371; (*Gray*), 4023-5.
- Always agreed to by all parties (*FitzGibbon*), 2373.
- Bishops' endorsement of Claim (*Crozier*), 2404.
- Connection between Church and University put forward in justification of Claim (*Gray*), 4022.
- No Claim advanced if the School was retained (*Gray*), 4033-4.
- Opinion against (*Gray*), 4041.
- Practical purpose was to prevent Divinity School and Funds feeding it from falling into the hands of another denomination—Witness prepared to meet that (*Gray*), 4026, 4032.
- Church Contribution proposed (*Trail*), 267, 271, 302, 307.
- Bishops' Disapproval (*Crozier*), 2406.
- Objections (*FitzGibbon*), 2278-9; (*Archdall*), 2401; (*Gray*), 4114-5.
- Origin of Proposal—Sum set aside by the Church 25 years ago for purpose of founding a Divinity School outside Trinity College (*Gray*), 4115.
- Payment proposed as substitute for increasing Students' Fees (*Trail*), 304-5.
- Quid pro quo* given by the Church in number of Students attracted to Divinity School, Question of, (*Trail*), 306-7.
- Compensation for Church in event of School being separated from University.
- Bishops' Endorsement of General Synod's Claim (*Crozier*), 2404.
- Church had no desire for separation and would make no claim except in event of separation (*FitzGibbon*), 2367, 2370, 2372.
- Church made no Money Claim (*FitzGibbon*), 2370.
- Knox's, Dr., Suggestion, alleged—Correction (*Crozier*), 2401, 2402-4.
- Public Funds, Claim for Endowment out of (*FitzGibbon*), 2256.
- Abandonment of Claim against Trinity College alleged—Mr. Knox's charge against Representatives of the Church, Repudiation of (*FitzGibbon*), 2256.
- Claim not endorsed by General Synod—Claim put forward by Bishops in 1902 had led to nothing (*Knox*), 2395-6.
- Futile and Visionary Claim (*Knox*), 2394-5.
- Maynooth Trustees, Case of—Not a parallel case (*Knox*), 2394.

Fees—

- No Special Fees paid for Divinity Education (*Trail*), 268-70.
- Opinion in favour of charging Fees—Men drifting into Divinity because it was the easiest and cheapest Profession (*Leach*), 3226.
- Reason (*Bernard*), 479-81.
- Ordinary Fees paid by Students (*Archdall*), 2401.
- Principle that money paid by Students should be expended on School not to be admitted (*Gray*), 4035.
- School paid its way, Fees more than enough to cover whole cost of School (*FitzGibbon*), 2280-2, 2369.
- Students would fall off if required to pay additional Fees (*Trail*), 303-4.
- Subjects, Reorganisation on—Opinion in favour of double system (*Joly*), 1184; (*Gwynn*), 1187-90.

DIVINITY SCHOOL OF TRINITY COLLEGE—continued:

Fees—continued.

- School to be carried on with same funds as heretofore or else to receive an equivalent Endowment from the State (*Trail*), 267.
- Governing Body—Constitution, etc.—
- Archbishop of the Church of Ireland to be consulted as regards qualifications of candidates—Proposals of 1904 (*FitzGibbon*), 2268.
- Bishops' Approval of present Board (*Gray*), 4053.
- Bishops' Proposals (*Crozier*), 2404-5.
- General Synod, Representation of, *see* that sub-heading.
- Bishops, Representation of—
- Bishops recognised by Synod in 1879 as body in which the Church would have confidence (*FitzGibbon*), 2266, 2367.
- Reason for—Unless Bishops were satisfied the Testimonium would be useless (*FitzGibbon*), 2254.
- Church of Ireland, Representation of, opinion in favour of (*Madden*), 2472.
- Elected Governing Body representing four classes—University Council's Resolution, 1879; (*FitzGibbon*), 2266 (p. 131).
- General Synod, Representation of, Bishops' Proposal, etc.—
- Discussions as to teaching in School, Possibility of—Good sense of majority might be trusted (*Crozier*), 2410.
- Synod put forward no claim for representation as such—Objections to proposal as narrowing scope of School and as obnoxious to Professors (*FitzGibbon*), 2268-70, 2357-9, 2362; (*Bernard*), 2295, 2355-7, 2360.
- Governing Body of the College, Relations with—
- Delimitation of powers of the two Bodies as in case of Medical and Law Schools, desirable (*FitzGibbon*), 2324.
- Discipline of Students, Control by Governing Body of the College (*Trail*), 295.
- Independence of Divinity School Body only in matters on which it had expert knowledge (*FitzGibbon*), 2321-3, 2333-5.
- Representation of Divinity School on Ultimate Governing Body essential—Representation not proposed in Provost's Scheme (*Bernard*), 2299-300.
- Fawcett's Act, Difficulty in connection with (*Bernard*), 2374-7; (*FitzGibbon*), 2378, 2381-2, 2384-5; (*Hyde*), 2379; (*Bernard*), 2380, 2383, 2385; (*Lord Chief Baron*), 2384.
- Insecurity of present position (*Crozier*), 2404.
- Junior Fellows not members of Church of Ireland to withdraw when called up by the Board in order of Seniority—Proposals of 1904 (*FitzGibbon*), 2268.
- Provost's Proposals—
- Bishops would be satisfied (*Crozier*), 2405, 2408.
- Church, Representation of (*FitzGibbon*), 2266 (p. 131), 2268.
- General Synod's Claims would be satisfied (*FitzGibbon*), 2278; (*Bernard*), 2294-5.
- Objection to placing Regius Professor and Archbishop King's Lecturer on the Board (*Gray*), 4045.
- Opinion against (*Gray*), 4036.
- Professors, Representation of—Amendment, Representative to be chosen by all Professors and Lecturers except those holding office *ex officio* proposed (*Bernard*), 2296.
- Visitor—Archbishop of Dublin to be visitor in the matter of Doctrines, Ordinary Visitor of the College to have charge of everything else (*FitzGibbon*), 2271-3.

DIVINITY SCHOOL OF TRINITY COLLEGE—*continued*:

- Governing Body, etc.—*continued*.
 Re-organized Body to include Theologians of recognised authority and Representatives of Irish Church Bishops proposed (*FitzGibbon*), 2253-4.
 Seven Senior Fellows members of Church of Ireland with two Bishops, Provost to be one of the Seven Fellows proposed (*Gray*), 4037-9, 4045, 4054.
 Historically the first faculty in the University (*Traill*), 267.
 Location—No separate Buildings (*MacDermott*), 1458-60.
 Mixture of different denominations—Difficulty not so great as was supposed (*Bernard*), 2348.
 Number of Students since Disestablishment, Decline since 1895 (*Bernard*), 2282-5.
 Causes (*FitzGibbon*), 2261 (p. 126); (*Bernard*), 2286-92.
 Presbyterian Students, Arrangements for (*Traill*), 288.
 Professors and Lecturers—
 All Professors required to be in Holy Orders and to have taken test (*Bernard*), 2349-51.
 Appointment, Method of—
 Consultation with Committee of Bishops proposed—Objection, Bishops' nominees would have to be elected (*Gray*), 4054.
 Independent of Bishops (*Gray*), 4021.
 Lecturers, Appointment by Regius Professor and Archbishop King's Lecturer proposed (*Gray*), 4041.
 Pastoral Theology, Professor of—Appointment made by Bishops (*Bernard*), 2297.
 Regius Professor, Election of—Comparison with Cambridge University (*Gray*), 4046-51.
 New Professors—Very desirable to have one or two new Professors (*Bernard*), 2300.
 Payment—
 Pastoral Theology, Professor of, Paid by Church of Ireland (*FitzGibbon*), 2278.
 Payment by College only, Incomes (*Traill*), 271.
 Reduction proposed, Out of proportion to those of other Professors (*Leech*), 3224-6.
 Regius Professor and Archbishop King's Lecturer, Salaries of—Governing Body should have Power to reduce Salaries if the School dwindled (*Gray*), 4041-4.
 Provost's Proposals—
 Bishops of the Church of Ireland in agreement with on the whole (*Archdall*), 2399, 2401.
 Witness objected to considerable portion of Scheme (*Gray*), 4028.
 See also sub-heading Governing Body.
 Residence, Conditions of—Opinion in favour of maintaining present conditions (*FitzGibbon*), 2325-6.
 Retention, Claim for—Historical Connection between Church of Ireland and the University, etc. (*Traill*), 267, 307; (*FitzGibbon*), 2262 (p. 128); (*Crozier*), 2404; (*Madden*), 2466-7; (*Gray*), 4018-20.
 Bishops in favour of maintaining Connection (*Crozier*), 2404.
 Confidence of Anglican Community would be best retained by maintaining Academic character of School (*Madden*), 2466.
 Duty of a University to teach Theology (*FitzGibbon*), 2368-9; (*Crozier*), 2404.
 Essential to well-being of the Church—Advantages of high culture and open air of a great University in training of the Clergy (*FitzGibbon*), 2246, 2253, 2262 (p. 128), 2282.
 Fundamental Principle of Church of Ireland that Clergy and Laity should be educated together (*Traill*), 267; (*Bernard*), 2252.
 General Synod, Claims put forward by. Bishops' claims fully accepted by (*Crozier*), 2404.

DIVINITY SCHOOL OF TRINITY COLLEGE—*continued*:

- Retention, Claim for—Historical Connection between Church of Ireland and University (*continued*).
 General Synod—*continued*.
 Resolution of 2nd May, 1879 (*FitzGibbon*), 2266 (p. 131).
 Mistaken idea—No special connection (*Traill*), 267.
 Challenge to Lord Justice FitzGibbon to produce proof of any special connection in early times (*Gray*), 4018.
 Oxford and Cambridge, Comparison with—Unfair in view of the much closer connection between Church in Ireland and Trinity College (*Crozier*), 2408.
 Percentage of Graduates among Candidates for Ordination, Comparison of England and Ireland (*Crozier*), 2408-9.
 Presbyterians were the only objectors and their *locus standi* was not obvious (*Madden*), 2468.
 Retention with changes in Constitution to secure confidence of the Church proposed.
 Modifications suggested (*Traill*), 267, 274, 279-82.
 Opinion in favour of (*FitzGibbon*), 2277.
 Preferable to handing over the School to the Church without its Endowments (*Traill*), 267.
 Retention desired both by College and Church—Nothing remained except question of terms (*Traill*), 277A-8.
 Scheme put forward by Dr. Gwynn and Dean Bernard, Difference from Dr. Traill's Scheme (*Traill*), 298-301.
 Returns showing Number and Status of Irish Church Clergy educated at Trinity (*FitzGibbon*), 2256-62.
 Separation from University—Presbyterian Demand, etc. (*Traill*), 267; (*MacDermott*), 1280, 1284, 1298, 1384, 1392-3, 1396, 1481-7, 1490.
 Association of Theology with other groups of Studies, Necessity of—Tradition of Mediæval Origin (*MacDermott*), 1284.
 Belmore Bill Proposals, see title BELMORE BILL.
 Catholic Attitude (*Traill*), 275.
 Desire that Clergy should have University Education in addition to Seminary training (*Bernard*), 491-2; (*Magennis*), 2954.
 Need of a faculty of Theology in a University Institution, Recognition of (*Magennis*), 2954.
 No wish to destroy Trinity College or to lessen its distinctively religious character (*Traill*), 267; (*FitzGibbon*), 2262 (pp. 129, 130); (*Crozier*), 2401; (*Madden*), 2474.
 Statement by Standing Committee of Catholic Archbishops and Bishops (*Madden*), 2475.
 Church of Ireland and Separation—
 Attitude of the Church—
 Bishops' Negotiations with Board of Trinity College in 1902, Synod's Attitude, etc. (*FitzGibbon*), 2266 (p. 131), 2267-8.
 Bishops objected strongly (*Archdall*), 2398.
 General Synod, Special Committee's Resolution against Separation (*FitzGibbon*), 2256.
 Laity, Attitude of—Strong objection to separation (*Crozier*), 2401.
 Compensation for Church of Ireland in event of Separation proposed, see Sub-heading Finances.
 Control of transferred School—Transfer of School with private endowments proposed (*MacDermott*), 1284; (*M'Mordie*), 2595.
 Nature of School that could be maintained by the Church non-University Theological School (*FitzGibbon*), 2259-60.

DIVINITY SCHOOL OF TRINITY COLLEGE—continued:

Separation from University—continued.

Deans of Residence having Religious oversight of Students—Appointment would not affect Presbyterian Demand (*MacDermott*), 1331-2.

Degrees—Separated School would retain Right to grant Degrees (*MacDermott*), 1360.

Dual Functions of School—Both would have to go if one went (*MacDermott*), 1410.

Exclusion of Religion from Collegiate teaching and discipline, repugnant to Irish Sentiment (*FitzGibbon*), 2256.

Existing Atmosphere of Trinity (*MacDermott*), 1334-7, 1442-5.

Student could select his own Tutor and there were three Presbyterians on the Staff—Not an entire solution of the difficulty (*MacDermott*), 1467-72.

Fawcett's Act, Effect of—

Dual Control introduced—Separation a natural Corollary (*MacDermott*), 1284, 1322-5, 1350-1.

Flooding Trinity College with Presbyterians—Possibility never considered (*MacDermott*), 1343.

General Assembly of Presbyterian Church, Resolutions and Correspondence (*MacDermott*), 1287-1300, 1341-2, 1345.

Policy of the Assembly was on the whole that of the Resolutions (*MacDermott*), 1479-80.

General Tendency towards or against exclusion of Theology, Question of (*Traill*), 267; (*MacDermott*), 1284, 1315-21, 1325, 1411-6, 1418.

Gladstone's, Mr., Statement in 1869 (*MacDermott*), 1284.

Loss to University and to Church (*FitzGibbon*), 2262 (pp. 128-9; (*Bernard*), 2283.

Financial Loss to College, Question of (*MacDermott*), 1284, 1289, 1423-38, 1441.

Wider Culture, More liberal atmosphere of University, Loss of to Students—No loss need occur, Students would take Arts course in Trinity (*MacDermott*), 1284, 1310-4, 1462-5.

No diminution of Sectarian differences would be effected (*FitzGibbon*), 2256.

Active Hostility to Christianity would result in time (*Crozier*), 2401.

Opinion against (*Madden*), 2469, 2472; (*Gray*), 4029-30.

Religious Opinions of Teaching Staff—Matter of indifference provided that Professors signed the Statutes (*MacDermott*), 1452-7.

Residence in separated School—Opinion in favour of making Residence compulsory (*MacDermott*), 1446-8.

State Impartiality, Question of (*MacDermott*), 1352-4, 1386-90.

Testimonium, Making Testimonium obtainable apart from tests would not make much difference to Presbyterian Attitude (*MacDermott*), 1379-80.

Unreasonable Demand—Inconsistency of Presbyterian Attitude (*Traill*), 267; (*Crozier*), 2401.

Existing Provisions for Presbyterians admittedly sufficient (*Bernard*), 636; (*FitzGibbon*), 2262 (p. 129).

Number of Presbyterians likely to be affected, Number and distribution of Presbyterians in Ireland (*FitzGibbon*), 2262 (p. 129), 2282; (*Crozier*), 2404.

Refusal to accept facilities for establishing Chapel and Divinity School in Trinity College (*FitzGibbon*), 2262 (p. 129); Explanation (*Crozier*), 2404.

Testimonium—

Making accessible to Non-Church of Ireland Students, Question of (*MacDermott*), 1284.

Membership of Protestant Episcopal Church an essential qualification (*MacDermott*), 1284, 1380-4.

DIVINITY SCHOOL OF TRINITY COLLEGE—continued:

Testimonium—continued.

Method of obtaining—Lectures leading to Testimonium no part of Curriculum for degree (*Traill*), 294; (*FitzGibbon*), 2328; (*Bernard*), 2330.

Nature of—

Corresponding exactly with certificate given to Benchers of the King's Inns (*FitzGibbon*), 2329, 2332.

Qualification for Orders accepted by Irish and English Church Bishops (*FitzGibbon*), 2254.

Visitors—

Appeal from the Visitor—Objections to allowing an Appeal (*Bernard*), 2297, 2299; (*FitzGibbon*), 2297-8.

Bishops on original Board, Archbishop of Dublin one of two Visitors under the Landian Statutes (*Madden*), 2466.

Present Visitors—Chancellor or Vice-Chancellor and Lord Chief Justice of Ireland (*Madden*), 2467.

DIXON, PROFESSOR A. F.—*Professor of Anatomy and Chirurgery in the University of Dublin:*

Evidence, 1985-7, 1990-6, 2022-9, 2053-67.

DIXON, PROF. H. H.—*Professor of Botany and Director of the Botanical Gardens:*

Evidence, 1234-40, 1276.

Note Supplementing Evidence, p. 83.

DOMESTIC AFFAIRS OF TRINITY COLLEGE:

Regulated by the Chief Steward—Salary, etc. (*Leech*), 3274-7, 3346.

Waste in connection with the Kitchen, Question of (*Leech*), 3351.

DUBLIN CASTLE:

Unflattering Policy in regard to Trinity College (*Thrift*), 1228-9.

DUBLIN DIOCESAN SYNOD:

Motions and Debates on Divinity School and Chapel—Ineffective and technically impertinent (*FitzGibbon and Bernard*), 2360.

DUFFY, SIR G.:

Queen's Colleges and Mixed Education Controversy, Account of in "Young Ireland" (*Synnott*), 1541 (p. 88).

DUNRAVEN, EARL OF:

Evidence, 4551-724.

DUNRAVEN SCHEME—Development of Dublin University into a Federal University with four Constituent Colleges.

Affiliation of Maynooth and Magee Colleges, and College of Science, Dublin, with power to affiliate other institutions, proposed (*Dunraven*), 4552 (p. 289), 4652-3.

Meaning attached to Affiliation, Privileges involved—Residence counting as University Residence (*Dunraven*), 4655-62, 4715-7.

Working difficulties. Question of addition to (*Delany*), 4362; (*Dunraven*), 4651.

Analogous to a Federation which should comprise Oxford and Cambridge, Manchester and Sheffield (*Hamilton*), 3650-1.

Belfast, Queen's College at—Opposition to Scheme, Reasons, etc. (*Hamilton*), 3629-31, 3688.

Catholic Hierarchy, Attitude of (*Delany*), 4466; (*Chairman*), 4558, 4560; (*Dunraven*), 4643-9.

Catholic Laity, Opinion of (*Delany*), 4467; (*D. F. Browne*), 4957, 5067-87.

Cecilia Street School of Medicine to be attached to New College or possibly to become Medical Faculty of the University (*Dunraven*), 4552 (p. 289).

Conditions necessary to give any scheme a reasonable chance of success (*Dunraven*), 4552 (p. 287).

Constituent Colleges—Trinity, Queen's Colleges of Belfast and Cork and a new College to be established and suitably equipped in Dublin (*Dunraven*), 4552 (p. 289).

DUNRAVEN SCHEME—Development of Dublin University into a Federal University with four Constituent Colleges—continued.

- Cork, Queen's College, etc.—Objections to Scheme (*Windle*), 3731; (*Barrett*), 3834-7, 3857-9, 3864-5; (*MacDonald*), 4541.
- Dangers of Scheme not only to Constituent Colleges but to Learning and Ireland (*Madden*), 2547; (*Hamilton*), 3631.
- Degrees—
Possibility of maintaining Standard of Dublin University degree, Question of (*Dunraven*), 4552 (p. 288), 4567-73, 4615-6, 4618-20, 4683.
- Unfairness of Scheme (*Traill*), 100; (*Bernard*), 455.
- Development, Provision for—Caput of University and Councils of Colleges to have power to alter Statutes with consent of the King in Council (*Dunraven*), 4552 (p. 289).
- Distinctive features of Scheme as compared with Scheme for Federation under Royal University, see ROYAL UNIVERSITY FEDERATION SCHEME.
- Drawing together Localities and different Creeds and Classes—Advantage of Scheme (*Dunraven*), 4552 (p. 288), 4593, 4694.
- Dublin University as basis for Scheme of University Education—
Impossible—Dublin University could not be basis of a Federal University for Ireland (*Hamilton*), 3647.
- Not much asked for in recent years—Never formulated in detail (*Bernard*), 449-53.
- Original Scheme of Trinity College contemplated foundation of other Colleges (*Dunraven*), 4552 (p. 288).
- Status known and recognised (*Dunraven*), 4552 (p. 288), 4718.
- Examinations—
Joint Examinations not separate examinations on part of Colleges (*Dunraven*), 4617.
- Standard in outlying Colleges—
Cork would have standard as high as any (*Delany*), 4398.
- Maintenance of, Not at all impossible even though examinations and courses differed (*Dunraven*), 4598-604, 4684-90.
- Teaching Staff of Colleges to be represented on Boards of Examiners (*Dunraven*), 4552 (p. 289).
- Fees Question—Very undesirable and unlikely that Trinity should reduce or Belfast raise its Fees (*Hamilton*), 3684-5.
- Financial Question—
Annual Sum of £60,000 previously voted for Maynooth and the Regium Donum had been struck off the votes for the last thirty-five years (*Dunraven*), 4552 (p. 289).
- Fellowships and Prizes, Funds for (*Dunraven*), 4720-2.
- Trinity College Endowments, Private Endowments, etc., to be exempt from interference unless by desire of Governing Body of Endowment (*Dunraven*), 4552 (p. 289), 4620-2.
- Galway College—
Conversion into Agricultural College and Technical Institute, proposed (*Dunraven*), 4552 (p. 289).
- Objection to leaving it a University College was on grounds of utility and expense (*Dunraven*), 4579-81.
- Objections of Galway College (*Anderson*), 3798-9.
- Governing Body of Colleges (except Trinity College); Constitution and Functions—teaching staff should be properly represented (*Dunraven*), 4552 (p. 289).
- Governing Body of the University—Constitution and Functions (*Dunraven*), 4552 (p. 289).
- Constituent Colleges would be equally represented (*Dunraven*), 4663-7.
- Irish trained Professors, Development of Class of—not more likely to result than under Royal Federation Scheme (*Windle*), 3772-5.

DUNRAVEN SCHEME—continued.

- Letter written in 1904 adumbrating Scheme, Reception of, (*Dunraven*), 4561-3, 4575, 4577-8; (*Browne*), 5082-6.
- Library of Trinity College, Opening of (*Dunraven*), 4724.
- Local Ambition and Rivalry would be sufficiently stimulated (*Dunraven*), 4552 (p. 288).
- Number of Constituent Colleges—Reasons for preferring 4 to 2 (*Dunraven*), 4608-10, 4679-82.
- Objections of proposed Constituent Colleges, etc. Question how far objections were raised by Governing Bodies (*Dunraven*), 4553-7.
- Satisfaction or even partial satisfaction should outweigh prejudices of existing Colleges (*Dunraven*), 4671-3.
- Opinion against (*Bernard*), 457; (*Madden*), 2546-8; (*Delany*), 4350-2.
- Parliamentary Representation of University—Senate would elect (*Dunraven*), 4587.
- Powers of Constituent Colleges—as much self-governing power as possible (*Dunraven*), 4552 (p. 289).
- Professors—
Appointment by Governing Body (*Dunraven*), 4552 (p. 289).
- Division of Appointments on denominational lines, danger of—Opinion in favour of Appointment by small Electoral Boards (*Dunraven*), 4588-91.
- University Professors—
Chairs might be few at first, number might grow in accordance with needs of country and progress of University (*Dunraven*), 4710-1.
- Chairs permanently situated in one College, question of (*Dunraven*), 4712-4.
- Peripatetic Professors necessarily (*Dunraven*), 4552 (p. 289), 4594-8.
- Religious Question—no tests or disabilities, but each College would have a predominating religious atmosphere (*Dunraven*), 4552 (p. 289).
- Royal University, Destruction of, involved—Evils of setting up Universities only to destroy them (*Hamilton*), 3611, 3633; (*Windle*), 3731.
- Second College in Dublin University Scheme, Advantages compared (*D. F. Browne*), 5068, 5096-5109.
- Senate, Constitution of (*Dunraven*), 4552 (p. 289), 4585-7.
- Single University—
Objection to placing all higher Education within the pale of one University (*Hamilton*), 3613, 3626-9, 3641.
- Preferable on financial grounds (*Dunraven*), 4566.
- Theological Faculty—No theological faculty to be created, but Divinity School of Trinity College not to be interfered with (*Dunraven*), 4552 (p. 289).
- Exclusion on practical grounds, No objection in principle (*Dunraven*), 4582-4.
- Trinity, Inclusion of—Advantages and Disadvantages (*Hamilton*), 3631, 3695; (*Windle*), 3731, 3752, 3760-70; (*Anderson*), 3798.
- Universities, Constituent Colleges developing into—No objection if it were a natural development (*Dunraven*), 4695.
- Visitors, Board of—
Constitution (*Dunraven*), 4552 (p. 289).
- Functions (*Dunraven*), 4552 (p. 289).
- Working Difficulties of a Federal University, Instances of Centrifugal force (*Hamilton*), 3614, 3626.
- Circumstances in Ireland made the experiment more hopeful (*Dunraven*), 4226-42, 4676.

E.**EDUCATION AT TRINITY COLLEGE:**

Refer to title TYPE OF UNIVERSITY.

EDUCATION REFORM ASSOCIATION, BELFAST:

Pronouncement hostile to study of Irish Language and Literature, Criticism of (*MacNeill*), 3360.

ELBRINGTON PRIZE:

Control should be vested in Governing Body of Divinity School and certain Professors, the Board should be kept out of it (*Bernard*), 2386-8.
Examiners, Qualifications of (*Bernard*), 2286-93.

ENDOWMENT OF EDUCATION IN IRELAND:

Grant or Endowment for higher Education should not be taken from any Irish Fund—Relief afforded to Imperial Exchequer by Irish Church Act (*Synnott*), 1545.
Special Treatment, Ireland's Claim to (*Synnott*), 1704.

ENDOWMENTS OF TRINITY:

Appropriation, Question of—Catholic Lay Opinion was that they should not be interfered with (*D. F. Browne*), 4974-8, 5008.
Not regarded as endowed on a lavish scale—Catholics prepared to support Episcopalians in demand for more Endowment (*Magennis*), 3125.

ENGINEERING SCHOOL:

Arts Course in addition to Engineering degree, Advantages of—Requisite for India (*Thrift*), 1257-8.
Department of Agriculture and Technical Education, Arrangement with, suggested (*Rücker*), 1257.
Objections—Distance between Buildings, Financial Loss to Trinity College, etc. (*Thrift*), 1257-8, 1263-4.
Drawing up Course—Opinion in favour of consulting heads of the profession outside the University, proposed (*Thrift*), 1269-71; (*Joly*), 1271.
General Engineer's training fairly well arranged for since building of new Laboratory except in Geology (*Thrift*), 1265-6.
Practical Nature of Course Distinguished Engineers turned out, etc. (*Joly*), 1267; (*Thrift*), 1264, 1268.
Research Question—Proper Plant and Equipment a necessity (*Thrift*), 1232.

EVANS, REV. DR.:—Commissioner of National Education:
Evidence, 5111-22.

EXAMINATIONS:

Attendance at Lectures, *see* title RESIDENCE AND ATTENDANCE AT LECTURES.
Competitive System destructive to true Education and original power (*Delany*), 4374.
Cramming, *see* that title.
Degree Examination—
Honour Degrees (*Mahaffy*), 2643, 2662.
Pass Students (*Mahaffy*), 2643.
Good Results—General knowledge an excellent Education (*Mahaffy*), 2648.
Responsibilities (*Mahaffy*), 2648, 2660, 2662.
Subjects (*Bernard*), 683-4; (*Mahaffy*), 2646-7.
Degree Examination plus a term Examination in the ninth term, question of (*Mahaffy*), 2644.
Fees in Arts paid to Fellows—Objections to payment considering their Incomes and that Examinations reduced the Lecture work (*Leech*), 3213-8.
Fellowship Examination, *see* title FELLOWS AND FELLOWSHIP SYSTEM.
Honour Examinations—
Conducted chiefly by Honours Lecturers (*Mahaffy*), 2745.
Gold Medal equivalent to First Class in England and Silver Medal to Second Class (*Mahaffy*), 2664-5.
Increase in number of Men who take honours. Modern Subjects, Introduction of (*Mahaffy*), 2663.
Prizes (*Mahaffy*), 2663.
Occasionally a Student who had answered respectably but not quite reached Silver Medal Standard was allowed his degree but put into the Second Class (*Mahaffy*), 2666.
Standard (*Mahaffy*), 2667.
Subjects (*Mahaffy*), 2662.
Refer also to sub-heading Moderatorships.

EXAMINATIONS—continued:

Latin as an optional subject (*Mahaffy*), 2766-7.
Little-go (*Mahaffy*), 2638, 2642, 2645.
Marking in—Objections to Senior Fellow's Right to mark "according to his impression of the Student" (*M' Mordie*), 2582.
Matriculation—
Attendance notwithstanding failure, Arrangements for Ignorant Students (*Mahaffy*), 2728-30.
Standard—
Absolutely null (*Delany*), 4312.
Lower than Matriculation Standard at Royal University (*Miss Gwynn*), 2141-2.
Senior Grade Intermediate Certificates accepted as equivalent (*Miss Gwynn*), 2137-40.
Too easy—Law Students Illustration (*Leech*), 3301.
Two different Standards (*Mahaffy*), 2600.
Cases of Students allowed to enter on the small certificate and obliged to get special teaching (*Mahaffy*), 2602-3.
Different forms of Certificate given (*Mahaffy*), 2600-1.
Diversity of Subjects for large certificate (*Mahaffy*), 2604.
Failure in one subject—"Post-mortem" Examination (*Mahaffy*), 2604-6.
Subjects (*Mahaffy*), 2635-7.
Modern Language included as optional subject, Alternative to Greek (*Mahaffy*), 2731-2.
Science, Question of (*Mahaffy*), 2633-4, 2733-6, 2802-7.
Moderatorship Examination—
Honour Final Examination resembling a Cambridge Tripos (*Mahaffy*), 2653-5.
Number of Honour Students (*Mahaffy*), 2659-61.
Standard of Marks fixed, as far as possible on same level for all subjects (*Mahaffy*), 2770-2.
Number of Examinations too large and Standard too low—Reforms suggested (*Bernard*), 717.
Attendance at Lectures, *refer* to title RESIDENCE AND ATTENDANCE AT LECTURES.
Constant Cramming, and reduction of time available for Lectures (*Leech*), 3226.
Examination both on Paper and *viva voce* in each subject—Cyphers in two subjects would stop a man at once (*Mahaffy*), 2622.
Fellows—Large Amount of time taken up (*Bernard*), 604.
Length of term about ten weeks, nearly three weeks taken up by Examinations (*Mahaffy*), 2624-30.
Limiting to a week or a fortnight proposed (*Bernard*), 718-20.
Opinion in favour of Periodical Examinations (*Mahaffy*), 2607-9; (*Gray*), 4011.
Pass Marks, Standard of (*Mahaffy*), 2621-3; (*Bernard*), 604-5, 680-2.
Shorter Courses, not so great a variety of subjects and a much higher standard proposed (*Bernard*), 608.
Total of eighty-four Examinations in the year, not counting Examinations for various Prizes (*Leech*), 3226, 3336-7.
Refer also to sub-heading Matriculation.
"Post-mortem" Examination (*Bernard*), 606-8; (*Mahaffy*), 2604-6; (*Leech*), 3299; (*Gray*), 4011-2.
Public Examination and examination not Public, Distinction between (*Mahaffy*), 2620.
Scholarship Examination—
Competition, No limit—Any one of any standing allowed to compete (*Mahaffy*), 2651.
Period of the year—late Spring (*Mahaffy*), 2651.
Stiffening, in conjunction with Financial Improvement in position of Scholars, proposed (*Leech*), 3246.
Subjects (*Mahaffy*), 2652.
Science—Experimental Science optional subject with Languages (*Mahaffy*), 2633.

EXAMINATIONS—continued.

Science Candidates admitted to Laboratories during time that Examinations were going on in College (*Mahaffy*), 2631-2.
Subjects—not too many, but not so well prepared as they ought to be (*Leech*), 3301.

Teachers, Examination by—

External Examiner present and participating in Examination, proposed (*McWeeney*), 2869-70.

Opinion in favour of (*Mahaffy*), 2745; (*Delany*), 4374.

Term Examinations (*Bernard*), 684; (*Mahaffy*), 2639-40.

Viva Voce—

Abolition of, proposed—More stress upon Composition and translation of unseen passages (*Leech*), 3226 (p. 200).

Correcting doubts, Value of *viva voce* (*Leech*), 3256-7.

Evasion of Questions, Question as to Prevention of (*Leech*), 3258-9.

Importance of—Relative weight of *viva voce* and Paper marks, etc. (*Mahaffy*), 2737-40; (*Leech*), 3252-5.

Objections to—Too great an element of chance introduced (*Leech*), 3226 (p. 200).

Refer also to names of Institutions and titles of Reform Schemes—Second College, etc.

EXECUTIVE COMMISSION TO EXECUTE REFORMS WHICH SHOULD BE RECOMMENDED BY PRESENT COMMISSION:

Method of Appointment, Question of (*Madden*), 2443-5, 2447-8.

EXHIBITIONS:

Refer to title SCHOLARSHIPS AND EXHIBITIONS.

F.**FACULTIES—ORGANISATION PROPOSED:**

Boards of Studies—Faculties practically same thing (*Joly*), 946.

Divinity, Faculty of—Two nominations by Bishops of the Irish Church, proposed.

Analogous Provision for other Faculties, suggested (*Joly*), 982.

“Not more than two” meant that external opinion was not to preponderate (*Joly*), 980-1; (*Gwynn*), 982.

General Board of all the Faculties proposed (*Gwynn*), 1058-9; (*Beare*), 4773-4.

Consent of two bodies required—Committees of Medical and Engineering Schools had worked very well (*Traill*), 192.

Council, substitute for (*Traill*), 152 (p. 10); (*Joly*), 812-4, 886-7, 892, 991; (*Madden*), 2495.

Difference between Council and proposed Board (*Madden*), 2498-9.

Functions (*Traill*), 152 (p. 11), 189-91.

No objection (*Madden*), 2495-501.

Representation of the Faculties, Constitution to ensure (*Traill*), 152 (p. 11).

Governing Body, Relations with (*Joly*), 992.

Expenditure—Control question (*Tarleton*), 550; (*Lord Chief Baron*), 985; (*Chairman*), 986.

Representation of Faculties—

Faculties to elect their Representatives together proposed—Objections (*Leech*), 3213, 3323-32.

Opinion against Representation of Faculties as such (*Beare*), 4853-60.

Requiring consultation between Governing Body and Faculties would be merely regularising what was already in force (*Beare*), 4771-2.

Syndicates of the several Faculties to assist the Board in its duties, proposed (*Bernard*), 563-7.

Insufficient Recognition of Faculties due to intimate connection between College and University (*Madden*), 2453-4, 2487, 2496.

Membership—Definition to include Lecturers (*Joly*), 974-9.

Opinion in favour of (*Bernard*), 2344; (*Beare*), 4732 (p. 299).

FACULTIES, &c.—continued.

Paid Secretary to be attached to each Faculty, suggestion (*Gwynn*), 988.

Very small payment contemplated (*Joly*), 986.

Standing Committee to assist in dealing with matters of detail, proposed—General power to appoint Committee preferable (*Joly*), 989-90A.

FAWCETT'S ACT:

Brought in practically by people representing the Trinity College (*MacDermott*), 1347-50.

Recital of (*MacDermott*), 1350.

FEDERAL UNIVERSITY, SCHEME FOR:

Autonomous College—Objection to Federal University much weakened (*Windle*), 3737.

Centrifugal Tendency of Federal Universities (*McWeeney*), 2911-2; (*Leech*), 3294; (*Hamilton*), 3614-5; (*Windle*), 3727.

Degrees—

Central Body, Conferring by—Not the slightest advantage, rather the contrary (*Windle*), 3778-80.

Market value would be that of the lowest College (*Delany*), 4309-13.

Students not attending affiliated Colleges, Bachelor degree should be granted to (*M'Mordie*), 2595.

Denominational Question—No denominational Colleges should be affiliated (*M'Mordie*), 2590.

Distance between constituent Colleges difficulty (*McWeeney*), 2896-7.

Friction in University Court, Risk of (*Bernard*), 454.

Government of affiliated Colleges, Form of Government suggested (*M'Mordie*), 2595.

New College, Introduction of, would intensify existing difficulties, even with Autonomy (*Delany*), 4309.

Opinion against (*Traill*), 143; (*Leech*), 3295; (*Windle*), 3727.

Opinion in favour of (*M'Mordie*), 2390.

Transition stage leading up to formation of independent Universities, use as—Example of France (*Hamilton*), 3646.

Trinity College, Introduction into a Federal system—No advantage in bringing any body into any system against their will (*Delany*), 4408-10.

See also titles DUNRAVEN SCHEME, ROYAL UNIVERSITY FEDERATION SCHEME, SECOND COLLEGE IN DUBLIN UNIVERSITY, etc.

FEES:

Arts Examination Fees paid to Fellows—Objections (*Leech*), 3213.

Deterrent to entry of poor Students alleged (*Traill*), 3.

Disposal of—

Cista Communis, Proportion paid to, went to General Funds of the College (*Gray*), 4057-8.

Principle that Fees paid by Students of a particular School should be spent on that School, Objections to (*Gray*), 4009.

Proportion in which fees were divided between Tutor and *Cista Communis* (*Gray*), 3913.

Divinity School, see that title—Finance.

Financial Statement of Trinity College—Criticism of apparent discrepancies (*Leech*), 3205-9, 3212.

Medical School—Fees (*Traill*), 30-1.

Pass students paid tutors and grinders enough to pay a full professorial staff (*M'Mordie*), 2581.

Reduction proposed as means of broadening Functions of the College—Reduction of Entrance Fee, etc. (*Traill*), 24, 25-6; (*Gray*), 3900-1, 3913, 3915.

Amount of proposed Reduction (*Gray*), 4147—Witness would go as far as was financially possible (*Gray*), 4117.

Class of Students who would be attracted—Immaterial if they were capable of taking College Curriculum (*Gray*), 4119.

Fees—continued:

- Reduction proposed—*continued*.
- Exhibition Scheme—Number of small Exhibitions proposed in order that Fees should not be indiscriminately reduced (*Gray*), 3904.
- Failure of Experiments (*Mahaffy*), 2715-21, 2773.
- Funds might have been provided from Westland Row property (*Gray*), 3905-6.
- Number of Students that would be attracted, question of (*Gray*), 3907-9.
- Partial success of scheme—Exhibitions offered by Sir John Nutting (*Gray*), 3909-11.
- Income of Junior Fellows largely depended upon Fees, not easy to make sudden alterations (*Trill*), 3, 29.
- Increase in number of Students if Fee were reduced, question of—Recouping loss to College, etc. (*Mahaffy*), 2612-6; (*Gray*), 3902-4; 3913-4.
- No opposition when first mooted, but neither the Board nor the Tutors would support proposal (*Gray*), 3914-5.
- Opinion in favour of (*Trill*), 29.
- Sizars did not pay full Entrance Fee (*Trill*), 25.
- Scotch Universities, comparison with—Comparison valueless (*Gray*), 4144-5.
- Second College with lower Fees established in Dublin, question of (*Bernard*), 423; (*Leech*), 3308-9.
- Separate University for Catholics with possibly lower Fees, question of (*Bernard*), 421-2, 481; (*Leech*), 3298, 3350.
- Single College University, objections to—Difficulty in adjusting Fees (*Magennis*), 3096.
- Total cost to a Student of Course in Trinity (*Gray*), 3913.
- Tuition Fees not too high (*Trill*), 27.

FELLOWS AND FELLOWSHIP SYSTEM:

- Abolition of existing Fellowship system, proposed (*Leech*), 3314-22.
- Age Limit for Admission—
- Desirable (*Mahaffy*), 2708.
- Minor Age Limit, proposed (*Beare*), 4732 (p. 299).
- Unnecessary if Election were made by Governing Body and Faculties (*Madden*), 2464-5.
- Age of Retirement—Same Provision to apply to all Fellows alike (*Joly*), 1033.
- Bursar—Power to elect a Junior instead of a Senior Fellow desired (*Trill*), 255.
- Catholic Graduates' Association in hearty agreement with proposals of Reform Party in Trinity College (*Magennis*), 2954.
- Change in Position of Fellows since time of Charles I.—Teaching now done to a large extent by Professors (*Madden*), 2445.
- Class of men whom it was desired to attract—Necessary to make the position worth something (*Tarleton*), 509, 525.
- Distinction between Senior and Junior Fellows—History of (*Madden*), 2441, 2445.
- Increase in number of Fellows since 1637—Senior of present Junior Fellows had held his Fellowship for thirty-six years (*Madden*), 2445.
- Retention—
- Opinion against (*Bernard*), 570-1; (*Madden*), 2445, 2521-3; (*Leech*), 3212.
- Opinion in favour of (*Madden*), 2448.
- Election of Fellows—
- Alternative methods proposed—(a) Election on published work and credentials; (b) Examination (*Gwynn*), 1198.
- Combination of the two methods rather than sharply defined alternatives—Opinion in favour of (*Butcher*), 1134-5; (*Gwynn*), 1134, 1202-3; (*Jackson*), 1202.
- Comparative advantages of Examination and election on published work (*Gwynn*), 1133.

FELLOWS AND FELLOWSHIP SYSTEM—continued:

Election of Fellows—continued.

- Criticism of (*Leech*), 3212 (pp. 197, 198).
- Opinion in favour of (*Thrift*), 1226; (*H. H. Dixon*), 1239-40; (*Whittaker*), 1250.
- Usefulness of proposed change would depend on getting persons of distinction and experience elected to the Governing Body (*H. H. Dixon*), 1239.
- Best Undergraduates not competing alleged—Present uncertainty in regard to system was a deterrent (*Beare*), 4889.
- Board to elect on recommendation of the Faculty (*Joly*), 1101.
- Credentials and Original Work, Election on—Best Students would cease to be attracted (*Beare*), 4732 (p. 298).
- Cambridge Pension System—Dissatisfaction among Junior Fellows of Trinity (*Trill*), 220.
- Difficulty of estimating value of dissertations (*Trill*), 216.
- Difficulty of making sure that it was the man's own work (*Tarleton*), 519-20.
- Effect would be to get Fellows who had been educated practically anywhere (*Gwynn*), 1204.
- Examination of persons presenting theses on those theses, Opinion in favour of (*Joly*), 994-6.
- Jealousy and suspicion in Ireland—Probably no confidence in selection of Fellows without examination (*Trill*), 220.
- No objection (*Beare*), 4835-41.
- Number and qualifications of probable candidates (*Joly*), 1174, 1176.
- Occasional appointment on published work, proposed (*Joly*), 867.
- Opinion against (*Tarleton*), 506; (*Gray*), 4078.
- Opinion in favour of (*Trill*), 219; (*Madden*), 2564-5; (*Mahaffy*), 2705-7; (*Magennis*), 3092, 3095.
- Opinion that requirement of original work was a matter that ought to be considered (*Tarleton*), 521.
- Unpublished Work, Inclusion of, proposed (*Chairman*), 1096-7; (*Joly*), 1096, 1098-9; (*Jackson*), 1098; (*Whittaker*), 1262.
- Electors to be the whole body of Fellows, including Professor-Fellows (*Joly*), 1100.
- Examination System—
- Advantages too dearly purchased under present system (*Madden*), 2454, 2563.
- Age Limit needed (*Joly*), 997-1000.
- Autonomy and Nationality of Trinity had been preserved by (*Beare*), 4732 (p. 298).
- Competition the mainspring of usefulness to the College (*Beare*), 4732 (p. 299), 4842.
- Growth of competition—Regular appointments needed to secure competition (*Beare*), 4847.
- Date and scope to be announced at least one year in advance (*Gwynn*), 1001-2; (*Joly*), 1172-3.
- Faculties would try to influence Board, question of (*Gwynn*), 1052-5; (*Joly*), 1055.
- Prevention of undue grinding or cramming (*Gwynn*), 1153.
- Freedom from undue influence, etc. (*Trill*), 152 (p. 11); (*Gray*), 4106.
- Inadequate to requirements—No provision for Modern Languages and Experimental Sciences (*Trill*), 152 (p. 11).
- Learning only tested (*Mahaffy*), 2709.
- Objections to (*Magennis*), 2954.
- Opinion in favour of (*Beare*), 4731, 4891-2.
- Outside Assistance in Examination—
- No outside Assistance (*Joly*), 1102; (*Gwynn*), 1104-5, 1106; (*Kellerher*), 1105.
- Opinion in favour of (*Gwynn*), 1107.

FELLOWS AND FELLOWSHIP SYSTEM—continued:Election of Fellows—*continued.*Examination System—*continued.*Outside Assistance in Examination—*continued.*Permissive or Obligatory, question of (*Gwynn*), 1108; (*Jackson*), 1109.Prevented the College from getting in any new blood (*Leech*), 3212.Provisional Fellowships, Impossible for (*Madden*), 2458.Public Confidence—Advantage of Examination System (*Bernard*), 580; (*Gwynn*), 1133, 1135.Qualifications of Candidates (*Joly*), 1175.Waste of energy in pursuit of Fellowships, average number of attempts before succeeding (*Traill*), 153, 159; (*Bernard*), 581-2; (*Madden*), 2454-7.Doubling number of Fellowships, proposed (*Tarleton*), 505.Time not necessarily lost, many obtained Professorships elsewhere (*Tarleton*), 507.Governing Body, Entrusting Election to—Opinion in favour of Dr. Tarleton's Scheme (*Madden*), 2458.Gradual introduction of any change necessary, Risk of injustice (*Traill*), 218.

Graduates of Dublin—

Keeping Fellowships for, question of (*Gwynn*), 1207-9.Not confined to Graduates of Dublin, but very few Oxford or Cambridge Graduates offered themselves (*Gwynn*), 1205-6.Moderatorship Examination as a *sine qua non* and above it whatever standard might be fixed upon, question of (*Traill*), 154-7; (*Bernard*), 583; (*Jackson* and *Raleigh*), 993; (*Joly*), 993; (*Madden*), 2458-60, 2560-2.Rosse's, Lord, Memorandum, Agreement with views expressed (*Traill*), 166-8.Single College University proposed—Forced attendance of Catholics would lead to allegations of corruptness in the selection of Fellows (*Magennis*), 3093-4, 3194-5.Case of present Catholics in Trinity College was not analogous case (*Magennis*), 3198-9.

Studentship, Election on—

Objection—Studentship might be won on second and inferior course (*Madden*), 2458.Proposal to give a Student £150 a year, together with certain duties, for five years, and to elect one Student each year—Conditions of Election (*Bernard*), 583-6, 620-2, 623, 637-42.Suspension of Fellowships, Power of, if Candidates were not of sufficient merit, proposed (*Beare*), 4843-8.Teachers and Students—Election of both kinds in cases where the two things did not go together (*Mahaffy*), 2710-1.Teaching Capacity, Taking into account—Difficulty in regard to Catholic Candidates, Readiness to allege Corruption in Award of Prizes (*Magennis*), 2954.

Refer also to sub-heading Provisional Fellows.

Endowment of Research Question, Relation of Fellowship Question to, see RESEARCH.

Examination for Fellowship—

Cambridge Tripos, Comparison with (*Beare*), 4732 (p. 299).Combination of subjects necessary (*Traill*), 170-6; (*Bernard*), 580.

Election of Fellows, see that sub-heading.

Expense in Examiners' Fees and Prizes given to unsuccessful Students (*Leech*), 3218-24, 3278-80.Marks, Use of (*Beare*), 4831-4.Options of Candidates among proposed subjects (*Tarleton*), 557-9.**FELLOWS AND FELLOWSHIP SYSTEM—continued:**Examination for Fellowship—*continued.*Subjects represented (*Traill*), 170-4; (*Beare*), 4815-8.Arts course and nothing more—Constitutional position (*Beare*), 4896-7, 4899.Experimental Science, question of (*Traill*), 152 (p. 11); (*Beare*), 4820-4.Type of man desired—Magnificent attainments in Chemistry and some knowledge of Physics, Mathematics, etc. (*Tarleton*), 559-60.Undergraduates, Highest papers set for, Comparison with (*Tarleton*), 517-8.Wider range of subjects desirable—Too limited at present (*Tarleton*), 556; (*Gwynn*), 1003; (*Mahaffy*), 2709; (*Gray*), 4076-7, 4104-5; (*Beare*), 4732 (p. 299), 4819, 4825-7, 4898.Additional Chairs suggested (*Traill*), 177.Arts course for a degree would also have to be widened (*Beare*), 4877-8.Modern Languages and Experimental Science, introduction desirable (*Traill*), 169.No power to make any alteration unless by Statute or by King's Letter (*Traill*), 218.Teaching Staff, effect on (*Beare*), 4875-6.

Financial Position—Incomes of Fellows, effect of proposed changes, etc.

Decrements—Proportion of Students' Fees given to Senior and Junior Fellows, variable amount taken on number of Students (*Traill*), 209.Endowment of Fellowships—Prizes equal to the great prizes at the Bar (*Traill*), 122.Higher Scale of Salaries than in England necessary to retain best men—Competition surprisingly small even with present Salaries (*Gwynn*), 1136-8.Incomes so small that the Arts Professorships had to be given to Fellows (*Leech*), 3212.

Junior Fellows' Incomes—

No participation in renewal fees, Participation in renewal Fines so far as to receive compensation for them (*Traill*), 207-8.No return made (*M'Mordie*), 2581.Very precarious—Fluctuations in number of Students (*Traill*), 202.

Reduction of Incomes proposed—

Annuities to be paid to existing Junior Fellows as Financial Equivalent for alteration in prospects (*Gwynn*), 1092.Class of men taking Fellowships—Question whether payment would not have to be raised during earlier years to make up for reduction later (*Gwynn*), 1090.Out of proportion compared with Incomes of Professors and of men in other Universities doing similar Work (*Leech*), 3323.Senior Fellowships, keeping at their present value proposed (*Jackson*), 1091; (*Gwynn*), 1092-5.Senior Fellows' Incomes—£100 a year Irish plus £800 a year compensation for renewal fines (*Traill*), 201, 204-5.No participation in renewal fees. Participation in renewal fines so far as to receive compensation (*Traill*), 207-8.Not worth double that of Senior group of Junior Fellows (*Traill*), 178.

refer also to title TUTORIAL SYSTEM.

Junior Fellows—

Activity in regard to New Schemes (*Beare*), 4872.Administrative Experience, Opportunities of acquiring (*Beare*), 4766-7.Administrative Posts, Possibility of making Junior Fellows eligible—Difficulties of putting a Junior Fellow into such offices as that of Bursar (*Tarleton*), 528.

FELLOWS AND FELLOWSHIP SYSTEM—continued:

Junior Fellows (continued).

- Consulted by Board on various subjects under existing system (*Madden*), 2524.
- Enfranchisement, Question of—
King's Letter, Application for—Question of giving the Junior Fellows a share in the application for new Legislation (*Tarleton*), 534-45.
- Opinion in favour of (*Trall*), 232 (*Madden*), 2448-9, 2525-6.
- Proposals had been made but objections were always raised—Junior Fellows had been quite as impracticable as Senior Fellows (*Trall*), 232.
- Present Position—No voice in Government of the College (*Trall*), 231; (*Madden*), 2520.
- Statements submitted to Commission, Criticism of (*M'Mordie*), 2582.
- Marking according to impression of the Student, Right of Senior Fellows—Reform needed (*M'Mordie*), 2582.
- Merits of Existing System (*Tarleton*), 504, 507, 516; (*Beare*), 4888.
- Opening afforded to young men of talent (*Tarleton*), 506, 515.
- Modern Languages—Inclusion of experts among number of Fellows proposed (*Trall*), 152 (p. 11), 169.
- Best method of obtaining the necessary expert (*Trall*), 152 (p. 11).
- Number of Fellows—
Practically stationary since 1850 (*Beare*), 4737.
- Reduction by Death (*Gwynn*), 1130.
- Offices, Question of attaching Fellowships (*Trall*), 163.
- Outsiders, Election of—
Difficulty in reference to their Standing as Fellows (*Tarleton*), 522-3.
- Governing Body to have power of Election, proposed—Proposal not inconsistent with retention of present Corporation or election to Fellowships on result of moderatorships (*Madden*), 2527-9.
- No power (*Trall*), 241.
- Oxford System—Different from the Trinity System (*Tarleton*), 524.
- Royal University, Fellow merely meant a man who got a certain fixed Income—If that were the case at Trinity the difficulty would not arise (*Tarleton*), 524.
- Oxford and Cambridge, Comparison with—Difference in number, tenure and value of Fellowships made comparison of very little value (*Gray*), 3988.
- Pensions—£1,100 a year (*Joly*), 869.
- Professor-Fellow Scheme—Election to principal Chair to carry with it Membership of Corporation of the College and Fellowship (*Joly*), 797, 804, 898, 918.
- Abolition of existing Invidious distinctions between Professors and Fellows (*Joly*), 799, 867-8.
- Distinctions dividing Professors themselves would become prominent and they were no less invidious (*Beare*), 4730.
- Annual Vacancies, Question as to Possibility of maintaining regular annual vacancies combined with irregular vacancies in Professorships (*Gwynn*), 1123-4; (*Joly*), 1125-8.
- Christianity—Professors should abstain from anything in the nature of an attack on Christianity (*Joly*), 852-7.
- Creation of Future Chairs Difficulty (*Joly*), 1036; (*Gwynn*), 1038-41.
- Opinion that every Professor should be whole-time and have privileges of Fellowship (*Joly*), 1036.
- Dublin the only University where Professors as such had no share in Government (*Beare*), 4795-6.
- Educational Efficiency of the College, Effect on—
Imported men the best that could be got, not inferior in any way (*Beare*), 4797-8.

FELLOWS AND FELLOWSHIP SYSTEM—continued:

Professor-Fellow Scheme—(continued).

- Educational Efficiency of the College, Effect of—continued.
- Improvement of Status of Professors by increase in their power: would not necessarily attract the best men (*Beare*), 4741-8.
- Inefficiency possible under the Tutorial System, but not possible under Professorship System (*Trall*), 165.
- Injury involved (*Beare*), 4729.
- No longer possible to train men of broad general culture from among whom the best specialists were derived (*Beare*), 4732 (p. 298).
- Existing Professors—
Fellowships not asked for, but merely membership of the Corporation (*Joly*), 807-11, 1036.
- No material Advantage for existing Professors entailed (*Joly*), 925.
- Financial Unity Part of Scheme (*Joly*), 875, 903.
- Functions of Fellows and Professors—
Administrative Work of the Board—
Neglect of Teaching and Research
Struggles between Specialists likely to result if Professors were on the Board, etc. (*Beare*), 4732.
- Teaching Work required of Fellows, Fellows' Superior Qualifications for (*Beare*), 4731.
- Tutorial Duties not to be incumbent on New Fellows (*Gwynn*), 1021.
- Governing Body, Right of Election to, and Right of sitting on, if Elected (*Joly*), 808, 863-4, 922.
- Professors and Fellows to be dealt with as one body, electing 6 members (*Joly*), 865-6.
- Line of Demarcation between Professors and Fellows—
• Fellows had been part of the College from their youth and were possessed of the considerable fund of Academic knowledge required to obtain a Fellowship (*Beare*), 4730-1, 4828-9.
- Professors were employed as mere Specialists, many of them imported often at mature age knowing little of the University as a whole and nothing of the College (*Beare*), 4730, 4802-5, 4848-9.
- Difference by itself would not justify exclusion of Professors but it was one of many circumstances (*Beare*), 4806-7.
- Sense in which "mere Specialist" was used (*Beare*), 4827.
- List of Principal Chairs given not necessarily permanent (*Gwynn*), 1166, 1168; (*Lord Chief Baron*), 1167.
- Might get over the difficulty of possible Competition between Student and Professor (*Bernard*), 624-5.
- Mode of Election—Nothing in the nature of an Examination (*Joly*), 1029.
- Monetary Position of Professor-Fellow would be unchanged, except that he would be entitled to a Pension (*Joly*), 1169-70.
- No Objection (*Madden*), 2544.
- Object of Scheme—Increased Educational Efficiency of College and University and improvement in position of Professors (*Beare*), 4729.
- Opinion in favour of Scheme (*Gwynn*), 1110; (*Whittaker*), 1250; (*A. F. Dixon*), 2066-7.
- Origin of Scheme—Professorial Scheme though backed by a few Fellows (*Beare*), 4730, 4732 (p. 299).
- Other Universities, Treatment of Men imported from Trinity (*Beare*), 4799-801.
- Oxford Precedent (*Gray*), 3989.
- Analogy incomplete (*Beare*), 4729.
- Power to carry out reform could be given by King's Letter (*Trall*), 226-8.

FELLOWS AND FELLOWSHIP SYSTEM—continued.

Professor-Fellow Scheme—continued.

Principal or whole-time Professors, Application of Scheme restricted to (*Trail*), 263-7; (*Bernard*), 722; (*Joly*), 800-1, 907-9.

Careful selection desirable in electing to Fellowships, even of whole-time Professors (*Mahaffy*), 2793-4.

Irish Professorship—Not of sufficient importance at present, Difficulty in attaching a Fellowship to a restricted Professorship of the kind (*Bernard*), 723-5.

'Principal' a misnomer in this particular sense, 'Whole-time' ineffective since no Professor need be always 'Whole-time' (*Beare*), 4730.

Provisional Fellows, *see* that sub-heading.

Reduction of number of Junior Fellows and Tutors would be necessary (*Trail*), 161.

Retiring Allowance for all Fellows, Provision of, intended (*Gwynn*), 1111-3.

Revolution in Fellowship System necessary to execution of Scheme (*Beare*), 4729.

Rooms in College—not expected, not likely to result from Scheme (*Joly*), 932-3.

Tenure of Fellowship—

'Ad vitam aut culpam' with powers of Dismissal vested in Board and Faculties, proposed (*Joly*), 815.

Dismissal power to be vested in Board after consultation with Faculties subject to right of Appeal to Visitors—Suggestion (*Joly*) 817-9.

'Grave Moral Misconduct,' Liability to dismissal on—Term too narrow, Should be extended to include incompetence and other grave offences (*Joly*), 858-9.

Incapacity should be included as ground of Dismissal (*Joly*), 816; (*Gwynn*), 1017-20.

Necessary as protection for Professoriate (*Joly*), 927.

Dependent on Occupation of Chair (*Joly*), 805-6, 1011-4, 1026.

Hardship, Possibilities of (*Jackson*), 1028.

Fellowship really Honorary, carrying with it no Emolument but certain privileges (*Gwynn*), 1022-3, 1025; (*Joly*), 1024.

Ordinary Fellows and Professor-Fellows would be in same position (*Gwynn*), 1165.

Robertson Commission Report, Tenure proposals much the same as 'ad vitam aut culpam' (*Joly*), 842-7.

Three Years as Provisional Fellow, Tenure on Re-election to be 'ad vitam aut culpam' (*Joly*), 1015; (*Gwynn*), 1016, 1162-4.

Faculty, Consultation of, always involved in Re-election (*Joly*), 1030-1.

Professors and Fellowships (*Trail*), 163-4.

Difficulty in regard to standing as Fellows (*Trail*), 221-2.

Every second Vacancy, Election of Professors—Desirable that Professors of principal Chairs should be Fellows by Election or otherwise (*Trail*), 160.

Giving power to the Board, proposed (*Bernard*), 586-91.

Jackson's, Dr., Scheme—Criticism, comparison with Professor-Fellow Scheme, etc. (*Joly*), 896-904.

Honorary Fellows, Power for the Board to elect, with privileges of rooms and Commons and right to a Pension, proposed (*Trail*), 152 (p. 10).

Senior Professor to be elected Honorary Fellow, proposed (*Mahaffy*), 2795.

Professors who had been in office a long time, Opinion in favour of appointing such men as Fellows and in that capacity giving them a voice in the Governing Body (*Trail*), 224-6.

See also sub-heading Professor-Fellow Scheme.

FELLOWS AND FELLOWSHIP SYSTEM—continued:

Provisional Fellowships, proposed (*Tarleton*), 510.

Danger of keeping a man hanging about for seven years, hoping to become a Fellow and never becoming one (*Trail*), 198-9.

Debarred from acting as Tutors (*Joly*), 1034.

Limitation of Standing proposed (*Madden*), 2533.

Limitation would apply only to normal mode of Election—Provision for abnormal Elections removed all objections (*Madden*), 2534-5.

Opinion in favour of proposal—Conditions under which it might be tried (*Trail*), 196-7.

Readerships, Institution of—Bearing on Fellowship Question (*Joly*), 1004-6, 1055, 1177-9; (*Gwynn*), 1199, 1200; (*O'Sullivan*), 2038.

Research Fellows, Election of (*Trail*), 163-4; (*Bernard*), 592.

Tarleton's, Dr., Scheme for improvement of Fellowship System (*Tarleton*), 503, 506-7.

Criticism of (*Leech*), 3212.

Teaching—Range of Subjects in addition to Classics and Mathematics (*Trail*), 122.

Tenure—

Life Tenure—Certain number of men content to treat their Fellowship as a Prize (*Bernard*), 582.

Conditions should be attached to initial tenure in order to secure something more than perfunctory or routine work (*Beare*), 4732 (p. 300).

Oxford and Cambridge, Comparison with—real analogy at the end of the six years prize tenure (*Jackson*), 4091-2.

Permanent, Central Body giving stability to the whole institution (*Gray*), 3990-1.

Seven years when Trinity College was first incorporated (*Madden*), 2440.

Tutor Fellows. *see* TUTORIAL SYSTEM.

Unsuccessful Candidates, Position of—Prizes, etc. (*O'Sullivan*), 2031, 2033; (*Madden*), 2462-3.

Waste of time after Fellowships were obtained owing to petty interruptions and trivial duties (*Tarleton*), 507-8.

FINANCE—REVENUE AND EXPENDITURE, ETC.:

Accounts—

Criticism of (*M'Mordie*), 2576-7, 2580; (*Leech*), 3205-12.

Publication of—

Annual Publication, Opinion in favour of (*Leech*), 3311-2; (*Gray*), 3949, 3957.

Published occasionally (*Gray*), 3947-9.

Right of Access to (*Gray*), 3949, 3954, 3957; (*Beare*), 4767-9.

Decree of 1858 (*Gray*), 3950-6.

Fellows knew they were entitled to see the Accounts if they wished (*Gray*), 4088-9.

Amount paid as compensation for loss of advowsons, Interest on—Available for Pensions or for general College purposes (*Trail*), 152 (p. 10).

Buildings—Outlay during the last fifteen years (*Trail*), 152 (p. 10).

Control and Management—

Age at which Senior Fellowship was attained, Effect on Fitness of Fellow for management of Finance (*Gray*), 4080.

Board of Finance, proposed—

Constitution (*Trail*), 152 (p. 11), 238-9. Sanction of Governing Body to proceedings, Question of (*Trail*), 240.

Small Body necessary in order to protect College Finances from "raids" of Departments (*Trail*), 152 (p. 11).

Bursar managed estates, etc., as a member of the Board subject to their control (*Madden*), 2503-5.

Existing Board, Management of Finances by, *see* title GOVERNING BODY.

One office for all financial business proposed (*Leech*), 3212.

Saving might be effected in many Departments of the College (*Leech*), 3210, 3307.

Dividends from Investments—Criticism of apparent discrepancies in the Financial Statement of the College (*Leech*), 3209.

FINANCE—REVENUE AND EXPENDITURE, ETC.—continued.
 Fees paid by Students, *see* Fees.
 Fellows' Incomes, Source of, *refer* to title **FELLOWS AND FELLOWSHIP SYSTEM.**
 Improvement proposals—
 Anyone making a proposal was told that there was no money (*Leech*), 3209-11.
 Careful investigation of the rival claims of the schools for money (*Traill*), 152 (p. 11).
 Science School, all available money of late years devoted to (*Traill*), 152 (p. 11).
 "Salaries of Students" (*M'Mordie*), 2581.

FINLAY, FATHER:
 Mixed Education in Trinity College, Condemnation of (*Traill*), 3.

FITZGERALD PRIZE:
 (*Joly*), 1051, 1212-4; (*Thrift*), 1229-30.

FITZGIBBON, RT. HON. GERALD.—Lord Justice of Appeal in Ireland (Representative of a Special Committee of the General Synod of the Church of Ireland).
 Evidence, 2246-82, 2297-8, 2299, 2307-29, 2332, 2335-41, 2357-95, 2389, 2392.

FOTRELL, MR. GEORGE.—Clerk of the Crown and Peace, Dublin.
 Evidence, 1717-37.
 References to Opinions, etc. (*Brown*), 4966, 5087.

FRANCE:
 Federal University System established by Napoleon, Failure of (*Hamilton*), 3614-5; (*Windle*), 3727.

G.

GAELIC LEAGUE:
 Definition of the League and its objects (*MacNeill*), 3360.
 Expenditure on training Students in Modern Irish (*Rolleston*), 3457.

GALWAY, QUEEN'S COLLEGE: (*Anderson*), 3798.
 Dean of Residences in charge of Presbyterian Students (*MacDermott*), 1326-8.

Degrees—
 Literary or Scientific Degrees, Numbers reading for about equal (*Anderson*), 3813-4.
 Royal University Degrees, all Students reading for (*Anderson*), 3810.

Dunraven Scheme Proposals, *refer* to title **DUNRAVEN SCHEME.**

Income from Public Money, Amount (*Anderson*), 3806.

Little it was allowed to do was done well (*Delany*), 4310.

Matriculation—Only two Students had not passed the Royal University Matriculation (*Anderson*), 3811-2.

Neglect of, by successive Governments (*Anderson*), 3798.

Position of, in event of foundation of a Roman Catholic University of a modern type—Galway not of any use whatever (*Bernard*), 414; (*Delany*), 4307.

Royal University, Affiliated to (*Delany*), 4307.

Students, Number of, etc. (*Anderson*), 3800.
 Buildings could accommodate many more, but 200 or 300 would be as many as was desirable with existing staff (*Anderson*), 3807.

Causes limiting number—Objection of Roman Catholic Hierarchy and lack of Secondary Schools in the provinces (*Anderson*), 3089, 3827-30.

Certain Prospect of Increase a condition of the desired development and endowment (*Anderson*), 3808.

Female Students, Number of (*Anderson*), 3801.

Roman Catholic Students, Percentage—Much higher than in Trinity College (*Anderson*), 3798.

Sources of Supply (*Anderson*), 3825-6.
 Teaching Staff excellent, but Students were very few (*Archdall*), 2399.

GENERAL MEDICAL COUNCIL:
 Powers and Functions (*Windle*), 3729-30, 3745.

GENERAL SYNOD OF CHURCH OF IRELAND:
Refer to title **CHURCH OF IRELAND**, also title **TRINITY SCHOOL.**

GLADSTONE, MR.—Bill of 1873, etc.
 Separation of Theological Faculty from University of Dublin and Trinity College, proposed (*MacDermott*), 1289.
 Compensation for Church of Ireland (*FitzGibbon*), 2256.
 Natural result of Disestablishment, etc.—Statement in 1869 (*MacDermott*), 1284.

GLASGOW, UNIVERSITY OF:
 Udenominational except that there was a Theological Faculty (*MacDermott*), 1403-5.

GOVERNING BODY—REFORM SCHEMES, ETC.:
 Absence of members, £2 to be paid to substitute, proposed—Existing Rule, that absentee must pay a substitute (*Tarleton*), 548.
 Abuse in Administration (*M'Mordie*), 2582.
 Age Question—To be over seventy should be rather a disqualifying condition (*M'Mordie*), 2590.
 All plans put forward appeared each one worse than the other (*Mahaffy*), 2799-800.
 Bursar should be a member of reformed Body (*Bernard*), 612; (*Leech*), 3212.
 Teaching Duties, Board to have power to exempt from (*Joly*), 953-6.

Elective Body—
 Bishops of the Church of Ireland in favour of (*Archdall*), 2399; (*Crosier*), 2411.

Fellows, Election from whole body of, proposed (*Bernard*), 571-2.

Informal as against more elaborate Scheme of representation—Informal method would tend to give all representation to Senior men (*Beare*), 4808-14.

Salmon, Dr., Case of—Question whether Junior Fellows would have elected Dr. Salmon had the Board been an Elective Body (*Gray*), 3997-4001.

Seniority, due regard should be had to (*Beare*), 4732 (p. 299), 4778-81.

Graduates, Election by, Opinion in favour of (*M'Mordie*), 2590.

Not necessarily entirely Elective—Might be some *ex-officio* Representatives (*Bernard*), 569.

Objections—
 Backstairs influence, etc., Possibility of (*Gray*), 3996A; (*Beare*), 4867.

Small Board of Experts would consist of independent isolated atoms (*Gray*), 3996.

Existing Board—
 Absent Member replaced by Senior of Junior Fellows (*Madden*), 2506-8.

Age at which a Junior Fellow was co-opted.
 Average 65 (*Beare*), 4761.

Causes of Rise in Age—Abolition of Celibacy Statute, Loss of Livings at Disestablishment (*Traill*), 152 (p. 10); (*Madden*), 2445; (*Beare*), 4782-6.

Defect of advanced age—Changes in sentiment of Junior Staff not reflected with sufficient rapidity in the Governing Body (*Tarleton*), 509.

Fitness of Fellows for management of Finance, Effect on (*Gray*), 4080.

Automatic Promotion, Question of—One who came in senior order not of necessity the most competent man (*Traill*), 152 (p. 10).

Bursar and Senior Lecturer, Appointment by co-option (*Joly*), 951.

Co-operation in reform—Idle to expect the Board as at present constituted to co-operate in its own Reform (*O'Sullivan*), 1969.

Contradiction (*Gray*), 4003.

Cost of Government, *refer* to titles **GOVERNMENT AND FELLOWS AND FELLOWSHIP SYSTEM.**

GOVERNING BODY—REFORM SCHEMES, ETC.—*continued.*Existing Board—*continued.*

Defects of existing Government (*Madden*), 2448; (*Beare*), 4732 (p. 299).

Exclusion of Professoriate and Junior Fellows (*Trail*), 231; (*Tarleton*), 531; (*Madden*), 2445

Refer also to titles PROFESSORIAL and FELLOWS AND FELLOWSHIP SYSTEM.

Finances of the College, Management of—
Challenge to any Critic to put his finger on a case of Mismanagement (*Gray*), 3946.

Estates, Management of—

Bursar managed Estates, etc. (*Madden*), 2503-5.

Complimented by Report of Estates Commission (*Gray*), 3946.

Every Department and Professor complained of neglect, but that was not peculiar to Trinity (*Gray*), 3946.

Funds liberally used to meet necessary requirements, Extensive outlay on Buildings (*Trail*), 152 (p. 10).

Merits of System (*Madden*), 2448.

Extent to which Existing System was satisfactory (*Beare*), 4758, 4770.

Salmon's, Dr., Tribute (*Gray*), 3997.

Mixed Education. Opposition to Junior Fellows' and Professors' Scheme for extending usefulness of the College (*Trail*), 42, 43.

Previous occupations of Members, Extent of Administrative experience of Junior Fellows, etc. (*Beare*), 4762-7.

Provost expressed his own views only, he did not speak for the Board (*Trail*), 152.

Secrecy of proceedings—Fellows ignorant of Financial Business of the College, etc. (*Gwynn*), 960, 963, 970.

No secrecy—Never had been anything in the way of a Declaration or Oath of Secrecy (*Gray*), 3958, 4084-7.

Work of the Board—Weekly Meeting, Work consisted mostly in deciding questions of administration (*Trail*), 152 (p. 10).

Freedom of Professors in teaching secular subjects—There might be a theoretical limitation, and if it were exceeded the Governing Body was the proper body to deal with it (*Trail*), 62-5.

Identity with Corporation was the Counsel of Perfection (*Madden*), 2494.

Junior Fellows—

Enfranchisement prior to any great changes in Constitution of the College, Opinion in favour of (*Trail*), 152 (p. 10), 232.

Position on Governing Body was a thing looked forward to independent of the Monetary Advantages of being Senior Fellows (*Trail*), 253.

Right to compensation question (*Trail*), 254-5.

Representation on Governing Body, proposed (*Tarleton*), 509-10, 532; (*Madden*), 2448-9.

Refer also to sub-heading Representative Element.

Lecturers—Whole body to sit on the Board—suggestion had broken down (*Trail*), 152 (p. 10).

Necessity for Reform (*Trail*), 152 (p. 10), 180.

Number of Members on proposed Representative Board (*Trail*), 187.

Larger and wider Governing Body would sometimes be an advantage in dealing with large questions (*Trail*), 152 (p. 10).

Nine—All elected except the Provost who would be Chairman (*Bernard*), 576-9.

Nine—Three representative Senior Fellows, three Junior Fellows, three Professors (*Madden*), 2449, 2487-7A, 2501-3.

Seven—Sufficient number for the work (*Leech*), 3212 (p. 198), 3261-72.

Seven Senior Fellows, Retention as nucleus with addition of representative of Junior Fellows (*Trail*), 188-9, 233-5.

Small Body essential for practical work (*Trail*), 152 (p. 10).

Ten—too large, also an uneven number was more convenient (*Leech*), 3212.

GOVERNING BODY—REFORM SCHEMES, ETC.—*continued.*

Offices, Nature of—Powers and Duties of Officials (*Trail*), 152.

Sinecure Offices (*Trail*), 152 (p. 10), 193; (*Leech*), 3212 (p. 198).

Outsiders of Distinction, Question of admission of (*Gwynn*), 1140; (*Joly*), 1141.

Period of Membership—Greatly diminished owing to loss of promotion since Disestablishment of Church of Ireland (*Trail*), 152 (p. 10).

Professors—

Claim for Representation unanswerable—Question was how to meet the claim (*Madden*), 2445.

Harmonious Relations with Board (*Gray*), 3996, 4094-100.

Representation on Governing Body means of, *see* sub-heading Representative Element and titles FELLOWS AND FELLOWSHIP SYSTEM and CORPORATION.

Right of approach to Board—Each Individual Professor had the right, but it would be more effective if Professors of each Faculty were formed into an advisory group (*Beare*), 4732 (p. 299).

Registrar and Auditor, Functions, etc. (*Joly*), 957-8, 962, 969; (*Gwynn*), 959-60, 962-4, 966-7; (*Chairman*), 961, 963, 965, 969; (*Raleigh*), 965; (*Jackson*), 965-6, 968.

Work could be better done by a Clerk at £200 a year (*Bernard*), 561-2.

Remuneration—

Low Pay to prevent a scramble for office (*Trail*), 152 (p. 10).

Members to receive no Remuneration as such (*Joly*), 972.

Members should not get salaries but be penalised for non-attendance (*Beare*), 4732 (p. 299).

Report as to Academic work, etc., to be made to the Senate, proposed—Objection to requiring Report on Collegiate matters to the University Body (*Jackson*), 1070-2.

Representative Body to undertake actual government of the College, Senior Fellows to continue to hold emoluments and pensions, Question of (*Trail*), 224, 225A.

Representative Element—Representation of Professors and Junior Fellows, proposed (*Trail*), 152 (p. 10), 187, 233-9; (*Tarleton*), 509-10, 545-7; (*Madden*), 2448, 2454, 2493-4, 2542; (*Mahaffy*), 2790-3, 2796-8.

Heads of Departments, Claim that the eleven heads should all become members—Inadmissible (*Trail*), 152 (p. 10).

Retirement of Members—Placing a certain number of Senior Fellows upon the retired list, proposed (*Trail*), 152 (p. 10).

Difficulty under existing law—Person involved had to declare himself incapacitated (*Trail*), 152 (p. 10).

Expense Question (*Trail*), 152 (p. 10), 187. Amount of Retiring Pension (*Trail*), 195, 201-2.

Members inefficient by reason of age, Provision for Retirement, proposed (*Beare*), 4732 (p. 299), 4758-60.

Sinecure Offices held by Members of the Board instead of retiring (*Trail*), 152 (p. 10), 187, 193-5, 203.

Satisfactory Governing Body, grant of would be followed by most of the Reforms needed (*Madden*), 2523.

Senate, Question of Representation of (*Joly*), 950, 1142; (*Gwynn*), 1139; (*Leech*), 3212.

Senior Fellows—

Cessation of lecturing and teaching on co-option—General rule desirable on the whole (*Beare*), 4736-92.

Retention of a good many Senior Fellows on the Governing Body—Interests of a large number of Members should be entirely bound up in the place (*Tarleton*), 509, 512-14, 525-6.

Senior Lecturer—

Appointment by co-option (*Joly*), 951.

Member of the new Governing Body, proposed (*Bernard*), 612.

GOVERNING BODY—REFORM SCHEMES, ETC. (*Continued*).

Senior Lecturer—*continued*.

Opinion against continuance of office in its present form (*Bernard*), 615.

Teaching Duties, Board to have power to exempt from, proposed (*Joly*), 953-6.

Seniority System—

Advantages (*Gray*), 3996-7.

Objections (*Trail*), 233-4; (*Bernard*), 569, 573-5.

Age had nothing to do with it—Real objection was the liability to getting a man not only old but inefficient (*Beare*), 4868.

Replacing Fellows Nos. 25 to 32 by Fellows Nos. 20 to 27 proposed—Criticism of proposal (*Beare*), 4869-71.

Separation into Collegiate and Academic Governing Bodies to deal with Collegiate and University matters respectively, proposed—Dr. Jackson's Scheme (*Joly*), 891-5; (*Jackson*), 1075-7.

Objections to Scheme (*Gwynn*), 1078-82; (*Madden*), 2566-8.

Trinity College, Cambridge—Similar form of Government desired for Trinity College, Dublin (*Bernard*), 572.

Vice-Provost, Election of (*Joly*), 947-9.

Refer also to names of particular Bodies and Schemes.

GOVERNMENT OF TRINITY COLLEGE:

Cost of (*M'Mordie*), 2581.

Permanent Officials, Question of—Would not be much saving (*Trail*), 152.

Popular Misapprehension, Alleged expensiveness—Details of Actual Cost (*Trail*), 152.

Power of carrying out Reforms—

Certain things could be carried out by Board and Visitors without a King's Letter (*Trail*), 229-30.

King's Letter, Carrying out Reforms by, Preferable to Act of Parliament (*Trail*), 327.

Reforms could be carried out by King's Letter without an Act of Parliament (*Trail*), 227-8.

Restricted Powers—No steps could be taken without obtaining a King's Letter (*Gwynn*), 1042, 1046.

GRAY, REV. T. T.—Senior Fellow of Trinity College: Evidence, 3898-4147.

Senior Dean and Catechist, Performance of both offices instead of retiring on a pension (*Trail*), 193.

"GRINDERS":

see RESIDENT MASTERS.

GWYNN, MISS—Registrar of Lady Students in Trinity College, Dublin: Evidence, 2068-168.

GWYNN, MR. E. J.—Junior Fellow of Trinity College, Dublin:

Evidence, 935-6, 942-3, 959-61, 966-8, 970-1, 982-3, 988, 1001-3, 1016-23, 1025, 1038-42, 1046, 1052-4, 1058-63, 1066, 1068-72, 1074, 1077-95, 1104-20, 1123-4, 1129-40, 1149-69, 1187-1209.

H.

HAMILTON, REV. DR.—President of Queen's College, Belfast.

Evidence, 3609-724.

HANAN, MISS—Representative of the Irish Association of Women Graduates:

Evidence, 4215-25, 4235-49.

HAUGHTON, DR.:

Women Students, Admission to Trinity College—Dr. Haughton's opposition in 1894 (*Madden*), 2476.

HERON, MR. D. C.:

"Constitutional History of Trinity College" referred to (*Synnott*), 1535.

HIERARCHY OF ROMAN CATHOLIC CHURCH:
see title CATHOLIC BISHOPS.

HISTORICAL SOCIETY OF TRINITY COLLEGE:

Age and Vicissitudes (*Beare*), 4864-6.

Auditors of—Large Representation of Divinity School Men, etc. (*FitzGibbon*), 2262 (p. 129).

I.

INDIAN CIVIL SERVICE MEN:

Classes regularly established for some years past (*Johnston*), 1753.

Degree—Most of the men went to a degree (*Johnston*), 1752.

Number of Men—Number of Successes compared with number of Candidates (*Johnston*), 1749-51.

Probationary year spent at Trinity—Provision for teaching of Oriental Languages, Indian Law, etc. (*Johnston*), 1756-60.

Registrar in charge of Indian Civil Service Class, Functions, etc. (*Johnston*), 1754-5.

INTERMEDIATE SCHOOLS:

Mixed Education in Trinity College, Intermediate Schools and the Proposal (*Trail*), 3.

Results showing large proportion of Catholic successes (*Delany*), 4473.

Mathematics, Weakness of Catholics in—Explanation (*Delany*), 4474.

Religious Training and Mental Equipment of Students, Criticism of (*Synnott*), 1543.

Science Students, Falling off in numbers—Science being killed out by indirect methods (*M'Mordie*), 2586.

Teaching controlled by Catholic Clergy who were without University Education—Dr. O'Dwyer's views (*Synnott*), 1523.

University training and the after influence of bringing closer together the Protestant and Catholic Youth (*D. F. Browne*), 5006.

IRISH CHURCH ACT, 1869:
(*FitzGibbon*), 2246-51.

IRISH LEARNING, SCHOOL OF:
(*Rolleston*), 3451-6.

IRISH SUBJECTS—STUDY OF THE LANGUAGE, LITERATURE, HISTORY, ETC.:

Archæology—

Altogether neglected by the University (*MacNeill*), 3379 (p. 210), 3380-2.

Chair of Ancient Irish and Irish Archæology, Opinion in favour of (*Crozier*), 2415.

Attitude of Trinity College—Neglect of Irish Subjects alleged (*MacNeill*), 3360, 3379, 3382-4; (*Rolleston*), 3385.

Change in present attitude, Question of—Would do more to make Trinity a National institution than any religious concessions (*Rolleston*), 3410.

Would not necessarily put Trinity into touch with all the interests of Ireland (*MacNeill*), 3483-9.

Movement at the end of eighteenth century for encouragement of study of Irish—Opportunity ignored by Trinity (*Rolleston*), 3385.

Provincial and British Institution (*MacNeill*), 3360, 3481-2.

Curriculum of Schools which work up to the University affected by neglectful attitude of Trinity College (*Rolleston*), 3385 (p. 212).

Dead Language only, Irish cultivated as, in Trinity College—Dr. Salmon's Statement (*Murphy*), 3571-2.

Educational Instrument, Irish as (*Rolleston*), 3434-7, 3458-65.

Endowment for Research Work—Private Endowments would soon be forthcoming if Trinity gave a lead (*Rolleston*), 3385 (p. 213).

IRISH SUBJECTS—STUDY OF LANGUAGE, ETC.—(Continued).

Extent of existing provision for study of Irish—Additional provision proposed (*Bernard*), 698-700, 707.

Celtic Lecturer—

Gave occasional Lectures (*Bernard*), 696-7.

Office held by Professor of Sanskrit—No efforts to encourage attendance at Lectures (*MacNeill*), 3379, 3449-50.

Claim of Provost to a number of distinguished Irish Scholars—Learning inspired by O'Curry and O'Donovan and not by the teaching of the College (*MacNeill*), 3379.

Class of Irish Studies proposed (*MacNeill*), 3496-501.

Desirable that in an Irish University facilities should be greater than at present (*Bernard*), 609, 690-5.

Examination held, but no course of Studies prescribed (*MacNeill*), 3379.

Faculty of Irish Studies, Creation of, proposed (*MacNeill*), 3384, 3501-10.

Gaelic League, Opinion of (*Rolleston*), 3441.

History—

Honour Course—Irish History well represented for the first time (*Rolleston*), 3385 (p. 212).

Wardell's, Mr., Claim of having delivered the first lecture on Irish History in Trinity College (*MacNeill*), 3379; (*Rolleston*), 3385.

Literature—

Ancient Irish, Value of Literature far higher than that of Modern Irish (*Rolleston*), 3439-40.

Character of Modern Irish prose and verse (*Rolleston*), 3423-33, 3458-61.

Comparison with that of France or Germany (*MacNeill*), 3511-3.

Course—Introduction of works of Anglo-Irish writers suggested (*Rolleston*), 3410, 3447-8.

Growth of Irish Literature—New books continually being produced, National movement (*MacNeill*), 3514-7.

Moderatorship, question as to foundation of (*Rolleston*), 3402, 3466-71; (*Murphy*), 3531.

See also title "CELTIC LANGUAGE AND LITERATURE."

Need existed and had grown up quite outside Trinity (*Rolleston*), 3416, 3457.

Professor of Celtic Languages and Literature with Assistant Professorships or Lecturerships in Modern Irish and in Irish History, proposed (*Rolleston*), 3397-400a.

Scholarship Examination, Introduction of Irish (*Rolleston*), 3403-9.

Scholarships, Prizes and Premiums, see that sub-heading.

Undergraduate Courses, Introduction of Irish (*Murphy*), 3531.

Ancient Irish, Exclusion of (*Rolleston*), 3422, 3438-9.

Compulsory Subject, Question of (*Rolleston*), 3418-22, 3442-6, 4476.

Possibility of giving instruction which would interest Students in surroundings (*Rolleston*), 3472-80.

Gaelic League, Amount spent in teaching people modern Irish (*Rolleston*), 3457.

Importance of encouraging Study of Irish (*Rolleston*), 3411-2.

Not now seriously disputed except by Belfast Education Reform Association (*MacNeill*), 3360.

Manuscripts in Library of Trinity—

Access to—Catalogue (*Bernard*), 708; (*MacNeill*), 3379.

Students were not working on them so far as witness knew (*Murphy*), 3604-5.

Movement in favour of a distinctive National Life and Culture (*MacNeill*), 3360, 3382.

National University should give special attention to History, Literature, etc. of the country (*Madden*), 2546.

IRISH SUBJECTS—STUDY OF LANGUAGE, ETC.—(Continued).

Number of people in Ireland speaking both English and Irish—Increasing number (*Rolleston*), 3413-4.

Number of people in Ireland speaking Irish only (*Rolleston*), 3415.

Professorship of Irish at Trinity College—

Description of work, Method of teaching, Books prescribed, etc. (*Murphy*), 3530.

Divinity School, Adjunct of alleged—

Publication in University Calendar of Irish Professorship as connected with Divinity School (*Murphy*), 3541-4, 3584-8, 3595.

Denied and all mention of Irish removed from Divinity School Syllabus (*Bernard*), 685.

Undenominational Professorship—No connection with any Theological School (*Murphy*), 3450a-41; (*Gray*), 4126-7.

Foundation of Professorship—Date, Terms of the Trust, Source of Funds, etc. (*Murphy*), 3519-23, 3524, 3545-50; (*MacNeill*), 3360.

Irish Society, Foundation by alleged—Evidence of Sectarian Character of Professorship (*MacNeill*), 3360.

Endowment—Conditions upon which Irish Society's Endowment was accepted (*MacNeill*), 3373 (p. 209), 3374-9.

Full name and objects of the Irish Society (*MacNeill*), 3360 (p. 208), 3361-73.

No connection with Irish Society whatever (*Murphy*), 3524-5, 3527-8.

Present Professor had occasionally done work for the Irish Society as for Roman Catholics, but without fee or reward (*Murphy*), 3529, 3557-8.

Prizes given, Question of, see sub-heading Scholarships, Prizes, and Premiums.

Professor a member of Irish Society, Question of (*Bernard*), 701-7.

Scandal that the sole provision for the teaching of the Irish Language should be relegated to a Sectarian Foundation (*Rolleston*), 3385 (p. 213), 3386-96.

Trustees appointing the Professor, Question of membership of Irish Society (*Murphy*), 3560-70.

Publications by occupants of Irish Chair (*Murphy*), 3531, 3606-8.

Qualifications required of the Irish Professor (*MacNeill*), 3373; (*Rolleston*), 3385 (p. 213).

Whole time of Professor to be given—Desirable but impossible to predict increase in number of Students (*Murphy*), 3595-600.

Scholarships, Prizes, and Premiums (*MacNeill*), 3360, 3379.

£20 awarded by Board of Trinity for Money Premiums (*Murphy*), 3524 (p. 219), 3530, 3578, 3581-3.

£1,000 set aside by Irish Society, Disposal of (*Murphy*), 3578-80.

Bedell Scholarship and Kyle Prize—

Divinity Students only eligible (*Murphy*), 3530.

Funds for Bedell Scholarship, Source of (*Bernard*) 686-9; (*Murphy*), 3576-7.

Means of examining candidates if Professor of Irish were not called upon (*Murphy*), 3590-3.

No connection between Bedell Scholarship and Kyle Prize (*Murphy*), 3532.

Professor of Irish originally Trustee of Kyle Prize Fund but Trusteeship transferred to Provost (*Murphy*), 3533-7.

Professor of Irish usually examined for these Prizes but did not lecture (*Murphy*), 3531, 3538-40, 3589, 3594.

IRISH SUBJECTS—STUDY OF LANGUAGE, ETC.—(*Continued*).

Scholarships, Prizes and Premiums—*continued*.

Proportion of Prizes which went exclusively to Church of Ireland Divinity Students (*MasNeill*), 3379.

Regarded as the preserve of a very few Specialists (*Bolleston*), 3385 (p. 213).

Sizarship, Value of—Course prescribed (*Murphy*), 3530.

Students, Number and Classes of, attending lectures—Increase in average number (*Murphy*), 3530, 3559.

IVNAGH, LORD:

Building of Laboratories, etc., Funds provided for (*Joly*), 1213.

J.

JEBB, PROFESSOR:

Multiplication of Universities, Views on (*Windle*), 3727.

JESUITS:

Mixed Education proposal at Trinity College, Attitude more liberal than that of other Roman Catholics (*Traill*), 3.

JOHNSTON, PROFESSOR J. P.:—*Resident Master in Trinity College.*

Evidence, 1738-96A.

JOLY, PROFESSOR:—*Professor of Geology and Mineralogy in the University of Dublin.*

Evidence, 795-934, 937-41, 944-58, 962-5, 969, 972-81, 984-7, 989-1000, 1004-15, 1024, 1026-37, 1043-5, 1047-51, 1055-7, 1064-5, 1067, 1073, 1075-6, 1096-1103, 1121-2, 1125-8, 1141-8, 1158, 1169-86, 1210-22, 1225, 1262, 1267, 1271, 1273, 1275-6.

K.

KING'S LETTER:

Application for—

Body applying (*Traill*), 256; (*Madden*), 2513, 2516-20.

Junior Fellows had no share officially (*Tarleton*), 534-5.

Opinion in favour of consulting Junior Fellows (*Tarleton*), 536-45.

Unnecessary between Charter of Elizabeth and Laudian Statutes because the College was Autonomous (*Madden*), 2515.

Crown, Power of to issue a King's Letter without application by the College—In practice no King's Letter had been issued without an Application (*Traill*), 257-8.

Power of carrying out reforms in Trinity College by (*Traill*), 227-30.

KING'S PROFESSORS OF THE SCHOOL OF PHYSIC:

see MEDICAL SCHOOL.

KNOX, DR. KYLE:

Compensation suggestion, refer to title DIVINITY SCHOOL.

Evidence, 2394-7.

L.

LABORATORIES:

Not closed during Examination—Open even during a large part of the Summer Vacation (*Mahaffy*), 2631-2.

Re-building (*Joly*), 1212.

LADY STUDENTS IN TRINITY COLLEGE:

See WOMEN.

LANGUAGES—MODERN LANGUAGES:

French—Special Staff provided which it was desirable to include in Fellowship System (*Traill*), 152 (p. 11).

Refer also to title FELLOWS AND FELLOWSHIP SYSTEM—MODERN LANGUAGES.

LAUDIAN STATUTES:

See title STATUTES OF THE UNIVERSITY OF DUBLIN.

LAW SCHOOL OF TRINITY COLLEGE:

Committee of Inquiry recently appointed, Reforms instituted, etc.

Attraction to Students (*Madden*), 2485.

Constitution (*Madden*), 2483.

Honour Course and Moderatorship, Introduction of, the most important change (*Madden*), 2484.

Benchers, Proposal brought before and unanimously approved (*FitzGibbon*), 2314-7.

Leech's, Prof. Objections (*Traill*), 313; (*Madden*), 2484-5.

Reply (*FitzGibbon*), 2311.

Unreasonable Objections (*FitzGibbon*), 2319.

Professors of the School, Assistance rendered by (*FitzGibbon*), 2313.

Success in Course reckoned equivalent to a year at King's Inns (*FitzGibbon*), 2314.

Procedure—Board appointed a small Committee (*Gray*), 3996.

Reports handed in (*Madden*), 2483.

Fees Question (*Bernard*), 481-6; (*Leech*), 3226.

Royal University Grievance—Law Students obliged to take Courses at Trinity (*Delany*), 4481-2.

Teaching, Arrangement of, between Trinity College and King's Inns (*FitzGibbon*), 2312.

Objections to existing arrangement, Overlapping of subjects—Transfer of all teaching to Trinity proposed (*Leech*), 3226-7, 3229, 3230-2, 3235-8, 3260, 3324.

Protest to Robertson Commission by some Law Students against privileges enjoyed by Trinity College (*Leech*), 3326-7.

Royal University, Possible claim for recognition—Benefit of competition (*Leech*), 3324-5, 3328.

Scottish System, Similar arrangement to, desired (*Leech*), 3233-4.

LECTURES AND LECTURERS:

Honour Lectures—

Attainment of a certain position among the Fellows was a disqualification for Lecturing in Honours (*Mahaffy*), 2746-50, 2782-3.

Honour Examinations chiefly conducted by Honour Lecturers (*Mahaffy*), 2745.

Special Honour Lecturers, Appointment of (*Mahaffy*), 2742-4.

Senior Lecturer—

Appointment by co-option proposed (*Joly*), 951.

Duties (*Traill*), 152; (*Leech*), 3212 (p. 197, 198).

Governing Body, Membership of, proposed—Preferable that the Provost should take over the wrk of Senior Lecturer (*Leech*), 3212.

Teaching Duties, Board to have power to exempt from, proposed (*Joly*), 953-6.

Refer also to title TUTORIAL SYSTEM.

LEECH, PROF. H. BROUGHAM:—*Regius Professor of Laws in the University of Dublin.*

Classical School of Trinity College, Criticism of. Contradiction afforded by names of Professors (*Madden*), 2485.

Starkie's, Dr., Repudiation of Sympathy with Criticism (*Beare*), 4727.

Evidence, 3202-358.

Law School of Trinity College—Opposition to recent Reforms (*Traill*), 313-4; (*Madden*), 2484.

LEET, MR.:

External Auditor of Trinity College (*Gray*), 3946.

LIBRARIAN:

Sinecure Office (*Traill*), 193; (*Leech*), 3212 (p. 198).

Assistant Librarian to have supreme control proposed (*Leech*), 3212 (p. 198).

LIBRARY:

- Dunraven Proposals, Reason for (*Dunraven*), 4724.
- Exchange and Loan of Manuscripts and Rare Books, Facilities for (*Bernard*), 711-6.
- Privilege of obtaining copies of all books published in Britain.
- Agent in London who is instructed to send the same books to Trinity that he sends to Oxford and Cambridge (*Mahaffy*), 2712-3.
- Transfer to the National Library, Question of (*Mahaffy*), 2714, 2764.
- Use of the Library and Books by Students not belonging to Trinity College (*Mahaffy*), 2765.

LONDON UNIVERSITY:

- Udenominational University including Denominational Colleges (*Bernard*), 371-3, 424-8, 436.
- Divinity Degrees, System on which degrees were granted—No reason why system should not be tried in Ireland (*MacDermott*), 1369.
- Doctorate, Admission to—Persons presenting theses examined on theses (*Chairman*), 994.
- Nothing to do but examine—Denominational Colleges in England were very different from Denominational Colleges in Ireland (*Traill*), 52-4, 66-8.
- Women, First University open to (*Madden*), 2477.

LOUVAIN, UNIVERSITY OF:

- Control by Catholic Bishops, but Bishops never interfered with domestic management of the College (*Delany*), 4493.

M.

MACDERMOTT, REV. J.—*Representative of the Higher Education Committee of the General Assembly of the Presbyterian Church in Ireland.*
Evidence, 1277-1496.

MACDONALD, MR. W.—*Chairman of Cork County Council.*
Evidence, 4521-50.

M'MORDIE, MR. R. J.—*Representing "Education Reform Association, Belfast."*
Evidence, 2572-95.

MACNEILL, MR. J.—*Representative of the Gaelic League.*
Evidence, 3359-85.

M'WEENEY, DR. E. J.—*Representing the Catholic University School of Medicine.*
Evidence, 2808-925.

MADDEN, THE RIGHT HON. MR. JUSTICE.—*Vice-Chancellor of the University of Dublin.*
Evidence, 2436-571.

MADDEN PRIZE:

- Converting to aid Fund for providing Readerships, suggested (*O'Sullivan*), 2032, 2034-7, 2039.

MAGEE COLLEGE:

- Dunraven Scheme, Inclusion in, *see* title DUNRAVEN SCHEME—Affiliation.
- Theological Students—Student might take his Arts Course elsewhere and go to Magee College for Divinity (*MacDermott*), 1439.

MAGENNIS, MR. W.—*Representing the Catholic Graduates Association.*
Evidence, 2926-3201.

MAHAFFY, REV. J. P.—*Senior Fellow and Senior Lecturer of Trinity College.*
Evidence, 2598-807.

MAYNOOTH COLLEGE:

- Arrangements for Students under the various Schemes proposed, *see* titles SECOND COLLEGE IN DUBLIN UNIVERSITY, SINGLE UNIVERSITY, SEPARATE COLLEGE OR UNIVERSITY, etc.

Arts Course—Royal University Course adopted (*Delany*), 4367-8.

Arts Examinations, Offer by Trinity College of privileges to Divinity Students at Maynooth (*Traill*), 114-5.

Dual Functions—Arts College for first three years, then Theological College for four years (*Delany*), 4358.

Number of Students at first Arts Examination in 1906 (*Delany*), 4357.

Original Purpose of Foundation (*Synnott*), 1531-4.

Misapplication of Moneys collected for a Catholic University (*M'Mordie*), 2590.

Royal University, Number of Students entering (*Delany*), 4486-7.

Standards considerably higher than anything at Trinity or at the Royal (*Delany*), 4381.

MEDICAL APPOINTMENTS:

see POOR LAW MEDICAL SERVICE.

MEDICAL PROFESSION:

Unusually large proportion of the Catholic Celtic Population of Ireland attracted to (*M'Weeney*), 2828, 2894.

MEDICAL SCHOOL:

Amalgamation with Cecilia Street School proposed, *see* title CATHOLIC UNIVERSITY MEDICAL SCHOOL.

Arts Course of Medical Students—All Students required to take Arts degree before the M.B. was conferred on them (*A. F. Dixon*), 1799.

Additional Subjects that had to be taken by a Medical Student (*A. F. Dixon*), 1855-6, 1885-6, 1917-20.

Extent to which subjects taken coincided with those which would have to be taken in Medical Course (*A. F. Dixon*), 1839-44.

Overloading of Courses, Question of (*A. F. Dixon*), 1892, 1947-7A.

Certain Courses of Arts and Medicine allowed to run concurrently (*A. F. Dixon*), 1799.

Choice of Subjects restricted—Reasons for Restriction (*A. F. Dixon*), 1799-800.

Examination before beginning Medical Course (*A. F. Dixon*), 1886-91, 1932.

Fees, Disposal of, etc., *refer* to sub-heading Financial Arrangements.

Honour Degrees including Medical Subjects, Introduction of new Medical Moderatorship or Moderatorship in Natural Science B. (*A. F. Dixon*), 1933.

Number of men taking Course, Improved type of Senior Student, etc. (*A. F. Dixon*), 1933-5.

Length of time over which Arts Subjects in the Medical Course extended (*Traill*), 285; (*A. F. Dixon*), 1853-4.

Medical Teachers—No objection to present system, No friction between Medical School and Arts Course people (*A. F. Dixon*), 1857, 1924.

Oxford and Cambridge, Comparison with (*A. F. Dixon*), 1883-4.

Pecuniary Position of Students, effect on—Amount of Arts Fees, etc. (*A. F. Dixon*), 1848-53.

Period of Medical Students Studies, Addition to (*A. F. Dixon*), 1845, 1847.

Practical Work, Amount done (*A. F. Dixon*), 1879-82.

Registered Practitioners of five years' standing, Arts Subjects required for—Question of remitting Arts Subjects (*A. F. Dixon*), 1948-56.

Special Courses for Medical Students in practical Chemistry, Botany and Zoology (*A. F. Dixon*), 1859-67.

Teachers—Same persons provided teaching whether as part of Arts Course or part of Medical Course (*A. F. Dixon*), 1862-5.

MEDICAL SCHOOL—continued.

Arts Course of Medical Students, etc.—continued.

Teachers—continued.

Chemistry, Teachers in—There was a certain amount of differentiation (*A. F. Dixon*), 1873-4.

Conflicting Interests of pure Science and practical teaching needed for Medical Students—Question whether Professors could give the consideration to both (*A. F. Dixon*), 1869-72.

Zoology—One teacher only who was also Professor of Comparative Anatomy—Witness thought the two subjects should be separated (*A. F. Dixon*), 1875-6.

Biology, Department of Scientific Biology—Reform of Management needed but not additional Chair (*O'Sullivan*), 2018-21.

Buildings, Cost of (*Gray*), 4009.

Careers for which Medical Students were prepared (*A. F. Dixon*), 1833.

College of Physicians—

Co-operation in Scheme for amending School of Physic Act (*Thompson*), 2203-4.

King's Professors' Statement was before the College (*Thompson*), 2197, 2211.

No reason for disturbing persons like Dr. Thompson and Professorships such as his (*Trill*), 315-6.

No voice in management of Medical School since Appointment of Medical School Committee (*Thompson*), 2174, 2184-5.

College of Physicians made no actual complaint, but there was a good deal of private Dissatisfaction (*Thompson*), 2186-90.

Representatives, Decision not to send, to give oral Evidence before Commission (*Thompson*), 2198.

Special Connection with Trinity College, Appointment of King's Professors, etc. (*A. F. Dixon*), 1940; (*O'Sullivan*), 1972-3; (*Thompson*), 2171, 2182-3.

Control and Management—

Dual Control established by School of Physic Act.

Extinction by acting on assumption that School of Physic in University was something different from School founded by Statute (*Thompson*), 2173-4.

Series of steps culminating in Promulgation prohibitory Claim of 1886 (*Thompson*), 2177-9.

There was only one School all the time (*Thompson*), 2180.

Unsatisfactory (*Thompson*), 2173.

Medical School Committee appointed by Board of Trinity College in 1879 (*Thompson*), 2174.

College of Physicians had had no voice in Management since Appointment (*Thompson*), 2174, 2184-5, 2186-90.

Form of Management at variance with Provisions of School of Physic Act (*Thompson*), 2174-5.

King's Professors not proportionately represented (*Thompson*), 2174.

No complaint of actual doings of Committee (*Thompson*), 2174.

Council of the University, not represented on—Representation on Board of Studies proposed (*Trill*), 152 (p. 11).

Equipment, Need for (*Synnott*), 1698.

Demand for adequate equipment on denominational lines—Difficulty of satisfying Parliament as to need for duplicate equipment (*Synnott*), 1700-3.

Financial Arrangements, relations between Medical School and University, etc.—

Expenditure by the University on the School—Claim of the School for more liberal treatment (*A. F. Dixon*), 1821.

Amount of Emoluments mentioned under heading Medicine in Tables supplied (*A. F. Dixon*), 1807, 1813-5.

Desirable that Commission should have correct amount before them (*A. F. Dixon*), 1824-5, 2056.

MEDICAL SCHOOL—continued.

Financial Arrangements, etc.—continued.

Expenditure by the University—continued.

Amount of Emoluments—continued.

Difference between Expenditure shown in tables and that shown in Scheme for Division of Fees and Salaries (*A. F. Dixon*), 1808—Not depending on an increase of Expenditure (*A. F. Dixon*), 1818.

Summary of Accounts—Correct, no suggestion that there was anything wrong (*A. F. Dixon*), 1827-30.

Sums entered which were slightly or not at all, connected with the teaching of Medicine (*A. F. Dixon*), 1807, 1818, 1832.

Arts Fees and Entrance Fees of Medical Students—

Annual Amount (*A. F. Dixon*), 2057-9.

Claim of Medical School on Common Fund of University on account of large sum paid as Arts Fees (*A. F. Dixon*), 1826, 1930-1.

Endowments of a University endowed to teach Arts and also Medical Science were as applicable to Medicine as to Arts, if required (*A. F. Dixon*), 2061.

Included as money coming to the University through the Medical School (*A. F. Dixon*), 1929, 1942-4.

Fees paid by Students—

Arts Fees see sub-heading Expenditure. oral Evidence before Commission (*Thompson*), 2231-5.

Deferring Consideration till Joint Committee should have reported, Question of (*Thompson*), 2228-31.

Dun's Hospital, Fees payable to Registrar of—Provision of School of Physic Act no longer operative (*Thompson*), 2200.

General Hospital Fee of £12 12s. could only be dealt with by legislation (*Thompson*), 2239-41.

King's Professors, Fees paid to (*Thompson*), 2201-2.

Licent Fees, History of (*Thompson*), 2236-8.

Total Annual Fees paid into the College by Students, taking an average of fifty Students (*A. F. Dixon*), 1810-1.

Total Medical Fees, Total Fees for a graduate of Medicine (*Thompson*), 2225.

Unnecessarily high in some cases—Abolition of certain fees suggested (*Thompson*), 225, 2236-41.

Within Commission's Terms of Reference because they were Hospital Fees fixed by School of Physic Act (*Thompson*), 2226-7.

Incomes of Teachers—

Direct Interest in Number of Students attending class too large at present—Capitation Fees should be small (*A. F. Dixon*), 1901, 1906, 2023-5; (*O'Sullivan*), 1874-5.

Extent to which University should be responsible, Question of—Minimum guaranteed at present too small (*A. F. Dixon*), 2022, 2026-9.

Fixing Incomes proposed—

Fees put into a common Fund and normal Salary attached to each Chair, subject to proportionate reduction if fees fell (*A. F. Dixon*), 2022.

Not intended to preclude possibility of increase according to Length of Service (*O'Sullivan*), 1973.

Suitable Income should be assigned to each important Chair (*O'Sullivan*), 1975-8.

"Scheme for Division of Fees and Salaries" (*A. F. Dixon*), 1809, 1812, 1822-3, 1902-4.

Object of (*A. F. Dixon*), 1812.

MEDICAL SCHOOL—continued.**Financial Arrangements—continued.****"Scheme for Division of Fees and Salaries"—continued.**

Time during which Scheme had been in operation (*A. F. Dixon*), 1816-7.

King's Professors of the School of Physic—

Claim that School of Physic as it is should be given by Statute a position it held only by courtesy (*Thompson*), 2193.

Method of Election—

Appointment at present by College of Physicians (*O'Sullivan*), 1972-3; (*Thompson*), 2171, 2182-3.

No change proposed (*Thompson*), 2193-5.

Old provision for electing King's Professors (*Thompson*), 2196.

Names, Titles and Emoluments with exception of King's Professor of Institutes of Medicine did not appear in tables furnished by the College (*A. F. Dixon*), 1806.

Number (*Thompson*), 2171.

Payment, Method in which Pay was made up (*A. F. Dixon*), 1807.

Statement had been communicated to College of Physicians (*Thompson*), 2197, 2211.

Status—Officers of the University only by courtesy (*Thompson*), 2201.

Claim to be accorded Rights and Privileges of Officers of the University (*A. F. Dixon*), 1996; (*O'Sullivan*), 1997; (*Thompson*), 2171.

Number of Graduates remaining in Ireland, Number going abroad, Question of (*A. F. Dixon*), 1834, 1928; (*O'Sullivan*), 2048.

Number of Students entering during each of last ten years (*A. F. Dixon*), 1893-7.

Number that dropped out—Leakage of Failures not excessive (*A. F. Dixon*), 1898-900.

Pathology—Now a separate Lectureship, formerly taught by Professor of Physiology (*A. F. Dixon*), 1914-6.

Physiology, Professor of—

Clinical Opportunities not required (*O'Sullivan*), 2009-11.

Medical and Scientific aspects represented by the one Professor—Differentiation hardly desirable (*O'Sullivan*), 2004-8.

Poor Law Medical Service, see that title.

Position held by School—Posts held by Dublin Graduates (*A. F. Dixon*), 1926-7.

Special connection between Trinity and the College of Physicians did not influence the Fellowship (*A. F. Dixon*), 1940-1.

Post Graduate Study—System pursued during last two years (*Trill*), 320.

Names and Status of Teachers (*A. F. Dixon*), 1800-5.

Preventive Medicine or Hygiene—Chair needed (*O'Sullivan*), 2017.

Professors and Lecturers—**Appointment of—**

Appointment by same Governing Body, proposed (*O'Sullivan*), 1970-2; (*A. F. Dixon*), 1992.

Fundamental Reform required—Institution of Lectures under a Representative Governing Body (*O'Sullivan*), 1969.

Certain Professors entitled to act as clinical teachers in Dun's Hospital—Provision of School of Physic Act now inoperative (*Thompson*), 2200.

Fellows' Privileges, Extension to Professors, proposed (*A. F. Dixon*), 2066-7.

King's Professors, see that sub-heading.

Payment of, refer to sub-heading Financial Arrangements.

Post-Graduate Instruction, Names and Status of Teachers and Lecturers responsible for (*A. F. Dixon*), 1800-5.

Private Practice, Professors engaged or permitted to engage in (*A. F. Dixon*), 1911-3.

Representation on School Committee, demand for (*A. F. Dixon*), 1994.

Tenure Question—

Continuity of Tenure and Provision of Retiring Allowance prevented by terms of School of Physic Act (*Thompson*), 2181.

MEDICAL SCHOOL—continued:**Professors and Lecturers—continued.****Tenure Question—continued.****Life Tenure—**

Not Life Positions at present (*A. F. Dixon*), 1993-4.

Objections to appointing Professors for Life (*Trill*), 315.

Registrar's Letter in 1874—No further steps taken (*Thompson*), 2200.

Two sets of Professorships under the School of Physic Act covered the whole of Medicine—They did not overlap (*Thompson*), 2171-3.

Whole-time Professors (*A. F. Dixon*), 1909-10.

Research—**Endowment Question—**

Comparison with other Universities in Ireland and England, Question of (*O'Sullivan*), 1979, 1999-2000.

Endowment should be specially for Research, not desirable that men should be chosen by examination (*O'Sullivan*), 2041-2.

Existing Provision quite inadequate (*O'Sullivan*), 1979-82.

Scholarships—Three or four £50 Scholarships or Readerships, proposed—£50 would secure a good man (*O'Sullivan*), 2001-3.

Occasional Studentships to be held by men detached even from Demonstratorship work, Opinion in favour of (*O'Sullivan*), 2015-6.

Teaching work done by Demonstrators would be better done under direction (*O'Sullivan*), 2012-4.

Essential part of training of first class medical man (*O'Sullivan*), 1979; (*A. F. Dixon*), 2053-5.

Great body of investigators working under direction needed to cover field of inquiry (*O'Sullivan*), 1979.

Leisure needed for Professors and Assistants (*O'Sullivan*), 1967-9, 2011.

Nature of Work referred to—Post Graduate Research (*A. F. Dixon*), 2062.

Number of Men at present doing research work (*O'Sullivan*), 1983-4 (*A. F. Dixon*), 1985-6.

Physiology and Pathology, proposed Professorships in—Professors might devote some time to Research (*O'Sullivan*), 2030.

Scholarships leading on to Medical School, proposed—Scholarships in Experimental Science, &c. (*A. F. Dixon*), 1936-9.

School of Physic—

Incorporation in University of Dublin as Professional School in Faculty of Medicine—Claim of King's Professors (*Thompson*), 2171.

Opinion in favour of (*A. F. Dixon*), 1996; (*O'Sullivan*), 1997.

Title—"School of Physic in Ireland," Generally applied but incorrect title (*Thompson*), 2174.

School of Physic Act—

Abolition—Opinion in favour of (*O'Sullivan*), 1969-70.

Joint Committee representing various parties concerned to consider Act, proposed (*Thompson*), 2192.

Adjournment of Consideration by Commission in order that the parties interested might meet and see if they could arrange about points in dispute.

Opinion in favour of (*Thompson*), 2205, 2207-9, 2212-6.

Time required, Question of—A month to be allowed (*Thompson*), 2217-25.

College of Physicians, Co-operation of—Opinion that it would be quite possible to secure Co-operation (*Thompson*), 2203-4.

MEDICAL SCHOOL—continued.

School of Physic Act—continued.

Joint Committee representing various parties, &c.—*continued.*

Adjournment of Consideration, etc.—*continued.*

Expression of wish by the Commission would help matters considerably (*Thompson*), 2199, 2206.

Provisions unsuited to present conditions (*Thompson*), 2173, 2177, 2181.

Summary of Provisions (*Thompson*), 2171.

For particular Provisions, refer to Sub-headings, Financial Arrangements, Control and Management, &c.

Statement submitted by three members of Staff of Medical School, Second part.

Organisation proposed would do away with existing Dissatisfaction, and make all teachers feel that they were part of the same school (*A. F. Dixon*), 1992-4.

Suggestions were of two kinds, some requiring legislation, others not (*O'Sullivan*), 1969.

For particular suggestions refer to sub-headings, Financial Arrangements, &c.

Trinity Hall, Restoration to Trinity College, Question of—Correction of Statement xix. in Appendix to First Report (*Thompson*), 2241-5.

Women Students, *see* that title.

METHODIST CHURCH :

Claim for a Theological Faculty in connection with Trinity College (*Evans*), 5114, 5119.

Curriculum of existing Divinity School would be largely acceptable, special teaching of Pastoral Theology might easily be arranged (*Evans*), 5121-2.

Extent to which Witness represented Methodist Church (*Evans*), 5120.

Statement of Committee appointed by Conference of Methodist Church, Claim not mentioned in Explanation (*Evans*), 5115-9.

MIXED EDUCATION :

Advantages for both Roman Catholics and Protestants (*Synnott*), 1572-7; (*Gray*), 4124; (*Beare*), 4895; (*Browne*), 4915, 4933, 4987-5004, 5007, 5028.

Agriculture and Technical Instruction Department—Residential Colleges established—Catholic Bishops and Attendance of Catholics (*Culverwell*), 764 (p. 46).

Catholic Bishops, Attitude of—Trinity College—Condemnation of Proposal (*Trail*), 3; (*Delany*), 4258; (*Dunraven*), 4552 (p. 287).

University—No objection (*Culverwell*), 771.

Refer also to names of Schemes, SINGLE UNIVERSITY, etc.

Compulsory mixing quite impracticable, but if reasonable opportunity were given Students would mix naturally (*Synnott*), 1578.

Definition Question (*Synnott*), 1506, 1541 (p. 88); (*Chairman*), 1510; (*Fottrell*), 1729-30.

First Use of Phrase (*Synnott*), 1541 (p. 88).

No objection to a College with a tinge of Denominationalism in a University that was wholly Undenominational (*Magennis*), 3004-5.

Practice in Oxford, Cambridge and German Universities—First hand information urgently needed (*Synnott*), 1541 (p. 88).

Type of Mixed teaching acceptable to Catholic Lay opinion (*Magennis*), 3055-60.

Unacceptable not only to Catholics, but also to Presbyterians and Episcopalians (*Magennis*), 2931-2.

Refer also to titles MODIFICATION OF TRINITY COLLEGE, SINGLE UNIVERSITY, and SECOND COLLEGE WITHIN DUBLIN UNIVERSITY.

MODIFICATION OF TRINITY COLLEGE :

Concession might be made if it would solve the big question, but not for the sake of a limited number (*Trail*), 3, 7, 8, 40.

MODIFICATION OF TRINITY COLLEGE—continued.

Modification of Trinity College *plus* the creation of a University in Cork—Not a possible solution—Catholics refused to allow the agitation to be converted into a scheme for the betterment of Trinity College (*Magennis*), 3128.

Resolutions of 1903—Offer by Trinity College of facilities for Religious instruction of Catholic Students (*Bernard*), 328-30, 331-3, 353-5; (*Tarleton*), 334-5.

Modification on lines of—Difficulty of giving effect to Resolutions without consent and assistance of Roman Catholic Hierarchy (*Trail*), 9-19.

Refer also to titles SINGLE UNIVERSITY, SECOND COLLEGE WITHIN DUBLIN UNIVERSITY.

MULTIPLICITY OF UNIVERSITIES :

Expense involved, Low and varying value of degrees, etc. (*Dunraven*), 4552 (p. 288); (*Evans*), 5113.

Four Universities would not be too many in Ireland (*Anderson*), 3798.

Modern trend towards (*Hamilton*), 3615; (*Windle*), 3727.

Tendency towards in England and France—But Ireland was a poor country (*Dunraven*), 4565-6.

Over Stimulation of higher Education to be deprecated—Field for profitable employment of highly educated men was small (*Dunraven*), 4552 (p. 288).

Stereotyping provincialism and racial and religious differences (*Dunraven*), 4552 (p. 288).

MURPHY, REV. J. E. H.—*Professor of Irish in University of Dublin.*

Evidence, 3518-608.

N.

NATIONAL UNIVERSITY :

Condition essential to success of any Scheme—There must be one National University with nothing to accentuate existing racial or religious differences (*Dunraven*), 4552 (p. 287).

Dublin University, Nationalisation of—Claim meant secularisation of the University—Last possible way to "Nationalise," since all Ireland hated secularism (*Crozier*), 2401.

Idea, not word insisted on (*MacDermott*), 1334.

Meaning of Nationalisation—Removal of Divinity School and change in regard to Chapel services included (*MacDermott*), 1290-1.

Opinion in favour of (*MacDermott*), 1333. Presbyterian General Assembly's Resolutions, 1899, 1900, 1901 (*MacDermott*), 1289.

Trinity College was open to the world—Practically a lay College, Gradual change since abolition of tests (*Trail*), 87-8.

Refer also to titles SECOND COLLEGE WITHIN DUBLIN UNIVERSITY, SINGLE UNIVERSITY, etc.

Meaning of "National"—

Objections to word, Ambiguous expression in Ireland (*Trail*), 87, 94.

Only one University for the Nation—Disastrous proposal (*Madden*), 2546.

University open to all, Opinion in favour of (*Madden*), 2546.

Royal University might claim in some ways to be a National University (*Hamilton*), 3611; (*Windle*), 3731.

NORTH AND SOUTH OF IRELAND :

Comparative Readiness to give money contributions (*FitzGibbon*), 2261 (p. 126).

NUTTING, SIR J. :

Exhibitions offered by (*Trail*), 325; (*Mahaffy*), 2613-9, 2779; (*Gray*), 3909-10.

Offer of £5,000 for erection of a Chapel inside Trinity College (*Trail*), 327.

O.

OBSERVATORY:

Refer to title ASTRONOMER ROYAL, AND OBSERVATORY.

O'CONNOR, MR. C. A.:

Opinions and suggestions, references to (*Browne*), 5047, 5049.

O'DWYER, MOST REV. DR.:

Secondary Catholic Schools, Criticism of Religious training and Mental Equipment of Students (*Synnott*), 1543.

Catholic Clergy had entire Control and they were without University Education (*Synnott*), 1523.

O'FARRELLY, MISS—Representative of the Irish Association of Women Graduates:

Evidence, 4199-214, 4226-34, 4249.

O'SULLIVAN, DR. A. C.—Fellow of Trinity College, Dublin, University Lecturer in Pathology:

Evidence, 1965-84, 1987-9, 1997-2021, 2030-52.

P.

PARLIAMENT:

Acceptability to Parliament a condition of success for any Scheme (*Dunraven*), 4552 (p. 287).

PARLIAMENTARY REPRESENTATION OF TRINITY COLLEGE:

Power of Electing two members granted by Charter of James I., 1613 (*Madden*), 2441.

Power vested in members of Corporation of College (*Madden*), 2486.

PENSIONS:

Expenditure authorised—Amounts spent, Balance spent on Buildings and Equipment (*Gray*), 4009.

Insurance Premium—Amount necessary to secure £100 a year for life from the age of 63—No reason why members of the Staff should not pay it themselves (*Traill*), 316.

Liberal treatment so far as was possible, Opinion in favour of (*Traill*), 316.

Pension or Lump Sum invariably granted to Officers and Servants when they were incapacitated—Instances given (*Gray*), 3992, 3994.

Refer also to titles FELLOWS AND FELLOWSHIP SYSTEM, AND PROFESSORIAL.

PHILOSOPHICAL SOCIETY:

Age, Number of Members, etc. (*Beare*), 4864.

PHILOSOPHY:

No organised faculty of Philosophy—Criticism of Course, etc. (*Magennis*), 3111, 3152-8, 3173-6.

Teaching, Inadequate Provision for (*Magennis*), 3168-72, 3200-1.

PHYSICAL SCIENCE:

See SCIENCE.

PHYSICIANS, COLLEGE OF, IRELAND:

Medical School of Trinity College, Relations with, see MEDICAL SCHOOL.

POOR LAW MEDICAL SERVICE:

Handicap on Trinity College men (*O'Sullivan*), 1945, 2050-2.

Localities from which Trinity Students were drawn, Possible cause of Handicap (*A. F. Dixon*), 1958-9.

Non-holding of posts no reproach to Medical School (*A. F. Dixon*), 1946, 1956.

Number of Trinity men obtaining posts much larger under former Local Government System (*A. F. Dixon*), 1961-3.

Question for Consideration of Parliament (*Synnott*), 1665.

Improvement—Hopeless as long as posts were given on other grounds than those of good Qualifications (*A. F. Dixon*), 1946.

POOR LAW MEDICAL SERVICE—continued.

So bad that men were advised not to go in for it (*A. F. Dixon*), 1928.

Refer to title CATHOLIC UNIVERSITY MEDICAL SCHOOL—Poor Law Appointments.

POST-GRADUATE STUDY:

See RESEARCH AND POST-GRADUATE STUDY.

PRAGUE, CZECH UNIVERSITY IN:

(*Delany*), 4285-6, 4379.

PRESBYTERIAN THEOLOGICAL FACULTIES:

Right to grant Divinity Degrees (*MacDermott*), 1358-9.

PRESBYTERIANS:

Divinity School, Separation from University proposed, see DIVINITY SCHOOL.

Geographical Distribution (*Crozier*), 2404.

Number elected to Fellowships of Trinity—three in last nine years (*MacDermott*), 1475-7.

Scottish Universities, Theological Faculties in—Church had made no declaration on the subject (*MacDermott*), 1308.

PRIMARY SCHOOLS:

Science being deliberately killed out (*M'Mordie*), 2589.

PRIVATE TUTORS:

See RESIDENT MASTERS.

PRIZES FOR STUDENTS:

Inadequate provision for at Dublin University (*M'Mordie*), 2595.

Refer also to title IRISH SUBJECTS.

PROCTOR—SENIOR PROCTOR:

Duties (*Traill*), 152 (p. 10), 193; (*Leech*), 3213 (p. 198).

Sinecure Office (*Leech*), 3212 (p. 198).

PROFESSIONAL SCHOOLS:

Provision for, see title TYPE OF UNIVERSITY.

PROFESSORIAL:

Amount of work expected varied greatly from a very small amount to a man's whole time (*Mahaffy*), 2693-6.

Books for Curriculum, Choice of, by Professors (*Joly*), 848, 928-31.

Supervision by Faculties or some such expert Body advisable (*Joly*), 848.

Claims of Scheme submitted to Commission, see sub-heading Corporation and refer to titles FELLOWS AND FELLOWSHIP SYSTEM, READERSHIPS, GOVERNING BODY.

Corporation, Claim for Membership of—

Extending subjects of Fellowship Examination proposed—Professors could then win their places (*Gray*), 4104.

Number of Professors signing Statement—nine out of twenty-nine (*Gray*), 3972.

Practical difficulties, King's Letter would have to be accepted on behalf of the Corporation (*Madden*), 2445, 2448, 2454.

Cases cited—"King v. the Vice-Chancellor of Cambridge University" and case in connection with Queen's University (*Madden*), 2446-7.

Professors who were not Graduates, Position of (*Gray*), 3972.

Oxford and Cambridge, Position at—College appointment carried College privileges, University appointment carried University privileges (*Jackson*), 3973-80, 3983, (*Chairman and Raleigh*), 3984-7.

Putting Professors on Foundation of College without giving them Status of a Fellow proposed—No objection (*Beare*), 4849-50.

Council, Representation on—

Representation on a strengthened Council proposed—Professors had already as much power on the Council as witness had on the Board (*Gray*), 4110-1.

Restriction in so far that persons elected must be Members of the Senate (*Beare*), 4749-55.

PROFESSORIAL—continued:

- Dual Professorships, *see* title SECOND COLLEGE and SINGLE UNIVERSITY.
- Election of Professors—
 - Board, Appointment by—
 - Assistant Lecturers, Appointment independently by the Board alleged—The Board never elected Assistants without a strong Recommendation from Professor concerned (*Gray*), 4009-10.
 - Divinity Professors all appointed by the Board (*Bernard*), 649.
 - Instances of (*Gray*), 3945.
 - Cambridge Method (*Jackson*), 2341.
 - Care needed in framing Electoral Body (*FitzGibbon*), 2338, 2341.
 - Council, Election by (*Gray*), 3942.
 - Arts Professors (*Trails*), 184-6.
 - Council nominated and Board confirmed (*Madden*), 2527; (*Mahaffy*), 2759.
 - Regius Professors of Physics and Surgery (*Trails*), 184-6.
 - Examination System not the best (*Beare*), 4892.
 - Outside Specialists, Question of bringing in (*FitzGibbon*), 2339-41; (*Mahaffy*), 2760-3.
 - Practically by voice of the whole Body (*Gray*), 3942.
 - Salmon's, Dr., Opinion in favour of existing system (*Gray*), 4004.
 - Financial Business of College, Ignorance of (*Gwynn*), 970.
 - Illness, Incapacitation from—Provision for, proposed—Cost, etc. (*Joly*), 831-6.
 - Incomes—
 - Divinity Professors, Reduction of Salaries proposed, Out of proportion to those of other Professors (*Leech*), 3224-6.
 - Grievance of some of the Professors that they received no dividends from the Fees which they helped to earn (*Leech*), 3212.
 - Inadequate Stipends in many cases (*Gwynn*), 1090; (*A. F. Dixon*), 1990.
 - Restricting number of Candidates (*A. F. Dixon*), 1990.
 - Facts required to justify assertion (*Gray*), 4004.
 - Salaries should be raised if they were inadequate (*Beare*), 4732 (p. 299), 4852.
 - Large Professors had better incomes than most of the Junior Fellows—Pay of a Professor depended partly upon the number of his Students (*Trails*), 263.
 - Minimum Value to be attached to each Chair proposed (*A. F. Dixon*), 1990-2.
 - Nationality Question—Irishmen to be preferred but interest of the Chair must be considered first (*Beare*), 4756-7.
 - New Professorship, Creation of—Council could prevent it though the Board had to pay if created (*Beare*), 4775-6.
 - Number, Increase in during last fifty years (*Beare*), 4733-8.
 - Pensions—£350 at 65 years of age, proposed.
 - Age of Retirement—Making retirement compulsory at 65 unless the Governing Body should determine otherwise, preferable to optional retirement at 65 (*Joly*), 914-7.
 - Amount to be same in all cases (*Joly*), 880.
 - Cost (*Joly*), 820-7, 878.
 - Contribution by Professors—Difficulty in case of badly paid Chairs (*Joly*), 879.
 - £8 10s. per £100 would be insufficient (*Gray*), 3994-5.
 - Minimum Period of Service to be required (*Joly*), 911-3.
 - Temporary Arrangement applying only to existing Professors (*Joly*), 870-2, 874, 876.
 - Reason for Special Arrangement in regard to present Body of Professors (*Joly*), 934.
 - Principal Chairs, List of (*Joly*), 802-3.
 - Professorial System of Teaching —
 - Much the best for Pass Students (*M'Mordie*), 2595.
 - Opinion in favour of a system of instruction embracing both Tutorial and Professorial System (*Rolleston*), 3401.

PROFESSORIAL—continued:

- Professors not Graduates of Trinity College—
 - Honorary Degrees universally given (*Beare*), 4881.
 - Status given by Degrees—Professors enabled to become Members of Senate (*Beare*), 4912.
 - Not many such (*Beare*), 4880.
 - Outsiders—Appointment of in some cases (*Trails*), 241.
- Religious Questions, *refer* to titles RELIGIOUS FREEDOM OF TRINITY COLLEGE, also SECOND COLLEGE and SINGLE UNIVERSITY.
- Research, Position in regard to—Lack of time, assistance required, etc. (*Joly*), 1219.
- Resignations, causes of (*Gray*), 4004, 4079.
- Second College, Scheme, *see* title SECOND COLLEGE.
- Status—No Status and no Rights (*Gray*), 4100-2.
- Only possible position as Trinity College was constituted (*Gray*), 4103.
- Tenure—
 - Ad vitam aut culpam*—Very few (*Mahaffy*), 2784-5.
 - Existing Tenure—Re-election every five or seven years, Uncertainty of Position (*Joly*), 828-9, 837-8; (*Mahaffy*), 2784.
 - Challenge to Dr. Joly to name a case of arbitrary dismissal (*Gray*), 3995.
 - Difference between a Professor and a Tutor Fellow—Inefficiency of an ordinary Tutor did not affect a large number, but a Department went to the wall if its head became inefficient (*Trails*), 315.
 - Prejudicial effect on number and character of applicants for Chairs (*Joly*), 830-1, 839-41.
- Life Tenure—
 - Honorary Fellowship with Life Tenure and Increase of Salary for Professors of long standing proposed (*Beare*), 4732 (p. 299), 4851.
 - Injurious to teaching, Professors being experts engaged to teach in a particular department (*Gray*), 3990, 3993.
 - Power of the Board to give Life Tenure —Pensions given on dismissal to all Professors who had held office for a considerable time—Instances given (*Gray*), 3990, 3992, 3994.
 - Medical Professors, Power to elect for a term of years only—Objections in some quarters to making them Professors for life (*Trails*), 315.
 - Provisional Appointment for 3 years—Doubtful if any man of real merit would accept a Professorship on those terms (*Leech*), 3212 (p. 198).
 - Right of Appeal to Visitors for any Professor of five or seven years' standing proposed (*Beare*), 4732 (p. 299).
 - Robertson Commission Recommendations (*Joly*), 842-7, 858.
 - Seven years much the better term given a staid Governing Body, but given a Governing Body elected every three years —Position of the Professors might be very different (*Mahaffy*), 2786-9.
 - Undisturbed as long as Professor was able to discharge his duties (*Gray*), 4004.
- University distinct from College matters, Powers and Duties in regard to—Should there be any distinction between Professors and Fellows? (*Joly*), 881-2.
- University Professors—
 - Board, Election by (*Joly*), 1073.
 - Council, Election by, proposed (*Jackson*), 1074.
 - Really College Professors (*Madden*), 2454, 2486; (*D. F. Browne*), 5018-20.
 - Trinity Professors were at present called University Professors and the heads of Schools were University Professors (*Trails*), 150.
 - Whole time Professors, Number of (*Joly*), 800, 860-2. ...

PROTESTANT PEOPLE OF THE UNITED KINGDOM:

Acceptability to Protestants a condition essential to success of any University Scheme (*Dunraven*), 4552 (p. 287).

PROVOST:

Election of—

Crown, Power of Appointment secured to—Strafford's Reforms (*Madden*), 2442.

Originally elected by Fellows (*Madden*), 2440.

Restoration to Fellows, if Test Act were to apply in every event, proposed (*Traill*), 2416.

House and Garden, Handing over for the use of Women Students proposed (*Leech*), 3239-42, 3306.

Income, Reduction of proposed (*Leech*), 3239.

Open without Test if Trinity College was to be sole College and University (*Traill*), 2416.

Powers of—Veto on Degree (*Madden*), 2451.

Protestant Provost—Reasonable Claim if Roman Catholics were to have a separate College (*Traill*), 2416.

Q.**QUEEN'S COLLEGES:**

Boycott, Removal of—Condition upon which public money might be spent upon a denominational College (*Traill*), 3, 35, 48.

Fundamental Principles, Maintaining in their Integrity—Resolution of General Assembly of Presbyterian Church, 1872 (*MacDermott*), 1287.

Injury to work by overthrow of 1879—Abolition of rule as to Residence, etc. (*MacDermott*), 1417.

Trinity College had profited to a certain extent (*MacDermott*), 1478.

Professorial System—Compulsory attendance at Lectures the distinguishing feature of Queen's Colleges (*Anderson*), 3798.

Professors—

Declaration against teaching anything contrary to Christianity (*Joly*), 855; (*Delany*), 4346-8.

Sources of Supply, etc. (*Windle*), 3771.

Royal University, Disappearance of—Position of Queen's Colleges (*Bernard*), 412-4, 499.

Science programme not comprehensive enough (*M'Mordie*), 2590.

Theological Faculty, Absence of (*MacDermott*), 1284, 1414, 1418.

QUEEN'S UNIVERSITY:

Abolition of University due to its Undenominational character (*M'Mordie*), 2590.

Examination System—Perfect System (*M'Mordie*), 2595.

Re-creation out of Queen's College proposed (*Delany*), 4302.

R.**READERSHIPS, SCHEME FOR INSTITUTION OF:**

Change of Name from Studentship, Reason for (*Gwynn*), 1114-5.

Choice of Subjects, Possible Influence on (*Joly*), 1177-9.

Duties, *see* sub-heading Teaching Work.

Examination for Readership—Subjects (*Joly*), 1181.

Fellows, Mode of Election in connection with Readerships (*Joly*), 1004-6, 1054; (*O'Sullivan*), 2038.

Funds for—Madden Prize, Conversion of, proposed (*O'Sullivan*), 2032, 2034-7, 2039.

Junior Fellowships, Distinction from (*Joly*), 1050.

Object of Appointments—

Encouragement of Post-Graduate work (*Joly*), 1051.

Same idea as in the case of Provisional Fellows—to reject them if not liked (*Traill*), 200.

Objection—Readers' position would be very much that of private teachers in the University and they were likely to remain in that position (*Beare*), 4873-4.

READERSHIP, SCHEME FOR INSTITUTION OF—continued:

Opinion in favour of with a view to Post-Graduate Research, Objection if Fellowship Examination were kept up (*Leech*), 3212 (p. 198).

Plan on which Readerships would be awarded—No difficulties (*Joly*), 1182-3.

Qualifications for, proposed (*Joly*), 1047; (*Gwynn*), 1118.

Research, Encouragement of, *see* RESEARCH.

Teaching Work—

Research Work, Question as to time for (*Gwynn*), 1115-8.

Teaching in Arts or acting as Assistant to any of the Chairs—Duty of Reader (*Joly*) 1048-9; (*Gwynn*), 1119-20.

Value of teaching by young men (*Jackson*), 1122.

Weakening public Confidence in teaching of the University, Possibility of (*Joly*), 1121.

REFORM SCHEMES AND STATEMENTS:

Abolition the Keynote of (*Gray*), 3929-30.

Conditions essential to success (*Dunraven*), 4552 (p. 287).

Criticism of—Doctrinaire Grievances and Doctrinaire Remedies put forward (*Gray*), 3932.

Statements 1 and 2 practically unanimous, but no other scheme had a majority of Senior Fellows (*Gray*), 3964.

refer also to names of Schemes.

REGISTRAR:

Auditor and Registrar, *refer* to title AUDITOR.

Functions of Registrar (*Chairman*), 961, 963 (*Leech*), 3212.

Permanent Official better than one elected from year to year as at present (*Traill*), 152 (p. 9.)

REGISTRAR OF LADY STUDENTS IN TRINITY COLLEGE:

Functions of (*Miss Gwynn*), 2069, 2073.

RELIGIOUS ATMOSPHERE OF TRINITY COLLEGE:

One-sided place for a Presbyterian—Power of Student to select his own tutor, did not solve the difficulty (*MacDermott*), 1334-7, 1442-5, 1467-72.

Protestant Atmosphere (*Bernard*), 471.

Balfour's, Mr., desire to maintain (*MacDermott*), 1490.

RELIGIOUS FREEDOM OF TRINITY COLLEGE:**Equality for all creeds—**

Catholic claim was a claim not for equality but for privilege (*Bernard*), 390-5.

Many Roman Catholics had entered Trinity College—Not one known to have become a Protestant (*Bernard*), 397-400.

Opinion in favour of (*Bernard*), 389.

State regarded matters as equal, because equality of opportunity was offered (*Bernard*), 396.

Liberal ideal of the Trinity College System—Every prize, etc., was open to all comers (*Bernard*), 465-70.

No ecclesiastical authority had the slightest authority—Professors had absolute freedom in teaching Science, etc. (*Traill*), 56-61.

Question of where and how far a Professor might be interfered with (*Traill*), 62-5; (*Bernard*), 382-8.

Tests, Abolition of—

Presbyterian Assembly's Resolutions of 1872-3 (*MacDermott*), 1341-2, 1345.

Very little more use made of Trinity College by Presbyterians after Fawcett's Act than before—Explanation (*MacDermott*), 1343-5.

RELIGIOUS QUESTION IN IRELAND:

Less to do in causing difficulties between individuals meeting for other purposes than in other countries (*Dunraven*), 4692-4.

RELIGIOUS OVERSIGHT OF STUDENTS BY DEANS OF RESIDENCE:
see DEANS OF RESIDENCE.

RESEARCH AND POST-GRADUATE STUDY:

- Accommodation and Equipment Difficulty (*Thrill*), 1232, 1238, 1258.
- All a question of Finances (*Joly*), 1212-4.
- Expenditure on Laboratories and Buildings of money authorised to be spent on pensions (*Gray*), 4009.
- Annual Report by Heads of Departments to Board or Faculties on work carried out in each Department, proposed (*H. Dixon*), 1240.
- Arts—No Endowment and no Professors with sufficient time at their disposal (*Thrill*), 321-3.
- B.Sc. for Research—No B.Sc. at Dublin (*Thrill*), 1258.
- Done over and above ordinary College Work—No pecuniary advantage (*Thrill*), 262.
- Duty of a University—Extent to which it was the duty of a University to provide for Research (*O'Sullivan*), 2044-6; (*A. F. Dixon*), 2063-5.
- Encouragement of—
 - Man engaged in Research was relieved of other duties as far as possible (*Thrill*), 262.
 - No regular system, Encouragement given whenever a special occasion arose (*Thrill*), 320.
- Endowment Question (*Joly*), 1215; (*Thrill*), 1227, 1258; (*M'Mordie*), 2581.
- College and University at present spent nothing—only provision made by private Endowments (*M'Mordie*), 2581.
- Elementary Research carried on by Candidates for Moderatorships—Inadequate endowment (*Thrill*), 1229.
- Fellowship Question, relation to (*Joly*), 1216-8.
- Present Examination System barred out all practical and research work—Widening of basis of Election of Fellows needed (*Thrill*), 1223-4; (*H. Dixon*), 1238-40; (*Whittaker*), 1250.
- FitzGerald Memorial Scholarship the only provision (*Joly*), 1220.
- Lack of time, Severity of work falling on Head and Staff of Physical Science Schools, Excessive Routine Work, etc. (*Thrill*), 1231-2, 1238.
- State aid—Opinion that part or all of the expense should be borne by the State (*O'Sullivan*), 2043, 2047; (*Gray*), 4005-9.
- Examination for higher degrees, making Research an essential part of examination, proposed (*H. Dixon*), 1239-40.
- Foreign Post-Graduate Students (*Joly*), 1262; (*Whittaker*), 1262; (*Thrill*), 1262.
- Medical School, Research, in connection with, see title MEDICAL SCHOOL.
- Openings for men doing Research Work, Scarcity of, Dublin Castle importing experts to teach Physical Sciences, though qualified Trinity men had applied (*Thrill*), 1227-9.
- Professors, Position of—Research crowded out for lack of Assistance (*Joly*), 1219.
- Progress at Trinity—Bringing a Second College in to assist would be an insult to the Trinity Staff (*Thrill*), 122.
- Readerships as a means of encouraging Research—Further Endowment needed (*H. Dixon*), 1239.
- Opinion in favour of (*Thrill*), 1233; (*H. Dixon*), 1239; (*Whittaker*), 1250.
- Teaching Work, Limitation of, necessary (*Gwynn*), 1115-7.
- Religious Supervision of Scientific teaching and speculation proposed by Document III.—Disastrous innovations so far as Research was concerned (*H. Dixon*), 1239.
- Students doing research work—Recent idea (*Joly*), 1212.

RESIDENCE AND ATTENDANCE AT LECTURES, QUESTION OF:

- Attendance at one or two courses of lectures to be required, proposed (*Bernard*), 604, 629, 646-8.

RESIDENCE AND ATTENDANCE AT LECTURES—continued:

- Attendance, etc.—continued.
- Loss of a few Students, but value of degree increased (*Bernard*), 630-1.
- Small amount, but better than nothing—Some went without any teaching (*Bernard*), 721.
- Control of Residence—
 - Duty of certain Fellows only (*Joly*), 882.
 - Governing Body as responsible power, Opinion in favour of (*Joly*), 885.
- Desirable to have Residential College (*Bernard*), 475; (*Magennis*), 2954.
- Difference from conditions at Oxford or Cambridge—Majority of Students living at home (*FitzGibbon*), 2325.
- Expansion of Trinity as a Residential College, Possibilities of (*Gray*), 4121-3.
- Hostels for Men Students, proposal—
 - Disciplinary Difficulties (*Gray*), 4060.
 - Divinity Students, Question of (*Bernard*), 677-8.
 - Poorer Students, Hostel for—Objection to advertising poverty (*Gray*), 4060.
- Licensed Lodgings, Opinion in favour of (*Bernard*), 679.
- Number resident in Trinity College, Number resident in Dublin (*Thrill*), 120-1.
- Opinion in favour of general application of Residential principle in event of a revision of the University System of Ireland (*Bernard*), 416.
- Period of—Number of Students residing 4 or 3 years or less (*Gray*), 4059-62.

RESIDENT MASTERS:

- Appointment, Method of (*Johnston*), 1761-3.
- Choice of Tutor rested with Under-graduate (*Johnston*), 1768-70.
- Class of work—Ordinary and Honour work (*Johnston*), 1743.
- Pass men resorted largely to private tutors, and worse Pass men more than the better men (*Johnston*), 1787-8.
- Witness taught mainly Honour men (*Johnston*), 1785-6.
- Fees paid by (*Johnston*), 1790-2.
- "Grinders"—Colloquial but hardly polite term—"Private Tutors" the correct and courteous title (*Johnston*), 1742.
- Informality of Teaching, Advantage of (*Johnston*), 1776-7.
- Number (*Johnston*), 1789.
- Other Persons than Resident Masters acting as Private Tutors (*Johnston*), 1767, 1781-4.
- Permanent Post (*Johnston*), 1765-6.
- Position—No recognised position, No part in College life (*Johnston*), 1743, 1788-90.
- Certain amount of College lecturing in order to give them a position, proposed (*Johnston*), 1778.
- Readerships, proposed establishment of—If private tutors were made eligible it would do much to remove hardship of their position (*Johnston*), 1743.
- Proportion of men resorting to Private Tutors (*Johnston*), 1744-6, 1771-2.
- Remuneration—Fees received from Students (*Johnston*), 1747-8.
- Amount of Fees fixed by Custom (*Johnston*), 1764.
- Subjects taught (*Johnston*), 1743, 1774-5, 1793-6A.

RESOLUTIONS OF 1903:

- see MODIFICATION OF TRINITY COLLEGE.

RESPONDENCIES:

- (*Mahaffy*), 2648, 2660, 2662.

REVENUE AND EXPENDITURE:

- see FINANCE.

ROBERTSON COMMISSION SCHEME:

- Matters taken before Robertson Commission not to be gone into by present Commission (*Chairman*), 1488, 1494.
- Relevancy Question (*MacDermott*), 1293-5.

ROLLESTON, MR. T. W.—Representative of the Gaelic League:

- Evidence, 3385-480.

ROSS, LORD:

Memorandum on the Fellowship System, Agreement with views expressed (*Trail*), 166-8.

ROYAL UNIVERSITY:

Apparatus, Collection of, not used for Teaching at all (*M'Weeney*), 2828-34.

If the apparatus were given to the Catholic University Medical School for Educational Work, would it be possible to withdraw apparatus for Examination purposes? (*M'Weeney*), 2857-64.

Books and Lectures provided for the Students of Queen's College, Belfast, and University College—Witness did not know if any difficulty had arisen (*Bernard*), 489.

Catholic Bishops requiring Students to go through University, Number of—Maynooth Students taking First Arts in 1906 (*Delany*), 4357.

Change in position of Royal University (*Delany*), 4358.

Catholic Lay opinion—Strong dislike of the Royal University (*Magennis*), 3028-9.

Curriculum identical in Constituent Colleges because imposed by University (*Delany*), 4328.

Objections to the Senate System of Government (*Magennis*), 3003; (*Delany*), 4329-30.

Degrees—

B.A.—Value of (*D. F. Browne*), 5031-2.

Divinity Degrees, no connection with (*MacDermott*), 1361.

Inferior in value to those of Dublin University (*Dunraven*), 4552 (pp. 287-8), 4613-4.

Denominational Control (*M'Mordie*), 2586, 2590.

Dunraven Scheme—

Destruction involved in (*Hamilton*), 3611; (*Windle*), 3731.

Senate's Resolution opposing (*Hamilton*), 3626-9.

Endowment—Drawn from Funds of late established Church of Ireland, not really from State Exchequer (*Hamilton*), 3611.

Examinations—

Common to all Constituent Colleges—Subjects absolutely uniform (*Hamilton*), 3671-2; (*Delany*), 4326.

Examiners—not necessarily one Protestant and one Catholic (*Delany*), 4327.

Matriculation, Intermediate and Graduation Examinations (*Hamilton*), 3666-70.

Standard a good deal higher than at Trinity (*Delany*), 4381.

Matriculation Standard—Higher than Standard of Entrance Examination at Trinity College (*Miss Gwynn*), 2141-2.

Examining Body only, Teaching only through Colleges to which it appointed Fellows (*O'Farrelly*), 4226-7; (*Dunraven*), 4552 (p. 287), 4605.

Future of in the event of a Roman Catholic University of a Modern Type—Hope that the Royal University would disappear, Degradation of the whole idea of University Education in Ireland (*Bernard*), 411, 415.

Governing Body constituted half of Protestants and half of Catholics—Arrangement had worked smoothly (*Magennis*), 3000-2; (*Hamilton*), 3633-4; (*Windle*), 3731.

Growth as a whole and growth of Catholic element—Tables handed in (*Delany*), 4469-73.

Law School Grievance—Law Students obliged to take a degree at Trinity College (*Delany*), 4481-2.

Not really a University (*Archdall*), 2399.

Number of Students as compared with Trinity—Difference in cost of degrees (*Gray*), 4141-3.

Protestant Students, Number of (*Gray*), 4142, 4146.

Outside Scope of Commission—Question whether the matter of what Colleges were available for Affiliation would bring it within the scope of the Commission (*Archdall*), 2400; (*Chairman*), 4205.

ROYAL UNIVERSITY—continued.

Philosophy—Alternative Courses, successful working of system (*Delany*), 4368-9.

Science deliberately crushed by Indirect Methods (*M'Mordie*), 2583.

Senate—Value attaching to opinion of (*Hamilton*), 3629.

Separate College for Catholics in connection with the Royal University, proposed.

Catholic Attitude—

Bishops, Approval of (*Bernard*), 379-81; (*Synnott*), 1511, 1707.

Not an echo of approval from one end of the country to the other (*Synnott*), 1707.

Cork or Maynooth suggested as a suitable site for the College (*Trail*), 3, 46-8, 92-3.

Not to be run on same lines as Trinity College, suggested—No room in Dublin for two open Colleges (*Trail*), 3.

Provostship of Trinity College in that case should be given to a Protestant (*Trail*), 2416.

Removal of boycott against Trinity College and the Queen's Colleges—Condition suggested (*Trail*), 3, 35, 38, 85.

No public money to be given except on removal of boycott against Trinity College, &c. (*Trail*), 3, 8, 48.

Royal University spoken of as a reformed Royal on Academic lines (*Delany*), 4306.

Second College in Dublin University, Comparative Merits of the two Schemes (*Culverwell*), 792-3; (*Synnott*), 1544-5; (*Magennis*), 2982-91, 3165-7; (*Delany*), 4291-2, 4302-3, 4336; (*D. F. Browne*), 4929, 5027.

Bringing together Students of the two Denominations, Question of (*D. F. Browne*), 4915, 4933, 4987-5004, 5007, 5028-9.

Catholic Opinion (*Magennis*), 3028-9; (*Delany*), 4295-6; (*D. F. Browne*), 4934, 4941, 5042-5, 5047, 5049.

Objection to Dublin University as founded expressly to teach the youth of Ireland the Protestant religion (*Delany*), 4297-301.

Educational Question—

College in the Royal would mean levelling down, while a College in the University of Dublin would be levelling up (*D. F. Browne*), 5029.

Scheme of Education in the Royal better suited to needs of the country and more elastic, not tied by tradition as in Trinity College (*Delany*), 4302.

Royal University started for express purpose of doing something for Catholics, and it had always worked harmoniously with the Queen's Colleges (*Delany*), 4301.

Scheme would soon end in what the Robertson Commission itself felt to be the proper solution—three Universities (*Delany*), 4302, 4304.

University College, no radical change involved in (*Delany*), 4302.

Want of balance between a College in Dublin and the other Colleges in the University—College on the spot would dominate the University (*Leech*), 3362-4.

South of Ireland, Hold on, as compared with Trinity College, Dublin—Number of Graduates, &c. (*Windle*), 3731.

Successful within its limits—Claim in some ways to be the National University (*Hamilton*), 3611; (*Windle*), 3731.

University College, Connection with, refer to UNIVERSITY COLLEGE.

Women—

Admitted from the beginning (*Madden*), 2477.

Excluded from certain lectures in one of the Teaching Colleges (*O'Farrelly*), 4228.

ROYAL UNIVERSITY, FEDERATION SCHEME IN CONNECTION WITH (ROBERTSON COMMISSION SCHEME).
 Autonomy of Colleges, Extent of (*Hamilton*), 3674; (*Windle*), 3730; (*Anderson*), 3815, 3817-9.
 Curricula—Reasonable uniformity in Standard subjects with power for each College to develop along its own lines in less fundamental subjects (*Windle*), 3750.
 Degrees—each College to have right of conferring (*Hamilton*), 3620-1; (*Windle*), 3730.
 Distinctive Features of Scheme as contrasted with Dunraven Scheme.
 Bond between different sections of the people greater in Dunraven Scheme than in a Federated Royal University (*Dunraven*), 4702, 4704.
 Constituent Colleges would be as nearly as possible Universities without the name (*Hamilton*), 3637-8.
 Denominational recognition, one College would be officially Catholic (*Dunraven*), 4705-9.
 Fees—Royal University catered largely for people of limited means, whereas Dublin degrees were expensive (*Hamilton*), 3648.
 Trinity College, Exclusion of (*Dunraven*), 4697-701.
 Two Universities instead of one (*Hamilton*), 3637, 3643-5, 3648; (*Dunraven*), 4552 (p. 288).
 Dublin, New College in—There should be a College adequately equipped and endowed to meet wants of Roman Catholics (*Anderson*), 3798.
 No objection, if College were constituted on right lines (*Hamilton*), 3649.
 Dublin University would suffer (*Hamilton*), 3689-94; (*Dunraven*), 4703.
 Examinations—
 Alternative Examinations of equal value, each College arranging its own curriculum with approval only of Senate of the University (*Hamilton*), 3619, 3703.
 Autonomy in Examinations, Extent of (*Anderson*), 3815, 3817-9.
 Board of Studies to report on Standard of Schemes of Studies submitted, Controlling power for the Senate in examinations (*Delany*), 4332-3.
 Common Examinations as in Royal University at present (*Hamilton*), 3673, 3703-6.
 Extern Examiner to be joined with teacher of students in all cases (*Hamilton*), 3703; (*Windle*), 3730, 3746-7.
 Sense in which Examiners should be extern (*Hamilton*), 3716-7; (*Windle*), 3748.
 Joint Examinations necessary for distinctly University Prizes, such as Fellowships, &c. (*Hamilton*), 3718.
 Matriculation should be under control of University (*Hamilton*), 3662-4; (*Windle*), 3733.
 Uniform Minimum Standard should be guaranteed by University (*Windle*), 3735; (*Delany*), 4334-5.
 Fees Question—No objection to different Fees in different Colleges except in Dublin, where it would imply a social difference (*Windle*), 3791-4.
 Foundation for a Federal University, Royal as, Experience of Officials might be useful (*Dunraven*), 4607.
 Inferior value of degree (*Dunraven*), 4552 (p. 288); 4613-4.
 Governing Body—
 Addition of Representatives from the different counties, &c. proposed (*Anderson*), 3816.
 Advantage of Members elected in Dublin Question—No difficulty had arisen in Royal University (*Hamilton*), 3623-5.
 Powers and Functions (*Windle*), 3730, 3732-5.
 Honours Courses would be very similar in all Colleges (*Hamilton*), 3707-8, 3710.
 Inacceptable to Parliament—Too elaborate and expensive (*Dunraven*), 4552 (p. 288), 4611-2.

ROYAL UNIVERSITY FEDERATION SCHEME—continued:
 Inter-Collegiate Competitions except in Athletics to be deprecated (*Windle*), 3730, 3736, 3756.
 Objection to Federalisation applied only in appearance since Constituent Colleges were to be as nearly as possible Universities (*Hamilton*), 3616-8.
 Opinion in favour of (*Hamilton*), 3631; (*Anderson*), 3798, 3803-5, 3815, 3820-4; (*Delany*), 4337.
 Preferable to Dunraven Scheme (*Hamilton*), 3612.
 Cork, Opinion in (*Barrett*), 3837.
 Professors, University as distinguished from College Professors—Not possible under existing Conditions (*Hamilton*), 3709, 3712.
 Same objection would apply under Dunraven Scheme, though not as between two Colleges in Dublin (*Hamilton*), 3713-5.
 Religious Question only came in in reference to tenure of Officers of the College (*Bernard*), 376-8.
 Students not attached to any College, Case of—Degrees should not be given (*Hamilton*), 3676-9.
 Teaching University—
 All Colleges would be Teaching Colleges (*Hamilton*), 3675.
 Extent to which Autonomy was consistent with control of Teaching Body—In the last resort, Senate must have the supreme power (*Hamilton*), 3657-61.
 Method by which University could become an actively teaching body—Professors in Colleges should be constituted University Professors (*Hamilton*), 3652-6.
 Resolution of the Senate (*Hamilton*), 3612.
 Theological Faculty Question—The ideal was not always attainable, certainly in Ireland (*Hamilton*), 3719-24.
 Transition Stage leading towards formation of independent Universities, Use as (*Hamilton*), 3646.
 Final Settlement desirable if possible—Robertson Scheme excellent for a time, but for how long it was hard to say (*Windle*), 3784-5.
 Four Universities would not be too many in Ireland (*Anderson*), 3798.
 Friction, Possibilities of, if one College were ready to drop off as a University before another—A matter of conjecture could hardly be legislated for (*Hamilton*), 3698-702.
 Robertson Scheme much more likely to lead to desired outcome than Dunraven Scheme (*Windle*), 3739.
 Trinity College as a member of Federation—No change at all likely to be made would make Trinity a useful member (*Hamilton*), 3665; (*Windle*), 3740, 3751.
 Two Universities in same city.
 Not Ideal, but not unknown (*Windle*), 3741.
 Rivalry would be less than between Trinity and a New College in Dublin University (*Windle*), 3742-3.
 University Powers and Functions—Control similar to that exercised by General Medical Council, proposed (*Windle*), 3745.

S.

ST. PATRICK'S, COLLEGIATE CHURCH OF:
 Origin of—Reorganisation as Cathedral after Disestablishment (*FitzGibbon*), 2260 (p. 126).
 SALMON, LATE REV. DR.:
 Academic Council, the Child of (*Gray*), 3933.
 Exclusion from Corporation on resigning Fellowship (*Gray*), 3997-4001.
 Governing Body of Trinity College, Tribute to, as at present constituted (*Gray*), 3997.
 Openness of Trinity College—Dictum wide of the Mark (*MacDermott*), 1284.
 Professors, Method of Appointment—Opinion in favour of existing System (*Gray*), 4004.
 Specialist able to act as Professor in subjects widely different (*Beare*), 4882-4, 4901-4.
 SANITARY ARRANGEMENTS AT TRINITY COLLEGE:
 Defects in, keeping Students away alleged (*Mahaffy*), 2610-1.

SCHOLARS :

- Improvement in Financial position and stiffening up of Scholarship Examination, proposed (*Leech*), 3242-51, 3281-90, 3338-45.
- Position of, as members of the Corporation (*Joly*), 919-21, 924; (*Madden*), 2513, 2518, 2520-3.

SCHOLARSHIPS AND EXHIBITIONS :

- Additional Exhibitions not attracting additional Students alleged (*Mahaffy*), 2773-6; (*Gray*), 3908-9.
- Bringing Boys from Primary Schools to Secondary Schools and thence to the Universities, Question of (*Trail*), 325.
- Exhibitions granted by Board without examination or giving reason (*M'Mordie*), 2582.
- Fees, Reduction of, proposed, *see* FEES.
- Intermediate Results, Question of Scholarships on—Prizes provided, but to a much smaller extent than in Classics and Mathematics (*Mahaffy*), 2778.
- Students elected who took up only Experimental Science, and possibly Irish—Difficulty in passing ordinary Examinations (*Mahaffy*), 2777.
- Irish Subjects, *see* that title.
- List of successful Candidates, Reasons for not publishing (*Mahaffy*), 2617-9.
- Nutting Scholarships, Proportion of Catholics gaining (*Mahaffy*), 2779.
- Women were also eligible, and there was no limit of Denomination (*Trail*), 326.

SCHOOL OF PHYSIC ACT :

See title MEDICAL SCHOOL.

SCHOOLS :

- Examination and Inspection, Carried out by Board of Intermediate Education (*Trail*), 324.

SCIENCE—PHYSICAL SCIENCE :

- Degree given by Dublin University—Doctor's degree only, B.Sc. would imply teaching (*Beare*), 4908-10.
- Deliberate crushing of Science by Indirect Methods, Instances, &c. (*M'Mordie*), 2582-90.
- Doctorates, Granting of, for thesis or original Scientific work, proposed (*Thrift*), 1259-60.
- Encouragement needed—Means suggested (*M'Mordie*), 2595.
- Expenditure—
 - All available money of late years had been devoted to the Science School (*Trail*), 152 (p. 11).
 - Neglect of—Amount annually spent should be ascertained (*M'Mordie*), 2582.
 - Proportion of University and College Moneys to be appropriated in a reconstructed University (*M'Mordie*), 2590.
 - Wastefulness—Existing arrangements incomplete and mutually obstructive (*M'Mordie*), 2595.
- Fellowship, Subjects for—Question of introduction of Experimental Science (*Trail*), 152 (p. 11); (*Beare*), 4820-4.
- Funds collected entirely Earmarked for equipment and maintenance—No provision for Endowment of Research or Teaching Assistance (*Thrift*), 1272-3.
- Neglect of, Department obliged to import Experts from England alleged—Qualified members of Trinity had applied but were not selected (*Thrift*), 1228.
- Severity of Work for Head of School and Staff—Excessive Amount of Routine Work (*Thrift*), 1251-2.
- State Grants for—Large Grants claimed (*M'Mordie*), 2595.

SCIENCE, ROYAL COLLEGE OF :

- Apparatus, making available for use by other Colleges (*M'weeney*), 2865-7.
- Catholic Students—
 - Number of (*Delany*), 4394-5.
 - Subverting Faith of Students, Instance of (*Delany*), 4396, 4464, 4466.
- Mixing of Students.
 - Departments in which Students might mix (*Delany*), 4385-8.

SCIENCE, ROYAL COLLEGE OF—continued. :

- Governing Body would have to possess people's confidence (*Delany*), 4388.
- Objections to development on ground of mixing of Students (*Delany*), 4314.
- Taking over by New University or College, Question of (*Delany*), 4389, 4454, 4461.
- Teaching not of University Rank (*Delany*), 4383, 4452-60.
- School was needed, but a University was needed also (*Delany*), 4384.

SCOTTISH UNIVERSITIES :

- Denominationalism, Extent of (*MacDermott*), 1304-6, 1402-3, 1406; (*Butcher*), 1406-7.
- Faculties, Organisation of (*Butcher*), 987.
- Federation Question.
 - Federation of Universities proposed by Act of 1858—Section never carried into effect (*Windle*), 3727.
- Ordinances at present connecting Universities, objections to (*Windle*), 3727.
- General University Court, Powers and Functions (*Windle*), 3727.
- Theology, Faculties of—
 - Included within the Old University System (*MacDermott*), 1302-3.
- Presbyterian Church in Ireland had made no declaration on the subject (*MacDermott*), 1308.
- Separation, Opinion in favour of (*MacDermott*), 1309.
- Theological Halls established by Free Church apart from the University, Success of (*MacDermott*), 1385.

SEAL OF TRINITY COLLEGE :

- Control—Originally under Control of Provost and Fellows (*Madden*), 2440.
- Provisions for use of Corporate Seal going back to Charter of Elizabeth (*Madden*), 2514-5, 2518-20.

SECOND COLLEGE IN DUBLIN UNIVERSITY :

- Aberdeen University, Object lesson of (*Trail*), 49.
- Abolition of the University as it had existed for three hundred years involved (*Madden*), 2486.
- Autonomy Question (*Delany*), 4353-5.
 - Extent of Freedom—
 - Nothing short of complete autonomy would satisfy the Catholic claim and it could not be given without wrecking Dublin University (*Bernard*), 444.
 - Tie would be closer between two Colleges within Trinity College than in the case of a Federal University with Colleges scattered over the country (*Bernard*), 443.
 - Independent University, Proposed Autonomy would result in (*Trail*), 147-8; (*Leech*), 3294; (*Delany*), 4356.
 - Inducement to those who wished to have complete power of granting their own degrees, question of (*M'weeney*), 2914.
 - Misleading to give name of one University to two Colleges which were really independent Universities (*Tarleton*), 341-6.
- Catholic attitude—
 - All would assent to a Scheme for a properly constituted and equipped College (*Magennis*), 3030-1; (*Delany*), 4501, *note*.
 - Bishops, Attitude of (*Bernard*), 355-62; (*Synnott*), 1675.
 - Refer* also to sub-heading Mixed Education.
- Devout Catholics—
 - Definition of (*Tarleton*), 346; (*Bernard*), 392.
 - Satisfaction of claims and aspirations of—Reasons for founding a second College if founded at all (*Tarleton*), 346.
- Laymen's Committee—
 - Communications between Catholic Laymen and Trinity College—No communications (*Synnott*), 1681, 1685-7.
 - Opposition if College were organized on Robertson Commission Scheme (*Synnott*), 1511-12.
 - Statement submitted to the Robertson Commission (*Synnott*), 1677-9; (*Browne*), 4915, 4949-56, 4972.

SECOND COLLEGE IN DUBLIN UNIVERSITY—continued.

Catholic Attitude—continued.

Laymen's Committee—continued.

Scheme approved as best Scheme submitted to that Commission (*Synnott*), 1712-5.

Preference for Second College as against alternative Schemes (*Browne*), 5067-73, 5078, 5096-5109.

Catholic Authority—Representation in connection with College in same way in which Divinity School was to remain attached to Trinity College, proposed (*Jackson*), 4090.

Catholic Relief Act Proposals—Policy abandoned, College ultimately becoming a Divinity School (*Madden*), 2486.

Catholics and Protestants—Relations between—Possibility of a social drawing together (*Trail*), 109-11; (*Bernard*), 463; (*Magennis*), 3032; (*Gray*), 3915; (*Browne*), 5001-4.

Church of Ireland, Objections on behalf of (*Crozier*), 2411; (*Archdall*), 2398.

Clerical influence pervading Second College would extend to the University (*Trail*), 49.

College and University, Relations between—Denominational College in an Undenominational University, Question of (*Trail*), 52-3, 66-8; (*Bernard*), 371-3, 424-8, 436; (*Tarleton*), 347-8.

Denominational College, Original intention to introduce (*Bernard*), 403-4.

Examining University at the head of two denominational Colleges (*Tarleton*), 349-51.

Competition, Question of (*Trail*), 3, 49, 89, 106-8, 129-31, 142; (*Tarleton*), 346, 352; (*Bernard*), 419-20, 752-6; (*Culverwell*), 763 (p. 44), 788; (*Synnott*), 1668-71; (*Magennis*), 3003, 3038-9.

Connection between the two Colleges suggested—System of external Examiners, Common Board of Studies, etc. (*M'Weeney*), 2915.

Courses of Study, Arrangement of—Board of Studies for each College, proposed, the University to see that the level of Education was maintained (*Magennis*), 3003.

Common Standard fixed by the University (*Synnott*), 1593-4.

Every subject to be represented in both Colleges to begin with—Question of one College taking up one or other of the deficiencies of the other College (*Magennis*), 3108-10, 3177-81.

General Outlines laid down by the University and Teachers given more freedom as to details—Would not secure a uniform standard (*Bernard*), 429-31.

Lectures subject to Censorship and books to an "Index" (*Trail*), 49.

Philosophy—Each College would draw up its own course (*Magennis*), 2997.

Physics, Method of Teaching necessarily different—Investigations of Professor subject to Ecclesiastical Authority in one case and not in the other (*Bernard*), 432.

Degrees—Prestige of Dublin University, and Question of degrees in the New College (*Browne*), 4929-33, 5021-7, 5033-5.

Failure of Scheme if Degrees of New College did not carry equal weight with those of Trinity College (*Culverwell*), 764 (p. 45).

Non-Resident Students, Question of Degrees for (*Browne*), 5040-2.

Outside Examiners, Employment of (*Trail*), 101.

Unfairness of giving name of degrees of Dublin University to new Degree (*Trail*), 78, 100; (*Tarleton*), 341; (*Bernard*), 355.

Dunraven Scheme—

Original Scheme was for a Second College in Dublin University (*Dunraven*), 4678.

Second College in Dublin University preferable to (*Delany*), 4350-2.

Educational Benefit of a Second College, question of (*Trail*), 116-127.

Educational ideals of Catholics and Protestants differed in fundamental principles (*Tarleton*), 346; (*Bernard*), 355, 390-5, 432, 435, 441-2, 458-9; (*Magennis*), 3088-9.

SECOND COLLEGE IN DUBLIN UNIVERSITY—continued.

Efficiency, Decrease in (*Culverwell*), 763 (p. 44).

Endowments of Trinity College should not be interfered with (*Browne*), 4974-8, 5007-9.

Engineering School—Question of separate Schools (*M'Weeney*), 2917-8.

Equipment Question—Common Equipment or Duplication of Apparatus—

College Equipment should be equal—Special Equipment might be treated as a University possession (*Magennis*), 3061-4, 3067, 3101-7.

Common Equipment and Professoriate (*Synnott*), 1602-9, 1637-8.

Developing new Subjects in Second College to balance any subjects particularly well done in older College (*Magennis*), 3108-10.

Scientific Work—Two Staffs and one Laboratory desired (*Magennis*), 3070-1, 3073-4.

Refer also to sub-heading Professors and Teachers.

Examinations—

Common Standard fixed by the University (*Synnott*), 1593-4.

Control by University Authority over Examiners and Courses of Study, necessity for (*Bernard*), 355.

Difficulties would arise—Case of the Royal University and Belfast (*Trail*), 49, 54-5.

Difficulty of a University awarding Degrees upon Examinations of Constituent Colleges (*Trail*), 78—Royal University had done it (*Magennis*), 2999.

Each College to conduct its own Examinations for Pass Degrees proposed (*Magennis*), 2998-9.

Presence of an external Examiner proposed (*Magennis*), 3052-4, 3182, 3184-7.

External Examiners—Objections (*Trail*), 49, 101-3, 132-136; (*Bernard*), 355.

Influence of a new Examination Scheme (*Browne*), 5037-8.

Medical Examinations—

Less difficulty in conducting than in the case of the Royal University (*M'Weeney*), 2901-2.

Medical part would be quite as difficult as Royal University Examination, but facilities might be offered in connection with Arts Examination (*M'Weeney*), 2906-7.

No objections to an Examiner who was taking part in the Examination seeing the work of all the Colleges (*Magennis*), 3188-90.

Philosophy—Question of University Examinations (*Magennis*), 3042-8.

Religious balance of Examiners a necessity (*Trail*), 49.

Teaching following the Examination instead of the Examination growing out of the Teaching (*Culverwell*), 764 (p. 45).

University Prizes, Honours, &c.

Examination in chief to be conducted by Candidate's own Professor (*Magennis*), 3182.

One Examination common to both Colleges (*Magennis*), 3041.

Federation.

College capable of independent existence was "Cribbed, cabined, and confined" by association with others in a Federal University (*Culverwell*), 764 (p. 45).

Difficulties of would be less objectionable than in case of Colleges scattered through the country (*M'Weeney*), 2998-9.

Fees—

Advantage of University having something to say as to fees—Advantage from a financial standpoint outweighed by disadvantages in other ways (*Bernard*), 423.

Objections to Fees going to the University (*Trail*), 150-1.

Finance Question—

Expense would have to be faced—Catholics required a College complete and equal to Trinity College (*Delany*), 4318.

No University Funds as distinct from Trinity College (*Trail*), 97, 144-6.

SECOND COLLEGE IN DUBLIN UNIVERSITY—continued.

Finance Question—continued:

No University Funds, etc.—continued.

Only Funds that could be described as University Funds were the Fees paid for Degrees (*Tarleton*), 496.

Foundation as *Collegium Mater Universitatis*.

Establishment of other Colleges or Halls within the University contemplated, but never carried into effect (*Madden*), 2486.

Refer also to sub-heading College and University.

Friction, Question of—

Advantages of Second College as causing less friction than modification of Trinity (*Magennis*), 2964, 2966.

Few Students in Trinity at present, Friendly arrangements with the Protestants there (*Magennis*), 2966.

Refer also to sub-heading Competition.

Governing Bodies.

Functions of (*Synnott*), 1614-6.

Second College.

Elected Academic Government after expiration of fixed transition period (*Synnott*), 1583, 1585-8.

Possibility of College becoming a Protestant Institution, Question of (*Synnott*), 1596-601.

No effective Security against Ecclesiastical pressure (*Culverwell*) 763 (p. 44).

University, Governing Body of.

Academic Grounds, Election on (*Synnott*), 1629-36; (*Magennis*), 3006-17; (*Browne*), 4915.

Closeness of Tie between the two Colleges made the question of supreme importance (*Synnott*), 1621-3.

Equal representation of the two Colleges, Question of (*Trail*), 149; (*Bernard*), 447-8; (*Synnott*), 1582, 1586, 1624-8; (*Magennis*), 2992-6, 3000-2; (*Browne*), 4925, 4971-2, 4991-4.

College that would be governed by Irishmen with Irish ideas—How could this be with a Governing Body so constituted? (*Browne*), 5048.

Evils of Denominational Balance System (*Trail*), 98-9; (*Bernard*), 445-6.

Local Municipal Authorities, Two Representatives of, desired (*Magennis*), 3009, 3098-9.

Predominance of Catholics to start with (*Magennis*), 2937.

Grinding System—Evil not quite so great in the case of two Colleges as in the case of a single University College (*Magennis*), 3193.

Lectures—

Duplication of, see sub-heading Professors and Teachers.

University Lectures as distinct from College Lectures, Opinion in favour of (*Magennis*), 3040.

London University Analogy, refer to sub-heading College and University.

Maynooth College, Claim for Affiliation, &c. (*Trail*), 113-5.

Governing Body of University, Claim for Special Representation on (*Synnott*), 1643-4.

Original proposal that Students should reside in Dublin, and go to lectures of the College. Non-acceptance by the Bishops (*Synnott*), 1640-1.

Suggestion that Maynooth Students should come into the College in a house of Residence (*Synnott*), 1645-7.

University Arts Course acceptable to Maynooth and Trinity College Students—Problem for University Governing Body (*Synnott*), 1641-5.

Medical School—

Autonomous Medical School—Separate Schools proposed (*M'Weeney*), 2916, 2918.

Cecilia Street Medical Students.

Large number who now go up for the joint Colleges would probably take the new Degree (*M'Weeney*), 2908.

SECOND COLLEGE IN DUBLIN UNIVERSITY—continued.

Medical School—continued.

Cecilia Street Medical Students—continued:

No objections to being incorporated in a College with the necessary Catholic Atmosphere (*M'Weeney*), 2880.

Mixed Education Question—

Catholic Bishops, Attitude of—

Catholics (*Culverwell*), 764 (p. 46).

Agricultural Colleges and Attendance of Condemnation of Proposal (*Trail*), 3, 49, 69-75.

Exceptional Cases, Possibility of (*Trail*), 76-7.

Opinion in favour of free mixing of Students of different denominations, as at Oxford or Cambridge (*Synnott*), 1512, 1577.

Would probably arise if Protestants were eligible for privileges of New College (*Culverwell*), 764 (p. 45).

Duty of Catholic Bishops, according to their own pronouncement, to endeavour to empty the College of Catholics—Disastrous result both to the country and the University (*Culverwell*), 764 (p. 46).

Refer also to sub-heading Professors and Teachers.

"Nationalisation" of Dublin University, Question of (*Bernard*), 362.

Opinion against (*Madden*), 2545; (*Gray*), 3961, 3963.

Oxford and Cambridge Universities—No analogy for Second College in Dublin University (*Culverwell*), 764 (p. 45).

Professors and Teachers.

Appointment of.

Crown, Appointment by—Robertson Commission Suggestion (*Synnott*), 1591-2.

Governing Body—No reason why it should be allowed to appoint the Professors (*Trail*), 149.

Catholic Church, Claims (*Trail*), 50-1.

Common Equipment and Professoriate (*Synnott*), 1602-9, 1637-8.

Difficulty in regard to that part of the course which would be common to the two Colleges (*Culverwell*), 763 (p. 45).

Dual Professorships—Subjects in which duplicate teaching would be necessary, &c. (*Trail*), 78-9; (*Magennis*), 3067-9.

Biology and Metaphysics, Double arrangement desirable, but not necessary in Physics or Chemistry (*Magennis*), 3076-8.

Laboratories, &c., Question of Students Mixing (*Delany*), 4314; (*Browne*), 5010-16, 5051, 5054.

Medical and Scientific Subjects, Subjects constituting the Anthropological Sciences—Desirable to have Catholic Professors (*Magennis*), 3075.

No branch of Curriculum would be excluded from Scope of Teaching of Catholic College (*Magennis*), 3101-2.

Not necessary to duplicate Teachers if Professor were not only a man of acknowledged ability, but also a Catholic (*Magennis*), 3078-9.

Objections to—Creation of new Chairs was a different thing (*Trail*), 137-9.

Philosophy—Experience at University College showed that Philosophy could not be adequately dealt with even by three Professors (*Magennis*), 2954.

University Lectures could not be duplicated (*Trail*), 49.

Professors in different centres taking different views of their subjects and not being able to harmonize them by friendly contact, Difficulty of (*Culverwell*), 764 (p. 45).

Religion of Professors—

Catholic College to be staffed mainly by Catholics—Supply of Catholic Professors, etc. (*Browne*), 5055-61.

SECOND COLLEGE IN DUBLIN UNIVERSITY—continued:

Professors and Teachers—continued.

Religion of Professors—continued.

Denominational Balance—

Evils of System (*Traill*), 98-9, 104-5; (*Tarleton*), 346; (*Bernard*), 362; (*Culverwell*), 763 (p. 44).

Question of choosing the best man, Would there be any security for Academic merit? (*Browne*), 4926-8, 4991-4.

Necessary to consider Religion of Professor only in regard to Chairs connected with private Endowment (*Magennis*), 2934.

No objection to teaching being given by a Protestant (*Magennis*), 3065.

Predominance of Protestants, Possibility of—Prepared to take the risk (*Magennis*), 2935-6, 2938.

University Professorships, Question of (*Traill*), 150-1; (*Browne*), 4916-22, 4978.

Certain Subjects should be taught by University Officials as distinct from College Officials, but there should also be provision in the College itself (*Magennis*), 3072.

College Tutors—

Appointment—Resignation of Tutorship advantageous (*Magennis*), 3055.

Preference given but not necessarily to be selected (*Magennis*) 3049-51.

Difficulties as to appointment and Control of Teaching—Subjects affected (*Delany*), 4315-7.

Delany's, Rev. Dr., Statement that Catholic Students would not be allowed to attend Lectures (*Browne*), 5010, 5051, 5054.

Lectures which might be common to Students of both Colleges (*Browne*), 5010, 5049.

O'Connor's, Mr. C. A., Opinion (*Browne*), 5049.

Places where Lectures would be given (*Magennis*), 3056-60; (*Browne*), 5012-7.

Protests against—Reason of Signatories to Statement II. for presenting Protest in different form from Statement I. (*Culverwell*), 763.

Question had been long before the Public (*Synnott*), 1672-6.

Religious Antagonism, Disappearance of (*McWeeney*), 2913; (*Magennis*), 3033-7.

Residence—Fixed period to be necessary for obtaining Degrees (*Synnott*), 1594.

Single University with Trinity College as sole College, Comparison with refer to title SINGLE UNIVERSITY.

Site—

Dublin undoubtedly, otherwise it would be provincial and there would be an element of inferiority (*Magennis*), 3130-2.

refer also to sub-heading Competition.

Solution of the University Question (*Browne*), 4915, 4929, 4952.

Status—Demand that the scale should be the same as Trinity College (*Magennis*), 3126, 3130.

Students—

Number of Students, Estimate of (*Magennis*), 3133-5.

Social drawing together of Catholics and Protestants, Possibility (*Traill*), 109-11; (*Bernard*), 463-4; (*Magennis*), 3032; (*Gray*), 3915; (*Browne*), 5001-4.

Sources from which Students would be derived (*Magennis*), 3136-51.

Trinity College, effect on, etc.—

Autonomy, Destruction of (*Bernard*), 402.

Opposition to the Scheme (*Synnott*), 1541 (p. 88).

Revolutionising Trinity College and the University (*Archdall*), 2398.

Separate Governing Body, Necessity for (*Bernard*), 643.

SECOND COLLEGE IN DUBLIN UNIVERSITY—continued:

Undenominational theologically, but denominational in fact if it were to fulfil its object (*Bernard*), 433-4.

Welsh University Analogy, Question of (*Bernard*), 355; (*Culverwell*), 764 (p. 45).

Women, Equal treatment with men proposed (*O'Farrelly*), 4201-3, 4207, 4230-1.

Wyndham, Mr., Plan contemplated by (*Tarleton*), 341; (*Gray*), 3961.

SECONDARY SCHOOLS:

see INTERMEDIATE SCHOOLS.

SENATE.

Annual Report and Audited Financial Statement to be presented to Senate by Governing Body, proposed, Criticism (*Jackson*), 1070-2; (*Madden*), 2537-41.

Corporation of the Senate, Constitution of (*Joly*), 1064.

Council, Representation on—Senate would be disfranchised if Council were replaced by proposed Governing Body (*Madden*), 2549-50.

Governing Body, Senate to have power of electing one member, proposed (*Joly*), 950, 1142; (*Gwynn*), 1139; (*Leech*), 3212.

Government of the College, Share in proposed—Impracticable proposal (*Madden*), 2451, 2453-4, 2536-41.

Incorporation in 1857 (*Madden*), 2450; (*Gray*), 3922.

Means of bringing University more in contact with outside world—Proposal could hardly be worked by means of Senate (*Madden*), 2551-2.

Meetings, Paucity of—Number of Members at a meeting, etc. (*Joly*), 1143-4.

Objections to Senate System of Government (*Magennis*), 3002.

Powers and Functions as at present constituted Degrees —

New Legislation in anything affecting—Consent of Senate necessary (*Tarleton*), 551.

Vetoing Degrees, Power of (*Tarleton*), 551, 554; (*Gwynn*), 1061, 1068; (*Madden*), 2450-1.

Enlargement of Powers—Not much advantage (*Tarleton*), 553.

Matters on which Senate must be consulted—University as distinct from College matters (*Gwynn*), 1062-3; (*Joly*), 1064-5.

Question whether Board could override Senate's opposition (*Gwynn*), 1066; (*Chairman*, Lord Chief Baron, *Jackson*), 1066.

Meeting—Senate could meet only when a Grace was sent down by the Board (*Gwynn*), 1060.

No Governing Power or Power of Initiative, could not even discuss a question unless it came from the Board (*Traill*), 182, 184; (*Gwynn*), 1060, 1070; (*Madden*), 2486.

Property, Power to acquire—Power granted in 1857, but never exercised (*Madden*), 2454.

Qualification for Membership (*Traill*), 183; (*Joly*), 1145-8; (*Gwynn*), 1149-51; (*Madden*), 2451.

Self-convening Power—Proposal that on requisition signed by not less than 30 members, Senate might be summoned by Chancellor or Vice-Chancellor to express views on matters of University Policy. "Must" not "might" be summoned—Compulsory summoning preferable (*Joly*), 938-9; (*Gwynn*), 944.

Restriction to matters of University Policy—Question whether General Power was desirable (*Joly*), 941; (*Gwynn*), 942-3.

University Commission of 1851, Recommendation (*Joly*), 944.

SENIOR MASTER, NON REGENT:

Veto on Degrees (*Madden*), 2451.

SEPARATE COLLEGE OR UNIVERSITY:

- Catholic Bishops' Attitude—Separate College next best thing to a separate University (*Delany*), 4263.
- Co-operation with Trinity College—Catholics would welcome all possible voluntary co-operation if once they were placed on conditions of equality (*Delany*), 4319-22.
- Physical Laboratories, Common use of—No difficulty if each College had its own days (*Delany*), 4323.
- Professors—Common Professors impossible at present (*Delany*), 4324-5.
- Denominational Character—New Institution would be denominational just as Trinity College had long been (*Delany*), 4432.
- "Episcopal Domination and Undue Clerical Control" Objection, Reply to—Catholic Bishops had not interfered at Louvain or in University College (*Delany*), 4493.
- Limitation of thought and Narrowness of Teaching Objection—No limitation in University College (*Delany*), 4493-4.
- No objection provided those who wished to go to Trinity were free to do so (*Traill*), 82.
- Either a Second College or a Separate University might satisfy the section of the population which Trinity did not satisfy (*MacNeill*), 3490-5.
- Equipment of Scientific Departments—
- Economy should tell rather against College of Science than against University teaching (*Delany*), 4392-3.
 - Equality, Claim for—Kind and extent of equality claimed (*Delany*), 4406-7.
 - Essential that new University should have complete Apparatus for University course (*Delany*), 4389, 4391.
 - Giving Double Plant and opening both Universities to non-University Students, proposed (*Delany*), 4462-3, 4390.
 - Triplication not due to Catholic demands but to action of recently established Agricultural Board (*Delany*), 4391.
- Fawcett's Act, Application to New College with certain modifications, proposed—Archbishop Walsh's letter to Sir A. MacDonnell (*Delany*), 4273, 4279.
- Fees—the lower the better (*Delany*), 4411-2.
- Governing Body—
- Catholic Government, that is a Government without tests, but so constituted as to ensure the confidence of the Catholic Body (*Delany*), 4263.
 - Appointment of first body would be made in communication with Bishops, but not necessarily all Catholics (*Delany*), 4264-6.
 - Representative body after a certain time would be *ipso facto* predominantly Catholic (*Delany*), 4267-71.
 - Laymen would predominate—Catholic Bishops' demand for appointment of a certain number of Bishops *ex-officio* had been withdrawn (*Delany*), 4280-1, 4349.
 - Public declaration of withdrawal, importance of (*Butcher*), 4350.
 - Power of Appointment and Dismissal desired (*Delany*), 4342-4.
 - Personal Statement, but witness believed his feeling to be widely shared by some of the Bishops too (*Delany*), 4345.
 - Representative and popular Body essential to success (*Delany*), 4302 note.
- Maynooth's Claim for Affiliation (*Bernard*), 499-500; (*Synnott*), 1639; (*Delany*), 4357-8.
- Agricultural Professorships like those at Louvain would enable priests to increase prosperity of the country (*Delany*), 4358.
- Catholic Bishops' Attitude, Change in (*Delany*), 4360-1.
- Governing Body, Representation on (*Delany*), 4364.
- Arts Faculty of Maynooth would greatly outnumber any other Arts Faculty and claim for representation would be based to some extent on numbers (*Delany*), 4365-6.
- Hostel or College would be established by Bishops in Dublin (*Delany*), 4358.

SEPARATE COLLEGE OR UNIVERSITY—continued:

- Maynooth's Claim for Affiliation—continued.
- Mixing with lay Students, Extent to which mixing could take place (*Delany*), 4370-1.
 - Meaning of Affiliation—Privileges entailed (*Delany*), 4364, 4372-4.
 - Objection that the new College would be dominated by theological Students—Groundless objection (*Delany*), 4375-81.
 - Non-Catholic Students, welcome extended to (*Delany*), 4413.
 - Chapels, Catechetical Lectures, Separate Courses in Philosophy, etc.—Not necessary, since non-Catholic students had a choice of institutions (*Delany*), 4414-7.
 - Mixing of Students—Social intercourse between Catholics and non-Catholics would have fullest encouragement (*Delany*), 4419-21.
 - Opinion in favour of a separate University or at least a separate College (*MacNeill*), 3490-5.
 - Professors, Selection of—Extent to which selection would be made on denominational grounds (*Delany*), 4425, 4433.
 - Best men in their own subjects, Possible exclusion involving certain strain on Academic Character of Institution—No stain involved, most brilliant men were not always the best teachers (*Delany*), 4431.
 - Declaration required from Professors at Queen's Colleges would satisfy Catholic requirements and be more easily carried than one which seemed to guard Catholics only (*Delany*), 4346-8.
 - Examination Method of Selection, Objection to (*Delany*), 4275.
 - Nationality and Religion would be considered but would never qualify an otherwise unfit man (*Delany*), 4427-8.
 - No test would be required, but Governing Body would select in such a way as to give confidence that Professor would not interfere with faith of his pupils (*Delany*), 4274, 4277-8, 4338, 4340-1, 4422, 4426.
 - Opening to all comers, Question of—"Degrees, Honours, and Emoluments" mentioned in Archbishop Walsh's Letter to Sir A. MacDonnell would not necessarily include Professorships (*Delany*), 4273.
 - Prohibition against Trinity. Effect on (*Delany*), 4443-51.
 - Students—Probable Number and Sources of Supply (*Delany*), 4435.
 - Estimate of probable Number (*Delany*), 4475-81, 4491.
 - Increase in number of Catholics taking Arts examinations in Royal University—Tables handed in (*Delany*), 4471-3.
 - Intermediate Results showing large proportion of Catholic Students fully qualified for higher Education (*Delany*), 4473.
 - Leinster Catholics—Some would go to Trinity as their fathers had done (*Delany*), 4340.
 - Maynooth Students, Question as to Number of (*Synnott*), 1545; (*Delany*), 4483-7, 4503-12, 4517-20.
 - Munster and Cork, Students from—
 - Considerable proportion would probably remain at home if Queen's Colleges were brought into harmony with wishes of the people (*Delany*), 4437-9.
 - Munster people would resist pressure to come to Dublin (*Barrett*), 3889-90. - Teachers having at present no University qualification would resort to new University (*Delany*), 4488-90.
 - Visitors, Catholic Bishops on Board of—Witness personally never saw the necessity of pressing that (*Delany*), 4341.
- SEPARATE UNIVERSITY WITH THE DESIRED ROMAN CATHOLIC ATMOSPHERE:
- Austrian Emperor's Example—Success of the Czech University in Prague (*Delany*), 4285-6, 4379.
 - Catholic Attitude—
 - Bishops would prefer a Separate University but they did not insist on their ideal (*Dunraven*), 4643-9.

SEPARATE UNIVERSITY WITH THE DESIRED CATHOLIC ATMOSPHERE—continued:

Catholic Attitude.—*continued.*

Lay Opinion—Preference for College in the University of Dublin (*Browne*), 5091.

University preferred to a College (*Delany*), 4262, 4283.

Cecilia Street Medical School, No objection to being incorporated (*McWeeney*), 2879.

Competition Question—Lower Fees at the New University, etc.

Beneficial to Trinity (*Leech*), 3294.

Desirable to keep the Fees fairly even (*Leech*), 3298.

Just as intense if both institutions were Colleges in one University (*Bernard*), 419-20.

Means of equalising the Fees, Question of (*Leech*), 3350.

Trinity College must be prepared to face competition (*Bernard*), 421-2, 752-6.

Endowment—

Contribution from the People—They would contribute ultimately (*Delany*), 4287.

Ideal was a University independent of State Aid or Control, maintained directly by Irish Catholics, as Louvain was by Belgian Catholics (*Delany*), 4302.

Public Funds, Endowment out of, Opposition to Mr. Balfour's project—Presbyterian General Assembly's Resolutions (*MacDermott*), 1292.

Governing Body—Representative and popular Body essential to success (*Delany*), 4302, *note*.

Headquarters of such a University, Opinion in favour of Dublin (*Bernard*), 409-10, 499.

Ideal Settlement—A Catholic and Irish University (*McWeeney*), 2910; (*Delany*), 4286.

Would ultimately result whatever else was done (*Leech*), 3294, 3355.

Impracticable because a State-endowed Roman Catholic University would not be tolerated by Protestant opinion (*Dunraven*), 4552 (p. 287).

National University with no religious complexion—New Demand, not appealing to Irish sentiment and tradition, not wanted in view of existence of Trinity College (*Synnott*), 1653-60, 1662-3.

Not the least objection (*Leech*), 3297.

Not wanted—Only kind of additional University needed was one to teach farming, etc. (*Gray*), 4124.

Objections (*Trill*), 83-4, 86, 89; (*Synnott*), 1652; (*Gray*), 4125.

Denominational Objection (*Trill*), 83.

If Government would treat the matter as a local, not a religious question, a representative Governing Body would be *ipso facto* predominantly Catholic (*Delany*), 4288.

Financial Objection (*Synnott*), 1661.

Opportunity for—Excellent teaching Staffs with very few pupils at Cork, Galway, etc. Need for Colleges of Residence (*Archdall*), 2399, 2401.

Privilege denied to Irish Catholics but granted to particular form of Presbyterianism in Scotland—Test imposed on Professors in the 4 Scotch Universities (*Delany*), 4288-90.

Robertson Commission, Solution practically ruled out by (*Synnott*), 1661.

Subjects taught—To be left to the authority of the University (*Bernard*), 417-8.

University Board, Establishment for a limited period proposed, to see that standards were properly maintained, etc. (*Delany*), 4496-8.

refer also to title SEPARATE COLLEGE OR UNIVERSITY.

SETTLEMENT OF UNIVERSITY EDUCATION IN IRELAND:

No solution would settle the whole question, Opinion of Trinity College men (*Trill*), 45.

Plea for (*Madden*), 2548; (*Windle*), 3731.

Advantage of a Satisfactory Settlement to every person who had to live in Ireland (*A. F. Dixon*), 1964.

see also title SINGLE UNIVERSITY—WIDENING.

SINGLE UNIVERSITY, WITH TRINITY COLLEGE AS SOLE COLLEGE

Bonn University Analogy—Matter viewed abstractly with regard to Trinity College in relation to the Catholics—Fallacy of the Academic Mind (*Magennis*), 2960-3.

Catholic Attitude (*Magennis*), 2957.

Bishops, Attitude of—Question how far Bishops would approve Catholic Laymen's Committee's Proposals (*Synnott*), 1511, 1514-22, 1535-6, 1658, 1660.

Objections to Mixed Education in a College, but not in a University—Witness did not understand Bishops' position (*Synnott*), 1564-8.

Prospects of securing Bishops' Approval, Question of (*Fottrell*), 1726-8, 1734-6.

Refusal to accept any Scheme involving Mixed Education in Trinity College, Dublin (*Delany*), 4258; (*Dunraven*), 4552 (p. 287).

Declaration of July, 1906 (*Synnott*), 1511, 1707; (*Fottrell*), 1725.

Toleration of mixed system where satisfactory safeguards existed for faith and morals of Catholic students—Reorganised Trinity College would come under that description, and could therefore be tolerated (*Fottrell*), 1731.

Historical Review (*Synnott*), 1530-43, 1648-50.

Irish Ecclesiastical Record of Oct., 1906—Article by the Maynooth Professor of Theology (*Synnott*), 1523-4, 1527.

Laiety, Attitude of (*Synnott*), 1705-6; (*Magennis*), 2958-9, 3115-19.

Catholic Laymen's Committee's Proposals—Conditions on which Single University Scheme would be accepted (*Synnott*), 1501-2, 1506, 1569-70.

Action of Commission in the event of Scheme failing to secure Catholic Bishops' approval—If Commission thought it the best scheme they should recommend it (*Fottrell*), 1737.

Best solution that had been put forward, affording best chance of a practical and workable solution (*Fottrell*), 1732.

Conscience Clause as in Oxford and Cambridge Act of 1871 required—College Statute against Blasphemy not sufficiently Specific (*Synnott*), 1541 (p. 89).

Divinity School—Attaching Catholic School to separate house of Residence outside College proper, proposed (*Synnott*), 1545.

Fees, Reduction of, would have to be considered (*Synnott*), 1541 (p. 89).

Fellowship System, new mode of Election, proposed (*Synnott*), 1690-1, 1693-4.

Governing Body, Representation on (*Synnott*), 1501, 1541 (p. 89).

Collegiate as distinct from University Governing Body, Representation on desirable (*Synnott*), 1617-9.

Impracticable Scheme, &c. (*D. F. Browne*), 4966.

Mixed Education a part of Scheme as acceptable to Committee (*Synnott*), 1506, 1508-9, 1541-3.

Professors—

Declaration should be imposed on Professors in regard to religious question as at Queen's Colleges (*Synnott*), 1541 (pp. 88-9).

Dual Professorships on denominational basis in Mental and Moral Science and History, Establishment of (*Synnott*), 1502, 1504.

Appointment Difficulty (*Gray*), 3968-9.

Catholics had not hitherto objected to the course in Ethics and Metaphysics—Distinguished Roman Catholics in lists of Senior Moderators and Gold Medallists from 1840-50 (*Gray*), 3970-2.

SINGLE UNIVERSITY, WITH TRINITY COLLEGE AS SOLE COLLEGE—continued:

Catholic Laymen's Committee's Proposals, &c.—continued:

Professors—continued:

Dual Professorships, etc.—continued.

Commonsense Concession would be to make History, Ethics and Metaphysics optional in the Senior Sophister year, leaving teaching on purely Roman Catholic lines to private enterprise (*Gray*), 3969.

Demand based on ground that at present Professional Chairs and Courses were essentially Protestant—They were unsectarian, and only Protestant in that they were not essentially Roman Catholic (*Gray*), 3969.

Destruction of full liberty of teaching involved (*Gray*), 3969.

Other subjects, Question of necessity of dual Professorships for (*Synnott*), 1503-4; (*Gray*), 3969.

Protestant Religious Services or Ceremonies, Official Use of—Statute, Custom, &c. prescribing use should be repealed (*Synnott*), 1541 (p. 89).

Reform proposed would necessitate other Reforms suggested from within Trinity College, Election to Fellowships, &c. (*Synnott*), 1688-9.

Residential Accommodation—

Provision should be made for new Students and accommodation should be considered in relation to Medical School's proximity to Hospitals (*Synnott*), 1541 (p. 89).

Separate Houses of Residence for ecclesiastical students proposed (*Synnott*), 1545.

Constitution should be as it is now—Witness would be prepared to admit schools of other Denominations (*Bernard*), 632-4.

Divinity School of Trinity College should be transferred to control of the Church with its private Endowments, and granted power to confer Theological Degrees (*M'Mordie*), 2595.

Expenditure required under various heads, Commission to report on, proposed (*M'Mordie*), 2595.

Fees difficulty (*Magennis*), 3096.

Grinding system, Objections to (*Magennis*), 3072, 3192-3.

Opinion in favour of—Assured Success v. Doubtful Experiment (*Madden*), 2488; (*Evans*), 5112-3.

Original Purpose and Design of Trinity College—Historical Review of evidence on the point as to whether it was National and intended for all classes of graduates or not (*Synnott*), 1529-30, 1547-55.

Practical Question—Was it possible to so modify Trinity as to meet requirements of all denominations who would resort to it? (*Bernard*), 635.

Any radical change would create two grievances in place of one (*Delany*), 4259-61.

Educational Ideals of Protestants and Catholics fundamentally different (*Magennis*), 3088-9.

If changes could be made making Trinity acceptable to Catholic Hierarchy, the College would become in time predominantly Roman Catholic (*Dunraven*), 4552 (p. 287).

Neither desirable nor possible (*Dunraven*), 4552 (p. 287).

Protestant Prejudice—Catholics should welcome any legitimate method of making their position and tenets better known (*Synnott*), 1543.

Provostship of Trinity should remain open without Test (*Trail*), 2416.

Science, Encouragement required for—Provision that should be made, &c. (*M'Mordie*), 2595.

SINGLE UNIVERSITY, WITH TRINITY COLLEGE AS SOLE COLLEGE—continued.

Second College in Dublin University, Merits of Scheme as compared with Single College University Scheme.

Catholic Laymen's Committee's Attitude as between the two Schemes—Benevolent neutrality with leaning towards whichever Scheme should prove attainable (*Synnott*), 1530, 1560-2, 1579-81, 1610-2, 1668-71, 1716.

Duplication or Triplication of Endowments for higher secular teaching involved in Second College Scheme—Probable effect on Attitude of Government of the day (*Synnott*), 1541 (p. 89).

Not much difference if there was to be common Equipment and common Professoriate (*Synnott*), 1610-3.

Objections to College for Catholics in Royal University applied equally to similarly constructed College in University of Dublin (*Synnott*), 1543.

Political and Social Grounds, Demands for Second College based on (*Synnott*), 1543.

Possibilities of Attainment, Friction likely to result, etc. (*Synnott*), 1541 (p. 88).

Religious Atmosphere Question—Elective Academic Government with no tests for Students or Professors would produce much the same result in either case (*Synnott*), 1541 (p. 89).

Second College was the next best thing if Reconstruction of Trinity proved impracticable and would be accepted as such by Catholic Laymen (*Synnott*), 1579-81.

Staff Scheme—Difficulties in the way of obtaining a special denominational Staff (*Synnott*), 1523, 1541 (p. 89).

Tendency of a one-College University to stop short at the College product, i.e., the graduate, Question of (*Synnott*), 1695-7.

Teaching Arrangements—Professorial System much the best for Pass Students, Difference in cost for Tutorial teaching should be paid by those taking advantage of it (*M'Mordie*), 2595.

Widening the Constitution of Trinity College, Scheme for—Put forward by certain Junior Fellows and Professors, and accepted by 467 Roman Catholic Laymen (*Trail*), 3.

Advisory Committee, Functions of—Thought advisable that the Hierarchy should decide what its functions were to be (*Culverwell*), 2423.

Attitude of the University represented by the Scheme—Method of appointing a Representative Committee to draw up a Statement of what Trinity College would accept (*Culverwell*), 772.

Bona-fides of promoters of the Scheme, Guarantee of (*Culverwell*), 2423-4.

Recognition of, might make an agreement possible—No desire that Catholics should be a "helpless minority" (*Culverwell*), 2426 (p. 151), 2597.

Catholic Attitude—

Authorities had already rejected the Scheme (*Bernard*), 611.

Concessions insufficient (*Bernard*), 743; (*D. F. Broune*), 5062.

Conditions accepted by four or five hundred Catholics—Contention that Signatures did not represent what they were supposed to represent (*Magennis*), 3122-3.

Lay Attitude (*Culverwell*), 777-9, 2426. Power of the Laity with the Hierarchy (*Culverwell*), 786.

Catholic Bishops' Attitude—

Consent of needed for success of the Scheme—Impossible to have the Advisory Committee without their approval (*Culverwell*), 2422.

Mixed Education proposal, Condemnation of (*Trail*), 3, 34.

Mixed Education not wholly condemned (*Culverwell*), 771.

SINGLE UNIVERSITY, WITH TRINITY COLLEGE AS SOLE COLLEGE—continued:

Widening the Constitution, etc.—*continued*.
Catholic Bishops' Attitude—*continued*.

No pronouncement had been made upon the Scheme at all (*Culverwell*), 773-4, 780.

Statement—

Omission for the first time in a document dealing officially with Mixed Education of the Statement that it was a danger to faith and morals (*Culverwell*), 2424, 2426.

Prepared before the Scheme put forth in Statement III. was published (*Culverwell*), 768, 769A.

Reference to certain movements in Trinity College—Possibility of the Bishops having seen or heard of the Scheme (*Culverwell*), 2425.

Church of Ireland Students, Percentage of—Folly of Alienating their sympathy in order to conciliate those hostile to that Church (*Bernard*), 743.

Colourlessness in Religion, Politics, etc., Question of—

Character of Trinity College and University of Dublin would be completely changed—It would be no longer either Protestant or Unionist, but would represent all shades of thought in Ireland (*Culverwell*), 786.

No danger in Youth, Contrast intensified the perception of their own side (*Culverwell*), 786.

Community of interests secured—the entire Institution must proceed on its way usefully or fail as a whole (*Culverwell*), 788.

Control did not depend upon a certain number of Catholic laymen but upon the Intermediate Schools, and they were controlled by Bishops and Jesuits (*Traill*), 3.

Denominational Atmosphere, Objection to (*M'Mordie*), 2590.

Trinity College had no Protestant atmosphere and there was no intention of giving it a Roman Catholic atmosphere (*Traill*), 3.

Governing Body—

Changes not considered except from the standpoint of how the College could be made more acceptable to Catholics (*Culverwell*), 2436.

Opposition to Scheme (*Traill*), 42-3.

Privilege for Catholics of electing 25 per cent. of members for 25 years.

Effect of Scheme—Within a short time there would be a much larger representation than 25 per cent. (*Culverwell*), 783.

Junior Fellows and Professors had never exercised their power of putting Roman Catholics on the Council (*Gray*), 3938, 3942.

Opinion against (*H. H. Dixon*), 1239.

Possibly better to reduce the number gradually instead of naming a definite 25 years (*Culverwell*), 783.

Privileges once granted could not be withdrawn after five and twenty years (*Bernard*), 611, 738-40.

Representation of 25 per cent. not represented as adequate—Extracts showing desire to widen basis of Catholic Representation (*Culverwell*), 2422.

Twenty Members with the Provost, proposed (*Culverwell*), 784-5.

Guarantee for faith and morals, Witness believed that the scheme satisfied all essential requirements (*Culverwell*), 2422.

Hostels for Roman Catholic Students admissible under the scheme (*Culverwell*), 2422.

Lectures—Free to all, but no University compulsion on Students to go to any special lectures (*Culverwell*), 2423.

Legal Objection—Scheme inconsistent with Fawcett's Act (*Bernard*), 611.

SINGLE UNIVERSITY, WITH TRINITY COLLEGE AS SOLE COLLEGE—continued:

Widening the Constitution, etc.—*continued*.
Legal Objection—*continued*.

Fawcett's Act not carried out yet because every member of the Board was still elected as an Episcopalian (*Culverwell*), 781.

Dual Professors, Appointment of involved a test—Fawcett's Act necessarily violated (*Culverwell*), 781.

Scheme consistent with spirit of the Act although perhaps, inconsistent with its Letter (*Culverwell*), 781-2.

Mixed Education—Scheme was a scheme of Mixed Education (*Culverwell*) 766.

"National" University—Scheme was devised for the express purpose of giving up whatever privileges were possessed above the rest of Ireland (*Culverwell*), 2426 (p. 151).

Need for a University to be in greater touch with the sympathies and with the history of the country than Trinity was at present (*Culverwell*), 2426 (p. 151).

Professorships—Dual Professorships, Scheme satisfied the position in regard to Chairs about which difficulty was likely to arise (*Culverwell*), 2422.

Protestant feeling—Dread of a separation of the University-going classes into two distinct camps, well-being of the country in question (*Culverwell*), 786.

Religious privileges for all denominations (*Culverwell*), 2422, 2423.

Settlement of University Question—

Not a scheme for settling whole question, Simply a proposal to show how Trinity College could be made more useful (*Traill*), 44.

Not likely to be acceptable (*Bernard*), 636; (*Magennis*), 3120.

Possible Settlement—

Appeal for full discussion of the scheme (*Culverwell*), 2426 (p. 151).

Possible settlement as far as it could be settled by means of Trinity College—if it had consent of the Bishops (*Traill*), 39.

Staff of the College, etc., Attitude of (*Traill*), 3, 32, 41, 43.

No Senior Fellows had signed, 7 of the 12 Signatories, practically the most Junior Fellows (*Gray*), 3964.

Professors—Four out of eight Signatories not Graduates of Trinity, the other four professional men whose main business had nothing to do with the University (*Gray*), 3965-8.

Transitional period difficulty (*Bernard*), 636.

Admission on a Governing Body agreed to, of eminent Roman Catholics to tide over interim until entrance of sufficient Roman Catholic Students to secure representation (*Traill*), 3.

Unsatisfactory Scheme (*Bernard*), 740 3. (*D. F. Browne*), 5066.

SIZARSHIPS:

Means of meeting necessity of poor men with brains—Privileges, Extension of Sizarships desirable (*Traill*), 3.

Number of Sizars who had become Fellows of the College in the last sixty years (*Traill*), 3-5.

Qualification for—Lack of sufficient means had to be proved in order to enable a man to compete (*Leech*), 3291.

No proper investigation made (*M'Mordie*), 2582.

Value (*Leech*), 3292 3.

SOCIETIES OF TRINITY COLLEGE:

(*Beare*), 4861-6.

See also names of particular Societies.

SPECIALISTS AND SPECIALISATION:

Difference between a Specialist and a "mere" or "pure" Specialist (*Beare*), 4804, 4900.

Change in direction of Specialisation—Question how far it was now possible to be distinguished in different subjects (*Beare*), 4905-6.

Instances in point—Case of Dr. Salmon, etc. (*Beare*), 4882-4, 4901-4.

STARKIE, DR.:

Classical School of Trinity College, Criticism of—
Repudiation of alleged sympathy with
Dr. Leech's views (*Beare*), 4727.

STATUTES:

Bedell's Statutes—

"Natives," Special Provision for (*Madden*),
2546

Substantially Temple's (*Madden*), 2441.

Complication of Code—Re-codification required
(*Jackson, and Lord Chief Baron*), 1046;
(*Madden*), 2511.

King's Letters, Codification could be done by
(*Madden*), 2512.

Laudian Statutes—

Adaptation of older Statutes which had been
adopted from Trinity College, Cambridge,
or certainly from Cambridge (*Madden*),
2442.

Board had power to make decrees with con-
sent of Visitors (*Madden*), 2442.

Fellows, Division into Senior and Junior
adopted and stereotyped (*Madden*), 2445.

Right of making statutes and appointing Pro-
vost surrendered (*Madden*), 2442.

Visitors, changes made in Board of Visitors
(*Madden*), 2445.

New Code, Question of (*Madden*), 2509.

Practical Working Code starting with Laudian
Statutes (*Madden*), 2510.

Temple's Code—First Complete Code drawn up by
Sir W. Temple (*Madden*), 2441.

STEWART:

Domestic affairs of the College were regulated by
the Chief Steward—Salary, etc. (*Leech*),
3274-7, 3346.

STRAFFORD, LORD:

Interest in Trinity College—Strafford's Reforms
were really in the Interest of the College
at the time (*Madden*), 2442.

STUDENTS:

Age of Entry for Matriculation—Average Age
(*Mahaffy*), 2801.

Classes of Students—Question of *Filius nobilis*
(*Mahaffy*), 2751-3.

Falling off in number frequenting Trinity
College, Explanation (*Gray*), 4120.

Growing tendency in Upper Classes to send
sons elsewhere than to Trinity (*Madden*),
2555, 2556.

Upper Classes in Ireland did not seem to give
their sons a University education, few of
them went either to Trinity or elsewhere
(*Mahaffy*), 2754-5.

External Candidates, Proportion of—Much
smaller number came from England than
formerly—Considerable number came
from the country in Ireland (*Bernard*),
626-7.

Non-Resident Students—

Social Life—Non-Resident Students got a
good deal of College life, Debating
Societies, Clubs, etc. (*Bernard*), 676.

Supervision of—No Supervision, Question of
Attendance at College Chapel Services
(*Bernard*), 674-5.

Number of Students—

Every stratum had been tapped, that it was
possible to tap in present circumstances
(*Mahaffy*), 2756-8, 2774.

Fluctuation—

Explanation (*Mahaffy*), 2781.

Number at present 1,250 and going up
rapidly, as low as 936 at one time
(*Traill*), 202.

War made it impossible to keep Students
(*Gray*), 3911-2.

Increase in number of Students—Failure in
connection with experiment of offer-
ing additional Exhibitions (*Mahaffy*),
2715-21, 2773.

Causes (*Mahaffy*), 2774-8.

Total Number (*Mahaffy*), 2668-72, 2780.

Total Number on May 1st—Number of each
Religious denomination (*Traill*), 200.

Number of Students in the separate Faculties—
Return to be obtained (*Kelleher*), 1893.

Poor Students—Help given in Trinity in ways
unknown to outside Public, every Tutor
entitled to remit Tutorial fees to four per
cent. of his pupils (*Gray*), 4062.

STUDIES, BOARD OF:

See FACULTIES.

SUPERVISING BODY TO ENSURE MAINTENANCE OF PROPER
STANDARD IN TEACHING INSTITUTIONS:

No objection (*Delany*), 4499.

SURGEONS, COLLEGE OF:

Courses recognised (*A. F. Dixon*), 1816.

SYNNOTT, MR. N. J.—Representative of Committee of
Irish Roman Catholic Laymen.

Action exceeding jurisdiction (*Browne*), 4963-5.
Evidence, 1497-716.

T.

TABLETON, DR.—Senior Fellow of Trinity College,
Dublin—Bursar.

Evidence, 334-52, 502-50.

TEACHERS:

Appointment of Catholic Teachers—Difficulty of
giving effect to Resolutions of 1903 with-
out consent and assistance of Roman
Catholic Hierarchy (*Traill*), 15-18.

Lack of University Education among Secondary
School Teachers, Teachers in Diocesan
Colleges, etc. (*Magennis*), 3147.

Trinity College, Teachers in—

Incomes—

Too largely dependent on Students' Fees—
Fixed portion too small in pro-
portion to variable part (*A. F.*
Dixon), 1906.

Changes in Curriculum, Introduction
of new courses, etc., rendered
difficult or almost impossible
(*A. F. Dixon*), 1906.

Refer also to titles MEDICAL SCHOOL, PRO-
FESSORS AND TUTORS.

Objections to any distinction between Univer-
sity and College Teachers—All were both
University and College Teachers (*Leech*),
3312.

Refer also to titles FELLOWS, PROFESSORS,
AND TUTORS.

TEACHING PROVIDED BY TRINITY COLLEGE:

College teaching in addition to formal lectures
(*Mahaffy*), 2686-8.

Size of Classes, Indifferent teaching sometimes
arising from (*Leech*), 3237, 3302-3, 3347.

Division of Classes according to ability—
Very recent reform (*Leech*), 3348-9.

Sufficient for a well-prepared Passman and theo-
retically sufficient for Honour Students
(*Mahaffy*), 2693-6.

TEMPLE, SIR W.:

First Complete Code of Statutes of Trinity College
drawn up by (*Madden*), 2441.

TERMS OF REFERENCE TO COMMISSION:

Robertson Commission, Matters taken before—
Commission required not to go into such
matters (*Chairman*), 1488, 1494.

Schemes outside Trinity College—Commission
might say they considered some one
Scheme better than dealing with Trinity
College, but they could not consider any
such Scheme in detail (*Chairman*), 1282.

Solutions of the Education Question could only
be discussed as affecting Trinity College
(*Chairman*), 1492-3.

THEOLOGICAL COLLEGES:

Nature of Instruction given, Extent of Arts
teaching, etc. (*FitzGibbon*), 2259-60.

THEOLOGICAL FACULTY IN TRINITY COLLEGE:

Refer to title DIVINITY SCHOOL.

THOMPSON, DR.—King's Professor of Institutes of
Medicine.

Evidence, 2169-245.

THRIFT, MR.—Erasmus Smith's Professor Natural
and Experimental Philosophy.

Evidence, 1198-1209, 1223-4, 1226-32, 1234, 1257-
62, 1262-7, 1268-70, 1271-2, 1274, 1276.

TRAILL, DR.—Provost of Trinity College.
Evidence, 1-327, 2416-22.

TRINITY COLLEGE, CAMBRIDGE:

Close connection with Trinity College, Dublin
(Madden), 2508.
Fellows, Election of—Practice of taking external
opinions (Jackson), 1109.

TRINITY COLLEGE, DUBLIN:

Devoting itself too much to Professional Studies
rather than Arts—Miss White's State-
ment (Traill), 313.

Original Constitution—Autonomous College (Mad-
den), 2440.

University and College, Relations between—
Buildings, No University Buildings (Ber-
nard), 501-2.

Capture of the University by the College,
Question of (Bernard), 403-4.

Closeness of the Connection—

Called the "University of Trinity Col-
lege" in the Act of Union (Leech),
3313.

Union so close that if they were separa-
ted, the names might be retained,
but the reality would cease to exist
(Culverwell), 764 (p. 45).

Corporation—The University had never been
incorporated (Madden), 2450, 2454;
(Gray), 3920, 3922.

Burning Questions arising in other Uni-
versities out of relations of Colleges
to University, etc., had no existence
in Dublin (Gray), 3922.

Intention of Founders of Trinity College,
Question of—Meaning of *Collegium*
Mater Universitatis (Gray), 4063.

Money left to Corporation of the
University held to be left to Cor-
poration of Trinity College (Mad-
den), 2454.

Only University in the Kingdom not
Incorporated (Gray), 3922.

Robertson Commission Report, Extract
from (Madden), 2486.

Governing Body for the University as distinct
from the College, question of—No
advantage in establishing separate
Governing Body—Dual Machinery
extremely cumbersome (Bernard), 643.

No difference—Merely different aspects of the
same institution (Bernard), 496;
(Delany), 4501-2.

Mahaffy's, Dr., View (Madden), 2450,
2454.

Phrases Trinity College and University
of Dublin used as indicating the same
entity (Bernard), 401, 437.

Robertson Commission Report, Extract
from (Madden), 2486.

Professors and Fellows, Powers and Duties of
—Was any distinction desirable between
their duties and powers in respect of
College and University matters (Joly),
881-2.

University College, Recognition as by Charter of
James I., 1613 (Madden), 2441.

Work of—Catholic Opinion, the work was admir-
able for those who took advantage of it
(Browne), 4978A.

Refer also to names of Schemes—DUNRAVEN
SCHEME, SINGLE UNIVERSITY, etc.

TRINITY HALL:

Restoration to Trinity College question—Correc-
tion of Statement xix. of Appendix to
First Report (Thompson), 2241-5.

TUTORS AND TUTORIAL SYSTEM:

Abolition of, proposed (Leech), 3314-22.

Choice of, Tutor—Undergraduate was free to
choose (Mahaffy), 2678-9.

Division of Tutors into three Classes (Traill),
242.

Word Tutor meant not only the man whose
income came out of Tutorial Funds, but
also the man who had charge of pupils
(Tarleton), 511.

Doing very good work, but entailed a large ex-
pense on Fellowships (Traill), 119-22.

TUTORS AND TUTORIAL SYSTEM—continued.

Functions of the Tutor—

Director of Studies, but not a Class-taker
(Mahaffy), 2684-5.

Lecturer always—Required to Lecture for at
least two hours a day in term time
(Mahaffy), 2683.

Lectures supplemented by written work
(Mahaffy), 2703-4.

Number of Lectures per day, Labour involved,
&c. (Gwynn), 1159-61.

Two Lectures a day expected from each Tutor
(Mahaffy), 2698.

Incomes—

Effect of Number of Pupils on—The largest
additional sum was £120 (Mahaffy),
2680.

Loss of Income in some cases by falling
off in number of students during last
three years (Traill), 249-50.

Fellows who have pupils—£800 a year, some
of them more (Traill), 246.

Made up of a number of other things besides
Tutorial Fees (Traill), 247.

Means of Estimating Share of Tutorial Fees
accruing to any particular Tutor (Traill),
261.

Necessary for a Fellow to be a Tutor in order
to make a living (Gwynn), 1158.

Not a very large remuneration considering the
class of men (Traill), 248, 251.

Tutorial part of the Income was placed op-
posite the name of each Junior Fellow,
but did not appear in the Bursar's Ac-
count (Traill), 259-60.

Lectures.

Improvement of Lectures by making Office of
Tutor elective, Dr. Bernard's proposal—
Dr. Bernard could have brought his pro-
posal before the Council of the Board
but had not done so (Gray), 4009.

Number of Students in Classes (Mahaffy),
2701.

One an Honours Lecture, the other a Pass
Lecture (Mahaffy), 2699, 2742-3.

Neither Lecture was formal, they were
Catechetical (Mahaffy), 2700, 2702.

Limit to number of Pupils—Varied in each year,
total number would go up to more than
100 (Kelleher), 2680; (Mahaffy), 2681-2.

Number of Fellows habitually acting as Tutors
(Mahaffy), 2676-7.

All Junior Fellows not Professors were Tutors.
(Mahaffy), 2673-5.

No Tutors at present who were not Fellows.
(Traill), 162.

Objections to present System (Bernard), 592.

Opinion in favour of System (Rolleston), 3401.

Provisional Fellows—Bulk of the Tutorial work to
be done by proposed (Bernard), 593.

Reduction in number of Tutor Fellows taking
charge of pupils from 14 to 5—More time
for teaching or special Research (Traill),
152 (p. 11), 245, 261-2; (Tarleton), 510.

All Fellows not suitable for taking charge of
Pupils—Opportunity to select the best
five (Traill), 244-5.

Release from Tutorial Duties in case of dis-
tinguished men desiring to do Research.
Work (Joly), 1217-8, 1221-2.

Senior Tutors, Position of with regard to Honour
Lectures (Mahaffy), 2746-50, 2782-3.

Social Relations with Pupils (Mahaffy), 2690.

Statement on Tutor System to be prepared for the
Commission (Gwynn), 1192-6.

Tarleton's, Dr., Scheme (Tarleton), 503.

Time occupied by Tutorial Work—Two or three
hours a day (Traill), 261.

TYPE OF UNIVERSITY OR COLLEGE—PRESENT NEEDS OF
IRELAND:

Arts University, an Institution of which May-
nooth would be the Divinity School (Fitz-
Gibbon), 2336.

Modern Type of University where men could get
professional training, and Fees would be
lower than at Trinity (Bernard), 362,
407, 460, 477-8, 747-8; (Madden), 2548,
2554; (Magennis), 3096, 3100; (Delany),
4383.

TYPE OF UNIVERSITY OR COLLEGE—PRESENT NEEDS OF IRELAND—*continued*:Modern Type, &c.—*continued*:

- Catholic Bishops, attitude of (*Bernard*), 364-6.
- Catholics—Some would go to Trinity College, but the bulk of them would go to some other Institution (*Bernard*), 749-50.
- Competition—Effect on Social life of Country (*Bernard*), 751.
- Expenditure, Method of should not be prescribed (*Bernard*), 476.
- Older Studies included, but would not take the same position as in Dublin University (*Bernard*), 369-70.
- Protestants not excluded, but number of Protestants of type mentioned was much less than number of Catholics (*Bernard*), 363, 368.
- Students—Classes whom it would be advantageous to bring into the new institution (*Bernard*), 491-5.
- Trinity College—No gain in prestige by being associated with a new and untried Institution (*Bernard*), 462.
- Scale upon which provision should be made for Catholic University Education.
- Amount necessary—Cost of a Modern Battleship would be sufficient (*Bernard*), 474.
- Liberal Scale—Objections to system of counting heads, Three-fourths of the Irish people probably were Roman Catholics, but not three-fourths of the University-going Population (*Bernard*), 472-3.
- Trinity College and Dublin University—
- Ancient University which had kept pace with the times (*Beare*), 4879.
- Contact between University and outside World, Advantages of—Proposal to increase contact by means of University Lectures (*Madden*), 2551-2.
- Education given same type as that given at Oxford and Cambridge (*Madden*), 2555-6, 2558.
- Failure of from a national standpoint (*Magennis*), 2939.
- Agriculture, School of, Complaint of insufficient provision and lack of interest (*Magennis*), 2943-50.
- Economic and Social Studies, no provision for (*Magennis*), 2942.
- Education, School of—In its Infancy—Backwardness of Education in Ireland owing to lack of University Provision (*Magennis*), 2951-3.
- Mediæval—No account taken of the newer developments of thought, &c. (*Magennis*), 3109-10.
- Professional Schools, Provision for—School of Agriculture Established, &c. (*Bernard*), 461.

U.

UNIVERSITY COLLEGE, DUBLIN:

- Bringing over Staff and Students in event of re-organisation of Trinity College, proposed (*Synnott*), 1541 (p. 89).
- Commission had nothing to do with University College directly (*Chairman*), 4199.
- Curriculum—Lack of freedom to select own Courses—Objections to Senate System of the Royal University (*Magennis*), 2961-2, 3003.
- "Episcopal Domination" alleged—Bishops had never interfered in any way, and were content to have two priests and two bishops only on a Governing Body of twenty-four (*Delany*), 4281-2, 4493.
- Existence since time of Cardinal Newman, now known as University College, formerly called the Catholic University (*Magennis*), 2970-1, 3159.
- Fees charged (*Delany*), 4411.
- German Universities frequented by Students (*Delany*), 4516.
- Limitation of Thought and Narrowness of teaching charge, Reply to (*Delany*), 4493-4.

UNIVERSITY COLLEGE, DUBLIN—*continued*:

- Mixing of Students—Percentage of Non-Catholics (*Synnott*), 1541 (p. 89); (*Delany*), 4513.
- Attracted by lower Fees and greater elasticity of Scheme (*Delany*), 4514-5.
- Nucleus of an institution which it would be possible to increase and develop (*Magennis*), 2969, 2977.
- Additional Endowments, Local habitation and widened Constitution, proposed—Compatible with any of the three proposed solutions of the University Question (*Magennis*), 2978-9.
- Autonomy preferred—
- So long as Queen's College, Belfast (practically a Presbyterian Institution) was a constituent member of the Royal University, not possible to have the same advantages as might be got in Dublin University (*Magennis*), 2982.
- University College hampered by the Senate dictating courses, prescribing Books, etc. (*Magennis*), 2981-2, 3003.
- Royal University, connection with—
- Fellowships of the Royal University held by Professors in the College and only so long as they were Professors (*Magennis*), 2973-4.
- So close that the Royal University was really a Teaching Body as regarded University College (*Magennis*), 2972.
- Staff—
- Number of Professors (*Magennis*), 2967-8; (*Delany*), 4252-3.
- Philosophy, Professors of, three in number, subject ranked next to Theology in Catholic eyes (*Magennis*), 2954.
- Professors were Fellows of the Royal University mostly and receiving salaries as such (*Magennis*), 2967-8.
- Quite as good in Mathematics, Science, etc., as any College anywhere (*Magennis*), 2963-4.
- Religion of Professors—Preponderance of Roman Catholics, but there had been non-Catholics among them from the beginning (*Delany*), 4254-5.
- Episcopate, Attitude of—Predominance of Roman Catholics required but not exclusion of non-Catholics (*Delany*), 4256-7.
- Sources of Supply—Sufficient number of Graduates already trained (*Magennis*), 3112-4.
- Students, Number of (*Magennis*), 2965.
- Restricted by lack of accommodation (*Delany*), 4475, 4478.
- Women, Position of—Excluded from certain lectures but allowed to go in for examinations and win degrees (*O'Farrelly*), 4214, 4228, 4231, 4233.

UNIVERSITY COMMISSION OF 1851:

Reference to (*Joly*), 944.

V.

VICE-CHANCELLOR:

- Ecclesiastical Vice-Chancellors—Early Ordinance under which Vice-Chancellor could fine Professor of Divinity for neglect of duties (*Madden*), 2467.
- Powers of—Veto on degrees (*Madden*), 2451.

VICE-PROVOST:

- Expense to Trinity College if he had been retired at sixty-five (*Trill*), 152 (p. 10).
- Sinecure Office (*Trill*), 152 (p. 10), 194; (*Leech*), 3212 (p. 198).

VICTORIA COLLEGE, BELFAST:

- Request for Recognition as College under the University of Dublin. (*Miss Gwynn*), 2086.

VICTORIA UNIVERSITY:

- Colleges of former University, Existing connection between—Text of Victoria Clause (*Windle*), 3727.
- Instance of Centrifugal tendency of a Federal University (*Windle*), 3727; (*Rücker*), 4592.

VISITORS, BOARD OF:

Original Constitution of Board of Visitors—
Changes made by Laudian Statutes
(*Madden*), 2445..

W.

WAR:

Effect on number of Entrances at Trinity College
(*Gray*), 3911-2.

WELSH UNIVERSITY:

Degree in Theology, Offer to confer (*MacDermott*), 1315.

Federal University—Successful only to a limited
extent (*Hamilton*), 3615; (*Windle*), 3727.

WHITE, Miss H. M.—Principal of Alexandra College,
Dublin:—

Evidence, 4148-98.

WHITTAKER, Dr.—Royal Astronomer of Ireland, and
Andrews Professor of Astronomy:

Evidence, 1241-56, 1262.

WINDLE, Dr.—President of Queen's College, Cork:
Evidence, 3725-95.

WOMEN GRADUATES' ASSOCIATION:

Work of (*Miss Gwynn*), 2081-2.

WOMEN STUDENTS:

Admission to Trinity College—

Arrangements entirely satisfactory (*Hanan*),
4215, 4241.

Discussion on the matter for 20 years—Final
Decision in favour of Admission (*Traill*),
256.

Existing system—Requirement of Testi-
monials and Age Limit, Nothing more
(*Bernard*), 735-7.

Free Admission to Lectures given to men,
General desire for (*Miss Gwynn*), 2083,
2093.

Opinion in favour of (*Madden*), 2477.

Further opening of Classes so that Women
not wishing to go in for a Degree might
attend Classes on Subjects which
interested them, proposed—Doubtful ex-
periment (*Miss Gwynn*), 2103-5.

Opinion in favour of (*Bernard*), 599.

Women's School Association of Ireland
(afterwards Women Graduates' Associa-
tion), Work of (*Miss Gwynn*), 2081-2.

Age Limit, proposed (*Bernard*), 652, 655.

Eighteen

General Rule fixing limit at 18 with ex-
ception in favour of ladies above
17 who had passed the Senior
Grade in the preceding year, pro-
posed (*Miss Gwynn*), 2087-92, 2129.

Hard and Fast Rule, Objection to—Hard-
ship to exceptionally good Students
(*Miss Gwynn*), 2087.

Opinion in favour of (*Bernard*), 655-6;
(*Miss Gwynn*), 2070, 2144.

Entrance Prizes, Age limit for, no necessity
for a girl to come in early (*Miss
Gwynn*), 2135.

Newnham, Regulation at (*Miss Gwynn*),
2132-4.

Opinion in favour of a limit (*Bernard*), 594,
598 (*Madden*), 2477.

Seventeen—

Hard and Fast Rule that no woman stu-
dent should come into residence under
17—Opinion in favour of (*Miss
Gwynn*), 2124-9.

Opinion in favour of allowing a girl of
17 to pass Entrance Examination if
she could. She would be nearly 18
before beginning to attend Lectures
(*Miss Gwynn*), 2071-2.

Standard of Entrance Examination, Effect on
age of Candidates coming up (*Miss
Gwynn*), 2143.

WOMEN STUDENTS—continued:

Age limit, proposed—continued.

Tendency at Trinity to bring Students as
young as possible (*White*), 4184.

Witness had not seen any mischief aris-
ing from it (*White*), 4185.

Alexandra College, *see* that title.

Association with Male Students without restric-
tion—

American Conditions, Comparison with (*Miss
Gwynn*), 2165.

Mixed Classes in Chicago University—
Recent change in Regulations made
in accordance with Founder's wishes
(*O'Farrelly*), 4249.

Difficulties arising from "Co-education"—
No serious difficulties, the men had be-
haved very well (*Miss Gwynn*), 2130,
2159-60.

Effect of Admission of Women on Men's work
(*Miss Gwynn*), 2131.

Objections (*Bernard*), 594, 598; (*White*),
4184.

Separate benches for Laboratory Work, in
ordinary Arts course they went as they
pleased (*Miss Gwynn*), 2163-4.

Change in Academical opinion in Ireland since
1894 (*Madden*), 2476.

Class of Work done by Women—

Degree or University Examination aimed at
by all Women (*Miss Gwynn*), 2101-2.

Honours Courses taken by almost all women
Students (*Miss Gwynn*), 2076, 2145-7,
2161-2; (*Hanan*), 4249.

Success in Examinations—Number of Honour
Degrees taken by Women (*Miss Gwynn*),
2106.

Collegiate Life, Lack of (*Bernard*), 594.

Provost's House and Garden, Handing over
for the use of Women Students, proposed
(*Leech*), 3239-42, 3306.

Combination, Possibility of between the various
places devoted to Women's Education—
Difficulties of Distance and Denomina-
tional difficulties (*Bernard*), 614-5.

Exhibitions, *see* sub-heading Scholarships and
Exhibitions.

Facilities for University Education in Ireland
compared with those in England, Scot-
land and Wales—Witness's Statement too
general but true in the main (*O'Farrelly*),
4208-13.

Fellowships, Permission to stand for—Not de-
sirable under present conditions (*Miss
Gwynn*), 2106.

Honour Students, Provision for (*Traill*), 313.

Medical Students—

Attendance at Lectures on same conditions as
the men, all Lectures open to Women
(*Miss Gwynn*), 2080, 2156, 2158.

Physiology and Anatomy, Separate work in
—Separate dissecting room, etc.
(*Miss Gwynn*), 2111, 2157.

Number of Women Students, Number attending
Lectures (*Miss Gwynn*), 2076-80.

Roman Catholic Students, Number of—
None from St. Mary's (*Miss Gwynn*),
2168.

Object in demanding University Education—
First thought should be development of
the Individual, and foundation of
Character, not equipment for earning
a livelihood (*O'Farrelly*), 4234.

Order in which Universities had admitted Women
(*Madden*), 2477.

Trinity College the first of the three old
Universities of the United Kingdom to
admit Women to degrees (*Madden*), 2448.

Oxford and Cambridge. Women Students educated
at—Resolution that such women should
be treated up to Michaelmas Term, 1907,
as if they had the degrees they had earned
in those Universities (*Madden*), 2482.

Fees, Sum received in—Substantial balance
available on which Women had a special
claim (*Madden*), 2482-3.

Number of Women admitted to quasi *ad
eundem* degrees (*Madden*), 2482.

Previous Preparation of Students, Ignorance of
Latin in some cases alleged—Correction
(*Miss Gwynn*), 2097-100.

WOMEN STUDENTS—continued.

- Provision for Women Students at Trinity—Miss White's Complaint (*Trail*), 313.
- Recognition of Outside Institutions, Question of—Certain Courses in Alexandra College and other Women's Colleges, Recognition proposed (*Madden*), 2479-82, 2569-71.
- Alternative Scheme merely, not suggested that women students at Trinity should not take courses with men (*Madden*), 2569-71.
- Colleges outside Dublin, Recognition out of the question (*Madden*), 2482.
- Women's College in connection with University of Dublin or Royal University, Recognition of—Robertson Commission suggestion (*Madden*), 2477.
- Registrar—Lady Registrar to some extent responsible for the Women Students (*Bernard*), 594.
- Regulations made in 1903 (*Madden*), 2476.
- Residence Question—
- Girls allowed to live in lodgings with their brothers, alleged—One case where the brother was quite young and delicate (*Hanan*), 4247-8.
- Hostel for Women Students, proposed (*Miss Gwynn*), 2073-4, 2081.
- Alexandra College ought to have share in the management (*Bernard*), 664; (*White*), 4163.
- Class of Girls who would come to Hostels—same as Alexandra College Students (*Miss Gwynn*), 2107-9.
- Demand, Extent of—No great demand probable as long as Trinity allowed Women Students to live in rooms with their brothers (*White*), 4163.
- Opinion in favour of (*Madden*), 2482; (*Hanan*), 4236.
- Outside Trinity College and purely residential, proposed (*Miss Gwynn*), 2166.
- Regulation proposed, that Women Students should live either with their Parents or in a recognised Hostel (*Bernard*), 598.
- Lodgings not satisfactory (*Miss Gwynn*), 2073.
- Majority lived with parents, relations or friends (*Miss Gwynn*), 2073.
- No Hostel or Residence provided (*Bernard*), 594.
- Rooms set apart for Women Students—Reading-room, Cloak-room, &c. (*Bernard*), 653; (*Hanan*), 4237-8.
- Social Life—Nothing in the way of a Club where Women Students could enjoy advantages of College Life in the same way as men (*Bernard*), 654.
- Royal University and Women Students.
- Charter supposed to be open equally to men and women (*O'Farrelly*), 4205.
- Exclusion of Women from certain Lectures in one of the Teaching Colleges of the University (*O'Farrelly*), 4228.
- Graduates, Proportion of Women among (*O'Farrelly*), 4205.

WOMEN STUDENTS—continued.

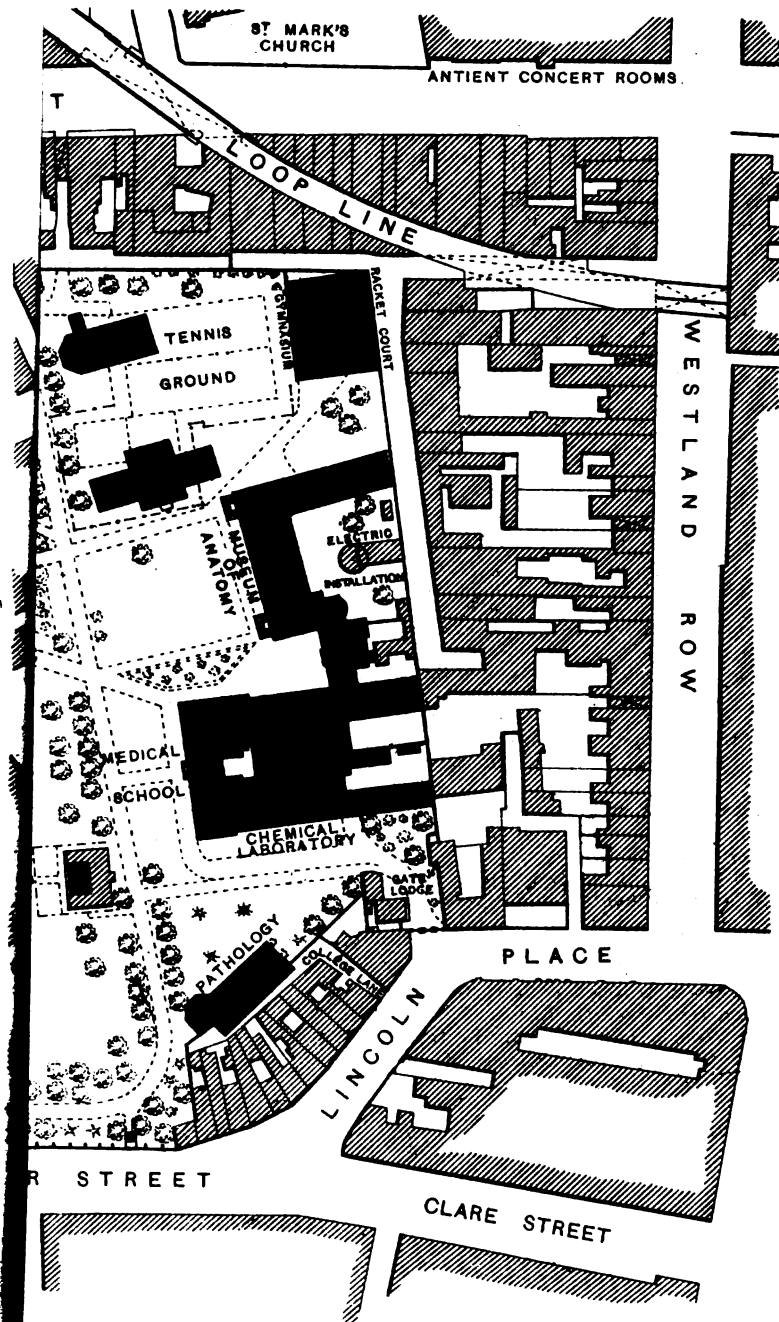

- Royal University Commission—Favourable to claims of Women Students (*O'Farrelly*), 4249.
- Scholarships and Exhibitions.
- Middle Grade Exhibitions—Would be deprived of the privilege of taking up Exhibition if under the proposed Age Limit (*Bernard*), 657-9.
- Nutting Exhibitions invariably went to Senior Grade Students (*Miss Gwynn*), 2136.
- Women were eligible (*Trail*), 326.
- Separate Classes for Women, Question of.
- Honour Classes, Students attending—Different considerations applied. They were comparatively few and all serious Students, and it would be almost impossible to duplicate (*White*), 4190-1.
- Laboratory Work—Bench on one side of the room devoted to Women Students (*Miss Gwynn*), 2122.
- Parents, Class of, desiring separate teaching for their daughters.
- Class had given no evidence of its existence, (*Hanan*), 4222-3.
- Class undoubtedly existed, Letters received from Parents, etc. (*White*), 4155, 4187-9.
- Provision in Trinity College to meet wishes of such Parents (*Miss Gwynn*), 2111, 2122, 2157.
- Further Provision, Question of (*Miss Gwynn*), 2114-5, 2117-21; (*Madden*), 2477; (*White*), 4156-8.
- Witness had not come in contact with such parents possibly owing to her position (*Miss Gwynn*), 2110, 2112, 2116.
- Pass Classes—Rather absurd since Honours Lectures had to be taken with the men (*Miss Gwynn*), 2094-6.
- Principle practically carried out in Freshman years and as far as possible in the Senior Freshman (*Hanan*), 4243.
- Size of Classes caused a large amount of the Teaching to be indifferent at present (*Leech*), 3237, 3302-3, 3347.
- Teaching Profession—Large proportion of Women Students qualifying for (*Bernard*), 660-1.
- Pass Degree would not give all the necessary preparation for teaching—Alexandra College might be able to make better arrangements if given a free hand (*Bernard*), 662-3.
- University College, Dublin, position at—(*O'Farrelly*), 4214, 4228, 4231, 4233.

WOMEN'S SCHOOL ASSOCIATION OF IRELAND:
Work of (*Miss Gwynn*), 2081.

Z.

ZOOLOGY AND BOTANY FOR PASS STUDENTS:
